2007 Full Year Results

Revenues for the full year 2007 were RMB 2.69 billion (US\$ 369.3 million), an increase of 286.8% from the full year 2006 revenues of RMB 696.5 million (US\$ 95.5 million). The increase was principally due to continued strong growth in market demand for PV industry and our ability to expand the Company's production capacity to support the business growth.

Total gross profit for 2007 was RMB 600.9 million (US\$ 82.4 million) compared to RMB 172.3 million (US\$ 23.6 million). Total gross margin was 22.3% for 2007 compared to 24.7% for 2006.

Net income available to ordinary shareholders for the full year 2007 was RMB 398.2 million (US\$ 54.6 million) compared to a net income available to ordinary shareholders of RMB 86.4 million (US\$ 11.8 million) for the full year 2006.

For the full year 2007 basic and diluted earnings per ADS were RMB 2.96 (US\$ 0.41) and RMB 2.93 (US\$ 0.40), respectively.

The full year 2007 included share-based compensation expense of RMB 88.8 million (US\$ 12.2 million) and foreign exchange loss of RMB 112.8 million (US\$ 15.5 million). Diluted earnings per ADS calculations for the full year 2007 were based on 136.72 million weighted average numbers of ADSs outstanding, compared to 80.17 million ADSs in 2006.

Capital expenditures were RMB 421.8 million (US\$ 57.8 million) for the full year 2007, as compared to RMB 107.6 million (US\$ 14.8 million) for the full year 2006. The increase was primarily due to expanding of new production capacity. Depreciation and amortization expenses for the full year 2007 were RMB 34.1 million (US\$ 4.7 million), as compared to RMB 11.2 million (US\$ 1.5 million) for the full year 2006.

Effective from February 7, 2008, the Company changed its ADS to ordinary share ratio from the one ADS for every three ordinary shares to one ADS for every one ordinary share. Both the basic and diluted earnings per ADS and both the basic and diluted weighted average number of ADSs outstanding for all periods presented have been restated to conform to the current ADS ratio accordingly.

The conversion of Renminbi into U.S. dollars for the full year of 2007 and the fourth quarter of 2007 in this release, made solely for the convenience of the reader, is based on the noon buying rate in The City of New York for cable transfers of Renminbi as certified for customs purposes by the Federal Reserve Bank of New York as of December 31, 2007, which was RMB 7.2946 to US\$1.00. No representation is intended to imply that the Renminbi amounts could have been, or could be, converted, realized or settled into U.S. dollars at that rate on December 31, 2007, or at any other date. The percentages stated in this press release are calculated based on Renminbi.

"We once again achieved record revenues in the fourth quarter of 2007 and extraordinary business growth for the full year," said Samuel Yang, JA Solar's Chief Executive Officer. "During the year, we increased our annual production capacity from 75MW to 175MW, and achieved impressive throughput and yield from our cell lines without compromising profitability. The several key additions in talent to our teams in sales and marketing, technology, and at the executive level helped ensure the smooth execution of our expansion. Our strategic decision to expand our supply sources and our practice of holding JA Solar's products to one of the highest

performance standards in the industry were also contributing factors to our success. On the supply side, we were able to expand our base of major suppliers from two to four and contractually secured sufficient wafer supply to cover our anticipated 2008 production capacity.”

“In 2008 we plan to build on JA Solar’s strong brand and technology platform through increased sales and marketing efforts, greater investment in R&D, and continued expansion of our production capacity. We have already broken ground for ten new cell lines in Hebei, and plan to break ground for another ten cell lines at a new facility in Yangzhou during the second half of 2008. On the technology front, we plan to open a research laboratory in Silicon Valley, California. We believe the true driving force for broader application of solar technology and the achievement of grid parity is low cost. By 2010, JA Solar strives to be a cost leader in the industry and establish the industry cost benchmark through technical innovation and operational efficiency. We have enormous confidence that our production scale and execution capability would position JA Solar to achieve aggressive cost reductions as we address a rapidly evolving market.”

JA Solar’s CFO, Herman Zhao, said, “In 2007 JA Solar demonstrated our financial discipline through the ability to more than double our annual production capacity while achieving impressive top line growth and profitability. While our performance was strong in Q4, we experienced foreign exchange losses in the quarter, which impacted our bottom line. Due to the depreciation of the U.S. dollar against the RMB in Q4, we recorded foreign exchange losses of RMB 57.3 million (US\$ 7.9 million) for the quarter. Going forward we plan to manage the foreign exchange impact to our bottom line through focused initiatives which involve converting foreign currencies into RMB, currency hedging, diversification of our international supplier base, and the addition of pricing clauses in our international sales contracts. While the economic environment is expected to remain volatile, we expect another record year for our Company in terms of growth and profitability in 2008. We are fully committed to bringing further value to our shareholders in 2008 and future years.”

2008 Outlook

Based on current customer demand and market forecasts, we expect revenues for the full year 2008 in the range of RMB 7.22 billion (US\$ 990.0 million) to RMB 8.02 billion (US\$ 1.10 billion). Gross margins for 2008 are expected to be above 20%.

We expect total production output of approximately 340MW for 2008, with a total annual production capacity of 500MW, which is above our previous annual production capacity guidance of 425MW.

The capital expenditures are expected to be RMB 966.8 million (US\$ 132.5 million), primarily for capacity expansion. R&D expense is expected to be RMB 36.6 million (US\$ 5.0 million).
