Item 1.01. Entry into a Material Definitive Agreement

On July 25, 2014, Acceleron Pharma Inc. (the “Company”) and the Salk Institute for Biological Studies (“Salk”) entered into an amendment (the “Amendment”) to that certain Exclusive License Agreement between Salk and the Company regarding Activin Receptors (Type IIB) and Related Subject Matter for Therapeutic and Diagnostic Purposes, dated August 11, 2010 (the “License Agreement”). The License Agreement provides the Company with a license with respect to certain of Salk’s U.S. patents related to the ActRIIB activin receptor proteins.

The Amendment was entered into as a condition to a settlement with Salk that provides for the release of all claims in the lawsuit that Salk previously filed on October 18, 2012. In its suit, Salk alleged that the Company breached the License Agreement. Salk contended that the Company owed Salk a greater share of the upfront payment that the Company received under the Company’s now-terminated agreement with Shire AG regarding ACE-031, and a greater share of the upfront payment and development milestone payments that the Company has received under its ongoing collaboration agreement with Celgene Corporation regarding ACE-536 (the “Celgene Agreement”).

In its complaint, Salk sought a payment of approximately \$10.5 million plus interest and a 15% share of future development milestone payments received by the Company under the Celgene Agreement. Pursuant to the settlement, the Company has made a one-time total payment of \$5 million, inclusive of interest, to Salk and the Company has agreed to pay Salk 6% of future development milestone payments received under the Celgene Agreement relating to ACE-536. Finally, the Company and Salk have further agreed that the royalty percentage on net sales of ACE-536 will remain at 1% as provided in the License Agreement, and that such royalty will be payable until June 2022.
