AT MARCH 31, 2016 (Unaudited) (continued)

As of March 31, 2016, aggregate cost for Federal income tax purposes was \$106,546,856. The aggregate unrealized gain for all securities is as follows:

Excess of market value over cost	19,428,908
Excess of cost over market value	(8,171,260)
Net unrealized gain	11,257,648

NOTES TO SCHEDULE OF PORTFOLIO INVESTMENTS:

- (a) Non-income producing security.
- (e) Security is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. Unless otherwise indicated, this security has been determined to be liquid under procedures established by the Board of Directors and may be resold in transactions exempt from registration, normally to qualified institutional buyers.
- A China A shares.
- A. Valuation of Investments All securities for which market quotations are readily available are valued at the last sales price prior to the time of determination or, if no sales price is available at that time, at the mean between the last current bid and ask prices. Securities that are traded over-the-counter are valued, if bid and ask quotations are available, at the mean between the current bid and ask prices. Certain investments of the Fund may, depending upon market conditions, trade in relatively thin markets and/or in markets that experience significant volatility. As a result of these conditions, the prices used by the Fund to value securities may differ from the value that would be realized if these securities were sold and the differences could be material. All other securities and assets are valued at fair value as determined in good faith by the Board of Directors. It is possible that the estimated values may differ significantly from the values that would have been used had a ready market for the investments existed, and such differences could be material. In valuing the Fund s assets, quotations of foreign securities in a foreign currency are translated to United States dollar equivalents at the prevailing exchange rate in effect on the valuation date. Investments in open ended mutual funds are valued at current day s closing net asset value per share.

JF International Management Inc. (the Investment Advisor), an indirect wholly-owned subsidiary of JPMorgan Chase & Co. has established the Asian Fair Valuation Committee (AFVC) to assist the Board with the oversight and monitoring of the valuation of the Fund s investments. The Advisor implements the valuation policies for the valuation of investments, as directed by the Board. The AFVC oversees and carries out the policies for the valuation of investments held in the Fund. This includes monitoring the appropriateness of fair values based on results of ongoing valuation oversight, including but not limited to consideration of macro or security specific events, market events and pricing vendor and broker due diligence. The Advisor is responsible for discussing and assessing the potential impacts of the fair values on an ongoing basis, and at least on a quarterly basis with the AFVC and the Board.

Valuations reflected in this report are as of the report date. As a result, changes in valuation due to market events and/or issuer related events after the report date and prior to issuance of the report are not reflected herein.

The various inputs that are used in determining the valuation of the Fund s investments are summarized into the three broad levels listed below.

- Level 1 Unadjusted inputs using quoted prices in active markets for identical investments.
- Level 2 Other significant observable inputs including, but not limited to, quoted prices for similar investments, inputs other than quoted prices that are observable for investments (such as interest rates, prepayment speeds, credit risk, etc.) or other market corroborated inputs.
- Level 3 Significant inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund s assumptions in determining the fair value of investments).

A financial instrument s level within the fair value hierarchy is based on the lowest level of any input, both individually and in the aggregate, that is significant to the fair value measurement. The inputs or methodology used for valuing instruments are not necessarily an indication of the risk associated with investing in those instruments.
