Economic Scenario

The outlook for global economic activity is one of moderate and volatile growth, pushed by the emerging nations. The United States continues to stand out among the mature economies and should record growth similar to that in 2012. In March, the global manufacturing Purchasing Managers Index (PMI) moved up for the third consecutive month, reaching 51.2 points, versus 50.9 in February.

According to the figures released in April, the IMF expects global growth of 3.3% in 2013, slightly higher than the 3.2% recorded last year.

USA

U.S. GDP grew by an annualized 2.5% in 1Q13, versus 0.4% in 4Q12. According to the FED, industrial production recorded annualized growth of 5.0% at the end of the first quarter, the highest figure since 1Q12, accompanied by capacity utilization of 78.5%. The manufacturing PMI recorded 51.3 points in March, moving up for the fourth consecutive month.

Thanks to controlled inflation, the FED is able to maintain its policy of stimulating the economy by keeping interest rates down, projecting for 2013 GDP growth between 2.3% and 2.8%.

Europe

Eurozone GDP is expected to shrink in 2013, not only in the peripheral nations but also in the central ones, despite moderate growth forecasted for certain countries, such as Germany. The European Central Bank expects a decline on GDP between 0.1% and 0.9% for the year as a whole, albeit with a gradual recovery in economic activity in the second half, driven by improved exports, although domestic demand is likely to remain sluggish.

The manufacturing industry continued to fall in March with deteriorating business conditions, and the manufacturing PMI recording 46.8 points, the lowest level in three months, remaining

below expansion since August 2011.

Eurozone unemployment averaged 12.1% in March, in line with February's figure, equivalent to 19 million people out of work. Greece and Spain recorded the highest rate, around 27%, versus 5.4% in Germany.

In the UK, first-quarter GDP edged up by 0.3% over 4Q12, when it dipped by the same amount. Annualized inflation remained at 2.8% in March, the highest figure since May 2012, and the Bank of England expects inflation to reach 3% in 2013, remaining above the target of 2% until the beginning of 2016.

Asia

In China, positive highlights were manufacturing PMI, which stood at 51.6 points in March, higher than the 50.4 points in February and the fifth consecutive monthly upturn, together with industrial output and retail sales, which climbed in 1Q13 by 9.5% and 10.3% in relation to the same period in 2012.

Despite the favorable figures, the growth of the Chinese economy presents signs of a slight slowdown. First-quarter GDP moved up by 7.7% over 1Q12, less than the year-on-year upturn of 7.9% recorded in 4Q12. For 2013, the country's Central Bank is maintaining its GDP growth target of 7.5%.

In Japan, some indicators are pointing to an improvement in economic activity. In January, industrial production inched up by 0.3%, while consumer confidence recorded 44.3 points in February, the highest figure since the beginning of 2007. Fueled by the expansionist policy and the recent depreciation of the yen, the recovery of exports had a positive impact on manufacturing PMI, which reached 50.4 points in March, the first expansion since May 2012.

Brazil

For 2013, the Central Bank's FOCUS report expects GDP growth of 3%, pulled by household consumption, low unemployment and the increase in average real earnings. However, growth is not diffused throughout the entire economy, with highlight for the demand in the services sector.

First-quarter industrial output grew by 0.8% over the previous three months, while in the last twelve months it recorded a decline of 2.0%.

Inflation measured by the IPCA consumer price index recorded 6.59% in the 12 months through March 2013, exceeding the target of 6.50% set by the Monetary Policy Committee (COPOM). This contributed for the COPOM to raise the Selic base rate to 7.50% at its last meeting in April.

On the foreign exchange front, the real appreciated by 1.5% against the U.S. dollar in 1Q13, closing March at R\$2.01/US\$, while foreign reserves totaled US\$377 billion.

Adoption of IFRS 10/11

As of January 1, 2013, the Company adopted IFRS 10 – Consolidated Financial Statements, corresponding to CPC 36 (R3) *Demonstrações Financeiras Consolidadas*, approved by the CVM in December 2012, and IFRS 11 – Joint Arrangements, corresponding to CPC 19 (R2) - *Negócios em Conjunto*, approved by the CVM in November 2012. As a result, given that the proportional consolidation method is no longer permitted, the Company has ceased to consolidate its jointly-owned subsidiaries Namisa, MRS Logística and CBSI, and now accounts for them under the equity method. The main impacts are on net revenue, cost of goods sold, gross profit, financial result, equity result and net income. For comparability purposes, the consolidated financial statements for the quarters ended March 31, 2012 and December 31, 2012 were reclassified to reflect this alteration.

Net Revenue

CSN recorded consolidated net revenue of R\$3,642 million in 1Q13, 18% down on the R\$4,444 million recorded in 4Q12, mainly due to lower iron ore sales.

Cost of Goods Sold (COGS)

In 1Q13, consolidated COGS came to R\$2,852 million, 14% less than the R\$3,315 million posted in the previous quarter, also mainly due to lower iron ore sales.

Selling, General, Administrative and Other Operating Expenses

SG&A expenses totaled R\$311 million in the first quarter, 21% down on the R\$395 million recorded in 4Q12, essentially due to lower iron ore freight costs.

In 1Q13, the "Other Operating Expenses" totaled R\$95 million, 34% down on the other expenses of R\$145 million posted in 4Q12, chiefly due to the reduction in corporate expenses.

The Company uses Adjusted EBITDA to measure the performance of its various segments and their operating cash flow generation capacity. It comprises net income before the net financial result, income and social contribution taxes, depreciation and amortization, equity income and other operating revenue (expenses). However, although it is used to measure segment results, EBITDA is not a measure recognized by Brazilian accounting practices or International Financial Reporting Standards (IFRS), has no standard definition and therefore should not be compared to similar indicators adopted by other companies.

Adjusted EBITDA considers the Company's proportional interest in Namisa, MRS Logística and CBSI and is on a comparable basis with the amounts published in 2012.

Adjusted EBITDA totaled R\$902 million in 1Q13, 26% down on 4Q12, chiefly due to the contribution from the mining, steel, logistics and energy segments.

The adjusted consolidated EBITDA margin stood at 25% in 1Q13, 2 p.p. less than in 4Q12.

Financial Result and Net Debt

The 1Q13 net financial result was negative by R\$527 million, chiefly due to the following factors:

- § Interest on loans and financing totaling R\$480 million;
- § Expenses of R\$6 million with the monetary restatement of tax payment installments;
- § Monetary and foreign exchange variations of R\$31 million, including the result of derivative operations;
- § Other financial expenses totaling R\$48 million.

These negative effects were partially offset by consolidated financial revenue of R\$38 million.

Gross debt, net debt and the net debt/EBITDA ratio presented below reflect the Company's proportional interest in Namisa, MRS Logística and CBSI and are on a comparable basis with the amounts published in 2012.

On March 31, 2013, consolidated net debt stood at R\$16.2 billion, R\$0.5 billion more than the R\$15.7 billion recorded on December 31, 2012, essentially due to the following factors:

- § Dividend payments totaling R\$0.3 billion;
- § Investments of R\$0.5 billion in fixed assets;

§ A R\$0.5 billion effect from disbursements related to debt charges;

§ Exchange variation of R\$0.1 billion.

These effects were partially offset by adjusted EBITDA of R\$0.9 billion.

The net debt/EBITDA ratio closed the first quarter at 3.75x, based on LTM adjusted EBITDA.

Equity Result

The effect of equity result on the Company's consolidated income statement totaled R\$17 million in 1Q13, due to the adoption of IFRS 10 (CPC 36) and IFRS 11 (CPC 19).

Consolidated Net Income

CSN posted consolidated net income of R\$16 million in 1Q13 due to the operating results described above.

Investments reflect the Company's proportional interest in Namisa, MRS Logística and CBSI and are on a comparable basis with the amounts published in 2012.

CSN invested R\$509 million in 1Q13, R\$280 million of which in the parent company, mostly in the following projects:

- ü Expansion of the Casa de Pedra mine and Itaguaí Port: R\$54 million;
- ü Construction of the long steel plant: R\$101 million.

The remaining R\$229 million went to subsidiaries and joint subsidiaries, as follows:

- ü Transnordestina Logística: R\$82 million;
- ü MRS: R\$61 million;
- ü Namisa: R\$2 million.

Working capital closed 1Q13 at R\$1,666 million, R\$17 million up on the R\$1,649 million recorded at the end of 2012, chiefly due to increased inventories, partially offset by the reduction in accounts receivable. The average inventory turnover period increased by four days, while the average supplier payment and receivables period fell by three days and two days, respectively.

In the last 12 months, working capital fell by R\$783 million, basically due to the increase in the suppliers line, thanks to improved payment management and the reduction in accounts receivable.

Scenario

According to the World Steel Association (WSA) global crude steel production totaled 389 million tonnes in 1Q13, 6% higher than in 4Q12, with China being responsible for 192 million tonnes, 10% up in the same period and a new record.

Existing global capacity use increased from 73% in December 2012 to 79% in March 2013. In this scenario, the WSA expects global apparent steel consumption of 1.45 billion tonnes in 2013, 2.9% more than the year before, with China accounting for 669 million tonnes, 3.5% more than in 2012 and 46% of the total.

According to the Brazilian Steel Institute (IABr), domestic crude steel production came to 8.3 million tonnes in 1Q13, 4% down year-on-year, while rolled flat output totaled 3.6 million tonnes, up by 1%.

Apparent domestic flat steel consumption amounted to 3.2 million tonnes in the first quarter, 4% down on 1Q12. Domestic sales of 2.9 million tonnes moved up by 2%, while imports of 0.4 million tonnes fell by 36%. On the other hand, exports climbed by 73% to 0.5 million tonnes.

The IABr expects domestic sales growth of 7.7% in 2013, fueled by various government measures, and apparent steel consumption of 26.4 million tonnes, 4.3% more than in 2012.

Automotive

According to ANFAVEA (the Auto Manufacturers' Association), vehicle production totaled 828,000 units in 1Q13, 12% up on 1Q12, with sales of 830,000 units, up by 1.5%.

In April, the government opted to extend the IPI tax reduction on vehicle sales until the end of 2013, aiming at encouraging consumption. FENABRAVE (the Vehicle Distributors' Association) expects car and light commercial vehicle sales to increase by 3.0% in 2013, while ANFAVEA

estimates growth of between 3.5% and 4.5%.

Construction

According to ABRAMAT (the Construction Material Manufacturers' Association), sales of building materials increased by 1.7% year-on-year in 1Q13.

ABRAMAT estimates annual sales growth of 4.5% in 2013, sustained by the policy of encouraging household consumption, the maintenance of employment and earnings levels and increasing investments in infrastructure.

Home Appliances

Sales of white goods between December 2012 and February 2013 increased by an average of 22.6% over the same period the year before, benefiting from the reduction in the IPI tax, which the government is expected to extend until June 2013 in order to maintain sector activity.

Eletros (the Home Appliance and Consumer Electronics Manufacturers' Association) expects home appliance sales to move up by 9% in 2013.

Distribution

According to INDA (the Brazilian Steel Distributors' Association), domestic flat steel sales by distributors totaled 1.0 million tonnes in the first quarter, 5% down on 4Q12 and 3% less than in 1Q12.

Purchases by the associated network reached 1.1 million tonnes in 1Q13, flat over 4Q12 and 1Q12. Inventories closed March at around 1.0 million tonnes, 3% higher than in February, with a turnover of 2.8 months.

INDA expects flat steel sales by distributors to grow by between 5% and 6% in 2013.

Sales Volume

CSN sold 1.6 million tonnes of steel in 1Q13, 3% more than in 4Q12 and a new first-quarter record. Of this total, 77% was sold on the domestic market, 21% by overseas subsidiaries and 2% went to direct exports.

Domestic Sales Volume

Domestic sales totaled 1.2 million tonnes, 2% up on the 4Q12 figure.

Foreign Sales Volume

Foreign sales totaled 362,000 tonnes of steel products in 1Q13, 6% up on the previous quarter. Of this total, the overseas subsidiaries sold 327,000 tonnes, 189,000 of which by SWT. Direct exports came to 35,000 tonnes.

Prices

Net revenue per tonne averaged R\$1,867 in 1Q13, 1% higher than the 4Q12 average of R\$1,849.

Net Revenue

Net revenue from steel operations totaled R\$2,947 million, 4% up on 4Q12, chiefly due to higher sales volume.

Cost of Goods Sold (COGS)

Steel segment COGS stood at R\$2.456 million in 1Q13, 7% more than the previous quarter, due to higher sales volume and the use of slabs acquired from third parties.

Adjusted EBITDA

Adjusted steel segment EBITDA totaled R\$528 million in 1Q13, 6% down on 4Q12, basically due to the factors mentioned above, accompanied by an adjusted EBITDA margin of 18%.

Production

The Presidente Vargas Steelworks (UPV) produced 1.0 million tonnes of crude steel in 1Q13. In the same period, slab purchases from third parties came to 118,000 tonnes and rolled steel output totaled 1.1 million tonnes.

Production (in thousand t)	1Q13	4Q12	1Q12	Change	
				1Q13 x 4Q12	1Q13 x 1Q12

Production Costs (Parent Company)

In 1Q13, the Presidente Vargas Steelworks' total production costs came to R\$1,671 million, R\$47 million less than in 4Q12, with the following variations:

- **Raw Materials:** reduction of R\$21 million, due to the decline in steel production, which reduced raw material consumption;
- **Labor:** reduction of R\$11 million;
- **Other Production Costs:** decline of R\$9 million;
- **Depreciation:** reduction of R\$6 million.

Scenario

In 1Q13, the seaborne iron ore market was marked by record steel output in China. Strong iron ore demand by the Chinese steel plants at the beginning of the year, together with reduced seaborne supply helped push up prices. In the first quarter the Platts Fe62% CFR China index averaged US\$148.40/dmt, 21% up on the previous three months.

The iron-ore quality premium hovered between US\$2.30 and US\$2.70/dmt per 1% of Fe content, while freight costs on the Tubarão/Qingdao route averaged US\$17.81/wmt.

In 1Q13, Brazilian exports accounted for 27.5% of the seaborne market, totaling 68 million tonnes, 30.3% less than in the previous three months.

Iron Ore Sales

In 1Q13, sales of finished iron ore products totaled 4.1 million tonnes, 35% less than in the previous quarter, all of which was sold abroad. Of this total, 2.2 million tonnes were sold by Namisa¹.

Considering CSN's 60% interest in Namisa, consolidated iron ore sales came to 3.3 million tonnes, 43% down on 4Q12.

The Company's own consumption stood at 1.3 million tonnes.

¹ Sales volumes include 100% of the stake in NAMISA.

Net Revenue

Net revenue from mining operations totaled R\$747 million in 1Q13, 43% less than in 4Q12, due to the reduction in sales volume, partially offset by the upturn in iron ore prices.

Cost of Goods Sold (COGS)

Mining COGS came to R\$454 million in 1Q13, 41% down on 4Q12, chiefly due to the reduction in sales volume.

Adjusted EBITDA

Adjusted first-quarter EBITDA came to R\$326 million, accompanied by an adjusted EBITDA margin of 44%, identical to the 4Q12 figure.

Scenario

Railway Logistics

According to the ANTF (National Rail Transport Association), Brazil's rail network transported 481 million tonnes of cargo in 2012, 6 million more than in 2011. The concessionaires invested around R\$4.9 billion in the rail system throughout the year, 6.6% up on the year before.

For the next three years, the ANTF expects cargo volume to move up by 24.7%, equivalent to 600 million tonnes, with investments of around R\$16 billion.

CSN is a highly integrated company, with steel, mining, cement, logistics and energy businesses. The Company operates throughout the entire steel production chain, from the mining of iron ore to the production and sale of a diversified range of high value-added steel products, including coated and galvanized, as well as tin plate. Thanks to its integrated production system and exemplary management, CSN's production costs are among the lowest in the global steel sector. CSN recorded consolidated net revenue of R\$16.9 billion in 2012.

The Company uses Adjusted EBITDA to measure the performance of its various segments and their operating cash flow capacity. It comprises net income before the net financial result, income and social contribution taxes, depreciation and amortization, equity income and other operating revenue (expenses). However, although it is used to measure segment results, EBITDA is not a measure recognized by Brazilian accounting practices or international financial reporting standards (IFRS), has no standard definition and therefore cannot be compared to similar indicators adopted by other companies.

Net debt as presented is used by CSN to measure the Company's financial performance. However, net debt is not recognized as a measurement of financial performance according to the accounting practices adopted in Brazil, nor should it be considered in isolation, or as an alternative to net income or the financial result as an indicator of liquidity.
