**GOL to Complete First Flight with New Boeing 737-800 SFP  
on São Paulo - Rio Shuttle Route**

**São Paulo, February 8, 2007** GOL Linhas Aéreas Inteligentes (NYSE: GOL and Bovespa: GOLL4), Brazil's low-cost, low-fare airline, will complete the first flight of its new 737-800 Short Field Performance (SFP) aircraft on the São Paulo-Rio de Janeiro Shuttle Route (departing from Congonhas Airport, São Paulo, and arriving at Santos Dumont Airport, Rio de Janeiro) this Saturday, February 10. In 2006, GOL received the first 11 737-800 SFP aircraft under its order with Boeing and will receive another 14 aircraft during 2007. GOL's total order of 121 aircraft scheduled for delivery between 2006 and 2012 represents the largest contract signed between the North American manufacturer and a Latin American airline.

GOL currently operates a fleet of 65 Boeing 737-300, 700 and 800 aircraft, which provide high-level performance, adhere to all international safety rules and are certified by U.S. and Brazilian authorities to takeoff and land on short, wet or snow-covered runways. GOL chose to operate a standard fleet to ensure high quality equipment maintenance in addition to guaranteeing passenger security. We are committed to offering our customers high quality service and safe transportation. We continue to look for innovative solutions to ensure GOL is operating the safest aircraft possible, says Captain David Barioni, GOL's Technical Vice President.

The new 737-800 SFP was developed by Boeing for GOL, to be used at Brazil's two busiest airports - Congonhas Airport in São Paulo, and Santos Dumont Airport in Rio de Janeiro, which has one of the shortest runways in the world (1,323 meters). GOL's new aircraft are equipped with winglets, a technology that reduces noise during takeoff and affords fuel savings of up to 3% per year. "Boeing worked with GOL to enhance the 737-800's short runway performance and provide additional value to the airline's operations. More than 12 airlines around the world are already benefiting from the enhanced to the 737-800," said John Wojick, Vice President of Sales, Latin America and the Caribbean, Boeing Commercial Airplanes.

The enhancements to the 737 SFP will increase seat capacity on the São Paulo - Rio de Janeiro shuttle route by approximately 30%. Boeing helped us expand our seat capacity on the most important route in Brazil, offering additional comfort and safety to our passengers," adds Barioni. Innovation is a key factor in sustaining the Company's results.

**About GOL Linhas Aéreas Inteligentes**

GOL Linhas Aéreas Inteligentes is one of the most profitable and fastest growing low-cost, low-fare airlines in the industry worldwide. GOL provides frequent service on routes connecting all of Brazil's major cities as well as primary destinations in Argentina, Bolivia, Chile, Paraguay and Uruguay through its more than 610 daily flights to 55 major airports. GOL offers daily flights to more destinations in Brazil than any other domestic airline while providing customers with the most convenient flight schedules in the country. GOL operates a young, modern fleet of Boeing 737s, the safest and most comfortable aircraft of its class, with low maintenance, fuel and training costs, and high aircraft utilization and efficiency ratios. In addition to safe and reliable service, which stimulates GOL's brand recognition and customer satisfaction, the Company's single class of service is recognized as the best value proposition in the market. GOL's growth plans include increasing frequencies in existing markets and adding service to additional markets in both Brazil and other high-traffic South American travel destinations. GOL shares are listed on the NYSE

and the Bovespa. GOL: here everyone can fly!

**FORWARD-LOOKING STATEMENTS**

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
