Wells Fargo Funds

In an environment characterized by persistently low interest rates and overall uncertainty in the markets, the S&P 500 Utilities Index delivered a robust 12.75% return for the reporting period, reflecting investor appreciation of the relative stability and higher dividend payments historically associated with the sector.

The strong U.S. dollar also put pressure on import prices, which, when combined with lower costs for fuel and other commodities, restrained inflation and prompted recession fears among investors.

Dear Valued Shareholder:

We are pleased to offer you this semi-annual report for the Wells Fargo Global Dividend Opportunity Fund for the six-month period that ended April 30, 2016. During the period, investors, concerned about economic growth, tended to focus on the ability of central-bank policymakers globally to spur business activity. Investor sentiment shifted with the potential of each new economic data point to influence policymakers, which drove volatility in equity, interest-rate, and currency markets.

Economic conditions and central-bank policies influenced equity and fixed-income markets.

In the U.S., the experience of the S&P 500 Index (the Index),¹ a common measure of stock performance, illustrates shifts in investor sentiment during the period. By November, the Index regained nearly all of the ground lost during

2015 before declining once again during December and into the new year. During the first six weeks of 2016, the Index suffered the worst loss to open a year on record. During February, the Index dipped into correction territory, which is defined as a loss of 10% or more. The Index reversed course and trended higher in March and April on the release of intermittently better economic data and statements by policymakers at global central banks deemed as supportive of economic growth. For the six-month period, the Index gained 0.43%. In an environment characterized by persistently low interest rates and overall uncertainty in the markets, the S&P 500 Utilities Index² delivered a robust 12.75% return for the reporting period, reflecting investor appreciation of the relative stability and higher dividend payments historically associated with the sector.

Overseas, the Morgan Stanley Capital International (MSCI) Europe, Australasia, Far East (EAFE) Index (Net),³ a measure of international developed markets stock performance, and the MSCI Emerging Markets (EM) Index (Net)⁴ traced more persistent negative return patterns before bottoming early in 2016. The U.S. dollar strengthened consistently after 2011 and more quickly following 2014 as expectations grew for an increase in the federal funds rate by the U.S. Federal Reserve (Fed), which occurred in December 2015. The strong U.S. dollar also put pressure on import prices, which, when combined with lower costs for fuel and other commodities, restrained inflation and prompted recession fears among investors. In addition, the People's Bank of China (PBOC) guided its currency's value lower relative to a basket of foreign currencies. As the U.S. dollar gained in strength relative to currencies overseas, investment returns earned outside the U.S. were reduced when translated into dollars. By the end of the period, the MSCI EAFE (Net) and MSCI EM Index (Net) indexes reduced their losses on improving business and economic data.

¹ The S&P 500 Index consists of 500 stocks chosen for market size, liquidity, and industry group representation. It is a market-value-weighted index with each stock's weight in the index proportionate to its market value. You cannot invest directly in an index.

² The S&P 500 Utilities Index is a market-value-weighted index that measures the performance of all stocks within the utilities sector of the S&P 500 Index. You cannot invest directly in an index.

³ The Morgan Stanley Capital International (MSCI) Europe, Australasia, Far East (EAFE) Index (Net) is a free-float-adjusted market-capitalization weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. The MSCI EAFE Index (Net) consists of the following 21 developed markets country indexes: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the United Kingdom. Source: MSCI. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indexes or any securities or financial products. This report is not approved, reviewed, or produced by MSCI. You cannot invest directly in an index.

⁴ The MSCI Emerging Markets (EM) Index (Net) is a free-float-adjusted market-capitalization-weighted index that is designed to measure the equity market performance of emerging markets. The MSCI EM Index consists of the following 23 emerging markets country indexes: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Peru, the Philippines, Poland, Qatar, Russia, South Africa, Taiwan, Thailand, Turkey, and United Arab Emirates. You cannot invest directly in an index.

Letter to shareholders (unaudited)

Wells Fargo Global Dividend Opportunity Fund 3

Central-bank policies demonstrate resolve to reignite global economic growth.

As the end of 2015 approached, investors did take some reassurance from the decision of the European Central Bank (ECB) to push the deposit interest rate further into negative territory. Negative interest rates are intended to encourage banks to lend assets held in reserve rather than keep them on deposit, which could help spark business activity. The ECB also expanded and extended its bond-buying program, which has helped inject liquidity into the markets and encourage investment. As anticipated, the Fed announced the long-awaited increase to the federal funds rate and suggested it planned to pursue additional increases in 2016. In January, the Bank of Japan followed the ECB's lead by setting a negative deposit rate.

The Fed acknowledged that risks to global growth existed and indicated it would base further rate increases on data indicating the risks were being successfully addressed. Counterbalancing the accommodation of central banks were industrial production slowdowns stemming from plant closures in China due to elevated air pollution levels, the lack of further accommodative action by the ECB in January, and fresh declines in oil prices. Stocks worldwide entered correction territory once more.

In February, investors reacted positively when measurements of manufacturing activity in Japan, the U.S., and China indicated growth. The PBOC reduced reserve ratios in February, which encouraged banks to increase lending. Investors also were favorably influenced by further accommodation by the ECB in March when the bank pushed negative interest rates lower, ratcheting up pressure on banks to lend; expanded its bond-buying program once again; and took steps to further ease costs for borrowers.

Don't let short-term uncertainty derail long-term investment goals.

Periods of investment uncertainty can present challenges, but experience has taught us that maintaining long-term investment goals can be an effective way to plan for the future. Although diversification cannot guarantee an investment profit or prevent losses, we believe it can be an effective way to manage investment risk and potentially smooth out overall portfolio performance. We encourage investors to know their investments and to understand that appropriate levels of risk-taking may unlock opportunities.

Thank you for choosing to invest with Wells Fargo Funds. We appreciate your confidence in us and remain committed to helping you meet your financial needs.

Sincerely,

Karla M. Rabusch

President

Wells Fargo Funds

Notice to shareholders

On December 17, 2015, the Fund announced an open-market share repurchase program (the Buyback Program). Under the Buyback Program, the Fund may repurchase up to 10% of its outstanding shares within one year of December 17, 2015. The Fund's Board of Trustees has delegated to Wells Fargo Funds Management, LLC, the Fund's adviser, full discretion to administer the Buyback Program including the determination of the amount and timing of repurchases in accordance with the best interests of the Fund and subject to applicable legal limitations.

For further information about your Fund, contact your investment professional, visit our website at wellsfargofunds.com, or call us directly at **1-800-222-8222**. We are available 24 hours a day, 7 days a week.

Average annual total returns (%) as of April 30, 2016¹

	6 Months	1 Year	5 Year	Since inception 3-28-2007
Based on market value	0.81	(10.65)	0.67	(1.07)
Based on net asset value (NAV)	(0.74)	(5.35)	2.60	1.09

Figures quoted represent past performance, which is no guarantee of future results, and do not reflect taxes that a shareholder may pay on fund distributions or the sales of fund shares. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted, which assumes the reinvestment of dividends and capital gains. Performance figures of the Fund do not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares. If taxes and such brokerage commissions had been reflected, performance would have been lower. To obtain performance information current to the most recent month-end, please call 1-800-222-8222.

The Fund's expense ratio for the six months ended April 30, 2016, was 1.07%.

Comparison of NAV vs. market value since inception²

Derivatives involve risks, including interest-rate risk, credit risk, the risk of improper valuation, and the risk of non-correlation to the relevant instruments they are designed to hedge or closely track. There are numerous risks associated with transactions in options on securities and/or indexes. As a writer of an index call option, the Fund forgoes the opportunity to profit from increases in the values of securities held by the Fund. However, the Fund has retained the risk of loss (net of premiums received) should the price of the Fund's portfolio securities decline. Similar risks are involved with writing call options or secured put options on individual securities and/or indexes held in the Fund's portfolio. This combination of potentially limited appreciation and potentially unlimited depreciation over time may lead to a decline in the net asset value of the Fund. The Fund's dividend capture strategy may lead to a similar result. Dividend capture strategies involve the Fund purchasing a stock before an ex-dividend date so it becomes entitled to the dividend and then typically selling the stock on or after the stock's ex-dividend date. Any decline in the value of the stock reflecting the dividend payment may over time lead to a decline in the net asset value of the Fund. Dividend capture also increases the portfolio turnover rate and related transaction costs of the Fund. Foreign investments may contain more risk due to the inherent risks associated with changing political climates, foreign market instability, and foreign currency fluctuations. Risks of foreign investing are magnified in emerging or developing markets. Small- and mid-cap securities may be subject to special risks associated with narrower product lines and limited financial resources compared with their large-cap counterparts, and, as a result, small- and mid-cap securities may decline significantly in market downturns and may be more volatile than those of larger companies due to their higher risk of failure. High-yield, lower-rated bonds may contain more risk due to the increased possibility of default. Illiquid securities may be subject to wide fluctuations in market value. The Fund may be subject to significant delays in disposing of illiquid securities. Accordingly, the Fund may be forced to sell these securities at less than fair market value or may not be able to sell them when the adviser or subadviser believes that it is desirable to do so. This closed-end fund is no longer offered as an initial public offering and is only available through broker/dealers on the secondary market. A closed-end fund is not required to buy its shares back from investors upon request.

¹ Total returns based on market value are calculated assuming a purchase of common stock on the first day and sale on the last day of the period reported. Total returns based on NAV are calculated based on the NAV at the beginning of the period and end of period. Dividends and distributions, if any, are assumed for the purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan.

² This chart does not reflect any brokerage commissions charged on the purchase and sale of the Fund's common stock. Dividends and distributions paid by the Fund are included in the Fund's average annual total returns but have the effect of reducing the Fund's NAV.

MANAGERS DISCUSSION

Wells Fargo Global Dividend Opportunity Fund 5

The Fund's return based on market value was 0.81% during the six-month period that ended April 30, 2016. During the same period, the Fund's return based on its net asset value was -0.74%. The Fund underperformed relative to a blended index (consisting of 65% Morgan Stanley Capital International (MSCI) All Country World Index (ACWI) Index (Net)³ and 35% BofA Merrill Lynch Core Fixed Rate Preferred Securities Index⁴) which gained 1.00%.

Overview

During the period, the Fund's allocation to preferred stock was somewhat lower than is typical. On average, the Fund had a greater foreign exposure than domestic, primarily due to European investments.

The U.S. economy continued to grow during the period and remained stronger than the weak economies of Europe and Japan. U.S. unemployment is declining and now stands below 5%, which looks healthy, but labor force participation has fallen to levels last seen in the 1970s. Job growth remains depressed in the U.S., stuck at or below 200,000 per month. After several years of near-depression, economic growth in Europe and Japan remains elusive despite massive monetary stimulus. The Fund maintained significant exposure to European equities in anticipation of a nascent economic recovery that remains elusive.

During the half year, we initiated positions in ITV plc; InterContinental Hotels Group PLC; and CenturyLink, Incorporated. We sold positions in Endurance Specialty Holdings Limited, Enbridge Incorporated, Veresen Incorporated, and Vanguard Natural Resources LLC preferred shares. We added to an existing position in Spark Energy Incorporated and reduced holdings of Jernigan Capital Incorporated, Pennon Group plc, United Utilities Group PLC, SSE plc, Enel S.p.A., and Northstar Realty Finance Corporation.

Ten largest holdings (%) as of April 30, 2016⁵

Snam SpA	5.77
Red Electrica Corporacion S.A.	5.27
BASF SE	5.12
Enel SpA	5.02
ITV plc	4.86
Hera SpA	4.44
Terna SpA	4.16
Deutsche Post AG	4.16
Vivendi S.A.	3.97
Chatham Lodging Trust	3.78

Sector distribution as of April 30, 2016⁶

- ³The Morgan Stanley Capital International (MSCI) All Country World Index (ACWI) Index (Net) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The index consists of 46 country indexes comprising 23 developed and 23 emerging market country indexes. The developed market country indexes included are: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States. The emerging market country indexes included are: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Peru, Philippines, Poland, Qatar, Russia, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates. You cannot invest directly in an index.
- ⁴ The BofA Merrill Lynch Core Fixed Rate Preferred Securities Index tracks the performance of fixed rate U.S. dollar denominated preferred securities issued in the U.S. domestic market. Qualifying securities must have an investment grade rating (based on an average of Moody's, S&P 500, and Fitch) and must have an investment grade rated country of risk (based on an average of Moody's, S&P 500, and Fitch foreign currency long term sovereign debt ratings). In addition, qualifying securities must be issued as public securities or through a 144A filing, must be issued in \$25, \$50, or \$100 par/liquidation preference increments, must have a fixed coupon or dividend schedule and must have a minimum amount outstanding of \$100 million. Fixed-to-floating rate securities also qualify provided they are callable within the fixed rate period and are at least one year from the last call prior to the date the bond transitions from a fixed to a floating rate security. You cannot invest directly in an index.
- ⁵The ten largest holdings, excluding cash and cash equivalents, are calculated based on the value of the securities divided by total net assets of the Fund. Holdings are subject to change and may have changed since the date specified.
- ⁶Amounts are subject to change and are calculated based on the total long-term investments of the Fund. These amounts are subject to change and may have changed since the date specified.

6 Wells Fargo Global Dividend Opportunity Fund

Performance highlights (unaudited)

Country allocation as of April 30, 2016⁶

Contributors to performance

The Fund benefited from an overweight to the utilities and telecommunication services sectors relative to the blended index. Stock selection within telecommunication services and certain real estate investment trust (REIT) positions also contributed. Performance contributors included Spark Energy Incorporated, an energy services company, Shenandoah Telecommunications Company, a wireless communications company, Frontier Communications Corporation, a local exchange telephone business, Physicians Realty Trust, a REIT that the Fund has owned

since its initial public offering (IPO), and Preferred Apartment Communities Incorporated.

Detractors from performance

Energy-sensitive holdings lagged during the past six months. Other performance detractors included Vivendi, a French media company, and four REITs: Jernigan Capital Incorporated, Northstar Realty Finance Corporation, Chatham Lodging Trust, and Summit Hotel Properties Incorporated.

The portfolio's options overlay strategy did not have much effect on Fund performance during the period. In order to mitigate the adverse impact of sharp swings in the prices of financial assets during a volatile period, the portfolio management team limited the number of options it wrote. The team found opportunities to write options on a few select markets in Europe and Asia, which generated a modest amount of premium income that was offset by a loss related to a position in Japan.

Outlook

We are now seeing what appears to be a modest but reasonably solid economic recovery in the U.S. While stronger economic growth will be positive for the economy and for equity investors, stronger economic growth may also eventually result in rising interest rates as monetary stimulus is withdrawn, and this would be a headwind for preferred and high-yielding common stocks.

¹ Calculated based upon average shares outstanding

² Total return is calculated assuming a purchase of common stock on the first day and sale on the last day of the period reported. Dividends and distributions, if any, are assumed for purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan. Total return does not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares.

Notes to financial statements (unaudited)

Wells Fargo Global Dividend Opportunity Fund 15

1. ORGANIZATION

The Wells Fargo Global Dividend Opportunity Fund (the Fund) was organized as a statutory trust under the laws of the state of Delaware on December 21, 2006 and is registered as a diversified closed-end management investment company under the Investment Company Act of 1940, as amended. As an investment company, the Trust follows the accounting and reporting guidance in Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946, *Financial Services – Investment Companies*.

2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Securities valuation

All investments are valued each business day as of the close of regular trading on the New York Stock Exchange (generally 4 p.m. Eastern Time), although the Fund may deviate from this calculation under unusual or unexpected circumstances.

Equity securities and options that are listed on a foreign or domestic exchange or market are valued at the official closing price or, if none, the last sales price. If no sale occurs on the principal exchange or market that day, the prior day's price will be deemed stale and a fair value price will be determined in accordance with the Fund's Valuation Procedures.

Non-listed options are valued at the evaluated price provided by an independent pricing service or, if a reliable price is not available, the quoted bid price from an independent broker-dealer.

The values of securities denominated in foreign currencies are translated into U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Management Valuation Team of Wells Fargo Funds Management, LLC (Funds Management).

Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore may not fully reflect trading or events that occur after the close of the principal exchange in which the foreign securities are traded, but before the close of the New York Stock Exchange. If such trading or events are expected to materially affect the value of such securities, then fair value pricing procedures approved by the Board of Trustees of the Fund are applied. These procedures take into account multiple factors including movements in U.S. securities markets after foreign exchanges close. Foreign securities that are fair valued under these procedures are categorized as Level 2 and the application of these procedures may result in transfers between Level 1 and Level 2. Depending on market activity, such fair valuations may be frequent. Such fair value pricing may result in net asset values that are higher or lower than net asset values based on the last reported sales price or latest quoted bid price. On April 30, 2016, such fair value pricing was not used in pricing foreign securities.

Debt securities are valued at the evaluated bid price provided by an independent pricing service or, if a reliable price is not available, the quoted bid price from an independent broker-dealer.

Investments in registered open-end investment companies are valued at net asset value.

Investments which are not valued using any of the methods discussed above are valued at their fair value, as determined in good faith by the Board of Trustees. The Board of Trustees has established a Valuation Committee comprised of the Trustees and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities, unless the determination has been delegated to the Management Valuation Team. The Board of Trustees retains the authority to make or ratify any valuation decisions or approve any changes to the Valuation Procedures as it deems appropriate. On a quarterly basis, the Board of Trustees receives reports on any valuation actions taken by the Valuation Committee or the Management Valuation Team which may include items for ratification.

Valuations of fair valued securities are compared to the next actual sales price when available, or other appropriate market values, to assess the continued appropriateness of the fair valuation methodologies used. These securities are fair valued on a day-to-day basis, taking into consideration changes to appropriate market information and any significant changes to the inputs considered in the valuation process until there is a readily available price provided on an exchange

Table of Contents

16 Wells Fargo Global Dividend Opportunity Fund Notes to financial statements (unaudited) or by an independent pricing service. Valuations received from an independent pricing service or independent broker-dealer quotes are periodically validated by comparisons to most recent trades and valuations provided by other independent pricing services in addition to the review of prices by the adviser and/or subadviser. Unobservable inputs used in determining fair valuations are identified based on the type of security, taking into consideration factors utilized by market participants in valuing the investment, knowledge about the issuer and the current market environment.

Foreign currency translation

The accounting records of the Fund are maintained in U.S. dollars. The values of other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Management Valuation Team. Purchases and sales of securities, and income and expenses are converted at the rate of exchange on the respective dates of such transactions. Net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually paid or received. Net unrealized foreign exchange gains and losses arise from changes in the fair value of assets and liabilities other than investments in securities resulting from changes in exchange rates. The changes in net assets arising from changes in exchange rates and the changes in net assets resulting from changes in market prices of securities are not separately presented. Such changes are included in net realized and unrealized gains or losses from investments.

Options

The Fund is subject to equity price risk and foreign currency exchange rate risk in the normal course of pursuing its investment objectives. The Fund may write covered call options or secured put options on individual securities and/or indexes. When the Fund writes an option, an amount equal to the premium received is recorded as a liability and is subsequently adjusted to the current market value of the written option. Premiums received from written options that expire unexercised are recognized as realized gains on the expiration date. For exercised options, the difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is treated as a realized gain or loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in calculating the realized gain or loss on the sale. If a put option is exercised, the premium reduces the cost of the security purchased. The Fund, as a writer of an option, bears the market risk of an unfavorable change in the price of the security and/or index underlying the written option.

The Fund may also purchase call or put options. The premium is included in the Statement of Assets and Liabilities as an investment, the value of which is subsequently adjusted based on the current market value of the option. Premiums paid for purchased options that expire are recognized as realized losses on the expiration date. Premiums paid for purchased options that are exercised or closed are added to the amount paid or offset against the proceeds received for the underlying security to determine the realized gain or loss. The risk of loss associated with purchased options is limited to the premium paid.

Options traded on an exchange are regulated and terms of the options are standardized. Purchased options traded over-the-counter expose the Fund to counterparty risk in the event the counterparty does not perform. This risk can be mitigated by having a master netting arrangement between the Fund and the counterparty and by having the

counterparty post collateral to cover the Fund's exposure to the counterparty.

Security transactions and income recognition

Securities transactions are recorded on a trade date basis. Realized gains or losses are recorded on the basis of identified cost.

Dividend income is recognized on the ex-dividend date, except for certain dividends from foreign securities, which are recorded as soon as the custodian verifies the ex-dividend date. Dividend income from foreign securities is recorded net of foreign taxes withheld where recovery of such taxes is not assured.

Interest income is accrued daily and bond discounts are accreted and premiums are amortized daily based on the effective interest method. To the extent debt obligations are placed on non-accrual status, any related interest income may be reduced by writing off interest receivables when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. If the issuer subsequently resumes interest payments or when the collectability of interest is reasonably assured, the debt obligation is removed from non-accrual status.

Table of Contents

Notes to financial statements (unaudited)
Distributions to shareholders

Wells Fargo Global Dividend Opportunity Fund 17

Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-dividend date. Such distributions are determined in conformity with federal income tax regulations, which may differ in amount or character from net investment income and realized gains recognized for purposes of U.S. generally accepted accounting principles.

Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

The Fund's income and federal excise tax returns and all financial records supporting those returns for the prior three fiscal years are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund's tax positions taken on federal, state, and foreign tax returns for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

Capital loss carryforwards that do not expire are required to be utilized prior to capital loss carryforwards that expire. As of October 31, 2015, capital loss carryforwards available to offset future net realized capital gains were as follows through the indicated expiration dates:

2016	2017	2018	No expiration	
			Short-term	Long-term
\$164,388,931	\$193,644,982	\$17,121,810	\$76,083,877	\$31,787,272

3. FAIR VALUATION MEASUREMENTS

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to significant unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

n Level 1 – quoted prices in active markets for identical securities

n Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, use of amortized cost, etc.)

n Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

Written options	\$ 0	\$ 41,055	\$ 0	\$ 41,055
Total liabilities	\$ 0	\$ 41,055	\$ 0	\$ 41,055

The Fund recognizes transfers between levels within the fair value hierarchy at the end of the reporting period. Fair value pricing that was used in pricing certain foreign securities at the previous period end was not used at April 30, 2016. As a result, common stocks valued at \$136,726,960 were transferred from Level 2 to Level 1 within the fair value hierarchy. The Fund did not have any transfers into/out of Level 3.

4. TRANSACTIONS WITH AFFILIATES AND OTHER EXPENSES**Advisory fee**

Funds Management, an indirect wholly owned subsidiary of Wells Fargo & Company (Wells Fargo), is the adviser to the Fund and is entitled to receive a fee at an annual rate of 0.95% of the Fund's average daily total assets. Total assets consist of the net assets of the Fund plus borrowings or other leverage for investment purposes to the extent excluded in calculating net assets.

Funds Management has retained the services of certain subadvisers to provide daily portfolio management to the Fund. The fees for subadvisory services are borne by Funds Management. Wells Capital Management Incorporated, an affiliate of Funds Management and an indirect, wholly owned subsidiary of Wells Fargo, is a subadviser to the Fund and is entitled to receive a fee from Funds Management at an annual rate of 0.10% of the Fund's average daily total assets. Crow Point Partners, LLC is also a subadviser to the Fund and is entitled to receive a fee from Funds Management at an annual rate of 0.20% of the Fund's average daily total assets.

Table of Contents

Notes to financial statements (unaudited)
Administration fee

Wells Fargo Global Dividend Opportunity Fund 19

Funds Management also serves as the administrator to the Fund providing the Fund with a wide range of administrative services necessary to the operation of the Fund. Funds Management is entitled to receive an annual administration fee from the Fund equal to 0.05% of the Fund's average daily total assets.

5. CAPITAL SHARE TRANSACTIONS

The Fund has authorized an unlimited number of shares with no par value. For the six months ended April 30, 2016 and the year ended October 31, 2015, the Fund did not issue any shares.

On December 17, 2015, the Fund announced an open-market share repurchase program (the Buyback Program). Under the Buyback Program, the Fund may repurchase up to 10% of its outstanding shares within one year of December 17, 2015. The Fund's Board of Trustees has delegated to Funds Management full discretion to administer the Buyback Program including the determination of the amount and timing of repurchases in accordance with the best interests of the Fund and subject to applicable legal limitations. During the six months ended April 30, 2016, the Fund purchased 933,020 of its shares on the open market at a total cost of \$5,406,079 (weighted average price per share of \$5.79). The weighted average discount of these repurchased shares was 14.97%.

6. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments, excluding U.S. government obligations (if any) and short-term securities, for the six months ended April 30, 2016 were \$147,189,341 and \$167,260,167, respectively.

7. DERIVATIVE TRANSACTIONS

During the six months ended April 30, 2016, the Fund entered into written options for income generating purposes.

During the six months ended April 30, 2016, the Fund had written call option activity as follows:

	Number of contracts	Premiums received
Options outstanding at October 31, 2015	389	\$ 105,077
Options written	906	182,760
Options expired	(930)	(178,406)
Options closed	(93)	(58,902)
Options exercised	0	0
Options outstanding at April 30, 2016	272	\$ 50,529

Open written call options at April 30, 2016 were as follow for the Fund:

Expiration date	Counterparty	Description	Strike	Value
-----------------	--------------	-------------	--------	-------

			Number of contracts	price	
5-20-2016	Goldman Sachs	FTSE MIB Index	272	19,703 EUR	\$(41,055)

The Fund had an average of 156 written call option contracts during the six months ended April 30, 2016. As of April 30, 2016, the Fund had segregated \$280,000 as cash collateral for written options.

The fair value, realized gains or losses and change in unrealized gains or losses, if any, on derivative instruments are reflected in the appropriate financial statements.

For certain types of derivative transactions, the Fund has entered into International Swaps and Derivatives Association, Inc. master agreements (ISDA Master Agreements) or similar agreements with approved counterparties. The ISDA Master Agreements or similar agreements may have requirements to deliver/deposit securities or cash to/with an exchange or broker-dealer as collateral and allows the Fund to offset, with each counterparty, certain derivative financial instrument s assets and/or liabilities with collateral held or pledged. Collateral requirements differ by type of derivative. Collateral or margin requirements are set by the broker or exchange clearing house for exchange traded derivatives while collateral terms are contract specific for over-the-counter traded derivatives. Cash collateral that has been pledged to cover obligations of the Fund under ISDA Master Agreements or similar agreements, if any, are reported separately in the Statement of Assets and Liabilities. Securities pledged as collateral, if any, are noted in the Portfolio of Investments. With respect to balance sheet offsetting, absent an event of default by the counterparty or a termination of the agreement, the

Table of Contents

20 Wells Fargo Global Dividend Opportunity Fund Notes to financial statements (unaudited)
 reported amounts of financial assets and financial liabilities in the Statement of Assets and Liabilities are not offset across transactions between the Fund and the applicable counterparty. A reconciliation of the gross amounts on the Statement of Assets and Liabilities to the net amounts by derivative type, including any collateral exposure, is as follows:

Derivative type	Counterparty	Gross amounts of liabilities in the Statement of Assets and Liabilities	Amounts subject to netting agreements	Collateral pledged ¹	Net amount of liabilities
Written options	Goldman Sachs	\$41,055	\$ 0	\$ (41,055)	\$ 0

¹ Collateral pledged within this table is limited to the collateral for the net transaction with the counterparty.

8. CONCENTRATION RISK

Concentration risks result from exposure to a limited number of sectors. A fund that invests a substantial portion of its assets in any sector may be more affected by changes in that sector than would be a fund whose investments are not heavily weighted in any sector.

9. INDEMNIFICATION

Under the Trust's organizational documents, the officers and Trustees have been granted certain indemnification rights against certain liabilities that may arise out of performance of their duties to the Trust. Additionally, in the normal course of business, the Trust may enter into contracts with service providers that contain a variety of indemnification clauses. The Trust's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.

10. SUBSEQUENT DISTRIBUTION

On May 25, 2016, the Fund declared a distribution from of \$0.135 per share payable on July 1, 2016 to shareholders of record on June 15, 2016.

This distribution is not reflected in the accompanying financial statements. The final determination of the source of all distributions is subject to change and made after the Fund's tax year-end.

TAX INFORMATION

Pursuant to Section 853 of the Internal Revenue Code, the following amounts were designated as foreign taxes paid for the fiscal year ended October 30, 2015. These amounts may be less than the actual foreign taxes paid for financial statement purposes. Foreign taxes paid or withheld should be included in taxable income with an offsetting deduction from gross income or as a credit for taxes paid to foreign governments. None of the income was derived from ineligible foreign sources as defined under Section 901(j) of the Internal Revenue Code.

Creditable foreign taxes paid	Per share amount	Foreign income as % of ordinary income distributions
\$1,554,049	\$0.0316	69.63%

PROXY VOTING INFORMATION

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available, upon request, by calling **1-800-222-8222**, visiting our website at **wellsfargofunds.com**, or visiting the SEC website at **sec.gov**. Information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available on the Fund's website at **wellsfargofunds.com** or by visiting the SEC website at **sec.gov**.

BOARD OF TRUSTEES AND OFFICERS**

Other information (unaudited)

The following table provides basic information about the Board of Trustees (the Trustees) and Officers of the Fund. Each of the Trustees and Officers listed below acts in identical capacities for each fund in the Wells Fargo family of funds, which consists of 141 mutual funds comprising the Wells Fargo Funds Trust, Wells Fargo Variable Trust, Wells Fargo Master Trust, and four closed-end funds, including the Fund (collectively the Fund Complex). The mailing address of each Trustee and Officer is 525 Market Street, 12th Floor, San Francisco, CA 94105. The Board of Trustees is classified into three classes of which one is elected annually. Each Trustee serves a three-year term concurrent with the class from which the Trustee is elected. Each Officer serves an indefinite term.

Independent Trustees

Name and year of birth	Position held and length of service	Principal occupations during past five years or longer	Current other public company or investment company directorships

** Debra Ann Early was the Chief Compliance Officer until May 15, 2016.

Table of Contents**24 Wells Fargo Global Dividend Opportunity Fund
AUTOMATIC DIVIDEND REINVESTMENT PLAN**

Automatic dividend reinvestment plan

All common shareholders are eligible to participate in the Automatic Dividend Reinvestment Plan (the Plan). Pursuant to the Plan, unless a common shareholder is ineligible or elects otherwise, all cash dividends and capital gains distributions are automatically reinvested by Computershare Trust Company, N.A., as agent for shareholders in administering the Plan (Plan Agent), in additional common shares of the Fund. Whenever the Fund declares an ordinary income dividend or a capital gain dividend (collectively referred to as dividends) payable either in shares or in cash, nonparticipants in the Plan will receive cash, and participants in the Plan will receive the equivalent in common shares. The shares are acquired by the Plan Agent for the participant s account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund (newly issued common shares) or (ii) by purchase of outstanding common shares on the open-market (open-market purchases) on the NYSE Amex or elsewhere. If, on the payment date for any dividend or distribution, the net asset value per share of the common shares is equal to or less than the market price per common share plus estimated brokerage commissions (market premium), the Plan Agent will invest the amount of such dividend or distribution in newly issued shares on behalf of the participant. The number of newly issued common shares to be credited to the participant s account will be determined by dividing the dollar amount of the dividend by the net asset value per share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance may not exceed 5%. If on the dividend payment date the net asset value per share is greater than the market value (market discount), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participant in open-market purchases. There will be no brokerage charges with respect to shares issued directly by the Fund as a result of dividends or capital gains distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent s open-market purchases in connection with the reinvestment of dividends. The automatic reinvestment of dividends and distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends. All correspondence concerning the Plan should be directed to the Plan Agent at P.O. Box 30170, College Station, Texas 77842-3170 or by calling 1-800-730-6001.
