○ **Total accesses** increased by 4.2% over the third quarter of 2013, totaling 79,823 thousand accesses. Worth of mention is the postpaid segment, which grew by 22.8% y-o-y with 27,183 thousand accesses, increasing the postpaid customer mix to 34.1%, a growth of 5.2 p.p. in the annual comparison.

- **Total market share** came to 28.7% in August (-0.1 p.p. q-o-q). In the **postpaid segment**, Telefônica Brasil achieved 51.8% of net additions in July and August, recording a market share of 41.4% (+0.2 p.p. q-o-q), reflecting the quality differential presented by the Company, which is also the leader in number of terminals with LTE technology, with a market share of 38.5%.
- Telefônica's market share in the **data card** segment was 51.8% in August, 0.4 p.p. down on 2Q14, recording 2.1 p.p. of annual growth. Such growth is mainly leveraged by the differentiated 3G, HSPA+ and nationwide 4G coverage.

- In the **machine-to-machine (M2M)** market, the access base continued to record exceptional performance, reaching 3.2 million customers in September, up 54.7% y-o-y.
- In the third quarter, **mobile net additions** recorded 466 thousand accesses, a growth of 12.3% over the same period last year. Postpaid net additions reached 1,014 thousand accesses in 3Q14, totaling 3,490 thousand in 9M14, 4.6% up y-o-y, representing a share of net additions of 61% from January to August/2014.
- **Data ARPU** grew 16.2% y-o-y in 3Q14, contributing to a stable annual performance of Mobile ARPU, despite MTR reduction in the period. Excluding this regulatory impact, ARPU recorded annual growth of 3.0% in the period.
- The **prepaid customer base** posted annual reduction of 3.4% due to the restrictive disconnection policy applied to inactive clients, and the more intense migration of most active prepaid customers to postpaid plans. These migrations in 2014 are already 20% larger than the registered in 9M13.

Note: In order to better reflect the consolidated performance, revenues are presented after intercompany. In addition, Mobile Net Revenue considers the allocation of long-distance revenue by call origination.

Net mobile revenue grew 3.5% in 3Q14 over 3Q13, fueled by increased data and VAS (Value Added Services) revenue. Mobile service revenue also increased by 3.5% over 3Q13. Excluding the impact of the MTR reduction, 3Q14 mobile net service revenue rose by 6.8% y-o-y.

Access and usage revenue remained virtually stable over 3Q13. This performance reflects the lower contribution from prepaid recharge revenue, due to the country's

economic downturn, mostly offset by the increase in the number of postpaid lines.

Network usage revenue decreased by 27.6% in 3Q14 over 3Q13, mainly due to the 25.0% MTR reduction in February 2014. This reduction would come to 4.7% with the normalization of this effect, impacted by the lower incoming mobile traffic, due to the community effect.

Data and VAS revenue continued to record a good performance in 3Q14, with growth of 20.6% y-o-y, due to the success in data packages and 4G data cards, and the higher penetration of smartphones within our customer base. In 3Q14, data and VAS revenue increased to 37.7% of the net mobile services revenue, up by 5.3 p.p. y-o-y. Considering outgoing revenue only, data and VAS accounted for 42.0% in 3Q14.

SMS revenue decreased by 16.2% y-o-y, reflecting the maturity of the service. However, the q-o-q variation was more controlled (-2.5% q-o-q), due to the adoption of higher value added offers which integrate SMS, voice and data packages.

Mobile internet revenue maintained high level growth, 33.0% up in the y-o-y comparison, and accounting for 59.8% of data revenue in 3Q14. This performance is directly influenced by the strong growth of postpaid and data accesses, especially 3G Plus and 4G plans, and adoption to smartphones handsets, which base registered an increase of 4.4 million in 3Q14. In the individual pure postpaid customer segment, 82% of the customers own smartphones or webphones.

VAS revenues climbed by 7.3% q-o-q and 43.1% y-o-y, influenced by the “Vivo Som de Chamada”, “Vivo Sync” and “Vivo Segurança Online” services, as well as the Education Platform services, which support the high growth pace.

Other services revenue reached R\$85.9 million, 3.3 times higher than in 3Q13, chiefly due to the sale of non-telecom-related financial products, mainly insurance, and the recurring recovery of taxes on disputed invoices.

Mobile handset revenue increased 4.9% over 2Q14 and 2.7% over 3Q13, with the postpaid customer base growing by 23%, reflecting the rationality of the policy of subsidies currently granted only in sales of handsets to postpaid clients with 4G data plans.

- **Fixed voice total accesses** grew 3.5% over the previous year, totaling 15,614 thousand accesses in 3Q14, influenced by a better performance in the fixed voice and TV segments.
- **Fixed voice accesses** increased by 2.9% y-o-y, totaling 10,939 thousand in 3Q14, while corporate accesses were 2.1% higher than the previous year. The performance in the residential segment is due to the fixed wireless solutions sales, chiefly outside the state of São Paulo. At the end of 3Q14, the FWT customer base reached 908 thousand accesses, 10.6% up on 2Q14.
- **Fixed broadband accesses** recorded 3,947 thousand customers in 3Q14, a growth of 1.6% over 3Q13, with net additions of 17 thousand accesses. In the quarter, 89% of the FTTH gross additions were above 50 Mbps. The FTTH footprint exceeded 3.4 million HPs in September 2014 (2.2 million addressable homes*) and the fiber access base already recorded 322 thousand accesses, 17.9% up on 2Q14.
- **Pay TV accesses** climbed by 26.1% y-o-y, to 728 thousand subscribers in 3Q14, with 40 thousand net additions in the quarter. Worth to mention the client base in IPTV technology, which reached 78 thousand accesses.

**Excludes inoperable areas, vacant buildings and homes that do not fit the targeted public of this technology.*

Note: In order to better reflect the consolidated performance, revenues are presented after intercompany. In addition, Fixed Net Revenue considers the allocation of long-distance revenue by call origination and the allocation of revenue from the FWT solution (“Vivo Fixo”).

Net revenue from the fixed line business fell 3.2% y-o-y, particularly due to fixed to mobile tariff (VC) reduction on February 24, 2014 and the reduction of the basic tariff in accordance with Anatel’s act, in force as of June 04, 2014. Excluding these effects, fixed services net revenue grew by 0.4% in the period.

Voice and accesses revenue decreased by 9.9% over 3Q13, justified by the fixed to mobile substitution, in addition to regulatory impacts. Excluding VC and basic tariff reductions, the variation would be of -3.0% y-o-y.

Network usage revenue decreased by 15.3% over 3Q13 and 5.3% over 2Q14, due to the lower incoming fixed traffic.

Data revenue grew 2.3% y-o-y and 1.1% q-o-q, influenced by the fiercer competition in the broadband segment. To address this issue, the Company has been focusing on the migration of clients to higher speeds, mainly in FTTH, expanding the fiber customer base, which has higher ARPU, lower churn and already totals 322 thousand accesses.

Pay TV revenue grew 23.3% in 3Q14 over 3Q13, due to the fast growth of the DTH and IPTV subscriber base, with an increased adoption of HD packages.

Other services revenue grew by 12.5% y-o-y, reflecting the sale of equipment linked to contracts with large clients. This revenue increased by 3.3% in 9M14 over 9M13.

Operating costs excluding depreciation and amortization expenses totaled R\$6,176.4 million in 3Q14, 1.7% up on 2Q14, and 1.0% down on 3Q13. The strict cost control was mainly driven by the efforts to improve efficiency and business performance, focusing on adding value.

Personnel costs remained under control, with growth of 1.8% y-o-y and 3.3% q-o-q, significantly below inflation. In 9M14, savings came to 1.6%.

The **cost of services rendered** reduced 4.7% in 3Q14 over 3Q13, influenced by MTR reduction in February 2014. Excluding this effect, the increase would be of 1.5%, mainly due to higher site leasing expenses tied to the efforts to ensure quality and increase capacity and coverage, in addition to increased expenses with purchase of TV and mobile content, which grow in line with the increase in the subscriber base and revenues.

Cost of goods sold rose by 1.7% in 3Q14 over 3Q13, following the variation in revenues from the sale of handsets which maintains a restrictive subsidy policy, focused only on the sale of handsets with 4G data plans to postpaid customers.

Selling expenses increased by 5.8% y-o-y, basically influenced by the selling efforts focused on expanding the base of higher value added segments, notably postpaid customers, mobile data, fiber and TV. The annual increase in third-party services was caused by higher commissioning costs, associated with the stronger adoption of data packages and prepaid upselling for contract plans, whose ARPU is higher and churn is lower.

Provisions for bad debt closed 3Q14 at R\$230.5 million, with default levels at 1.8% of total gross revenue (+0.5 p.p. y-o-y), due to current market conditions. Credit and collection criteria have been constantly monitored to keep default under control.

General and administrative expenses fell by 7.5% in 3Q14 over 3Q13, chiefly due to the strict cost control, with savings concentrated in rent and taxes.

Other net operating revenues (expenses) totaled an expense of R\$114.3 million in 3Q14, 25.3% down on 3Q13, justified by the reduced provisions for contingencies in the period.

Ebitda

EBITDA (earnings before interest, taxes, depreciation and amortization) stood at R\$2,547.5 million in 3Q14, 7.0% up on 3Q13, due to increased efficiency in costs, larger mobile access base, besides the improvements in the performance of the fixed-line business. The **EBITDA Margin** reached 29.2%, a y-o-y increase of 1.6 p.p., compared to a margin of 27.6% in 3Q13.
