## **Table of Contents**

The Company accounted for the acquisitions using the acquisition method and included the results of operations of the acquisitions in its consolidated financial statements from the effective date of each acquisition. The Company is in the process of obtaining a third-party valuation of certain tangible and intangible assets of Whippany Actuation, Arkwin, Aerosonic and Aero-Instruments; therefore, the values attributed to those acquired assets in the consolidated financial statements are subject to adjustment. Pro forma net sales and results of operations for the acquisitions had they occurred at the beginning of the applicable thirteen and thirty-nine week periods ended June 29, 2013 or June 30, 2012, are not significant and, accordingly, are not provided.

The acquisitions strengthen and expand the Company's position to design, produce and supply highly-engineered proprietary aerospace components in niche markets with significant aftermarket content and provide opportunities to create value through the application of our three core value-driven operating strategies (obtaining profitable new business, improving our cost structure, and providing highly engineered value-added products to customers). The purchase price paid for each acquisition reflects the current earnings before interest, taxes, depreciation and amortization (EBITDA) and cash flows, as well as, the future EBITDA and cash flows expected to be generated by the business, which are driven in most cases by the recurring aftermarket consumption over the life of a particular aircraft, estimated to be approximately 30 years.

#### **4. RECENT ACCOUNTING PRONOUNCEMENTS**

In June 2011, the Financial Accounting Standards Board ( FASB ) issued authoritative accounting guidance included in Accounting Standards Codification ( ASC ) Topic 220, *Comprehensive Income*. This guidance eliminates the option to report other comprehensive income and its components in the statement of changes in equity. Companies can elect to present items of net income and other comprehensive income in one continuous statement or in two separate, but consecutive, statements. The Company adopted the presentation guidance during the first quarter of fiscal 2013 and has elected to present two separate consecutive statements.

In September 2011, the FASB issued authoritative accounting guidance included in ASC Topic 350, *Intangibles Goodwill and Other*. This guidance amends the requirements for goodwill impairment testing. The Company has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, the Company determines it is more likely than not that the fair value of a reporting unit is greater than its carrying amount, then performing the two-step impairment test is unnecessary. This guidance is effective for the Company for its annual goodwill impairment testing for the year ending September 30, 2013. The Company does not expect this guidance to have a significant impact on the Company's consolidated results of operations, financial position or cash flows.

In July 2012, the FASB issued authoritative guidance included in ASC Topic 350, *Intangibles Goodwill and Other*. This guidance permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of an indefinite-lived intangible asset is impaired, as a basis for determining whether it is necessary to perform the quantitative impairment test described in FASB ASC Topic 350, *Intangibles Goodwill and Other*. This guidance is effective for the Company for its annual impairment testing for the year ending September 30, 2013. The Company does not expect this guidance to have a significant impact on the Company's consolidated results of operations, financial position or cash flows.

**9. INCOME TAXES**

At the end of each reporting period, TD Group makes an estimate of its annual effective income tax rate. The estimate used in the year-to-date period may change in subsequent periods. During the thirteen week periods ended June 29, 2013 and June 30, 2012, the effective income tax rate was 32.9% and 30.7%, respectively. The lower effective tax rate for the thirteen week period ended June 30, 2012 was primarily due to discrete items related to IRS settlements and adjustments resulting from the filing of the previous year's federal tax return. During the thirty-nine week periods ended June 29, 2013 and June 30, 2012, the effective income tax rate was 32.5% and 32.6%, respectively. The Company's effective tax rate for these periods was less than the Federal statutory tax rate due primarily to the domestic manufacturing deduction.

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction, various state and local jurisdictions as well as foreign jurisdictions located in Belgium, China, France, Malaysia, Mexico, Singapore, Sri Lanka and the United Kingdom. The Company is no longer subject to U.S. federal examinations for years before fiscal 2011. AmSafe is subject to U.S. federal examinations for the 2008, 2009, 2010 and 2011 years. In addition, the Company is subject to state income tax examinations for fiscal years 2009 and later.

At June 29, 2013 and September 30, 2012, TD Group had \$7.1 million and \$6.9 million in unrecognized tax benefits, the recognition of which would have an effect of approximately \$6.5 million and \$6.3 million on the effective tax rate at June 29, 2013 and September 30, 2012, respectively. The Company does not believe that the tax positions that comprise the unrecognized tax benefit amount will change significantly over the next 12 months. The Company recognizes accrued interest and penalties related to unrecognized tax benefits in income tax expense.

**10. FAIR VALUE MEASUREMENTS**

The following tables present our assets and liabilities that are measured at fair value on a recurring basis and are categorized using the fair value hierarchy. The fair value hierarchy has three levels based on the reliability of the inputs used to determine fair value. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs (other than quoted prices) that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs for the asset or liability. A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

The Company's risk management program is designed to manage the exposure and volatility arising from these risks, and utilizes derivative financial instruments to offset a portion of these risks. The Company uses derivative financial instruments only to the extent necessary to hedge identified business risks and does not enter into such transactions for trading purposes. The Company generally does not require collateral or other security with counterparties to these financial instruments and is therefore subject to credit risk in the event of nonperformance; however, the Company monitors credit risk and currently does not anticipate nonperformance by other parties.

At June 29, 2013, three forward-starting interest rate swap agreements were in place to swap variable rates on the 2013 Credit Facility for a fixed rate based on an aggregate notional amount of \$353 million. These interest rate swap agreements converted the variable interest rate on the aggregate notional amount of the 2013 Credit Facility to a fixed rate of 5.17% (2.17% plus the 3% margin percentage) through June 30, 2015.

Interest rate swap agreements are used to manage interest rate risk associated with floating-rate borrowings under our 2013 Credit Facility. The interest rate swap agreements utilized by the Company effectively modify the Company's exposure to interest rate risk by converting a portion of the Company's floating-rate debt to a fixed rate basis through the expiration date of the interest rate swap agreements, thereby reducing the impact of interest rate changes on future interest expense. These agreements involve the receipt of floating rate amounts in exchange for fixed rate interest payments over the term of the agreements without an exchange of the underlying principal amount. Prior to February 28, 2013, these derivative instruments qualified as effective cash flow hedges under GAAP. For these cash flow hedges, the effective portion of the gain or loss from the financial instruments was initially reported as a component of accumulated other comprehensive income (loss) in stockholders equity and subsequently reclassified into earnings in the same line as the hedged item in the same period or periods during which the hedged item affected earnings.

In conjunction with the refinancing of the 2011 Credit Facility, the Company no longer designated the interest rate swap agreements as cash flow hedges for accounting purposes. Accordingly, amounts previously recorded as a component of accumulated other comprehensive loss in stockholder's equity will be amortized into earnings over the remaining period of the swap agreements. The net after-tax loss included in accumulated other comprehensive loss to be reclassified into interest expense over the remaining term of the swap agreement was \$5.6 million at June 29, 2013.

**12. STOCK-BASED COMPENSATION**

In connection with the \$12.85 special cash dividend paid in November 2012, in order to take into account the earlier return of capital, the TD Group compensation committee adjusted the market-based vesting features in outstanding options pursuant to the authority granted to the committee under the TD Group stock incentive plan. Under this market sweep provision, unvested options granted prior to October 1, 2011 would accelerate and become fully vested if the closing price of the Company's common stock exceeded \$147.15 per share (previously \$160 per share) on any 60 trading days during any consecutive 12-month period commencing March 1, 2013 and unvested options granted in fiscal 2012 would accelerate and become fully vested if the closing price of the Company's common stock exceeded \$157.15 per share (previously \$170 per share) on any 60 trading days during any consecutive 12-month period commencing two years from the date of grant. Options granted in fiscal 2013 do not contain such accelerated vesting provision.

During June 2013, a total of 2,409,420 unvested options granted prior to October 1, 2011 with a weighted-average exercise price per option of \$58.35 became fully vested under the market sweep provision. Due to the accelerated vesting, the Company recorded additional stock compensation expense of \$24.5 million representing costs that would have been recognized over the remaining requisite service period of the award. In conjunction with the accelerated vesting under the market sweep provision, in July 2013 the Company made \$38.0 million of dividend equivalent payments related to the October 2009 special cash dividend payment of \$7.65 per share and the October 2012 special cash dividend payment of \$12.85 per share for unvested options granted prior to October 1, 2011 that became fully vested.

**13. SEGMENT INFORMATION**

During TransDigm's third quarter ended June 29, 2013, the Company changed its internal management structure and its reporting structure of financial information used to assess performance and allocate resources. The Company's businesses are organized and managed in three reporting segments: Power & Control, Airframe and Non-aviation.

The Power & Control segment includes operations that primarily develop, produce and market systems and components that predominately provide power to or control power of the aircraft utilizing electronic, fluid, power and mechanical motion control technologies. Primary customers of this segment are engine and power system and subsystem suppliers, airlines, third party maintenance suppliers, military buying agencies and repair depots. Products are sold in the original equipment and aftermarket market channels.

The Airframe segment includes operations that primarily develop, produce and market systems and components that are used in non-power airframe applications utilizing airframe and cabin structure technologies. Primary customers of this segment are airframe manufacturers and cabin system suppliers and sub system suppliers, airlines, third party maintenance suppliers, military buying agencies and repair depots. Products are sold in the original equipment and aftermarket market channels.

The Non-aviation segment includes operations that primarily develop, produce and market products for non-aviation markets. Primary customers of this segment are off road vehicle suppliers and sub system suppliers, child restraint system suppliers, satellite and space system suppliers and fueling system components primarily for the mining industry.

The primary measurements used by management to review and assess the operating performance of each segment are segment net sales, segment EBITDA As Defined and related margin percentage of segment net sales. The Company defines EBITDA As Defined as earnings before interest, taxes, depreciation and amortization plus certain non-operating items including refinancing costs, acquisition-related costs, transaction-related costs and non-cash compensation charges incurred in connection with the Company's stock option plans. Acquisition-related costs represent accounting adjustments to inventory associated with acquisitions of businesses and product lines that were charged to cost of sales when the inventory was sold; costs incurred to integrate acquired businesses and product lines into the Company's operations, facility relocation costs and other acquisition-related costs; transaction related costs comprising deal fees; legal, financial and tax diligence expenses and valuation costs that are required to be expensed as incurred and other acquisition accounting adjustments.

EBITDA As Defined is not a measurement of financial performance under accounting principles generally accepted in the United States of America (GAAP). Although we use EBITDA As Defined to assess the performance of our business and for various other purposes, the use of this non-GAAP financial measure as an analytical tool has limitations, and you should not consider it in isolation, or as a substitute for analysis of our results of operations as reported in accordance with GAAP.

The Company's segments are reported on the same basis used internally for evaluating performance and for allocating resources. The accounting policies for each segment are the same as those described in the summary of significant accounting policies in the Company's consolidated financial statements. Intersegment sales and transfers are recorded at values based on market prices, which creates intercompany profit on intersegment sales or transfers that is eliminated in consolidation. Intersegment sales were insignificant for the periods presented below.

### **Non-GAAP Financial Measures**

We present below certain financial information based on our EBITDA and EBITDA As Defined. References to EBITDA mean earnings before interest, taxes, depreciation and amortization, and references to EBITDA As Defined mean EBITDA plus, as applicable for each relevant period, certain adjustments as set forth in the reconciliations of net income to EBITDA and EBITDA As Defined and the reconciliations of net cash provided by operating activities to EBITDA and EBITDA As Defined presented below.

Neither EBITDA nor EBITDA As Defined is a measurement of financial performance under accounting principles generally accepted in the United States of America ( GAAP ). We present EBITDA and EBITDA As Defined because we believe they are useful indicators for evaluating operating performance and liquidity.

Our management believes that EBITDA and EBITDA As Defined are useful as indicators of liquidity because securities analysts, investors, rating agencies and others use EBITDA to evaluate a company's ability to incur and service debt. In addition, EBITDA As Defined is useful to investors because our revolving credit facility under our senior secured credit facility requires compliance, on a pro forma basis, with a financial covenant that measures the ratio of the amount of our secured indebtedness to the amount of our Consolidated EBITDA defined in the same manner as we define EBITDA As Defined herein. This financial covenant is a material term of our senior secured credit facility as the failure to comply with such financial covenant could result in an event of default in respect of the revolving credit facility (and such an event of default could, in turn, result in an event of default under the indentures governing our 7<sup>3</sup>/<sub>4</sub>% Senior Subordinated Notes due 2018, 5<sup>1</sup>/<sub>2</sub>% Senior Subordinated Notes due 2020 and our 7<sup>1</sup>/<sub>2</sub>% Senior Subordinated Notes due 2021).

In addition to the above, our management uses EBITDA As Defined to review and assess the performance of the management team in connection with employee incentive programs and to prepare its annual budget and financial projections. Moreover, our management uses EBITDA As Defined to evaluate acquisitions.

Although we use EBITDA and EBITDA As Defined as measures to assess the performance of our business and for the other purposes set forth above, the use of these non-GAAP financial measures as analytical tools has limitations, and you should not consider any of them in isolation, or as a substitute for analysis of our results of operations as reported in accordance with GAAP. Some of these limitations are:

neither EBITDA nor EBITDA As Defined reflects the significant interest expense, or the cash requirements necessary to service interest payments, on our indebtedness;

although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and neither EBITDA nor EBITDA As Defined reflects any cash requirements for such replacements;

the omission of the substantial amortization expense associated with our intangible assets further limits the usefulness of EBITDA and EBITDA As Defined;

neither EBITDA nor EBITDA As Defined includes the payment of taxes, which is a necessary element of our operations; and

EBITDA As Defined excludes the cash expense we have incurred to integrate acquired businesses into our operations, which is a necessary element of certain of our acquisitions.

## Edgar Filing: TransDigm Group INC - Form 10-Q

Because of these limitations, EBITDA and EBITDA As Defined should not be considered as measures of discretionary cash available to us to invest in the growth of our business. Management compensates for these limitations by not viewing EBITDA or EBITDA As Defined in isolation and specifically by using other GAAP measures, such as net income, net sales and operating profit, to measure our operating performance. Neither EBITDA nor EBITDA As Defined is a measurement of financial performance under GAAP, and neither should be considered as an alternative to net income or cash flow from operations determined in accordance with GAAP. Our calculation of EBITDA and EBITDA As Defined may not be comparable to the calculation of similarly titled measures reported by other companies.

**Table of Contents**

The increase in the dollar amount of cost of sales during the thirteen week period ended June 29, 2013 was primarily due to increased volume associated with the sales from acquisitions and organic sales growth and higher stock compensation expense related to the accelerated vesting under the market sweep provision for all options granted prior to October 1, 2011 offset by lower acquisition-related costs as shown in the table above.

Gross profit as a percentage of sales increased by 0.1 percentage points to 55.0% for the thirteen week period ended June 29, 2013 from 54.9% for the thirteen week period ended June 30, 2012. The dollar amount of gross profit increased by \$15.7 million, or 6.2%, for the quarter ended June 29, 2013 compared to the comparable quarter last year due to the following items:

Gross profit on the sales from the acquisitions indicated above (excluding acquisition-related costs) was approximately \$6 million for the quarter ended June 29, 2013, which represented gross profit of approximately 41% of the acquisition sales.

Impact of lower inventory purchase accounting adjustments and acquisition integration costs charged to cost of sales of approximately \$5 million.

Organic sales growth described above, application of our three core value-driven operating strategies (obtaining profitable new business, continually improving our cost structure, and providing highly engineered value-added products to customers), and positive leverage on our fixed overhead costs spread over a higher production volume, partially offset by unfavorable OEM versus aftermarket sales mix, resulted in a net increase in gross profit of approximately \$12 million for the quarter ended June 29, 2013.

The gross profit increase described above was partially offset by higher stock compensation expense of \$4 million mainly due to the accelerated vesting under the market sweep provision for all options granted prior to October 1, 2011.

**Selling and Administrative Expenses.** Selling and administrative expenses increased by \$26.7 million to \$82.8 million, or 16.9% of sales, for the thirteen week period ended June 29, 2013 from \$56.1 million, or 12.2% of sales, for the thirteen week period ended June 30, 2012. The increase in the dollar amount of selling and administrative expenses during the quarter ended June 29, 2013 is primarily due to additional stock compensation expense of approximately \$21 million recorded in June 2013 related to the accelerated vesting under the market sweep provision for all options granted prior to October 1, 2011. In addition, selling and administrative expenses during the quarter ended June 29, 2013 increased due to higher acquisition related expenses of approximately \$5 million as shown in the table above.

**Amortization of Intangibles.** Amortization of intangibles decreased to \$9.5 million for the quarter ended June 29, 2013 from \$11.3 million for the comparable quarter last year. The net decrease of \$1.8 million was primarily due to order backlog relating to prior acquisitions becoming fully amortized partially offset by increased amortization expense related to the additional identifiable intangible assets recognized in connection with acquisitions during the last twelve months.

**Interest Expense-net.** Interest expense-net includes interest on outstanding borrowings, amortization of debt issue costs and revolving credit facility fees offset by interest income. Interest expense-net increased \$7.1 million, or 12.8%, to \$62.5 million for the quarter ended June 29, 2013 from \$55.4 million for the comparable quarter last year. The net increase in interest expense-net was primarily due to an increase in the weighted average level of outstanding borrowings, which was approximately \$4.34 billion for the quarter ended June 29, 2013 and approximately \$3.63 billion for the quarter ended June 30, 2012. The increase in borrowings was due to the additional \$150 million term loan facility under the amendment to our 2011 Credit Facility which occurred in October 2012, additional borrowings of \$36.4 million relating to our refinancing of the 2011 Credit Facility in February 2013, and the issuance in October 2012 of our \$550 million 5 1/2% Senior Subordinated Notes due 2020.

**Income Taxes.** Income tax expense as a percentage of income before income taxes was approximately 32.9% for the quarter ended June 29, 2013 compared to 30.7% for the quarter ended June 30, 2012. The lower effective tax rate for the thirteen week period ended June 30, 2012 was primarily due to discrete items related to IRS settlements and adjustments resulting from the filing of the previous year's federal tax return.

**Net Income.** Net income decreased \$13.8 million, or 15.2%, to \$76.7 million for the quarter ended June 29, 2013 compared to net income of \$90.4 million for the quarter ended June 30, 2012. The decrease in net income was primarily due to the after-tax additional stock compensation expense recorded in June 2013 of \$16.5 million, or \$0.30 per share, related to the accelerated vesting under the market sweep provision for all options granted prior to October 1, 2011.

**Earnings per Share.** The basic and diluted earnings per share were \$0.71 for the quarter ended June 29, 2013 and \$1.68 per share for the quarter ended June 30, 2012. Net income for the thirteen week period ended June 29, 2013 of \$76.7 million was decreased by an allocation of dividends on participating securities of \$38.0 million, or \$0.70 per share, resulting in net income available to common shareholders of \$38.7 million. The decrease in earnings per share of \$1.68 per share to \$0.71 per share is a result of the factors referred to above.

The increase in the dollar amount of cost of sales during the thirty-nine week period ended June 29, 2013 was primarily due to increased volume associated with the sales from acquisitions and organic sales growth and higher stock compensation expense related to the accelerated vesting under the market sweep provision for all options granted prior to October 1, 2011 offset by lower acquisition-related costs as shown in the table above.

Gross profit as a percentage of sales decreased by 0.3 percentage points to 55.4% for the thirty-nine week period ended June 29, 2013 from 55.7% for the thirty-nine week period ended June 30, 2012. The dollar amount of gross profit increased by \$77.9 million, or 11.3%, for the thirty-nine week period ended June 29, 2013 compared to the comparable period last year due to the following items:

Gross profit on the sales from the acquisitions indicated above (excluding acquisition-related costs) was approximately \$59 million for the thirty-nine week period ended June 29, 2013, which represented gross profit of approximately 47% of the acquisition sales.

Impact of lower inventory purchase accounting adjustments and acquisition integration costs charged to cost of sales of approximately \$11 million.

Organic sales growth described above, application of our three core value-driven operating strategies (obtaining profitable new business, continually improving our cost structure, and providing highly engineered value-added products to customers), and positive leverage on our fixed overhead costs spread over a higher production volume, partially offset by unfavorable OEM versus aftermarket sales mix, resulted in a net increase in gross profit of approximately \$27 million for the thirty-nine week period ended June 29, 2013.

## Edgar Filing: TransDigm Group INC - Form 10-Q

The gross profit increase described above was partially offset by higher stock compensation expense of \$5 million mainly due to the accelerated vesting under the market sweep provision for all options granted prior to October 1, 2011 and the impact of the favorable retroactive contract pricing adjustments that were higher in the prior year by approximately \$14 million.

The increase in the dollar amount of selling and administrative expenses during the thirty-nine week period ended June 29, 2013 is due to additional stock compensation expense of approximately \$21 million recorded in June 2013 related to the accelerated vesting under the market sweep provision for all options granted prior to October 1, 2011. In addition, selling and administrative expenses during the thirty-nine week period ended June 29, 2013 increased due to higher selling and administrative expenses relating to recent acquisitions of approximately \$19 million, which was approximately 15% of the acquisition sales.

**Amortization of Intangibles.** Amortization of intangibles decreased to \$29.8 million for the thirty-nine week period ended June 29, 2013 from \$33.1 million for the comparable period last year. The net decrease of \$3.4 million was primarily due to order backlog relating to prior acquisitions becoming fully amortized offset by amortization expense related to the additional identifiable intangible assets recognized in connection with acquisitions during the last twelve months.

**Refinancing Costs.** Refinancing costs of \$30.3 million were recorded during the thirty-nine week period ended June 29, 2013 representing debt issue costs expensed in conjunction with the refinancing of our 2010 Credit Facility and 2011 Credit Facility in February 2013.

**Interest Expense-net.** Interest expense-net includes interest on outstanding borrowings, amortization of debt issue costs and revolving credit facility fees offset by interest income. Interest expense-net increased \$32.7 million, or 20.9%, to \$189.4 million for the thirty-nine week period ended June 29, 2013 from \$156.8 million for the comparable period last year. The net increase in interest expense-net was primarily due to an increase in the weighted average level of outstanding borrowings, which was approximately \$4.29 billion for the thirty-nine week period ended June 29, 2013 and approximately \$3.62 billion for the thirty-nine week period ended June 30, 2012. The increase in borrowings was due to the additional \$500 million and \$150 million term loan facilities under the amendments to our 2011 Credit Facility which occurred in February 2012 and October 2012, respectively, additional borrowings of \$36.4 million relating to our refinancing of the 2011 Credit Facility in February 2013, and the issuance in October 2012 of our \$550 million 5<sup>1</sup>/<sub>2</sub>% Senior Subordinated Notes due 2020. The weighted average interest rate on total outstanding borrowings at June 29, 2013 was 5.5%.

**Income Taxes.** Income tax expense as a percentage of income before income taxes was approximately 32.5% for the thirty-nine week period ended June 29, 2013 compared to 32.6% for the thirty-nine week period ended June 30, 2012. The Company's effective tax rate for

Edgar Filing: TransDigm Group INC - Form 10-Q

these periods was less than the Federal statutory tax rate due primarily to the domestic manufacturing deduction.

**Net Income.** Net income decreased \$18.3 million, or 7.7%, to \$218.8 million for the thirty-nine week period ended June 29, 2013 compared to net income of \$237.1 million for the thirty-nine week period ended June 30, 2012. The decrease in net income was primarily due to the after-tax impact of \$20.4 million, or \$0.38 per share, related to the refinancing costs recorded during the period and the after-tax additional stock compensation expense recorded in June 2013 of \$16.5 million, or \$0.30 per share, related to the accelerated vesting under the market sweep provision for all options granted prior to October 1, 2011. The decrease noted above was partially offset by an increase in net income from operations.

**Earnings per Share.** The basic and diluted earnings per share were \$2.62 for the thirty-nine week period ended June 29, 2013 and \$4.34 per share for the thirty-nine week period ended June 30, 2012. Net income for the thirty-nine week period ended June 29, 2013 of \$218.8 million was decreased by an allocation of dividends on participating securities of \$76.1 million, or \$1.40 per share, resulting in net income available to common shareholders of \$142.7 million. Net income for the thirty-nine week period ended June 30, 2012 of \$237.1 million was decreased by an allocation of dividends on participating securities of \$3.3 million, or \$0.06 per share, resulting in net income available to common shareholders of \$233.8 million. The decrease in earnings per share of \$4.34 per share to \$2.62 per share is a result of the factors referred to above.

Excluding the impact of the OEM retroactive contract pricing adjustments and prior year sales related to the AmSafe distribution business, organic sales growth was \$31.9 million when compared to the thirty-nine week period ended June 30, 2012. The organic sales increase was primarily due to an increase in commercial OEM sales of \$34.5 million, or an increase of 13.5%, and an increase in defense sales of \$5.8 million, or an increase of 7.6%, offset by a decline in commercial aftermarket sales of \$8.4 million, or a decrease of 3.2%.

### **Backlog**

As of June 29, 2013, the Company estimated its sales order backlog at \$1,107 million compared to an estimated sales order backlog of \$824 million as of June 30, 2012. The increase in backlog is primarily due to acquisitions, totaling approximately \$212 million, and an increase in orders across existing OEM product lines and to a lesser extent the aftermarket. The majority of the purchase orders outstanding as of June 29, 2013 are scheduled for delivery within the next twelve months. Purchase orders may be subject to cancellation or deferral by the customer prior to shipment. The level of unfilled purchase orders at any given date during the year will be materially affected by the timing of the Company's receipt of purchase orders and the speed with which those orders are filled. Accordingly, the Company's backlog as of June 29, 2013 may not necessarily represent the actual amount of shipments or sales for any future period.

### **Foreign Operations**

Although we manufacture a significant portion of our products in the United States, we manufacture some products in Belgium, China, Malaysia, Mexico, Sri Lanka and the United Kingdom. We sell our products in the United States as well as in foreign countries. Although the majority of sales of our products are made to customers including distributors located in the United States, our products are ultimately sold to and used by customers, including airlines and other end users of aircraft, throughout the world. A number of risks inherent in international operations could have a material adverse effect on our results of operations, including currency fluctuations, difficulties in staffing and managing multi-national operations, general economic and political uncertainties and potential for social unrest in countries in which we operate, limitations on our ability to enforce legal rights and remedies, restrictions on the repatriation of funds, change in trade policies, tariff regulation, difficulties in obtaining export and import licenses and the risk of government financed competition.

There can be no assurance that foreign governments will not adopt regulations or take other action that would have a direct or indirect adverse impact on the business or market opportunities of the Company within such governments' countries. Furthermore, there can be no assurance that the political, cultural and economic climate outside the United States will be favorable to our operations and growth strategy.

At June 29, 2013, three forward-starting interest rate swap agreements were in place to swap variable rates on the 2013 Credit Facility for a fixed rate based on an aggregate notional amount of \$353 million. These interest rate swap agreements converted the variable interest rate on the aggregate notional amount of the 2013 Credit Facility to a fixed rate of 5.17% (2.17% plus the 3% margin percentage) through June 30, 2015.

All of the indebtedness outstanding under the 2013 Credit Facility is guaranteed by TD Group and all of TransDigm's current and future domestic restricted subsidiaries (other than immaterial subsidiaries). In addition, the obligations of TransDigm and the guarantors under the 2013 Credit Facility are secured ratably in accordance with each lender's respective revolving and term loan commitments by a first priority security interest in substantially all of the existing and future property and assets, including inventory, equipment, general intangibles, intellectual property, investment property and other personal property (but excluding leasehold interests and certain other assets) of TransDigm and its existing and future domestic restricted subsidiaries (other than immaterial subsidiaries), and a first priority pledge of the capital stock of TransDigm and its subsidiaries (other than foreign subsidiaries and certain domestic subsidiaries, of which 65% of the voting capital stock is pledged).

In addition, subject to certain exceptions (including, with respect to asset sales, the reinvestment in productive assets), TransDigm will be required to prepay the loans outstanding under the term loan facility at 100% of the principal amount thereof, plus accrued and unpaid interest, with the net cash proceeds of certain asset sales and issuance or incurrence of certain indebtedness. In addition, if, prior to February 28, 2014, the principal amount of the term loans are (i) prepaid substantially concurrently with the incurrence by TD Group, TransDigm or any its subsidiaries of new bank loans that have an effective yield lower than the yield in effect on the term loans so prepaid or (ii) received by a lender due to a mandatory assignment following the failure of such lender to consent to an amendment of the 2013 Credit Facility that has the effect of reducing the effective interest rate with respect to the term loans, such prepayment or receipt shall be accompanied by a premium of 1.0%.

The 2013 Credit Facility contains certain covenants that limit the ability of TD Group, TransDigm and TransDigm's restricted subsidiaries to, among other things: (i) incur or guarantee additional indebtedness or issue preferred stock; (ii) pay distributions on, redeem or repurchase capital stock or redeem or repurchase subordinated debt; (iii) make investments; (iv) sell assets; (v) enter into agreements that restrict distributions or other payments from restricted subsidiaries to TransDigm; (vi) incur or suffer to exist liens securing indebtedness; (vii) consolidate, merge or transfer all or substantially all of their assets; and (viii) engage in transactions with affiliates.

In addition, following an event of default under the 2013 Credit Facility, the lenders thereunder will have the right to proceed against the collateral granted to them to secure the debt, which includes our available cash, and they will also have the right to prevent us from making debt service payments on the 2018 Notes, 2020 Notes and 2021 Notes.

*Stock Repurchase Program*

On August 22, 2011 we announced a program permitting us to repurchase a portion of our outstanding shares not to exceed \$100 million in the aggregate. At June 29, 2013, the Company had repurchased 11,300 shares of its common stock at a gross cost of approximately \$0.8 million at a weighted-average price per share of \$74.87. No repurchases were made under the program during the quarter ended June 29, 2013.

**Recent Accounting Pronouncement**

In June 2011, the Financial Accounting Standards Board ( FASB ) issued authoritative accounting guidance included in Accounting Standards Codification ( ASC ) Topic 220, *Comprehensive Income*. This guidance eliminates the option to report other comprehensive income and its components in the statement of changes in equity. Companies can elect to present items of net income and other comprehensive income in one continuous statement or in two separate, but consecutive, statements. The Company adopted the presentation guidance during the first quarter of fiscal 2013 and has elected to present two separate consecutive statements.

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK**

Our main exposure to market risk relates to interest rates. Our financial instruments that are subject to interest rate risk principally include fixed-rate and floating-rate long-term debt. At June 29, 2013, we had borrowings under our 2013 Credit Facility of \$2.19 billion that were subject to interest rate risk. Borrowings under our 2013 Credit Facility bear interest, at our option, at a rate equal to either an alternate base rate or an adjusted LIBO rate for a one-, two-, three- or six-month (or to the extent available to each lender, nine- or twelve-month) interest period chosen by us, in each case, plus an applicable margin percentage. Accordingly, the Company's cash flows and earnings will be exposed to the market risk of interest rate changes resulting from variable rate borrowings under our 2013 Credit Facility. The effect of a hypothetical one percentage point increase in interest rates would increase the annual interest costs under our 2013 Credit Facility by approximately \$21.9 million based on the amount of outstanding borrowings at June 29, 2013. The weighted average interest rate on the \$2.19 billion of borrowings under our 2013 Credit Facility on June 29, 2013 was 3.9%.

At June 29, 2013, three forward-starting interest rate swap agreements were in place to swap variable rates on the 2013 Credit Facility for a fixed rate based on an aggregate notional amount of \$353 million. These interest rate swap agreements converted the variable interest rate on the aggregate notional amount of the 2013 Credit Facility to a fixed rate of 5.17% (2.17% plus the 3% margin percentage) through June 30, 2015.

The fair value of the \$2.19 billion aggregate principal amount of borrowings under our 2013 Credit Facility is exposed to the market risk of interest rates. The estimated fair value of such term loans approximated \$2.16 billion at June 29, 2013 based upon information provided to the Company from its agent under the 2013 Credit Facility. The fair value of the \$1.60 billion 7<sup>3</sup>/<sub>4</sub>% Senior Subordinated Notes due 2018 and our \$0.55 billion 5<sup>1</sup>/<sub>2</sub>% Senior Subordinated Notes due 2012 are exposed to the market risk of interest rate changes. The estimated fair value of the 2018 Notes approximated \$1.68 billion and the estimated fair value of the 2020 Notes approximated \$0.51 billion at June 29, 2013 based upon quoted market rates.

**ITEM 4. CONTROLS AND PROCEDURES**

As of June 29, 2013, TD Group carried out an evaluation, under the supervision and with the participation of TD Group's management, including its Chief Executive Officer (Principal Executive Officer) and Chief Financial Officer (Principal Financial and Accounting Officer), of the effectiveness of the design and operation of TD Group's disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that TD Group's disclosure controls and procedures are effective to ensure that information required to be disclosed by TD Group in the reports it files or submits under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported, within the time periods specified by the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to TD Group's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, TD Group's management recognized that any controls and procedures, no matter how well designed and operated, can provide only
