NOODLES & COMPANY  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(unaudited)

1. Business and Summary and Basis of Presentation

Business

Noodles & Company, (the "Company" or "Noodles & Company"), a Delaware corporation, develops and operates fast casual restaurants that serve globally inspired noodle and pasta dishes, soups, salads and sandwiches. As of April 1, 2014, there were 331 company-owned restaurants and 63 franchise restaurants in 30 states and the District of Columbia. The Company operates its business as one operating and reportable segment.

On July 2, 2013, the Company completed an initial public offering ("IPO") of shares of Class A common stock at \$18.00 per share. The Company issued 6,160,714 shares of Class A common stock, \$0.01 par value, including 803,571 shares sold to the underwriters in the IPO pursuant to their over-allotment option. After underwriter discounts and commissions and estimated offering expenses, the Company received net proceeds from the offering of approximately \$100.2 million. These proceeds were used to repay all but \$0.2 million of outstanding debt under the Company's credit facility.

On December 5, 2013, the Company completed a follow-on offering of 4,500,000 shares of Class A common stock at a price of \$39.50 per share. All of the shares in the offering were offered by selling stockholders, except for 108,267 shares offered by the Company, the proceeds of which were used to repurchase the same number of shares from certain officers at the same net price per share at which shares were sold in the follow-on offering. The Company did not receive any net proceeds from the offering of shares by the selling shareholders. The selling stockholders paid all of the underwriting discounts and commissions associated with the sale of the shares; however, the Company incurred approximately \$696,000 in costs and expenses related to this offering.

The accompanying interim unaudited consolidated financial statements have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC"). Accordingly, they do not include all the information and footnotes required by generally accepted accounting principles in the United States ("U.S. GAAP") for complete financial statements. In the opinion of the Company, all adjustments considered necessary for the fair presentation of the Company's results of operations, financial position and cash flows for the periods presented have been included and are of a normal, recurring nature. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year. These financial statements should be read in conjunction with the audited financial statements and the related notes included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of Noodles & Company and its subsidiaries. All material intercompany balances and transactions are eliminated in consolidation. Certain reclassifications were made to prior year amounts to conform to the first quarter 2014 presentation.

Fiscal Year

The Company operates on a 52- or 53-week fiscal year ending on the Tuesday closest to December 31. Fiscal year 2014, which ends on December 30, 2014 and fiscal year 2013, which ended on December 31, 2013, each contain 52 weeks. Fiscal quarters each contain thirteen weeks, with the exception of the fourth quarter of a 53 week fiscal year, which contains fourteen weeks.

Table of Contents

## 2. Supplemental Financial Information

Property and equipment, net, consist of the following (in thousands):

	April 1, 2014	December 31, 2013
Leasehold improvements	\$178,246	\$169,953
Furniture, fixtures, and equipment	96,450	92,695
Construction in progress	8,982	11,209
	283,678	273,857
Accumulated depreciation and amortization	(111,362	) (106,243
	\$172,316	\$167,614

## 3. Borrowings

The Company has a credit facility with a borrowing capacity of \$45.0 million in the form of a revolving line of credit, expiring in November 2018. Prior to the IPO, the Company had a credit facility with a borrowing capacity of \$120.0 million, consisting of a \$75.0 million senior term loan and a \$45.0 million revolving line of credit. In connection with the IPO, the Company repaid its outstanding \$75.0 million senior term loan and the majority of the revolving line of credit. Assuming continued compliance with covenants, the Company has the ability to borrow under the revolving line of credit; however, the amounts repaid on the senior term loan cannot be re-borrowed. As of April 1, 2014, the Company had \$6.6 million outstanding and \$35.6 million available for borrowing under the credit facility. Outstanding letters of credit aggregating \$2.8 million reduce the amount of borrowings available under the agreement. The credit facility bore interest at rate a of 3.25% for the first quarter of 2014. The Company was in compliance with all of its debt covenants as of April 1, 2014.

## 4. Fair Value Measurements

The carrying amounts of cash and cash equivalents, accounts receivable, accounts payable and all other current liabilities approximate fair values due to the short maturities of these instruments. The carrying amounts of borrowings approximate fair value as interest rates on the the line of credit borrowings vary with market interest rates and negotiated terms and conditions are consistent with current market rates. The fair value of our line of credit borrowings is measured using Level 2 inputs.

## 5. Income Taxes

The following table presents the Company's provision for income taxes for the first quarter ended April 1, 2014 and April 2, 2013 (dollars in thousands):

	April 1, 2014	April 2, 2013
Provision for income taxes	\$1,012	\$595
Effective tax rate	41.5	% 39.2

The 2014 estimated annual effective tax rate is expected to be 41.5% compared to 41.7% for 2013. The effective tax rate for the first quarter of 2014 includes the change to a 35% federal income tax rate compared to 34% in 2013.

## 6. Stock-Based Compensation

The Company's Stock Incentive Plan, as amended and restated in May of 2013, authorizes the grant of nonqualified stock options, incentive stock options, stock appreciation rights, restricted stock, restricted stock units and incentive bonuses to employees, officers, non-employee directors and other service providers. The number of shares of common stock available for issuance pursuant to awards granted under the Stock Incentive Plan on or after the closing of the IPO shall not exceed 3,750,500.

Table of Contents

The following table presents information related to the Stock Incentive Plan (in thousands, except for share and per share amounts):

	Fiscal Quarter Ended	
	April 1, 2014	April 2, 2013
Outstanding, beginning of period	3,309,872	2,973,168
Granted	—	—
Exercised	142,249	—
Canceled	9,709	27,782
Outstanding, end of period	3,157,914	2,945,386
Weighted average fair market value on option grant date	N/A	N/A
Stock based compensation expense	\$140	\$363
Capitalized stock based compensation expense	\$18	\$26

Stock-based compensation expense includes \$21,000 related to the Employee Stock Purchase Plan in the first quarter of 2014. No stock based compensation expense was recognized in the first quarter of 2013 related to the Employee Stock Purchase Plan. Stock-based compensation expense is included in general and administrative expense on the consolidated statements of income.

## 7. Earnings Per Share

EPS is calculated by dividing income available to common shareholders by the weighted-average number of shares of common stock outstanding during each period. Diluted earnings per share ("diluted EPS") is calculated using income available to common shareholders divided by diluted weighted-average shares of common stock outstanding during each period. Potentially dilutive securities include shares of common stock underlying stock options and warrants. The following table sets forth the computations of basic and diluted earnings per share:

	Fiscal Quarter Ended	
	April 1, 2014	April 2, 2013
Net income (in thousands):	\$1,424	\$924
Shares:		
Basic weighted average shares outstanding	29,606,321	23,238,984
Dilutive stock options and warrants	1,453,003	433,316
Diluted weighted average number of shares outstanding	31,059,324	23,672,300
Earnings per share:		
Basic EPS	\$0.05	\$0.04
Diluted EPS	\$0.05	\$0.04

In the first quarters of 2014 and 2013, there were 17,000 and 313,138 outstanding options, respectively, excluded from the diluted earnings per share calculation because their inclusion would be antidilutive. All outstanding warrants are dilutive and were included in the calculation of diluted earnings per share.

Table of Contents

## 8. Employee Benefit Plans

## Deferred Compensation Plan

The Company's deferred compensation plan, under which compensation deferrals began during the third quarter of 2013, is a non-qualified deferred compensation plan which allows highly compensated employees to defer a portion of their base salary and variable compensation each plan year. To offset its obligation, the Company purchases Company-owned whole-life insurance contracts on certain team members. As of April 1, 2014, \$896,000 and \$924,000 were included in other assets, net and other long-term liabilities, respectively, which represent the carrying value of the liability for the deferred compensation plan and the cash surrender value of the associated life insurance policy.

## Employee Stock Purchase Plan

During the third quarter of 2013, the Company commenced sales of common stock under its Employee Stock Purchase Plan ("ESPP") and has reserved 750,100 shares of common stock for issuance. Eligible employees may purchase common stock at 85% of the beginning or ending closing price, whichever is lower, for each quarterly purchase period. During the first quarter of 2014, the Company issued no shares of common stock under the ESPP. As of April 1, 2014, the Company has 731,644 shares available for future issuance under the ESPP.

## 9. Supplemental Disclosures to Consolidated Statements of Cash Flows

The following table presents the supplemental disclosures to the consolidated statements of cash flows for the first quarter ended April 1, 2014 and April 2, 2013 (in thousands):

	April 1, 2014	April 2, 2013
Interest paid	\$73	\$1,262
Income taxes paid	81	27
Purchases of property and equipment accrued in accounts payable, net	1,020	(419)

## 10. Commitments and Contingencies

The Company is named as a defendant in an action filed in the Superior Court of Delaware in New Castle County, entitled The State of Delaware, William French v. Card Compliant, LLC, et. al. The case was filed under seal in June 2013 and was unsealed on March 26, 2014. The complaint in this case alleges that the Company and the other defendants in the case, including a number of large retailers and restaurant companies, knowingly refused to fulfill obligations under Delaware's Abandoned Property Law by failing to report and deliver "unclaimed gift card funds" to the State of Delaware, and knowingly made, used or caused to be made or used, false statements and records to conceal, avoid or decrease an obligation to pay or transmit money to Delaware in violation of the Delaware False Claims and Reporting Act. The complaint seeks an order that the Company cease and desist from violating the Delaware False Claims and Reporting Act, monetary damages (including treble damages under the False Claims and Reporting Act), penalties, and attorneys' fees and costs. The case is at an early stage and the Company therefore is unable to make a reasonable estimate of the probable loss or range of losses, if any, that might arise from this matter. The Company intends to vigorously defend this action.

In the normal course of business, the Company is subject to other proceedings, lawsuits and claims. Such matters are subject to many uncertainties, and outcomes are not predictable with assurance. Consequently, the Company is unable to ascertain the ultimate aggregate amount of monetary liability or financial impact with respect to these matters as of April 1, 2014. These matters could affect the operating results of any one financial reporting period when resolved in future periods. Management believes that an unfavorable outcome with respect to these matters is remote or a potential range of loss is not material to the Company's consolidated financial statements. Significant increases in the number of these claims, or one or more successful claims that result in greater liabilities than the Company currently anticipates, could materially and adversely affect the Company's business, financial condition, results of operations or cash flows.

The Company entered into employment agreements with two of its executives in connection with the IPO superseding the previous employment agreements with these executives. The agreements have an initial term of three years and

automatically renew annually unless canceled by either party within 90 days of the end of the initial term or anniversaries thereof. Under each of the Employment Agreements, if the executive's employment is terminated by the Company without "cause" or by the executive with "good reason," (as such terms are defined in the applicable employment agreement) the executive is entitled to receive compensation equal to 18 months of the executive's then-current base salary, payable in equal installments over 18 months, a pro rata bonus for the year of termination and reimbursement of "COBRA" premiums for up to 18 months for the executive and his dependents. The severance payments are conditioned upon the executive entering into a mutual release of claims with the Company.

Table of Contents

11. Related-Party Transactions

In the first quarter of 2013, the Company paid \$125,000 to Catterton Partners and Argentia Private Investments Inc. or their affiliates ("Equity Sponsors") for management service fees and Class C Dividends pursuant to a management services agreement and an agreement to pay dividends on its Class C common stock. In connection with the IPO, the management services agreement expired and the one share of Class C common stock was redeemed therefore no payments were made during 2014. Management service fees and Class C dividends paid in prior fiscal quarters varied due to the timing of payments.

Table of Contents

NOODLES & COMPANY  
MANAGEMENT'S DISCUSSION AND ANALYSIS OF  
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the accompanying unaudited consolidated financial statements and related notes in Item 1 and with the audited consolidated financial statements and the related notes included in our Annual Report on Form 10-K for our fiscal year ended December 31, 2013. We operate on a 52 or 53 week fiscal year ending on the Tuesday closest to December 31. Our fiscal quarters each contain 13 operating weeks, with the exception of the fourth quarter of a 53 week year, which contains 14 operating weeks. Fiscal years 2014 and 2013 each contain 52 weeks.

Cautionary Note Regarding Forward-Looking Statements

In addition to historical information, this discussion and analysis contains forward-looking statements that involve risks and uncertainties such as the number of restaurants we intend to open, projected capital expenditures, and estimates of our effective tax rates. In some cases, you can identify forward-looking statements by terms such as "may," "might," "will," "objective," "intend," "should," "could," "can," "would," "expect," "believe," "design," "estimate," "predict," "potential," "plan" or the negative of these terms, and similar expressions intended to identify forward-looking statements. These statements reflect our current views with respect to future events and are based on assumptions and are subject to risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements including, but not limited to, those discussed in "Special Note Regarding Forward-Looking Statements" and "Risk Factors" as filed in our Annual Report on Form 10-K for our fiscal year ended December 31, 2013.

2014 Highlights and Trends

**Restaurant Development.** New restaurants have contributed substantially to our revenue growth, and in the first quarter of 2014, we opened 13 company-owned restaurants and one franchise restaurant. As of April 1, 2014, we had 331 company-owned restaurants and 63 franchise restaurants in 30 states and the District of Columbia. In 2014, we anticipate opening between 42 and 50 company-owned restaurants, and between 10 and 15 franchise restaurants, including the restaurants opened through the end of our first quarter.

**Comparable Restaurant Sales.** Comparable restaurant sales decreased by 1.4% at company-owned restaurants, 3.3% at franchise owned restaurants and 1.6% system-wide in the first quarter of 2014. The comparable restaurant sales decline in the first quarter was the result of a decrease in traffic due to abnormally severe weather in the first quarter, offset by an increase in price and mix.

Key Measures We Use to Evaluate Our Performance

To evaluate the performance of our business, we utilize a variety of financial and performance measures. These key measures include revenue, average unit volumes ("AUVs"), comparable restaurant sales, restaurant contribution, EBITDA and adjusted EBITDA.

Revenue

Restaurant revenue represents sales of food and beverages in company-owned restaurants. Several factors affect our restaurant revenue in any period, including the number of restaurants in operation and per-restaurant sales.

Franchise royalties and fees represent royalty income and initial franchise fees. While we expect that the majority of our revenue and net income growth will be driven by company-owned restaurants, our franchise restaurants remain an important part of our financial success.

Seasonal factors cause our revenue to fluctuate from quarter to quarter. Our revenue per restaurant is typically lower in the first and fourth quarters due to reduced winter and holiday traffic and is higher in the second and third quarters. These seasonal factors could cause our quarterly and annual operating results and comparable restaurant sales to fluctuate significantly.

Table of Contents

Average Unit Volumes ("AUVs")

AUVs consist of the average annualized sales of all company-owned restaurants for the trailing 12 periods. AUVs are calculated by dividing restaurant revenue by the number of operating days within each time period and multiplying by 361, which is the number of operating days we have in a typical year. This measurement allows management to assess changes in consumer traffic and per-person-spending patterns at our restaurants.

Comparable Restaurant Sales

Comparable restaurant sales refer to year-over-year sales comparisons for the comparable restaurant base. We define the comparable restaurant base to include restaurants open for at least 18 full periods. This measure highlights performance of existing restaurants, as it excludes the impact of new restaurant openings. Comparable restaurant sales growth is generated by increases in traffic, which we calculate as the number of entrees sold, or changes in per person spend, calculated as sales divided by traffic. Per-person spend can be influenced by changes in menu prices and the mix and number of items sold per person.

Measuring our comparable restaurant sales allows us to evaluate the performance of our existing restaurant base.

Various factors impact comparable restaurant sales, including:

• consumer recognition of our brand and our ability to respond to changing consumer preferences;

• overall economic trends, particularly those related to consumer spending;

• our ability to operate restaurants effectively and efficiently to meet consumer expectations;

• pricing;

• per-person spend and average check amount;

• marketing and promotional efforts;

• weather;

• local competition;

• trade area dynamics;

• introduction of new and seasonal menu items and limited time offerings; and

• opening of new restaurants in the vicinity of existing locations.

Since opening new company-owned and franchise restaurants is an important part of our growth strategy, and we anticipate new restaurants will be a significant component of our revenue growth, comparable restaurant sales are only one measure of how we evaluate our performance.

Table of Contents

## Restaurant Contribution

Restaurant contribution is defined as restaurant revenue less restaurant operating costs, which consist of cost of sales, labor, occupancy and other restaurant operating costs. We expect restaurant contribution to increase in proportion to the number of new restaurants we open and our comparable restaurant sales growth. Fluctuations in restaurant contribution margin can also be attributed to those factors discussed above for the components of restaurant operating costs.

## EBITDA and Adjusted EBITDA

We define EBITDA as net income before interest expense, provision for income taxes and depreciation and amortization. We define adjusted EBITDA as net income before interest expense, provision for income taxes, asset disposals, closure costs and restaurant impairments, depreciation and amortization, stock-based compensation, management fees and IPO-related expenses.

EBITDA and adjusted EBITDA provide clear pictures of our operating results by eliminating certain expenses that are not reflective of the underlying business performance. We use these metrics to facilitate a comparison of our operating performance on a consistent basis from period to period and to analyze the factors and trends affecting our business.

The following table presents a reconciliation of net income to EBITDA and adjusted EBITDA:

	Fiscal Quarter Ended	
	April 1, 2014	April 2, 2013
	(in thousands, unaudited)	
Net income	\$1,424	\$924
Depreciation and amortization	5,610	4,801
Interest Expense	20	1,053
Provision for income taxes	1,012	595
EBITDA	\$8,066	\$7,373
Asset disposals, closure costs and restaurant impairment	214	201
Management fees <sup>(1)</sup>	—	250
Stock-based compensation expense <sup>(2)</sup>	140	363
Adjusted EBITDA	\$8,420	\$8,187

The first quarter of 2013 included \$250,000 of management fee expense in accordance with our management services agreement and through the Class C common stock dividend paid to the holder of the one share of our Class C common stock then outstanding. In connection with our IPO, the management services agreement expired and the one share of Class C common stock was redeemed.

(2) Includes only the non-cash portion of stock-based compensation expense.

Table of Contents

## Restaurant Openings, Closures and Relocations

The following table shows restaurants opened, closed or relocated during the periods indicated.

	Fiscal Quarter Ended	
	April 1, 2014	April 2, 2013
Company-Owned Restaurant Activity		
Beginning of period	318	276
Openings	13	9
Closures and relocations <sup>(1)</sup>	—	(1
Restaurants at end of period	331	284
Franchise Restaurant Activity		
Beginning of period	62	51
Openings	1	—
Restaurants at end of period	63	51
Total restaurants	394	335

<sup>(1)</sup> Relocated restaurants are accounted for under both restaurant openings and restaurant closures and relocations. In the first quarter of 2013, we closed one restaurant at the end of its lease term.

Table of Contents

## Results of Operations

The following table summarizes key components of our results of operations for the periods indicated as a percentage of our total revenue, except for the components of restaurant operating costs, which are expressed as a percentage of restaurant revenue.

	Fiscal Quarter Ended			
	April 1, 2014	April 2, 2013		
Revenue:				
Restaurant revenue	98.8	% 99.1		%
Franchising royalties and fees	1.2	0.9		
Total revenue	100.0	100.0		
Costs and Expenses:				
Restaurant Operating Costs (exclusive of depreciation and amortization shown separately below): <sup>(1)</sup>				
Cost of sales	27.0	26.5		
Labor	30.8	30.8		
Occupancy	11.2	10.4		
Other restaurant operating costs	13.8	13.8		
General and administrative <sup>(2)</sup>	7.8	8.9		
Depreciation and amortization	6.3	5.9		
Pre-opening	1.2	1.1		
Asset disposals, closure costs and restaurant impairments	0.2	0.2		
Total costs and expenses	97.3	96.8		
Income from operations	2.7	3.2		
Interest expense	—	1.3		
Income before income taxes	2.7	1.9		
Provision for income taxes	1.1	0.7		
Net income	1.6	% 1.1		%

(1) As a percentage of restaurant revenue.

The first quarter of 2013 included \$250,000 of management fee expense in accordance with our management services agreement and through the Class C common stock dividend paid to the holder of the one share of our Class C common stock then outstanding. In connection with our IPO, the management services agreement expired and the one share of Class C common stock was redeemed.

Table of Contents

First Quarter Ended April 1, 2014 compared to First Quarter Ended April 2, 2013

Our fiscal quarters each contain thirteen weeks with the exception of the fourth quarter of a 53 week fiscal year, which contains fourteen weeks. The table below presents our unaudited operating results for the first quarters of 2014 and 2013, and the related quarter-over-quarter changes:

	Fiscal Quarter Ended		Increase / (Decrease)		
	April 1, 2014	April 2, 2013	\$	%	
(in thousands, except percentages)					
Revenue:					
Restaurant revenue	\$88,448	\$80,518	\$7,930	9.8	%
Franchising royalties and fees	1,071	762	309	40.6	
Total revenue	89,519	81,280	8,239	10.1	
Costs and expenses:					
Restaurant operating costs (exclusive of depreciation and amortization shown separately below):					
Cost of sales	23,848	21,301	2,547	12.0	
Labor	27,198	24,830	2,368	9.5	
Occupancy	9,865	8,359	1,506	18.0	
Other restaurant operating costs	12,206	11,080	1,126	10.2	
General and administrative	7,009	7,215	(206)	(2.9)	)
Depreciation and amortization	5,610	4,801	809	16.9	
Pre-opening	1,113	921	192	20.8	
Asset disposals, closure costs and restaurant impairments	214	201	13	6.5	
Total costs and expenses	87,063	78,708	8,355	10.6	
Income from operations	2,456	2,572	(116)	(4.5)	)
Interest expense	20	1,053	(1,033)	(98.1)	)
Income before income taxes	2,436	1,519	917	60.4	
Provision for income taxes	1,012	595	417	70.1	
Net income	\$1,424	\$924	\$500	54.1	%
Company owned:					
Average unit volumes	\$1,163	\$1,180	\$(17)	(1.4)	)%
Comparable restaurant sales	(1.4	)% 2.2	%		

## Revenue

Restaurant revenue increased by \$7.9 million in the first quarter of 2014 compared to the same period of 2013. An increase in operating weeks resulted in \$10.1 million of this increase, offset by a sales decrease in comparable restaurants of \$1.1 million, or 1.4%, in the first quarter of 2014 compared to the same period in 2013. The comparable restaurant sales decline in the first quarter was the result of a decrease in traffic due to abnormally severe weather in the first quarter, offset by an increase in price and mix.

Franchise royalties and fees increased by \$309,000 in the first quarter of 2014 compared to the same period of 2013 due to one new restaurant opening and an increase in operating weeks, offset by a decrease in comparable restaurant sales of 3.3% in the first quarter of 2014.

## Cost of Sales

Cost of sales increased by \$2.5 million in the first quarter of 2014 compared to the same period of 2013, due primarily to the increase in restaurant revenue in the first quarter of 2014. As a percentage of restaurant revenue, cost of sales increased to 27.0% in the first quarter of 2014 from 26.5% in first quarter of 2013. The increase in cost of sales was the result of increased waste associated with low volume days during bad weather, as well as increased promotional

activity.

17

---

Table of Contents

Labor Costs

Labor costs increased by \$2.4 million in the first quarter of 2014 compared to the same period of 2013, due primarily to the increase in restaurant revenue in the first quarter of 2014. As a percentage of restaurant revenue, labor costs were flat at 30.8% in both the first quarter of 2014 and the first quarter of 2013.

Occupancy Costs

Occupancy costs increased by \$1.5 million in the first quarter of 2014 compared to the first quarter of 2013, due primarily to 55 net restaurant openings. As a percentage of revenue, occupancy costs increased to 11.2% in first quarter of 2014, compared to 10.4% in the first quarter of 2013. The increase was due to additional restaurants included in the non-comparable restaurant base year over year, which, on average, have higher occupancy costs as a percentage of revenue. Additionally there was an increase in common area maintenance charges as a percentage of sales due to increased snow removal in 2014 relative to 2013.

Other Restaurant Operating Costs

Other restaurant operating costs increased by \$1.1 million in the first quarter of 2014 compared to the first quarter of 2013, due primarily to increased restaurant revenue in the first quarter of 2014. As a percentage of restaurant revenue, other restaurant operating costs remained consistent at 13.8% in the first quarter of 2014 and the first quarter of 2013.

General and Administrative Expense

General and administrative expense decreased by \$0.2 million in the first quarter of 2014 compared to the first quarter of 2013. As a percentage of revenue, general and administrative expense decreased to 7.8% in the first quarter of 2014 compared to 8.9% in first quarter of 2013. This decrease was due to leverage on increased revenue, reduced incentive compensation expense and the elimination of management fees paid to Catterton Partners and Argentia Private Investments, Inc.

Depreciation and Amortization

Depreciation and amortization increased by \$0.8 million in the first quarter of 2014 compared to the first quarter of 2013, due primarily to the increase in the number of restaurants. As a percentage of revenue, depreciation and amortization increased to 6.3% in the first quarter of 2014, compared to 5.9% in the first quarter of 2013, due to depreciation on new restaurants and increased capital investment related to initiatives.

Pre-Opening Costs

Pre-opening costs increased by \$0.2 million in the first quarter of 2014 compared to the first quarter of 2013. As a percentage of revenue, pre-opening costs increased to 1.2% in the first quarter of 2014 compared to 1.1% in the first quarter of 2013. Both of these increases were due to an increased number of restaurant openings in the first quarter of 2014 compared to the first quarter of 2013.

Interest Expense

Interest expense decreased by \$1.0 million in the first quarter of 2014 compared to the same period of 2013. The decrease was the result of lower average borrowings in the first quarter of 2014 compared to the first quarter of 2013 due to the payoff of the majority of our outstanding debt in conjunction with our IPO which we completed on July 2, 2013.

Provision for Income Taxes

Provision for income taxes increased by \$0.4 million in the first quarter of 2014 compared to same period of 2013 due to an increase in pre-tax net income of \$0.9 million in the first quarter of 2014 compared to the first quarter of 2013. The effective tax rate for the first quarter of 2014 includes the change to a 35% federal income tax rate compared to 34% in 2013. The 2014 estimated annual effective tax rate is expected to be 41.5% compared to 41.7% for 2013.

Table of Contents

## Liquidity and Capital Resources

## Summary of Cash Flows

Our primary sources of liquidity and cash flows are operating cash flows and borrowings on our revolving line of credit. We use these cash sources to fund capital expenditures for new restaurant openings, reinvest in our existing restaurants, invest in infrastructure and information technology and maintain working capital. Our working capital position benefits from the fact that we generally achieve time-of-sales collection of cash from sales to customers, or in the case of credit or debit card transactions, we collect cash within several days of the related sale. In contrast, we typically have at least 30 days to pay our vendors.

Cash flows from operating, investing and financing activities are shown in the following table (in thousands):

	One Fiscal Quarter Ended	
	April 1, 2014	April 2, 2013
Net cash provided by operating activities	\$ 10,257	\$ 7,961
Net cash used in investing activities	(11,510	) (13,342
Net cash provided by financing activities	953	5,778
Cash and cash equivalents at the end of period	\$ 668	\$ 978

## Operating Activities

Net cash provided by operating activities of \$10.3 million for the quarter ended April 1, 2014 resulted primarily from net income, adjusted for items such as depreciation and amortization, stock-based compensation expense and the amortization of debt issuance costs. The \$2.3 million increase over the prior year was primarily driven by an increase in net income and an increase in construction-related accounts payable due to timing of restaurant openings.

## Investing Activities

Net cash flows used in investing activities decreased \$1.8 million from \$13.3 million in the first quarter of 2013 to \$11.5 million in the first quarter of 2014. The decrease over the prior year is primarily due to timing of new restaurant construction.

## Financing Activities

Net cash provided by financing activities was \$1.0 million and \$5.8 million in the first quarters of 2014 and 2013, respectively. We used borrowings in both fiscal years primarily to fund new restaurant capital expenditures. The decrease over the prior year is due to an increase in operating cash flow and fewer restaurants under construction during the first quarter of 2014 compared to the first quarter of 2013.

## Capital Resources

**Future Capital Requirements.** Our capital requirements are primarily dependent upon the pace of our real estate development program and resulting new restaurants. Our real estate development program is dependent upon many factors, including economic conditions, real estate markets, site locations and the nature of lease agreements. Our capital expenditure outlays are also dependent on costs for maintenance and capacity additions in our existing restaurants as well as information technology and other general corporate capital expenditures.

We currently estimate capital expenditures for 2014 to be in the range of approximately \$50 to \$55 million. This is primarily related to the anticipated opening of 42 to 50 restaurants in 2014, the start of construction of restaurants to be opened in early 2015 and normal maintenance-related capital expenditures on our existing restaurants.

**Current Resources.** Our operations have not required significant working capital and, like many restaurant companies, we operate with negative working capital. Restaurant sales are primarily paid for in cash or by credit card, and restaurant operations do not require significant inventories or receivables. In addition, we receive trade credit for the purchase of food, beverages and supplies, therefore reducing the need for incremental working capital to support growth.

## Table of Contents

### Credit Facility

We maintain a \$45.0 million revolving line of credit under our credit facility. The revolving line of credit includes a swing line loan of \$10.0 million used to fund working capital requirements. On November 22, 2013, we amended and restated our credit facility to provide more favorable borrowing rates and fees, to extend borrowing capacity through November 2018 and to effect certain changes to the covenants. In connection with our IPO, we repaid our \$75.0 million senior term loan under our credit facility and the majority of the revolving line of credit. We had \$6.6 million of outstanding indebtedness, \$2.8 million of outstanding letters of credit and \$35.6 million available for borrowing under our revolving line of credit as of April 1, 2014. Borrowings under our amended and restated credit facility bear interest, at our option, at either (i) LIBOR plus 1.00 to 1.75%, based on the lease-adjusted leverage ratio or (ii) the highest of the following rates plus zero to 0.75%: (a) the federal funds rate plus 0.50%; (b) the Bank of America prime rate or (c) the one month LIBOR plus 1.00%. The facility includes a commitment fee of 0.125 to 0.25%, based on the lease-adjusted leverage ratio, per year on any unused portion of the facility. We also maintain outstanding letters of credit to secure obligations under our workers' compensation program and certain lease obligations.

Availability of borrowings under the revolving line of credit is conditioned on our compliance with specified covenants, including a maximum lease-adjusted leverage ratio and a minimum consolidated fixed charge coverage ratio. We are subject to a number of other customary covenants, including limitations on additional borrowings, acquisitions, dividend payments and lease commitments. As of April 1, 2014, we were in compliance with all of our debt covenants.

Our credit facility is secured by a pledge of stock of substantially all of our subsidiaries and a lien on substantially all of the personal property assets of us and our subsidiaries.

### Off-Balance Sheet Arrangements

We had no off-balance sheet arrangements or obligations as of April 1, 2014.

### Critical Accounting Policies and Estimates

Our consolidated financial statements and accompanying notes are prepared in accordance with US GAAP. Preparing consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. These estimates and assumptions are affected by the application of our accounting policies. Our significant accounting policies are described in our Annual Report on Form 10-K for the year ended December 31, 2013. Critical accounting estimates are those that require application of management's most difficult, subjective or complex judgments, often as a result of matters that are inherently uncertain and may change in subsequent periods. While we apply our judgment based on assumptions believed to be reasonable under the circumstances, actual results could vary from these assumptions. It is possible that materially different amounts would be reported using different assumptions. Our critical accounting estimates are identified and described in our annual consolidated financial statements and the related notes included in our Annual Report on Form 10-K for our fiscal year ended December 31, 2013.

### Recent Accounting Pronouncements

#### JOBS Act

We qualify as an "emerging growth company" pursuant to the provisions of the JOBS Act. For as long as we are an "emerging growth company," we may take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not "emerging growth companies," including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404(b) of the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, exemptions from the requirements of holding advisory "say-on-pay" votes on executive compensation and shareholder advisory votes on golden parachute compensation.

In addition, Section 107 of the JOBS Act also provides that an "emerging growth company" can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act for complying with new or revised accounting standards. An "emerging growth company" can therefore delay the adoption of certain accounting standards until those standards would otherwise apply to private companies. However, we have chosen to "opt out" of such extended transition period and, as a result, we will comply with new or revised accounting standards on the

relevant dates on which adoption of such standards is required for non-emerging growth companies. Section 107 of the JOBS Act provides that our decision to opt out of the extended transition period for complying with new or revised accounting standards is irrevocable.

Table of Contents

Item 3. Quantitative and Qualitative Disclosure about Market Risk

Interest Rate Risk

We are exposed to market risk from changes in interest rates on debt and changes in commodity prices. Our exposure to interest rate fluctuations is limited to our outstanding bank debt, which bears interest at variable rates. As of April 1, 2014, there was \$6.6 million outstanding under our revolving line of credit and \$35.6 million available for borrowing under the credit facility. A plus or minus 1.0% in the effective interest rate applied on this loan would have resulted in a pre-tax interest expense fluctuation of \$66,000 of gross interest expense on an annualized basis.

Commodity Price Risk

We purchase certain products that are affected by commodity prices and are, therefore, subject to price volatility caused by weather, market conditions and other factors which are not considered predictable or within our control. Although these products are subject to changes in commodity prices, certain purchasing contracts or pricing arrangements contain risk management techniques designed to minimize price volatility. The purchasing contracts and pricing arrangements we use may result in unconditional purchase obligations, which are not reflected in our consolidated balance sheets. Typically, we use these types of purchasing techniques to control costs as an alternative to directly managing financial instruments to hedge commodity prices. In many cases, we believe we will be able to address material commodity cost increases by adjusting our menu pricing or changing our product delivery strategy. However, increases in commodity prices, without adjustments to our menu prices, could increase restaurant operating costs as a percentage of company-owned restaurant revenue.

Inflation

The primary inflationary factors affecting our operations are food, labor and energy costs as well as labor and materials used in the construction of new restaurants. Increases in the minimum wage directly affect our labor costs. Many of our leases require us to pay taxes, maintenance, repairs, insurance and utilities, all of which are generally subject to inflationary increases. Over the past five years, inflation has not significantly affected our operating results.

Item 4. Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures as of April 1, 2014, pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs. Based on that evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures are effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure.

We have not engaged an independent registered accounting firm to perform an audit of our internal control over financial reporting as of any balance sheet date or for any period reported in our financial statements. Presently, we are not an accelerated filer, as such term is defined by Rule 12b-2 of the Exchange Act and therefore, our management is not presently required to perform an annual assessment of the effectiveness of our internal control over financial reporting. This requirement could apply as early as our Annual Report on Form 10-K for the year ending December 30, 2014 if certain triggers requiring accelerated filing deadlines are met prior to that. Our independent public registered accounting firm will first be required to attest to the effectiveness of our internal control over financial reporting for our Annual Report on Form 10-K for the first year we are no longer an "emerging growth company."

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) that occurred during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II

Item 1. Legal Matters

The Company is named as a defendant in an action filed in the Superior Court of Delaware in New Castle County, entitled The State of Delaware, William French v. Card Compliant, LLC, et. al. The case was filed under seal in June 2013 and was unsealed on March 26, 2014. The complaint in this case alleges that the Company and the other defendants in the case, including a number of large retailers and restaurant companies, knowingly refused to fulfill obligations under Delaware's Abandoned Property Law by failing to report and deliver "unclaimed gift card funds" to the State of Delaware, and knowingly made, used or caused to be made or used, false statements and records to conceal, avoid or decrease an obligation to pay or transmit money to Delaware in violation of the Delaware False Claims and Reporting Act. The complaint seeks an order that we cease and desist from violating the Delaware False Claims and Reporting Act, monetary damages (including treble damages under the False Claims and Reporting Act), penalties, and attorneys' fees and costs. The case is at an early stage and we are therefore unable to make a reasonable estimate of the probable loss or range of losses, if any, that might arise from this matter. We intend to vigorously defend this action.

In the normal course of business, we are subject to other proceedings, lawsuits and claims. Such matters are subject to many uncertainties, and outcomes are not predictable with assurance. Consequently, we are unable to ascertain the ultimate aggregate amount of monetary liability or financial impact with respect to these matters as of April 1, 2014. These matters could affect the operating results of any one financial reporting period when resolved in future periods. We believe that an unfavorable outcome with respect to these matters is remote or a potential range of loss is not material to our consolidated financial statements. Significant increases in the number of these claims, or one or more successful claims that result in greater liabilities than we currently anticipate, could materially and adversely affect our business, financial condition, results of operations or cash flows.

Item 1A. Risk Factors

A description of the risk factors associated with our business is contained in the "Risk Factors" section of our Annual Report on Form 10-K for our fiscal year ended December 31, 2013. There have been no material changes to our Risk Factors as previously reported.
