⁽²⁾ As of February 28, 2015, there were no open sale-buyback transactions. The average amount of borrowings outstanding during the period ended February 28, 2015 was \$24,702 at a weighted average interest rate of 0.496%.

(g) Securities with an aggregate market value of \$28,382 have been pledged as collateral under the terms of master agreements as of February 28, 2015.

(h) Financial Derivative Instruments: Exchange-Traded or Centrally Cleared Swap Agreements:

Credit Default Swaps on Credit Indices - Sell Protection ⁽¹⁾

| Index/Tranches | Fixed Deal Receive Rate | Maturity Date | Notional Amount ⁽²⁾ | Market Value ⁽³⁾ | Variation Margin | | | |
|------------------------|----------------------------|------------------|-----------------------------------|--------------------------------|----------------------------|-------|-----------|--|
| | | | | | Unrealized Appreciation | Asset | Liability | |
| CDX.IG-23 5-Year Index | 1.000% | 12/20/2019 | \$ 75,800 | \$ 1,498 | \$ 267 | \$ 7 | \$ 0 | |

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (3) The prices and resulting values for credit default swap agreements on credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement be closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced indices' credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

Interest Rate Swaps

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate or sovereign issues as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (4) The prices and resulting values for credit default swap agreements on credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement be closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced indices' credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

| Over the counter | 0 | (35,035) | 0 | (35,035) |
| | \$ 0 | \$ (37,543) | \$ 0 | \$ (37,543) |
| Totals | \$ 25,831 | \$ 1,280,918 | \$ 34,465 | \$ 1,341,214 |

There were no significant transfers between Level 1 and 2 during the period ended February 28, 2015.

The following is a reconciliation of the fair valuations using significant unobservable inputs (Level 3) for the Fund during the period ended February 28, 2015:

| Category and Subcategory | Beginning Balance at 11/30/2014 | Net Purchases | Net Sales | Discounts/ Premiums | Losses | Net Change in Transfers | | | Ending Balance at 02/28/2015 | Net Change in Unrealized Appreciation/ (Depreciation) at 02/28/2015 ⁽¹⁾ |
|--|---------------------------------|---------------|-----------|---------------------|--------|-------------------------|--|-------------------------|------------------------------|--|
| | | | | | | Realized Gain | Unrealized Appreciation/ (Depreciation) ⁽¹⁾ | into Level 3 of Level 3 | | |
| Investments in Securities, at Value | | | | | | | | | | |
| Corporate Bonds & Notes | | | | | | | | | | |
| Banking & Finance | \$ 11,030 | \$ 0 | \$ (55) | \$ 1 | \$ 0 | \$ (13) | \$ 0 | \$ 0 | \$ 10,963 | \$ (4) |
| Industrials | 21,353 | 0 | (127) | (4) | 2 | (128) | 0 | (2,334) | 18,762 | (99) |
| Utilities | 4,888 | 0 | 0 | (1) | 0 | (147) | 0 | 0 | 4,740 | (147) |
| Totals | \$ 37,271 | \$ 0 | \$ (182) | \$ (4) | \$ 2 | \$ (288) | \$ 0 | \$ (2,334) | \$ 34,465 | \$ (250) |

The following is a summary of significant unobservable inputs used in the fair valuations of assets and liabilities categorized within Level 3 of the fair value hierarchy:

| Category and Subcategory | Ending Balance at 02/28/2015 | Valuation Technique | Input Value(s) | |
|--|------------------------------|---------------------|---------------------|----------------------------|
| | | | Unobservable Inputs | (% Unless Noted Otherwise) |
| Investments in Securities, at Value | | | | |
| Corporate Bonds & Notes | | | | |
| Banking & Finance | \$ 10,963 | Benchmark Pricing | Base Price | 115.50 |
| Industrials | 10,915 | Benchmark Pricing | Base Price | 100.00 |
| | 7,847 | Third Party Vendor | Broker Quote | 103.62 - 110.37 |
| Utilities | 4,740 | Third Party Vendor | Broker Quote | 107.99 |
| Total | \$ 34,465 | | | |

- (1) *Any difference between Net Change in Unrealized Appreciation/(Depreciation) and Net Change in Unrealized Appreciation/(Depreciation) on Investments Held at February 28, 2015 may be due to an investment no longer held or categorized as Level 3 at period end.*

See Accompanying Notes

Notes to Financial Statements

1. INVESTMENT VALUATION AND FAIR VALUE MEASUREMENTS

(a) Investment Valuation Policies The Net Asset Value (NAV) of the Fund 's shares is valued as of the close of regular trading (normally 4:00 p.m., Eastern time) (the NYSE Close) on each day that the New York Stock Exchange (NYSE) is open (each a Business Day). Information that becomes known to the Fund or its agents after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of a security or the NAV determined earlier that day.

For purposes of calculating the NAV, portfolio securities and other financial derivative instruments are valued on each Business Day using valuation methods as adopted by the Board of Trustees (the Board) of the Fund. The Board has formed a Valuation Committee, whose function is to monitor the valuation of portfolio securities and other financial derivative instruments and, as required by the Fund 's valuation policies, determine in good faith the fair value of portfolio holdings after consideration of all relevant factors, including recommendations provided by the investment manager (the Manager). The Board has delegated responsibility for applying the valuation methods to the Manager. The Manager monitors the continual appropriateness of methods applied and determines if adjustments should be made in light of market factor changes and events affecting issuers.

Where market quotes are readily available, fair market value is generally determined on the basis of official closing prices or the last reported sales prices, or if no sales are reported, based on quotes obtained from a quotation reporting system, established market makers, or pricing services. Where market quotes are not readily available, portfolio securities and other financial derivative instruments are valued at fair value, as determined in good faith by the Board, its Valuation Committee, or the Manager pursuant to instructions from the Board or its Valuation Committee. Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information, bid/ask information, or broker quotes), including where events occur after the close of the relevant market, but prior to the NYSE Close, that materially affect the values of the Fund 's securities or financial derivative instruments. In addition, market quotes are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which securities trade do not open for trading for the entire day and no other market prices are available. The Board has delegated to the Manager, PIMCO, the responsibility for monitoring significant events that may materially affect the values of the Fund 's securities or financial derivative instruments and for determining whether the value of the applicable securities or financial derivative instruments should be re-evaluated in light of such significant events.

The Board has adopted methods for valuing securities and other financial derivative instruments that may require fair valuation under particular circumstances. The Manager monitors the continual appropriateness of fair valuation methods applied and determines if adjustments should be made in light of market changes, events affecting the issuer, or other factors. If the Manager determines that a fair valuation method may no longer be appropriate, another valuation method may be selected, or the Valuation Committee will take any appropriate action in accordance with procedures set forth by the Board. The Board reviews the appropriateness of the valuation methods from time to time and these methods may be amended or supplemented from time to time by the Valuation Committee.

In circumstances in which daily market quotes are not readily available, investments may be valued pursuant to guidelines established by the Board. In the event that the security or asset cannot be valued pursuant to the established guidelines, the value of the security or other financial derivative instrument will be determined in good faith by the Valuation Committee of the Board, generally based upon recommendations provided by PIMCO. These methods may require subjective determinations about the value of a security. While the Fund 's policy is intended to result in a calculation of the Fund 's NAV that fairly reflects security values as of the time of pricing, the Fund cannot guarantee that values determined by the Board or persons acting at their direction would accurately reflect the price that the Fund could obtain for a security if it were to dispose of that security as of the time of pricing (for instance, in a forced

or distressed sale). The prices used by the Fund may differ from the value that would be realized if the securities were sold.

(b) Fair Value Hierarchy U.S. GAAP describes fair market value as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. It establishes a fair value hierarchy that prioritizes inputs to valuation methods and requires disclosure of the fair value hierarchy, separately for each major category of assets and liabilities, that segregates fair value measurements into levels (Level 1, 2, and 3). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Levels 1, 2, and 3 of the fair value hierarchy are defined as follows:

Level 1 Inputs using (unadjusted) quoted prices in active markets or exchanges for identical assets and liabilities.

Level 2 Significant other observable inputs, which may include, but are not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market corroborated inputs.

Level 3 Significant unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include assumptions made by the Board or persons acting at their direction that are used in determining the fair value of investments.

Assets or liabilities categorized as Level 2 or 3 as of period end have been transferred between Levels 2 and 3 since the prior period due to changes in the valuation method utilized in valuing the investments. Transfers from Level 3 to Level 2 are a result of the availability of current and reliable market-based data provided by third-party pricing services or other valuation techniques which utilize significant observable inputs. In accordance with the requirements of U.S. GAAP, the amounts of transfers between Levels 1 and 2 and transfers in and out of Level 3, if material, are disclosed in the Notes to Schedule of Investments of the Fund.

For fair valuations using significant unobservable inputs, U.S. GAAP requires a reconciliation of the beginning to ending balances for reported fair values that presents changes attributable to total realized and unrealized gains or losses, purchases and sales, and transfers in or out of the Level 3 category during the period. The end of period timing recognition is used for the transfers between Levels of the Fund's assets and liabilities. Additionally, U.S. GAAP requires quantitative information regarding the significant unobservable inputs used in the determination of fair value of assets or liabilities categorized as Level 3 in the fair value hierarchy. In accordance with the requirements of U.S. GAAP, a fair value hierarchy, and if material, a Level 3 reconciliation and details of significant unobservable inputs, have been included in the Notes to Schedule of Investments for the Fund.

(c) Valuation Techniques and the Fair Value Hierarchy

Level 1 and Level 2 trading assets and trading liabilities, at fair market value The valuation methods (or techniques) and significant inputs used in determining the fair market values of portfolio securities or financial derivative instruments categorized as Level 1 and Level 2 of the fair value hierarchy are as follows:

Fixed income securities including corporate, convertible and municipal bonds and notes, U.S. government agencies, U.S. treasury obligations, sovereign issues, bank loans, convertible preferred securities and non-U.S. bonds are normally valued by pricing service providers that use broker-dealer quotations, reported trades or valuation estimates from their internal pricing models. The service providers' internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Fixed income securities purchased on a delayed-delivery basis or as a repurchase commitment in a sale-buyback transaction are marked to market daily until settlement at the forward settlement date and are categorized as Level 2 of the fair value hierarchy.

Mortgage-related and asset-backed securities are usually issued as separate tranches, or classes, of securities within each deal. These securities are also normally valued by pricing service providers that use broker-dealer quotations or valuation estimates from their internal pricing models. The pricing models for these securities usually consider tranche-level attributes, current market data, estimated cash flows and market-based yield spreads for each tranche, and incorporate deal collateral performance, as available. Mortgage-related and asset-backed securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Investments initially valued in currencies other than the U.S. dollar are converted to the U.S. dollar using exchange rates obtained from pricing service providers. As a result, the NAV of the Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the NYSE is closed. Valuation adjustments may be applied to certain securities that are solely traded on a foreign exchange to account for the market movement between the close of the foreign market and the NYSE Close. These securities are valued using pricing service providers that consider the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments. Securities using these valuation adjustments are categorized as Level 2 of the fair value hierarchy. Preferred securities and other equities traded on inactive markets or valued by reference to similar instruments are also categorized as Level 2 of the fair value hierarchy.

Short-term investments having a maturity of 60 days or less and repurchase agreements are generally valued at amortized cost which approximates fair market value. These investments are categorized as Level 2 of the fair value hierarchy.

Equity exchange-traded options and over the counter financial derivative instruments, such as foreign currency contracts, options contracts, or swap agreements, derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These contracts are normally valued by independent pricing service providers. Depending on the product and the terms of the transaction, financial derivative instruments can be valued by a pricing service provider using a series of techniques, including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as quoted prices, issuer details, indices, bid/ask spreads, interest rates, implied volatilities, yield curves, dividends and exchange rates. Financial derivative instruments that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Centrally cleared swaps listed or traded on a multilateral or trade facility platform, such as a registered exchange, are valued at the daily settlement price determined by the respective exchange. For centrally cleared credit default swaps the clearing facility requires its members to provide actionable price levels across complete term structures. These levels, along with external third-party prices, are used to produce daily settlement prices. These securities are categorized as Level 2 of the fair value hierarchy. Centrally cleared interest rate swaps are valued using a pricing model that references the underlying rates including the overnight index swap rate and London Interbank Offered Rate

(LIBOR) forward rate to produce the daily settlement price. These securities are categorized as Level 2 of the fair value hierarchy.

Level 3 trading assets and trading liabilities, at fair value When a fair valuation method is applied by PIMCO that uses significant unobservable inputs, securities will be priced by a method that the Board or persons acting at their direction believe reflects fair value and are categorized as Level 3 of the fair value hierarchy. The valuation techniques and significant inputs used in determining the fair values of portfolio assets and liabilities categorized as Level 3 of the fair value hierarchy are as follows:

Benchmark pricing procedures set the base price of a fixed income security and subsequently adjust the price proportionally to market value changes of a pre-determined security deemed to be comparable in duration, generally a U.S. Treasury or sovereign note based on country of issuance. The base price may be a broker-dealer quote, transaction price, or an internal value as derived by analysis of market data. The base price of the security may be reset on a periodic basis based on the availability of market data and procedures approved by the Valuation Committee. Significant changes in the unobservable inputs of the benchmark pricing process (the base price) would result in direct and proportional changes in the fair value of the security. These securities are categorized as Level 3 of the fair value hierarchy. The validity of the fair value is reviewed by PIMCO on a periodic basis and may be amended as the availability of market data indicates a material change.

If third-party evaluated vendor pricing is not available or not deemed to be indicative of fair value, the Manager may elect to obtain indicative market quotations (broker quotes) directly from the broker-dealer or passed through from a third-party vendor. In the event that fair value is based upon a single sourced broker quote, these securities are categorized as Level 3 of the fair value hierarchy. Broker quotes are typically received from established market participants. Although independently received, the Manager does not have the transparency to view the underlying inputs which support the market quotation. Significant changes in the broker quote would have direct and proportional changes in the fair value of the security.

2. FEDERAL INCOME TAX MATTERS

The Fund intends to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code (the Code) and distribute all of its taxable income and net realized gains, if applicable, to shareholders. Accordingly, no provision for Federal income taxes has been made.

In accordance with U.S. GAAP, the Manager has reviewed the Fund's tax positions for all open tax years. As of February 28, 2015, the Fund has recorded no liability for net unrecognized tax benefits relating to uncertain income tax positions it has taken or expects to take in future tax returns.

The Fund files U.S. tax returns. While the statute of limitations remains open to examine the Fund's U.S. tax returns filed for the fiscal years ending in 2012-2014, no examinations are in progress or anticipated at this time. The Fund is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

February 28, 2015 (Unaudited)

As of February 28, 2015, the aggregate cost and the net unrealized appreciation/(depreciation) of investments for federal income tax purposes are as follows (amounts in thousands):

| Federal Tax Cost | Aggregate Gross Unrealized Appreciation | Aggregate Gross Unrealized (Depreciation) | Net Unrealized Appreciation/ (Depreciation) (1) |
|-----------------------------|--|--|--|
| \$ 1,297,467 | \$ 83,937 | \$ (16,935) | \$ 67,002 |

(1) *Primary differences, if any, between book and tax net unrealized appreciation/(depreciation) are attributable to wash sale loss deferrals for federal income tax purposes.*
