TOTAL SECURITIES SOLD SHORT
(Proceeds \$89,080,514) \$(87,490,199)

Pledged security; a portion or all of the security is pledged as collateral for written options, securities sold short, or (a) borrowings. As of July 31, 2015, the aggregate market value of those securities was \$178,121,648 representing 99.28% of net assets. (See Note 1 and Note 3)

(b) Loaned security; a portion or all of the security is on loan as of July 31, 2015.

(c) Non-income producing security.

Fair valued security; valued by management in accordance with procedures approved by the Fund's Board of (d) Trustees. As of July 31, 2015, these securities had an aggregate market value of \$1,306,999 or 0.73% of total net assets.

Security exempt from registration of the Securities Act of 1933. These securities may be resold in transactions (e) exempt from registration under Rule 144A, normally to qualified institutional buyers. As of July 31, 2015, these securities had an aggregate market value of \$8,081,446 or 4.50% of net assets.

(f) Floating or variable rate security - rate disclosed as of July 31, 2015.

(g) This security has no contractual maturity date, is not redeemable and contractually pays an indefinite stream of interest.

(h) Includes cash which is being held as collateral for total return swap contracts or futures contracts.

Pledged security; a portion or all of the security is pledged as collateral for written options, securities sold short, or (a) borrowings. As of July 31, 2015, the aggregate market value of those securities was \$296,649,075 representing 99.30% of net assets. (See Note 1 and Note 3)

(b) Loaned security; a portion or all of the security is on loan as of July 31, 2015.

(c) Non-income producing security.

Fair valued security; valued by management in accordance with procedures approved by the Fund's Board of (d) Trustees. As of July 31, 2015, these securities had an aggregate market value of \$3,006,374 or 1.01% of total net assets.

Security exempt from registration of the Securities Act of 1933. These securities may be resold in transactions (e) exempt from registration under Rule 144A, normally to qualified institutional buyers. As of July 31, 2015, these securities had an aggregate market value of \$11,641,202 or 3.90% of net assets.

(f) Floating or variable rate security - rate disclosed as of July 31, 2015.

(g) This security has no contractual maturity date, is not redeemable and contractually pays an indefinite stream of interest.

(h) Includes cash which is being held as collateral for total return swap contracts or futures contracts.

Pledged security; a portion or all of the security is pledged as collateral for written options, securities sold short, or (a) borrowings. As of July 31, 2015, the aggregate market value of those securities was \$737,279,560 representing 100.17% of net assets. (See Note 1 and Note 3)

(b) Loaned security; a portion or all of the security is on loan as of July 31, 2015.

(c) Non-income producing security.

Fair valued security; valued by management in accordance with procedures approved by the Fund's Board of (d) Trustees. As of July 31, 2015, these securities had an aggregate market value of \$5,359,998 or 0.73% of total net assets.

Security exempt from registration of the Securities Act of 1933. These securities may be resold in transactions (e) exempt from registration under Rule 144A, normally to qualified institutional buyers. As of July 31, 2015, these securities had an aggregate market value of \$33,569,977 or 4.56% of net assets.

(f) Floating or variable rate security - rate disclosed as of July 31, 2015.

(g) This security has no contractual maturity date, is not redeemable and contractually pays an indefinite stream of interest.

(h) Includes cash which is being held as collateral for total return swap contracts or futures contracts.

S.A. - Generally designates corporations in various countries, mostly those employing the civil law.

S&P - Standard & Poor's

SPDR - Standard & Poor's Depositary Receipt

For Fund compliance purposes, each Fund's industry classifications refer to any one of the industry sub-classifications used by one or more widely recognized market indexes, and/or as defined by each Fund's management. This definition may not apply for purposes of this report, which may combine industry sub-classifications for reporting ease. Industries are shown as a percent of net assets. These industry classifications are unaudited.

See Notes to Quarterly Statement of Investments.

CLOUGH GLOBAL FUNDS
NOTES TO QUARTERLY STATEMENT OF INVESTMENTS
JULY 31, 2015 (UNAUDITED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING AND OPERATING POLICIES

Clough Global Allocation Fund, Clough Global Equity Fund, and Clough Global Opportunities Fund (the “Funds”), are closed-end management investment companies registered under the Investment Company Act of 1940 (the “1940 Act”). The Funds were organized under the laws of the state of Delaware by an Amended Agreement and Declaration of Trust dated April 27, 2004 and January 25, 2005, respectively for Clough Global Allocation Fund and Clough Global Equity Fund, and an Agreement and Declaration of Trust dated January 12, 2006, for Clough Global Opportunities Fund. The Funds were previously registered as non-diversified investment companies. As a result of ongoing operations, each of the Funds became a diversified company. The Funds may not resume operating in a non-diversified manner without first obtaining shareholder approval. Each Fund’s investment objective is to provide a high level of total return. Each Declaration of Trust provides that the Board of Trustees may authorize separate classes of shares of beneficial interest. The common shares of Clough Global Allocation Fund, Clough Global Equity Fund, and Clough Global Opportunities Fund are listed on the NYSE MKT and trade under the ticker symbols “GLV”, “GLQ” and “GLO” respectively.

The following is a summary of significant accounting policies followed by the Funds. These policies are in conformity with U.S. generally accepted accounting principles (“GAAP”). The preparation of the Statement of Investments in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures in the Statement of Investments during the reporting period. Management believes the estimates and security valuations are appropriate; however, actual results may differ from those estimates, and the security valuations reflected in the Statement of Investments may differ from the value the Funds ultimately realize upon sale of the securities. Each Fund is considered an investment company for financial reporting purposes under GAAP. The Statement of Investments have been prepared as of the close of the New York Stock Exchange (“NYSE” or the “Exchange”) on July 31, 2015.

The net asset value per share of each Fund is determined no less frequently than daily, on each day that the Exchange is open for trading, as of the close of regular trading on the Exchange (normally 4:00 p.m. New York time). Trading may take place in foreign issues held by the Fund at times when a Fund is not open for business. As a result, each Fund’s net asset value may change at times when it is not possible to purchase or sell shares of a Fund.

Investment Valuation: Securities held by each Fund for which exchange quotations are readily available are valued at the last sale price, or if no sale price or if traded on the over-the-counter market, at the mean of the bid and asked prices on such day. Most securities listed on a foreign exchange are valued at the last sale price at the close of the exchange on which the security is primarily traded. In certain countries market maker prices are used since they are the most representative of the daily trading activity. Market maker prices are usually the mean between the bid and ask prices. Certain markets are not closed at the time that the Funds price their portfolio securities. In these situations, snapshot prices are provided by the individual pricing services or other alternate sources at the close of the NYSE as appropriate. Securities not traded on a particular day are valued at the mean between the last reported bid and the asked quotes, or the last sale price when appropriate; otherwise fair value will be determined by the board-appointed fair valuation committee. Debt securities for which the over-the-counter market is the primary market are normally valued on the basis of prices furnished by one or more pricing services or dealers at the mean between the latest available bid and asked prices. As authorized by the Board of Trustees, debt securities (including short-term obligations that will mature in 60 days or less) may be valued on the basis of valuations furnished by a pricing service which determines valuations based upon market transactions for normal, institutional-size trading units of securities or a matrix method which considers yield or price of comparable bonds provided by a pricing service. Over-the-counter options are valued at the mean between bid and asked prices provided by dealers. Exchange-traded options are valued

at closing settlement prices. Total return swaps are priced based on valuations provided by a Board approved independent third party pricing agent. If a total return swap price cannot be obtained from an independent third party pricing agent the Fund shall seek to obtain a bid price from at least one independent and/or executing broker.

If the price of a security is unavailable in accordance with the aforementioned pricing procedures, or the price of a security is unreliable, e.g., due to the occurrence of a significant event, the security may be valued at its fair value determined by management pursuant to procedures adopted by the Board of Trustees. For this purpose, fair value is the price that a Fund reasonably expects to receive on a current sale of the security. Due to the number of variables affecting the price of a security, however; it is possible that the fair value of a security may not accurately reflect the price that a Fund could actually receive on a sale of the security.

A three-tier hierarchy has been established to classify fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability that are developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability that are developed based on the best information available.

Edgar Filing: Clough Global Opportunities Fund - Form N-Q

Various inputs are used in determining the value of each Fund's investments as of the reporting period end. These inputs are categorized in the following hierarchy under applicable financial accounting standards:

- Level 1 Unadjusted quoted prices in active markets for identical, unrestricted assets or liabilities that a Fund has the ability to access at the measurement date;
- Level 2 – Quoted prices which are not active, quoted prices for similar assets or liabilities in active markets or inputs other than quoted prices that are observable (either directly or indirectly) for substantially the full term of the asset or liability; and
- Level 3 – Significant unobservable prices or inputs (including the Fund's own assumptions in determining the fair value of investments) where there is little or no market activity for the asset or liability at the measurement date.

The following is a summary of the inputs used as of July 31, 2015, in valuing each Fund's investments carried at value. The Funds recognize transfers between the levels as of the end of the period in which the transfer occurred. There were no transfers between Levels 1 and 2 during the period ending July 31, 2015.

** Swap contracts and futures contracts are reported at their unrealized appreciation/(depreciation) at measurement date, which represents the change in the contract's value from trade date.

Edgar Filing: Clough Global Opportunities Fund - Form N-Q

In the event a Board approved independent pricing service is unable to provide an evaluated price for a security or Clough Capital Partners L.P. (the “Adviser” or “Clough”) believes the price provided is not reliable, securities of each Fund may be valued at fair value as described above. In these instances the Adviser may seek to find an alternative independent source, such as a broker/dealer to provide a price quote, or by using evaluated pricing models similar to the techniques and models used by the independent pricing service. These fair value measurement techniques may utilize unobservable inputs (Level 3).

On a monthly basis, the Fair Value Committee of each Fund meets and discusses securities that have been fair valued during the preceding month in accordance with the Funds’ Fair Value Procedures and reports quarterly to the Board of Trustees on the results of those meetings.

Edgar Filing: Clough Global Opportunities Fund - Form N-Q

For the period ended July 31, 2015, the Funds did not have significant unobservable inputs (Level 3) used in determining fair value. Therefore, a reconciliation of assets in which significant unobservable inputs (Level 3) were used in determining fair value is not applicable.

Foreign Securities: Each Fund may invest a portion of its assets in foreign securities. In the event that a Fund executes a foreign security transaction, the Fund will generally enter into a foreign currency spot contract to settle the foreign security transaction. Foreign securities may carry more risk than U.S. securities, such as political, market and currency risks.

The accounting records of each Fund are maintained in U.S. dollars. Prices of securities denominated in foreign currencies are translated into U.S. dollars at the closing rates of exchange at period end. Amounts related to the purchase and sale of foreign securities and investment income are translated at the rates of exchange prevailing on the respective dates of such transactions.

A foreign currency spot contract is a commitment to purchase or sell a foreign currency at a future date, at a negotiated rate. Each Fund may enter into foreign currency spot contracts to settle specific purchases or sales of securities denominated in a foreign currency and for protection from adverse exchange rate fluctuation. Risks to a Fund include the potential inability of the counterparty to meet the terms of the contract.

The net U.S. dollar value of foreign currency underlying all contractual commitments held by a Fund and the resulting unrealized appreciation or depreciation are determined using prevailing forward foreign currency exchange rates. Unrealized appreciation and depreciation on foreign currency spot contracts are reported in the Funds' Statements of Assets and Liabilities as a receivable or a payable and in the Funds' Statements of Operations with the change in unrealized appreciation or depreciation on translation of assets and liabilities denominated in foreign currencies. These spot contracts are used by the broker to settle investments denominated in foreign currencies.

Short Sales: Each Fund may sell a security it does not own in anticipation of a decline in the fair value of that security. When a Fund sells a security short, it must borrow the security sold short and deliver it to the broker-dealer through which it made the short sale. A gain, limited to the price at which a Fund sold the security short, or a loss, unlimited in size, will be recognized upon the termination of the short sale.

Each Fund's obligation to replace the borrowed security will be secured by collateral deposited with the broker-dealer, usually cash, U.S. government securities or other liquid securities. Each Fund will also be required to designate on its books and records similar collateral with its custodian to the extent, if any, necessary so that the aggregate collateral value is at all times at least equal to the current market value of the security sold short.

Each Fund may also sell a security short if it owns at least an equal amount of the security sold short or another security convertible or exchangeable for an equal amount of the security sold short without payment of further compensation (a short sale against-the-box). In a short sale against-the-box, the short seller is exposed to the risk of being forced to deliver stock that it holds to close the position if the borrowed stock is called in by the lender, which would cause gain or loss to be recognized on the delivered stock. Each Fund expects normally to close its short sales against-the-box by delivering newly acquired stock.

Derivatives Instruments and Hedging Activities: The following discloses the Funds' use of derivative instruments and hedging activities.

The Funds' investment objectives not only permit the Funds to purchase investment securities, they also allow the Funds to enter into various types of derivative contracts, including, but not limited to, purchased and written options, swaps, futures and warrants. In doing so, the Funds will employ strategies in differing combinations to permit them to increase, decrease, or change the level or types of exposure to market factors. Central to those strategies are features inherent to derivatives that make them more attractive for this purpose than equity securities; they require little or no initial cash investment, they can focus exposure on only certain selected risk factors, and they may not require the

ultimate receipt or delivery of the underlying security (or securities) to the contract. This may allow the Funds to pursue their objectives more quickly and efficiently than if they were to make direct purchases or sales of securities capable of affecting a similar response to market factors.

Risk of Investing in Derivatives: The Funds' use of derivatives can result in losses due to unanticipated changes in the market risk factors and the overall market. In instances where the Funds are using derivatives to decrease or hedge exposures to market risk factors for securities held by the Funds, there are also risks that those derivatives may not perform as expected, resulting in losses for the combined or hedged positions.

Derivatives may have little or no initial cash investment relative to their market value exposure and therefore can produce significant gains or losses in excess of their cost. This use of embedded leverage allows the Funds to increase their market value exposure relative to their net assets and can substantially increase the volatility of the Funds' performance.

Additional associated risks from investing in derivatives also exist and potentially could have significant effects on the valuation of the derivative and the Funds. Typically, the associated risks are not the risks that the Funds are attempting to increase or decrease exposure to, per their investment objectives, but are the additional risks from investing in derivatives.

Examples of these associated risks are liquidity risk, which is the risk that the Funds will not be able to sell the derivative in the open market in a timely manner, and counterparty credit risk, which is the risk that the counterparty will not fulfill its obligation to the Funds. Associated risks can be different for each type of derivative and are discussed by each derivative type in the notes that follow.

Each Fund may acquire put and call options and options on stock indices and enter into stock index futures contracts, certain credit derivatives transactions and short sales in connection with its equity investments. In connection with a Fund's investments in debt securities, it may enter into related derivatives transactions such as interest rate futures, swaps and options thereon and certain credit derivatives transactions. Derivatives transactions of the types described above subject a Fund to increased risk of principal loss due to imperfect correlation or unexpected price or interest rate movements. Each Fund also will be subject to credit risk with respect to the counterparties to the derivatives contracts purchased by a Fund. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivatives contract due to financial difficulties, each Fund may experience significant delays in obtaining any recovery under the derivatives contract in a bankruptcy or other reorganization proceeding. Each Fund may obtain only a limited recovery or may obtain no recovery in such circumstances.

Market Risk Factors: In addition, in pursuit of their investment objectives, certain Funds may seek to use derivatives which may increase or decrease exposure to the following market risk factors:

Equity Risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Foreign Exchange Rate Risk: Foreign exchange rate risk relates to the change in the U.S. dollar value of a security held that is denominated in a foreign currency. The value of a foreign currency denominated security will decrease as the dollar appreciates against the currency, while the value of the foreign currency denominated security will increase as the dollar depreciates against the currency.

Option Writing/Purchasing: Each Fund may purchase or write (sell) put and call options. One of the risks associated with purchasing an option among others, is that a Fund pays a premium whether or not the option is exercised. Additionally, a Fund bears the risk of loss of premium and change in market value should the counterparty not perform under the contract. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid. Each Fund is obligated to pay interest to the broker for any debit balance of the margin account relating to options. Each Fund pledges cash or liquid assets as collateral to satisfy the current obligations with respect to written options.

When a Fund writes an option, an amount equal to the premium received by a Fund is recorded as a liability and is subsequently adjusted to the current value of the option written. Premiums received from writing options that expire unexercised are treated by a Fund on the expiration date as realized gains. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is recorded as a realized gain or loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security or currency in determining whether a Fund has realized a gain or loss. If a put option is exercised, the premium reduces the cost basis of the securities purchased by a Fund. Each Fund, as writer of an option, bears the market risk of an unfavorable change in the price of the security underlying the written option.

Written option activity for the period ended July 31, 2015, was as follows:

Edgar Filing: Clough Global Opportunities Fund - Form N-Q

Futures Contracts: Each Fund may enter into futures contracts. A futures contract is an agreement to buy or sell a security or currency (or to deliver a final cash settlement price in the case of a contract relating to an index or otherwise not calling for physical delivery at the end of trading in the contract) for a set price at a future date. If a Fund buys a security futures contract, the Fund enters into a contract to purchase the underlying security and is said to be "long" under the contract. If a Fund sells a security futures contract, the Fund enters into a contract to sell the underlying security and is said to be "short" under the contract. The price at which the contract trades (the "contract price") is determined by relative buying and selling interest on a regulated exchange. Futures contracts are marked to market daily and an appropriate payable or receivable for the change in value ("variation margin") is recorded by the Fund. Such payables or receivables are recorded for financial statement purposes as unrealized gains or losses by each Fund. Each Fund pledges cash or liquid assets as collateral to satisfy the current obligations with respect to futures contracts.

The Funds enter into such transactions for hedging and other appropriate risk-management purposes or to increase return. While a Fund may enter into futures contracts for hedging purposes, the use of futures contracts might result in a poorer overall performance for the Fund than if it had not engaged in any such transactions. If, for example, the

Fund had insufficient cash, it might have to sell a portion of its underlying portfolio of securities in order to meet daily variation margin requirements on its futures contracts or options on futures contracts at a time when it might be disadvantageous to do so. There may be an imperfect correlation between the Funds' portfolio holdings and futures contracts entered into by the Fund, which may prevent the Fund from achieving the intended hedge or expose the Fund to risk of loss.

Futures contract transactions may result in losses substantially in excess of the variation margin. There can be no guarantee that there will be a correlation between price movements in the hedging vehicle and in the portfolio securities being hedged. An incorrect correlation could result in a loss on both the hedged securities in a Fund and the hedging vehicle so that the portfolio return might have been greater had hedging not been attempted. There can be no assurance that a liquid market will exist at a time when the Fund seeks to close out a futures contract. Lack of a liquid market for any reason may prevent a Fund from liquidating an unfavorable position, and the Fund would remain obligated to meet margin requirements until the position is closed. In addition, the Fund could be exposed to risk if the counterparties to the contracts are unable to meet the terms of their contracts. With exchange traded futures contracts, there is minimal counterparty credit risk to the Funds since futures contracts are exchange traded and the exchange's clearinghouse, as counterparty to all exchange traded futures contracts, guarantees the futures contracts against default.

Swaps: During the period each Fund engaged in total return swaps. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. Each Fund may utilize swap agreements as a means to gain exposure to certain assets and/or to “hedge” or protect the Fund from adverse movements in securities prices or interest rates. Each Fund is subject to equity risk and interest rate risk in the normal course of pursuing its investment objective through investments in swap contracts. Swap agreements entail the risk that a party will default on its payment obligation to a Fund. If the other party to a swap defaults, a Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. If each Fund utilizes a swap at the wrong time or judges market conditions incorrectly, the swap may result in a loss to the Fund and reduce the Fund’s total return.

Total return swaps involve an exchange by two parties in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains over the payment period. A Fund’s maximum risk of loss from counterparty risk or credit risk is the discounted value of the payments to be received from/paid to the counterparty over the contract’s remaining life, to the extent that the amount is positive. The risk is mitigated by having a netting arrangement between a Fund and the counterparty and by the posting of collateral to a Fund to cover the Fund’s exposure to the counterparty. Each Fund pledges cash or liquid assets as collateral to satisfy the current obligations with respect to swap contracts.

International Swaps and Derivatives Association, Inc. Master Agreements (“ISDA Master Agreements”) govern OTC financial derivative transactions entered into by a Fund and those counterparties. The ISDA Master Agreements maintain provisions for general obligations, representations, agreements, collateral and events of default or termination. Events of termination include conditions that may entitle counterparties to elect to terminate early and cause settlement of all outstanding transactions under the applicable ISDA Master Agreement. Any election to early terminate could be material to the financial statements.

During the period ended July 31, 2015, the Funds invested in swap agreements consistent with the Funds’ investment strategies to gain exposure to certain markets or indices.

Warrants/Rights: Each Fund may purchase or otherwise receive warrants or rights. Warrants and rights generally give the holder the right to receive, upon exercise, a security of the issuer at a set price. Funds typically use warrants and rights in a manner similar to their use of purchased options on securities, as described in options above. Risks associated with the use of warrants and rights are generally similar to risks associated with the use of purchased options. However, warrants and rights often do not have standardized terms, and may have longer maturities and may be less liquid than exchange-traded options. In addition, the terms of warrants or rights may limit each Fund’s ability to exercise the warrants or rights at such times and in such quantities as each Fund would otherwise wish. Each Fund held no rights at the end of the period.

2. TAXES

Tax Basis of Investments: Net unrealized appreciation/(depreciation) of investments based on federal tax cost as of July 31, 2015, were as follows:

| | Clough Global Allocation Fund | Clough Global Equity Fund | Clough Global Opportunities Fund |
|--|--|---------------------------------|--|
| Gross appreciation (excess of value over tax cost) | \$ 21,902,055 | \$ 41,919,596 | \$ 82,446,061 |
| Gross depreciation (excess of tax cost over value) | (6,983,521) | (13,659,890) | (27,362,014) |
| Net unrealized appreciation | \$ 14,918,534 | \$ 28,259,706 | \$ 55,084,047 |

Edgar Filing: Clough Global Opportunities Fund - Form N-Q

| | | | |
|---|---------------|---------------|-----------------|
| Cost of investments for income tax purposes | \$242,520,442 | \$406,549,524 | \$1,008,544,653 |
|---|---------------|---------------|-----------------|

3. COMMITTED FACILITY AGREEMENT

Each Fund entered into a financing package that includes a Committed Facility Agreement (the “Agreement”) dated January 16, 2009, as amended, between each Fund and BNP Paribas Prime Brokerage, Inc. (“BNP”) that allows each Fund to borrow funds from BNP. Each Fund is currently borrowing the maximum commitment covered by the agreement. Borrowings under the Agreement are secured by assets of each Fund that are held by a Fund’s custodian in a separate account (the “pledged collateral”) valued at \$148,112,621, \$250,236,307 and \$605,796,212 for Clough Global Allocation Fund, Clough Global Equity Fund and Clough Global Opportunities Fund, respectively. Each Fund may, with 30 days notice, reduce the Maximum Commitment Financing (Initial Limit amount plus the increased borrowing amount in excess of the Initial Limit) to a lesser amount if drawing on the full amount would result in a violation of the applicable asset coverage requirement of Section 18 of the 1940 Act. Interest is charged at the three month LIBOR (London Inter-bank Offered Rate) plus 0.70% (prior to October 15, 2014, 0.75%) on the amount borrowed and 0.65% on the undrawn balance. Each Fund also pays a one-time arrangement fee of 0.25% on (i) the Initial Limit and (ii) any increased borrowing amount in the excess of the Initial Limit, paid in monthly installments for the six months immediately following the date on which borrowings were drawn by the Fund.

Edgar Filing: Clough Global Opportunities Fund - Form N-Q

The Agreement was amended on December 31, 2013, to increase the Maximum Commitment Financing to \$93,300,000 for the Clough Global Allocation Fund and \$156,000,000 for the Clough Global Equity Fund. For the period ended July 31, 2015 the average borrowings outstanding for Clough Global Allocation Fund, Clough Global Equity Fund and Clough Global Opportunities Fund under the agreement were \$93,300,000, \$156,000,000 and \$388,900,000, respectively, and the average interest rate for the borrowings was 0.98%. As of July 31, 2015, the outstanding borrowings for Clough Global Allocation Fund, Clough Global Equity Fund and Clough Global Opportunities Fund were \$93,300,000, \$156,000,000 and \$388,900,000, respectively. The interest rate applicable to the borrowings of Clough Global Allocation Fund, Clough Global Equity Fund and Clough Global Opportunities Fund on July 31, 2015, was 0.93%.

The Lending Agreement is a separate side-agreement between each Fund and BNP pursuant to which BNP may borrow a portion of the pledged collateral (the "Lent Securities") in an amount not to exceed the outstanding borrowings owed by a Fund to BNP under the Agreement. The Lending Agreement is intended to permit each Fund to significantly reduce the cost of its borrowings under the Agreement. BNP has the ability to reregister the Lent Securities in its own name or in another name other than the Fund to pledge, re-pledge, sell, lend or otherwise transfer or use the collateral with all attendant rights of ownership. (It is each Fund's understanding that BNP will perform due diligence to determine the creditworthiness of any party that borrows Lent Securities from BNP.) Each Fund may designate any security within the pledged collateral as ineligible to be a Lent Security, provided there are eligible securities within the pledged collateral in an amount equal to the outstanding borrowing owed by a Fund. During the period in which the Lent Securities are outstanding, BNP must remit payment to each Fund equal to the amount of all dividends, interest or other distributions earned or made by the Lent Securities.

Under the terms of the Lending Agreement, the Lent Securities are marked to market daily, and if the value of the Lent Securities exceeds the value of the then-outstanding borrowings owed by a Fund to BNP under the Agreement (the "Current Borrowings"), BNP must, on that day, either (1) return Lent Securities to each Fund's custodian in an amount sufficient to cause the value of the outstanding Lent Securities to equal the Current Borrowings; or (2) post cash collateral with each Fund's custodian equal to the difference between the value of the Lent Securities and the value of the Current Borrowings. If BNP fails to perform either of these actions as required, each Fund will recall securities, as discussed below, in an amount sufficient to cause the value of the outstanding Lent Securities to equal the Current Borrowings. Each Fund can recall any of the Lent Securities and BNP shall, to the extent commercially possible, return such security or equivalent security to each Fund's custodian no later than three business days after such request. If a Fund recalls a Lent Security pursuant to the Lending Agreement, and BNP fails to return the Lent Securities or equivalent securities in a timely fashion, BNP shall remain liable for the ultimate delivery to each Fund's custodian of such Lent Securities, or equivalent securities, and for any buy-in costs that the executing broker for the sales transaction may impose with respect to the failure to deliver. Under the terms of the Lending Agreement, each Fund shall have the right to apply and set-off an amount equal to one hundred percent (100%) of the then current fair market value of such Lent Securities against the Current Borrowings. As of July 31, 2015, the market value of the Lent Securities for Clough Global Allocation Fund, Clough Global Equity Fund and Clough Global Opportunities Fund were \$80,612,407, \$139,200,059 and \$329,361,926, respectively.

The Board of Trustees has approved each Agreement and the Lending Agreement. No violations of the Agreement or the Lending Agreement have occurred during the period ended July 31, 2015.

Item 2 - Controls and Procedures.

(a) The registrant's Principal Executive Officer and Principal Financial Officer have evaluated the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940) as of a date within 90 days of this filing and have concluded that the registrant's disclosure controls and procedures were effective, as of that date.

(b) There was no change in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940) that occurred during the registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Item 3 – Exhibits.

(a) Separate certifications for the registrant's Principal Executive Officer and Principal Financial Officer, as required by Rule 30a-2(a) under the Investment Company Act of 1940, are attached as Ex99.CERT.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
