Prestige Brands Holdings, Inc.
Notes to Consolidated Financial Statements (unaudited)

1. Business and Basis of Presentation

Nature of Business

Prestige Brands Holdings, Inc. (referred to herein as the “Company” or “we”, which reference shall, unless the context requires otherwise, be deemed to refer to Prestige Brands Holdings, Inc. and all of its direct and indirect 100% owned subsidiaries on a consolidated basis) is engaged in the marketing, sales and distribution of over-the-counter (“OTC”) healthcare and household cleaning products to mass merchandisers, drug stores, supermarkets, and club, convenience, and dollar stores in North America (the United States and Canada), and in Australia and certain other international markets. Prestige Brands Holdings, Inc. is a holding company with no operations and is also the parent guarantor of the senior credit facility and the senior notes described in Note 9 to these Consolidated Financial Statements.

Basis of Presentation

The unaudited Consolidated Financial Statements presented herein have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial reporting and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. All significant intercompany transactions and balances have been eliminated in the Consolidated Financial Statements. In the opinion of management, the Consolidated Financial Statements include all adjustments, consisting of normal recurring adjustments, that are considered necessary for a fair statement of our consolidated financial position, results of operations and cash flows for the interim periods presented. Our fiscal year ends on March 31st of each year. References in these Consolidated Financial Statements or related notes to a year (e.g., “2015”) mean our fiscal year ending or ended on March 31st of that year. Operating results for the three and nine months ended December 31, 2014 are not necessarily indicative of results that may be expected for the fiscal year ending March 31, 2015. These unaudited Consolidated Financial Statements and related notes should be read in conjunction with our audited Consolidated Financial Statements and notes thereto included in our Annual Report on Form 10-K for the fiscal year ended March 31, 2014.

Revision

We revised the classification of certain promotional expenses that were incurred in the prior year to correctly present the amounts as a reduction to net sales. The amounts were not material to any of the periods presented.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on our knowledge of current events and actions that we may undertake in the future, actual results could differ materially from these estimates. As discussed below, our most significant estimates include those made in connection with the valuation of intangible assets, stock-based compensation, fair value of debt, sales returns and allowances, trade promotional allowances, inventory obsolescence, and the recognition of income taxes using an estimated annual effective tax rate.

Cash and Cash Equivalents

We consider all short-term deposits and investments with original maturities of three months or less to be cash equivalents. Substantially all of our cash is held by a large regional bank with headquarters in California. We do not believe that, as a result of this concentration, we are subject to any unusual financial risk beyond the normal risk associated with commercial banking relationships. The Federal Deposit Insurance Corporation (“FDIC”) and Securities Investor Protection Corporation (“SIPC”) insure these balances up to \$250,000 and \$500,000, with a \$250,000 limit for

cash, respectively. Substantially all of the Company's cash balances at December 31, 2014 are uninsured.

Accounts Receivable

We extend non-interest-bearing trade credit to our customers in the ordinary course of business. We maintain an allowance for doubtful accounts receivable based upon historical collection experience and expected collectability of the accounts receivable. In an effort to reduce credit risk, we (i) have established credit limits for all of our customer relationships, (ii) perform ongoing credit evaluations of customers' financial condition, (iii) monitor the payment history and aging of customers' receivables, and (iv) monitor open orders against an individual customer's outstanding receivable balance.

Inventories

Inventories are stated at the lower of cost or market value, with cost determined by using the first-in, first-out method. We reduce inventories for diminution of value resulting from product obsolescence, damage or other issues affecting marketability, equal to the difference between the cost of the inventory and its estimated market value. Factors utilized in the determination of estimated market value include: (i) current sales data and historical return rates, (ii) estimates of future demand, (iii) competitive pricing pressures, (iv) new product introductions, (v) product expiration dates, and (vi) component and packaging obsolescence.

Property and Equipment

Property and equipment are stated at cost and are depreciated using the straight-line method based on the following estimated useful lives:

	Years
Machinery	5
Computer equipment and software	3
Furniture and fixtures	7
Leasehold improvements	*

* Leasehold improvements are amortized over the lesser of the term of the lease or the estimated useful life of the related asset.

Expenditures for maintenance and repairs are charged to expense as incurred. When an asset is sold or otherwise disposed of, we remove the cost and associated accumulated depreciation from the respective accounts and recognize the resulting gain or loss in the Consolidated Statements of Income and Comprehensive Income.

Property and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. An impairment loss is recognized if the carrying amount of the asset exceeds its fair value.

Goodwill

The excess of the purchase price over the fair market value of assets acquired and liabilities assumed in purchase business combinations is classified as goodwill. Goodwill is not amortized, although the carrying value is tested for impairment at least annually in the fourth fiscal quarter of each year, or more frequently if events or changes in circumstances indicate that the asset may be impaired. Goodwill is tested for impairment at the reporting unit "brand" level, which is one level below the operating segment level.

Intangible Assets

Intangible assets, which are comprised primarily of trademarks, are stated at cost less accumulated amortization. For intangible assets with finite lives, amortization is computed using the straight-line method over estimated useful lives ranging from 3 to 30 years and these assets are reviewed for impairment whenever events or changes in circumstances indicate that their carrying amounts exceed their fair values and may not be recoverable. An impairment loss is recognized if the carrying amount of the asset exceeds its fair value. Indefinite-lived intangible assets are tested for impairment at least annually in the fourth fiscal quarter of each year, or more frequently if events or changes in circumstances indicate that the asset may be impaired. If the carrying amount of the asset exceeds its fair value, an impairment loss is recognized.

Deferred Financing Costs

We have incurred debt origination costs in connection with the issuance of long-term debt. These costs are capitalized as deferred financing costs and amortized using the effective interest method over the term of the related debt.

Revenue Recognition

Revenues are recognized when the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the selling price is fixed or determinable, (iii) the product has been shipped and the customer takes ownership and assumes the risk of loss, and (iv) collection of the resulting receivable is reasonably assured. We have determined that these criteria are met and the transfer of the risk of loss generally occurs when the product is received by the customer, and, accordingly, we recognize revenue at that time. Provisions are made for estimated discounts related to customer payment terms and estimated product returns at the time of sale based on our historical experience.

As is customary in the consumer products industry, we participate in the promotional programs of our customers to enhance the sale of our products. The cost of these promotional programs varies based on the actual number of units sold during a finite period of time. These promotional programs consist of direct-to-consumer incentives, such as coupons and temporary price reductions,

- 6-

as well as incentives to our customers, such as allowances for new distribution, including slotting fees, and cooperative advertising. Estimates of the costs of these promotional programs are based on (i) historical sales experience, (ii) the current promotional offering, (iii) forecasted data, (iv) current market conditions, and (v) communication with customer purchasing/marketing personnel. We recognize the cost of such sales incentives by recording an estimate of such cost as a reduction of revenue, at the later of (a) the date the related revenue is recognized, or (b) the date when a particular sales incentive is offered. At the completion of a promotional program, the estimated amounts are adjusted to actual results.

Due to the nature of the consumer products industry, we are required to estimate future product returns. Accordingly, we record an estimate of product returns concurrent with recording sales, which is made after analyzing (i) historical return rates, (ii) current economic trends, (iii) changes in customer demand, (iv) product acceptance, (v) seasonality of our product offerings, and (vi) the impact of changes in product formulation, packaging and advertising.

Cost of Sales

Cost of sales includes product costs, warehousing costs, inbound and outbound shipping costs, and handling and storage costs. Shipping, warehousing and handling costs were \$9.2 million and \$26.3 million for the three and nine months ended December 30, 2014, respectively, and \$7.6 million and \$23.3 million for the three and nine months ended December 31, 2013, respectively.

Advertising and Promotion Costs

Advertising and promotion costs are expensed as incurred. Allowances for new distribution costs associated with products, including slotting fees, are recognized as a reduction of sales. Under these new distribution arrangements, the retailers allow our products to be placed on the stores' shelves in exchange for such fees.

Stock-based Compensation

We recognize stock-based compensation by measuring the cost of services to be rendered based on the grant-date fair value of the equity award. Compensation expense is recognized over the period a grantee is required to provide service in exchange for the award, generally referred to as the requisite service period.

Income Taxes

Deferred tax assets and liabilities are determined based on the differences between the financial reporting and tax bases of assets and liabilities using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. A valuation allowance is established when necessary to reduce deferred tax assets to the amounts expected to be realized.

The Income Taxes topic of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") prescribes a recognition threshold and measurement attributes for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The guidance only allows the recognition of those tax benefits that have a greater than 50% likelihood of being sustained upon examination by the various taxing authorities. As a result, we have applied such guidance in determining our uncertainties.

We are subject to taxation in the United States and various state and foreign jurisdictions.

We classify penalties and interest related to unrecognized tax benefits as income tax expense in the Consolidated Statements of Income and Comprehensive Income.

Earnings Per Share

Basic earnings per share is calculated based on income available to common stockholders and the weighted-average number of shares outstanding during the reporting period. Diluted earnings per share is calculated based on income

available to common stockholders and the weighted-average number of common and potential common shares outstanding during the reporting period. Potential common shares, composed of the incremental common shares issuable upon the exercise of outstanding stock options, stock appreciation rights and unvested restricted shares, are included in the earnings per share calculation to the extent that they are dilutive.

Recently Issued Accounting Standards

In January 2015, the FASB issued Accounting Standards Update ("ASU") 2015-01. The amendments in this update eliminate the concept of extraordinary items in Subtopic 225-20, which required entities to consider whether an underlying event or transaction is extraordinary. However, the amendments retain the presentation and disclosure guidance for items that are unusual in nature or occur infrequently. The amendments in this update are effective for fiscal years, and interim periods within those years, beginning after December 15, 2015. The adoption of ASU 2015-01 is not expected to have a material impact on our Consolidated Financial Statements.

In November 2014, the FASB issued ASU 2014-17, Pushdown Accounting, which clarifies whether and at what threshold an acquired entity that is a business or nonprofit activity can apply pushdown accounting in its separate financial statements. This ASU provides companies with the option to apply pushdown accounting in its separate financial statements upon occurrence of an event in which an acquirer obtains control of the acquired entity. The election to apply pushdown accounting can be made either in the period in which the change of control occurred, or in a subsequent period. The amendments in this update were effective November 18, 2014. The adoption of ASU 2014-17 did not have a material impact on our Consolidated Financial Statements.

In November 2014, the FASB issued ASU 2014-16, Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share is More Akin to Debt or to Equity. The amendments in this update clarify how current GAAP should be interpreted in evaluating economic characteristics and risks and ultimately determining whether the host contract in a hybrid financial instrument that is issued in the form of a share is more akin to debt or to equity. The effects of initially adopting the amendments in this update should be applied on a modified retrospective basis to existing hybrid financial instruments issued in the form of a share as of the beginning of the fiscal year for which the amendments are effective. The amendments in this update are effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The adoption of ASU 2014-16 is not expected to have a material impact on our Consolidated Financial Statements.

In August 2014, the FASB issued ASU 2014-15, Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern. This amendment states that in connection with preparing financial statements for each annual and interim reporting period, an entity's management should evaluate whether there are conditions or events that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are available to be issued, when applicable). The amendments in this update are effective for the annual reporting period beginning after December 15, 2016, and for annual periods and interim periods thereafter. Early application is permitted. The adoption of ASU 2014-15 is not expected to have a material impact on our Consolidated Financial Statements.

In June 2014, the FASB issued ASU 2014-12, Accounting for Share-Based Payments When the Terms of an Award Provide that a Performance Target Could Be Achieved after the Requisite Service Period, which requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. As such, the new guidance does not allow for a performance target that affects vesting to be reflected in estimating the fair value of the award at the grant date. The amendments to this update are effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015. Early adoption is permitted. Entities may apply the amendments in this update either prospectively to all awards granted or modified after the effective date or retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented in the financial statements and to all new or modified awards thereafter. We currently do not have any outstanding share-based payments with a performance target. The adoption of ASU 2014-12 is not expected to have a material impact on our Consolidated Financial Statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers - Topic 606, which supersedes the revenue recognition requirements in FASB ASC 605. The new guidance primarily states that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The amendments in this update are effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted. We are evaluating the impact of adopting this prospective guidance on our consolidated results of operations and financial condition.

In April 2014, the FASB issued ASU 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity. Under the new guidance, only disposals representing a strategic shift in operations should be presented as discontinued operations. Those strategic shifts should have a major effect on the organization's operations and financial results. Examples include a disposal of a major geographic area, a major line of business, or a major equity method investment. In addition, the new guidance requires expanded disclosures about discontinued operations that will provide financial statement users with more information about the assets, liabilities, income, and expenses of discontinued operations. Early adoption is permitted, but only for disposals (or classifications as held for sale) that have not been reported in financial statements previously issued or available for issuance. The amendments in this update must be applied prospectively to all disposals (or classifications as held for sale) of components of an entity that occur within annual periods beginning on or after December 15, 2014, and interim periods within those years. The adoption of ASU 2014-08 is not expected to have a material impact on our Consolidated Financial Statements.

Management has reviewed and continues to monitor the actions of the various financial and regulatory reporting agencies and is currently not aware of any other pronouncement that could have a material impact on our consolidated financial position, results of operations or cash flows.

2. Acquisitions

Acquisition of Insight Pharmaceuticals

On September 3, 2014, the Company completed its previously announced acquisition of Insight Pharmaceuticals Corporation ("Insight"), a marketer and distributor of feminine care and other OTC healthcare products, for \$753.2 million in cash. The closing followed the Federal Trade Commission's ("FTC") approval of the acquisition and was finalized pursuant to the terms of the purchase agreement announced on April 25, 2014. Pursuant to the Insight purchase agreement, the Company acquired 27 OTC brands sold in North America (including related trademarks, contracts and inventory), which extends the Company's portfolio of OTC brands to include a leading feminine care platform in the United States and Canada anchored by Monistat, the leading brand in OTC yeast infection treatment. The acquisition also adds brands to the Company's cough/cold, pain relief, ear care and dermatological platforms. In connection with the FTC's approval of the Insight acquisition, we sold one of the competing brands that we acquired from Insight on the same day as the Insight closing. Insight is primarily included in our North America OTC Healthcare segment.

The Insight acquisition was accounted for in accordance with the Business Combinations topic of the FASB ASC 805, which requires that the total cost of an acquisition be allocated to the tangible and intangible assets acquired and liabilities assumed based upon their respective fair values at the date of acquisition.

We prepared an analysis of the fair values of the assets acquired and liabilities assumed as of the date of acquisition. The following table summarizes our preliminary allocation of the assets acquired and liabilities assumed as of the September 3, 2014 acquisition date.

(In thousands)	September 3, 2014
Cash acquired	\$3,507
Accounts receivable	25,784
Inventories	23,559
Deferred income tax assets - current	860
Prepays and other current assets	1,407
Property, plant and equipment	2,308
Goodwill	103,255
Intangible assets	724,374
Total assets acquired	885,054
Accounts payable	16,079
Accrued expenses	8,003
Deferred income tax liabilities - long term	107,799
Total liabilities assumed	131,881
Total purchase price	\$753,173

Based on this analysis, we allocated \$599.6 million to non-amortizable intangible assets and \$124.8 million to amortizable intangible assets. We are amortizing the purchased amortizable intangible assets on a straight-line basis over an estimated weighted average useful life of 16.2 years. The weighted average remaining life for amortizable intangible assets at December 31, 2014 was 15.9 years.

We also recorded goodwill of \$103.3 million based on the amount by which the purchase price exceeded the fair value of the net assets acquired. The full amount of goodwill is not deductible for income tax purposes.

The operating results of Insight have been included in our Consolidated Financial Statements beginning September 3, 2014. Revenues of the acquired Insight operations for the three and nine months ended December 31, 2014 were \$43.4 million and \$56.1 million, respectively. Net income for the three and nine months ended December 31, 2014 was \$3.6 million and \$1.6 million, respectively. On September 3, 2014, we sold one of the brands we acquired from the Insight acquisition for \$18.5 million, for which we had allocated \$17.7 million, \$0.6 million and \$0.2 million to intangible assets, inventory and property, plant and equipment, respectively.

The following table provides our unaudited pro forma revenues, net income and net income per basic and diluted common share had the results of Insight's operations been included in our operations commencing on April 1, 2013, based upon available information related to Insight's operations. This pro forma information is not necessarily indicative either of the combined results of operations that actually would have been realized by us had the Insight acquisition been consummated at the beginning of the period for which the pro forma information is presented, or of future results.

(In thousands, except per share data)	Nine Months Ended December 31, 2014

Acquisition of the Hydralyte brand

On April 30, 2014, we completed the acquisition of the Hydralyte brand in Australia and New Zealand from The Hydration Pharmaceuticals Trust of Victoria, Australia, which was funded through a combination of cash on hand and our existing senior secured credit facility.

Hydralyte is the leading OTC brand in oral rehydration in Australia and is marketed and sold through our Care Pharmaceuticals Pty Ltd. subsidiary ("Care Pharma"). Hydralyte is available in pharmacies in multiple forms and is indicated for oral rehydration following diarrhea, vomiting, fever, heat and other ailments. Hydralyte is included in our International OTC Healthcare segment.

The Hydralyte acquisition was accounted for in accordance with the Business Combinations topic of the FASB ASC 805, which requires that the total cost of an acquisition be allocated to the tangible and intangible assets acquired and liabilities assumed based upon their respective fair values at the date of acquisition.

We prepared an analysis of the fair values of the assets acquired and liabilities assumed as of the date of acquisition. The following table summarizes our allocation of the assets acquired and liabilities assumed as of the April 30, 2014 acquisition date.

- 10-

(In thousands) April 30, 2014

Inventories	\$ 1,970
Property, plant and equipment, net	1,267
Goodwill	1,224
Intangible assets, net	73,580
Total assets acquired	78,041
Accrued expenses	38
Other long term liabilities	12
Total liabilities assumed	50
Net assets acquired	\$ 77,991

Based on this analysis, we allocated \$73.6 million to non-amortizable intangible assets and no allocation was made to amortizable intangible assets.

We also recorded goodwill of \$1.2 million based on the amount by which the purchase price exceeded the fair value of the net assets acquired. The full amount of goodwill is not deductible for income tax purposes.

The pro forma effect of this acquisition on revenues and earnings was not material.

Acquisition of Care Pharmaceuticals Pty Ltd.

On July 1, 2013, we completed the acquisition of Care Pharma, which was funded through a combination of our existing senior secured credit facility and cash on hand.

The Care Pharma brands include the Fess line of cold/allergy and saline nasal health products, which is the leading saline spray for both adults and children in Australia. Other key brands include Painstop analgesic, Rectogesic for rectal discomfort, and the Fab line of nutritional supplements. Care Pharma also includes a line of brands for children including Little Allergies, Little Eyes, and Little Coughs. The brands acquired are complementary to our OTC Healthcare portfolio and are included in our International OTC Healthcare segment.

The Care Pharma acquisition was accounted for in accordance with the Business Combinations topic of the FASB ASC 805, which requires that the total cost of an acquisition be allocated to the tangible and intangible assets acquired and liabilities assumed based upon their respective fair values at the date of acquisition.

We prepared an analysis of the fair values of the assets acquired and liabilities assumed as of the date of acquisition. The following table summarizes our allocation of the assets acquired and liabilities assumed as of the July 1, 2013 acquisition date.

(In thousands) July 1, 2013

Cash acquired	\$ 1,546
Accounts receivable	1,658
Inventories	2,465
Deferred income taxes	283
Prepays and other current assets	647
Property, plant and equipment	163
Goodwill	23,122
Intangible assets	31,502
Total assets acquired	61,386
Accounts payable	1,537
Accrued expenses	2,788
Other long term liabilities	300
Total liabilities assumed	4,625
Net assets acquired	\$ 56,761

Based on this analysis, we allocated \$29.8 million to non-amortizable intangible assets and \$1.7 million to amortizable intangible assets. We are amortizing the purchased amortizable intangible assets on a straight-line basis over an estimated weighted average useful life of 15.1 years. The weighted average remaining life for amortizable intangible assets at December 31, 2014 was 12.3 years.

We also recorded goodwill of \$23.1 million based on the amount by which the purchase price exceeded the fair value of the net assets acquired. The full amount of goodwill is deductible for income tax purposes.

The pro forma effect of this acquisition on revenues and earnings was not material.

3. Accounts Receivable

Accounts receivable consist of the following:

(In thousands)	December 31, 2014	March 31, 2014
Components of Accounts Receivable		
Trade accounts receivable	\$95,596	\$73,632
Other receivables	2,998	1,360
	98,594	74,992
Less allowances for discounts, returns and uncollectible accounts	(10,902) (9,942
Accounts receivable, net	\$87,692	\$65,050

4. Inventories

Inventories consist of the following:

(In thousands)	December 31, 2014	March 31, 2014
Components of Inventories		
Packaging and raw materials	\$6,909	\$3,099
Finished goods	68,331	62,487
Inventories	\$75,240	\$65,586

Inventories are carried at the lower of cost or market, which includes a reduction in inventory values of \$4.4 million and \$1.1 million at December 31, 2014 and March 31, 2014, respectively, related to obsolete and slow-moving inventory. Following the acquisition of the Hydralyte brand on April 30, 2014, we manufacture certain Hydralyte products in Australia.

5. Property and Equipment

Property and equipment consist of the following:

(In thousands)	December 31, 2014	March 31, 2014
Components of Property and Equipment		
Machinery	\$4,313	\$1,927
Computer equipment and software	9,950	8,923
Furniture and fixtures	2,427	1,858
Leasehold improvements	6,705	4,734
	23,395	17,442
Accumulated depreciation	(10,306) (7,845
Property and equipment, net	\$13,089	\$9,597

We recorded depreciation expense of \$1.0 million and \$1.1 million for the three months ended December 31, 2014 and December 31, 2013, respectively, and \$2.6 million and \$2.2 million for the nine months ended December 31, 2014 and December 31, 2013, respectively.

6. Goodwill

As described in Note 18 to these Consolidated Financial Statements, we have realigned our reportable segments effective April 1, 2014 with how we currently operate, review and evaluate the results of our business. A reconciliation of the activity affecting goodwill by reportable segment is as follows:

(In thousands)	North American OTC Healthcare	International OTC Healthcare	Household Cleaning	Consolidated
Balance — March 31, 2014	\$160,157	\$23,365	\$7,389	\$190,911
Additions	103,254	1,224	—	104,478
Reductions	—	—	(589) (589
Effects of foreign currency exchange rates	—	(2,908) —	(2,908
Balance — December 31, 2014	\$263,411	\$21,681	\$6,800	\$291,892

As discussed in Note 2, we completed two acquisitions during the nine months ended December 31, 2014. On September 3, 2014, we completed the acquisition of Insight and recorded goodwill of \$103.3 million reflecting the amount by which the purchase price exceeded the preliminary estimate of fair value of net assets acquired. Additionally, on April 30, 2014, we completed the acquisition of the Hydralyte brand and recorded goodwill of \$1.2 million reflecting the amount by which the purchase price exceeded the preliminary estimate of fair value of the net assets acquired.

As further discussed in Note 7, in December 2014, we completed a transaction to sell rights to use of the Comet brand in certain Eastern European countries to a third-party licensee. As a result, we recorded a gain on sale of \$1.3 million and reduced the carrying value of our intangible assets and goodwill.

Under accounting guidelines, goodwill is not amortized, but must be tested for impairment annually, or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of the reporting unit below the carrying amount.

On an annual basis, during the fourth quarter of each fiscal year, or more frequently if conditions indicate that the carrying value of the asset may not be recoverable, management performs a review of the values assigned to goodwill and tests for impairment.

At March 31, 2014, during our annual test for goodwill impairment, there were no indicators of impairment under the analysis. Accordingly, no impairment charge was recorded in fiscal 2014. As of December 31, 2014, there have been no triggering events that would indicate potential impairment of goodwill.

The discounted cash flow methodology is a widely-accepted valuation technique to estimate fair value that is utilized by market participants in the transaction evaluation process and has been applied consistently. We also considered our market capitalization at March 31, 2014, as compared to the aggregate fair values of our reporting units, to assess the reasonableness of our estimates pursuant to the discounted cash flow methodology. The estimates and assumptions made in assessing the fair value of our reporting units and the valuation of the underlying assets and liabilities are inherently subject to significant uncertainties. Consequently, changing rates of interest and inflation, declining sales or margins, increases in competition, changing consumer preferences, technical advances, or reductions in advertising and promotion may require an impairment charge to be recorded in the future.

7. Intangible Assets

A reconciliation of the activity affecting intangible assets is as follows:

(In thousands)	Indefinite Lived Trademarks	Finite Lived Trademarks	Totals
Gross Carrying Amounts			
Balance — March 31, 2014	\$ 1,273,878	\$ 204,740	\$ 1,478,618
Additions	673,180	124,774	797,954
Reductions	(9,548) (17,674) (27,222
Effects of foreign currency exchange rates	(12,371) (197) (12,568
Balance — December 31, 2014	1,925,139	311,643	2,236,782
Accumulated Amortization			
Balance — March 31, 2014	—	83,801	83,801
Additions	—	8,915	8,915
Effects of foreign currency exchange rates	—	(18) (18
Balance — December 31, 2014	—	92,698	92,698
Intangible assets, net - December 31, 2014	\$ 1,925,139	\$ 218,945	\$ 2,144,084
Intangible Assets, net by Reportable Segment:			
North American OTC Healthcare	\$ 1,723,498	\$ 192,756	\$ 1,916,254
International OTC Healthcare	91,369	1,330	92,699
Household Cleaning	110,272	24,859	135,131
Intangible assets, net - December 31, 2014	\$ 1,925,139	\$ 218,945	\$ 2,144,084

As discussed in Note 2, we completed two acquisitions during the nine months ended December 31, 2014. On September 3, 2014, we completed the acquisition of Insight and allocated \$724.4 million to intangible assets based on our preliminary analysis. Additionally, on April 30, 2014, we completed the acquisition of the Hydralyte brand and allocated \$73.6 million to intangible assets based on our preliminary analysis. Furthermore, on September 3, 2014 we sold one of the brands that we acquired from Insight, for which we allocated \$17.7 million to the intangible assets.

Sale of asset

Historically, we received royalty income from the licensing of the name of certain of our brands in geographic areas or markets in which we do not directly compete. We have had a royalty agreement for our Comet brand for several years,

which included an option on behalf of the licensee to purchase the rights in certain geographic areas and markets in perpetuity. In December 2014, we amended the agreement to allow the licensee to buy out a portion of the agreement early, but retaining the remaining stream of royalty payments. In December, in connection with this amendment, we sold rights to use of the Comet brand in certain Eastern European countries to a third-party licensee and received \$10.0 million as a partial early buyout. As a result, we recorded a gain on sale of \$1.3 million, and reduced the carrying value of our intangible assets and goodwill. The licensee will continue to make quarterly payments at least through June 30, 2016 of approximately \$1.0 million. The licensee has the option to purchase the remaining territories and markets, as defined in the agreement, at any time after July 1, 2016.

- 14-

Under accounting guidelines, indefinite-lived assets are not amortized, but must be tested for impairment annually, or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of the asset below the carrying amount. Additionally, at each reporting period, an evaluation must be made to determine whether events and circumstances continue to support an indefinite useful life. Intangible assets with finite lives are amortized over their respective estimated useful lives and are also tested for impairment whenever events or changes in circumstances indicate that the carrying value of the asset may not be recoverable and exceeds its fair value.

On an annual basis during the fourth fiscal quarter, or more frequently if conditions indicate that the carrying value of the asset may not be recovered, management performs a review of both the values and, if applicable, useful lives assigned to intangible assets and tests for impairment.

In a manner similar to goodwill, we completed our annual test for impairment of our indefinite-lived intangible assets during the fourth quarter of fiscal 2014.

We have experienced declines in revenues and profitability of certain brands in the North American OTC Healthcare segment during the three and nine months ended December 31 2014, compared to the same periods during the prior year. Sustained or significant future declines in revenue, profitability, other adverse changes in expected operating results, and/or unfavorable changes in other economic factors used to estimate fair values of certain brands could indicate that fair value no longer exceeds the carrying value, in which case a non-cash impairment charge may be recorded in future periods. In particular, we continue to experience increasing competitive pressures for certain brands within our pediatric cough and cold and gastrointestinal product groups. Specifically in the cough and cold product group, we expected revenues to decline with the return to the market of competing products. However, such declines have been steeper than expected. Current quarter and year-to-date revenues from our Pediacare brand have declined significantly as compared to the corresponding periods in the prior year, due primarily to competition in the category, including new product introductions and lost distribution. As a result, we have increased our promotional spending in the short term, which resulted in lower revenues and profitability. Based on these factors, we considered whether these conditions would indicate that the fair value of the reporting unit would no longer exceed the carrying value, and accordingly, we performed an interim impairment analysis.

Based on completion of step 1 of the impairment analysis for goodwill and indefinite-lived intangible assets, the fair value of the Pediacare reporting unit and trademarks, exceed their book value and therefore, we concluded that no impairment existed as of December 31, 2014 and that step 2 of the impairment test was not required. The carrying value for the Pediacare reporting unit at December 31, 2014 is approximately \$45.8 million. See Item 2, Critical Accounting Policies for a further discussion on the assumptions used in our impairment analysis.

Additionally, for all indefinite-lived intangible assets, an evaluation of the facts and circumstances as of December 31, 2014 continues to support an indefinite useful life for such assets. Therefore, no impairment charge was recorded for the nine months ended December 31, 2014, as facts and circumstances indicated that the fair values of the intangible assets for our brands exceeded their carrying values.

The weighted average remaining life for finite-lived intangible assets at December 31, 2014 was approximately 14.1 years and the amortization expense for the three and nine months ended December 31, 2014 was \$3.9 million and \$8.9 million, respectively. At December 31, 2014, finite-lived intangible assets are being amortized over a period of 3 to 30 years, and the associated amortization expense is expected to be as follows:

(In thousands)

Year Ending March 31,	Amount
2015 (Remaining three months ending March 31, 2015)	\$3,887
2016	15,547

Edgar Filing: Prestige Brands Holdings, Inc. - Form 10-Q

2017	15,547
2018	15,547
2019	15,547
Thereafter	152,870
	\$218,945

- 15-

8. Other Accrued Liabilities

Other accrued liabilities consist of the following:

(In thousands)	December 31, 2014	March 31, 2014
Accrued marketing costs	\$19,413	\$11,812
Accrued compensation costs	6,455	6,232

Accrued professional fees	2,999	2,002
Deferred rent	1,060	1,258
Accrued production costs	4,390	1,506
Accrued lease termination costs	1,110	—
Other accrued liabilities	1,601	763
	\$40,675	\$26,446

9. Long-Term Debt

2012 Senior Notes:

On January 31, 2012, Prestige Brands, Inc. (the "Borrower") issued \$250.0 million of senior unsecured notes at par value, with an interest rate of 8.125% and a maturity date of February 1, 2020 (the "2012 Senior Notes"). The Borrower may earlier redeem some or all of the 2012 Senior Notes at redemption prices set forth in the indenture governing the 2012 Senior Notes. The 2012 Senior Notes are guaranteed by Prestige Brands Holdings, Inc. and certain of its domestic 100% owned subsidiaries, other than the Borrower. Each of these guarantees is joint and several. There are no significant restrictions on the ability of any of the guarantors to obtain funds from their subsidiaries or to make payments to the Borrower or the Company. In connection with the 2012 Senior Notes offering, we incurred \$12.6 million of costs, which were capitalized as deferred financing costs and are being amortized over the term of the 2012 Senior Notes.

2012 Term Loan and 2012 ABL Revolver:

On January 31, 2012, the Borrower also entered into a new senior secured credit facility, which consists of (i) a \$660.0 million term loan facility (the "2012 Term Loan") with a seven-year maturity and (ii) a \$50.0 million asset-based revolving credit facility (the "2012 ABL Revolver") with a five-year maturity. In subsequent years, we have utilized portions of our accordion feature to increase the amount of our borrowing capacity under the 2012 ABL Revolver by \$85.0 million to \$135.0 million and reduced our borrowing rate on the 2012 ABL Revolver by 0.25%. The 2012 Term Loan was issued with an original issue discount of 1.5% of the principal amount thereof, resulting in net proceeds to the Borrower of \$650.1 million. In connection with these loan facilities, we incurred \$20.6 million of costs, which were capitalized as deferred financing costs and are being amortized over the terms of the facilities. The 2012 Term Loan is unconditionally guaranteed by Prestige Brands Holdings, Inc. and certain of its domestic 100% owned subsidiaries, other than the Borrower. Each of these guarantees is joint and several. There are no significant restrictions on the ability of any of the guarantors to obtain funds from their subsidiaries or to make payments to the Borrower or the Company.

On February 21, 2013, the Borrower entered into Amendment No. 1 (the "Term Loan Amendment No. 1") to the 2012 Term Loan. Term Loan Amendment No. 1 provided for the refinancing of all of the Borrower's existing Term B Loans with new Term B-1 Loans (the "Term B-1 Loans"). The interest rate on the Term B-1 Loans under the Term Loan Amendment No. 1 was based, at the Borrower's option, on a LIBOR rate plus a margin of 2.75% per annum,

with a LIBOR floor of 1.00%, or an alternate base rate, with a floor of 2.00%, plus a margin. The new Term B-1 Loans mature on the same date as the Term B Loans' original maturity date. In addition, Term Loan Amendment No. 1 provided the Borrower with certain additional capacity to prepay subordinated debt, the 2012 Senior Notes and certain other unsecured indebtedness permitted to be incurred under the credit agreement governing the 2012 Term Loan and 2012 ABL Revolver. In connection with Term Loan Amendment No. 1, during the fourth quarter ended March 31, 2013, we recognized a \$1.4 million loss on the extinguishment of debt.

On September 3, 2014, the Borrower entered into Amendment No. 2 ("Term Loan Amendment No. 2") to the 2012 Term Loan. Term Loan Amendment No. 2 provides for (i) the creation of a new class of Term B-2 Loans under the 2012 Term Loan (the "Term B-2 Loans") in an aggregate principal amount of \$720.0 million, (ii) increased flexibility under the credit agreement governing the 2012 Term Loan and 2012 ABL Revolver, including additional investment, restricted payment and debt incurrence flexibility

and financial maintenance covenant relief, and (iii) an interest rate on (x) the Term B-1 Loans that is based, at the Borrower's option, on a LIBOR rate plus a margin of 3.125% per annum, with a LIBOR floor of 1.00%, or an alternate base rate, with a floor of 2.00%, plus a margin, and (y) the Term B-2 Loans that is based, at the Borrower's option, on a LIBOR rate plus a margin of 3.50% per annum, with a LIBOR floor of 1.00%, or an alternate base rate, with a floor of 2.00%, plus a margin (with a margin step-down to 3.25% per annum, based upon achievement of a specified secured net leverage ratio).

The 2012 Term Loan, as amended, bears interest at a rate per annum equal to an applicable margin plus, at the Borrower's option, either (i) a base rate determined by reference to the highest of (a) the Federal Funds rate plus 0.50%, (b) the prime rate of Citibank, N.A., (c) the LIBOR rate determined by reference to the cost of funds for U.S. dollar deposits for an interest period of one month, adjusted for certain additional costs, plus 1.00% and (d) a floor of 2.00% or (ii) a LIBOR rate determined by reference to the costs of funds for U.S. dollar deposits for the interest period relevant to such borrowing, adjusted for certain additional costs, with a floor of 1.00%. For the nine months ended December 31, 2014, the average interest rate on the 2012 Term Loan was 5.2%.

Under the 2012 Term Loan, we were originally required to make quarterly payments each equal to 0.25% of the original principal amount of the 2012 Term Loan, with the balance expected to be due on the seventh anniversary of the closing date. However, since we have previously made significant optional payments that exceeded all of our required quarterly payments, we will not be required to make a payment until the maturity date of January 31, 2019.

On September 3, 2014, the Borrower entered into Amendment No. 3 ("ABL Amendment No. 3") to the 2012 ABL Revolver. ABL Amendment No. 3 provided for (i) a \$40.0 million increase in revolving commitments under the 2012 ABL Revolver and (ii) increased flexibility under the credit agreement governing the 2012 Term Loan and 2012 ABL Revolver, including additional investment, restricted payment and debt incurrence flexibility. Borrowings under the 2012 ABL Revolver, as amended, bear interest at a rate per annum equal to an applicable margin, plus, at the Borrower's option, either (i) a base rate determined by reference to the highest of (a) the Federal Funds rate plus 0.50%, (b) the prime rate of Citibank, N.A., (c) the LIBOR rate determined by reference to the cost of funds for U.S. dollar deposits for an interest period of one month, adjusted for certain additional costs, plus 1.00% or (ii) a LIBOR rate determined by reference to the costs of funds for U.S. dollar deposits for the interest period relevant to such borrowing, adjusted for certain additional costs. The initial applicable margin for borrowings under the 2012 ABL Revolver is 1.75% with respect to LIBOR borrowings and 0.75% with respect to base-rate borrowings. The applicable margin for borrowings under the 2012 ABL Revolver may be increased to 2.00% or 2.25% for LIBOR borrowings and 1.00% or 1.25% for base-rate borrowings, depending on average excess availability under the 2012 ABL Revolver during the prior fiscal quarter. In addition to paying interest on outstanding principal under the 2012 ABL Revolver, we are required to pay a commitment fee to the lenders under the 2012 ABL Revolver in respect of the unutilized commitments thereunder. The initial commitment fee rate is 0.50% per annum. The commitment fee rate will be reduced to 0.375% per annum at any time when the average daily unused commitments for the prior quarter is less than a percentage of total commitments by an amount set forth in the credit agreement covering the 2012 ABL Revolver. We may voluntarily repay outstanding loans under the 2012 ABL Revolver at any time without a premium or penalty. For the nine months ended December 31, 2014, the average interest rate on the amounts borrowed under the 2012 ABL Revolver was 3.1%.

2013 Senior Notes:

On December 17, 2013, the Borrower issued \$400.0 million of senior unsecured notes, with an interest rate of 5.375% and a maturity date of December 15, 2021 (the "2013 Senior Notes"). The Borrower may redeem some or all of the 2013 Senior Notes at redemption prices set forth in the indenture governing the 2013 Senior Notes. The 2013 Senior Notes are guaranteed by Prestige Brands Holdings, Inc. and certain of its 100% domestic owned subsidiaries, other than the Borrower. Each of these guarantees is joint and several. There are no significant restrictions on the ability of any of the guarantors to obtain funds from their subsidiaries or to make payments to the Borrower or the Company. In connection with the 2013 Senior Notes offering, we incurred \$7.2 million of costs, which were capitalized as deferred financing costs and are being amortized over the term of the 2013 Senior Notes.

Redemptions and Restrictions:

At any time prior to February 1, 2016, we may redeem the 2012 Senior Notes in whole or in part at a redemption price equal to 100% of the principal amount of the notes redeemed, plus a "make-whole premium" calculated as set forth in the indenture governing the 2012 Senior Notes, together with accrued and unpaid interest, if any, to the date of redemption. On or after February 1, 2016, we may redeem the 2012 Senior Notes in whole or in part at redemption prices set forth in the indenture governing the 2012 Senior Notes. In addition, at any time prior to February 1, 2015, we may redeem up to 35% of the aggregate principal amount of the 2012 Senior Notes at a redemption price equal to 108.125% of the principal amount thereof, plus accrued and unpaid interest, if any, to the redemption date, with the net cash proceeds of certain equity offerings, provided that certain conditions are met. Subject to certain limitations, in the event of a change of control, as defined in the indenture governing the 2012 Senior Notes, the Borrower will be required to make an offer to purchase the 2012 Senior Notes at a price equal to 101% of the aggregate principal amount of the 2012 Senior Notes repurchased, plus accrued and unpaid interest, if any, to the date of repurchase.

- 17-

At any time prior to December 15, 2016, we may redeem the 2013 Senior Notes in whole or in part at a redemption price equal to 100% of the principal amount of notes redeemed, plus an applicable "make-whole premium" calculated as set forth in the indenture governing the 2013 Senior Notes, together with accrued and unpaid interest, if any, to the date of redemption. On or after December 15, 2016, we may redeem some or all of the 2013 Senior Notes at redemption prices set forth in the indenture governing the 2013 Senior Notes. In addition, at any time prior to December 15, 2016, we may redeem up to 35% of the aggregate principal amount of the 2013 Senior Notes at a redemption price equal to 105.375% of the principal amount thereof, plus accrued and unpaid interest, if any, to the redemption date, with the net cash proceeds of certain equity offerings, provided that certain conditions are met. Subject to certain limitations, in the event of a change of control, as defined in the indenture governing the 2013 Senior Notes, the Borrower will be required to make an offer to purchase the 2013 Senior Notes at a price equal to 101% of the aggregate principal amount of the 2013 Senior Notes repurchased, plus accrued and unpaid interest, if any, to the date of repurchase.

The indentures governing the 2012 Senior Notes and the 2013 Senior Notes contain provisions that restrict us from undertaking specified corporate actions, such as asset dispositions, acquisitions, dividend payments, repurchases of common shares outstanding, changes of control, incurrences of indebtedness, issuance of equity, creation of liens, making of loans and transactions with affiliates. Additionally, the credit agreement with respect to the 2012 Term Loan and the 2012 ABL Revolver and the indentures governing the 2012 Senior Notes and the 2013 Senior Notes contain cross-default provisions, whereby a default pursuant to the terms and conditions of certain indebtedness will cause a default on the remaining indebtedness under the credit agreement governing the 2012 Term Loan and the 2012 ABL Revolver and the indentures governing the 2012 Senior Notes and the 2013 Senior Notes. At December 31, 2014, we were in compliance with the covenants under our long-term indebtedness.

At December 31, 2014, we had an aggregate of \$30.6 million of unamortized debt issuance costs and \$5.6 million of unamortized debt discount, the total of which is comprised of \$9.0 million related to the 2012 Senior Notes, \$6.4 million related to the 2013 Senior Notes, \$19.7 million related to the 2012 Term Loan, and \$1.1 million related to the 2012 ABL Revolver.

During the nine months ended December 31, 2014, we borrowed a net amount of \$66.1 million against the 2012 ABL Revolver.

Long-term debt consists of the following, as of the dates indicated:

(In thousands, except percentages)	December 31, 2014	March 31, 2014
2013 Senior Notes bearing interest at 5.375%, with interest payable on June 15 and December 15 of each year. The 2013 Senior Notes mature on December 15, 2021.	\$400,000	\$400,000
2012 Senior Notes bearing interest at 8.125%, with interest payable on February 1 and August 1 of each year. The 2012 Senior Notes mature on February 1, 2020.	250,000	250,000
2012 Term B-1 Loan bearing interest at the Borrower's option at either a base rate with a floor of 2.00% plus applicable margin or LIBOR with a floor of 1.00% plus applicable margin, due on January 31, 2019.	247,500	287,500
2012 Term B-2 Loan bearing interest at the Borrower's option at either a base rate with a floor of 2.00% plus applicable margin or LIBOR with a floor of 1.00% plus applicable margin, due on September 3, 2021.	680,000	—
2012 ABL Revolver bearing interest at the Borrower's option at either a base rate plus applicable margin or LIBOR plus applicable margin. Any unpaid balance is due on January 31, 2017.	66,100	—

Edgar Filing: Prestige Brands Holdings, Inc. - Form 10-Q

Current portion of long-term debt	1,643,600	937,500
	—	—
	1,643,600	937,500
Less: unamortized discount	(5,639) (3,086
Long-term debt, net of unamortized discount	\$1,637,961	\$934,414

- 18-

As of December 31, 2014, aggregate future principal payments required in accordance with the terms of the 2012 Term Loan, 2012 ABL Revolver and the indentures governing the 2013 Senior Notes and the 2012 Senior Notes are as follows:

(In thousands)

Year Ending March 31,	Amount
2015 (remaining three months ending March 31, 2015)	\$—
2016	—
2017	66,100
2018	—
2019	247,500
Thereafter	1,330,000
	\$1,643,600

10. Fair Value Measurements

For certain of our financial instruments, including cash, accounts receivable, accounts payable and other current liabilities, the carrying amounts approximate their respective fair values due to the relatively short maturity of these amounts.

The Fair Value Measurements and Disclosures topic of the FASB ASC 820 requires fair value to be determined based on the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market assuming an orderly transaction between market participants. The Fair Value Measurements and Disclosures topic established market (observable inputs) as the preferred source of fair value, to be followed by the Company's assumptions of fair value based on hypothetical transactions (unobservable inputs) in the absence of observable market inputs. Based upon the above, the following fair value hierarchy was created:

Level 1 - Quoted market prices for identical instruments in active markets;

Level 2 - Quoted prices for similar instruments in active markets, as well as quoted prices for identical or similar instruments in markets that are not considered active; and

Level 3 - Unobservable inputs developed by the Company using estimates and assumptions reflective of those that would be utilized by a market participant.

The market values have been determined based on market values for similar instruments adjusted for certain factors. As such, the Term B-1 Loans, Term B-2 Loans, the 2013 Senior Notes, the 2012 Senior Notes, and the 2012 ABL Revolver are measured in Level 2 of the above hierarchy. At December 31, 2014 and March 31, 2014, we did not have any assets or liabilities measured in Level 1 or 3. During any of the periods presented, there were no transfers of assets or liabilities between Levels 1, 2 and 3.

At December 31, 2014 and March 31, 2014, the carrying value of our 2013 Senior Notes was \$400.0 million. The fair value of our 2013 Senior Notes was \$391.5 million and \$408.5 million at December 31, 2014 and March 31, 2014, respectively.

At December 31, 2014 and March 31, 2014, the carrying value of our 2012 Senior Notes was \$250.0 million. The fair value of our 2012 Senior Notes was \$264.1 million and \$280.6 million at December 31, 2014 and March 31, 2014, respectively.

Edgar Filing: Prestige Brands Holdings, Inc. - Form 10-Q

At December 31, 2014 and March 31, 2014, the carrying value of the Term B-1 Loans was \$247.5 million and \$287.5 million, respectively. The fair value of the Term B-1 Loans was \$246.9 million and \$288.9 million at December 31, 2014 and March 31, 2014, respectively.

At December 31, 2014 the carrying value of the Term B-2 Loans was \$680.0 million. The fair value of the Term B-2 Loan was \$680.0 million at December 31, 2014. Because the Term B-2 Loans was entered into on September 3, 2014, there were no outstanding loan balances as of March 31, 2014.

At December 31, 2014, the carrying value and fair value of the 2012 ABL Revolver was \$66.1 million and \$65.4 million, respectively. There were no outstanding borrowings under the 2012 ABL Revolver at March 31, 2014.

11. Stockholders' Equity

The Company is authorized to issue 250.0 million shares of common stock, \$0.01 par value per share, and 5.0 million shares of preferred stock, \$0.01 par value per share. The Board of Directors may direct the issuance of the undesignated preferred stock in one or more series and determine preferences, privileges and restrictions thereof.

Each share of common stock has the right to one vote on all matters submitted to a vote of stockholders. The holders of common stock are also entitled to receive dividends whenever funds are legally available and when declared by the Board of Directors, subject to prior rights of holders of all classes of outstanding stock having priority rights as to dividends. No dividends have been declared or paid on the Company's common stock through December 31, 2014.

During the three and nine months ended December 31, 2014, we repurchased 781 shares and 48,445 shares, respectively, of restricted common stock from our employees pursuant to the provisions of various employee restricted stock awards. During the three and nine months ended December 31, 2013, we repurchased 2,549 shares and 13,275 shares, respectively, of restricted common stock from our employees pursuant to the provisions of various employee restricted stock awards. The repurchases for the nine months ended December 31, 2014 and 2013 were at an average price of \$33.66 and \$27.81, respectively. All of the repurchased shares have been recorded as treasury stock.

12. Accumulated Other Comprehensive (Loss) Income

The table below presents accumulated other comprehensive (loss) income ("AOCI"), which affects equity and results from recognized transactions and other economic events, other than transactions with owners in their capacity as owners.

AOCI consisted of the following at December 31, 2014 and March 31, 2014:

(In thousands)	December 31, 2014	March 31, 2014
Components of Accumulated Other Comprehensive (Loss) Income		
Cumulative translation adjustment	\$(16,144) \$739
Total accumulated other comprehensive (loss) income, net of tax	\$(16,144) \$739

13. Earnings Per Share

Basic earnings per share is computed based on the weighted-average number of shares of common stock outstanding during the period. Diluted earnings per share is computed based on the weighted-average number of shares of common stock outstanding plus the effect of potentially dilutive common shares outstanding during the period using the treasury stock method, which includes stock options, restricted stock awards, and restricted stock units. The following table sets forth the computation of basic and diluted earnings per share:

(In thousands, except per share data)	Three Months Ended December 31,		Nine Months Ended December 31,	
	2014	2013	2014	2013
Numerator				
Net income	\$21,293	\$3,130	\$54,488	\$56,614
Denominator				
Denominator for basic earnings per share — weighted average shares outstanding	52,278	51,806	52,110	51,498
Dilutive effect of unvested restricted common stock (including restricted stock units) and options issued to employees and directors	452	639	512	738
Denominator for diluted earnings per share	52,730	52,445	52,622	52,236
Earnings per Common Share:				
Basic net earnings per share	\$0.41	\$0.06	\$1.05	\$1.10
Diluted net earnings per share	\$0.40	\$0.06	\$1.04	\$1.08

For the three months ended December 31, 2014 and 2013, there were 0.3 million and 0.2 million shares, respectively, attributable to outstanding stock-based awards that were excluded from the calculation of diluted earnings per share because their inclusion would have been anti-dilutive. For the nine months ended December 31, 2014 and 2013, there were 0.3 million and 0.2 million shares, respectively, attributable to outstanding stock-based awards that were excluded from the calculation of diluted earnings per share because their inclusion would have been anti-dilutive.

14. Share-Based Compensation

In connection with our initial public offering, the Board of Directors adopted the 2005 Long-Term Equity Incentive Plan (the “Plan”), which provides for the grant of up to a maximum of 5.0 million shares of restricted stock, stock options, restricted stock units and other equity-based awards. On June 19, 2014, the Board of Directors amended the Plan to provide for the grant of an additional 1.8 million shares of the Company's stock, \$0.01 par value, pursuant to the Plan, which amendment the Company's stockholders approved on August 5, 2014. Directors, officers and other employees of the Company and its subsidiaries, as well as others performing services for the Company, are eligible for grants under the Plan.

During the three and nine months ended December 31, 2014, pre-tax share-based compensation costs charged against income were \$1.5 million and \$4.9 million, respectively, and the related income tax benefit recognized was \$0.6 million and \$1.8 million, respectively. During the three and nine months ended December 31, 2013, pre-tax share-based compensation costs charged against income were \$1.3 million and \$3.8 million, respectively, and the related income tax benefit recognized was \$0.4 million and \$1.1 million, respectively.

Restricted Shares

Restricted shares granted to employees under the Plan generally vest in three to five years, primarily upon the attainment of certain time vesting thresholds, and may also be contingent on the attainment of certain performance goals by the Company, including revenue and earnings before income taxes, depreciation and amortization targets. The restricted share awards provide for accelerated vesting if there is a change of control, as defined in the Plan. The restricted stock units granted to employees generally vest in their entirety on the three-year anniversary of the date of the grant, unless specified differently on the date of grant. Termination of employment prior to vesting will result in forfeiture of the restricted stock units. The restricted stock units granted to directors will vest in their entirety one year after the date of grant so long as the membership on the Board of Directors continues through the vesting date, with the settlement in common stock to occur on the earliest of the director's death, disability or six month anniversary of the date on which the director's Board membership ceases for reasons other than death or disability. Upon vesting, the units will be settled in shares of our common stock.

On May 12, 2014, the Compensation Committee of our Board of Directors granted 96,638 restricted stock units to certain executive officers and employees under the Plan. Of those grants, 75,638 restricted stock units vest in their entirety on the three-year anniversary of the date of grant and 21,000 restricted stock units vest 33.3% per year over three years.

The fair value of the restricted stock units is determined using the closing price of our common stock on the day of grant. The weighted-average grant-date fair value of restricted stock units granted during the nine months ended December 31, 2014 and 2013 was \$33.30 and \$30.19, respectively.

A summary of the Company's restricted shares granted under the Plan is presented below:

Restricted Shares	Shares (in thousands)	Weighted- Average Grant-Date Fair Value
Nine months ended December 31, 2013		
Vested and nonvested at March 31, 2013	421.3	\$ 11.01
Granted	126.6	30.19
Vested and issued	(59.7)) 8.42
Forfeited	(5.6)) 15.11
Vested and nonvested at December 31, 2013	482.6	16.32
Vested at December 31, 2013	83.1	9.63
Nine months ended December 31, 2014:		
Vested and nonvested at March 31, 2014	437.5	\$ 16.76
Granted	104.4	33.30
Vested and issued	(122.8)) 13.62
Forfeited	(21.3)) 20.77
Vested and nonvested at December 31, 2014	397.8	21.86
Vested at December 31, 2014	76.6	11.62

Options

The Plan provides that the exercise price of options granted shall be no less than the fair market value of the Company's common stock on the date the options are granted. Options granted have a term of no greater than ten years from the date of grant and vest in accordance with a schedule determined at the time the option is granted, generally over three to five years. The option awards provide for accelerated vesting if there is a change in control, as

defined in the Plan.

The fair value of each option award is estimated on the date of grant using the Black-Scholes Option Pricing Model that uses the assumptions noted in the table below. Expected volatilities are based on the historical volatility of our common stock and other factors, including the historical volatilities of comparable companies. We use appropriate historical data, as well as current data, to estimate option exercise and employee termination behaviors. Employees that are expected to exhibit similar exercise or termination behaviors are grouped together for the purposes of valuation. The expected terms of the options granted are derived from management's estimates and consideration of information derived from the public filings of companies similar to us and represent the period of time that options granted are expected to be outstanding. The risk-free rate represents the yield on U.S. Treasury bonds with a maturity equal to the expected term of the granted option. On May 12, 2014, the Compensation Committee

- 22-

of our Board of Directors granted stock options to acquire 307,490 shares of our common stock to certain executive officers and employees under the Plan. The stock options will vest 33.3% per year over three years and are exercisable for up to ten years from the date of grant. These stock options were granted at an exercise price of \$33.50 per share, which is equal to the closing price for our common stock on the date of the grant. Termination of employment prior to vesting will result in forfeiture of the unvested stock options. Vested stock options will remain exercisable by the employee after termination, subject to the terms of the Plan.

The weighted-average grant-date fair value of the options granted during the nine months ended December 31, 2014 and 2013 was \$15.93 and \$13.94, respectively.

	Nine Months Ended December 31,		
	2014	2013	
Expected volatility	47.3	% 48.0	%
Expected dividends	\$—	\$—	
Expected term in years	6.0	6.0	
Risk-free rate	2.2	% 1.3	%

A summary of option activity under the Plan is as follows:

	Shares (in thousands)	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term	Aggregate Intrinsic Value (in thousands)
Options				
Nine months ended December 31, 2013:				
Outstanding at March 31, 2013	1,386.4	\$ 10.43		
Granted	227.7	29.94		
Exercised	(589.9) 9.73		
Forfeited or expired	(14.2) 14.56		
Outstanding at December 31, 2013	1,010.0	15.18	7.6	\$20,828
Exercisable at December 31, 2013	172.1	11.34	6.8	4,210
Nine months ended December 31, 2014:				
Outstanding at March 31, 2014	994.9	\$ 15.24		
Granted	307.5	33.50		
Exercised	(363.4) 10.05		
Forfeited or expired	(47.5) 25.76		
Outstanding at December 31, 2014	891.5	23.09	7.9	\$10,368
Exercisable at December 31, 2014	335.1	15.01	6.7	6,604

The aggregate intrinsic value of options exercised in the nine months ended December 31, 2014 was \$8.8 million.

At December 31, 2014, there were \$5.9 million of unrecognized compensation costs related to nonvested share-based compensation arrangements under the Plan, based on management's estimate of the shares that will ultimately vest. We expect to recognize such costs over a weighted-average period of 0.9 years. The total fair value of options and restricted shares vested during the nine months ended December 31, 2014 and 2013 was \$4.3 million and \$3.2 million, respectively. For the nine months ended December 31, 2014 and 2013, cash received from the exercise of stock options was \$3.7 million and \$5.7 million, respectively, and we realized \$1.9 million and \$1.7 million, respectively, in tax benefits from the tax deductions resulting from these option exercises. At December 31, 2014, there were 1.2 million shares available for issuance under the Plan.

15. Income Taxes

Income taxes are recorded in our quarterly financial statements based on our estimated annual effective income tax rate, subject to adjustments for discrete events, should they occur. The effective tax rates used in the calculation of income taxes were 36.5% and 25.2% for the three months ended December 31, 2014 and December 31, 2013, respectively. The effective tax rates used in the calculation of income taxes were 39.5% and 24.6% for the nine months ended December 31, 2014 and December 31, 2013, respectively. The increase in the effective tax rate for the three and nine months ended December 31, 2014 was primarily due to the impact of certain non-deductible items related to acquisitions, and a higher gain for tax purposes associated with the sale of the right of use of the Comet brand in the current period and a one-time benefit of \$9.1 million due primarily to lower state income taxes enacted in the prior year period. This benefit was primarily related to a law change in the state where we have our major distribution center to tax earnings attributed to in-state revenues only.

At December 31, 2014, wholly-owned subsidiaries of the Company had net operating loss carryforwards of approximately \$69.8 million, which may be used to offset future taxable income of the consolidated group and which begin to expire in 2020. The net operating loss carryforwards are subject to an annual limitation as to usage of approximately \$33.6 million pursuant to Internal Revenue Code Section 382. The Company expects to utilize all of the net operating loss carryforwards before they expire.

We had a net increase of \$0.5 million in our uncertain tax liability during the nine months ended December 31, 2014. Therefore, the balance in our uncertain tax liability was \$1.7 million at December 31, 2014 and \$1.2 million at March 31, 2014. We recognize interest and penalties related to uncertain tax positions as a component of income tax expense. We did not incur any material interest or penalties related to income taxes in any of the periods presented.

16. Commitments and Contingencies

We are involved from time to time in legal matters and other claims incidental to our business. We review outstanding claims and proceedings internally and with external counsel as necessary to assess the probability and amount of a potential loss. These assessments are re-evaluated at each reporting period and as new information becomes available to determine whether a reserve should be established or if any existing reserve should be adjusted. The actual cost of resolving a claim or proceeding ultimately may be substantially different than the amount of the recorded reserve. In addition, because it is not permissible under GAAP to establish a litigation reserve until the loss is both probable and estimable, in some cases there may be insufficient time to establish a reserve prior to the actual incurrence of the loss (upon verdict and judgment at trial, for example, or in the case of a quickly negotiated settlement). We believe the resolution of routine legal matters and other claims incidental to our business, taking our reserves into account, will not have a material adverse effect on our financial condition or results of operations.

Lease Commitments

We have operating leases for office facilities and equipment in New York, Wyoming, and other locations, which expire at various dates through fiscal 2021. We required additional office space as a result of the closing of the acquisition of Insight. Therefore, in the first quarter of fiscal 2015, we amended our existing New York office lease to include an additional 15,470 square feet beginning October 2014 and extended the expiration of the combined lease through September 2020. These amounts have been included in the table below.

The following summarizes future minimum lease payments for our operating leases as of December 31, 2014:
(In thousands)

Year Ending March 31,	Facilities	Equipment	Total
2015 (Remaining three months ending March 31, 2015)	\$422	\$274	\$696
2016	1,612	311	1,923

Edgar Filing: Prestige Brands Holdings, Inc. - Form 10-Q

2017	1,772	77	1,849
2018	1,856	—	1,856
2019	1,864	—	1,864
Thereafter	2,465	—	2,465
	\$9,991	\$662	\$10,653

Rent expense for the three months ended December 31, 2014 and 2013 was \$0.4 million and \$0.4 million, respectively, while rent expense for the nine months ended December 31, 2014 and 2013 was \$1.2 million and \$1.2 million, respectively.

Purchase Commitments

Effective November 1, 2009, we entered into a ten year supply agreement for the exclusive manufacture of a portion of one of our Household Cleaning products. Although we are committed under the supply agreement to pay the minimum amounts set forth in the table below, the total commitment is less than 10% of the estimated purchases that we expect to make during the course of the agreement.

(In thousands)

Year Ending March 31,	Amount
2015 (Remaining three months ending March 31, 2015)	273
2016	1,074
2017	1,044
2018	1,013
2019	982
Thereafter	560
	\$4,946

17. Concentrations of Risk

Our revenues are concentrated in the areas of OTC Healthcare and Household Cleaning products. We sell our products to mass merchandisers, food and drug stores, and convenience, dollar and club stores. During the three and nine months ended December 31, 2014, approximately 44.3% and 41.9%, respectively, of our total revenues were derived from our five top selling brands. During the three and nine months ended December 31, 2013, approximately 41.1% and 41.7%, respectively, of our total revenues were derived from our five top selling brands. One customer, Walmart, accounted for more than 10% of our gross revenues for each of the periods presented. Walmart accounted for approximately 16.5% and 17.4%, respectively, of our gross revenues for the three and nine months ended December 31, 2014, and approximately 20.4% and 19.7%, respectively, of our gross revenues for the three and nine months ended December 31, 2013. At December 31, 2014, approximately 20.2% and 13.4% of accounts receivable were owed by Walmart and Walgreens, respectively.

We manage product distribution in the continental United States through a third-party distribution center in St. Louis, Missouri. A serious disruption, such as a flood or fire, to the main distribution center could damage our inventories and could materially impair our ability to distribute our products to customers in a timely manner or at a reasonable cost. We could incur significantly higher costs and experience longer lead times associated with the distribution of our products to our customers during the time that it takes us to reopen or replace our distribution center and inventory levels. As a result, any such disruption could have a material adverse effect on our business, sales and profitability.

At December 31, 2014, we had relationships with 96 third-party manufacturers. Of those, we had long-term contracts with 44 manufacturers that produced items that accounted for approximately 80.1% of gross sales for the nine months ended December 31, 2014. At December 31, 2013, we had relationships with 58 third-party manufacturers. Of those, we had long-term contracts with 21 manufacturers that produced items that accounted for approximately 86.3% of gross sales for the nine months ended December 31, 2013. The fact that we do not have long-term contracts with certain manufacturers means they could cease manufacturing our products at any time and for any reason or initiate arbitrary and costly price increases, which could have a material adverse effect on our business, financial condition and results from operations.

18. Business Segments

Beginning April 1, 2014, we began managing and reporting certain of our businesses separately and have therefore realigned our reportable segments to align with how we manage and evaluate the results of our business. These reportable segments consist of (i) North American OTC Healthcare, (ii) International OTC Healthcare and (iii)

Household Cleaning. The results of our previously reported OTC Healthcare segment is now separated into two reporting segments, the North American OTC Healthcare segment and the International OTC Healthcare segment, largely to reflect our international expansion due to recent acquisitions. Prior year amounts were reclassified to conform to the current reportable segments discussed above. Segment information has been prepared in accordance with the Segment Reporting topic of the FASB ASC 280. We evaluate the performance of our operating segments and allocate resources to these segments based primarily on contribution margin, which we define as gross profit less advertising and promotional expenses.

- 25-

During the three months ended December 31, 2014 and December 31, 2013, approximately 85.9% and 85.7%, respectively, of our total segment revenues were from customers in the United States. During the nine months ended December 31, 2014 and December 31, 2013, approximately 84.4% and 87.2%, respectively, of our total segment revenues were from customers in the United States. Other than the United States, no individual geographical area accounted for more than 10% of net sales in any of the periods presented. During the three months ended December 31, 2014, our Canada and Australia sales accounted for approximately 5.1% and 7.2%, respectively, of our total segment revenues, while during the three months ended December 31, 2013, approximately 8.3% of our total segment revenues was attributable to sales to Canada. During the nine months ended December 31, 2014, our Canada and Australia sales accounted for approximately 6.1% and 7.5%, respectively, of our total segment revenues, while during the nine months ended December 31, 2013, approximately 7.8% of our total segment revenues was attributable to sales to Canada.

At December 31, 2014, approximately 95.3% of our consolidated goodwill and intangible assets were located in the United States and approximately 4.7% were located in Australia. These consolidated goodwill and intangible assets have been allocated to the reportable segments as follows:

(In thousands)	North American OTC Healthcare	International OTC Healthcare	Household Cleaning	Consolidated

19. Condensed Consolidating Financial Statements

As described in Note 9, Prestige Brands Holdings, Inc., together with certain of our 100% owned subsidiaries, has fully and unconditionally guaranteed, on a joint and several basis, the obligations of Prestige Brands, Inc. (a 100% owned subsidiary of the Company) set forth in the indentures governing the 2013 Senior Notes and the 2012 Senior Notes, including the obligation to pay principal and interest with respect to the 2013 Senior Notes and the 2012 Senior Notes. The 100% owned subsidiaries of the Company that have guaranteed the 2013 Senior Notes and the 2012 Senior Notes are as follows: Prestige Services Corp., Prestige Brands Holdings, Inc. (a Virginia corporation), Prestige Brands International, Inc., Medtech Holdings, Inc., Medtech Products Inc., The Cutex Company, The Spic and Span Company, and Blacksmith Brands, Inc. (collectively, the "Subsidiary Guarantors"). A significant portion of our operating income and cash flow is generated by our subsidiaries. As a result, funds necessary to meet Prestige Brands, Inc.'s debt service obligations are provided in part by distributions or advances from our subsidiaries. Under certain circumstances, contractual and legal restrictions, as well as the financial condition and operating requirements of our subsidiaries, could limit Prestige Brands, Inc.'s ability to obtain cash from our subsidiaries for the purpose of meeting our debt service obligations, including the payment of principal and interest on the 2013 Senior Notes and the 2012 Senior Notes. Although holders of the 2013 Senior Notes and the 2012 Senior Notes will be direct creditors of the guarantors of the 2013 Senior Notes and the 2012 Senior Notes by virtue of the guarantees, we have indirect subsidiaries located primarily in the United Kingdom, the Netherlands and Australia (collectively, the "Non-Guarantor Subsidiaries") that have not guaranteed the 2013 Senior Notes or the 2012 Senior Notes, and such subsidiaries will not be obligated with respect to the 2013 Senior Notes or the 2012 Senior Notes. As a result, the claims of creditors of the Non-Guarantor Subsidiaries will effectively have priority with respect to the assets and earnings of such companies over the claims of the holders of the 2013 Senior Notes and the 2012 Senior Notes.

Presented below are supplemental Condensed Consolidating Balance Sheets as of December 31, 2014 and March 31, 2014, Condensed Consolidating Statements of Income and Comprehensive Income for the three and nine months ended December 31, 2014 and 2013, and Condensed Consolidating Statements of Cash Flows for the nine months ended December 31, 2014 and 2013. Such consolidating information includes separate columns for:

- a) Prestige Brands Holdings, Inc., the parent,
- b) Prestige Brands, Inc., the Issuer or the Borrower,
- c) Combined Subsidiary Guarantors,
- d) Combined Non-Guarantor Subsidiaries, and
- e) Elimination entries necessary to consolidate the Company and all of its subsidiaries.

The Condensed Consolidating Financial Statements are presented using the equity method of accounting for investments in our 100% owned subsidiaries. Under the equity method, the investments in subsidiaries are recorded at cost and adjusted for our share of the subsidiaries' cumulative results of operations, capital contributions, distributions and other equity changes. The elimination entries principally eliminate investments in subsidiaries and intercompany balances and transactions. The financial information in this note should be read in conjunction with the Consolidated Financial Statements presented and other notes related thereto contained in this Quarterly Report on Form 10-Q.

In the third quarter of fiscal 2014, the Company determined that it had incorrectly recorded certain intercompany transactions relating to the second quarter of fiscal 2014. This resulted in an understatement of equity in earnings of subsidiaries for Prestige Brands, Inc. of \$48.1 million, an overstatement of \$0.6 million for Prestige Brands Holdings, Inc. and a net understatement of equity in earnings of subsidiaries for the eliminations of \$47.5 million for each of the three and six month periods ended September 30, 2013. These items also resulted in corresponding adjustments to the investments in subsidiaries on the balance sheet as of September 30, 2013 and adjustments to net income (loss) and equity in income of subsidiaries in the statement of cash flows, although net cash provided by operating activities for the six months ended September 30, 2013 remained unchanged. Revisions were also made to increase the cumulative

translation adjustment of the Issuer and subsidiary guarantors by approximately \$1.0 million each, with corresponding adjustments to the investment in subsidiaries and stockholders' equity balances.

The Company assessed the materiality of these items on the previously issued interim financial statements in accordance with SEC Staff Accounting Bulletin No. 99 and No. 108, and concluded that the revisions were not material to the consolidated financial statements. The Company disclosed the impact of the revisions on previously reported amounts and accordingly revised the Condensed Consolidating Financial Statements relating to the second quarter of fiscal 2014. There were no changes to any of the Company's Consolidated Financial Statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of our financial condition and results of operations should be read together with the Consolidated Financial Statements and the related notes included in this Quarterly Report on Form 10-Q, as well as our Annual Report on Form 10-K for the fiscal year ended March 31, 2014. This discussion and analysis may contain forward-looking statements that involve certain risks, assumptions and uncertainties. Future results could differ materially from the discussion that follows for many reasons, including the factors described in Part I, Item 1A., "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended March 31, 2014, as well as those described in Part II, Item 1A., "Risk Factors" in this Quarterly Report on Form 10-Q and in future reports filed with the Securities and Exchange Commission (the "SEC").

See also "Cautionary Statement Regarding Forward-Looking Statements" on page 64 of this Quarterly Report on Form 10-Q.

General

We are engaged in the marketing, sales and distribution of over-the-counter ("OTC") healthcare and household cleaning products to mass merchandisers, drug stores, supermarkets, and club, convenience, and dollar stores in North America (the United States and Canada), and in Australia and certain other international markets. We use the strength of our brands, our established retail distribution network, a low-cost operating model and our experienced management team to grow our presence in these categories and, as a result, grow our sales and profits.

We have grown our product portfolio both organically and through acquisitions. We develop our core brands organically by investing in new product lines, brand extensions and providing advertising support. Acquisitions of OTC brands have also been an important part of our growth strategy. We have acquired well-recognized brands from consumer products and pharmaceutical companies as well as from private equity investors. While many of these brands have long histories of brand development and investment, we believe that, at the time we acquired them, many were considered "non-core" by their previous owners. As a result, these acquired brands did not benefit from adequate management focus and marketing support during the period prior to their acquisition, which created significant opportunities for us to reinvigorate these brands and improve their performance post-acquisition. After adding a brand to our portfolio, we seek to increase its sales, market share and distribution in both existing and new channels through our established retail distribution network. This is achieved often through increased spending on advertising and promotional support, new sales and marketing strategies, improved packaging and formulations and innovative development of brand extensions.

Acquisitions and Divestitures

Acquisition of Insight Pharmaceuticals

On September 3, 2014, the Company completed its previously announced acquisition of Insight Pharmaceuticals Corporation ("Insight"), a marketer and distributor of feminine care and other OTC healthcare products, for \$753.2 million in cash. The closing followed the Federal Trade Commission's ("FTC") approval of the acquisition and was finalized pursuant to the terms of the purchase agreement announced on April 25, 2014. Pursuant to the Insight purchase agreement, the Company acquired 27 OTC brands sold in North America (including related trademarks, contracts and inventory), which extends the Company's portfolio of OTC brands to include a leading feminine care platform in the United States and Canada anchored by Monistat, the leading brand in OTC yeast infection treatment. The acquisition also adds brands to the Company's cough/cold, pain relief, ear care and dermatological platforms. In connection with the FTC's approval of the Insight acquisition, we sold one of the competing brands that we acquired from Insight on the same day as the Insight closing.

The Insight acquisition was accounted for in accordance with the Business Combinations topic of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 805, which requires that the total cost of an acquisition be allocated to the tangible and intangible assets acquired and liabilities assumed based upon their respective fair values at the date of acquisition.

The following table summarizes our preliminary allocation of the assets acquired and liabilities assumed as of the September 3, 2014 acquisition date.

- 39-

Prepays and other current assets	1,407
Property, plant and equipment	2,308
Goodwill	103,255
Intangible Assets	724,374
Total assets acquired	885,054
Accounts payable	16,079
Accrued expenses	8,003
Deferred income tax liabilities - long term	107,799
Total liabilities assumed	131,881
Total purchase price	\$ 753,173

Based on this analysis, we allocated \$599.6 million to non-amortizable intangible assets and \$124.8 million to amortizable intangible assets. We are amortizing the purchased amortizable intangible assets on a straight-line basis over an estimated weighted average useful life of 16.2 years. The weighted average remaining life for amortizable intangible assets at December 31, 2014 was 15.9 years.

We also recorded goodwill of \$103.3 million based on the amount by which the purchase price exceeded the fair value of the net assets acquired. The full amount of goodwill is not deductible for income tax purposes.

The operating results of Insight have been included in our Consolidated Financial Statements beginning September 3, 2014. Revenues of the acquired Insight operations for the three and nine months ended December 31, 2014 were \$43.4 million and \$56.1 million, respectively. Net income for the three and nine months ended December 31, 2014 was \$3.6 million and \$1.6 million, respectively. On September 3, 2014, we sold one of the brands we acquired from the Insight acquisition for \$18.5 million, for which we had allocated \$17.7 million, \$0.6 million and \$0.2 million to intangible assets, inventory and property, plant and equipment, respectively.

The following table provides our unaudited pro forma revenues, net income and net income per basic and diluted common share had the results of Insight's operations been included in our operations commencing on April 1, 2013, based upon available information related to Insight's operations. This pro forma information is not necessarily indicative either of the combined results of operations that actually would have been realized by us had the Insight acquisition been consummated at the beginning of the period for which the pro forma information is presented, or of future results.

Acquisition of the Hydralyte brand

On April 30, 2014, we completed the acquisition of the Hydralyte brand in Australia and New Zealand from The Hydration Pharmaceuticals Trust of Victoria, Australia, which was funded through a combination of cash on hand and our existing senior secured credit facility.

Hydralyte is the leading OTC brand in oral rehydration in Australia and is marketed and sold through our Care Pharmaceuticals Pty Ltd. subsidiary ("Care Pharma"). Hydralyte is available in pharmacies in multiple forms and is indicated for oral rehydration following diarrhea, vomiting, fever, heat and other ailments. Hydralyte is included in our International OTC Healthcare segment.

The Hydralyte acquisition was accounted for in accordance with the Business Combinations topic of the FASB ASC 805.

We prepared an analysis of the fair values of the assets acquired and liabilities assumed as of the date of acquisition. The following table summarizes our allocation of the assets acquired and liabilities assumed as of the April 30, 2014 acquisition date.

(In thousands)	April 30, 2014
Inventories	\$ 1,970
Property, plant and equipment, net	1,267
Goodwill	1,224
Intangible assets, net	73,580
Total assets acquired	78,041
Accrued expenses	38
Other long term liabilities	12
Total liabilities assumed	50
Net assets acquired	\$ 77,991

Based on this analysis, we allocated \$73.6 million to non-amortizable intangible assets and no allocation was made to amortizable intangible assets.

We also recorded goodwill of \$1.2 million based on the amount by which the purchase price exceeded the fair value of the net assets acquired. The full amount of goodwill is not deductible for income tax purposes.

The pro forma effect of this acquisition on revenues and earnings was not material.

Acquisition of Care Pharmaceuticals Pty Ltd.

On July 1, 2013, we completed the acquisition of Care Pharma, which was funded through a combination of our existing senior secured credit facility and cash on hand.

The Care Pharma brands include the Fess line of cold/allergy and saline nasal health products, which is the leading saline spray for both adults and children in Australia. Other key brands include Painstop analgesic, Rectogesic for rectal discomfort, and the Fab line of nutritional supplements. Care Pharma also includes a line of brands for children including Little Allergies, Little Eyes, and Little Coughs. The brands acquired are complementary to our OTC Healthcare portfolio and are included in our International OTC Healthcare segment.

- 41 -

The Care Pharma acquisition was accounted for in accordance with the Business Combinations topic of the FASB ASC 805.

We prepared an analysis of the fair values of the assets acquired and liabilities assumed as of the date of acquisition. The following table summarizes our allocation of the assets acquired and liabilities assumed as of the July 1, 2013 acquisition date.

(In thousands)	July 1, 2013
Cash acquired	\$ 1,546
Accounts receivable	1,658
Inventories	2,465
Deferred income taxes	283
Prepays and other current assets	647
Property, plant and equipment	163
Goodwill	23,122
Intangible assets	31,502
Total assets acquired	61,386
Accounts payable	1,537
Accrued expenses	2,788
Other long term liabilities	300
Total liabilities assumed	4,625
Net assets acquired	\$ 56,761

Based on this analysis, we allocated \$29.8 million to non-amortizable intangible assets and \$1.7 million to amortizable intangible assets. We are amortizing the purchased amortizable intangible assets on a straight-line basis over an estimated weighted average useful life of 15.1 years. The weighted average remaining life for amortizable intangible assets at December 31, 2014 was 12.3 years.

We also recorded goodwill of \$23.1 million based on the amount by which the purchase price exceeded the fair value of the net assets acquired. The full amount of goodwill is deductible for income tax purposes.

The pro forma effect of this acquisition on revenues and earnings was not material.

Results of Operations

Three Months Ended December 31, 2014 compared to the Three Months Ended December 31, 2013

Total Segment Revenues

(In thousands)	Three Months Ended December 31,				Increase (Decrease)	
	2014	%	2013	%	Amount	%

(*) size of % not meaningful

Total segment revenues for the three months ended December 31, 2014 were \$197.6 million, an increase of \$52.7 million, or 36.4%, versus the three months ended December 31, 2013. This increase was primarily related to an increase in the North American OTC Healthcare segment due to the acquisition of Insight, and higher revenues from certain of our core OTC brands, partially offset by declines in certain product groups. This increase is also attributable to and an increase in the International OTC Healthcare segment due to the acquisition of the Hydralyte brand.

North American OTC Healthcare Segment

Revenues for the North American OTC Healthcare segment increased \$43.2 million, or 37.2%, during the three months ended December 31, 2014 versus the three months ended December 31, 2013.

This increase was primarily due to the acquisition of Insight, which contributed \$43.3 million to the segment overall, and included increases of \$31.0 million, \$6.9 million, and \$2.5 million to the women's health care, dermatologicals,

and cough & cold product groups, respectively. These increases were partially offset by a decline of approximately \$2.7 million in the gastrointestinal product group (exclusive of Insight). Although certain products in our cough & cold product group experienced growth, this was largely offset by declines in Pediacare, which continues to experience declines in revenues and market share due to increasing competition in the cough & cold market.

- 43-

Additionally, in our women's health product group, a third-party manufacturer has failed to keep up with demand leading to product being temporarily out of stock, and therefore, we have begun utilizing an alternative manufacturer to supplement production, which we expect will eliminate out of stock issues in the future. We are also in the process of replacing the current supplier of the active ingredient (which will cease production late in the third quarter of calendar 2015) for certain products in the women's health product group. At this point, we have identified a number of alternative suppliers and expect to have a new supplier in place when necessary. If these supply issues are not resolved timely, we will not have enough product to meet demand, which could result in a significant reduction of net sales and have an adverse impact on our results of operations.

International OTC Healthcare Segment

Revenues for the International OTC Healthcare segment increased \$8.9 million during the three months ended December 31, 2014 versus the three months ended December 31, 2013. This increase was primarily attributable to increases of \$6.4 million and \$2.3 million in the gastrointestinal and eye & ear care product groups, respectively, resulting primarily from the acquisition of Hydralyte in the gastrointestinal product group and increased sales of Murine Tears and Clear Eyes in the eye and ear care product group.

Household Cleaning Segment

Revenues for the Household Cleaning segment increased by \$0.7 million, or 3.4%, during the three months ended December 31, 2014 versus the three months ended December 31, 2013. The increase was primarily due to increased sales in certain distribution channels.

Cost of Sales

The following table presents our cost of sales and cost of sales as a percentage of total segment revenues, by segment for each of the periods presented.

(Amounts in thousands)	Three Months Ended December 31,				Increase (Decrease)	
	2014	%	2013	%	Amount	%
Cost of Sales						
North American OTC Healthcare	\$63,479	39.8	\$45,886	39.5	\$17,593	38.3
International OTC Healthcare	6,247	36.6	3,144	38.3	3,103	98.7
Household Cleaning	16,135	76.0	15,373	74.8	762	5.0
	\$85,861	43.5	\$64,403	44.5	\$21,458	33.3

Cost of sales increased \$21.5 million, or 33.3%, during the three months ended December 31, 2014 versus the three months ended December 31, 2013. This increase was largely due to increased sales volume associated with the acquisitions of Insight and the Hydralyte brand. As a percentage of total revenue, cost of sales decreased to 43.5% in the three months ended December 31, 2014 from 44.5% in the three months ended December 31, 2013. This decrease in cost of sales as a percentage of revenues was primarily due to the favorable impact from lower cost of sales as a percentage of revenue in the International OTC Healthcare segment.

North American OTC Healthcare Segment

Cost of sales for the North American OTC Healthcare segment increased \$17.6 million, or 38.3%, during the three months ended December 31, 2014 versus the three months ended December 31, 2013. This increase is due to higher overall sales volume primarily from the acquisition of Insight and to higher manufacturing costs for certain of our products. As a percentage of North American OTC Healthcare revenues, cost of sales in the North American OTC Healthcare segment remained relatively consistent in the three months ended December 31, 2014 and 2013. We anticipate increasing costs for certain of our products during the next fiscal year based on a manufacturer's notification to us. If we are unable to offset such cost increases by corresponding price increases, the increased costs could negatively impact our gross margins and results of operations.

International OTC Healthcare Segment

Cost of sales for the International OTC Healthcare segment increased \$3.1 million, or 98.7%, during the three months ended December 31, 2014 versus the three months ended December 31, 2013. This increase was due to the acquisition of Hydralyte and an increase in overall sales volume. As a percentage of International OTC Healthcare revenues, cost of sales in the International OTC Healthcare segment decreased to 36.6% in the three months ended December 31, 2014 from 38.3% during the three months ended December 31, 2013. This decrease in cost of sales as a percentage of revenues was primarily due to lower costs associated with the recently acquired Hydralyte brand.

Household Cleaning Segment

Cost of sales for the Household Cleaning segment increased \$0.8 million, or 5.0%, during the three months ended December 31, 2014 versus the three months ended December 31, 2013. As a percentage of Household Cleaning revenues, cost of sales increased to 76.0% during the three months ended December 31, 2014 from 74.8% during the three months ended December 31, 2013. This increase in cost of sales as a percentage of revenues was primarily attributable to an unfavorable product mix.

Gross Profit

The following table presents our gross profit and gross profit as a percentage of total segment revenues, by segment for each of the periods presented.

(Amounts in thousands)	Three Months Ended December 31,				Increase (Decrease)	
	2014	%	2013	%	Amount	%
Gross Profit						
North American OTC Healthcare	\$95,818	60.2	\$70,231	60.5	\$25,587	36.4
International OTC Healthcare	10,828	63.4	5,070	61.7	5,758	113.6
Household Cleaning	5,099	24.0	5,167	25.2	(68)	(1.3)
	\$111,745	56.5	\$80,468	55.5	\$31,277	38.9

Gross profit for the three months ended December 31, 2014 increased \$31.3 million, or 38.9%, when compared with the three months ended December 31, 2013. As a percentage of total revenues, gross profit increased to 56.5% in the three months ended December 31, 2014 from 55.5% in the three months ended December 31, 2013. The increase in gross profit as a percentage of revenues was primarily the result of higher gross margins recognized in the acquired Insight brands and the International OTC Healthcare segment.

North American OTC Healthcare Segment

Gross profit for the North American OTC Healthcare segment increased \$25.6 million, or 36.4%, during the three months ended December 31, 2014 versus the three months ended December 31, 2013. This increase is due to higher overall sales volume primarily from the acquisition of Insight, slightly offset by higher manufacturing costs for certain of our products. As a percentage of North American OTC Healthcare revenues, gross profit remained relatively consistent for the three months ended December 31, 2014 and 2013.

International OTC Healthcare Segment

Gross profit for the International OTC Healthcare segment increased \$5.8 million, or 113.6%, during the three months ended December 31, 2014 versus the three months ended December 31, 2013. This increase was due primarily to the acquisition of Hydralyte. As a percentage of International OTC Healthcare revenues, gross profit increased to 63.4% during the three months ended December 31, 2014 from 61.7% during the three months ended December 31, 2013. The increase was due to the higher gross profit percentage from the recently acquired Hydralyte brand.

Household Cleaning Segment

Gross profit for the Household Cleaning segment decreased \$0.1 million, or 1.3%, during the three months ended December 31, 2014 versus the three months ended December 31, 2013. As a percentage of Household Cleaning revenue, gross profit decreased to 24.0% during the three months ended December 31, 2014 from 25.2% during the three months ended December 31, 2013. The decrease in gross profit as a percentage of revenues was primarily attributable to higher sales through certain distribution channels that have lower gross margins.

Contribution Margin

The following table presents our contribution margin and contribution margin as a percentage of total segment revenues, by segment for each of the periods presented.

(Amounts in thousands)	Three Months Ended December 31,				Increase (Decrease)	
	2014	%	2013	%	Amount	%
Contribution Margin						
North American OTC Healthcare	\$69,039	43.3	\$48,851	42.1	\$20,188	41.3
International OTC Healthcare	8,052	47.2	2,925	35.6	5,127	175.3
Household Cleaning	4,510	21.2	4,463	21.7	47	1.1
	\$81,601	41.3	\$56,239	38.8	\$25,362	45.1

Contribution margin is the financial measure that we use as a primary measure for evaluating segment performance. It is defined as gross profit less advertising and promotional expenses. Contribution margin increased \$25.4 million, or 45.1%, during the three months ended December 31, 2014 versus the three months ended December 31, 2013. The contribution margin increase was primarily the result of the increased gross profit, slightly offset by higher advertising and promotional expenses during the three months ended December 31, 2014 versus the three months ended December 31, 2013.

North American OTC Healthcare Segment

Contribution margin for the North American OTC Healthcare segment increased \$20.2 million, or 41.3%, during the three months ended December 31, 2014 versus the three months ended December 31, 2013. The contribution margin increase was primarily the result of the higher sales volumes primarily associated with the Insight acquisition and the resulting higher gross profit, partially offset by higher advertising and promotional expenses. As a percentage of North American OTC Healthcare revenues, contribution margin for the North American OTC Healthcare segment increased to 43.3% during the three months ended December 31, 2014 from 42.1% during the three months ended December 31, 2013.

International OTC Healthcare Segment

Contribution margin for the International OTC Healthcare segment increased \$5.1 million, or 175.3%, during the three months ended December 31, 2014 versus the three months ended December 31, 2013. As a percentage of International OTC Healthcare revenues, contribution margin from the International OTC Healthcare segment increased to 47.2% during the three months ended December 31, 2014 from 35.6% during the three months ended December 31, 2013. This increase was primarily related to the increased gross profit from the Hydralyte acquisition.

Household Cleaning Segment

Contribution margin for the Household Cleaning segment remained consistent at \$4.5 million during the three months ended December 31, 2014 and December 31, 2013. As a percentage of Household Cleaning revenues, contribution margin from the Household Cleaning segment decreased to 21.2% during the three months ended December 31, 2014 from 21.7% during the three months ended December 31, 2013. The contribution margin decrease as a percentage of revenues was partially due to the gross profit decrease in the Household Cleaning segment discussed above.

General and Administrative

General and administrative expenses were \$19.5 million for the three months ended December 31, 2014 versus \$12.1 million for the three months ended December 31, 2013. The increase in general and administrative expenses was primarily due to higher compensation costs of \$3.3 million due primarily to increased headcount associated with the Insight acquisition, a lease termination charge of \$1.1 million incurred related to the remaining lease payments from the Insight office, higher legal and other professional costs of \$0.7 million and \$0.5 million of acquisition costs related to the purchase of Insight, incurred during the third quarter of fiscal 2015.

Depreciation and Amortization

Depreciation and amortization expense was \$5.2 million and \$3.6 million for the three months ended December 31, 2014 and December 31, 2013, respectively. The increase in depreciation and amortization expense was due to higher intangible asset amortization in the current period due primarily to the intangible assets acquired as a result of the Insight acquisition.

Interest Expense

Net interest expense was \$24.6 million during the three months ended December 31, 2014 versus \$21.3 million during the three months ended December 31, 2013. The increase in interest expense was primarily the result of a higher level of indebtedness,

- 46-

primarily related to the acquisition of Insight. The average indebtedness outstanding increased from \$1.0 billion during the three months ended December 31, 2013 to \$1.7 billion during the three months ended December 31, 2014. The increase in average indebtedness outstanding is the result of additional borrowings under our term loan facility and revolving credit facility to fund our acquisition of Insight. The average cost of borrowing decreased to 5.8% for the three months ended December 31, 2014, from 8.5% for the three months ended December 31, 2013, which is attributed to the refinancing of debt in September 2014.

Income Taxes

The provision for income taxes during the three months ended December 31, 2014 was \$12.2 million versus \$1.1 million during the three months ended December 31, 2013. The effective tax rate during the three months ended December 31, 2014 was 36.5% versus 25.2% during the three months ended December 31, 2013. The increase in the effective tax rate for the three months ended December 31, 2014 was primarily due to the impact of certain non-deductible items related to acquisitions, and a higher gain for tax purposes associated with the sale of the right of use of the Comet brand in certain Eastern European countries in the current year period. The estimated effective tax rate for the remaining quarter of the fiscal year ending March 31, 2015 is expected to be approximately 35.8%, excluding the impact of acquisitions and discrete items that may occur.

Results of Operations

(*) size of % not meaningful

Total segment revenues for the nine months ended December 31, 2014 were \$524.6 million, an increase of \$70.2 million, or 15.5%, versus the nine months ended December 31, 2013. This increase was primarily related to an increase in the North American OTC Healthcare segment due to the acquisition of Insight and an increase in the International OTC Healthcare segment due to the acquisition of the Hydralite brand, partially offset by a decline in some of the other product groups within the North American OTC Healthcare segment.

North American OTC Healthcare Segment

Revenues for the North American OTC Healthcare segment increased \$39.8 million, or 10.8%, during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013.

This increase was primarily due to the acquisition of Insight, which contributed \$56.0 million to the segment overall, with an increase of \$39.7 million, \$9.3 million, and \$3.1 million to the women's health care, dermatologicals, and

cough & cold product groups, respectively. This was partially offset by declines of approximately \$6.2 million and \$4.0 million in the cough & cold (exclusive of Insight) and gastrointestinal and product groups, respectively. The declines in the cough & cold product group revenues are primarily attributable to Pediacare, which continues to experience significant declines in revenues and market share due to increasing competition in the cough & cold market.

- 48-

Additionally, in our women's health product group, a third-party manufacturer has failed to keep up with demand leading to product being temporarily out of stock, and therefore, we have begun utilizing an alternative manufacturer to supplement production, which we expect will eliminate out of stock issues in the future. We are also in the process of replacing the current supplier of the active ingredient (which will cease production late in the third quarter of calendar 2015) for certain products in the women's health product group. At this point, we have identified a number of alternative suppliers and expect to have a new supplier in place when necessary. If these supply issues are not resolved timely, we will not have enough product to meet demand, which could result in a significant reduction of net sales and have an adverse impact on our results of operations.

International OTC Healthcare Segment

Revenues for the International OTC Healthcare segment increased \$27.5 million during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013. The increase was primarily due to the acquisition of the Hydralyte brand and increased sales of Murine Tears in the eye & ear care product group.

Household Cleaning Segment

Revenues for the Household Cleaning segment increased by \$2.9 million, or 4.4%, during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013. The increase was primarily due to increased sales in certain distribution channels.

Cost of Sales

The following table presents our cost of sales and cost of sales as a percentage of total segment revenues, by segment for each of the periods presented.

(Amounts in thousands)	Nine Months Ended December 31,				Increase (Decrease)	
	2014	%	2013	%	Amount	%
Cost of Sales						
North American OTC Healthcare	\$158,005	38.8	\$140,419	38.2	\$17,586	12.5
International OTC Healthcare	17,926	37.2	8,947	43.3	8,979	100.4
Household Cleaning	52,493	76.0	48,248	72.9	4,245	8.8
	\$228,424	43.5	\$197,614	43.5	\$30,810	15.6

Cost of sales increased \$30.8 million, or 15.6%, during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013. This increase was largely due to increased sales volume associated the acquisitions of Insight, Hydralyte and Care Pharma. As a percentage of total revenue, cost of sales remained consistent at 43.5% for the nine months ended December 31, 2014 and 2013.

North American OTC Healthcare Segment

Cost of sales increased \$17.6 million, or 12.5%, during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013. This increase is due to higher overall sales volume primarily from the acquisition of Insight and to higher manufacturing costs for certain of our products. As a percentage of North American OTC Healthcare revenues, cost of sales in the North American OTC Healthcare segment increased to 38.8% in the nine months ended December 31, 2014 from 38.2% during the nine months ended December 31, 2013. This increase in cost of sales as a percentage of revenues was primarily due to an unfavorable product mix in the North American OTC Healthcare segment. We anticipate increasing costs for certain of our products during the next fiscal year based on a manufacturer's notification to us. If we are unable to offset such cost increases by corresponding price increases, the increased costs could negatively impact our gross margins and results of operations.

International OTC Healthcare Segment

Cost of sales for the International OTC Healthcare segment increased \$9.0 million during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013. This increase was due to higher volumes in the products acquired from the acquisition of Care Pharma and the Hydralyte brand. As a percentage of International OTC Healthcare revenues, cost of sales in the International OTC Healthcare segment decreased to 37.2% in the nine months ended December 31, 2014 from 43.3% during the nine months ended December 31, 2013. This decrease in cost of sales as a percentage of revenues was primarily due to lower costs of products acquired with the Care Pharma acquisition and recently acquired Hydralyte brand.

Household Cleaning Segment

Cost of sales for the Household Cleaning segment increased \$4.2 million, or 8.8%, during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013. As a percentage of Household Cleaning revenues, cost of sales increased to 76.0% during the nine months ended December 31, 2014 from 72.9% during the nine months ended December 31, 2013. The increase in the cost of sales as a percentage of revenues was primarily attributable to an unfavorable product mix resulting from higher sales volumes at lower prices in certain distribution channels.

Gross Profit

The following table presents our gross profit and gross profit as a percentage of total segment revenues, by segment for each of the periods presented.

(Amounts in thousands)	Nine Months Ended December 31,				Increase (Decrease)	
	2014	%	2013	%	Amount	%
Gross Profit						
North American OTC Healthcare	\$249,304	61.2	\$227,059	61.8	\$22,245	9.8
International OTC Healthcare	30,229	62.8	11,703	56.7	18,526	158.3
Household Cleaning	16,620	24.0	17,952	27.1	(1,332)	(7.4)
	\$296,153	56.5	\$256,714	56.5	\$39,439	15.4

Gross profit for the nine months ended December 31, 2014 increased \$39.4 million, or 15.4%, when compared with the nine months ended December 31, 2013. As a percentage of total revenues, gross profit remained consistent at 56.5% for nine months ended December 31, 2014 and 2013.

North American OTC Healthcare Segment

Gross profit for the North American OTC Healthcare segment increased \$22.2 million, or 9.8%, during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013. This increase is due to higher overall sales volume primarily from the acquisition of Insight, slightly offset by higher manufacturing costs for certain of our products. As a percentage of North American OTC Healthcare revenues, gross profit decreased slightly to

61.2% during the nine months ended December 31, 2014 from 61.8% during the nine months ended December 31, 2013. This decrease in gross profit as a percentage of revenues was primarily due to an unfavorable product mix in the North American OTC Healthcare segment.

International OTC Healthcare Segment

Gross profit for the International OTC Healthcare segment increased \$18.5 million during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013. This increase was due primarily to higher margins in the brands acquired with the acquisition of Hydralyte and Care Pharma. As a percentage of International OTC Healthcare revenues, gross profit increased to 62.8% during the nine months ended December 31, 2014 from 56.7% during the nine months ended December 31, 2013. The increase was due to the higher gross profit percentage from the recently acquired Care Pharma and Hydralyte brand.

Household Cleaning Segment

Gross profit for the Household Cleaning segment decreased \$1.3 million, or 7.4%, during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013. As a percentage of Household Cleaning revenue, gross profit decreased to 24.0% during the nine months ended December 31, 2014 from 27.1% during the nine months ended December 31, 2013. The decrease was primarily attributable to an unfavorable product mix resulting from higher sales through certain distribution channels that have lower gross margins.

Contribution Margin

The following table presents our contribution margin and contribution margin as a percentage of total segment revenues, by segment for each of the periods presented.

(Amounts in thousands)	Nine Months Ended December 31,				Increase (Decrease)	
	2014	%	2013	%	Amount	%
Contribution Margin						
North American OTC Healthcare	\$ 184,731	45.4	\$ 165,582	45.1	\$ 19,149	11.6
International OTC Healthcare	22,078	45.8	7,848	38.0	14,230	181.3
Household Cleaning	15,060	21.8	15,827	23.9	(767) (4.8)
	\$ 221,869	42.3	\$ 189,257	41.7	\$ 32,612	17.2

Contribution margin is the financial measure that we use as a primary measure for evaluating segment performance. It is defined as gross profit less advertising and promotional expenses. Contribution margin increased \$32.6 million, or 17.2%, during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013. The contribution margin increase was primarily the result of the effects of higher gross profit discussed above partially offset by higher advertising and promotional expenses.

North American OTC Healthcare Segment

Contribution margin for the North American OTC Healthcare segment increased \$19.1 million, or 11.6%, during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013. The contribution margin increase was primarily the result of increased gross profit discussed above, slightly offset by higher advertising and promotional expenses. As a percentage of North American OTC Healthcare revenues, contribution margin for the North American OTC Healthcare segment increased to 45.4% during the nine months ended December 31, 2014 from 45.1% during the nine months ended December 31, 2013. Advertising and promotional spending increased due primarily to the Insight acquisition, partially offset by reduced spending on BC, Goody's and Pediacare, which had new product launches in the prior year.

International OTC Healthcare Segment

Contribution margin for the International OTC Healthcare segment increased \$14.2 million during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013. As a percentage of International OTC Healthcare revenues, contribution margin for the International OTC Healthcare segment increased to 45.8% during the nine months ended December 31, 2014 from 38.0% during the nine months ended December 31, 2013. This increase was primarily related to increased gross profit from the recent acquisitions of the Care Pharma and the Hydralyte brands discussed above.

Household Cleaning Segment

Contribution margin for the Household Cleaning segment decreased \$0.8 million, or 4.8%, during the nine months ended December 31, 2014 versus the nine months ended December 31, 2013. As a percentage of Household Cleaning revenues, contribution margin for the Household Cleaning segment decreased to 21.8% during the nine months ended December 31, 2014 from 23.9% during the nine months ended December 31, 2013. The contribution margin decrease was the result of gross profit changes discussed above, partially offset by lower advertising and promotion spending.

General and Administrative

General and administrative expenses were \$63.6 million for the nine months ended December 31, 2014 versus \$35.4 million for the nine months ended December 31, 2013. The increase in general and administrative expenses was primarily due to \$12.6 million of acquisition costs related to the purchases of Insight and Hydralyte, higher compensation costs of \$9.9 million due primarily to increased headcount associated with the Insight and Hydralyte acquisitions, higher legal and other professional costs of \$2.2 million, and a lease termination charge of \$1.1 million related to the remaining lease payments from the Insight office incurred during the third quarter of fiscal 2015.

Depreciation and Amortization

Depreciation and amortization expense was \$12.0 million for the nine months ended December 31, 2014 versus \$10.2 million for the nine months ended December 31, 2013. The increase in depreciation and amortization expense was due to slightly higher intangible asset amortization in the current period, primarily related to intangible assets associated with the Insight acquisition.

Interest Expense

Net interest expense was \$57.5 million during the nine months ended December 31, 2014 versus \$53.6 million during the nine months ended December 31, 2013. The increase in interest expense was primarily the result of a higher level of indebtedness, primarily related to the acquisition of Insight. The average indebtedness outstanding increased from \$1.0 billion during the nine months ended December 31, 2013 to \$1.3 billion during the nine months ended December 31, 2014. The increase in average indebtedness outstanding is the result of additional borrowings under our 2012 Term B-2 Loan and 2012 ABL Revolver to fund our acquisitions of the Hydralyte brand and Insight. The average cost of borrowing decreased to 5.9% for the nine months ended December 31, 2014, from 7.3% for the nine months ended December 31, 2013, which is attributed to the refinancing of debt in September 2014.

Income Taxes

The provision for income taxes during the nine months ended December 31, 2014 was \$35.5 million versus \$18.4 million during the nine months ended December 31, 2013. The effective tax rate during the nine months ended December 31, 2014 was 39.5% versus 24.6% during the nine months ended December 31, 2013. The increase in the effective tax rate for the nine months ended December 31, 2014 was primarily due to the impact of certain non-deductible items related to acquisitions, and a higher gain for tax purposes associated with the sale of the right of use of the Comet brand in certain Eastern European countries in the current period and a one-time benefit of \$9.1 million due primarily to lower state income taxes enacted in the prior year period. This benefit was primarily related to a law change in the state where we have our major distribution center to tax earnings attributed to in-state revenues only. The estimated effective tax rate for the remaining quarter of the fiscal year ending March 31, 2015 is expected to be approximately 35.8%, excluding the impact of additional acquisitions and discrete items that may occur.

Liquidity and Capital Resources

Liquidity

Our primary source of cash comes from our cash flow from operations. In the past, we have supplemented this source of cash with various debt facilities, primarily in connection with acquisitions. We have financed, and expect to continue to finance our operations over the next twelve months, with a combination of borrowings and funds generated from operations. Our principal uses of cash are for operating expenses, debt service, acquisitions, working capital and capital expenditures.

The following table summarizes our cash provided by (used in) operating activities, investing activities and financing activities as reported in our consolidated statements of cash flows in the accompanying Consolidated Financial Statements.

Edgar Filing: Prestige Brands Holdings, Inc. - Form 10-Q

(In thousands)	Nine Months Ended December 31,	
	2014	2013
Cash provided by (used in):		
Operating Activities	\$ 104,142	\$ 80,860
Investing Activities	(802,857) (57,870
Financing Activities	693,081	55,542

- 52-

Operating Activities

Net cash provided by operating activities was \$104.1 million for the nine months ended December 31, 2014 compared to \$80.9 million for the nine months ended December 31, 2013. The \$23.3 million increase in net cash provided by operating activities was primarily due to a decrease in working capital of \$18.4 million and an increase in non-cash charges of \$7.0 million, offset by a decrease in net income of \$2.1 million.

Working capital is defined as current assets (excluding cash and cash equivalents) minus current liabilities. Working capital decreased primarily due to decreases in inventories and prepaid expenses and other current assets of \$16.7 million and \$10.4 million, respectively, and an increase in accrued liabilities of \$21.8 million. This decrease was partially offset by a decrease in accounts payable of \$24.2 million and an increase in accounts receivable of \$6.4 million.

Non-cash charges increased \$7.0 million primarily due a premium payment on the 2010 Senior Notes tendered in fiscal 2014 of \$12.8 million, and an increase in deferred income taxes of \$9.3 million. The increase in non-cash charges were partially offset by a \$15.0 million loss on the extinguishment of debt incurred in fiscal 2014.

Investing Activities

Net cash used in investing activities was \$802.9 million for the nine months ended December 31, 2014 compared to \$57.9 million for the nine months ended December 31, 2013. The increase in net cash used in investing activities for the nine months ended December 31, 2014 was primarily due to the use of cash for the acquisition of Insight in September 2014 of \$749.7 and for the acquisition of the Hydralyte brand in April 2014 of \$78.0 million, slightly offset by proceeds from the sale of one of the brands we acquired from the Insight acquisition of \$18.5 million and \$10.0 million received as proceeds from the sale of certain rights to sell our Comet brand in certain Eastern European countries to a licensee.

Financing Activities

Net cash provided by financing activities was \$693.1 million for the nine months ended December 31, 2014 compared to net cash provided by financing activities of \$55.5 million for the nine months ended December 31, 2013. The increase in cash provided by financing activities was primarily due to the net borrowings of \$640.0 million under our term loan facility and \$66.1 million under our revolving credit facility in the nine months ended December 31, 2014, while the prior year period resulted in net borrowings under the 2012 ABL Revolver of \$4.5 million. We utilized \$65.0 million of borrowings under the ABL Revolver for the acquisition of the Hydralyte brand and repaid \$58.5 million during the nine months ended December 31, 2014. Due to the net borrowing under the 2012 ABL Revolver and 2012 Term Loan, our outstanding indebtedness increased to \$1,643.6 million at December 31, 2014 from \$937.5 million at March 31, 2014.

Capital Resources

On January 31, 2012, Prestige Brands, Inc. (the "Borrower") (i) issued senior unsecured notes in an aggregate principal amount of \$250.0 million (the "2012 Senior Notes"), (ii) entered into the 2012 Term Loan with a seven-year maturity and a \$50.0 million asset-based revolving credit facility (the "2012 ABL Revolver") with a five-year maturity, and (iii) repaid in full and canceled its then-existing credit facility. The 2012 Term Loan was issued with an original issue discount of 1.5% of the principal amount thereof, resulting in net proceeds to the Borrower of \$650.1 million. In addition to the discount, we incurred \$33.3 million in issuance costs, which were capitalized as deferred financing costs and are being amortized over the terms of the related loans and notes. The Borrower may redeem some or all of the 2012 Senior Notes at redemption prices set forth in the indenture governing the 2012 Senior Notes. The 2012 Senior Notes are guaranteed by Prestige Brands Holdings, Inc. and certain of its 100% domestic owned subsidiaries. Each of these guarantees is joint and several. There are no significant restrictions on the ability of any of the guarantors to obtain funds from their subsidiaries or to make payments to Prestige Brands, Inc. or Prestige Brands Holdings, Inc.

On February 21, 2013, the Borrower entered into an amendment to the 2012 Term Loan ("Term Loan Amendment No. 1"). The Term Loan Amendment No. 1 provided for the refinancing of all of the Borrower's existing Term B Loans with new Term B-1 Loans (the "Term B-1 Loans"). The interest rate on the Term B-1 Loans under Term Loan Amendment No. 1 was based, at the Borrower's option, on a LIBOR rate, plus a margin of 2.75% per annum, with a LIBOR floor of 1.00%, or an alternate base rate, with a floor of 2.00%, plus a margin. The new Term B-1 Loans mature on the same date as the Term B Loans' original maturity date. In addition, Term Loan Amendment No. 1 provided the Borrower with certain additional capacity to prepay subordinated debt, the 2012 Senior Notes and certain other unsecured indebtedness permitted to be incurred under the credit agreement governing the 2012 Term Loan and 2012 ABL Revolver. In connection with Term Loan Amendment No. 1, during the fourth quarter ended March 31, 2013, we recognized a \$1.4 million loss on the extinguishment of debt.

On September 3, 2014, the Borrower entered into Amendment No. 2 ("Term Loan Amendment No. 2") to the 2012 Term Loan. Term Loan Amendment No. 2 provides for (i) the creation of a new class of Term B-2 Loans in an aggregate principal amount of \$720.0 million (the "Term B-2 Loans"), (ii) increased flexibility under the credit agreement governing the 2012 Term Loan and the 2012 ABL Revolver, including additional investment, restricted payment and debt incurrence flexibility and financial

maintenance covenant relief, and (iii) an interest rate on (x) the Term B-1 Loans that is based, at the Borrower's option, on a LIBOR rate plus a margin of 3.125% per annum, with a LIBOR floor of 1.00%, or an alternate base rate, with a floor of 2.00%, plus a margin, and (y) the Term B-2 Loans that is based, at the Borrower's option, on a LIBOR rate plus a margin of 3.50% per annum, with a LIBOR floor of 1.00%, or an alternate base rate, with a floor of 2.00%, plus a margin (with a margin step-down to 3.25% per annum, based upon achievement of a specified secured net leverage ratio).

On September 3, 2014, the Borrower entered into Amendment No. 3 ("ABL Amendment No. 3") to the 2012 ABL Revolver. ABL Amendment No. 3 provides for (i) a \$40.0 million increase in revolving commitments under the 2012 ABL Revolver and (ii) increased flexibility under the credit agreement governing the 2012 Term Loan and the 2012 ABL Revolver, including additional investment, restricted payment and debt incurrence flexibility. Borrowings under the 2012 ABL Revolver, as amended, bear interest at a rate per annum equal to an applicable margin, plus, at the Borrower's option, either (i) a base rate determined by reference to the highest of (a) the Federal Funds rate plus 0.50%, (b) the prime rate of Citibank, N.A., (c) the LIBOR rate determined by reference to the cost of funds for U.S. dollar deposits for an interest period of one month, adjusted for certain additional costs, plus 1.00% or (ii) a LIBOR rate determined by reference to the costs of funds for U.S. dollar deposits for the interest period relevant to such borrowing, adjusted for certain additional costs. The initial applicable margin for borrowings under the 2012 ABL Revolver is 1.75% with respect to LIBOR borrowings and 0.75% with respect to base-rate borrowings. The applicable margin for borrowings under the 2012 ABL Revolver may be increased to 2.00% or 2.25% for LIBOR borrowings and 1.00% or 1.25% for base-rate borrowings, depending on average excess availability under the 2012 ABL Revolver during the prior fiscal quarter. In addition to paying interest on outstanding principal under the 2012 ABL Revolver, we are required to pay a commitment fee to the lenders under the 2012 ABL Revolver in respect of the unutilized commitments thereunder. The initial commitment fee rate is 0.50% per annum. The commitment fee rate will be reduced to 0.375% per annum at any time when the average daily unused commitments for the prior quarter is less than a percentage of total commitments by an amount set forth in the credit agreement covering the 2012 ABL Revolver. We may voluntarily repay outstanding loans under the 2012 ABL Revolver at any time without a premium or penalty. For the nine months ended December 31, 2014, the average interest rate on the amounts borrowed under the 2012 ABL Revolver was 3.1%.

On December 17, 2013, the Borrower issued \$400.0 million of the 2013 Senior Notes. The Borrower may redeem some or all of the 2013 Senior Notes at redemption prices set forth in the indenture governing the 2013 Senior Notes. The 2013 Senior Notes are guaranteed by Prestige Brands Holdings, Inc. and certain of its 100% domestic owned subsidiaries. Each of these guarantees is joint and several. There are no significant restrictions on the ability of any of the guarantors to obtain funds from their subsidiaries or to make payments to the Borrower or Prestige Brands Holdings, Inc. As a result of this issuance, in December 2013, we redeemed \$201.7 million of our 8.25% senior notes due 2018 and the balance of \$48.3 million in January 2014 and repaid approximately \$120.0 million toward our 2012 Term Loan.

As of December 31, 2014, we had an aggregate of \$1,643.6 million of outstanding indebtedness, which consisted of the following:

- \$250.0 million of 8.125% 2012 Senior Notes due 2020;
- \$400.0 million of 5.375% 2013 Senior Notes due 2021;
- \$247.5 million of borrowings under the 2012 Term B-1 Loan;
- \$680.0 million of borrowings under the 2012 Term B-2 Loan; and
- \$66.1 million of borrowings under the 2012 ABL Revolver.

As of December 31, 2014, we had \$68.9 million of borrowing capacity under the 2012 ABL Revolver.

The 2012 Term Loan, as amended, bears interest at a rate per annum equal to an applicable margin plus, at our option, either (i) a base rate determined by reference to the highest of (a) the Federal Funds rate plus 0.50%, (b) the prime rate

of Citibank, N.A., (c) the LIBOR rate determined by reference to the cost of funds for U.S. dollar deposits for an interest period of one month, adjusted for certain additional costs, plus 1.00% and (d) a floor of 2.00% or (ii) a LIBOR rate determined by reference to the costs of funds for U.S. dollar deposits for the interest period relevant to such borrowing, adjusted for certain additional costs, with a floor of 1.00%.

As we deem appropriate, we may from time to time utilize derivative financial instruments to mitigate the impact of changing interest rates associated with our long-term debt obligations or other derivative financial instruments. While we have utilized derivative financial instruments in the past, we did not have any significant derivative financial instruments outstanding at either December 31, 2014 or March 31, 2014 or during any of the periods presented. We have not entered into derivative financial instruments for trading purposes; all of our derivatives were over-the-counter instruments with liquid markets.

Our debt facilities contain various financial covenants, including provisions that require us to maintain certain leverage, interest coverage and fixed charge ratios. The credit agreement governing the 2012 Term Loan and the 2012 ABL Revolver and the

indentures governing the 2012 and 2013 Senior Notes contain provisions that accelerate our indebtedness on certain changes in control and restrict us from undertaking specified corporate actions, including asset dispositions, acquisitions, payment of dividends and other specified payments, repurchasing our equity securities in the public markets, incurrence of indebtedness, creation of liens, making loans and investments and transaction with affiliates. Specifically, we must:

Have a leverage ratio of less than 8.00 to 1.0 for the quarter ended December 31, 2014 (defined as, with certain adjustments, the ratio of our consolidated total net debt as of the last day of the fiscal quarter to our trailing twelve month consolidated net income before interest, taxes, depreciation, amortization, non-cash charges and certain other items ("EBITDA")). Our leverage ratio requirement decreases over time to 3.75 to 1.0 for the quarter ending June 30, 2016 and remains level thereafter;

Have an interest coverage ratio of greater than 2.25 to 1.0 for the quarter ended December 31, 2014 (defined as, with certain adjustments, the ratio of our consolidated EBITDA to our trailing twelve month consolidated cash interest expense). Our interest coverage requirement increases over time to 3.50 to 1.0 for the quarter ending June 30, 2016 and remains level thereafter; and

Have a fixed charge ratio of greater than 1.0 to 1.0 for the quarter ended December 31, 2014 (defined as, with certain adjustments, the ratio of our consolidated EBITDA minus capital expenditures to our trailing twelve month consolidated interest paid, taxes paid and other specified payments). Our fixed charge requirement remains level throughout the term of the agreement.

At December 31, 2014, we were in compliance with the applicable financial and restrictive covenants under the 2012 Term Loan and the 2012 ABL Revolver and the indentures governing the 2012 Senior Notes and the 2013 Senior Notes. Additionally, management anticipates that in the normal course of operations, we will be in compliance with the financial and restrictive covenants during 2015. During the years ended March 31, 2014, 2013 and 2012, we made voluntary principal payments against outstanding indebtedness of \$157.5 million, \$190.0 million and \$25.0 million, respectively, under the 2012 Term Loan. Under the Term Loan Amendment No. 2, we are required to make quarterly payments each equal to 0.25% of the original principal amount of the Term B-2 Loan, with the balance expected to be due on the seventh anniversary of the closing date.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements or financing activities with special-purpose entities.

Inflation

Inflationary factors such as increases in the costs of raw materials, packaging materials, purchased product and overhead may adversely affect our operating results. Although we do not believe that inflation has had a material impact on our financial condition or results from operations for the three and nine month periods ended December 31, 2014, a high rate of inflation in the future could have a material adverse effect on our financial condition or results from operations. Future volatility in crude oil prices may have an adverse impact on transportation costs, as well as certain petroleum based raw materials and packaging material. Although we make efforts to minimize the impact of inflationary factors, including raising prices to our customers, a high rate of pricing volatility associated with crude oil supplies or other raw materials used in our products may have an adverse effect on our operating results.

Critical Accounting Policies and Estimates

Our significant accounting policies are described in the notes to the unaudited Consolidated Financial Statements included elsewhere in this Quarterly Report on Form 10-Q, as well as in our Annual Report on Form 10-K for the fiscal year ended March 31, 2014. While all significant accounting policies are important to our Consolidated Financial Statements, certain of these policies may be viewed as being critical. Such policies are those that are both most important to the portrayal of our financial condition and results of operations and require our most difficult, subjective and complex estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses, or the related disclosure of contingent assets and liabilities. These estimates are based upon our historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ materially from these estimates under different conditions. The most critical accounting estimates are described below.

Revenue Recognition

We recognize revenue when the following revenue recognition criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the selling price is fixed or determinable, (iii) the product has been shipped and the customer takes ownership and assumes the risk of loss, and (iv) collection of the resulting receivable is reasonably assured. We have determined that these criteria are met and the transfer of risk of loss generally occurs when product is received by the customer and, accordingly, we recognize revenue at that time. Provisions are made for estimated discounts related to customer payment terms and estimated product returns at the time of sale based on our historical experience.

As is customary in the consumer products industry, we participate in the promotional programs of our customers to enhance the sale of our products. The cost of these promotional programs varies based on the actual number of units sold during a finite period of time. These promotional programs consist of direct-to-consumer incentives, such as coupons and temporary price reductions, as well as incentives to our customers, such as allowances for new distribution, including slotting fees, and cooperative advertising. Estimates of costs of promotional programs are based on (i) historical sales experience, (ii) the current promotional offering, (iii) forecasted data, (iv) current market conditions, and (v) communication with customer purchasing/marketing personnel. We recognize the cost of such sales incentives by recording an estimate of such cost as a reduction of revenue, at the later of (a) the date the related revenue is recognized, or (b) the date when a particular sales incentive is offered. At the completion of the promotional program, the estimated amounts are adjusted to actual results. Our related promotional expense for the fiscal year ended March 31, 2014 was \$33.4 million. For the three and nine months ended December 31, 2014, our related promotional expense was \$15.6 million and \$36.7 million, respectively. We believe that the estimation methodologies employed, combined with the nature of the promotional campaigns, make the likelihood remote that our obligation would be misstated by a material amount. However, for illustrative purposes, had we underestimated the promotional program rate by 10% for the fiscal year ended March 31, 2014, our sales and operating income would have been adversely affected by approximately \$3.3 million. Net income would have been adversely affected by approximately \$2.1 million. Similarly, had we underestimated the promotional program rate by 10% for the three and nine months ended December 31, 2014, our sales and operating income would have been adversely affected by approximately \$1.6 million and \$3.7 million, respectively. Net income would have been adversely affected by approximately \$1.0 million and \$2.2 million, respectively, for the three and nine months ended December 31, 2014.

We also periodically run coupon programs in Sunday newspaper inserts, on our product website or as on-package instant redeemable coupons. We utilize a national clearinghouse to process coupons redeemed by customers. At the time a coupon is distributed, a provision is made based upon historical redemption rates for that particular product, information provided as a result of the clearinghouse's experience with coupons of similar dollar value, the length of time the coupon is valid, and the seasonality of the coupon drop, among other factors. For the fiscal year ended March 31, 2014, we had 225 coupon events. The amount recorded against revenues and accrued for these events during 2014 was \$5.6 million. Cash settlement of coupon redemptions during 2014 was \$3.8 million. During the three

and nine months ended December 31, 2014, we had 46 and 174 coupon events, respectively. The amount recorded against revenue and accrued for these events during the three and nine months ended December 31, 2014 was \$0.9 million and \$3.5 million, respectively. Cash settlement of coupon redemptions during the three and nine months ended December 31, 2014 was \$1.1 million and \$2.4 million, respectively.

Allowances for Product Returns

Due to the nature of the consumer products industry, we are required to estimate future product returns. Accordingly, we record an estimate of product returns concurrent with the recording of sales. Such estimates are made after analyzing (i) historical return rates, (ii) current economic trends, (iii) changes in customer demand, (iv) product acceptance, (v) seasonality of our product offerings, and (vi) the impact of changes in product formulation, packaging and advertising.

We construct our returns analysis by looking at the previous year's return history for each brand. Subsequently, each month, we estimate our current return rate based upon a rolling twelve month average return rate and review that calculated rate for reasonableness, giving consideration to the other factors described above. Our historical return rate has been relatively stable; for

example, for the fiscal years ended March 31, 2014, 2013 and 2012, returns represented 2.2%, 2.9% and 2.9%, respectively, of gross sales. For the three and nine months December 31, 2014, product returns represented 4.3% and 4.2% of gross sales, respectively. At December 31, 2014 and March 31, 2014, the allowance for sales returns and cash discounts was \$9.5 million and \$7.0 million, respectively.

While we utilize the methodology described above to estimate product returns, actual results may differ materially from our estimates, causing our future financial results to be adversely affected. Among the factors that could cause a material change in the estimated return rate would be significant unexpected returns with respect to a product or products that comprise a significant portion of our revenues. Based upon the methodology described above and our actual returns experience, management believes the likelihood of such an event remains remote. Over the last three years, our actual product return rate has stayed within a range of 2.2% to 2.9% of gross sales. However, a hypothetical increase of 0.1% in our estimated return rate as a percentage of gross sales would have adversely affected our reported sales and operating income for the fiscal year ended March 31, 2014 by approximately \$0.7 million. Net income would have been reduced by approximately \$0.4 million. A hypothetical increase of 0.1% in our estimated return rate as a percentage of gross sales for the nine months ended December 31, 2014 would have reduced our reported sales and operating income by approximately \$0.2 million and \$0.6 million, respectively, while our net income would have been reduced by approximately \$0.1 million and \$0.4 million, respectively.

Lower of Cost or Market for Obsolete and Damaged Inventory

We value our inventory at the lower of cost or market value. Accordingly, we reduce our inventories for the diminution of value resulting from product obsolescence, damage or other issues affecting marketability, equal to the difference between the cost of the inventory and its estimated market value. Factors utilized in the determination of estimated market value include: (i) current sales data and historical return rates, (ii) estimates of future demand, (iii) competitive pricing pressures, (iv) new product introductions, (v) product expiration dates, and (vi) component and packaging obsolescence.

Many of our products are subject to expiration dating. As a general rule, our customers will not accept goods with expiration dating of less than 12 months from the date of delivery. To monitor this risk, management utilizes a detailed compilation of inventory with expiration dating between zero and 15 months and reserves for 100% of the cost of any item with expiration dating of 12 months or less. Inventory obsolescence costs charged to operations were \$2.5 million for the fiscal year ended March 31, 2014, while for the three and nine months ended December 31, 2014, we recorded obsolescence costs of \$2.5 million and \$5.1 million, respectively. A hypothetical increase of 1.0% in our allowance for obsolescence at March 31, 2014 would have adversely affected our reported operating income and net income for the fiscal year ended March 31, 2014 by approximately \$0.1 million. Similarly, a hypothetical increase of 1.0% in our obsolescence allowance for the nine months ended December 31, 2014 would have adversely affected each of our reported operating income and net income by less than approximately \$0.1 million and \$0.1 million, respectively.

Allowance for Doubtful Accounts

In the ordinary course of business, we grant non-interest bearing trade credit to our customers on normal credit terms. We maintain an allowance for doubtful accounts receivable, which is based upon our historical collection experience and expected collectability of the accounts receivable. In an effort to reduce our credit risk, we (i) establish credit limits for all of our customer relationships, (ii) perform ongoing credit evaluations of our customers' financial condition, (iii) monitor the payment history and aging of our customers' receivables, and (iv) monitor open orders against an individual customer's outstanding receivable balance.

We establish specific reserves for those accounts that file for bankruptcy, have no payment activity for 180 days or have reported major negative changes to their financial condition. The allowance for bad debts amounted to 1.4% and 1.6% of accounts receivable at December 31, 2014 and March 31, 2014, respectively. Bad debt expense for the fiscal

year ended March 31, 2014 was \$0.1 million, while during the three and nine months ended December 31, 2014, we recorded bad debt expense of less than \$0.1 million.

While management believes that it is diligent in its evaluation of the adequacy of the allowance for doubtful accounts, an unexpected event, such as the bankruptcy filing of a major customer, could have an adverse effect on our future financial results. A hypothetical increase of 0.1% in our bad debt expense as a percentage of net sales during the fiscal year ended March 31, 2014 would have resulted in a decrease in each of reported operating income and reported net income of approximately \$0.1 million. Similarly, a hypothetical increase of 0.1% in our bad debt expense as a percentage of sales for the nine months ended December 31, 2014 would have resulted in a decrease in each of reported operating income and reported net income of less than \$0.1 million.

Valuation of Intangible Assets and Goodwill

Goodwill and intangible assets amounted to \$2,436.0 million and \$1,585.7 million at December 31, 2014 and March 31, 2014, respectively. At December 31, 2014, goodwill and intangible assets were apportioned among our three operating segments as follows:

(In thousands)	North American OTC Healthcare	International OTC Healthcare	Household Cleaning	Consolidated
Goodwill	\$263,411	\$21,681	\$6,800	\$291,892
Intangible assets, net

Total intangible assets, net	1,916,254	92,699	135,131	2,144,084
Total goodwill and intangible assets, net	\$2,179,665	\$114,380	\$141,931	\$2,435,976

Our Chloraseptic, Clear Eyes, Compound W, Dramamine, Efferdent, Luden's, PediaCare, BC, Goody's, Ecotrin, Beano, Gaviscon, Tagamet, Fiber Choice, Sominex and Debrox brands comprise the majority of the value of the intangible assets within the North American OTC Healthcare segment. Our Fess and Hydralyte brands comprise the majority of the value of the intangible assets within the International OTC Healthcare segment. The Chore Boy, Comet, and Spic and Span brands comprise substantially all of the intangible asset value within the Household Cleaning segment.

On September 3, 2014, we completed the acquisition of Insight. In connection with this acquisition, we allocated \$724.4 million to intangible assets based on our preliminary analysis of the fair values of the assets acquired and liabilities assumed as of the date of the acquisition.

In connection with the acquisition of Insight, we also recorded goodwill based on the amount by which the purchase price exceeded the fair value of the net assets acquired. Goodwill related to the acquisition of Insight is fully deductible for income tax purposes.

On April 30, 2014, we completed the acquisition of the Hydralyte brand. In connection with this acquisition, we allocated \$73.6 million to intangible assets based on our preliminary analysis of the fair values of the assets acquired and liabilities assumed as of the date of acquisition.

- 58-

In connection with the acquisition of the Hydralyte brand, we also recorded goodwill based on the amount by which the purchase price exceeded the fair value of the net assets acquired. Goodwill related to the acquisition of the Hydralyte brand is not deductible for income tax purposes.

Goodwill and intangible assets comprise substantially all of our assets. Goodwill represents the excess of the purchase price over the fair value of assets acquired and liabilities assumed in a purchase business combination. Intangible assets generally represent our trademarks, brand names and patents. When we acquire a brand, we are required to make judgments regarding the value assigned to the associated intangible assets, as well as their respective useful lives. Management considers many factors both prior to and after the acquisition of an intangible asset in determining the value, as well as the useful life, assigned to each intangible asset that we acquire or continue to own and promote.

The most significant factors are:

Brand History

A brand that has been in existence for a long period of time (e.g., 25, 50 or 100 years) generally warrants a higher valuation and longer life (sometimes indefinite) than a brand that has been in existence for a very short period of time. A brand that has been in existence for an extended period of time generally has been the subject of considerable investment by its previous owner(s) to support product innovation and advertising and promotion.

Market Position

Consumer products that rank number one or two in their respective market generally have greater name recognition and are known as quality product offerings, which warrant a higher valuation and longer life than products that lag in the marketplace.

Recent and Projected Sales Growth

Recent sales results present a snapshot as to how the brand has performed in the most recent time periods and represent another factor in the determination of brand value. In addition, projected sales growth provides information about the strength and potential longevity of the brand. A brand that has both strong current and projected sales generally warrants a higher valuation and a longer life than a brand that has weak or declining sales. Similarly, consideration is given to the potential investment, in the form of advertising and promotion, that is required to reinvigorate a brand that has fallen from favor.

History of and Potential for Product Extensions

Consideration also is given to the product innovation that has occurred during the brand's history and the potential for continued product innovation that will determine the brand's future. Brands that can be continually enhanced by new product offerings generally warrant a higher valuation and longer life than a brand that has always "followed the leader".

After consideration of the factors described above, as well as current economic conditions and changing consumer behavior, management prepares a determination of the intangible assets' values and useful lives based on its analysis. Under accounting guidelines, goodwill is not amortized, but must be tested for impairment annually, or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of the reporting unit below the carrying amount. In a similar manner, indefinite-lived assets are not amortized. They are also subject to an annual impairment test, or more frequently if events or changes in circumstances indicate that the asset's carrying value more likely than not exceeds its fair market value. Additionally, at each reporting period an evaluation must be made to determine whether events and circumstances continue to support an indefinite useful life. Intangible assets with finite lives are amortized over their respective estimated useful lives and must also be tested for impairment whenever events or changes in circumstances indicate that the carrying value of the asset may

not be recoverable and exceeds its fair value.

On an annual basis, during the fourth fiscal quarter of each year, or more frequently if conditions indicate that the carrying value of the asset may not be recoverable, management performs a review of both the values and, if applicable, useful lives assigned to goodwill and intangible assets and tests for impairment.

We report goodwill and indefinite-lived intangible assets in each of our three reportable segments: North American OTC Healthcare, International OTC Healthcare and Household Cleaning. We identify our reporting units in accordance with the FASB ASC Subtopic 280-10, which is at the brand level and one level below the operating segment level. The carrying value and fair value for intangible assets and goodwill for a reporting unit are calculated based on the key assumptions and valuation methodologies previously discussed. As a result, any material changes to these assumptions could require us to record additional impairment in the future.

- 59-

We have experienced declines in revenues and profitability of certain brands in the North American OTC Healthcare segment during the three and nine months ended December 31 2014, compared to the same periods during the prior year. Sustained or significant future declines in revenue, profitability, other adverse changes in expected operating results, and/or unfavorable changes in other economic factors used to estimate fair values of certain brands could indicate that fair value no longer exceeds the carrying value, in which case a non-cash impairment charge may be recorded in future periods. In particular, we continue to experience increasing competitive pressures for certain brands within our pediatric cough and cold and gastrointestinal product groups. Specifically in the cough and cold product group, although we expected revenues to decline with the return to the market of competing products, such declines have been steeper than expected. Current quarter and year-to-date revenues from our Pediacare brand have declined significantly as compared to the corresponding periods in the prior year, due primarily to competition in the category, including new product introductions and lost distribution. As a result, we have increased our promotional spending in the short term, which resulted in lower revenues and profitability. Based on these factors, we considered whether these conditions would indicate that the fair value of the reporting unit would no longer exceed the carrying value, and accordingly, we performed an interim impairment analysis.

We developed our cash flow forecasts based on existing orders, expected future consumer demand and general market conditions. In performing our analysis, our cash flow forecast assumptions included lower advertising investment for the brand, stabilizing revenue declines beginning with the current cough and cold season, reducing promotional spending that is ineffective, and brand growth more in line with the category. We discounted the cash flow forecasts using a weighted average cost of capital as of December 31, 2014. Based on completion of step 1 of the impairment analysis for goodwill and indefinite lived intangible assets, the fair value of the Pediacare reporting unit and indefinite lived intangible assets, exceed their book value and therefore, we concluded that no impairment existed as of December 31, 2014 and that step 2 of the impairment test was not required. The carrying value for the Pediacare reporting unit at December 31, 2014 is approximately \$45.8 million, or approximately 25% below fair value.

Significant judgment, and the use of estimates and assumptions, is required to estimate the fair value of reporting units, including estimating future cash flows, future market conditions, and determining the appropriate discount rates, growth rates, and operating margins, among others. Our discounted cash flow analyses take into account our assumptions on various items such as revenue and expense growth rates, which are based upon our historical experience and projections of future activity, factoring in customer demand, and a cost structure necessary to achieve the related revenues. Additionally, these discounted cash flow analyses take into account our expected amounts of working capital and weighted average cost of capital. Due to recent acquisitions, we plan to perform a strategic review of all of our brands after our fiscal year end and a future change in strategy, could result in an impairment of this brand in particular. As we are in the middle of the cough and cold season, if we do not stabilize our revenue declines, the brand could be impaired. To the extent that this reporting unit and intangible asset exceeds its fair value, we will recognize an impairment loss in an amount necessary to reduce the carrying value of the asset to its fair value. We will continue to assess intangible assets of our entire portfolio of brands at the brand level to identify conditions that indicate the carrying value may not be recoverable and perform impairment analysis as deemed prudent. We believe our assumptions are reasonable, however, there can be no assurance that our estimates and assumptions made for purposes of our impairment testing, at the annual date and the interim testing date, will prove to be accurate predictions of the future. Continued declines in revenues, higher advertising and promotional costs or a strategic change in direction may cause us to perform step 2, and could result in an impairment. Additionally, changes in the estimates and assumptions noted above, could result in a significant impairment charge in the future. It is not possible at this time to determine if any such future impairment charge would result.

Goodwill

As of March 31, 2014, we had 20 reporting units with goodwill, including six reporting units resulting from the acquisition of the 17 brands from GlaxoSmithKline plc in 2012, and five reporting units resulting from the acquisition of the Care Pharma brands. The aggregate fair value exceeded the carrying value by 53.1%. One individual reporting

unit's fair value exceeded its carrying value by less than 10.0%. That reporting unit's associated carrying value of goodwill and intangible assets amounted to \$0.8 million at March 31, 2014. Additionally, certain brands, including Pediacare and certain of our Household Cleaning brands, have experienced recent revenue declines. While certain reporting units' fair value exceeded their carrying value by less than 10.0%, should such revenue declines continue, the fair value of the corresponding reporting units may no longer exceed their carrying value and we would be required to record an impairment charge. As part of our annual test for impairment of goodwill, management estimates the discounted cash flows of each reporting unit, which is at the brand level and one level below the operating segment level, to estimate their respective fair values. In performing this analysis, management considers the same types of information as listed below with regard to finite-lived intangible assets. In the event that the carrying amount of the reporting unit exceeds the fair value, management would then be required to allocate the estimated fair value of the assets and liabilities of the reporting unit as if the unit was acquired in a business combination, thereby revaluing the carrying amount of goodwill. Future events, such as competition, technological advances, sustained or significant adverse changes in operating results of certain brands, and reductions in advertising support for our trademarks and trade names, could cause subsequent evaluations to utilize different

- 60-

assumptions, and we may be required to record additional impairment charges in the future. No impairment charge was recorded during the nine months ended December 31, 2014.

Indefinite-Lived Intangible Assets

In a manner similar to finite-lived intangible assets, at each reporting period, management analyzes current events and circumstances to determine whether the indefinite life classification for a trademark or trade name continues to be valid. If circumstances warrant a change to a finite life, the carrying value of the intangible asset would then be amortized prospectively over the estimated remaining useful life.

Management tests the indefinite-lived intangible assets for impairment by comparing the carrying value of the intangible asset to its estimated fair value. Since quoted market prices are seldom available for trademarks and trade names such as ours, we utilize present value techniques to estimate fair value. Accordingly, management's projections are utilized to assimilate all of the facts, circumstances and expectations related to the trademark or trade name and estimate the cash flows over its useful life. In performing this analysis, management considers the same types of information as listed below with regard to finite-lived intangible assets. Once that analysis is completed, a discount rate is applied to the cash flows to estimate fair value. In a manner similar to goodwill, future events, such as competition, technological advances, sustained or significant adverse changes in operating results of certain brands, and reductions in advertising support for our trademarks and trade names, could cause subsequent evaluations to utilize different assumptions.

Finite-Lived Intangible Assets

As mentioned above, when events or changes in circumstances indicate the carrying value of the assets may not be recoverable, management performs a review to ascertain the impact of events and circumstances on the estimated useful lives and carrying values of our trademarks and trade names. In connection with this analysis, management:

- Reviews period-to-period sales and profitability by brand;
- Analyzes industry trends and projects brand growth rates;
- Prepares annual sales forecasts;
- Evaluates advertising effectiveness;
- Analyzes gross margins;
- Reviews contractual benefits or limitations;
- Monitors competitors' advertising spend and product innovation;
- Prepares projections to measure brand viability over the estimated useful life of the intangible asset; and
- Considers the regulatory environment, as well as industry litigation.

If analysis of any of the aforementioned factors warrants a change in the estimated useful life of the intangible asset, management will reduce the estimated useful life and amortize the carrying value prospectively over the shorter remaining useful life. Management's projections are utilized to assimilate all of the facts, circumstances and expectations related to the trademark or trade name and estimate the cash flows over its useful life. In the event that the long-term projections indicate that the carrying value is in excess of the undiscounted cash flows expected to result from the use of the intangible assets, management is required to record an impairment charge. Once that analysis is completed, a discount rate is applied to the cash flows to estimate fair value. The impairment charge is measured as the excess of the carrying amount of the intangible asset over fair value, as calculated using the discounted cash flow analysis. Future events, such as competition, technological advances, sustained or significant adverse changes in operating results of certain brands, and reductions in advertising support for our trademarks and trade names, could cause subsequent evaluations to utilize different assumptions.

Impairment Analysis

We estimate the fair value of our indefinite-lived intangible assets and goodwill using a discounted cash flow method. This discounted cash flow methodology is a widely-accepted valuation technique to estimate fair value utilized by market participants in the transaction evaluation process and has been applied consistently. In addition, we considered our market capitalization at December 31, 2014, as compared to the aggregate fair values of our reporting units, to assess the reasonableness of our estimates pursuant to the discounted cash flow methodology. As a result of our analysis, we did not record an impairment charge during the nine months ended December 31, 2014. However, sustained or significant future declines in revenue, profitability, other adverse changes in expected operating results, and/or unfavorable changes in other economic factors used to estimate fair values of specific brands could require us to record a non-cash impairment charge in future periods. Management will continue to assess as necessary individual brands that would potentially be impacted by the indicators described above that might occur in the future, which would trigger consideration for impairment.

The discount rate utilized in the analysis, as well as future cash flows, may be influenced by such factors as changes in interest rates and rates of inflation. Additionally, should the related fair values of goodwill and intangible assets be adversely affected as

- 61-

a result of declining sales or margins caused by competition, changing consumer preferences, technological advances or reductions in advertising and promotional expenses, we may be required to record impairment charges in the future. However, no impairment charge was recorded during the nine months ended December 31, 2014.

Stock-Based Compensation

The Compensation and Equity topic of the FASB ASC 718 requires us to measure the cost of services to be rendered based on the grant-date fair value of an equity award. Compensation expense is to be recognized over the period during which an employee is required to provide service in exchange for the award, generally referred to as the requisite service period. Information utilized in the determination of fair value includes the following:

- Type of instrument (i.e., restricted shares vs. an option, warrant or performance shares);
- Strike price of the instrument;
- Market price of our common stock on the date of grant;
- Discount rates;
- Duration of the instrument; and
- Volatility of our common stock in the public market.

Additionally, management must estimate the expected attrition rate of the recipients to enable it to estimate the amount of non-cash compensation expense to be recorded in our financial statements. While management uses diligent analysis to estimate the respective variables, a change in assumptions or market conditions, as well as changes in the anticipated attrition rates, could have a significant impact on the future amounts recorded as non-cash compensation expense. We recorded non-cash compensation expense of \$4.9 million and \$3.8 million for the nine months ended December 31, 2014 and 2013, respectively.

Loss Contingencies

Loss contingencies are recorded as liabilities when it is probable that a liability has been incurred and the amount of such loss is reasonably estimable. Contingent losses are often resolved over longer periods of time and involve many factors, including:

- Rules and regulations promulgated by regulatory agencies;
- Sufficiency of the evidence in support of our position;
- Anticipated costs to support our position; and
- Likelihood of a positive outcome.

Recent Accounting Pronouncements

In January 2015, the FASB issued Accounting Standards Update ("ASU") 2015-01. The amendments in this update eliminate the concept of extraordinary items in Subtopic 225-20, which required entities to consider whether an underlying event or transaction is extraordinary. However, the amendments retain the presentation and disclosure guidance for items that are unusual in nature or occur infrequently. The amendments in this update are effective for fiscal years, and interim periods within those years, beginning after December 15, 2015. The adoption of ASU 2015-01 is not expected to have a material impact on our Consolidated Financial Statements.

In November 2014, the FASB issued ASU 2014-17, Pushdown Accounting, which clarifies whether and at what threshold an acquired entity that is a business or nonprofit activity can apply pushdown accounting in its separate financial statements. This ASU provides companies with the option to apply pushdown accounting in its separate financial statements upon occurrence of an event in which an acquirer obtains control of the acquired entity. The election to apply pushdown accounting can be made either in the period in which the change of control occurred, or in a subsequent period. The amendments in this update were effective November 18, 2014. The adoption of ASU 2014-17 did not have a material impact on our Consolidated Financial Statements.

In November 2014, the FASB issued ASU 2014-16, Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share is More Akin to Debt or to Equity. The amendments in this update clarify how current GAAP should be interpreted in evaluating economic characteristics and risks and ultimately determining whether the host contract in a hybrid financial instrument that is issued in the form of a share is more akin to debt or to equity. The effects of initially adopting the amendments in this update should be applied on a modified retrospective basis to existing hybrid financial instruments issued in the form of a share as of the beginning of the fiscal year for which the amendments are effective. The amendments in this update are effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The adoption of ASU 2014-16 is not expected to have a material impact on our Consolidated Financial Statements.

In August 2014, the FASB issued ASU 2014-15, Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern. This amendment states that in connection with preparing financial statements for each annual and interim reporting

- 62-

period, an entity's management should evaluate whether there are conditions or events that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are available to be issued, when applicable). The amendments in this update are effective for the annual reporting period beginning after December 15, 2016, and for annual periods and interim periods thereafter. Early application is permitted. The adoption of ASU 2014-15 is not expected to have a material impact on our Consolidated Financial Statements.

In June 2014, the FASB issued ASU 2014-12, Accounting for Share-Based Payments When the Terms of an Award Provide that a Performance Target Could Be Achieved after the Requisite Service Period, which requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. As such, the new guidance does not allow for a performance target that affects vesting to be reflected in estimating the fair value of the award at the grant date. The amendments to this update are effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015. Early adoption is permitted. Entities may apply the amendments in this update either prospectively to all awards granted or modified after the effective date or retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented in the financial statements and to all new or modified awards thereafter. We currently do not have any outstanding share-based payments with a performance target. The adoption of ASU 2014-12 is not expected to have a material impact on our Consolidated Financial Statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers - Topic 606, which supersedes the revenue recognition requirements in FASB ASC 605. The new guidance primarily states that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The amendments in this update are effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted. We are evaluating the impact of adopting this prospective guidance on our consolidated results of operations and financial condition.

In April 2014, the FASB issued ASU 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity. Under the new guidance, only disposals representing a strategic shift in operations should be presented as discontinued operations. Those strategic shifts should have a major effect on the organization's operations and financial results. Examples include a disposal of a major geographic area, a major line of business, or a major equity method investment. In addition, the new guidance requires expanded disclosures about discontinued operations that will provide financial statement users with more information about the assets, liabilities, income, and expenses of discontinued operations. Early adoption is permitted, but only for disposals (or classifications as held for sale) that have not been reported in financial statements previously issued or available for issuance. The amendments in this update must be applied prospectively to all disposals (or classifications as held for sale) of components of an entity that occur within annual periods beginning on or after December 15, 2014, and interim periods within those years. The adoption of ASU 2014-08 is not expected to have a material impact on our Consolidated Financial Statements.

Management has reviewed and continues to monitor the actions of the various financial and regulatory reporting agencies and is currently not aware of any other pronouncement that could have a material impact on our consolidated financial position, results of operations or cash flows.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 (the “PSLRA”), including, without limitation, information within Management’s Discussion and Analysis of Financial Condition and Results of Operations. The following cautionary statements are being made pursuant to the provisions of the PSLRA and with the intention of obtaining the benefits of the “safe harbor” provisions of the PSLRA. Although we believe that our expectations are based on reasonable assumptions, actual results may differ materially from those in the forward-looking statements.

Forward-looking statements speak only as of the date of this Quarterly Report on Form 10-Q. Except as required under federal securities laws and the rules and regulations of the SEC, we do not have any intention to update any forward-looking statements to reflect events or circumstances arising after the date of this Quarterly Report on Form 10-Q, whether as a result of new information, future events or otherwise. As a result of these risks and uncertainties, readers are cautioned not to place undue reliance on forward-looking statements included in this Quarterly Report on Form 10-Q or that may be made elsewhere from time to time by, or on behalf of, us. All forward-looking statements attributable to us are expressly qualified by these cautionary statements.

These forward-looking statements generally can be identified by the use of words or phrases such as “believe,” “anticipate,” “expect,” “estimate,” “project,” “strategy,” “future,” “seek,” “may,” “would,” “will,” “will be,” or other similar words and phrases. Forward-looking statements and our plans and expectations are subject to a number of risks and uncertainties that could cause actual results to differ materially from those anticipated, and our business in general is subject to such risks. For more information, see “Risk Factors” contained in Part I, Item 1A., of our Annual Report on Form 10-K for our fiscal year ended March 31, 2014 and in Part II, Item 1A., of this Quarterly Report on Form 10-Q. In addition, our expectations or beliefs concerning future events involve risks and uncertainties, including, without limitation:

- The high level of competition in our industry and markets;
- Our ability to increase organic growth via new product introductions or line extensions;
- Our ability to invest successfully in research and development;
- Our dependence on a limited number of customers for a large portion of our sales;
- Changes in inventory management practices by retailers;
- Our ability to grow our international sales;
- General economic conditions affecting sales of our products and their respective markets;
- Business, regulatory and other conditions affecting retailers;
- Changing consumer trends, additional store brand competition or other pricing pressures which may cause us to lower our prices;
- Our dependence on third-party manufacturers to produce the products we sell;
- Price increases for raw materials, labor, energy and transportation costs;
- Disruptions in our distribution center;
- Acquisitions, dispositions or other strategic transactions diverting managerial resources, the incurrence of additional liabilities or integration problems associated with such transactions;
- Actions of government agencies in connection with our products or regulatory matters governing our industry;
- Product liability claims, product recalls and related negative publicity;
- Our ability to protect our intellectual property rights;
- Our dependence on third parties for intellectual property relating to some of the products we sell;
- Our assets being comprised virtually entirely of goodwill and intangibles and possible changes in their value based on adverse operating results;
- Our dependence on key personnel;

- Shortages of supply of sourced goods or interruptions in the manufacturing of our products;
- The costs associated with any claims in litigation or arbitration and any adverse judgments rendered in such litigation or arbitration;
- Our level of indebtedness, and possible inability to service our debt;
- Our ability to obtain additional financing; and
- The restrictions imposed by our financing agreements on our operations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to changes in interest rates because our 2012 Term Loan and 2012 ABL Revolver are variable rate debt. Interest rate changes generally do not significantly affect the market value of the 2012 Term Loan and the 2012 ABL Revolver but do affect the amount of our interest payments and, therefore, our future earnings and cash flows, assuming other factors are held constant. At December 31, 2014, we had variable rate debt of approximately \$927.5 million under our 2012 Term Loan and \$66.1 million under our ABL Revolver.

Holding other variables constant, including levels of indebtedness, a one percentage point increase in interest rates on our variable rate debt would have had an adverse impact on pre-tax earnings and cash flows for the three and nine months ended December 31, 2014 of approximately \$2.6 million and \$4.8 million, respectively.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company's management, with the participation of its Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934 (the "Exchange Act"), as of December 31, 2014. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of December 31, 2014, the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in the reports the Company files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There have been no changes during the quarter ended December 31, 2014 in the Company's internal control over financial reporting, as defined in Rule 13a-15(f) of the Exchange Act, that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1A. RISK FACTORS

In addition to the risk factors set forth below and the other information set forth in this Quarterly Report on Form 10-Q, you should carefully consider the risk factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended March 31, 2014, which could materially affect our business, financial condition or future results of operations. The risks described below and in our Annual Report on Form 10-K are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and results of operations. The information below amends, updates and should be read in conjunction with the risk factors and information disclosed in our Annual Report on Form 10-K for the year ended March 31, 2014.

The high level of competition in our industry, much of which comes from competitors with greater resources, could adversely affect our business, financial condition and results from operations.

The business of selling brand name consumer products in the OTC Healthcare and Household Cleaning categories is highly competitive. These markets include numerous manufacturers, distributors, marketers and retailers that actively compete for consumers' business both in the United States and abroad. Many of these competitors are larger and have substantially greater resources than we do, and may therefore have the ability to spend more aggressively on research and development, advertising and marketing, and to respond more effectively to changing business and economic conditions. If this were to occur, it could have a material adverse effect on our business, financial condition and results from operations.

We compete for customers' attention based on a number of factors, including brand recognition, product quality, performance, price and product availability at the retail level. Advertising, promotion, merchandising and packaging and the timing of new product introductions and line extensions also have a significant impact on consumer buying decisions and, as a result, on our sales. Additionally, the return to the market of previously recalled competitive products could impact our sales. The structure and quality of our sales force, as well as sell-through of our products, affect the continued offering of our products, in-store position, wall display space and inventory levels in retail stores. If we are unable to maintain our current distribution network, product

offerings in retail stores, inventory levels and in-store positioning of our products, our sales and operating results will be adversely affected. Our markets also are highly sensitive to the introduction of new products, which may rapidly capture a significant share of the market. An increase in the number of product innovations by our competitors or the failure of a new product launch by the Company could have a material adverse effect on our business, financial condition and results from operations.

In addition, competitors may attempt to gain market share by offering products at prices at or below those typically offered by us. Competitive pricing may require us to reduce prices, which may result in lost sales or a reduction of our profit margins. Future price adjustments, product changes or new product introductions by our competitors or our inability to react with price adjustments, product changes or new product introductions of our own could result in a loss of market share, which could have a material adverse effect on our business, financial condition and results from operations.

We depend on a limited number of customers with whom we have no long-term agreements for a large portion of our gross sales and the loss of one or more of these customers could reduce our gross sales and have a material adverse effect on our financial condition and results of operations.

For the three and nine months ended December 31, 2014, Walmart, which accounted for approximately 16.5% and 17.4%, respectively, of our gross sales, was our only customer that accounted for 10% or more of our sales. We expect that for future periods, our top five and top ten customers, including Walmart, will, in the aggregate, continue to account for a large portion of our sales. The loss of one or more of our top customers, any significant decrease in sales to these customers based on inventory management or otherwise, or a significant decrease in our retail display space in any of these customers' stores, could reduce our sales and have a material adverse effect on our financial condition and results from operations.

In addition, our business is based primarily upon individual sales orders. We typically do not enter into long-term contracts with our customers. Accordingly, our customers could cease buying products or reduce the number of items they buy from us at any time and for any reason. The fact that we do not have long-term contracts with our customers means that we have no recourse in the event a customer no longer wants to purchase products from us or reduces the number of items purchased. If a significant number of our smaller customers, or any of our significant customers, elect not to purchase products from us, our financial condition and results from operations could be adversely affected.

Our annual and quarterly results from operations may fluctuate significantly and could fall below the expectations of securities analysts and investors due to a number of factors, many of which are beyond our control, resulting in a decline in the price of our securities.

Our annual and quarterly results from operations may fluctuate significantly because of numerous factors, including:

• Increases and decreases in quarterly revenues and profitability;

• The timing of when we make acquisitions or introduce new products;

• Our inability to increase the sales of our existing products and expand their distribution;

• The timing of the introduction or return to the market of competitive products and the introduction of store brand products;

• Adverse regulatory actions or market events in the United States or in our international markets;

• Changes in consumer preferences, spending habits and competitive conditions, including the effects of competitors' operational, promotional or expansion activities;

• Seasonality of our products;

• Fluctuations in commodity prices, product costs, utilities and energy costs, prevailing wage rates, insurance costs and other costs;

• The discontinuation and return of our products from retailers;

• Our ability to recruit, train and retain qualified employees, and the costs associated with those activities;

• Changes in advertising and promotional activities and expansion to new markets;

- Negative publicity relating to us and the products we sell;
- Litigation matters;
- Unanticipated increases in infrastructure costs;
- Impairment of goodwill or long-lived assets;
- Changes in interest rates; and
- Changes in accounting, tax, regulatory or other rules applicable to our business.

Our quarterly operating results and revenues may fluctuate as a result of any of these or other factors. Accordingly, results for any one quarter are not necessarily indicative of results to be expected for any other quarter or for any year, and revenues for any particular future period may decrease. In the future, operating results may fall below the expectations of securities analysts and investors. In that event, the market price of our outstanding securities could be adversely impacted.

We depend on third-party manufacturers to produce the products we sell. If we are unable to maintain these manufacturing relationships or fail to enter into additional relationships, as necessary, we may be unable to meet customer demand and our sales and profitability could suffer as a result.

Most of our products are produced by third-party manufacturers. Our ability to retain our current manufacturing relationships and engage in and successfully transition to new relationships is critical to our ability to deliver quality products to our customers in a timely manner. Without adequate supplies of quality merchandise, sales would decrease materially and our business would suffer. In the event that our primary third-party manufacturers are unable or unwilling to ship products to us in a timely manner, we would have to rely on secondary manufacturing relationships or identify and qualify new manufacturing relationships. Certain of the Company's manufacturers are having difficulty meeting demand, which is causing shortages of certain products. We might not be able to identify or qualify alternative manufacturers for these products in a timely manner, and such manufacturers may not allocate sufficient capacity to us to allow us to meet our commitments to customers. In addition, identifying alternative manufacturers without adequate lead times may involve additional manufacturing expense, delay in production or product disadvantage in the marketplace. In general, the consequences of not securing adequate, high quality and timely supplies of merchandise would negatively impact inventory levels and sales, and could have a material adverse effect on our business, financial condition and results from operations.

The manufacturers we use have increased and may in the future increase the cost of the products we purchase, which could adversely affect our margins in the event we are unable to pass along these increased costs to our customers or identify and qualify new manufacturers. One of our manufacturers has notified us that it is increasing prices, which could have a significant impact on our financial condition and results of operations. Increased costs could also have a material adverse effect on our financial condition and results from operations.

At December 31, 2014, we had relationships with 96 third-party manufacturers pertaining to our domestic operations. Of those, we had long-term contracts with 44 manufacturers that produced items that accounted for approximately 80.1% of our gross sales for 2014. The fact that we do not have long-term contracts with certain manufacturers means that they could cease manufacturing these products at any time and for any reason or initiate arbitrary and costly price increases, either of which could have a material adverse effect on our business, financial condition and results from operations.

Our risks associated with doing business internationally increase as we expand our international footprint.

During the three and nine months ended December 31, 2014, approximately 8.9% and 9.5%, respectively, of our total revenues were attributable to our international business. As of July 1, 2013, we acquired Care Pharma, which markets and sells healthcare products in Australia. In addition, on April 30, 2014, we acquired Hydralyte in Australia and New Zealand. We generally rely on brokers and distributors for the sale of our products in other foreign countries. Risks of doing business internationally include:

• Political instability or declining economic conditions in the countries or regions where we operate that adversely affect sales of our products;

• Currency controls that restrict or prohibit the payment of funds or the repatriation of earnings to the United States;

- 67-

Fluctuating foreign exchange rates that result in unfavorable increases in the price of our products or cause increases in the cost of certain products purchased from our foreign third-party manufacturers;

Trade restrictions and exchange controls;

Inability to protect our intellectual property rights in these markets; and

Increased costs of compliance with general business and tax regulations in these countries or regions.

Our indebtedness could adversely affect our financial condition, and the significant amount of cash we need to service our debt will not be available to reinvest in our business.

At December 31, 2014, our total indebtedness, including current maturities, was approximately \$1,643.6 million.

Our indebtedness could:

Increase our vulnerability to general adverse economic and industry conditions;

Limit our ability to engage in strategic acquisitions;

Require us to dedicate a substantial portion of our cash flow from operations toward repayment of our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, acquisitions and investments and other general corporate purposes;

Limit our flexibility in planning for, or reacting to, changes in our business and the markets in which we operate;

Place us at a competitive disadvantage compared to our competitors that have less debt; and

Limit, among other things, our ability to borrow additional funds on favorable terms or at all.

The terms of the indentures governing the 2012 Senior Notes and our senior unsecured notes issued on December 17, 2013, and the credit agreement governing the 2012 Term Loans and 2012 ABL Revolver, allow us to issue and incur additional debt only upon satisfaction of the conditions set forth in those respective agreements. If new debt is added to current debt levels, the related risks described above could increase.

At December 31, 2014, we had \$68.9 million of borrowing capacity available under the 2012 ABL Revolver to support our operating activities.

The senior credit facility and the indentures governing the senior notes contain cross-default provisions that could result in the acceleration of all of our indebtedness.

The senior credit facility and the indentures governing the senior notes contain provisions that allow the respective creditors to declare all outstanding borrowings under one agreement to be immediately due and payable as a result of a default under another agreement. Consequently, under the senior credit facility, failure to make a payment required by the indentures governing the senior notes, among other things, may lead to an event of default under the senior credit facility. Similarly, an event of default or failure to make a required payment at maturity under the senior credit facility, among other things, may lead to an event of default under the indentures governing the senior notes. If the debt under the senior credit facility and indentures governing the senior notes were to both be accelerated, the

aggregate amount immediately due and payable as of December 31, 2014 would have been approximately \$1.6 billion. We presently do not have sufficient liquidity to repay these borrowings in the event they were to be accelerated, and we may not have sufficient liquidity in the future to do so. Additionally, we may not be able to borrow money from other lenders to enable us to refinance our indebtedness. At December 31, 2014, the book value of our current assets was \$0.2 billion. Although the book value of our total assets was \$2.7 billion, approximately \$2.4 billion was in the form of intangible assets, including goodwill of \$0.3 billion, a significant portion of which may not be available to satisfy our creditors in the event our debt is accelerated.

Any failure to comply with the restrictions of the senior credit facility, the indentures governing the senior notes or any other subsequent financing agreements may result in an event of default. Such default may allow the creditors to accelerate the related debt, as well as any other debt to which the cross-acceleration or cross-default provisions apply. In addition, the lenders may be

- 68-

able to terminate any commitments they had made to supply us with additional funding. As a result, any default by us under our credit agreement, indentures governing the senior notes or any other financing agreement could have a material adverse effect on our financial condition.

Virtually all of our assets consist of goodwill and intangibles and are subject to impairment risk.

As our financial statements indicate, virtually all of our assets consist of goodwill and intangibles, principally the trademarks, trade names and patents that we have acquired. On an annual basis, and otherwise when there is evidence that events or changes in circumstances indicate that the carrying value of intangible assets might not be recoverable we assess the potential impairment of our goodwill and other intangible assets. Upon any such evaluation, we may be required to record a significant charge in our financial statements, which would negatively impact our financial condition and results of operations. We recorded charges in 2010 and 2009 for impairment of certain of these assets. If any of our brands sustain significant or prolonged declines in performance, we may be required to perform an interim impairment analysis. For example, if the Company's brand performance is weaker than projections used in valuation calculations, the value of such brands may become impaired. In the event that such analysis would result in the fair value being lower than the carrying value, we would be required to record an impairment charge. Should the value of those assets or other assets become further impaired or our financial condition is materially adversely affected in any way, we would not have tangible assets that could be sold to repay our liabilities. As a result, our creditors and investors may not be able to recoup the amount of the indebtedness that they have extended to us or the amount they have invested in us.

We have experienced declines in revenues and profitability of certain brands in the North American OTC Healthcare segment during the three and nine months ended December 31 2014, compared to the same periods during the prior year. Sustained or significant future declines in revenue, profitability, other adverse changes in expected operating results, and/or unfavorable changes in other economic factors used to estimate fair values of certain brands could indicate that fair value no longer exceeds the carrying value, in which case a non-cash impairment charge may be recorded in future periods. In particular, we continue to experience increasing competitive pressures for certain brands within our pediatric cough and cold and gastrointestinal product groups. Specifically in the cough and cold product group, although we expected revenues to decline with the return to the market of competing products, such declines have been steeper than expected. Current quarter and year-to-date revenues from our Pediacare brand have declined significantly as compared to the corresponding periods in the prior year, due primarily to competition in the category, including new product introductions and lost distribution. As a result, we have increased our promotional spending in the short term, which resulted in lower revenues and profitability. Based on these factors, we considered whether these conditions would indicate that the fair value of the reporting unit would no longer exceed the carrying value, and accordingly, we performed an interim impairment analysis.

Significant judgment, and the use of estimates and assumptions, is required to estimate the fair value of reporting units, including estimating future cash flows, future market conditions, and determining the appropriate discount rates, growth rates, and operating margins, among others. Our discounted cash flow analyses take into account our assumptions on various items such as revenue and expense growth rates, which are based upon our historical experience and projections of future activity, factoring in customer demand, and a cost structure necessary to achieve the related revenues. Additionally, these discounted cash flow analyses take into account our expected amounts of working capital and weighted average cost of capital. Due to recent acquisitions, we plan to perform a strategic review of all of our brands after our fiscal year end and a future change in strategy, could result in an impairment of this brand in particular. As we are in the middle of the cough and cold season, if we do not stabilize our revenue declines, the brand could be impaired. To the extent that this reporting unit and intangible asset exceeds its fair value, we will recognize an impairment loss in an amount necessary to reduce the carrying value of the asset to its fair value. We will continue to assess intangible assets of our entire portfolio of brands at the brand level to identify conditions that indicate the carrying value may not be recoverable and perform impairment analysis as deemed prudent. We believe

our assumptions are reasonable, however, there can be no assurance that our estimates and assumptions made for purposes of our impairment testing, at the annual date and the interim testing date, will prove to be accurate predictions of the future. Continued declines in revenues, higher advertising and promotional costs or a strategic change in direction could result in an impairment. Additionally, changes in the estimates and assumptions noted above, could result in a significant impairment charge in the future. It is not possible at this time to determine if any such future impairment charge would result.

Interruptions and breaches of computer and communications systems, including computer viruses, “hacking” and “cyber-attacks” could impair our ability to conduct business.

Increased IT security threats and more sophisticated computer crime, including advanced persistent threats, pose a potential risk to the security of our IT systems, networks, and services, as well as the confidentiality, availability, and integrity of our data. If the IT systems, networks, or service providers we rely upon fail to function properly, or if we suffer a loss or disclosure of business or stakeholder information, due to any number of causes, ranging from catastrophic events to power outages to security breaches, and our business continuity plans do not effectively address these failures on a timely basis, we may suffer interruptions in our ability to manage operations and reputational, competitive and/or business harm, which may adversely impact our results of operations and/or financial condition.

Our information technology systems may be susceptible to disruptions.

We utilize information technology systems to improve the effectiveness of our operations and support our business including systems to support financial reporting and an enterprise resource planning system, which we are currently implementing. During the implementation process, we could be subject to transaction errors, processing inefficiencies and other business disruptions that could lead to the loss of revenue or inaccuracies in our financial information. The occurrence of these or other challenges could disrupt our information technology systems and adversely affect our operations.

Changes in our provision for income taxes or adverse outcomes resulting from examination of our income tax returns could adversely affect our results.

Our provision for income taxes is subject to volatility and could be adversely affected by several factors, some of which are outside of our control, including:

- changes in the income allocation methods for state taxes, and the determination of which states or countries have jurisdiction to tax our Company;

- an increase in non-deductible expenses for tax purposes, including certain stock-based compensation, executive compensation and impairment of goodwill;

- transfer pricing adjustments;

- tax assessments resulting from income tax audits or any related tax interest or penalties that could significantly affect our income tax provision for the period in which the settlement takes place;

- a change in our decision to indefinitely reinvest foreign earnings;

- changes in accounting principles; and

- changes in tax laws or related interpretations, accounting standards, regulations, and interpretations in multiple tax jurisdictions in which we operate.

Significant judgment is required to determine the recognition and measurement attribute prescribed in FASB ASC 740. As a multinational corporation, we conduct our business in many countries and are subject to taxation in many jurisdictions. The taxation of our business is subject to the application of multiple and sometimes conflicting tax laws and regulations as well as multinational tax conventions. Our effective tax rate is dependent upon the availability of tax credits and carryforwards. The application of tax laws and regulations is subject to legal and factual interpretation,

judgment and uncertainty. Tax laws themselves are subject to change as a result of changes in fiscal policy, changes in legislation, and the evolution of regulations and court rulings. Consequently, taxing authorities may impose tax assessments or judgments against us that could materially impact our tax liability and/or our effective income tax rate.

In addition, we may be subject to examination of our income tax returns by the Internal Revenue Service and other tax authorities. If tax authorities challenge the relative mix of our U.S. and international income, or successfully assert the jurisdiction to tax our earnings, our future effective income tax rates could be adversely affected.
