Item 8.01 Other Events.

On April 10, 2009, the Federal Energy Regulatory Commission (the "FERC") issued an order approving Green Power Express LP's request for favorable transmission investment incentives. Green Power Express LP is a limited partnership formed by ITC Holdings Corp. ("ITC") to develop and build the Green Power Express Project, a network of transmission lines that will transport 12,000 megawatts of power from wind-abundant areas of the Upper Midwest to Midwestern and Eastern states that demand clean, renewable energy.

Specifically, the FERC order authorized:

- the establishment of a regulatory asset for development and pre-construction costs;
- an incentive return on common equity of 12.38 percent;
- the deferral of recovery for start-up, development and pre-construction costs through the creation of regulatory assets;
- inclusion of 100 percent of construction work in progress in rate base;
- abandoned plant treatment; and
- use of a hypothetical capital structure comprised of 60 percent equity and 40 percent debt until any portion of the Green Power Express Project is placed in service.

Further, the FERC order conditionally accepted Green Power Express LP's proposed formula rate tariff sheets, subject to refund, and set them for hearing and settlement judge procedures. The approved transmission investment incentives and return on equity were specifically excluded from any hearing process.

ITC issued a press release on April 13, 2009, which release is attached as Exhibit 99.1 to this Form 8-K and incorporated herein by reference.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits.
