This Form 6-K consists of:

The press release regarding Moving 4 planned new production lines from Shanghai to Hebei by JA Solar Holdings Co., Ltd. (the Registrant), made by the Registrant in English on March 23, 2007.

JA Solar to Move 4 Planned New Production Lines

from Shanghai to Hebei

Hebei, China, March 23, 2007 JA Solar Holdings Co., Ltd. (the Company) (NASDAQGM: JASO) today announced that it will install four additional solar cell production lines on its existing Ningjin, Hebei site. Each new line will have a manufacturing capacity of 25 MW per annum. The Company expects to have the four new lines running at full commercial production and yield targets by the end of the third quarter of 2007. This would bring the Company's total manufacturing capacity to 175 MW per annum, when added together with the Company's three existing 25 MW solar cell production lines.

The Company originally planned to build the four new 25MW production lines approximately 40 miles outside Shanghai with targeted commencement of commercial operation by the end of the third quarter of 2007. Under the plan, the Company was to lease from Jinglong Industrial and Commerce Group Co., Ltd. ("Jinglong Group") the land and buildings for the Shanghai manufacturing facilities. However, since the Jinglong Group has not obtained from relevant governmental authorities the required

Edgar Filing: JA Solar Holdings Co., Ltd. - Form 6-K

land use right certificates and other relevant approvals, JA Solar decided to transfer the newly-ordered equipment to its current manufacturing facilities in Ningjin, Hebei and install the four new 25 MW production lines there.

Samuel Yang, JA Solar's Chief Executive Officer, said, "We still think the Shanghai location is attractive and plan to establish a dedicated R&D facility there. However, our main priority is keeping our capacity expansion plan on track. Moving the planned four new lines to Hebei will allow us to avoid potential delays in order to meet our targeted schedule of bringing an additional 100 MW of solar cell production capacity online. We believe that by centralizing our manufacturing facilities in one location we will also be able to more efficiently manage our production lines."

Construction on the new Hebei building is expected to be completed by June 2007, adjacent to the Company's existing production lines in the same industrial park. The Company expects to lease the new buildings from Jinglong Group.

In addition, the Company will continue to evaluate the feasibility of building manufacturing facilities in Shanghai when Jinglong Group obtains its land use certificate and other approvals.
