AMÉRICA MÓVIL'S FOURTH QUARTER OF 2011
FINANCIAL AND OPERATING REPORT

**Mexico City, February 9, 2012 - América Móvil, S.A.B. de C.V. (“América Móvil”)
[BMV: AMX] [NYSE: AMX] [NASDAQ: AMOV] [LATIBEX: XAMXL],
announced today its financial and operating results for the fourth quarter of 2011.**

- 300M accesses** • América Móvil finished December with 300 million accesses, of which 242 million were wireless subscribers, 7.4% more than a year before, and 58 million RGUs that increased 12.3% over the period.

- New churn policy in Mexico, Colombia and Ecuador** • Beginning in October we changed the methodology for booking active subscribers in Mexico, Colombia and Ecuador. As we excluded from the subscriber statistics those lines that have not had any air-time recharge during the churn period, our net additions for the fourth quarter came to be only 304 thousand, bringing the figure for the year to 16.7 million.

- Postpaid base up 21% YoY** • In the postpaid segment we added 1.6 million subscribers in the quarter, taking the total for the year to 6.1 million. Our postpaid subscriber base rose 20.5% in 2011.

- 4Q Revenues up 12% YoY** • Fourth quarter revenues totaled 182 billion pesos. They were up 12.3% from the year-earlier quarter, with wireless revenues expanding 15.4% and fixed-line revenues 6.8%.

- Mobile data revenues +27% YoY** • At constant exchange rates, mobile data services rose 27% and fixed broadband revenues followed with 15%, while PayTV revenues exhibited a 48% annual increase. Every single product line in the South American block experienced solid revenue growth.

EBITDA up 3.9% YoY •

EBITDA of 64.5 billion pesos in the fourth quarter was up 3.9% from a year before, contributing to a 15.1% increase in our operating profits, to 38.3 billion pesos. The latter rise also reflects a reduction in depreciation charges, since at the end of 2010 we booked extraordinary charges as we began to integrate the fixed and mobile networks.

Net income of MXP 16Bn •

Net income came down to 16.3 billion pesos as the depreciation of the peso in the last quarter and the increase in net debt that took place throughout the year to fund the acquisition of stock of Telmex, Telmex Internacional, Net Serviços and StarOne as well as our own stock repurchases brought about an important increase in our comprehensive financing costs.

**MXP 71Bn
in Distributions** •

Our net debt rose to 321 billion pesos in December from 207 billion at the close of 2010 to help fund 70 billion pesos in stock purchases and 54 billion pesos in share buybacks. Our cash flow from operations more than covered our capital expenditures of 121 billion pesos and dividends of 17 billion.

Relevant Events

95% interest in Telmex

On October 11th, we launched a tender offer for all the outstanding shares of Telmex that we did not own, which represented approximately 40% of its stock. The tender offer expired on November 11th. As of January 31st 2012 América Móvil owned 95.17% of Telmex. The acquired shares entailed the payment of 68 billion pesos.

Reductions of MTRs in Mexico

In November, Telcel entered into an agreement with four other operators that sets forth a 25% reduction in mobile termination rates over the period 2011-2014.

Acquisition of Digicel Honduras

On November 30th, we acquired a 100% ownership interest in Digicel Honduras, a company that provides wireless telecommunications services in Honduras. As part of this transaction we sold our operation in Jamaica to an affiliate of Digicel Group Limited.

Launch of Costa Rica

Also in November we began operations in Costa Rica. We are offering mobile voice and data services throughout the country.

First bond issues in Japan and China

Throughout the fourth quarter we placed America Movil bonds in the amount of 2.4 billion dollars-equivalent in several markets. We issued a one billion euro, 8-year note that carries a coupon of 4.125%; a 500 million pound, 15-year bond that pays 5.0% per annum and, in what was our first foray into the Japanese market, we issued 3-year bonds in the amount of 6.9 billion yen with a 1.23% coupon and 5-year bonds totaling 5.1 billion yen that pay 1.53% per annum. At the end of January we also placed our first bond issue in Chinese RMB: a one billion RMB-denominated note with a tenor of three years and a coupon of 3.5%.

**Total
 accesses +8.3%
 YoY**

Total Accesses

We finished December with 299.6 million accesses, 8.3% more than in 2010. This figure comprises 241.8 million wireless subscribers, 29.4 million landlines, 15.1 million broadband accesses and 13.4 million PayTV units. In South America, the number of fixed lines was up 18.6% year-on-year and that of broadband accesses 27.7%. Our PayTV business exhibited an annual increase of 33.1%.

242M Wireless subs

Wireless Subscribers

América Móvil finished December with 241.8 million wireless subscribers, 7.4% more than at the end of 2010. Net additions for the quarter were 304 thousand. This figure reflects the impact of a change in the methodology for booking active subscribers in Mexico, Colombia and Ecuador. The change of methodology described above resulted in net disconnections of 2.3 million, 2.4 million and 151 thousand in Mexico, Colombia and Ecuador, respectively.

**New churn policy in
 Mexico, Colombia
 and Ecuador**

Pursuant to the new methodology - which is consistent with our conservative standards - we now exclude from the subscriber statistics those lines that have not had any air-time recharge over a given period, with the corresponding impact on operating metrics. Our strategy has been increasingly oriented towards developing a greater presence in the postpaid sector and seeking out only the best prepaid clients. It is important to note that in the absence of the above-mentioned change, the churn rates would have been lower in all three cases than they were a year before.

**35M postpaid subs,
 +21% YoY**

We gained 1.6 million postpaid net additions in the fourth quarter, taking the net additions for the year to 6.1 million, 23.7% more than the year before. Our

postpaid subscriber base was up 20.5% in 2011, to 34.7 million, growing substantially more rapidly than the prepaid one in all our operations save Panama.

2.9M net adds in Brazil

Brazil gained 2.9 million subscribers in the quarter, almost as many as the year before. In Argentina, net additions of 613 thousand more than tripled those of the year-earlier quarter. In each of Central America and the Caribbean, the U.S. and Peru we added approximately half a million subs in the fourth quarter.

66M subs in Mexico

At the end of the year our subscriber base comprised 65.7 million subscribers in Mexico, 60.4 million in Brazil, 28.8 million in Colombia and 19.6 million in Argentina. We also had 19.8 million clients in the U.S., 18.5 million in Central America and the Caribbean and around 11 million in Ecuador and Peru.

Fixed Revenue Generating Units

58M RGUs, +12% YoY

Revenue generating units (RGUs) topped 58 million in December, 12.3% more than a year before, with those in South America growing 26.4%. PayTV was the fastest-growing segment with an annual increase of 33.1%, with broadband accesses expanding 15.6% and the number of landlines 3.4%.

24M RGUs Brazil, more than in Mexico

At the end of the period we had 23.6 million RGUs in Brazil, 22.8 million in Mexico, 5.8 million in Central America and the Caribbean and 3.5 million in Colombia.

Fixed-Line and Other Accesses (RGUs) as of December 2011

América Móvil Consolidated Results

In spite of the increased uncertainty experienced worldwide in the last quarter of 2011 with high financial volatility stemming from the European crisis and a still weak U.S. economy, the tone of the Latin American markets continued to be strong throughout the end of the year even in the face of what appeared to be slowing economic activity in most of the South American block. América Móvil thus posted a 13.0% increase in gross wireless subscriber additions in that quarter relative to the prior year—hitting a record in Brazil at nearly 10 million and continuing strong in Mexico with 9.1 million—continuing to make inroads in the postpaid segment in all operations.

**Wireless
 revenues+15%
 YoY**

Our fourth quarter revenues totaled 182 billion pesos and were 12.3% higher than in the year-earlier quarter, with wireless revenues—which expanded 15.4% year-on-year—accounting for almost two thirds of the total. The quarter’s figures reflect the impact of the sharp depreciation in the quarter of the Mexican peso vis-à-vis the dollar (11%) and most Latin American currencies, the Argentinean peso being the only exception. When expressed at constant exchange rates, and after adjusting for certain reclassifications corresponding to 2010, the quarter’s revenues increased 8.6% from the year before.

**Wireless data revenues
 +27% YoY**

Revenue growth was led by mobile data services that rose 27% year-on-year at constant exchange rates with every single region where we operate posting strong numbers. Fixed broadband revenues followed with 15%, while PayTV revenues exhibited a 48% annual increase albeit from a small base. Every single product line in the South American block experienced solid revenue growth while in Mexico a 5% decline in mobile voice revenues arising from the 70% effective reduction in mobile termination rates was added to the ongoing decline in fixed-line revenues. Our geographical and product diversification has served us well by providing a more stable base of revenues.

EBITDA of MXP 65Bn

EBITDA of 64.5 billion pesos in the fourth quarter was up 3.9% from a year before, with strong increases in the Andean countries helping offset small declines in some other countries, including Mexico and Brazil (derived, partly, from the interconnection rate reductions in the former and the costs associated to growth of our wireless and PayTV base in the latter). EBITDA was held back somewhat both by subscriber acquisition costs that remained high in the wireless and PayTV space, and by expenses associated with our vast investment program, since we do not capitalize all expenses.

Operating profit +15% YoY	Our fourth quarter operating profit came in at 38.3 billion pesos, having increased 15.1% from the prior year helped along by a 9.7% reduction in depreciation charges. The latter resulted from our having booked extraordinary charges at the end of 2010 in various countries, as we began to integrate the fixed and mobile platforms following the acquisition of Telmex Internacional.
Net income down YoY	The depreciation of the peso in the last quarter and the increase in net debt arising from our share buybacks and the purchases of stock of Telmex, Telmex Internacional, Net Serviços and StarOne brought about an increase in our comprehensive financing costs, which totaled 11.1 billion pesos in the quarter. These, in turn, were an important factor in the reduction of our net income to 16.3 billion pesos.
Capex of MXP 121Bn	Our net debt rose to 321 billion pesos in December from 207 billion at the close of 2010 to help fund 70 billion pesos in stock purchases and 54 billion pesos in share buybacks. Our cash flow from operations more than covered our capital expenditures of 121 billion pesos and dividends of 17 billion.

Churn period reduced

In October we adopted a more conservative reporting methodology for wireless subscribers in Mexico. We reduced the churn period to effectively report as active subscribers only those prepaid clients who have made an air-time recharge over a given period. Pursuant to the new reporting conditions, our fourth quarter figures reflect 2.3 million disconnections taking our wireless subscriber base to 65.7 million, 2.4% above last year's. Notwithstanding the methodological change, our commercial activities remain strong having registered 9.1 million gross additions in the quarter, 8.6% more than in the same period of the prior year.

4.8M lines with mobile broadband

We continue to perform well in the postpaid segment, with postpaid net subscriber additions in the period nearly as high as those of the previous year, leading to a 17.3% annual increase in our postpaid base to 7.5 million subs. The adoption of 3G - enabled devices continues at a rapid pace: we already service 4.8 million lines with full broadband connectivity.

Net gains from MNP

Corroborating the preference of consumers, we continue to be a net gainer from number portability, with 251 thousand ported-in lines during the last three months of 2011.

4Q revenues up 3.4% YoY

Our fourth quarter revenues totaled 68.3 billion pesos, exceeding by 3.4% those of the prior year. Wireless revenues represented 60% of that figure. Net wireless service revenues (after commissions paid to distributors) rose 3.1% whereas fixed-line revenues were up 2.4%. The latter increases were both driven by data revenues since voice revenues were down on both

platforms, as the ongoing reduction in fixed-line voice revenues was now accompanied by that in mobile voice revenues brought about by the sharp reduction of mobile termination rates. Resulting from the 20% reduction in the average price per minute of voice, MOUs were up 7.7% relative to a year before and reached 235 minutes per sub, the highest in Latam.

**EBITDA margin down
3.3% YoY**

The EBITDA of our Mexican operations declined 3.3% from the last quarter of 2010, to 32.8 billion pesos. It represented 48% of total revenues. The reduction had to do with the increase of subscriber acquisition costs—mostly to do with the 9% increase in gross subscriber additions and the depreciation of the peso—the increase in network maintenance and service costs in the two platforms and the impact from lower mobile termination rates.

New promotions in Mexico

In February Telcel launched a new promotion by which any postpaid plan may be increased by 200 minutes per month for a 100-peso additional charge—including tax—in the corresponding monthly rent. When adjusted by the OECD's purchasing power parity exchange rates (PPP), prices per minute in Mexico rank as the third lowest in the OECD.

**Low prices for broadband
upgrades**

Also in February Telmex offered its broadband clients prices ranging between USD 3.81 and USD 1.53 dollars equivalent for each additional megabit per second (Mbps) in the upgrade of their existing plans by 2, 5 or 10 Mbps. The resulting prices per Mbps are up to 87% lower than those erroneously quoted by the OECD in a recent report.

Argentina, Paraguay and Uruguay

Net adds triple YoY

Our combined operations in Argentina, Paraguay and Uruguay added 621 thousand clients in the quarter—three times more than those obtained the prior year—and finished December with 20.7 million wireless subscribers, 5.6% more than in 2010 with postpaid subscribers growing nearly twice as fast. We also had 306 thousand fixed RGUs, up 41.4% year-on-year driven by broadband services.

4Q Revenues 17% YoY

Revenues for the quarter totaled 3.2 billion Argentinean pesos, having risen 17.4% from a year before. Wireless net servicerevenue growth was slightly higher at 18.0%, with data growing 21.4%. Fixed-line revenues expanded 16.7% mostly on account of increases in long distance revenues.

EBITDA margin at 37.1%

Our fourth quarter EBITDA of 1.2 billion Argentinean pesos was up 4.4% and was equivalent to 37.1% of revenues. The margin was down as a result of higher subscriber growth and certain operating costs that have grown faster than our revenues.

Full year revenues up 20%

For the full year 2011, revenues came in at 11.9 billion Argentinean pesos and EBITDA at 4.8 billion Argentinean pesos, exceeding by 19.9% and 13.9% respectively the figures for 2010.

HSPA+ services

We launched HSPA+ services in the region, substantially increasing data transmission speeds for our 3G clients.

2.9M net adds in 4Q

Our wireless subscriber base finished December with 60.4 million wireless subscribers—16.9% more than a year before—after adding 2.9 million clients in the quarter and 8.7 million in the full year. In the postpaid segment we gained 597 thousand subs in the quarter taking the total for 2011 to 2.4 million, 54.2% more than a year before. Our postpaid subscriber base reached 12.7 million, representing an annual increase of 23.7%.

10M PayTV accesses

On the fixed-line platform we ended the year with 23.6 million fixed RGUs, an increase of 26.8% relative to 2010. We added 846 thousand PayTV accesses in the quarter and 2.9 million in the full year to end December with close to 10 million clients, 41.6% more than a year before, whereas broadband accesses climbed 23.6%.

Mobile data revenues+29% YoY

Our fourth quarter revenues, 5.9 billion reais, were 6.3% higher than a year before, with wireless net service revenues (after commissions paid to distributors) increasing 4.6% and fixed-line revenues—which account for 52% of the total—growing 7.8%. Mobile data revenues expanded 28.6% and fixed broadband revenues 15.6%, whereas those coming from PayTV services rose 83.9%.

EBITDA at 1.3 billion reais

The quarter's EBITDA was down 2.2% to 1.3 billion reais and was equivalent to 22.8% of revenues. The decline in margins was derived from an increase in costs of content, greater maintenance charges—including costs related to the expansion of the network which are not accounted for as Capex—as well as higher operating costs mostly linked to improvements in customer care and the costs associated to growing our wireless base, for the most part, in the postpaid segment.

**EBITDA margin at
 26.2%**

Revenues for the year exceeded those of the prior year by 6.9%, reaching 22.8 billion reais. Wire-line revenues increased 8.4% and those derived from wireless 5.4%. EBITDA for 2011 was just shy of six billion reais, with the EBITDA margin at 26.2%.

**HSPA+ networks in
 Brazil**

We continue to expand our 3G footprint, and we have upgraded our network to HSPA+. This technology allowed us to, on average, triple the data transmission speed of our wireless data users. Greater capacity was instrumental to increase our data ARPU by 9.1% over the prior year and our MOU by 13.6% to 109 minutes per subscriber. In addition to this, and to improve the experience of our clients, we opened 60 new Customer Care Centers throughout the country.

Colombia

29M subs in Colombia

After adopting more conservative churn policies in Colombia, we trimmed 2.4 million wireless subscribers in the quarter, to 28.8 million clients, 1.5% less than a year before. We will not consider clients that have not made any air-time recharge during a given period. On the fixed-line platform we ended the period with 3.5 million RGUs, 18.8% more than the year before; broadband accesses showed the fastest growth rate: 42.5%.

4Q revenues +18% YoY

Our fourth quarter revenues were up 18.0% annually to 2.4 trillion Colombian pesos. Wireless revenues rose 16.1% powered by data revenue growth of 29.1%. Fixed-line revenues increased 25.7% mostly on the back of voice revenues. Total revenues for 2011 were 8.7 trillion Colombian pesos; they were up 14.5% year-on-year.

RGUs +21% YoY	We added 176 thousand new clients in the fourth quarter bringing the total for the year to 666 thousand. Our wireless subscriber base ended December with 5.5 million wireless subscribers, 13.7% more than the year before; our postpaid subscriber base was up 29.7%. Our fixed-line RGUs rose 21.1% year-on-year and surpassed the one million mark.
4Q Wireless revenues +19% YoY	Revenues for the quarter were up 14.7% year-on-year to 146.3 billion Chilean pesos. Wireless revenues representing just over two thirds of total revenues rose 18.7% on the back of a 35.3% increase in data revenues. On the fixed-line platform, the quarter's revenues increased 12.1% mostly on account of broadband and PayTV growth.
2011 EBITDA margin at 11%	We obtained EBITDA of nearly five billion Chilean pesos in the fourth quarter with a margin of 3.4%. EBITDA was down from the year before mostly on account of expenses related to investments directed towards the expansion and integration of the networks.
Full year revenues up 17%	Total revenues for the year were 547.9 billion Chilean pesos, exceeding by 17.3% those obtained in 2010, while EBITDA for the full year came in at 43.7 billion Chilean pesos, 21.3% higher than the one registered the year before.

Ecuador

332K postpa id net adds In accordance with the change in methodology for reporting active subscribers in Ecuador, we reduced by 151 thousand clients our subscriber base in the fourth quarter bringing our net additions for the full year to 433 thousand, 332 thousand of them postpays. We finished December with 11.1 million

in 2011 wireless subscribers, up 4.1% year-on-year, while our postpaid subscriber base increased 25.1%. Our fixed RGUs expanded 60.8% to 174 thousand by year-end, as the number of fixed-lines rose 84.6% and that of broadband and PayTV subscribers increased nearly 50%.

Wireless service revenues +10% YoY Fourth quarter revenues of 367 million dollars exceeded by 8.6% those of the last quarter of 2010. Wireless service revenues were up 10.4% annually, with data revenues growing somewhat faster. Fixed-line revenues increased 28.4%.

4Q EBITDA +15% YoY Our EBITDA for the quarter of 210 million dollars was equivalent to 57.1% of revenues. It was up 15.0% relative to the same period of the prior year with the EBITDA margin rising 3.2 percentage points.

Full year revenues up 14% Total revenues for 2011 were 1.4 billion dollars and EBITDA 773 million dollars. They were up 14.2% and 17.4%, respectively. The margin for the year climbed 1.6 percentage points to 55.1%.

Gains from MNP We registered around 17 thousand net ported-in lines during 2011. Claro has main-tained a positive balance since number portability was implemented in 2009 by virtue of our superior coverage and quality that has granted us the preference of consumers.

Net adds +27% YoY	Net additions for the period, 498 thousand, were 27.1% higher than those of the year before; a third of the quarter's additions was postpaid. We finished the year with 11.3 million wireless subscribers; 16.2% more than at the end of 2010, with our post-paid base increasing 51.4%. On the fixed-line platform, RGUs soared 58.3% over the precedent year to 690 thousand as voice accesses more than doubled over the period.
Wireless data revenues + 51% YoY	Our fourth quarter revenues totaled 951 million soles, surpassing by 11.5% those of the same period of last year. Wireless revenues increased 11.0% led by data revenues that surged 50.9%. Fixed line revenues, which account for only 15% of the total, were up 17.7% year-on-year.
EBITDA margin +4.6pp to 46.7%	Our EBITDA for the quarter totaled 444 million soles and was up 23.7% annually. The EBITDA margin stood at 46.7% of revenues, as the margin climbed 4.6 percentage points from the year-earlier quarter.
Full year revenues up 15%	2011 revenues of 3.6 billion soles were 14.8% higher than a year before with wireless service revenues and fixed revenues growing at a some what high errate. EBITDA for the year increased 21.6% to 1.7 billion soles. It was equivalent to 46.5% of revenues, 2.6 percentage points more than a year before.
Decline in MTRs	The telecom regulator determined that beginning in December 30th, the fixed-to-mobile rate was to be reduced from 0.78 soles on average to around 0.30 soles per minute.

Central America and the Caribbean

19M subs Our wireless subscriber base increased 6.4% over the year to finish December with 18.5 million subscribers in Central America and the Caribbean. This figure incorporates net additions of 503 thousand in the fourth quarter, a period when we started our operations in Costa Rica, completed the acquisition of Digicel's operations in Honduras, and sold our operation in Jamaica. On the fixed-line platform we had 5.8 million RGUs, 7.6% more than in 2010, as PayTV accesses jumped 30.5% from the year-earlier quarter.

Wireless data revenues + 66% YoY Fourth quarter revenues of 946 million dollars were up 5.7% year-on-year, with wireless service revenues rising 14.4% buoyed by 65.8% data revenue growth. Fixed-line revenues declined 4.0%, as the increase in PayTV and broadband revenues was not sufficient to fully compensate for the decline in fixed voice revenues.

4Q EBITDA margin of 26.8% EBITDA for the quarter was 253 million dollars, equivalent to 26.8% of revenues. This figure already reflects the costs associated with the launch of our operations in Costa Rica and to a lesser extent, to the integration of our recently acquired operation in Honduras that had reported losses.

'11 revenues up 5% YoY Revenues in 2011, 3.7 billion dollars, exceeded by 4.5% those of 2010 as wireless service revenues rose 12.1%. EBITDA of 1.1 billion dollars was practically flat from the year before.

493K net adds in 4Q	Tracfone added 493 thousand subscribers in the fourth quarter and more than two million in the year to finish 2011 with 19.8 million clients, an increase of 11.3% in the period.
4Q Revenues + 31% YoY	Our fourth quarter revenues topped one billion dollars. They were 30.9% higher than those of the year-earlier quarter, as ARPU rose 14.6% over the year and MOUs were just shy of 400 minutes per subscriber, up 32.0%, reflecting the greater weight of the StraightTalk plans within our commercial offerings.
EBITDA doubles YoY	The quarter's EBITDA more than doubled that of the prior year and came in at 77 million dollars. The EBITDA margin for the period climbed 3.1 percentage points to 7.4%.
'11 EBITDA up 28%	Full year revenues were up 35.3% to 3.8 billion dollars while EBITDA rose 27.9% to 334 million dollars. The EBITDA margin was equivalent to 8.8% of revenues.

Glossary of Terms

ARPU – Average Revenue per User. The ratio of service revenues in a given period to the average number of wireless subscribers in the same period. It is presented on a monthly basis.

ARPM- Average Revenue per Minute. The ratio of service revenues to airtime traffic.

Capex – Capital Expenditure. Accrued capital expenditures related to the expansion of the telecommunications infrastructure.

Churn – Disconnection Rate. The ratio of wireless subscribers disconnected during a given period to the number of wireless subscribers at the beginning of that period.

EBIT – Earnings Before Interest and Taxes, also known as Operating Profit.

EBIT margin – The ratio of EBIT to total operating revenue.

EBITDA– Earnings Before Interest, Taxes, Depreciation, and Amortization.

EBITDAmargin – The ratio of EBITDA to total operating revenue.

EDGE – Enhanced Data rates for GSM Evolution. A technology that gives GSM the capacity to handle data services for the third generation mobile telephony.

EPS (Mexican pesos) – Earnings per share. Total earnings in Mexican pesos divided by total shares.

Earnings per ADR (US\$) – Total earnings in U.S. dollars divided by total ADRs equivalent.

Equity subscribers – Subscribers weighted by the economic interest held in each company.

GSM – Global System for Mobile communications. It is the world's leading and fastest growing mobile standard.

GPRS – General Packet Radio Service. Enables GSM networks to offer higher capacity, Internet-based-content and packet-based data services. It is a second generation technology.

Gross additions – Total number of subscribers acquired during the period.

Licensed pops – Licensed population. Population covered by the licenses that each of the companies manage.

Market share – A company's subscriber base divided by the total number of subscribers in that country.

MOU – Minutes of Use per subscriber. The ratio of wireless traffic in a given period to the average number of wireless subscribers in that same period. It is presented on a monthly basis.

Net subscriber additions – The difference in the subscriber base from one period to another. It is the different between gross additions and disconnections.

Net debt – Total short and long term debt minus cash and marketable securities.

Net debt / EBITDA– The ratio of total short and long term debt minus cash and securities to trailing 12-month income before interest, taxes, depreciation and amortization.

Prepaid – Subscriber that may purchase airtime to recharge a cellular phone. The client does not hold a contract with the company for voice and data services.

Postpaid – Subscriber that has a contract for the use of airtime. The client has no need of activating airtime, it is done so immediately.

Push-to-talk – Enables compatible mobile phones to function like two-way radios.

SMS – Short Message Service.

SAC – Subscriber Acquisition Cost. The sum of handset subsidies, marketing expenses and commissions to distributors for handset activation. Handset subsidy is calculated as the difference between equipment cost and equipment revenues.

Wireless penetration – The ratio of total wireless subscribers in any given country divided by the total population in that country.
