Operating and financial review and prospects

SEC regulations require that a discussion of the results for the first six months of the current year compared to the first six months of the previous year be included in registration statements relating to securities offerings. The following discussion of the Group's results for the six months ended June 30, 2010 (6M10) compared to the six months ended June 30, 2009 (6M09) supplements, and should be read in conjunction with, the Group's financial reports for the first and second quarters of 2010. The Group's financial report for the second quarter of 2010 (Credit Suisse Financial Report 2Q10), which was filed with the SEC on August 5, 2010, includes unaudited financial information for 6M10 and 6M09.

Credit Suisse

For 6M10, we recorded net income attributable to shareholders of CHF 3,648 million, compared to a net income attributable to shareholders of CHF 3,577 million in 6M09. Our results for 6M10 reflected the continued reduction of risk and a strong capital base.

Core Results

Core Results include the results of our three segments, the Corporate Center and discontinued operations. Core Results exclude revenues and expenses in respect of noncontrolling interests in which we do not have significant economic interests (SEI). The Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. In addition, the Corporate Center includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

Credit Suisse results reflect all changes in fair value (inclusive of our credit spread) of Credit Suisse vanilla debt carried at fair value. Our Core Results reflect these changes in Corporate Center and the segments. The cumulative fair value gains of CHF 1.5 billion on Credit Suisse debt as of the opening 1Q10 balance sheet are reversed and charged to the segments on a straight-line amortization basis, and the difference between this amortization and the valuation adjustments on this Credit Suisse debt from changes in credit spreads is included in the Corporate Center.

In managing the business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging positions. For this reason, individual revenue categories may not be indicative of performance.

Certain reclassifications have been made to prior periods to conform to the current presentation.
