ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2014

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-9511

THE COAST DISTRIBUTION SYSTEM, INC.

(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

94-2490990
(I.R.S. Employer
Identification No.)

350 Woodview Avenue,
Morgan Hill, California
(Address of principal executive offices)
(408) 782-6686

95037
(Zip Code)

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Common Stock, par value, \$.001 per share
(Title of Class)

NYSE MKT
(Name of Each Exchange on Which Registered)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No .

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. YES NO .

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports); and (2) has been subject to such filing requirements for the past 90 days. YES NO .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No .

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Edgar Filing: COAST DISTRIBUTION SYSTEM INC - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of accelerated filer and large accelerated filer and non-accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the outstanding shares of Common Stock held by non-affiliates of registrant as of June 30, 2014, the last day of the second quarter of fiscal 2014, which was determined on the basis of the closing price of registrant's shares on that date, was approximately \$13,406,000.

As of March 13, 2015, a total of 5,207,180 shares of registrant's Common Stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Except as otherwise stated therein, Part III of the Form 10-K is incorporated by reference from registrant's Definitive Proxy Statement expected to be filed on or before April 30, 2015 for its Annual Meeting.

FORWARD LOOKING STATEMENTS

Statements contained in this Annual Report that are not historical facts or that discuss our expectations, beliefs or views regarding our future operations or future financial performance, or financial or other trends in our business or markets, constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the 1933 Act) and Section 21E of the Securities Exchange Act of 1934, as amended (the 1934 Act). Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. Often, they include words such as believe, expect, anticipate, intend, plan, estimate, project, or other word meaning, or future or conditional verbs such as will, would, should, could, or may. The forward looking statements contained in this Report are based on current information and are subject to a number of risks and uncertainties that could cause our financial condition or operating results in the future to differ, possibly significantly, from those expected at the current time. Those risks and uncertainties are described in Item 1A of Part I of this Report in the Section entitled RISK FACTORS and some of the factors and uncertainties that can affect our business, financial condition and results of operations also are set forth in Part II of this Report in the Section entitled MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS. Readers of this Report are urged to read the cautionary statements contained in those Sections of this Report.

Due to these risks and uncertainties, readers are cautioned not to place undue reliance on forward-looking statements contained in this Report, which speak only as of the date of this Annual Report. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may otherwise be required by applicable law or the rules of the NYSE MKT.

PART I

ITEM 1. BUSINESS

References in this Annual Report to Coast, we, us, or our or to the Company shall mean The Coast Distribution System, Inc. and its subsidiaries taken as a whole.

Overview of Our Business

The Coast Distribution System, Inc. is one of North America's largest suppliers of replacement parts, supplies and accessories for recreational vehicles (RVs), to RV dealers, supply stores and service centers (Aftermarket Customers), which resell the products they purchase from us, at retail, to consumers. We supply or distribute more than 14,000 products and serve more than 10,000 customers throughout the United States and Canada, from 13 regional distribution centers in the United States that are located in California, Texas, Oregon, Arizona, Colorado, Utah, Indiana, Pennsylvania, New York, Georgia, Florida and Wisconsin and 4 regional distribution centers in Canada located, respectively, in Montreal, Toronto, Calgary and Vancouver. Reference is made to Note G to our Consolidated Financial Statements, contained in Item 8 of this Report, for certain information regarding the Company's operations in the United States and Canada, respectively.

We differ from traditional wholesale product distributors in our markets, in that approximately 30% of our sales are of proprietary products which we have introduced into the marketplace. Our proprietary products have been designed specifically for us, at our request, by independent product design firms or product manufacturers and are manufactured for us, generally on an exclusive basis, by a number of different independent manufacturers, mostly, but not entirely, in Asia. We market our proprietary products under our own brand-names in competition with, or in some cases as complementary to, products from other manufacturers of RV parts, supplies and accessories. For the most part, our

proprietary products are comprised of products that are needed or used by RV owners on a regular or recurring basis, such as trailer hitches, plastic wastewater tanks, vent lids, stabilizing jacks and battery boxes. Due to differences in costs, we generally are able to generate higher margins on sales of proprietary products than we are able to realize on sales of functionally similar products available to us from competing manufacturers. See *Products Proprietary Products Strategy and Sales* below.

We also have recently begun to market and sell portable generators and certain other products, including some of our proprietary products, to other product distributors, national and regional home improvement and home accessories chains, catalogue stores, hardware stores and agricultural equipment outlets that sell outdoor power equipment to consumers. See *Products Expansion into New Markets* below.

The Company was incorporated in California in June 1977, and reincorporated in Delaware in April 1998.

Table of Contents

The RV Parts, Supplies and Accessories Aftermarket

Many manufacturers of RV replacement parts, supplies and accessories rely on independent distributors, such as the Company, to market and distribute their products or to augment their own product distribution operations. Distributors relieve manufacturers of a portion of the costs associated with distribution of their products while providing geographically dispersed selling, order processing and delivery capabilities. At the same time, distributors offer retailers access to a broad line of products and the convenience of rapid delivery of orders which reduces the amount of product inventories that retailers must carry and, therefore, their costs of operations.

The market for RV parts, supplies and accessories distributed by the Company is comprised primarily of RV dealers and supply stores and service centers (*Aftermarket Customers*). Our RV Aftermarket Customers purchase a broad range of RV parts, supplies and accessories from us. See *Products* below.

Products

General. We carry a full line of more than 14,000 RV parts, supplies and accessories which we purchase from more than 300 manufacturers, comprised primarily of manufacturers who supply products to multiple product distribution companies, and manufacturers that produce our proprietary products in most cases on an exclusive basis specifically for us. The RV products that we distribute include antennae, vents, electrical items, towing equipment and hitches, and portable generators and appliances such as air conditioners, refrigerators, stoves and ranges and LP gas equipment, and portable toilets and plumbing parts, hardware and tools, specialized recreational vehicle housewares, chemicals and supplies, and various accessories, such as ladders, jacks, fans, load stabilizers, outdoor furniture, mirrors and compressors.

Proprietary Products Strategy and Sales. We have introduced into the RV Aftermarket a growing number of products, which are manufactured specifically for us, usually on an exclusive basis, by a number of different independent manufacturers, based primarily, but not exclusively, in Asia. These products (which we refer to as our *proprietary products*) consist of products that are needed or used by RV consumers on a regular or recurring basis, such as trailer hitches and other towing equipment, plastic wastewater tanks, vent lids, stabilizing jacks, battery boxes, and LED lighting. The proprietary products manufactured for us also include portable generators. Most of these products have been designed for us by independent professional product design firms or by the independent manufacturers that we have retained to manufacture the products for us. We market the proprietary products under our own brand-names in competition with brand name products from other manufacturers that usually sell their products to a number of different RV product distributors and sometimes into other markets.

We conduct our own quality control testing of proprietary products that could fail or be damaged due to stress during usage, such as portable generators and towing hitches and equipment, either at the plants where the products are manufactured for us or at product testing facilities that we operate in Elkhart, Indiana and Wilsonville, Oregon.

Generally, the costs to us of purchasing proprietary products are lower than the costs of purchasing competing products from other manufacturers based in the United States. As a result, our proprietary products strategy has enabled us, over the years, to offer our customers lower-priced products, without compromising quality, and at the same time has enabled us to increase our gross profit margins. However, the costs of freight, testing, and marketing, and providing warranty services in certain instances for, our proprietary products reduce some of the margin advantage we gain on sales of those products.

Table of Contents

Expansion into New Markets. During the past few years we have begun to source, primarily from overseas manufacturers, and to market and sell in the United States and Canada, products, such as portable generators, that have applications not only in the RV aftermarket, but also in other markets, such as the outdoor power equipment market. We intend to continue our efforts to source additional products from independent manufacturers, primarily in Asia, that we can sell into multiple markets domestically, in order to increase our sales and gross margins and reduce our dependence on the RV market. It is too early to predict if this strategy will prove to be successful. Among other things, we have encountered stiff competition in those new markets from manufacturers and distributors of competing products. A number of those manufacturers and distributors are larger and have more marketing and capital resources than we do and are better known in those markets than we are. Additionally, we expect that it will be necessary for us to assume primary responsibility for marketing these foreign sourced products to consumers and, in some instances, for providing warranty service for such products, the costs of which reduce some of the margin advantage we enjoy on sales of these products.

Marketing and Sales

Our Customers. Our customers include primarily (i) RV dealers, which purchase optional equipment and accessories for new recreational vehicles and replacement and repair parts for their service departments, (ii) independent RV supply stores and service centers that purchase parts, supplies and accessories for resale to owners of RVs and for their service centers, and (iii) specialty retailers, which purchase our products to sell either in their stores or online. We are not dependent on any single customer for any material portion of our business and no single customer accounted for more than 5% of our sales in 2014, 2013 or 2012.

Our Customer Service Center and Electronic Order Entry and Warehousing System. We have designed and implemented a computer-based order entry and warehousing system which enables our customers to transmit orders electronically to our central computers and also enables us, subject to product availability, to prepare and invoice most customer orders within 24 hours of receipt.

We operate a national customer sales and service center which enables our customers to obtain product information and place product orders by telephone using toll-free telephone numbers. Our customer sales and service center is staffed by sales personnel who are trained to promote the sale of our products and to handle customer service issues. We also maintain websites where our customers can transmit online orders to us.

Orders transmitted by customers either via telephone to the national customer sales and service center or online, are entered into our computer system and then are electronically transmitted to the regional distribution center selected by the customer, where the products are picked, packed and shipped. At the time the order is received, the customer is informed, either by electronic confirmation or by the sales person handling the customer's call at the customer service center, that the order has been accepted and whether any items are not currently in stock.

Distribution

General. Our regional distribution and warehouse centers in North America carry an inventory of more than 14,000 RV parts, supplies and accessories, although the nature and number of products at each distribution and warehouse center does vary, based primarily on the historical product sales of each distribution center to customers in its geographic region. We rely primarily on independent freight companies to ship our products to our customers.

We have implemented an inventory management and deployment system that we designed to improve our ability to fill customer orders from the distribution centers closest to the customer and, thereby, improve our responsiveness to the customer and, at the same time, reduce our costs of service. We track product sales from each of our distribution

and warehouse centers and stock at each such center only the products which are in relatively high demand from customers in the region serviced by that distribution center. At the same time we offer our customers a program by which we ship products that are not available at the Company's distribution center closest to the customer from the next closest of the Company's distribution centers which stock those products. This program reduces back-orders that could adversely affect service levels to our customers and, at the same time, reduces our costs because it eliminates the need to stock duplicative products at all of our warehouses.

Table of Contents***Arrangements with Manufacturers***

General. The products which we supply or distribute are purchased from more than 300 different manufacturers. As is typical in the industry, in most instances we acquire those products on a purchase order basis, including from the manufacturers that produce proprietary products for us. As a result, short-term inventory shortages can occur. We sometimes choose to carry only a single manufacturer's products for certain of the brand-name product lines that we sell, although comparable products usually are available from multiple sources. In addition, generally we obtain each of our proprietary products from a single source manufacturer.

Dependence on a single manufacturer for any product or line of related products, however, presents some risks, including the risk that we will be unable to readily obtain products from alternative suppliers in the event that a single source supplier encounters production problems or decides to enter into an exclusive supply arrangement or alliance with competing distributors or decides, for any other reason, to terminate its supply arrangement with us. Termination of a single source supply relationship could adversely affect our sales and operating income, possibly to a significant extent. See **Risk Factors** in Item 1A of Part I of this Report.

Our increased purchases of foreign sourced products subjects us to foreign currency risks that could reduce the margin advantage we would otherwise be able to realize on the sales of those products to our customers in United States. See **RISK FACTORS** *Our financial performance can be adversely affected by currency fluctuations associated with our operations in Canada and our increased reliance on foreign product suppliers.*

The following table identifies the product manufacturers that accounted for 5% or more of our total product purchases, and the respective percentages of our total product purchases accounted for by each of them, in each of 2014, 2013 and 2012:

	2014	2013	2012
Airexcel, Inc.	23%	25%	22%
Zhejiang Xingyu Industry & Trade Co., Ltd.	*	*	6%

* Less than 5%.

Airexcel, Inc. has manufactured and supplied us with Coleman® brand RV air conditioners for more than the past 15 years under a long-term supply agreement with us. Zhejiang Xingyu Industry & Trade Co., Ltd. (Zhejiang) manufactures and since 2010 has been supplying us with portable generators, which we market and sell under our own Powerhouse brand name. No other product manufacturers accounted for as much as 5% of our product purchases in 2014, 2013 or 2012.

Product Warranties and Product Liability Insurance. We generally do not independently warrant the products that we distribute and sell. Instead, product manufacturers generally warrant the products they sell to us and allow us to return defective products for credit or replacement, including those that have been returned to us by our customers. However, we do sell portable generators under a product supply arrangement with the manufacturer which provides for us to share the costs of providing warranty services for these products. The warranty period is 24 months following the sale of a generator to the retail customer. At December 31, 2014 and 2013, our reserves for potential warranty claims with respect to those products totaled \$762,000 and \$737,000, respectively. However, there is no assurance that warranty claims in the future will not exceed these amounts. See **MANAGEMENT'S DISCUSSION OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS** *Critical Accounting Policies* *Warranty Costs* in Item 7 of this

report below.

We also maintain insurance to protect us against product liability claims relating to all of the products we distribute and sell. Additionally, we often are able to obtain indemnification agreements from our product suppliers to protect us against product liability claims that may arise out of the use of the products they manufacture and supply to us for resale.

Table of Contents

Competition

We face significant competition. There are a number of national and regional distributors of RV parts, supplies and accessories that compete with us. There also are mass merchandisers, web retailers, catalog houses and national and regional retail chains specializing in the sale of RV parts, supplies and accessories that purchase such products directly from manufacturers. The mass merchandisers, web retailers and national and regional chains compete directly with the RV supply stores and service centers that purchase products from us. This competition affects both the volume of our sales and the prices we are able to charge our customers for those products. Additionally, there is no assurance that changes in supply relationships or new alliances within the RV industry will not occur that would further increase competition.

We compete on the basis of the quality, speed and reliability of our service, the breadth of our product lines and on price. We believe that we are highly competitive in each of these areas.

As discussed earlier in this Report, we sell portable generators and certain other products, not only in the RV market, but also in other markets, such as the outdoor power equipment market, in which we have not previously sold products. We also intend to seek additional products that we can source from overseas suppliers for resale into other markets in the United States and Canada. We expect to encounter intensive competition from manufacturers and distributors of competing products in those other markets. Many of those companies are larger and have greater marketing and financial resources than we do and are better known than us in these markets. Therefore, there is no assurance that we will be successful in competing against those companies.

Seasonality

Sales of RV parts, supplies and accessories are seasonal. Generally, we have significantly higher sales during the six-month period from March through August than we do during the remainder of the year when winter weather conditions result in reductions in purchases and in the usage of RVs and, therefore, also in the demand for the products we sell. Because a substantial portion of our expenses are fixed, operating income declines and we sometimes incur losses and must rely more heavily on borrowings to fund our operations in the winter months when sales are lower.

Employees

At December 31, 2014, we had approximately 280 full-time employees, which include 60 employees in Canada. During the peak summer months, we also employ part-time workers at our regional distribution and warehouse centers. None of our employees is represented by a labor union and we believe that relations with our employees are good.

Our Website

Our internet website address is www.coastdistribution.com. Our Annual Report to Stockholders and all of our SEC filings are available on our website, without charge. Copies of these filings also are available as soon as reasonably practicable after we have filed or furnished these documents to the SEC at its website, which is www.sec.gov. The information contained on our website is not a part of, or incorporated by reference into, this Report on Form 10-K.

ITEM 1A. RISK FACTORS

Statements contained in this Annual Report on Form 10-K that are not historical facts or that discuss our expectations, beliefs or views regarding our future operations or financial performance or our future financial condition, or trends in our business or markets, constitute forward-looking statements. Forward-looking statements are not statements of fact. Instead they discuss our expectations, beliefs and views about our future financial performance or future financial condition, or regarding financial or market trends that may affect our future operating results. The forward looking statements in this Report are necessarily based on current information available to us, and our business is subject to a number of risks, market conditions and uncertainties that could cause our actual financial performance or financial condition in future periods to differ, possibly significantly, from our current expectations and beliefs and the estimates that are set forth in those forward looking statements. Set forth below is a discussion of those risks and uncertainties. However, readers of this Report are cautioned that it is not possible to predict all of the events or circumstances that might occur which may adversely affect our financial performance or operating results in the future and, therefore, there may be other risks to which our business is subject that are not addressed below.

Table of Contents

Our business and financial performance are affected by economic conditions that affect consumers.

Our sales are affected directly by the level of purchases and the usage by consumers of RVs which, in turn, are dependent on the ability and willingness of consumers to spend money to make purchases of and to use their RVs. As a result, our sales are affected primarily by (i) the discretionary income that consumers have available to spend, (ii) their confidence about economic conditions which determines their willingness to spend their discretionary income, (iii) the availability of and the interest rates payable on the borrowings, including credit card debt, on which consumers generally rely to finance their purchases of and the costs of using RVs, and (iv) the availability and prices of gasoline, which affect the ability and cost of using their RVs. As a result, our sales and earnings in the past have been, and our future sales and earnings can be, adversely affected by the following conditions:

Economic downturns and recessions and high rates of unemployment, which result in declines in discretionary income available to consumers and a loss of confidence among consumers about economic conditions and their own economic well-being and security, which cause them to reduce their purchases and usage of RVs;

A tightening in the availability and increases in the costs of borrowing and consumer credit on which consumers rely to supplement their own funds when purchasing new and used RVs and paying to maintain and purchase supplies and accessories for their RVs; and

Increases in the prices and shortages in the supply of gasoline, which increase the costs and sometimes even the ability and, therefore, the willingness of consumers to purchase and use RVs.

The recent economic recession and credit crisis could have longer term adverse consequences for our business and future financial performance.

The recent economic recession and credit crisis led to closures and bankruptcies of many RV dealers, as well as a number of well-known RV manufacturers, which has resulted in reductions in the number of RV dealers and supply stores and in the overall size of the RV market. Also, owners of RVs have been increasing their purchases of RV parts, supplies and accessories from lower-cost sellers, such as mass merchandisers and web-based retailers, resulting in reductions in sales by independent dealers, supply stores and service centers that comprise our Aftermarket Customers, causing them to reduce their purchases of the products we sell. We also do not know and cannot predict whether or the extent to which consumers will increase their discretionary spending after economic conditions improve and, therefore, whether or not sales and usage of RVs will recover to their pre-recession levels. If they do not, our market share, sales revenue and product pricing and, therefore, our future financial performance could be adversely affected.

Volatility of gasoline prices could affect our sales and future financial performance.

Increases in the costs of and shortages in supplies of gasoline can lead consumers to reduce their usage of, and may discourage some consumers from purchasing, RVs which, in turn, would result in decreases in their purchases of the products we sell. In particular, during the last few years there has been increased volatility in the prices of gasoline due to concerns about the supplies available to or within the United States, due to (i) the growth in demand and competition for oil and gasoline from emerging and high growth economies, such as China and India, (ii) conflicts and political unrest in the middle east and elsewhere that could adversely affect the supply of oil to the United States, and

(iii) natural and human-made disasters, such as the gulf oil spill. It is also difficult to predict whether uncertainties regarding and increases in gasoline prices will have short or longer term effects on the purchases and usage by consumers of RVs. In addition, these conditions and uncertainties may increase cyclical swings and make it more difficult to predict our future operating results.

Our business is seasonal and our financial performance can be adversely affected by unusual weather conditions.

Our business is seasonal, because consumers generally increase their purchases and usage of RVs and, therefore, increase their purchases of the products we sell, primarily in the spring and summer months, which coincide with our second and third fiscal quarters; whereas, such purchases and usage decline in the late fall and in the winter months, which coincide with the fourth and first quarters of our fiscal year. As a result, as a general rule our sales are higher and our financial performance is better in our second and third fiscal quarters than in our fourth and first fiscal quarters during which we often incur losses.

Table of Contents

However, the occurrence of unusually severe or extended winter weather conditions can adversely affect our operating results in our second and third fiscal quarters, and can lead to more severe swings in our sales and financial performance, because such conditions can have the effect of reducing the usage of RV for periods extending beyond the ordinary winter months or to regions that ordinarily encounter milder winter weather conditions. Additionally, extended periods of unusually severe weather conditions sometimes also occur during the winter months, which can cause year-over-year declines in our sales in the first or fourth quarters of the year.

We rely heavily on bank borrowings to fund our business, which makes us more vulnerable to adverse changes in economic conditions and creates liquidity risks for us.

We rely heavily on bank borrowings, under a revolving credit line, to fund our working capital requirements and capital expenditures. Our bank borrowings create additional risks for our business. Among other things, we may find it more difficult to obtain additional financing to fund expansion or take advantage of other business opportunities, and we use a substantial portion of our cash flow from operations to pay principal and interest on our debt. Our existing debt also makes us more vulnerable to general economic downturns and competitive pressures, which could cause us to fail to meet financial covenants in our bank loan agreement or result in a reduction in the amount of the borrowings that will be available to us under our credit line. Either of those events would reduce our liquidity and, therefore, require us to reduce the size and scope of our business, which could hurt our financial condition and reduce our sales and, therefore, adversely affect our operating results.

Our ability to manage our inventory in a volatile market could adversely affect our profitability.

Our operating results also depend upon our ability to successfully manage our inventory and to anticipate and respond to changes in purchasing trends and customer demands in a timely manner. The use, and therefore the purchases, by consumers of the products we sell can be volatile and uncertain because they can be affected by a number of factors, including general economic and market conditions, gasoline prices, weather conditions, competition and consumer preferences, none of which are within our control. We usually must order inventory in advance of each year's selling season. Moreover, the lead times for many of our purchases (particularly of foreign sourced products) may make it difficult for us to respond rapidly to new or changing product trends, increases or decreases in customer demand or changes in prices. If we misjudge the demand for our products or our customers' purchasing habits (i) we may have insufficient quantities of products to satisfy customer demand, resulting in a decline in our revenues, or (ii) we may accumulate and have to write down excess inventory, which would increase our costs of sales. Also, the level of product inventory we maintain will affect our need for borrowings and, as a result, we may have to curtail our purchases of inventories, which could adversely affect our sales, in order to keep our borrowings at an acceptable level.

Our financial performance is subject to risks arising out of our proprietary products strategy.

In order to increase our sales and reduce our costs of sales and, thereby increase our profitability, we have introduced into the RV market an increasing number of products that have been designed by or for us and which are manufactured and sold to us, generally on an exclusive basis, by a number of different manufacturers. More recently, we have begun sourcing and purchasing, from overseas suppliers, and marketing and selling a number of new products, such as portable generators, into new markets such as the outdoor power equipment market. We have only limited experience in marketing and selling such products, and there is no assurance that these products will gain acceptance among customers in those markets. We also encounter considerable competition from companies that manufacture or sell competing products in those same markets. Many of those companies are larger, more established and better known and have greater financial and marketing resources than we have. Also, we have greater responsibilities for quality control and in marketing and providing warranty protection and service for these products,

as compared to the products we source from traditional suppliers for resale in the RV market. There is no assurance that we will be successful in marketing and selling our proprietary products, and the costs we incur in doing so may reduce our earnings or possibly even cause us to incur losses and we could encounter liabilities for possible warranty claims or patent infringement claims as a result of our sales of such products.

Moreover, we may experience unexpected engineering or design flaws in connection with new proprietary products that we may introduce into the market, which could lead to a recall of the products, or substantial increases in warranty claims, in which event we could incur substantial expenses that could adversely affect our results of operations.

Table of Contents

Risks of our reliance on sole sources of supply for certain of our products.

We sometimes choose to carry only a single manufacturer's products for certain of the brand-name product lines that we sell. In addition, we obtain each of our proprietary products from a single source manufacturer. Dependence on a single manufacturer for any product or line of related products, however, presents some risks, including the risk that we will be unable to readily obtain alternative product supply sources in the event that a single source supplier (i) encounters quality or other manufacturing problems, or (ii) decides to enter into an exclusive supply arrangement or alliance with one of our competitors, or to vertically integrate its operations to include not only manufacturing, but also distribution, of its products or (iii) for any other reason decides to terminate the supply arrangement it has with us. If any of our single source suppliers were to encounter any manufacturing problems or disruptions or terminate our supply relationship, our sales and earnings could decline, possibly to a significant extent.

Our financial results can be and sometimes have been adversely affected by changes in supply relationships in our markets.

As is the customary practice in our markets, in most instances we do not have long term supply contracts with our product suppliers. As a result, product suppliers are free to change the terms on which they sell us products or to discontinue supplying us with products altogether, because they may choose to distribute their products directly to aftermarket dealers or retailers or because they might choose to establish exclusive supply relationships with other distributors. Additionally, manufacturers of new RVs may choose to incorporate optional equipment on their RVs at the time of manufacture that, historically, was sold to their dealers by distributors such as the Company. Any of these occurrences could result in increased competition in our markets or could reduce the number of products we are able to offer our customers, which could cause our sales to decline and could result in lower margins and in reduced earnings.

Our financial performance and cash flows can be adversely affected by currency fluctuations associated with our operations in Canada and our increased reliance on foreign product suppliers.

Currency Risks Associated with our Canadian Operations. Our wholly-owned Canadian subsidiary accounted for more than 22% of our net sales in 2014. That subsidiary purchases a substantial portion of the products it sells from manufacturers in the United States and pays for those products in U.S. dollars, but sells those products to its customers in Canadian dollars. In the event the Canadian dollar weakens in relation to the U.S. dollar, the costs of those products to our Canadian subsidiary would increase, thereby increasing its costs of sales, unless it is able to pass the higher costs on to its customers by raising its prices without adversely affecting its sales volume. If our Canadian subsidiary is unable to pass the higher costs on to its customers, our gross profits, operating income and cash flows would decline during any periods when there are declines in the value of the Canadian dollar in relation to the U.S. dollar.

Currency and other Risks Associated with our Purchases of Foreign Sourced Products. As we increase our purchases of products from foreign suppliers, we may become increasingly vulnerable to the effects of political instability and adverse economic conditions in the countries in which those suppliers are located. Additionally, purchases of products in foreign countries create currency risks for us. In those instances when we pay for foreign sourced products in U.S. dollars, a weakening U.S. dollar may lead foreign suppliers to increase the prices they charge us for their products in order to mitigate their currency exchange risks. In those countries where we buy products in the local currency, to the extent it becomes necessary for us to convert U.S. dollars into the local currency in order to pay for those products, a weakening U.S. dollar would make the local currency more expensive for us, thereby increasing the costs to us of purchasing those products. Moreover, a devaluation of local currencies may lead foreign suppliers to increase the prices they charge us for their products. Any of these events or circumstances could reduce the margin advantage that we could otherwise realize on our sales of foreign sourced products in North America,

unless we are able to pass along the higher costs to our customers without adversely affecting our sales volume. If we are unable to pass such higher costs on to our customers, our gross profits and operating income and our cash flows would decline.

We may attempt to limit our exposure to exchange rate fluctuations by entering into currency exchange contracts when we conclude that it is appropriate to do so. There is no assurance that we will be successful in hedging such foreign currency exchange risk and any currency exchange gains or losses (net of hedges) may materially and adversely impact our cash flows and earnings.

Table of Contents

We are subject to risks related to taxation in multiple jurisdictions. We are subject to income taxes in both the United States and other foreign jurisdictions. Significant judgments based on interpretations of existing tax laws or regulations are required in determining the provision we need to make for income taxes. Our effective income tax rate could be adversely affected by various factors, including, but not limited to, changes in the mix of earnings in tax jurisdictions with different statutory tax rates, changes in the valuation of deferred tax assets and liabilities, changes in existing tax laws or tax rates, changes in the level of non-deductible expenses, or the result of examinations by various tax authorities. Although we believe our tax estimates are reasonable, if the U.S. Internal Revenue Service or other taxing authority disagrees with the positions taken by us on our tax returns, we could incur additional tax liability, including interest and penalties. If material, payment of such additional tax, interest or penalties upon final adjudication of any disputes could have a material adverse impact on our results of operations and financial position.

We are subject to product liability risks and warranty claims.

Product Liability Risks. Although we do not manufacture any of the products we sell, it is not uncommon for us to be named as an additional defendant in product liability lawsuits brought against manufacturers of those products. To protect ourselves from liability, we have been able in many instances to obtain indemnification agreements from these manufacturers or to be named as additional insureds under their product liability insurance policies. Nevertheless, we also maintain our own product liability insurance. We also conduct quality control testing, at our own product testing laboratories in the United States, of many of the proprietary products that we sell. However, although we have never incurred any material product liabilities in excess of the insurance coverage that we have obtained under policies of insurance maintained either by product manufacturers or by us, there is no assurance that we will not incur, in the future, product liabilities in amounts that materially exceed the insurance coverage and indemnification protections that we have and which, as a result, could adversely affect our results of operations or financial condition. Moreover, the risks of incurring liabilities for product defects has increased as a result of our proprietary products strategy, because many of the suppliers of those products are located overseas, making us a more attractive target for product liability claims.

Warranty Claims Risks. In certain instances, we have assumed the responsibility for dealing with and resolving product warranty claims from customers. As a result, we have had to establish reserves for potential product warranty claims which has increased our costs of sales. In addition, the amounts of those reserves are determined based not only on historical warranty claims experience, but also on estimates of the number and costs to us of future warranty claims. If the actual number or the costs of warranty claims were to exceed our estimates, it could become necessary for us to increase those reserves, which would result in an increase in our costs of sales that could adversely affect our profit margins and our results of operations. See MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS *Critical Accounting Policies* *Warranty Costs* below in this Annual Report.

Risks of patent infringement claims.

We design, or have independent product design firms or manufacturers, design and engineer a number of the proprietary products that we introduce into the marketplace. From time to time manufacturers of competing products have threatened and on occasion have brought suits against us claiming that some of our proprietary or foreign sourced products infringe their patents. We retain a patent law firm to review all new products that we plan to introduce into the market for potential patent infringements and that firm works in concert with our product design engineers and independent design firms or manufacturers to determine if the product as designed infringes, or if changes need to be made to a product to prevent infringements, on patents or other proprietary rights held by competitors. To date we have not incurred any material liability as a result of any patent infringement claims that have been threatened or asserted against us. However, there can be no assurance that we will not incur liability for patent

infringement in the future, which could adversely affect our financial condition or results of operations. Additionally, in response to the filing of a patent infringement suit, it may become necessary for us to halt sales or to redesign newly introduced products to avoid patent infringement liability, which could reduce our sales and increase our costs and, thereby, adversely affect our results of operations.

Table of Contents

We face substantial competition that could lead to declines in net sales or reductions in our gross profits.

We face significant competition in each of our markets which can adversely affect our sales, profit margins and operating results. In our RV products market we face competition not only from other wholesale distributors, but also from mass merchandisers, web retailers, catalog houses and national and regional retail chains that sell RV parts, supplies and accessories. Moreover, due to their size and financial resources, some of those mass merchandisers and national or regional chains are able to purchase such products directly from manufacturers at prices comparable to the prices at which we are able to purchase such products from those same or competing manufacturers. As a result, some of those mass merchandisers and national chains are able to pass some of the resulting cost savings to their customers by reducing the prices at which they sell such products. The mass merchandisers, web retailers, and national and regional chains also compete directly with the RV dealers, supply stores and service centers that purchase products from us. Therefore, the pricing decisions of and the breadth of the products sold by, mass merchandisers and national chains can affect both the volume of our sales and the prices we are able to charge our customers for the same or competing products. Additionally, price competition, particularly from mass merchandisers and national chains, has been increasing as they seek to increase their market shares. Moreover, we could encounter additional price competition as a result of a recent merger of two wholesale distributors of RV accessories, parts and supplies with which we compete nationally.

As a result, in order to remain competitive it could become necessary for us to reduce our prices, including the prices at which we sell our proprietary and Coast branded products to our Aftermarket Customers, in which event we could lose the price and margin advantages that we have gained from the sale of those products which could result in reductions in our gross profits and gross margin. Moreover, we face stiff competition in the sale of portable power generators and other products in the outdoor power equipment market from manufacturers and suppliers of competing products, many of which are larger, have greater marketing and capital resources and are better-known in that market. Such competition could require us to reduce our prices for or could prevent us from increasing our sales of those products and could cause us to incur losses as a result of our efforts to sell products in markets other than the RV market.

Risk that our deferred tax asset may not be fully realized.

We have recorded, on our balance sheet, a deferred tax asset which consists of tax credit and tax loss carryforwards and tax deductions (tax benefits) that are available to reduce income taxes that we would otherwise have to pay on the taxable income that we generate in future periods. Under applicable federal and state income tax laws and regulations, such tax benefits will expire at various dates in the future if not used to offset income taxes by such dates. Accordingly, our ability to fully use this deferred tax asset to reduce our taxes in the future depends on the amount of taxable income that we are able to generate prior to such expiration dates. If we determine that it is no longer more likely, than not, that we will be able to fully utilize the deferred tax asset, we would be required to establish (or increase any existing) valuation allowance to reduce the recorded amount of the deferred tax asset on our balance sheet to the amount of the tax benefits we believe we will be able to use prior to their expiration dates. Such an allowance is established or increased by a non-cash operating charge that would increase the provision for income taxes or reduce any income tax benefit in the fiscal period in which that valuation allowance is established or increased. At December 31, 2014, we had a valuation allowance in the amount of nearly \$1.4 million which reduced the carrying value of our net deferred tax asset to \$3.2 million at December 31, 2014. There is no assurance, however, that we will be able to fully utilize this deferred tax asset as that will depend on our future operating results.

Moreover, if we are not able to generate taxable income in the future that will enable us to fully utilize this deferred tax asset, it could become necessary for us to increase the valuation allowance in future periods, which would have the effect of increasing our income tax provision or reducing any income tax benefit that we would otherwise record in

our statements of operations, thereby adversely affecting our results of operations. See MANAGEMENT S
DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS *Critical*
Accounting Policies below in this Annual Report.

Loss of key management.

Our future performance is substantially dependent upon the continued services of certain members of our senior management. The loss of the services of any key members of senior management could have a material adverse effect upon us. In addition, our continued growth depends on our ability to attract and retain skilled executives. There can be no assurance that we will be able to retain our existing key personnel or attract additional qualified executives in the future.

Table of Contents

Risk of fluctuations in our share price.

The market price of our common stock may be subject to significant fluctuations in response to our operating results, our ability to meet market expectations and other factors. Fluctuations in the market price of our common stock may also result from trading characteristics that prevail in the market for our common stock, including low trading volumes, trading volume fluctuations and other similar factors. These market fluctuations, as well as downturns in the economy or in consumer confidence or increases in unemployment may adversely affect the market prices and the liquidity of our common stock. As a result, we cannot provide any assurances that the market prices of our common stock will not fluctuate or decline significantly in the future or that there will be sufficient liquidity in the market for our shares that would enable shareholders to sell shares at the times or in the quantities they desire.

We do not plan to pay dividends at least for the foreseeable future.

In 2008 our Board of Directors adopted a policy to retain cash for our business and, as a result, we have not paid any cash dividends since 2008 and do not expect to pay cash dividends in the foreseeable future. Additionally, subject to certain limited exceptions, our bank line of credit agreement requires us to obtain the bank's consent prior to declaring or paying cash dividends and there is no assurance we would be able to get that consent if we were to decide to pay any cash dividends in the future.

Reliance on our information technology systems exposes us to potential risks.

Reliance on our information technology systems exposes us to potential risks such as interruptions due to natural disasters, such as earthquakes or fires, unplanned data center and system outages, cyber attacks, hacking or fraud perpetrated by malicious individuals and other causes.

Additionally, in the ordinary course of our business, we collect, use and hold data concerning our customers. Threats to data security, including unauthorized access and cyber-attacks, rapidly emerge and change, exposing us to additional costs for protection or remediation and competing time constraints to secure our data in accordance with customer expectations and statutory requirements. However, it is difficult or impossible to defend against every risk being posed by changing technologies, as well as against criminals who are intent on committing cyber-crime. A breach of our security that results in unauthorized access to our or our customers' data could expose us to a disruption or challenges relating to our daily operations, as well as to data loss, litigation, damages, fines and penalties, significant increases in compliance costs and reputational damage, any of which could have a material adverse effect on our business and results of operations.

Failure of our internal control over financial reporting could harm our business and financial results.

Our management is responsible for establishing and maintaining effective internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting for external purposes in accordance with principles generally accepted in the United States (GAAP). Because of its inherent limitations, internal control over financial reporting is not intended to provide absolute assurance that we would prevent or detect a misstatement of our financial statements or fraud. Any failure to maintain an effective system of internal control over financial reporting could limit our ability to report our financial results accurately and timely or to detect and prevent fraud. The identification of a material weakness could indicate a lack of controls adequate to general accurate financial statements that, in turn, could cause a loss of investor confidence and decline in the market price of our common stock.

Other risks and uncertainties.

Our business and financial performance could be materially and adversely affected in the future by other risks or developments that either are not known to us at the present time or are currently immaterial to our business and results of operations. Such risks could include, but are not limited to, the commencement of litigation against us and unexpected adverse changes in local, national or global economic or market conditions.

Due to these and other possible uncertainties and risks, readers are cautioned not to place undue reliance on forward-looking statements contained in this Report, which speak only as of the date of this Annual Report. We also disclaim any obligation to update forward-looking information contained in this Report, whether as a result of new information, future events or otherwise, except as may otherwise be required by applicable law or the rules of the NYSE MKT.

Table of Contents**ITEM 1B. UNRESOLVED STAFF COMMENTS**

None.

ITEM 2. PROPERTIES

We operate 13 regional warehouse and distribution centers in 12 states in the United States and 4 regional warehouse and distribution centers, each located in a different Province, in Canada. All of these facilities are leased under triple net leases which require us to pay, in addition to rent, real property taxes, insurance and maintenance costs. The following table sets forth certain information regarding those facilities.

	Square Footage	Lease Expiration Dates
<u>United States:</u>		
Wilsonville, Oregon	46,700	December 31, 2016
Visalia, California	230,300	December 31, 2016
Fort Worth, Texas	42,500	October 31, 2016
San Antonio, Texas	27,300	October 31, 2015
Denver, Colorado	50,000	January 31, 2016
Elkhart, Indiana	109,700	January 31, 2017
Lancaster, Pennsylvania	35,500	December 31, 2016
Atlanta, Georgia	44,000	November 30, 2019
Tampa, Florida	22,300	June 30, 2018
Mesa, Arizona	20,700	October 31, 2017
Salt Lake City, Utah	30,400	October 31, 2016
Johnstown, New York	26,800	December 31, 2017
Eau Claire, Wisconsin	17,300	January 31, 2017
<u>Canada:</u>		
St. Bruno, Quebec	59,600	December 31, 2021
Orillia, Ontario	36,500	November 30, 2016
Calgary, Alberta	41,200	January 31, 2016
Langley, British Columbia	22,800	December 31, 2016

As indicated in the above table, three of the warehouse and distribution center leases are scheduled to expire within the next 12 to 18 months. While we currently expect to renew those leases, we could decide, instead, either to relocate or close any of these distribution centers.

We also lease 18,100 square feet of space in Elkhart, Indiana where we maintain a product testing facility.

Our executive offices are located in Morgan Hill, California, a suburb of San Jose, where we lease 13,700 square feet of office space. Our address at that location is 350 Woodview Avenue, Morgan Hill, California 95037, where our telephone number is (408) 782-6686.

ITEM 3. LEGAL PROCEEDINGS

From time to time we are named as a defendant, sometimes along with product manufacturers and others, in product liability and personal injury litigation. We believe that this type of litigation is incidental to our business and we have our own product liability insurance policies and, in many instances, we have indemnities from the manufacturers from which we obtain our products, to protect us from liabilities that could arise from such claims. On occasion, we are named as a defendant in patent infringement litigation brought against manufacturers of certain of our proprietary products. To date we have not incurred any material liabilities in any product liability, personal injury or patent litigation and there is no legal action presently pending against us that we believe is likely to have a material adverse effect on our financial condition or results of operations. However, there is no assurance that we will not incur product liabilities that exceed our product liability coverage or liabilities based on patent infringement claims in the future that could adversely affect our operating results. See RISK FACTORS *We are subject to product liability risks and warranty claims* and *Risks of patent infringement claims* above.

EXECUTIVE OFFICERS OF REGISTRANT

Name	Age	Positions with Company
James Musbach	64	President, Chief Executive Officer and a Director
Thomas R. McGuire	71	Chairman of the Board of Directors
Sandra A. Knell	57	Executive Vice President, Chief Financial Officer and Secretary
David A. Berger	60	Executive Vice President Operations
Dennis A. Castagnola	67	Executive Vice President Proprietary Products

Set forth below is certain information regarding the Company's executive officers.

JAMES MUSBACH. Mr. Musbach, who had served as President of Coast from 1994 to 1995, rejoined the Company in September 2006 as its President and Chief Operating Officer. Mr. Musbach was promoted to the position of Chief Executive Officer of the Company effective April 2008. Between 1995 and his return to Coast, Mr. Musbach held various management positions with Raytek Corporation, a manufacturer of infrared non-contact temperature measurement tools, sensors and systems, most recently serving as an Executive Vice President of Raytek and the General Manager of Raytek's Portable Products Division.

THOMAS R. MCGUIRE. Mr. McGuire is a founder of the Company and has been its Chairman of the Board since the Company's inception in 1977. Mr. McGuire also served as the Company's Chief Executive Officer from 1977 until April 2008, when he relinquished that position upon Mr. Musbach's promotion to Chief Executive Officer. Mr. McGuire continues as Chairman of the Board of Directors.

SANDRA A. KNELL. Mrs. Knell has been the Company's Executive Vice President, Chief Financial Officer and Secretary since August 1985. From 1984 until she joined the Company, Mrs. Knell was an Audit Manager, and for the prior four years was a senior and staff accountant, with Grant Thornton LLP. Mrs. Knell is a Certified Public Accountant.

DAVID A. BERGER. Mr. Berger has served as an Executive Vice President of the Company since May 1988. From August 1986 to May 1988, Mr. Berger was Senior Vice President Purchasing of the Company. For the prior 14 years he held various management positions with C/P Products Corp., a distributor of recreational vehicle parts and accessories that we acquired in 1985.

DENNIS A. CASTAGNOLA. Mr. Castagnola was appointed to his current position of Executive Vice President Proprietary Products in August 2007. From November 2000 to August 2007, he served as Executive Vice President Sales and, for the prior 25 years, he held various management positions with the Company, including Vice President/Division Manager of the Company's Portland, Oregon distribution center.

Table of Contents**PART II****ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our shares of common stock are listed and trade on the NYSE MKT under the trading symbol CRV.

The following table sets forth, for the calendar quarters indicated, the range of the high and low per share sales prices of our common stock as reported by the NYSE MKT.

	Sales Prices per Share	
	High	Low
2014:		
First Quarter	\$ 3.82	\$ 3.35
Second Quarter	3.64	3.04
Third Quarter	3.38	2.95
Fourth Quarter	3.37	2.96
2013:		
First Quarter	\$ 2.80	\$ 1.90
Second Quarter	3.70	2.07
Third Quarter	4.37	3.05
Fourth Quarter	3.78	3.14

On March 13, 2015 the closing per share price of our common stock on the NYSE MKT was \$3.48 and there were approximately 510 holders of record of the Company's shares.

Dividend Policy

In November 2008, our Board of Directors decided to discontinue the payment of cash dividends in order to preserve cash for the Company's operations in response to the economic recession and the credit crisis. In addition, our bank line of credit agreement contains restrictions on the payment by us of cash dividends. As a result, we have not paid cash dividends since before the change in policy and we do not expect to pay cash dividends at least for the foreseeable future.

Equity Compensation Plans

Certain information, as of December 31, 2014, with respect to our equity compensation plans is set forth in Item 12, in Part III, of this Report and is incorporated herein by this reference.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

The selected operating data set forth below for the fiscal years ended December 31, 2014, 2013, and 2012, and the selected balance sheet data at December 31, 2014 and 2013, are derived from the Company's audited consolidated financial statements included elsewhere in this Report and should be read in conjunction with those financial statements and the notes thereto and MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS set forth in Item 7 of this Report. The selected operating data for the fiscal years ended December 31, 2011 and 2010, and the selected balance sheet data at December 31, 2012, 2011 and 2010, are derived from the Company's audited consolidated financial statements which are not included in this Report.

- (1) Distribution costs consist primarily of warehouse rent, labor and supply costs and product shipping costs.
- (2) See Note I to the Company's consolidated financial statements included in Item 8 of this report.
- (3) Exclusive of the current portion of long-term obligations. For additional information regarding our long-term obligations, see Note C to the Company's consolidated financial statements included in Item 8 of this report.
- (4) Based on the weighted average number of shares used in the computation of net earnings (loss) per share. See Note I to the Company's consolidated financial statements included in Item 8 of this report.

Table of Contents**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS*****Management Overview***

We believe that Coast is one of the largest wholesale suppliers of replacement parts, supplies and accessories for recreational vehicles (RVs) in North America. We supply more than 14,000 products and serve more than 10,000 customers throughout the United States and Canada, from 13 regional distribution centers in the United States and 4 regional distribution centers in Canada. Our sales are made primarily to retail parts and supplies stores, service and repair establishments and new and used RV dealers (collectively, Aftermarket Customers).

Factors Generally Affecting Sales of RV Products

Our sales are affected primarily by:

The usage of RVs by the consumers to whom our Aftermarket Customers sell our products, because such usage affects the consumers' needs for and their purchases of replacement parts, repair services and supplies; and

Purchases of new and used RVs by consumers, because they often accessorize their RVs at or shortly after the time of purchase.

The usage and the purchase, by consumers, of RVs depend, in large measure, upon the extent of discretionary income available to consumers, their confidence about economic conditions and the availability and the costs to them of credit, on which many of them rely to finance their purchases of RVs and RV accessories. As a result, recessionary conditions and a tightening in the availability or increases in the costs of borrowings to consumers often lead to declines in the purchase and, to a lesser extent, in the usage, of RVs. Additionally, increases in the prices and shortages in the supply of gasoline can lead to declines in the usage and purchases of RVs. Finally, the usage by consumers of RVs and, therefore, their need for and purchases of the products we sell are affected by weather conditions.

Overview of Fiscal 2014 Operating Results

The following table provides information comparing our fiscal 2014 results of operations to our fiscal 2013 results of operations. Dollars are in thousands, except per share data.

	Year Ended December 31,		Increase/(Decrease)	
	2014	2013	2014 vs. 2013 Amount	Percent
Net sales	\$ 118,799	\$ 113,938	\$ 4,861	4.3%
Cost of sales ⁽¹⁾	97,686	93,796	3,890	4.1%
Gross profit	21,113	20,142	971	4.8%
SG&A expenses	21,034	20,080	954	4.8%
Operating income (loss)	79	62	17	27.4%

Edgar Filing: COAST DISTRIBUTION SYSTEM INC - Form 10-K

Interest expense	578	567	11	1.9%
Loss before income taxes	(475)	(494)	(19)	(3.8)%
Income tax provision (benefit)	48	143	(95)	(66.4)%
Net loss	(523)	(637)	(114)	(17.9)%
Net loss per share-diluted	\$ (0.11)	\$ (0.14)	\$ (0.03)	(21.4)%

(1) Inclusive of distribution costs.

As indicated by the above table, we achieved an increase of \$4.9 million, or 4.3%, in net sales in 2014 as compared to 2013, as net sales in the United States increased by \$5.2 million, or 5.9%, in 2014, partially offset by a decline of \$0.3 million in net sales in Canada. The increase in our net sales in the United States in 2014 was due to a number of factors, including an increase in the number of our customers participating in marketing programs that we initiated during 2014, an increase in the usage by consumers of RVs, and consolidation in our industry that enabled us to attract new customers.

The increase in net sales in 2014 contributed to an increase in gross profits. However, much of that increase was offset by a nearly \$1.0 million, or 4.8%, increase in selling, general and administrative expenses, primarily as a result of which we recorded a net loss of \$0.5 million, or \$0.11 per diluted share, in 2014. However, as indicated in the above table, we were able to decrease the net loss in 2014 by approximately 18% from the net loss incurred in 2013.

Outlook for 2015

We monitor conditions in the RV market based on, among other information, monthly data regarding the volume and mix of new RVs shipped by RV manufacturers to dealers, as reported by the Recreation Vehicle Industry Association (RVIA). RIVA is projecting that shipments of towable and motorized RVs by manufacturers to RV dealers will increase by 0.8% and 5.1%, respectively, to approximately 315,200 and 46,200 units, respectively, in 2015, as compared to RV shipments in 2014. If those projections prove to be correct, manufacturers' shipments in 2015 will represent highest number of RV shipments by manufacturers in any year since record levels were achieved in 2006. According to the RIVA, these projections are based on a number of factors, including rising consumer confidence, rising home and stock values, improved credit availability and prospects for continued gains in jobs and disposable income. In addition, a positive longer-term outlook for the RV business is supported by an increase in the number of retirees who, historically, have accounted for the majority of RV sales.

We believe that the factors on which RVIA based its forecast of increased RV shipments in 2015, such as improving economic conditions and increases in consumer confidence and disposable income, will lead to increases in purchases and in the usage of RVs by consumers which, in turn, usually result in increases in their purchases of the products we sell. For that reason, we also believe that our sales will increase and our gross margins will improve in 2015. Our belief in this regard also is based on our sales in the first two months of 2015, which are significantly higher than in the same period of 2014. However, it is too early in the year for us to predict, with any degree of accuracy, whether these favorable market conditions will continue throughout 2015. Moreover, even if our sales and gross margin increase in 2015, there can be no assurance that we will be able to meaningfully increase our earnings in 2015, because our profitability also is dependent on a number of factors and circumstances, such as the strength of the economic recovery, the movement of interest rates, which are expected to increase, and fluctuations in in foreign exchange rates, over which we have no control. See **RISK FACTORS** in Item 1A of this Report.

Table of Contents

Critical Accounting Policies and Use of Estimates

General

In accordance with accounting principles generally accepted in the United States of America (GAAP), we record most of our assets at the lower of cost or fair value. In the case of some of our assets, principally accounts receivable, inventories and deferred income taxes, we make adjustments to their cost or fair values to arrive at what we expect to be able to collect on outstanding accounts receivables, the amounts for which we expect to be able to sell our inventories and the amount of our deferred tax assets (which consists of available tax loss and credit carryforwards and tax deductions) that we will be able to use to reduce our taxes in the future. Those adjustments are made on the basis of a number of different factors, including the assumptions and judgments we make regarding economic and market conditions and trends and their impact on our financial performance. However, those assumptions and judgments are necessarily based on current information available to us. If those conditions or trends were to change in ways that we did not expect, then based on our assessment of how those changes will affect the prospects for realizing the values at which we had recorded these assets, pursuant to GAAP we may be required to adjust those carrying values downward for financial reporting purposes. Such downward adjustments are commonly referred to as write-downs of the assets affected by the changed conditions.

It is our practice to establish reserves or allowances against which we are able to charge any such downward adjustments or write-downs to these assets. Examples include an allowance established for uncollectible accounts receivable (sometimes referred to as bad debt reserves), an allowance for inventory obsolescence and a valuation allowance against our deferred tax asset to the extent necessary to reduce its carrying value to the amount of that asset which we believe we are likely to be able to use to reduce our taxes in the future. The amounts at which those allowances or reserves are established and maintained are based on our historical experience and also on our assumptions and judgments about economic or market conditions or trends and any other factors that are expected to affect the values at which we had recorded such assets. We periodically increase or replenish the allowances following write-downs of uncollectible accounts or to take account of increased risks due to changes in economic or market conditions or trends. Increases in the allowances are effectuated by charges to income or increases in expense in the periods when those allowances are increased. As a result, our judgments or assumptions about market and economic conditions or trends and about their effects on our financial performance can and will affect not only the amounts at which we record these assets on our balance sheet, but also our results of operations.

The decisions as to the timing of (i) adjustments or write-downs of this nature and (ii) the increases we make to our allowances or reserves, also require subjective evaluations or assessments about the effects and duration of changes in economic or market conditions or trends. For example, it is difficult to predict whether events or changes in economic or market conditions, such as increasing gasoline prices or interest rates or economic downturns, will be of short or long-term duration, and it is not uncommon for it to take some time after the onset of such changes for their full effects on our business to be recognized. Therefore, we make such estimates based upon the information available to us at that time and reevaluate and adjust the reserves and allowances for potential write-downs on a quarterly basis.

Under GAAP, most businesses also must make estimates or judgments regarding the periods during which sales are recorded and also the amounts at which they are recorded. In the case of product distribution businesses, which customarily grant to their customers contractual rights to return products sold to them, GAAP requires that a reserve or allowance be established for product returns by means of a reduction in the amount at which sales are recorded, based primarily on the nature, extensiveness and duration of those rights and historical return experience.

In making our estimates and assumptions we follow GAAP and accounting practices applicable to our business that we believe will enable us to make fair and consistent estimates of the carrying values of those assets and to establish

adequate reserves or allowances for downward adjustments that we may have to make to those values in future periods.

Table of Contents

Our Critical Accounting Policies

Set forth below is a summary of the accounting policies that we believe are material to an understanding of our financial condition and results of operations.

Revenue Recognition and the Allowance for Product Returns. We recognize revenue from the sale of a product upon its shipment to the customer. Shipping and handling costs that are billed to our customers are included in revenue and our shipping and handling costs are included in cost of sales. We provide our customers with limited rights to return products that we sell to them. We establish an allowance for potential returns that reduces the amounts of our reported sales. We estimate the allowance based on historical experience with returns of like products and current economic and market conditions and trends, which can affect the level at which customers submit products for return.

Accounts Receivable and the Allowance for Doubtful Accounts. In the normal course of our business we extend 30 day payment terms to our customers and, due to the seasonality of our business, during late fall and winter we sometimes grant payment terms of longer duration to those of our customers that have good credit records. We regularly review our customers' accounts and estimate the amount of, and establish an allowance for, uncollectible accounts receivable in each reporting period. The amount of the allowance is based on several factors, including the age of unpaid amounts, a review of significant past due accounts and current economic and market trends that can affect the ability of customers to keep their accounts current. Estimates of uncollectible amounts are reviewed periodically to determine whether or not the allowance should be increased, and any increases are recorded in the accounting period in which the events or circumstances that require such increases become known. For example, if the financial condition of some of our customers or economic or market conditions were to deteriorate, adversely affecting the ability of customers to make payments to us on a timely basis, it could become necessary for us to increase the allowance for uncollectible accounts. Since the allowance is increased or replenished by recording a charge which is included in, and has the effect of increasing, selling, general and administrative expenses, an increase in the allowance will reduce income in the period when the increase is recorded.

Inventory and Reserve for Excess, Slow-Moving and Obsolete Inventory. We are a wholesale distributor and not a manufacturer of products and, therefore, all of our inventory consists of finished goods. Inventories are valued at the lower of cost (first-in, first-out) or net realizable value and that value is reduced by an allowance for excess and slowing-moving or obsolete inventories. The amount of the allowance is determined on the basis of historical experience with different product lines and estimates or assumptions concerning future economic and market conditions and trends. If there were to be an economic downturn or a decline in sales, causing inventories of some products to accumulate, it could become necessary for us to increase the allowance. Other factors that can require increases in the allowance or inventory write downs are reductions in pricing or introduction of new or competitive products by manufacturers; however, due to the relative maturity of the markets in which we operate, usually these are not significant factors for us. Increases in this allowance also will cause a decline in operating results as such increases are effectuated by charges against income. Our reserves or excess and obsolete inventory decreased to \$1,395,000, and 4.3% of total inventories at December 31, 2014, from \$1,454,000 and 5.2%, respectively, at December 31, 2013.

Deferred Tax Assets and Valuation Allowance. We record as deferred tax assets on our balance sheet an amount equal to the tax credit and tax loss carryforwards and tax deductions (tax benefits) that we believe will be available to us to offset or reduce our income taxes in future periods. Under applicable federal and state income tax laws and regulations, in most cases, such tax benefits will expire if not used within specified periods of time. Accordingly, the ability to fully use our deferred tax assets depends on the amount of taxable income that we generate during those time periods. At least once each year, we make estimates of future taxable income that we believe we are likely to generate during those future periods. If we conclude, on the basis of those estimates and the aggregate amount of the tax benefits available to us, that it is more likely, than not, that we will be able to fully utilize those tax benefits prior to

their expiration, we recognize the deferred tax assets in full on our balance sheet. If, on the other hand, we conclude that it has become more likely, than not, that we will be unable to utilize those tax benefits in their entirety to reduce future taxes prior to their expiration, then we would establish (or increase any existing) valuation allowance to reduce the deferred tax assets on our balance sheet to the amount that we believe we are likely to be able to utilize. Such a reduction would be implemented by recognizing a non-cash charge that would have the effect of increasing the provision, or reducing any credit, for income taxes that would be recorded in our statement of operations. The aggregate amount of our net deferred tax assets was approximately \$3.2 million at December 31, 2014 and \$3.1 million at December 31, 2013.

Long-Lived Assets. Long-lived assets are reviewed for possible impairment at least annually or if and when events or changes in circumstances indicate the carrying amount of any of those assets may not be recoverable in full, by comparing the fair value of the long-lived asset to its carrying amount.

Table of Contents

Foreign Currency Translation. The financial position and results of operations of our Canadian and other foreign subsidiaries are measured using local currency as the functional currency. Assets and liabilities of each foreign subsidiary are translated into U.S. dollars at the rate of exchange in effect at the end of each reporting period. Revenues and expenses are translated into U.S. dollars at the average exchange rate for the reporting period. Foreign currency translation gains and losses not impacting cash flows are credited to or charged against other comprehensive earnings. Foreign currency translation gains and losses arising from cash transactions are credited to or charged against current earnings.

Stock-Based Compensation Expense. We account for stock-based compensation expense in accordance with ASC 718, *Stock Compensation*, which requires us to recognize the fair value of the compensation paid in stock or other equity awards as an expense in the calculation of our net earnings or loss. We recognize stock-based compensation expense over the period in which the employee is required to provide service, which is generally over the vesting period of the individual equity award. However, if the vesting of any equity award is conditioned on the achievement of a financial performance goal, we do not recognize stock-based compensation expense unless, and until the fiscal period during which, we have concluded that achievement of the performance goal has become probable. If, however, due to subsequent events or circumstances, the performance goal is not ultimately achieved, then the previously recognized stock-based compensation expense would be reversed. Stock options issued in lieu of cash to non-employees, such as directors, for services performed for us are recorded at the fair value of the options at the time they are issued and are expensed as service is provided. Stock-based compensation expense in the years ended December 31, 2014, 2013, and 2012 totaled \$266,000, \$302,000, and \$456,000, respectively.

Warranty Costs. We generally do not independently warrant the products that we distribute. Instead, in almost all cases, the manufacturers of the products that we distribute warrant the products and allow us to return defective products, including those that have been returned to us by our customers. However, we sell a line of portable generators under a product supply arrangement which obligates us to provide warranty services for these products and to share the costs of providing those services with the manufacturer. The duration of the warranty period for these products is 24 months following the retail sale of these products to the consumer. We established reserves for warranty claims with respect to these products of \$762,000 and \$737,000 at December 31, 2014 and 2013, respectively. Those amounts were determined on the basis of a number of factors, including the volume of our sales of those products and our historical and expected future warranty claims experience. In the event changes occur in the conditions or circumstances upon which those assumptions and estimates were made, it could become necessary for us to increase the reserve by means of a charge to our income.

Recent Accounting Pronouncements

For a discussion of Recently Issued Accounting Pronouncements, see Note A, Summary of Significant Accounting Policies Recently Issued Accounting Pronouncements to our consolidated financial statements.

Results of Operations

The following table sets forth certain financial data, expressed as percentage of net sales, derived from our statements of operations for the respective periods indicated below:

	Year Ended December 31,		
	2014	2013	2012
Net sales	100.0%	100.0%	100.0%

Edgar Filing: COAST DISTRIBUTION SYSTEM INC - Form 10-K

Cost of sales	82.2	82.3	84.8
Gross profit	17.8	17.7	15.2
SG&A expenses	17.7	17.6	17.1
Operating income (loss)	0.1	0.1	(1.9)
Interest expense	(0.5)	(0.5)	(0.5)
Loss before taxes	(0.4)	(0.4)	(2.3)
Income tax provision (benefit)	0.0	0.1	(0.5)
Net loss	(0.4)%	(0.6)%	(1.8)%

Table of Contents*Net Sales*

Net sales consist of revenues from the sales of the products we supply or distribute, net of an allowance for product returns. The following table sets forth certain information regarding the changes in our net sales in fiscal 2014 and 2013, in each case as compared to the immediately preceding year. Dollars in the table are in thousands.

		% Change		% Change
2014	2013	2014 vs. 2013	2012	2013 vs. 2012
\$118,799	\$113,938	4.3%	\$113,521	0.4%

2014 vs. 2013. Our sales in the United States increased by \$5,182,000, or 5.9%, while our sales in Canada declined by \$321,000, or 1.2%, in 2014 as compared to 2013. The increase in our sales in the United States in 2014 was achieved notwithstanding unusually cold spring and summer weather in the Midwest, Northeast and Southeast of the United States during the first half of the year. In the fourth quarter of 2014, our sales in the United States increased by 13.3% and our sales in Canada increased by 8.6%, both as compared to the same period in 2013. The respective increases in our sales in the United States and Canada in the fourth quarter of 2014 were primarily attributable to: (i) increases in the number of our customers that are participating in marketing programs that we initiated during 2014, (ii) the positive impact on our sales of a cumulative increase in the number of RVs sold during the last few years, and (iii) recent consolidation in our industry, which has enabled us to increase our sales to some of our existing customers and to attract new customers.

2013 vs. 2012. Although our consolidated sales were relatively unchanged in 2013, as compared to 2012, our sales in the United States increased by \$2,130,000, or 2.5%, while our sales in Canada declined by \$1,713,000, or 6.1%, in 2013 as compared to 2012. The sales decrease in Canada was primarily attributable to additional competition from U.S. distributors selling into Canada.

Gross Profit

Gross profit is calculated by subtracting cost of sales from net sales. Cost of sales consist primarily of the amounts paid to manufacturers and suppliers for the products that we purchase for resale, inbound freight charges, merchandise receiving, handling and storage costs, and out-bound freight charges. Gross margin is gross profit stated as a percentage of net sales.

	Year Ended December 31,		
	2014	2013	2012
	(Dollars in thousands)		
Gross profit	\$ 21,113	\$ 20,142	\$ 17,302
Gross margin	17.8%	17.7%	15.2%

2014 vs. 2013. The increase in our gross profit was largely attributable to our increase in net sales. Our gross margin in 2014 was negatively impacted by the severance costs incurred in connection with the closing, during 2014, of an import and quality control facility we had maintained in Taiwan, but which we no longer needed for our operations in Asia.

2013 vs. 2012. The increase in our gross profit and our gross margin in the year ended December 31, 2013, as compared to 2012, was primarily due to (i) a change in the mix of products sold to a greater proportion of our products on which we realize higher margins, including proprietary products, and (ii) selected price increases that we implemented in the first half of 2013.

Table of Contents*Selling, General and Administrative Expenses*

Selling, general and administrative (SG&A) expenses consist primarily of selling and marketing costs, administrative labor and other administrative expenses, professional fees, insurance and the provision made for uncollectible accounts. The majority of our corporate overhead costs are incurred in the United States. A portion of those costs are allocated to our foreign subsidiaries to the extent that they directly benefit from those expenses.

	Year Ended December 31,		
	2014	2013	2012
	(Dollars in thousands)		
SG&A expenses	\$ 21,034	\$ 20,080	\$ 19,435
As a percentage of net sales	17.7%	17.6%	17.1%

2014 vs. 2013. As a percentage of net sales, our SG&A expenses were substantially unchanged as compared to 2013. The \$954,000 increase in SG&A expenses in 2014 was due primarily to increased sales commissions resulting from the increase in our net sales in 2014, the hiring of additional sales personnel in order to grow our sales and increases in professional fees and marketing costs.

2013 vs. 2012. SG&A expenses increased by \$645,000, and, as a percentage of net sales, to 17.6%, as compared to 17.1% in 2012. These increases, were due primarily to our implementation of new marketing initiatives and the hiring of additional sales personnel in order to grow our sales in our core RV channel and to increase our penetration in the specialty retail channel in which we sell standby generators and other proprietary products.

Operating Income (Loss)

	Year Ended December 31,		
	2014	2013	2012
	(Dollars in thousands)		
Operating income (loss)	\$ 79	\$ 62	\$ (2,133)
As a percentage of net sales	0.1%	0.1%	(1.9)%

2014 vs. 2013. In 2014, the increases in our net sales and gross profits offset the increase in SG&A expenses. As a result, our operating income was substantially unchanged in 2014 as compared to 2013.

2013 vs. 2012. The \$2.2 million swing to \$62,000 of operating income in 2013 from an operating loss of \$2.1 million in 2012, was the result of the increase, described above, in our gross profit in 2013.

Other Expense, Net

	Year Ended December 31,		
	2014	2013	2012
	(Dollars in thousands)		
Other Expense, Net			
Interest expense, net	\$ 578	\$ 567	\$ 552

Edgar Filing: COAST DISTRIBUTION SYSTEM INC - Form 10-K

Other expense, net	63	54	70
Total	\$ 641	\$ 621	\$ 622
As a percentage of net sales	0.5%	0.5%	0.5%

Table of Contents

Other expense consists of the interest expense that we incur on borrowings and, to a much lesser extent, foreign currency gains or losses and gains or losses on disposal of assets.

Income Tax Provision (Benefit)

	Year Ended December 31,		
	2014	2013	2012
	(Dollars in thousands)		
Income tax provision (benefit)	\$ 48	\$ 143	\$(581)
Effective tax rate	N/A	N/A	22.4%

Our effective income tax rate is affected primarily by the amount of our expenses that are not deductible for income tax purposes, including stock-based compensation expense, and by varying tax rates on income generated by our foreign subsidiaries, because tax rates in their respective countries vary, sometimes considerably, from income tax rates in the United States. In addition, in years when our income or loss is marginal, state franchise and other taxes can lead to increases in our overall tax rate (or decreases in our tax benefit).

Liquidity and Capital Resources*Working Capital, Liquidity and Cash Flows*

We finance our working capital requirements for our operations primarily with borrowings under a revolving bank line of credit and internally generated funds. See *Sources and Uses of Cash* below.

Due to the nature of our business, our primary needs for working capital are to finance our accounts receivable and our purchases of inventory. Typically we bill our customers on an open account basis with 1%, 10 day, net 30-day terms. During late fall and in winter, however, we sometimes provide creditworthy customers with payment terms of longer duration and, as a result, we generally use a greater proportion of our borrowing availability during the first and second quarters of each year than during other periods of the year.

Our revolving bank line of credit agreement permits us to borrow up to the lesser of (i) \$25,000,000, or (ii) an amount equal to the sum of 85% of the value of our eligible accounts receivable and 55% of the value of our eligible inventory. Our borrowing base under our revolving credit line was \$17,038,000 at December 31, 2014 as compared to \$13,800,000 at December 31, 2013. Interest on our credit line borrowings in 2014 was paid at a rate equal to the bank's prime rate (3.25% at December 31, 2014) plus 1.75% or at our option but subject to certain limitations, the bank's LIBOR rate (0.25% at December 31, 2014) plus 3.25%. At March 13, 2015, outstanding borrowings under the revolving credit facility totaled \$18,390,000.

Effective November 13, 2014, the Company and the bank entered into the 19th Amendment to the credit line agreement (the 19th Amendment), primarily to enable the Company to finance increases in inventories in fiscal 2015. To accomplish that purpose, that Amendment increased the maximum borrowings that are available to us under the credit line in calendar 2015 to amounts up to (i) \$27 million during the months of February and July 2015, (ii) \$30 million during the months of March, April and May 2015; and (iii) \$29 million during the month of June 2015, but in no event more than the sum of 50% to 55% of the value of the Company's eligible inventories plus 85% of the value of its eligible accounts receivable. On the other hand, the maximum amount of borrowings that will be available to us under the credit line for the months of January, August, September, October, November and December 2015 will remain unchanged at \$25 million, when, due to the seasonality of our business, customer orders usually decline. The

bank has the right to increase or decrease these amounts, but only in the exercise of its good faith and reasonable business judgment.

As of December 31, 2014, we were in compliance with all of our financial and other covenants under our bank line of credit agreement. Also, the bank has extended the measurement date of a fixed charge coverage covenant to March 31, 2015. That covenant will require us to achieve a fixed charge coverage ratio of at least 1.1-to-1.0 for rolling 12 month periods ending on the last day of each fiscal quarter, commencing with the quarter that will end on March 31, 2015. The bank also has reduced the maximum amount of credit line borrowings that is available to us by \$1 million until we meet that covenant.

Our bank borrowings are collateralized by substantially all of our consolidated assets and rank senior in priority to any other indebtedness that we may be permitted to incur by the bank. The maturity date of this revolving bank line of credit is July 10, 2017. See RISK FACTORS *We rely heavily on bank borrowings to fund our business, which makes us more vulnerable to adverse changes in economic conditions and creates liquidity risks for us* in Item 1A above in this report.

Sources and Uses of Cash

We generally use cash for, rather than generate cash from, operations in the first half of the year, because we build inventories, and accounts receivables increase, as our customers begin increasing their product purchases prior to and in anticipation of the spring and summer selling seasons. See Seasonality and Inflation below.

Table of Contents

Cash Provided by (Used in) Operations in 2014, 2013 and 2012. In 2014, we used cash from operations of \$3.2 million, primarily to fund a \$4.6 million increase in inventory, a \$0.8 million increase in accounts receivable and a net loss of \$0.5 million, partially offset by increases of \$1.6 million in accounts payable, a \$0.4 million increase in accrued liabilities and non-cash expenses of \$0.8 million.

In 2013, our operations generated cash of \$3.0 million, comprised of a \$2.8 million reduction in inventory, a \$0.9 million reduction in prepaid expenses and an income tax receivable and \$0.9 million in non-cash expenses, partially offset by the use of \$0.9 million of cash to reduce accounts payable.

In 2012, we used cash of \$2.1 million in our operations, primarily to fund our net loss of \$2.0 million and a \$4.4 million increase in inventory, partially offset by increases of (i) non-cash expenses comprised of \$2.7 million in accounts payable, \$0.7 million in depreciation and amortization expense, \$0.5 million in stock-based compensation expense, and \$0.3 million in accrued liabilities, and (ii) \$1.0 million in cash generated by an increase in payments of accounts receivable.

Cash Flows Used in Investing Activities in 2014, 2013 and 2012. We used \$0.3 million of cash in 2014 and \$0.5 million in cash in each of 2013 and 2012 for investing activities, principally to fund purchases of other assets and capital expenditures, primarily for warehouse, office, and computer equipment.

Cash (Used in) Provided by Financing Activities in 2014, 2013 and 2012. Cash provided by financing activities consists primarily of cash from our revolving credit line borrowings and cash used in financing activities consists primarily of repayments of such borrowings. In 2014, our net borrowings exceeded our net repayments by \$2.4 million. In 2013, we used cash to repay credit line borrowings in an amount that exceeded our credit line borrowings by \$1.6 million. During 2012, our borrowings and repayments of long-term debt under our revolving bank line of credit substantially offset each other and as a result, financing activities provided cash of \$28,000 in 2012.

Contractual Obligations

Lease Obligations. We lease our facilities and certain of our equipment under non-cancelable operating leases. In 2014, rent expense under all operating leases totaled approximately \$3.7 million. The following table sets forth our future operating lease commitments (in thousands of dollars), as of December 31, 2014:

2015	\$ 3,682
2016	3,125
2017	747
2018	500
2019	451
Thereafter	613
	\$ 9,118

Total and Maturity of Contractual Obligations. The following table sets forth the total and the maturities of our contractual obligations, in thousands of dollars, at December 31, 2014:

Contractual Obligations at December 31, 2014:	Total of Contractual Obligations	Less than One Year	More than One and less than Four Years	Four to Five Years	More than Five Years
Long-term debt obligations ⁽¹⁾	\$ 11,681	\$	\$ 11,681	\$	\$
Operating lease obligations	9,118	3,682	3,872	951	613
	\$ 20,799	\$ 3,682	\$ 15,553	\$ 951	\$ 613

(1) Consists of borrowings under our revolving bank credit facility, which matures in July 2017. Our long-term debt obligations consist primarily of borrowings under our long-term revolving bank credit agreement. It is not possible to calculate future estimated interest payments on those borrowing predictably, because the amounts of such borrowings fluctuate throughout the year depending on our liquidity needs, which can vary widely primarily due to the seasonality of our business and the effects of prevailing economic conditions on the demand for and the purchases of our products by customers. Also, the interest rate on those borrowings is determined by reference to the bank's prime rate or LIBOR, which also can and often do fluctuate during the year. Additionally, the formulas for determining the specific interest rate that will apply to such borrowings can change from year to year. Set forth above, under the caption ***Liquidity and Capital Resources*** *Working Capital Liquidity and Cash Flows* are the formulas that applied to the determination of the interest rates on those borrowings during 2014.

Table of Contents

Dividend Policy and Dividend Payments. Since November 2008, the dividend policy of our Board of Directors has been and continues to be to preserve cash for operations, rather than to use cash to pay dividends. In addition, our bank credit line agreement contains restrictions on our payment of cash dividends. Moreover, we do not anticipate paying cash dividends at least for the foreseeable future.

Expected Uses and Sources of Funds

We expect to make capital expenditures in 2015 that we estimate will range from \$300,000 to \$500,000. We expect that these expenditures will be of a recurring nature, for such purposes as the replacement and upgrading of warehouse, computer or office equipment in the ordinary course of our business.

We expect to be able to fund these expenditures and our working capital requirements primarily with borrowings under our revolving bank line of credit and internally generated cash flow. However, see the discussion of the liquidity risks we face in Item 1A of this report under the caption **RISK FACTORS** *We rely heavily on bank borrowings to fund our business, which makes us more vulnerable to adverse changes in economic conditions and creates liquidity risks for us.*

We will continue to explore opportunities to increase our sales and our market share and to improve our profit margins by, among other things, establishing new product supply relationships that we believe will enable us to increase the products that we source from lower cost, but high quality, overseas suppliers, including product suppliers in Asia, and to invest in tooling needed for such products. As a result, we may have occasion in the future to use internally generated funds or bank borrowings for these purposes. There is no assurance, however, that bank borrowings will be available to us for these purposes.

Seasonality and Inflation

Seasonality. We generate significantly higher sales during the six-month period from March through August, when usage of RVs is at its peak, than we do during the remainder of the year when weather conditions are not optimal for outdoor activities. Because a substantial portion our expenses are fixed, operating income declines and we may incur losses, and must rely to a greater extent on borrowings to fund operating requirements, during the period from September through February when our sales and, therefore, our internally generated cash flows, are lower than in the spring and summer months.

The following tables present unaudited quarterly financial information for each of the fiscal years ended December 31, 2014 and 2013. This information has been prepared by us on a basis consistent with our audited financial statements included elsewhere in this Report. The information includes all necessary adjustments, consisting only of normal recurring adjustments, that management considers necessary for a fair presentation of the unaudited quarterly operating results when read in conjunction with the consolidated financial statements and notes thereto included elsewhere in this Report. These quarterly operating results are not necessarily indicative of results that may be expected in future periods.

Table of Contents

Inflation. Generally, we have been able to pass inflationary price increases on to our customers. However, inflation also may cause or may be accompanied by increases in gasoline prices and interest rates. Such increases, or even the prospect of increases in the price or shortages in the supply of gasoline, can adversely affect the purchase and usage of RVs, which can result in a decline in the demand for our products.

ITEM 7A QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market risk with respect to financial instruments is primarily related to changes in interest rates with respect to borrowing activities, which may adversely affect our financial position, results of operations and cash flows. In seeking to minimize the risks from interest rate fluctuations, we manage exposures through our regular operating and financing activities. The fair value of borrowings under our revolving credit facility approximates the carrying value of such obligations. As of December 31, 2014, we had outstanding borrowings under our revolving bank line of credit of \$11.7 million.

We have substantial sales operations in Canada and as a result, our earnings, cash flows and financial position can be affected by movements in the Canadian dollar exchange rate. Consequently, we are exposed to market risk from foreign currency fluctuations associated with our Canadian operations and our Canadian currency denominated debt. Therefore, from time to time, we may hedge the net investment of our foreign operations in Canada by purchasing foreign exchange derivatives, to mitigate the risk of changes in value of our net investment in our Canadian subsidiary that can occur as a result of changes in currency exchange rates. As of December 31, 2014 we held no foreign currency derivatives. We do not use derivatives or other financial instruments for trading or other speculative purposes.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of The Coast Distribution System, Inc.

We have audited the accompanying consolidated balance sheets of The Coast Distribution System, Inc. and Subsidiaries (the Company) as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive loss, stockholders' equity, and cash flows for the three years in the period ended December 31, 2014. Our audits also included the financial statement schedule listed in Item 15(a) (2). These consolidated financial statements and the financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and the financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2014 and 2013 and the results of its operations and its cash flows in each of the years in the three year period ended December 31, 2014 in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

Table of Contents**THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****NOTE A: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

A summary of the significant accounting policies consistently applied in the preparation of the accompanying consolidated financial statements follows:

1. *Principles of Consolidation.* The Company consolidates the accounts of its wholly-owned subsidiaries, The Coast Distribution System (Canada) Inc. (Coast Canada) and Eur-Asia Recreational Vehicle Accessories Taiwan Company (Coast Taiwan). Investments in unconsolidated affiliates are accounted for by the equity method. All material intercompany transactions have been eliminated.

2. *Inventories.* All of our inventory consists of finished goods, which are comprised of replacement parts, supplies and accessories held for resale. Inventories are stated at the lower of cost (determined on a first-in, first-out basis) or net realizable value. We regularly assess the appropriateness of the inventory valuations with particular attention to obsolete, slow-moving and non-saleable inventory. At December 31, 2014 and 2013, our reserves for excess and obsolete inventory were \$1,395,000 and \$1,454,000, respectively.

3. *Property and Equipment.* Property and equipment are stated at cost less accumulated depreciation and amortization. Depreciation and amortization are provided for in amounts sufficient to relate the cost of depreciable assets to operations over their estimated service lives, principally on a straight-line basis. The estimated lives used in determining depreciation and amortization are:

Buildings and improvements	12 - 40 years
Warehouse and office equipment	5 - 7 years
Automobiles	3 - 5 years

Leasehold improvements are amortized over the lives of the respective leases or the service lives of the improvements, whichever is shorter. Currently the amortization periods range from 5 to 15 years.

4. *Revenue Recognition.* Revenue from sales of products is recognized upon shipment. Shipping and handling costs that are billed to our customers are included in revenue. We provide our customers with a limited right of return. We establish an allowance for potential returns which reduces the amounts of our reported sales. We estimate the allowance based on historical experience with returns of like products and current economic data, which can affect the level at which customers submit product returns.

5. *Segment Reporting.* We have one operating segment, which is the distribution of replacement parts, supplies and accessories principally for recreational vehicles. We distribute those products from 17 distribution centers located throughout the United States and Canada. No single customer accounted for 10% or more of our net sales in 2014, 2013 or 2012.

6. *Long-Lived Assets.* Long-lived assets are reviewed for possible impairment at least annually or, more frequently, if and when events or changes in circumstances indicate the carrying amount of any of those assets may not be recoverable in full, by comparing the fair value of the long-lived asset to its carrying amount.

7. *Foreign Currency Translation.* Exchange adjustments resulting from foreign currency transactions are generally recognized in net earnings; whereas adjustments resulting from the translation of financial statements are reflected as a separate component of stockholders' equity. The functional currency of our Canadian subsidiary is the Canadian dollar.

8. *Derivative Financial Instruments.* We sometimes use derivatives to partially offset our exposure to fluctuations in certain foreign currencies. We do not enter into derivatives for speculative or trading purposes. Derivatives are recorded at fair value on the balance sheet and gains or losses resulting from changes in fair value of a derivative are recorded based on the derivative's hedge designation.

9. *Cash and Cash Equivalents.* Cash and cash equivalents include highly liquid instruments with maturities of three months or less and overnight investments funded with cash from sweep accounts maintained by the Company at one or more banks.

Table of Contents

THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

10. *Income Taxes.* We provide a deferred tax expense or benefit equal to the net change in the deferred tax liability or asset during the year. Deferred income taxes represent tax deductions and tax loss carryforwards and future net tax effects resulting from temporary differences between the book and tax bases of assets and liabilities, using enacted tax rates. A valuation allowance is established against deferred tax assets if and to the extent we determine that it is more likely, than not, that the deferred tax assets will not be realized in full.

11. *Use of Estimates.* In preparing financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP), we are required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as revenues and expenses during the reporting period. Actual results could differ from those estimates.

12. *Earnings (Loss) per Share.* Basic earnings (loss) per share for any period are computed using the weighted average number of common shares outstanding during that period. Unvested restricted shares are excluded from outstanding shares for purposes of this calculation. Diluted loss per share are computed using the weighted average number of common and potentially dilutive securities outstanding during the period. Potentially dilutive securities consist of the incremental common shares issuable upon exercise of stock options and vested restricted shares (using the treasury stock method). Potentially dilutive securities are excluded from the computation if their effect is anti-dilutive.

Options to purchase 101,000, 279,000 and 433,000 shares in 2014, 2013 and 2012, respectively, were excluded from the computation of diluted earnings (loss) per share because their inclusion in that computation would have been anti-dilutive. In addition, 268,985, 318,660 and 312,501 restricted shares were excluded from the computation of diluted loss per share in 2014, 2013 and 2012, respectively, because their inclusion in that computation would have been anti-dilutive.

13. *Fair Value Measurement of Financial Assets and Liabilities.* We apply fair value accounting for all financial assets and liabilities and non-financial assets and liabilities that are recognized or disclosed at fair value in the financial statements on a recurring basis. We define fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities that are required to be recorded at fair value, we consider the principal or most advantageous market in which we would transact and the market-based risk measurements or assumptions that market participants would use in pricing the asset or liability, such as inherent risk, transfer restrictions and credit risk.

GAAP establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring the fair values of financial and non-financial assets and liabilities. These tiers consist of:

Level 1: Quoted market prices in active markets for identical assets or liabilities

Edgar Filing: COAST DISTRIBUTION SYSTEM INC - Form 10-K

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data

Level 3: Unobservable inputs that are not corroborated by market data

The following tables summarize the fair value measurements (in thousands of dollars) of our financial assets:

		At December 31, 2014

Table of Contents

THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company had no level 3 assets or liabilities at December 31, 2014 and 2013.

We use the income approach to value derivatives, using observable Level 2 market expectations at the measurement date and standard valuation techniques to convert future amounts to a single discounted present amount, assuming that participants are motivated but not compelled to transact. Level 2 inputs are limited to quoted prices that are observable for the asset and liabilities, which include interest rate and credit risk. We have used mid-market pricing as a practical expedient for fair value measurements.

14. *Accounts Receivable and the Allowance for Doubtful Accounts.* The majority of our accounts receivable are due from RV dealers, supply stores and service centers. Credit is extended to a customer based on evaluation of its financial condition and, generally, collateral is not required. We maintain allowances for doubtful accounts for estimated losses that would result from the inability of customers to make required payments on their accounts. We regularly evaluate the adequacy of the allowance for doubtful accounts. We estimate potential losses on our accounts receivable on the basis of the aging of accounts receivable balances, a review of significant past due accounts, and our historical write-off experience, net of recoveries. If the financial condition of our customers were to deteriorate, whether due to deteriorating economic conditions generally or otherwise, adversely affecting their ability to make payments, it could become necessary for us to make additional provisions to increase the allowance for doubtful accounts.

15. *Stock-Based Compensation.* We account for stock-based compensation in accordance with Accounting Standards Codification (ASC) 718, *Stock Compensation*, which requires the recognition of the fair value of compensation paid in stock or other equity instruments to employees or directors as an expense in the calculation of net earnings (loss). We generally recognize stock-based compensation expense over the period in which the employee or director is required to provide service, which is generally over the vesting period of the individual equity instruments. However, if the vesting of an equity award is conditioned on the achievement of a financial or other performance goal, we do not recognize stock-based compensation expense unless and until we have concluded that achievement of the performance goal has become probable. If we have made such a determination, but the performance goal is not ultimately achieved, due to subsequent events or circumstances, then the previously recognized stock-based compensation expense would be reversed.

16. *Warranty Costs.* We generally do not independently warrant the products that we distribute. Instead, in most instances, the manufacturers warrant their products and allow us to return defective products, including those that have been returned to us by our customers. However, we sell a line of portable generators under a product supply arrangement which obligates us to provide warranty services for these products and provides for us to share the costs of providing those services with the manufacturer. The warranty period is 24 months following the sale of the product to a retail customer. Accordingly, we maintain a reserve for warranty claims we may receive with respect to generators that have been sold to consumers. At December 31, 2014 and 2013, those warranty reserves totaled \$762,000 and \$737,000, respectively. We periodically increase the warranty reserve to replenish it after it has been reduced by warranty claims charged against it or to increase the reserve as a result of unanticipated increases in claims or material increases in the number of generators that we have sold. Those increases are effectuated by means of a provision for warranty claims which is recorded as a component of our costs of sales in our consolidated statements of operations and, as a result, increases in the warranty reserve can result in a reduction in our income for the period

during which such provisions are made.

Although we do not maintain insurance for product warranty claims, we do maintain insurance to protect us against product liability claims relating to all of the products we distribute and sell, including the generator products.

17. Recent Accounting Pronouncements. With the exception of those discussed below, there have been no recent accounting pronouncements or changes in accounting pronouncements during the year ended December 31, 2014 that we believe are of significance, or potential significance, to the Company based on our current operations.

In June 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-12, which clarifies the accounting for share-based payments when the terms of an award provide that a performance target could be achieved after the requisite service period. ASU 2014-12 is effective for annual and interim periods beginning after December 15, 2015 with early adoption permitted. We do not believe the adoption of this guidance will have a material impact on our consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts With Customers, a new standard on revenue recognition. The new standard will supersede existing revenue recognition guidance and apply to all entities that enter into contracts to provide goods or services to customers. The guidance also addresses the measurement and recognition of gains and losses on the sale of certain non-financial assets, such as real estate, and property and equipment. The new standard will become effective for us beginning in the first quarter of 2017 and can be adopted either retrospectively to each reporting period presented or as a cumulative effect adjustment as of the date of adoption. We are currently evaluating the impact of adopting this new guidance on our consolidated financial statements.

Table of Contents**THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In April 2014, the FASB issued a new standard relating to the reporting and disclosure of discontinued operations, which changes the criteria and requires additional disclosures for reporting discontinued operations. This new standard will be effective for all disposals of components of an entity that occur within annual periods beginning on or after December 15, 2015. We do not expect this new standard to have a material impact on our consolidated financial statements or disclosures in our financial statements.

NOTE B: PROPERTY AND EQUIPMENT, NET

Property and equipment, net consist of the following at December 31:

	2014	2013
	(In thousands)	
Warehouse equipment	\$ 4,941	\$ 5,197
Office equipment	5,190	5,246
Leasehold improvements	1,525	1,554
Automobiles	115	114
	11,771	12,111
Less accumulated depreciation and amortization	(10,645)	(10,863)
	\$ 1,126	\$ 1,248

Depreciation and amortization expense totaled \$724,000, \$628,000 and \$711,000 in 2014, 2013 and 2012, respectively.

NOTE C: LONG-TERM OBLIGATIONS

Long-term obligations consist of the following at December 31:

	2014	2013
	(In thousands)	
Secured notes payable to bank under line of credit due July 10, 2017	\$ 11,681	\$ 9,299

The secured notes payable to bank evidence borrowings under a revolving credit facility which permits us to borrow up to the lesser of (i) \$25,000,000, or (ii) an amount equal to 85% of the value of our eligible accounts receivable and up to 55% of the value of our eligible inventory. The Company's borrowing base at December 31, 2014 was \$17,000,000 as compared to \$13,800,000, at December 31, 2013. Interest is payable at the bank's prime rate (3.25% at December 31, 2014) plus 1.75% or, at the Company's option but subject to certain limitations, at the bank's LIBOR rate

(0.25% at December 31, 2014) plus 3.25%. As of December 31, 2014, we were in compliance with all of our financial and other covenants under our line of credit agreement. The credit facility is scheduled to mature at July 10, 2017.

Effective November 13, 2014, the Company and the bank entered into the 19th Amendment to the credit line agreement (the 19th Amendment), primarily to enable the Company to finance increases in inventories in fiscal 2015. To accomplish that purpose, that Amendment increases the maximum borrowings that will be available to us under the credit line in calendar 2015 to amounts up to (i) \$27 million during the months of February and July 2015, (ii) \$30 million during the months of March, April and May 2015; and (iii) \$29 million during the month of June 2015, but in no event more than the sum of 50% to 55% of the value of the Company's eligible inventories plus 85% of the value of its eligible accounts receivable. On the other hand, the maximum amount of borrowings that will be available to us under the credit line for the months of January, August, September, October, November and December 2015 will remain unchanged at \$25 million, when, due to the seasonality of our business, customer orders usually decline. The bank has the right to increase or decrease these amounts, but only in the exercise of its good faith and reasonable business judgment.

At March 13, 2015, outstanding borrowings under the revolving credit facility totaled \$18,390,000. Our credit facility borrowings are secured by substantially all of our consolidated assets and rank senior in priority to any other indebtedness that the Company may incur.

NOTE D: COMMITMENTS AND CONTINGENCIES

Operating Leases. We lease our corporate offices, warehouse facilities, and some of our office equipment. These leases are classified as operating leases as they do not meet the required capitalization criteria. The office and warehouse leases expire at various dates over the next twelve years.

Table of Contents**THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Minimum future rental commitments under non-cancelable operating leases as of December 31, 2014, in thousands of dollars, are as follows:

Year Ending December 31,	
2015	\$ 3,682
2016	3,125
2017	747
2018	500
2019	451
Thereafter	613
	\$9,118

Rent expense charged to operations amounted to \$3,670,000 in 2014, \$3,759,000 in 2013, and \$3,938,000 in 2012.

Legal Proceedings. We are subject to legal proceedings, claims and litigation arising in the ordinary course of business, including product liability, personal injury and intellectual property litigation. While the outcome of currently pending litigation is not determinable due to the uncertainties inherent in litigation, based on the information currently available to us, we do not expect that any liabilities or costs that might be incurred to resolve these matters will have a material adverse effect on our financial condition, results of operations or cash flows.

NOTE E: STOCK INCENTIVE PLANS

In August 2012, our shareholders approved the 2012 Equity Incentive Plan (the 2012 Plan), which provides for the grant of equity incentives, consisting of options, stock appreciation rights, restricted stock and restricted stock units to officers, other key employees, directors and consultants. The 2012 Plan initially set aside, for the grant of such equity incentives, 300,000 shares of our common stock, plus an additional 17,666 shares which was equal to the total of the number of shares that were then available for the grant of new options or other equity incentives under our then existing stockholder-approved stock incentive plans (the Previous Plans). At the same time, those 17,666 shares ceased to be available for the grant of equity incentive under those Previous Plans.

The Previous Plans had provided that, if any options outstanding under any of those plans were to expire or otherwise terminate, rather than being exercised, or any unvested restricted shares were to be cancelled, the shares that had been subject to those options and such cancelled restricted shares would become available for the grant of new options or other equity incentives under those plans. However, the 2012 Plan provides, instead, that if any of those options expire or terminate for any reason or any of those unvested restricted shares are cancelled, then, the number of shares that will become available for grants or awards of equity incentives under the 2012 Plan will be increased by an equivalent number of shares, instead of becoming available for new equity incentive grants under the Previous Plans. Therefore, if any equity incentives that are outstanding under the Previous Plans expire, terminate or, subject to certain limitations, are reacquired by the Company, then a number of shares equal to the number of shares that had been

subject to those equity incentives would become available for future grants under the 2012 Plan and those shares would cease to be available for future grants under the Previous Plans. As of December 31, 2014, 207,333 shares from the Previous Plans have been redistributed and made available for grant under the 2012 Plan.

As of December 31, 2014, 372,332 shares remained available for grant under the 2012 Plan.

Information Regarding Stock Options. The fair value of outstanding options was estimated as of the date of grant using a binomial model. This model incorporates certain assumptions including a risk-free market interest rate, the expected dividend yield of the underlying common stock, the expected life of the option and expected volatility in the market value of the underlying common stock.

Table of Contents**THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

We used the following assumptions in estimating the fair value of the options issued in the periods indicated below:

	Year Ended December 31,		
	2014	2013	2012
Expected volatility	56.7%	57.0%	59.0%
Risk free interest rate	2.39%	2.73%	1.64%
Expected dividend yields	N/A	N/A	N/A
Expected lives	10 yrs.	10 yrs.	10 yrs.

Expected volatilities are based on the historical volatility of the Company's common stock. The risk free interest rate is based upon market yields for United States Treasury debt securities. The expected dividend yields are based upon the Company's dividend policy in effect in each of the years presented and the fair market value of the Company's shares at the time of grant. Expected lives are based on several factors, including the average holding period of the outstanding options, their remaining terms and the cycle of our long range business plan.

The following tables summarize stock option activity during the years ended December 31, 2014 and 2013:

	Shares	Year Ended December 31, 2014		
		Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Values
Outstanding at January 1, 2014	279,000	\$ 3.31		
Granted	8,000	3.30		
Exercised	(142,000)	1.14		
Forfeited	(44,000)	5.72		
Outstanding at December 31, 2014	101,000	5.31	4.0 years	\$ 15,300
Exercisable at December 31, 2014	93,000	5.48	3.5 years	\$ 15,300
Options vested and expected (as of December 31, 2014) to vest in the future	101,000	5.31	4.0 years	\$ 15,300

Year Ended December 31, 2013
Shares

		Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Values
Outstanding at January 1, 2013	433,000	\$ 3.60		
Granted	10,000	3.80		
Exercised	(30,500)	0.94		
Forfeited	(133,500)	4.84		
Outstanding at December 31, 2013	279,000	3.31	2.5 years	\$ 321,200

The aggregate intrinsic value in each of the tables above represents the total pre-tax intrinsic value (the aggregate difference between the closing price of the Company's common stock on the American Stock Exchange on December 31, 2014 and 2013, respectively, and the exercise price for in-the-money options that would have been received by the option holders if all in-the-money options had been exercised on December 31, 2014 and 2013, respectively). The total pre-tax intrinsic values of the options exercised during 2014 and 2013 were \$350,000 and \$75,000, respectively.

The weighted-average grant-date fair values of options granted during the years ended December 31, 2014 and 2013 were \$3.23 and \$2.77, respectively. The Company recognized stock-based compensation expense in the amount of \$33,000, \$24,000 and \$16,000 for stock options in the years ended December 31, 2014, 2013 and 2012.

Table of Contents**THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

At December 31, 2014, the Company had no unrecognized compensation cost related to unvested options.

Set forth below is additional information with respect to the stock options that were outstanding under our equity incentive plans at December 31, 2014:

Range	Outstanding Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Options Exercisable	Weighted Average Exercise Price
\$1.80 - \$4.25	46,000	\$ 3.14	7.2	38,000	\$ 3.11
\$4.90 - \$9.80	55,000	7.12	1.3	55,000	7.12
\$1.80 - \$9.80	101,000	\$ 5.31	4.0	93,000	\$ 5.48

Restricted Shares. We began granting service-contingent restricted shares of common stock to some of our officers and other key management employees in 2010. The terms of those grants provided for those restricted shares to vest in equal annual installments over a three or four year service period following the respective dates of those awards, subject to the continued service with the Company of the recipients of such shares. In accordance with ASC 718 - compensation expense for such awards is based on the fair market value of those awards on their respective dates of grant and is recognized over those service periods. A total of 103,494 of those service-contingent restricted shares remained unvested at December 31, 2014. Since all of the holders of those remaining unvested restricted shares were still in the Company's employ at December 30, 2014, we expect that all of those unvested restricted shares will vest over the remainder of their respective vesting periods. The Company recognized stock-based compensation expense in the amount of \$233,000, \$278,000 and \$440,000 for service-contingent restricted shares in the years ended December 31, 2014, 2013 and 2012, respectively. At December 31, 2014, unrecognized stock-based compensation cost attributable to service-contingent restricted shares totaled approximately \$52,439 which, as of that date, was expected to be recognized over a weighted average period of approximately one year. The aggregate intrinsic value of these restricted shares, at December 31 2014, was \$335,321.

In 2013 and 2014, our officers and other key management employees were granted performance-contingent restricted shares. These performance-contingent shares vest in three annual installments and are subject to the achievement by the Company of different financial performance goals applicable to those years. Stock-based compensation expense with respect to each one-third of those performance-contingent shares is recognized only if, and when we are able to determine that the Company's achievement of the performance goal for the particular year has become probable. However, if any stock-based compensation expense were to be recognized based on such a determination, but the performance goal was not ultimately achieved, then that previously recognized stock-based compensation expense would be reversed. The Company has not recognized any stock-based compensation expense for performance-contingent restricted shares in the years ended December 31, 2014, 2013 and 2012. The Company did

not achieve the financial performance goal for 2014. As a result, no stock-based compensation expense was recognized in respect of any of the performance-contingent shares in 2014, one-third of the performance-contingent restricted shares were cancelled, and the remaining 165,491 of these performance-contingent shares continued to be unvested as of December 31, 2014. We cannot predict, as of yet, whether any of those remaining performance contingent shares will become vested as that will depend on the Company's results of operations in 2015 and 2016. At December 31, 2014, a total of 165,491 performance-contingent restricted shares were outstanding.

Table of Contents**THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

A summary of restricted stock activity during the years ended December 31, 2014 and 2013 is presented below:

	Shares	Weighted Average Grant Date Fair Values
Outstanding at January 1, 2014	318,660	\$3.27
Granted	164,500	3.66
Vested	(103,503)	3.44
Forfeited	(110,672)	3.31
Outstanding and unvested at end of year	268,985	\$3.43

	Shares	Weighted Average Grant Date Fair Values
Outstanding at January 1, 2013	312,501	\$3.39
Granted	167,500	2.96
Vested	(105,504)	3.29
Forfeited	(55,837)	2.96
Outstanding and unvested at end of year	318,660	\$3.27

The intrinsic value of the 103,503 restricted shares that vested during the year ended December 31, 2014 was approximately \$384,500. A total of 34,793 of those restricted shares were cancelled in satisfaction of a total of \$129,000 of tax withholding obligations of holders of those restricted shares that arose as a result of the vesting of those shares.

At December 31, 2014, unrecognized stock-based compensation cost attributable to performance-contingent restricted shares totaled approximately \$567,000 which, as of that date, was expected to be recognized over a weighted average period of approximately 0.8 years. All of the restricted shares outstanding at December 31, 2014 are expected to vest. The aggregate intrinsic value of the performance-contingent restricted shares, at December 31, 2014, was \$536,200.

NOTE F: EMPLOYEE BENEFIT PLAN

We have established a profit sharing plan in which all full-time employees are eligible to participate beginning the first quarter following the completion of three months of employment with the Company or any of its subsidiaries. This plan allows participants to make pretax contributions and apply for and secure loans from their respective accounts. The plan permits the Company to make discretionary contributions to be determined annually by the

Company's Board of Directors or Compensation Committee. The Company did not make any contributions to the plan in 2014, 2013 or 2012.

Table of Contents**THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****NOTE G: FOREIGN OPERATIONS**

A summary of the Company's operations by geographic area is presented below for the years ended December 31:

	2014	2013	2012
	(In thousands)		
Net sales to external customers			
United States	\$ 92,686	\$ 87,504	\$ 85,374
Canada	26,113	26,434	28,147
Operating income (loss)			
United States	\$ 1,289	\$ 1,085	\$ (459)
Canada	(1,195)	(1,122)	(1,607)
Other	(15)	99	(67)
Identifiable assets			
United States	\$ 40,819	\$ 36,339	\$ 38,341
Canada	8,703	9,554	11,009
Other	245	351	309

The Company has an equity investment in a corporation which conducts a business that is similar to the Company's business, but in a much smaller scale, in Mexico. That investment, which is included in long-term assets on the Company's consolidated balance sheet, totaled approximately \$1,043,000 and \$982,000 at December 31, 2014 and 2013, respectively. The results of operation of this corporation are included in equity in the net earnings of unconsolidated affiliates in the Company's consolidated statements of operations.

NOTE H: INCOME TAXES

Pretax earnings (loss) for the years ended December 31, 2014, 2013 and 2012 were taxed in the following jurisdictions:

	Year Ended December 31,		
	2014	2013	2012
	(In thousands)		
Domestic	\$ 869	\$ 648	\$ (807)
Foreign	(1,344)	(1,142)	(1,788)
	\$ (475)	\$ (494)	\$ (2,595)

The provision (benefit) for income taxes in each of 2014, 2013 and 2012 is summarized below:

	Year Ended December 31,		
	2014	2013	2012
	(In thousands)		
Current			
Federal	\$ 74	\$	\$
State	79	90	61
Foreign	(14)	1	(409)
	139	91	(348)
Deferred			
Federal	168	216	(171)
State	34	87	
Foreign	(293)	(251)	(62)
	(91)	52	(233)
	\$ 48	\$ 143	\$ (581)

Table of Contents**THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Deferred tax assets (liabilities) were comprised of the following at December 31:

	2014	2013
	(In thousands)	
Deferred tax assets		
Inventory	\$ 1,112	\$ 1,155
Bad debt provision	47	60
Property and equipment	81	95
Deferred credits	1,280	1,280
Loss carryforwards	1,203	1,031
Rent	121	148
Other	802	812
Gross deferred tax assets	4,646	4,581
Less valuation allowance ⁽²⁾	(1,354)	(1,369)
	3,292	3,212
Deferred tax liabilities		
Property and equipment	(79)	(84)
Unremitted earnings of foreign affiliates	(29)	(53)
Gross deferred tax liabilities	(108)	(137)
Net deferred tax assets⁽¹⁾	\$ 3,184	\$ 3,075

(1) \$1,755,000 and \$1,849,000 of the total deferred tax assets at December 31, 2014 and 2013 were included in current assets and \$1,429,000 and \$1,226,000 were included in other long-term assets at December 31, 2014 and 2013, respectively.

(2) The deferred tax valuation allowance decreased by \$15,000 during 2014 and \$7,000 during 2013. Set forth below is a reconciliation between actual tax expense (benefit) and expected tax expense (benefit) for the respective periods presented below:

Year Ended December 31,
2014 2013 2012
(In thousands)

Edgar Filing: COAST DISTRIBUTION SYSTEM INC - Form 10-K

Loss before income taxes	\$ (475)	\$ (494)	\$ (2,595)
Expected income tax expense at 34%	\$ (162)	\$ (168)	\$ (882)
Difference in rates on earnings of foreign operations	185	148	83
Stock-based compensation and other nondeductible expenses	43	33	27
State taxes and credits (net of federal benefit)	63	134	50
Change in valuation allowance	(15)	(7)	
Unremitted earnings of foreign subsidiaries	(24)	(5)	(19)
Exclusion of earnings of foreign affiliates	(30)	(22)	(54)
Foreign dividend			192
Shortfall on vested restricted shares that exceed pool of windfall tax benefits		32	
Intercompany profit elimination	(14)		
Other	2	(2)	22
Income tax provision (benefit)	\$ 48	\$ 143	\$ (581)

Deferred income taxes have been provided on the undistributed earnings of certain foreign subsidiaries where it is contemplated that earnings will not be reinvested.

Table of Contents**THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

At December 31, 2014, the operating loss carryforwards available for federal, state and foreign income tax purposes were \$963,000, \$3,787,000 and \$4,281,000, respectively. The earliest year during which any of the carryforwards begin to expire is 2016. At December 31, 2014, foreign tax credit carryforwards available for federal income tax purposes totaled \$328,000, which expire in 2015. State targeted tax area credit carryforwards of \$1,245,000 are available with no expiration dates.

It is our policy to classify interest and penalties as a component of tax expense. At December 31, 2014 we had \$254,000 of unrecognized tax benefits, of which \$19,000 impacted our effective tax rate. Interest and penalties totaled \$133,000, which was accrued on the balance sheet at December 31, 2014.

The Company and its domestic subsidiaries file income tax returns in the US federal jurisdiction and in various state jurisdictions. The Company's foreign subsidiaries file income tax returns in the respective jurisdictions in which they are based. With few exceptions, we are no longer subject to tax examinations by taxing authorities for years before 2008. We do not expect total unrecognized tax benefits to change significantly during the year ended December 31, 2014 due to the expiration of any statutes of limitations.

A reconciliation of the beginning and ending amounts of unrecognized tax benefits is as follows:

Unrecognized Tax Benefits (in thousands):	2014	2013
Balance as of January 1,	\$ 273	\$ 263
Additions for tax positions related to the current year	3	10
Additions for tax positions related to prior years	15	
Reductions for tax positions of prior years	(37)	
Balance as of December 31,	\$ 254	\$ 273

NOTE I: LOSS PER SHARE

We calculate basic earnings (loss) per share (EPS) of our common stock for any period by dividing the Company's net earnings (loss) by the weighted-average number of common shares outstanding for that period. The calculation of diluted EPS assumes the issuance of common stock for all potentially dilutive share equivalents outstanding. Outstanding stock options and restricted shares were not considered to be dilutive securities for the years ended December 31, 2014, 2013 and 2012. due to the net loss incurred by the Company in 2014, 2013 and 2012. Set forth below are the computations of basic and diluted loss per share for each of the following periods:

Year Ended December 31,		
2014	2013	2012
(In thousands)		

Numerator:			
Net loss	\$ (523)	\$ (637)	\$ (2,014)
Denominator:			
Weighted average shares outstanding	4,906	4,691	4,597
Dilutive effect of stock options and restricted shares			
Denominator for diluted loss per share	4,906	4,691	4,597

Table of Contents**THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****NOTE J: ACCRUED LIABILITIES**

Accrued liabilities consisted of the following (in thousands) at December 31:

	As of December 31,	
	2014	2013
Payroll and related benefits	\$ 937	\$ 798
Rent	362	436
Income and other taxes	400	393
Warranty reserve	762	737
Customer rebates	1,041	794
Other	644	551
	\$ 4,146	\$ 3,709

NOTE K: WARRANTY RESERVE

We generally do not independently provide warranties on the products that we distribute. Instead, in almost all cases, the manufacturers of the products that we distribute warrant the products and allow us to return defective products, including those that have been returned to us by our customers. However, we sell a line of portable generators under a product supply arrangement which obligates us to provide warranty services for these products and to share the costs of providing those services with the manufacturer. Accordingly, we maintain a reserve against which we charge warranty claims we receive with respect to those generators. The amount of the reserve is determined based primarily on our historical warranty claims experience and the number of portable generators that we sell each year. We periodically increase the warranty reserve to replenish it after it has been reduced by warranty claims charged against it or to increase the reserve in response to increases in the number or the amounts of the warranty claims or increases in the number of generators that we have sold. Since the warranty reserve is replenished or increased by recording a charge which is included in, and has the effect of increasing, our costs of sales in our consolidated statements of operations, an increase in the reserve will reduce income in the period when the increase is recognized.

Set forth in the table below is our accrued warranty expense (in thousands), which is included in accrued liabilities on the consolidated balance sheets:

	As of December 31,	
	2014	2013
Accrued warranty balance as of January 1,	\$ 737	\$ 690
Warranty costs incurred	(965)	(1,193)
Provision for warranty claims	990	1,240

Accrued warranty balance as of December 31, \$ 762 \$ 737

NOTE L: SIGNIFICANT CONCENTRATIONS

Our ability to satisfy demand for our products may be limited by the availability of those products from our suppliers. We purchase air conditioners from Airxcel, Inc. (Airxcel) and generators from Zhejiang Xingyu Industry and Trade Co., Ltd, (Zhejiang). Our purchases from Airxcel accounted for approximately 23%, 25%, and 22% of our total product purchases in 2014, 2013, and 2012, respectively. Our purchases from Zhejiang accounted for 6% of our total product purchases in 2012 ; however, those purchases accounted for less than 5% of our total product purchases in 2014 and 2013.

Concentration of Credit Risk. We maintain bank accounts with high quality financial institutions to minimize credit risk. However, our deposit balances may periodically exceed federal deposit insurance limits.

Table of Contents**THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****NOTE M: QUARTERLY FINANCIAL DATA**

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURES

None.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports under the Securities Exchange Act of 1934, as amended (the Exchange Act) is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission (the SEC), and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, our management recognized that any system of controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, as ours are designed to do, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As required by SEC rules, an evaluation was performed under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer of the effectiveness, as of December 31, 2014, of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act). Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2014, the Company's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports that we file under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting in the quarter ended December 31, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Internal Control Over Financial Reporting

Management's Annual Report on Internal Control Over Financial Reporting

Management of The Coast Distribution System, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. Internal control over financial reporting includes those written policies and procedures that:

pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;

provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America;

provide reasonable assurance that our receipts and expenditures are being made only in accordance with authorization of our management and board of directors; and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of assets that could have a material effect on our consolidated financial statements.

Internal control over financial reporting includes the controls themselves, monitoring and internal auditing practices and actions taken to correct deficiencies as identified. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of the effectiveness of such controls to future periods are subject to the risks that the controls may become inadequate because of changes in conditions or because the degree of compliance with the policies or procedures may deteriorate.

Table of Contents

Management's Assessment of Internal Control over Financial Reporting

Our management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014, based on criteria for effective internal control over financial reporting described in Internal Control - Integrated Framework (2013 framework) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Management's assessment included an evaluation of the design and the testing of the operational effectiveness of the Company's internal control over financial reporting. Management reviewed the results of its assessment with the Audit Committee of our Board of Directors.

Based on that assessment, management determined that, as of December 31, 2014, the Company maintained effective internal control over financial reporting.

The foregoing report on internal control over financial reporting shall not be deemed filed for purposes of Section 18 of the Exchange Act or otherwise subject to the liabilities of that section.

Section 989G of the Dodd-Frank Act, signed into law in July 2010, permanently exempts smaller reporting companies, such as the Company, and other non-accelerated filers from Section 404(b) of the Sarbanes-Oxley Act requiring SEC reporting companies to obtain and include in their annual reports on Form 10-K, an attestation report from their independent registered accountants with respect to the effectiveness of their internal control over financial reporting. As a result, no such attestation report is included in this Annual Report.

Table of Contents**PART III****ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT AND CORPORATE GOVERNANCE**

Except for information concerning the Company's executive officers which is included in Part I of this Report, the information required by Item 10 is incorporated by reference from our definitive proxy statement expected to be filed with the Commission on or before April 30, 2015 for the Company's 2015 Annual Stockholders' Meeting.
