SÃO PAULO, FEBRUARY 17, 2012 – GOL Linhas Aéreas Inteligentes S.A. (BM&FBovespa: GOLL4 and NYSE: GOL), (S&P/Fitch: BB-/BB-, Moody`s: B1), the largest low-cost and low-fare airline in Latin America, recorded total demand growth of 12.1% in January over December, accompanied by a total load factor of 70.4%.

DEMAND

GOL's domestic demand grew by 10.3% in January over the previous month, chiefly due to the higher volume of domestic passenger traffic during the school vacation season.

Also in comparison with December 2011, the Company's international demand increased by 33.5% resulting on the rational addition of supply on the international market and the school vacations.

SUPPLY

International supply increased by 2.2% over December, primarily due to the addition of new international flights in the high season to Punta Cana in the Dominican Republic.

High **aircraft productivity** (around 13.5 block-hours per day, versus 13.3 block-hours per day in December 2011), helped push up domestic supply by around 7%.

GOL's total supply climbed by 3.2% in the monthly comparison, mainly due to the school vacations and the rational addition of supply on the international market.

LOAD FACTOR AND YIELDS

GOL's total load factor came to 70.4% in January, 5.5 p.p. up on the previous month.

January's yields ranged between 21.1 and 21.6 cents (R\$), 4% higher than in January 2011 and flat over the previous month.

Since the change in the industry's behavior at the end of the second half of 2011, yields have recorded a progressive improvement, mainly on the major domestic routes, which are largely composed of business passengers. The Company expects this scenario to continue in 2012.

WEBJET

Webjet's load factor remained in line with its business proposal.

The following table presents Webjet's own numbers and its numbers consolidated with those of GOL in January 2011.
