

BIOLARGO, INC.
Form 10-K
April 06, 2010

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the Fiscal Year ended December 31, 2009

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the Transition Period from _____ to _____

Commission File Number: 000-19709

BIOLARGO, INC.

(Exact Name of registrant as specified in its Charter)

Delaware 65-0159115
(State or other (IRS Employer
jurisdiction Identification No.)
of incorporation or
organization)

16333 Phoebe Ave., La 90638
Mirada CA
(Address of principal (Zip Code)
executive offices)

Issuer's telephone number, including area code: (949) 643-9540

Securities registered under Section 12(b) of the Exchange Act: None

Securities registered under Section 12(g) of the Exchange Act:
Common Stock, \$0.00067 par value

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Edgar Filing: BIOLARGO, INC. - Form 10-K

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer <input type="checkbox"/>	Accelerated filer <input type="checkbox"/>
Non-accelerated filer <input type="checkbox"/>	Smaller reporting company <input checked="" type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The registrant's revenues for the year ended December 31, 2009 were \$138,133.

The aggregate market value of the voting and non-voting common equity held by non-affiliates as of June 30, 2009 was approximately \$7,399,093 which is based on 16,442,429 shares of common stock held by non-affiliates. (Based upon the price at which the common equity was sold, or the average bid and asked price of such common equity for the last trading date prior to that date).

The number of shares outstanding of the issuer's class of common equity as of March 31, 2010 was 43,510,642.

Portions of the registrant's Information Statement in connection with actions to be taken by its majority shareholder in lieu of a 2010 Annual Meeting of Stockholders are incorporated by a reference in Part III hereof.

PART I

ITEM 1. BUSINESS

USE OF FORWARD LOOKING STATEMENTS IN THIS REPORT

This Annual Report contains forward-looking statements. These forward-looking statements include, but are not limited to, predictions regarding:

- our business plan;
- the commercial viability of our technology and products incorporating our technology;
- the effects of competitive factors on our technology and products incorporating our technology;
 - expenses we will incur in operating our business;
 - our liquidity and sufficiency of existing cash;
 - the success of our financing plans; and
 - the outcome of pending or threatened litigation.

You can identify these and other forward-looking statements by the use of words such as “may”, “will”, “expects”, “anticipates”, “believes”, “estimates”, “continues”, or the negative of such terms, or other comparable terminology. Forward-looking statements also include the assumptions underlying or relating to any of the foregoing statements.

Our actual results could differ materially from those anticipated in these forward-looking statements as a result of various factors, including those set forth below under the heading “Risk Factors”. All forward-looking statements included in this document are based on information available to us on the date hereof. We assume no obligation to update any forward-looking statements.

The information contained in this Annual Report is as of December 31, 2009, unless expressly stated otherwise.

As used in this report, the term “Company” refers to BioLargo, Inc., a Delaware corporation, its wholly-owned subsidiary BioLargo Life Technologies, Inc., a California corporation (which may be referred to separately as “BLTI”).

Our Business

By leveraging our suite of patented and patent-pending intellectual property, which we refer to as the BioLargo technology, our business strategy is to harness and deliver nature’s best disinfectant – iodine – in a safe, efficient, environmentally sensitive and cost-effective manner. The centerpiece of our BioLargo technology is CupriDyne™, which works by combining minerals with water from any source and delivering “free-iodine” on demand, in controlled dosages, in order to balance efficacy of disinfectant or odor control performance with concerns about toxicity.

In addition to our BioLargo technology, in 2008 we acquired the rights to market an iodine based water disinfection system (the “Isan system”) from Ioteq IP Pty. Ltd., an Australian company, and its U.S. affiliate Ioteq Inc., and recently licensed the rights to commercialize the Isan system from Ioteq (see “Strategic Alliance with Ioteq” below). The Isan system is an automated water disinfection system that substantially reduces the incidence of fungal growth, spoilage,

organisms and pathogens in water and on food. Capable of treating high volumes of water flow, the Isan system is a combination of electrodes for measuring iodine levels in the target water stream, a control unit which automatically controls the running of the system, iodine canisters to deliver the iodine, and resin canisters to collect by-products after disinfection has been completed. The Isan system is registered with the APVMA (Australian Pesticides and Veterinary Medicines Authority) and FSANZ (Food Standards Australia and New Zealand) in Australia and New Zealand, where it has approximately 150 customer installations currently operating.

- 1 -

Both our BioLargo technology and the Isan system have potential commercial applications within global industries, including but not limited to agriculture, animal health, beach and soil environmental remediation, consumer products, food processing, medical, and water industries. While we believe the potential applications are many, we are currently focused in two primary areas – the development of certain products designed for the animal health industry, and agriculture.

First, in 2009, we launched our first products incorporating our BioLargo technology under the brand name “Odor-No-More”, in the animal health industry. The primary benefits of the products are odor and moisture control, and customers using our animal bedding additive experience a net savings on total bedding costs. In 2010, we intend to expand our marketing efforts into new industries, as well as continue evaluating new product opportunities within the same industry. (See “Odor-No-More Branded Products,” below.)

Second, we are focused on commercializing our BioLargo technology and the Isan system in products applicable to the agriculture industry. We are actively seeking to secure strategic partners to either license or partner with to exploit commercial opportunities for CupriDyne and for the Isan system, and have recently sublicensed the rights to commercialize the Isan system in certain fields of use in the United States. (See “Strategic Alliance with Ioteq” below.) We continue research and product development in those areas. We continue to work with a number of global companies who are engaged in technology evaluation and testing processes. Simultaneously, we are also actively seeking to identify and negotiate regional or global partnerships to exploit commercial opportunities for these technologies. No such regional or global partnerships have been formed at this time, and we can make no representation about its ability to successfully conclude such arrangements.

Although we are focused primarily on odor control products and agriculture, we also intend to continue to advance our intellectual property, product designs and licensing opportunities for our technology for use in other industries, as capital resources are available to support these efforts.

Corporate

The Company was initially organized as Repossession Auction, Inc. under the laws of the State of Florida in 1989. In 1991, the Company merged into a Delaware corporation bearing the same name. In 1994, the Company’s name was changed to Latin American Casinos, Inc. to reflect its focus on the gaming and casino business in South and Central America, and in 2001 the Company changed its name to NuWay Energy, Inc. to reflect its new emphasis on the oil and gas development industry. During October 2002, the Company’s name was changed to NuWay Medical, Inc. coincident with the divestiture of its non-medical assets and the retention of new management. In March 2007, in connection with the approval by our stockholders of the acquisition of the BioLargo technology from IOWC Technologies, Inc., we changed our name to BioLargo, Inc.

After our name change, our common stock continued to trade through the National Quotation Service Bureau, commonly known as the “Pink Sheets”, under our new trading symbol “BLGO”, from March 21, 2007 through January 22, 2008. Since January 23, 2008, our common stock has been quoted on the OTC Bulletin Board under the trading symbol “BLGO”.

In January 2010, we formed Odor-No-More, Inc., as a wholly owned subsidiary, to manufacture, market, sell and distribute our Odor-No-More product line.

Our executive offices were previously located at 2603 Main Street, Suite 1155, Irvine, California 92614. In February 2010, we relocated our offices to 16333 Phoebe Ave, La Mirada, California, adjacent to the manufacturing facility and corporate offices of our national distributor, the E.T. Horn Company. Our telephone number is (949) 643-9540. Our principal corporate website is www.biolargo.com. We also archive investor and stockholder communications at www.biologoshares.blogspot.com, and our subsidiary maintains its website at www.odornomore.com. The information on our websites and blog is not, and shall not be deemed to be, a part of this Report.

Benefits of “Free-Iodine” Technologies

We believe that our BioLargo technology and the Isan system, which is also a “free-iodine” technology, generally offer the following beneficial features, among others:

- **Environmentally Friendly**—Our BioLargo technology and the Isan system feature a scientifically proven effective disinfectant – free-iodine (also an essential nutrient) – which is recognized as part of nature’s natural cycle of sanitization. The Isan system also recaptures disinfection by-products in many of its applications. Both are “green” technologies.
- **Inorganic Solution**—The use of iodine in our BioLargo technology and the Isan system is strategically important because free-iodine is generally considered to be the most effective and potent disinfecting solution, covering a broad range of materials upon which it is effective. It is also an inorganic solution, so that organic microbes are not known to be able to develop an acquired resistance to its killing power.
- **Disinfection-Deodorization**—The chemical composition of our BioLargo technology and free iodine delivered by the Isan system when incorporated into products or used in a treatment system, deploys an additive germ killing strategy that includes a flashing of iodine (as with our CupriDyne™ technology), or a controlled dose in either the CupriDyne™ technology of Isan system and when used in absorbent products, the CupriDyne™ technology also lowers PH levels, which creates an acidic environment, oxidation, and flocculation (or a binding reaction to lock in the microbes), as well as effective odor control features.
- **Increased Holding Power**—Our BioLargo technology can increase significantly the holding power of absorbent material, depending on product configuration.
 - **Disposal**—Our BioLargo technology renders contaminated or infectious material safe to handle.
- **Generally Recognized as Safe (GRAS) and Generally Recognized as Safe and Effective (GRASE)**—The actual chemicals used, in both CupriDyne and the Isan system, as well as the byproduct of the chemical reaction, in our CupriDyne technology, are understood by the U.S. Food and Drug Administration (“FDA”) and the scientific community generally as non-toxic and safe, when delivered within a range of dosages prescribed by the FDA. Iodine is also considered GRASE for its antimicrobial, sanitizing, disinfecting or sterilizing capabilities in appropriate product applications.

- Price—The cost of raw materials is not expected to add significantly to the cost of production of products incorporating our BioLargo technology. Additionally, we believe that the incorporation of our BioLargo technology into absorbent products will offer those products a price advantage over competing absorbent products by virtue of their increased performance, namely their increased holding power, absorbency, anti-microbial capabilities and deodorizing capabilities which may also reduce the amount of absorbent materials required to be used in product production to maintain acceptable performance levels. We further believe that the use of our BioLargo technology in non-absorbent applications will be more cost effective than iodine alternatives, such as chlorines and bromines or many other complex chemical compounds. The Isan system is competitively priced as compared to other disinfection technologies, such as chlorine.
- Safety and Automation -The Isan system is safe and user-friendly. Its controller module is able to warn the operator of any breach of preset levels and also, in certain circumstances, can shut down the system. These warnings can be audible, visual and/or sent electronically to a telephone or a computer. It has automatic monitoring and dosing capabilities on a continual basis. The controller module monitors and reports; functionality, dosing, supply of disinfection chemicals, maintenance, dosing treatment records for quality assurance and traceability.
- Lower Corrosion- Free Iodine as featured in CupriDyne and the Isan system is less corrosive than chlorine which may help extend the useful life of capital equipment as compared to chlorine systems.
- Less pH Sensitivity- The Isan system operates effectively within a broad range of pH, as compared to chlorine, which can help reduce labor costs and can help improve quality assurance and traceability when used in a food sanitization system, as compared to chlorine systems.

Odor-No-More Branded Products

In May of 2009 we officially launched our first products incorporating our BioLargo technology, targeted to the animal health marketplace under the “Odor-No-More” brand name, which help customers save time and money while controlling odor and moisture:

1. Animal Bedding Additive
2. Cat Litter Additive
3. Facilities and Equipment Wash

In the latter half of 2009, we introduced three additional animal bedding products directed at the small animal, birds and reptiles markets. These products are featured in a smaller size package (one pound) than the larger 10 pound package of animal bedding additive initially released. We have also modified the product formula to suit the new intended uses.

In January 2010, we formed a wholly owned subsidiary, Odor-No-More, Inc., and named as its president Joseph L. Provenzano, a member of our board of directors, our corporate secretary, and our Vice President of Operations.

Marketing – Equine Industry

We have focused our initial marketing efforts of our Odor-No-More products on our animal bedding additive for use in the equine industry. We chose this product and this market for two primary reasons. First, the size of the market is significant. With over nine million horses in the United States, horse owners spend an aggregate 4.6 billion dollars annually on “feed, bedding, and grooming supplies,” according to a 2005 study sponsored by the American Horse Council. Second, our selling proposition is compelling to the industry because we believe our animal bedding product can provide up to a 75% savings on horse bedding costs, while eliminating odor and moisture and helping create a safer and healthier environment for animals.

Since our product launch in May 2009, we have secured product distribution through multiple national and regional distributors in the animal care market, two of the largest catalog and eCommerce animal health supply retailers, a distributor in the exotic animal care market, and are currently in discussions with other industry leaders. We received our first large commercial order for Odor-No-More products, from national distributor E.T. Horn Company, in the summer of 2009. Despite our success in establishing distribution for our products, our sales will be limited until we can properly promote our products and brand.

For the year ended December 31, 2009, we incurred \$16,574 of advertising expense, including costs associated with print advertising, trade shows, equestrian events, local fairs, horse and livestock shows, and a horse rescue organization. We have not yet had the working capital necessary to fully execute a national advertising campaign to establish Odor-No-More as a recognizable brand throughout the equine industry. Without a comprehensive marketing and advertising campaign, we can make no assurance of the success of the sales of our Odor-No-More products. In addition to lacking the financial resources for a comprehensive advertising and marketing campaign, we lack the financial resources to hire a sales staff sufficient to generate significant sales. As such, we must rely on our wholesale distributor to sell through our products to their customers.

We also were honored to receive a Best New Product award at the SuperZoo 2009 convention for the pet industry, as well a featured product spotlight on a internationally known horse enthusiast television show named “Best of America by Horseback”, which was broadcast on over 600 stations in 14 nations in the month of January 2010. Our products have also been written about in a number of articles, which have been published in trade related publications. As part of our promotional and advertising campaign we are sponsoring and participating in equestrian events, local fairs, trade shows, horse and livestock shows, and a horse rescue organization.

In addition to sales of Odor-No-More products to distributors and retailers, we have developed a “free commercial trial” program as a way to prove the usefulness and cost savings of the Odor-No-More products to commercial scale accounts, such as horse stables or horse boarding facilities. As of this filing of this Report, we have ongoing trials with approximately 20 commercial equine centers. Throughout this test program, we are actively evaluating the methods and processes for expanding our selling activity to these types of customers. Although we believe we can demonstrate to these customers a net cost savings on bedding using our animal bedding additive, we have not yet completed our market test and we believe success in this area will require additional capital resources which we do not have available at this time.

There are many competitive products that claim to reduce odors in barns and horse stalls. Some of these products are offered at prices below our suggested retail price of our animal bedding additive. Although we believe that our animal bedding products outperform competing products, there can be no assurance that we can successfully differentiate our product and its performance with the competing products. We believe that the success of our selling efforts is highly reliant upon word-of-mouth marketing, testimonials and advertising. While we have benefited from a level of word-of-mouth and strong product performance related testimonials, our advertising has been limited due to our limited financial resources. While we are optimistic about the future success of our sales efforts for these products, we

can make no prediction about our future financial resources, which we believe are a critical part of creating strong brand and product awareness, and, ultimately, product sales.

- 5 -

Livestock

We believe our Odor-No-More products have application to the livestock industry, including dairy and beef cattle, swine, and poultry. The potential markets in those industries are large – there are an estimated 97 million cattle at any one time in the United States, and up to 10 times that figure world wide, and swine populations exceed 175 million in the United States. We intend to focus our efforts in areas in which the technology helps provide increased health benefits for the animals and cost savings for the producer. We have begun work with a number of customer and companies that sell into these commercial markets to test application methods and results to optimize the performance for these markets. We have not sold product to customers in these industries, and can make no assurance about whether our products will be commercially feasible or accepted.

Small Pets

In May 2009 we launched a cat litter additive product featuring our BioLargo technology. Later that year, we launched animal bedding additive in small packaging for small animals, birds, and reptiles. We believe the market for our products in these segments is large. According to the American Pet Products Manufacturers Association 2009-10 National Pet Owners survey, Americans own approximately 93.6 million cats, 15 million birds, 15.9 million small animals and 13.6 million reptiles. We believe that our products out perform competing products making similar claims of odor reduction or elimination. However, there can be no assurance that we will be able to differentiate our products in this marketplace, or successfully convince consumers to pay a premium for our products.

We have not yet focused our efforts marketing or establishing sales or distribution channels for these products in these industries. Rather, these products are being sold in limited quantities along side our lead product, the 10 pound animal bedding additive. We are currently seeking a partner or licensee to distribute these products in the pet industry.

Distributors

We have entered into a non-exclusive master distributor agreement with the E.T. Horn Company, which is headquartered in La Mirada, California. From time to time, E.T. Horn purchases inventory from us, and then makes the purchased inventory available to us for re-sale to other distributors or customers of either E.T. Horn and/or distributors or customers of Odor-No-More. Our relationship with E.T. Horn has expanded to include contract manufacturing as well as warehousing at multiple ship points throughout the nation to provide timely and low cost shipping capabilities to customers. We have also sub-leased office space on the E.T. Horn campus in La Mirada. We believe that this relationship is well suited to enable us to more readily finance the inventory and order flow if our sales volumes grow. Although we are confident that the relationship with E.T. Horn should continue to be mutually beneficial for both parties, nothing inherent in the contractual obligations of one to the other provides any assurances that it will continue as it is presently operating now.

We are actively recruiting wholesale distributors and retailers to carry our Odor-No-More products. Typically, when a new distributor agrees to purchase, inventory, and sell Odor-No-More products, the process of developing the account into a commercially meaningful relationship is a lengthy and time-consuming process. We can make no assurance that our existing distributors will continue to order product, or will be successful in selling to their customers.

Manufacturing

We do not presently intend to manufacture our Odor-No-More products. Rather, we have established local third party manufacturing and packaging, including our “master distributor,” the E.T. Horn Company, as well as alternative manufacturing facilities in other parts of the United States. We warehouse product in locations across the United States to better serve our customers, and primarily utilize the E.T. Horn Company for distribution of our products to our customers.

“Regulated” Product Claims

Our Odor-No-More products may be eligible for certain regulated marketing claims. While we believe we are not required to obtain regulatory approval for our current marketing and product claims, it may, at some point in the future, be in our best interests to work towards and pursue additional regulated marketing claims to further differentiate our products in the marketplace, as financial resources are more readily available.

Strategic Alliance with Ioteq – The Isan System

In August 2008, we entered into a marketing and representation agreement (the “Marketing Agreement”) with Ioteq IP Pty, Ltd., an Australian company, and its United States affiliate Ioteq Inc. (collectively, “Ioteq”), pursuant to which we represent and market Ioteq’s iodine-based disinfection technology, the Isan System, on an exclusive basis in the United States and on a non-exclusive basis in the rest of the world, with respect to seeking, identifying, introducing and negotiating various business opportunities.

We are obligated to make monthly payments to Ioteq of \$20,000 per month commencing September 1, 2008. For our efforts in seeking, identifying, introducing and negotiating business opportunities, Ioteq shall reimburse us our actual out-of-pocket costs incurred and pay us a royalty as follows:

- (i) 40% of net revenue (as defined in the Marketing Agreement) received or earned by, or paid to, Ioteq, whether in cash or other property, derived directly or indirectly from each business opportunity where Ioteq incurs actual expenses in connection with the manufacture of products for such business opportunity; or
- (ii) 40% of all gross amounts received or earned by, or paid to, Ioteq, whether in cash or other property, derived directly or indirectly from each other business opportunity, including without limitation licensing and distribution agreements and arrangements.

Sublicense to BioLargo and Amendment of Marketing Agreement

On March 26, 2010, Ioteq-US and BioLargo entered into a sublicense agreement (the “Ioteq Sublicense Agreement”) which grants BioLargo the exclusive rights to use, exploit, develop and commercialize certain technology, including patented and proprietary technologies (referred to in this report as the “Isan System Technology”) in the United States, Canada and Mexico, in any field of use. The agreement includes rights allowing BioLargo to sublicense the technology. Pursuant to the Ioteq Sublicense Agreement, BioLargo agreed to pay a royalty of 5% to Ioteq-US, as well as 60% of revenues generated from sublicense agreements, up to AUD\$800,000 (Australian dollars; unless otherwise noted, all figures in U.S. dollars). Once Ioteq-US has received AUD\$800,000 from BioLargo, the royalty rate is automatically reduced from 5% to 2.5%, and sublicensing fees are reduced from 60% to 30%. BioLargo is required to pay a minimum annual license fee to Ioteq Inc. of \$150,000, which will be divided into twelve equal payments of \$12,500 per month. The Ioteq Sublicense Agreement also contains customary provisions relating to indemnity, insurance, governing law, assignment of rights and obligations, attorneys’ fees, force majeure and other matters standard for license transactions.

Simultaneously with the execution of the Ioteq Sublicense Agreement, BioLargo and Ioteq amended the terms of the Marketing Agreement. As amended, BioLargo will no longer be required to pay to Ioteq a monthly payment of \$20,000. A final payment obligation will accrue April 1, 2010, and BioLargo agreed to pay Ioteq \$50,000, which amount represents accrued and unpaid monthly payment amounts, including the final April 2010 accrual.

Sublicense to Isan USA

On March 29, 2010, BioLargo and Isan USA, Inc. (“Isan USA”) entered into a sublicense agreement (the “Isan USA Sublicense”) which grants Isan USA the exclusive rights to use, exploit, develop and commercialize the Isan System Technology in the United States, in particular fields of use (set forth below). Isan USA is a California corporation founded and organized by Bert Fenenga. Mr. Fenenga, headquartered in Oceanside, California, is a certified public accountant and senior executive with 25 years of corporate experience serving as Managing Director, COO, CFO or Senior VP with such noteworthy firms as Eagle Creek, Inc., and Quicksilver, Inc. Mr. Fenenga also invested in our private securities offering which commenced June 1, 2009.

The Isan USA Sublicense grants Isan USA exclusive rights to commercialize the Isan System Technology in the United States, in the following fields of use (as further defined in the agreement): (i) horticulture, (ii) post-harvest sanitation of fruits and vegetables, (iii) dairy use, and (iv) poultry drinking water. Additional fields of use may be added by Isan USA upon the satisfaction of certain conditions, including the submission of the proposed field of use, and a plan and budget for development and commercialization of product(s) in the proposed field of use. BioLargo would have 30 days after any such submission to review and respond to the proposal. If the parties agree, the sublicense agreement would be amended to include the proposed field of use.

In addition to the exclusive rights granted in the United States, the Isan USA Sublicense grants Isan USA rights to export licensed products to Canada and Mexico. Furthermore, should BioLargo enter into a sublicense agreement with a third party to commercialize the Isan System technology in the United States in a field of use not licensed to Isan USA, BioLargo is required to pay to Isan USA 15% of any revenue generated from that sublicense agreement. If BioLargo desires to commercialize the Isan System Technology in the United States in a field of use not subject to the Isan USA Sublicense, it must provide Isan USA the option to purchase the United States rights to the proposed field of use for an amount equal to one-third of the proposed commercialization budget, such payment to be made as expenses are accrued, and subject to increase or decrease based on actual expenditures.

Pursuant to the Isan USA Sublicense, Isan USA paid to BioLargo a \$100,000 initial license fee, fully earned upon payment, and has agreed to pay a 6% royalty on sales of licensed products, and 30% of revenues generated from sublicense agreements. The royalty on sales of licensed products decreases to 5% if annual net sales revenues exceed \$10,000,000, and decrease to 4% if annual net sales revenues exceed \$15,000,000. Isan USA has agreed to pay a minimum annual license fee to BioLargo of \$20,000 per month for the first 24 months of the agreement, and \$33,333 per month thereafter, paid quarterly, in arrears, commencing June 30, 2010. Each of Ioteq-Australia and Ioteq-US executed a written consent to the Isan USA Sublicense.

As partial consideration for the Isan USA Sublicense, BioLargo was granted an option to purchase a 20% non-dilutive common stock interest in Isan USA, for a purchase price equal to the basis upon which the founders of Isan USA purchased their shares, not to exceed an aggregate of \$200,000. These essential terms, and other standard terms and conditions, will be set forth in a written agreement, to be mutually prepared by the parties.

The Isan USA Sublicense grants Isan USA the right to conduct research and development activities, and pursue regulatory approval, field trials, and all other work necessary to develop, improve, enhance and commercialize the Isan System Technology within the defined fields of use in the United States. Any improvements to the Isan System Technology remain the property of BioLargo.

If Isan USA determines that the continuation of the Isan USA Sublicense will not be, or is no longer, economically viable, Isan USA may terminate the Isan USA Sublicense upon not less than 90 days written notice to BioLargo. Otherwise, the Isan USA Sublicense will expire on the earlier of (i) the expiration of the patent rights licensed, or (ii) on the 10th anniversary of the agreement. Isan USA may extend the agreement for six additional periods of five years, provided that the licensed patent rights remain valid. The Isan USA Sublicense also contains customary provisions relating to indemnity, insurance, governing law, assignment of rights and obligations, attorneys' fees, force majeure and other matters standard for license transactions.

Agency Agreement

In addition to the Isan USA Sublicense, on March 29, 2010, BioLargo and Isan USA entered into an agency agreement ("Agency Agreement") whereby BioLargo was designated a non-exclusive representative of Isan USA in the United States, with respect to seeking, identifying, introducing and negotiating –"business opportunities" to commercialize the Isan System Technology. As consideration for the designation, Isan USA agreed to pay to BioLargo 7% of any net royalty or payment received by Isan USA derived directly or indirectly from such business opportunities. The parties may agree on a different percentage. If BioLargo proposes to Isan USA a sublicense in a field of use sublicensed to Isan USA pursuant to the Isan USA Sublicense, with a party with whom BioLargo has entered into a product evaluation agreement, and within one year of the March 29, 2010 effective date of the Isan USA Sublicense, Isan USA has agreed to pay to BioLargo a sublicensing fee of 75% of any revenue received from such sublicense agreement. If the sublicense is commenced subsequent to one year from the March 29, 2010 effective date of the Isan USA Sublicense, Isan USA has agreed to pay to BioLargo a sublicensing fee of 50% of any revenue received from such sublicense agreement.

Research and Development

Through IOWC, Mr. Code has been involved in the research and development of the BioLargo technology since 1997. He has participated in the Canadian Federal Scientific Research and Experimental Development program and he was instrumental in the discovery, preparation and filing of the first BioLargo technology patents. He has worked with manufacturers, distributors and suppliers in a wide variety of industries to gain a full appreciation of the potential applications and the methodologies applicable to our BioLargo technology for their manufacture and performance. He continues to research methods and applications to continue to expand the potential uses of our BioLargo technology as well as work to uncover new discoveries that may provide additional commercial applications to help solve real world problems in the field of disinfection.

During 2009, we engaged in a number of pivotal research studies that we hope will help advance our BioLargo technology. First, we engaged the University of Hawaii to study the uses of CupriDyne for environmental applications for contaminated sands. The research confirmed that sewage contaminated sand samples treated with an 80 mg/L of CupriDyne solution achieved very effective (95-99%) to optimum effective (>99%) level of disinfection for enterococci bacteria. The study also concluded that the CupriDyne is less reactive with components in an environmental sample than chlorine, and therefore may be a more effective disinfectant than chlorine under some environmental conditions.

Second, we co-sponsored, along with the Idaho Potato Commission and other industry members, a research program on the "Effect of Fungicide Programs on Foliar Disease Control." The study evaluated our BioLargo technology as compared with other available pesticide products. More work is being planned for 2010.

Third, we engaged the University of Alberta in Edmonton, Canada to conduct a study related to the treatment of liquid swine manure using our BioLargo technology. The results obtained from the study suggest that our BioLargo technology is a very effective alternative to existing liquid manure handling methods in terms of nutrient, total suspended solids, and coliform reductions. We intend to continue research in this area, and believe that applications for this research include also waste water treatment, industrial water, and the oil and gas industries, including the treatment of bitumen deposits (also known as oil or tar sands).

Ongoing third-party testing is a critical part of our business plan. These efforts can be time consuming and some of these efforts are costly, requiring adequate capital resources to continue such efforts. However we cannot give any assurance that adequate capital will be available or, if available, will be available on favorable terms.

We spent \$170,117 in 2009 and \$113,748 in 2008 on research and development activities. Our research and development expenditures over the next 12 months could vary significantly and will depend upon our access to capital. Although we are actively pursuing such financing, no such commitment is yet in place. We would invest any such funds primarily on continued testing of our BioLargo technology in certain applications and the development of additional production methods for use of our BioLargo technology in certain applications.

Manufacturing

We do not presently intend to manufacture our Odor-No-More products, but rather contract with third parties to manufacture products under our own brands. (See “Odor-No-More-Manufacturing,” above.) We work with manufacturers on a contract-for-hire basis, or on a project-by-project basis with the potential for these manufacturers to create a product supplier relationship for potential licensees of products incorporating our BioLargo technology. These collaborative efforts will focus on design and specifications for production of pre-commercial samples of products and for actual commercial products. During 2009, we established a non-exclusive supplier relationship with Custom Chemical Formulators, located in Southern California, to provide blending and packaging related services for our Odor-No-More products. We are currently negotiating with third party material components providers and manufacturers, and equipment manufacturers, to broaden the scope of application, manufacture and uses of our BioLargo technology, including E.T. Horn.

We have an existing non-exclusive business relationship with Aveka, Inc. (“Aveka”). Aveka assists us in (i) supplying blended material or treated particles, the chemicals we use in the form tablets or powders, and super-absorbent polymer (“SAP”) beads for incorporation in absorbent material; (ii) blending materials, (iii) particle treatment; (iv) preparing samples of products; and (v) manufacturing and processing specifications for materials and prototypes that incorporate our BioLargo technology. Aveka also assists us in product design and assists in discovery associated with the uses and manufacturing of products associated with our technology.

We intend to use Aveka or other third party manufacturers to produce chemicals such as tablets and powders. Aveka does not produce SAP beads and we intend to use other suppliers of such material. We do not have exclusive arrangements or written agreements with any such manufacturers that we have used to date. We believe that we have several choices for manufacturers of chemicals and are not dependent upon any single manufacturer or source of materials. Most of the chemicals we use in the production of the tablets and powders for our BioLargo technology, such as potassium iodide, are not scarce and not subject to price volatility. SAP beads, which are a petrochemical derivative, are generally readily available but have been subject to periodic scarcity and price volatility from time to time during recent years, although prices are relatively stable at present.

Licensing Efforts

We continue to devote a significant part of our resources to the marketing of our BioLargo technology and the Isan system to potential licensees. Our efforts with regard to our BioLargo technology is a continuation of the initial efforts we have undertaken since 2006, however we are now active in the work to support existing technology evaluation and testing agreements as well as various potential licensing companies already working with our technology. We expect to continue these efforts over the next 12 months.

Competition

Large well-capitalized companies, such as Johnson & Johnson, BASF Corporation, Dow Chemical Co., E.I. DuPont De Nemours & Co., Chemical and Mining Company of Chile, Inc., Proctor and Gamble Co., Diversey, Inc., EcoLab, Inc., Steris Corp. and Siemens AG, and others, dominate each of their respective markets for disinfecting or sanitizing products. Each of these named companies and many other competitors are significantly more capitalized than we are and have many more years of experience in producing disinfecting or sanitizing products.

Our BioLargo technology and products incorporating our BioLargo technology would compete with many other applications currently on the market, as would the Isan system. In addition, we are aware of other companies engaged in research and development of other novel approaches to applications in some or all of the markets identified by us as potential fields of application for our products and the Isan system. Many of our present and potential competitors have substantially greater financial and other resources and larger research and development staffs than we have. Many of these companies also have extensive experience in testing and applying for regulatory approvals. In addition, colleges, universities, government agencies, and public and private research organizations conduct research and are becoming more active in seeking patent protection and licensing arrangements to collect royalties for the use of technology that they have developed, some of which may be directly competitive with our applications.

Regulation

Products incorporating our BioLargo technology may be regulated depending upon the application and the scientific claims made. We believe that the primary focus of our BioLargo technology is its disinfecting capability, and such claims are subject to FDA or EPA regulation. However, we believe that some products incorporating our BioLargo technology can be sold based on claims limited to deodorization, or enhanced holding or absorption capabilities only. We believe that such claims are not subject to FDA or EPA regulation. We believe that the Isan system will require either or both FDA and EPA approval prior to use in the United States, depending on the particular use.

The regulatory approvals for certain applications may be difficult, impossible, time consuming and or expensive to obtain. While management believes that such approvals are available for the applications contemplated, until we or others obtain any required approvals from the FDA, EPA or other Federal or state regulatory bodies, we may not be able to generate commercial revenues. Certain specific regulated applications require highly technical analysis, additional third party validation and will require regulatory approvals from agencies like the FDA. Accordingly, we can give no assurance as to the ultimate success in obtaining the necessary approvals from either the EPA or FDA. Under most licensing arrangements that we anticipate, it is the licensee who would bear the responsibility of all regulatory compliance, including good manufacturing process certifications for certain medical applications.

We do not believe that we make any regulated claims associated with our Odor-No-More products, and at this time no reason any such approvals would be required for these products.

Intellectual Property

We regard our intellectual property as critical to our ultimate success. Our goal is to obtain, maintain and enforce patent protection for our products and technologies, and to protect our trade secrets and proprietary information through laws and contractual arrangements.

We worked closely with Mr. Code and IOWC prior to the completion of the acquisition of certain intellectual property and assets from IOWC in April 2007 and have continued to work with Mr. Code since that time in his capacity as our Chief Technology Officer, to identify technology improvements and additional patent opportunities that expand on and enhance the original patents issued. At the same time, we have worked to secure additional third-party testing and validations for the efficacy and product claims associated with our BioLargo technology, namely through our work with ATS, the University of Hawaii, the Department of Environmental Engineering at UCLA and Oregon State University.

Our BioLargo technology consists of certain intellectual property including two U.S. patents (U.S. Patent Numbers 6146725 and 6328929), relating to a process whereby disinfecting chemistry is incorporated into absorbent materials, liquids, powders, tablets or other delivery methods, that can be then incorporated into products in multiple industries. Seven additional patent applications have been filed with the United States Patent and Trademark Office (“USPTO”) and three additional patent applications have been filed with the International Patent Cooperation Treaty (“PCT”) relating to our BioLargo technology. Our BioLargo technology also includes know-how and trade secrets, which, together with our intellectual property, contribute to our expertise in product design, manufacturing, product claims, safety features and competitive positioning of products that feature our BioLargo technology. The BioLargo technology was originally developed by Kenneth Reay Code, our Chief Technology Officer, a director and our principal stockholder.

We believe that this suite of intellectual property covers the presently targeted major areas of focus for our licensing strategy. The description of our intellectual property, as present, is as follows:

Patents

- United States Patent 6,146,725, dated November 14, 2000, entitled “absorbent composition”, relating to an absorbent composition to be used in the transport of specimens of bodily fluids
- United States patent 6,328,929, dated December 11, 2001, entitled “Method of delivering disinfectant in an absorbent substrate”, relating to method of delivering disinfectant in an absorbent substrate

Patent Applications

- USPTO Patent Application 11/516,958 (filed September 7, 2006), relating to the use of our BioLargo technology as a treatment for remediation and improvement of a mass such as sand or soil that has been contaminated with microbes such as bacteria, viruses, rickettsiae and fungi.
- USPTO Patent Application 11/516,960 (filed September 7, 2006), relating to the use of our BioLargo technology to provide protection against antimicrobial activity including the preventing of microbial build up that can occur, when used in close proximity to the bodies of human patients in product such as sheets, diapers, bandages compresses and the like.

- USPTO Patent Application 11/973,933 (filed October 11, 2006), relating to the use of our BioLargo technology for antimicrobial protection, in environments such as offices, vehicle cabs, operating rooms, vehicle interiors, grain storage facilities and the like, that need to be protected from or cleansed of microbial or chemical material that might be of concern. The technology also includes proprietary coating and/or treatment of provided materials or reagents.
- USPTO Patent Application 12/001,073 (filed December 8, 2006), relating to the use of our BioLargo technology as a treatment of environments including fields, lawns, parks, orchards, farm fields, greenhouses to provide at least pesticidal activity.
- USPTO Patent Application 12/009,586 (filed January 18, 2007), relating to use of our BioLargo technology as a treatment of residue, deposits or coatings within large liquid carrying structures such as pipes, drains, ducts, conduits, run-offs, tunnels and the like, using iodine, delivered in a variety of physical forms and methods, including using its action to physically disrupt coatings. The iodine's disruptive activity may be combined with other physical removal systems such as pigging, scraping, tunneling, etching or grooving systems or the like.
- USPTO Patent Application 12/012,297 (filed February 8, 2007), relating to the use of our BioLargo technology as protection of against antimicrobial activity in environments that need to be protected or cleansed of microbial or chemical material. These environments include closed and open environments and absorbent sheet materials that exhibit stability until activated by aqueous environments. The field also includes novel particle technology, coating technology or micro-encapsulation technology to control the stability of chemicals that may be used to kill or inhibit the growth of microbes to water vapor or humidity for such applications.
- USPTO Patent Application 12/220,484 (filed July 24, 2008), relating to the use of an article for application to a surface to provide antimicrobial and/or anti-odor activity. At least one of the reagents is coated with a water-soluble, water dispersible or water-penetrable covering that prevents ambient conditions of 50% relative humidity at 25°C from causing more than 10% of the total reagents exposed to the ambient conditions from reacting in a twenty-four hour period
- PCT/US Patent Application 2007/07508 (filed March 27, 2007), claiming priority from at least some of the earlier USPTO Patent applications listed above, and expanded the scope of coverage to additional technologies such as packets for dishwashers.
- PCT/US Patent Application 2007/07515 (filed March 27, 2007), claiming priority from USPTO patent application 60/900,374 and its associated claims.
- PCT/US Patent Application filed December 3, 2008), claiming priority from USPTO patent application 12/001,073 and its associated claims.

In addition to these applications, we have filed patent applications in multiple foreign countries, including the European Union, pursuant to the PCT. Subject to adequate financing, we intend to continue to expand and enhance our suite of intellectual property through ongoing focus on product development, new intellectual property development and patent applications, and further third-party testing and validations for specific areas of focus for commercial exploitation. We currently anticipate that additional patent applications will be filed during the next 12 months with the USPTO and the PCT, although we are uncertain of the cost of such patent filings, which will depend upon the number of such applications prepared and filed. The expense associated with seeking patent rights in multiple foreign countries is expensive, and will require substantial ongoing capital resources. However we cannot give any assurance that adequate capital will be available. Without adequate capital resources, we will be forced to abandon patent applications and irrevocably lose rights to our technologies.

Executive Officers

As of December 31, 2009 our executive officers were:

- Dennis P. Calvert: Chief Executive Officer, President and Chairman of the Board
 - Charles K. Dargan II: Chief Financial Officer
 - Kenneth R. Code: Chief Technology Officer
- Joseph L. Provenzano: Corporate Secretary and Vice President of Operations

Mr. Provenzano was also appointed the President of our wholly owned subsidiary, Odor-No-More, Inc., which began operations in January 2010.

Employees

As of December 31, 2009, we employed three full-time employees. We also hire, on an as needed basis, consultants who provide certain specified services to us.

ITEM 1A. RISK FACTORS

The Company faces a number of significant risks associated with its current plan of operations. These include the following:

The effects of the recent global economic crisis may impact our business, operating results, and financial condition.

The recent global economic crisis has caused disruptions and extreme volatility in global financial markets and increased rates of default and bankruptcy, and has impacted levels of consumer spending. These macroeconomic developments could negatively affect our business, operating results, and financial condition in a number of ways. For example, current or potential customers may delay or decrease spending with us or may not pay us or may delay paying us for previously purchased products and services.

Our limited operating history makes evaluation of our business difficult.

We have limited historical financial data upon which to base planned operating expenses or forecast accurately our future operating results. Further, our limited operating history will make it difficult for investors and securities analysts to evaluate our business and prospects. Our failure to address these risks and difficulties successfully could seriously harm us.

We have never generated any significant revenues, have a history of losses, and cannot assure you that we will ever become or remain profitable.

We have not yet generated any significant revenue from operations and, accordingly, we have incurred net losses every year since our inception. To date, we have dedicated most of our financial resources to research and development, general and administrative expenses and initial sales and marketing activities. We have funded all of our activities through sales of our debt or securities. Even if and when we begin licensing our technology, and even as we begin selling our first products, we anticipate net losses and negative cash flow to continue for the foreseeable future until such time as licensing or operating revenue is generated in sufficient amounts to offset operating losses. As planned, we have expanded both our research and development efforts, and our sales and marketing efforts, during the past year. Consequently, we will need to generate significant additional revenue to fund our operations. This has put a proportionate corresponding demand on capital. Our ability to achieve profitability is dependent upon our continuing research and development, product development, and sales and marketing efforts, and our ability to successfully license our BioLargo technology and/or the Isan system. There can be no assurance that we will ever generate revenues or that any revenues that may be generated will be sufficient for us to become profitable or thereafter maintain profitability. We may also face unforeseen problems, difficulties, expenses or delays in implementing our business plan.

Our cash requirements are significant and our operating expenses are increasing. The failure to raise additional capital will have a significant adverse effect on our financial condition and its operations.

Our cash requirements and expenses have been increasing and have been and will continue to be significant. Our net cash used from continuing operations for the years ended December 31, 2009 and 2008 was \$1,369,394 and \$1,899,034, respectively. These negative cash flows are primarily related to operating losses and, to a lesser extent, fluctuations in working capital items. We will continue to use cash in 2010 as it becomes available and we will require significant additional financing for working capital requirements for the remainder of 2010 and for the foreseeable future to continue the development, marketing and licensure of our technology and products based on our technology. Although we have been successful in raising funds in the past, there can be no assurance that we will be able to successfully raise funds in the future, especially in light of current adverse conditions in the capital markets and the

weak economy generally. The failure to raise additional capital will have a significant adverse effect on our financial condition, our operations, and our ability to market and sell our products.

- 15 -

From time to time, we issue stock, instead of cash, to pay some of our operating expenses. These issuances are dilutive to our existing stockholders.

We are also a party to agreements that provide for the payment of, or permit us to pay at our option, securities in consideration for services provided to us. All such issuances are dilutive to our stockholders because they increase the total number of shares of our common stock issued and outstanding, even though such arrangements assist us with managing our cash flow at a time of increasing operating expenses coupled with decreased and further decreasing liquidity.

Our stockholders face further potential dilution in any new financing.

Any additional equity that we raise would dilute the interest of the current stockholders and any persons who may become stockholders before such financing. Given the low price of our common stock, such dilution in any financing of a significant amount could be substantial.

Our stockholders face further potential adverse effects from the terms of any preferred stock which may be issued in the future.

In order to raise capital to meet expenses or to acquire a business, our Board of Directors may issue additional stock, including preferred stock. Any preferred stock which we may issue may have voting rights, liquidation preferences, redemption rights and other rights, preferences and privileges. The rights of the holder's of our common stock will be subject to, and in many respect subordinate to, the rights of the holders of any such preferred stock. Furthermore, such preferred stock may have other rights, including economic rights, senior to our common stock that could have a material adverse effect on the value of our common stock. Preferred stock, while providing desirable flexibility in connection with possible acquisitions and other corporate purposes, can also have the effect of making it more difficult for a third party to acquire a majority of our outstanding voting stock, thereby delaying, deferring or preventing a change in control of the Company.

There are several specific business opportunities we are considering in further development of our business. None of these opportunities is yet the subject of a definitive agreement and most or all of these opportunities will require additional funding obligations on our part, for which funding is not currently in place.

In furtherance of our business plan, we are presently considering a number of opportunities to promote our business, to further develop and broaden, and to license, our technology with third parties. While discussions are underway with respect to such opportunities, there are no definitive agreements in place with respect to any of such opportunities at this time, other than the product evaluation agreement discussed in further detail. There can be no assurance that any such opportunities being discussed will result in definitive agreements or, if definitive agreements are entered into, that they will be on terms that are favorable to us.

Moreover, most if not all of these other opportunities, should they result in definitive agreements being entered into, would require us to expend additional monies above and beyond our current operating budget to promote such endeavors. No such financing is in place at this time for such endeavors and we cannot assure you that any such financing will be available, or if it is available whether it will be on terms that are favorable to the company.

The cost of maintaining our public company reporting obligations is high. We expect to incur increased costs under the Sarbanes-Oxley Act of 2002.

We are obligated to maintain our periodic public filings and public reporting requirements, on a timely basis, under the Rules and Regulations of the SEC. In order to meet these obligations, we will need to continue to raise capital. If adequate funds are not available, we will be unable to comply with those requirements and could cease to be qualified to have our stock traded in the public market. As a public company, we incur significant legal, accounting and other expenses. In addition, the Sarbanes-Oxley Act of 2002, as well as related rules adopted by the SEC, has imposed substantial requirements on public companies, including certain corporate governance practices and requirements relating to internal control over financial reporting under Section 404 of the Sarbanes-Oxley Act. Section 404 further requires that the reporting company's independent auditors attest to, and report on, this management assessment. As of December 31, 2009, we were not yet subject to the auditor attestation requirement of Section 404; however, we expect we will be subject to that attestation for the current year ended December 31, 2010. If we fail to maintain a system of adequate controls, it could have an adverse effect on our business and stock price.

Our internal controls over disclosure controls and procedures needed improvement as of December 31, 2009.

As of December 31, 2009, management concluded that the Company's internal controls over disclosure controls and procedures are effective, but need improvement. Although we are attempting to address and correct weaknesses, if we are unable to successfully do so, or if additional material weaknesses or significant deficiencies in our internal control over financial reporting develop, we may be unable to comply with our periodic reporting requirements, accurately report our financial results, detect fraud or comply with the requirements of Section 404 of the Sarbanes-Oxley Act. Remedying existing weaknesses, as well as any additional weaknesses or significant deficiencies that we or our auditors may identify in the future, may require us to incur significant costs and expend significant time and management resources. We cannot assure you that any of the measures we implement to remedy any such current or future weaknesses or deficiencies will effectively mitigate or remediate them. Under rules issued by the SEC, as currently in effect, our auditors are required to evaluate, document and test our internal control procedures under Section 404 of the Sarbanes-Oxley Act and the related rules of the SEC for the year ended December 31, 2010. We must begin to implement proper procedures significantly in advance of this date and will incur significant up-front expenses to do so. If we are unable to achieve and maintain adequate disclosure controls and procedures and internal controls, our business and operating results could be harmed.

There are significant risks relating to our BioLargo technology.

Our BioLargo technology is at an early stage of development. There is a risk that our BioLargo technology will not be commercially feasible or, even if our BioLargo technology is commercially feasible, it may not be commercially accepted. In addition, many products incorporating our BioLargo technology will require extensive research, development and testing before they can be commercialized. Many of these potential products, if any, also may involve lengthy regulatory reviews and require regulatory approval before they can be sold. There is no assurance, however, that any products incorporating our BioLargo technology will prove to be safe and effective, meet regulatory standards or continue to meet such standards if already approved. There is no assurance that we can market our BioLargo technology successfully as a licensor. Failure to achieve commercial feasibility, demonstrate safety, achieve clinical efficacy, obtain regulatory approval and/or, together with partners, successfully market products will negatively impact our revenues and results of operations. As a company with an unproven business strategy, our limited history of operations makes evaluation of our BioLargo technology as a business difficult. We may not attain profitable operations and our management may not succeed in realizing our business objectives.

We expect to incur future losses and may not be able to achieve profitability.

Although we are generating revenue from the sale of Odor-No-More products, and we expect to generate revenue from product evaluation and/or product development agreements, and eventually from licensing our BioLargo technology, as well as engaging in direct sales of new products, we anticipate net losses and negative cash flow to continue for the foreseeable future until such time as our products are expanded in the marketplace and they gain broader acceptance by resellers and customers. While our current level of sales may provide some indication of the potential for future sales, the current level of sales is not sufficient to support the financial needs of our business. We cannot predict when sales volumes will be sufficiently large to cover our operating expenses. The success of our Odor-No-More products is largely dependent upon the continued support by independent distributors and therefore, we cannot rely upon or control their activity. We intend to expand our marketing efforts as financial resources are available. We intend to significantly expand our research and development efforts. Consequently, we will need to generate significant additional revenue or seek additional funding to fund our operations. This has put a proportionate corresponding demand on capital. Our ability to achieve profitability is dependent upon our efforts to deliver a viable product and our ability to successfully bring it to market, which we are currently pursuing. Although our management is optimistic that we will succeed in licensing our BioLargo technology, we cannot be certain as to timing or whether we will generate sufficient revenue to be able to operate profitably. If we cannot achieve or sustain profitability, we may not be able to fund our expected cash needs or continue our operations. If we are not able to devote adequate resources to promote commercialization of our BioLargo technology, our business plans will suffer.

Because we have limited resources to devote to sales, marketing and licensing efforts with respect to our BioLargo technology, any delay in such efforts may jeopardize future research and development of technologies, and commercialization of our BioLargo technology. Although our management believes that it can finance commercialization efforts through sales of our securities and possibly other capital sources, if we do not successfully bring our BioLargo technology to market, our ability to generate revenues will be adversely affected.

If we are not able to manage our anticipated growth effectively, we may not become profitable.

We anticipate that expansion will continue to be required to address potential market opportunities for our technology and our products. Our existing infrastructure is limited, is not scalable, and will not support future growth, if any. There can be no assurance that we will have the financial resources to create new infrastructure, or that any such infrastructure will be sufficiently scalable to manage future growth, if any. There also can be no assurance that if we continue to invest in additional infrastructure, we will be effective in expanding our operations or that our systems, procedures or controls will be adequate to support such expansion. In addition, we will need to provide additional sales and support services to our partners if we achieve our anticipated growth with respect to the sale of our technology for various applications. Failure to properly manage an increase in customer demands could result in a material adverse effect on customer satisfaction, our ability to meet our contractual obligations, and on our operating results.

Many of the products incorporating our BioLargo technology will require regulatory approval, as will the recently licensed Isan system.

The products in which our BioLargo technology may be incorporated have both regulated and non-regulated applications. The Isan system, which we recently licensed from Ioteq and sublicensed to a third party, has only regulated applications. The regulatory approvals for certain applications may be difficult, impossible, time consuming and or expensive to obtain. While the management believes such approvals can be obtained for the applications contemplated, until those approvals from the FDA or the EPA or other regulatory bodies, if required, at the federal and state levels, as may be required are obtained, then we may not be able to generate commercial revenues. Certain specific regulated applications and its use therein require highly technical analysis, additional third party validation and will require regulatory approvals from organizations like the FDA. Certain applications may also be subject to additional state and local agency regulations, increasing the cost and time associated with commercial strategies. Additionally, most products incorporating our BioLargo technology that may be sold in the European Union (“EU”) will require EU and possibly also individual country regulatory approval. All such approvals, including additional testing, are time-consuming, expensive and do not have assured outcomes of ultimate regulatory approval.

We need to outsource and rely on third parties for the manufacture of the chemicals, material components or delivery apparatus used in our BioLargo technology and part of our future success will be dependent on the timeliness and effectiveness of the efforts of these third parties.

We do not have the required financial and human resources or capability to manufacture the chemicals that comprise our BioLargo technology. Our business model calls for the outsourcing of the manufacture of these chemicals in order to reduce our capital and infrastructure costs as a means of potentially improving our financial position and the profitability of our business. Accordingly, we must enter into agreements with other companies that can assist us and provide certain capabilities, including sourcing and manufacturing, which we do not possess. We may not be successful in entering into such alliances on favorable terms or at all. Even if we do succeed in securing such agreements, we may not be able to maintain them. Furthermore, any delay in entering into agreements could delay the development and commercialization of our BioLargo technology or reduce its competitiveness even if they reach the market. Any such delay related to such future agreements could adversely affect our business.

If any party to which we have outsourced certain functions fails to perform its obligations under agreements with us, the commercialization of our BioLargo technology could be delayed or curtailed.

To the extent that we rely on other companies to manufacture the chemicals used in our BioLargo technology, or sell or market products incorporating our BioLargo technology, we will be dependent on the timeliness and effectiveness of their efforts. If any of these parties does not perform its obligations in a timely and effective manner, the commercialization of our BioLargo technology could be delayed or curtailed because we may not have sufficient financial resources or capabilities to continue such efforts on our own.

We rely on a small number of key supply ingredients in order to manufacture our products

All of the supply ingredients used to manufacture our products are readily available from multiple suppliers. However, commodity prices for these ingredients can vary significantly and the margins that we are able to generate could decline if prices rise. If our manufacturing costs rise significantly, we may be forced to raise the prices for our products, which may reduce their acceptance in the marketplace.

If our BioLargo technology or products incorporating our BioLargo technology do not gain market acceptance, it is unlikely that we will become profitable.

The potential markets for products into which our technology can be incorporated are rapidly evolving, and we have many successful competitors. At this time, our BioLargo technology is unproven in its commercial use, and the use of our BioLargo technology by others is nominal. The commercial success of products incorporating our BioLargo technology will depend upon the adoption of our BioLargo technology by commercial and consumer end users in various fields.

Market acceptance may depend on many factors, including:

- the willingness and ability of consumers and industry partners to adopt new technologies;
- our ability to convince potential industry partners and consumers that our BioLargo technology is an attractive alternative to other technologies for disinfection, sanitization, remediation, reduction of disease transfer and as a protective and safety device against biohazardous materials;
- our ability to obtain the chemicals from third parties that are used in our BioLargo technology, in sufficient quantities with acceptable quality and at an acceptable cost; and
- our ability to license our BioLargo technology in a commercially effective manner.

If products incorporating our BioLargo technology do not achieve a significant level of market acceptance, demand for our BioLargo technology itself may not develop as expected and, in such event, it is unlikely that we will become profitable.

Any revenues that we may earn in the future are unpredictable, and our operating results are likely to fluctuate from quarter to quarter.

We believe that our future operating results will fluctuate due to a variety of factors, including:

- delays in product development by us or third parties;
- market acceptance of products incorporating our BioLargo technology;
- changes in the demand for, and pricing, of products incorporating our BioLargo technology;
- competition and pricing pressure from competitive products;
- manufacturing delays; and
- expenses related to, and the results of, proceedings relating to our intellectual property.

We expect our operating expenses will continue to fluctuate significantly in 2010 and beyond, as we continue our research and development, and increase our marketing and licensing activities. Although we expect to generate revenues from licensing our BioLargo technology in the future, revenues may decline or not grow as anticipated and our operating results could be substantially harmed for a particular fiscal period. Moreover, our operating results in some quarters may not meet the expectations of stock market analysts and investors. In that case, our stock price most likely would decline.

We have no product distribution experience and we expect to rely on third parties who may not successfully sell our products.

We have no product distribution experience and currently rely and plan to rely primarily on product distribution arrangements with third parties. We also plan to license our technology to certain third parties for commercialization of certain applications. We expect to enter into additional distribution agreements and licensing agreements in the future, and we may not be able to enter into these additional agreements on terms that are favorable to us, if at all. In addition, we may have limited or no control over the distribution activities of these third parties. These third parties could sell competing products and may devote insufficient sales efforts to our products. As a result, our future revenues from sales of our products, if any, will depend on the success of the efforts of these third parties.

We may not be able to attract or retain qualified senior personnel.

We believe we are currently able to manage our current business with our existing management team. However, as we expand the scope of our operations, we will need to obtain the full-time services of additional senior management and other personnel. Competition for highly-skilled personnel is intense, and there can be no assurance that we will be able to attract or retain qualified senior personnel. Our failure to do so could have an adverse effect on our ability to implement our business plan. As we add full-time senior personnel, our overhead expenses for salaries and related items will increase from current levels and, depending upon the number of personnel we hire and their compensation packages, these increases could be substantial.

If we lose our key personnel or are unable to attract and retain additional personnel, we may be unable to achieve profitability.

Our future success is substantially dependent on the efforts of our senior management, particularly Dennis Calvert, our president and chief executive officer, and Kenneth Reay Code, our chief technology officer. The loss of the services of either of these officers or other members of our senior management may significantly delay or prevent the achievement of product development and other business objectives. Because of the scientific nature of our business, we depend substantially on our ability to attract and retain qualified marketing, scientific and technical personnel. There is intense competition among specialized and technologically-oriented companies for qualified personnel in the areas of our activities. If we lose the services of, or do not successfully recruit key marketing, scientific and technical personnel, the growth of our business could be substantially impaired. At present, we do not maintain key man insurance for any of our senior management.

Nondisclosure agreements with employees and others may not adequately prevent disclosure of trade secrets and other proprietary information.

In order to protect our proprietary technology and processes, we rely in part on nondisclosure agreements with our employees, potential licensing partners, potential manufacturing partners, testing facilities, universities, consultants, agents and other organizations to which we disclose our proprietary information. These agreements may not effectively prevent disclosure of confidential information and may not provide an adequate remedy in the event of unauthorized disclosure of confidential information. In addition, others may independently discover trade secrets and proprietary information, and in such cases we could not assert any trade secret rights against such parties. Costly and time-consuming litigation could be necessary to enforce and determine the scope of our proprietary rights, and failure to obtain or maintain trade secret protection could adversely affect our competitive business position. Since we rely on trade secrets and nondisclosure agreements, in addition to patents, to protect some of our intellectual property, there is a risk that third parties may obtain and improperly utilize our proprietary information to our competitive disadvantage. We may not be able to detect unauthorized use or take appropriate and timely steps to enforce our intellectual property rights.

We may become subject to product liability claims.

As a business which manufactures and markets products for use by consumers and institutions, we may become liable for any damage caused by our products, whether used in the manner intended or not. Any such claim of liability, whether meritorious or not, could be time-consuming and/or result in costly litigation. Although we maintain general liability insurance, our insurance may not cover potential claims of the types described above and may not be adequate to indemnify for all liabilities that may be imposed. Any imposition of liability that is not covered by insurance or is in excess of insurance coverage could harm our business and operating results, and you may lose some or all of any investment you have made, or may make, in our company.

Litigation or the actions of regulatory authorities may harm our business or otherwise distract our management.

Substantial, complex or extended litigation could cause us to incur major expenditures and distract our management. For example, lawsuits by employees, former employees, shareholders, partners, customers, or others, or actions taken by regulatory authorities, could be very costly and substantially disrupt our business. Such lawsuits or actions could from time to time be filed against the Company and/or our executive officers and directors. Such lawsuits and actions are not uncommon, and we cannot assure you that we will always be able to resolve such disputes or actions on terms favorable to the Company.

The licensing of our BioLargo technology or the manufacture, use or sale of products incorporating our BioLargo technology may infringe on the patent rights of others, and we may be forced to litigate if an intellectual property dispute arises.

If we infringe or are alleged to have infringed another party's patent rights, we may be required to seek a license, defend an infringement action or challenge the validity of the patents in court. Patent litigation is costly and time consuming. We may not have sufficient resources to bring these actions to a successful conclusion. In addition, if we do not obtain a license, do not successfully defend an infringement action or are unable to have infringed patents declared invalid, we may:

- incur substantial monetary damages;
- encounter significant delays in marketing our current and proposed product candidates;
- be unable to conduct or participate in the manufacture, use or sale of product candidates or methods of treatment requiring licenses;
- lose patent protection for our inventions and products; or
- find our patents are unenforceable, invalid, or have a reduced scope of protection.

Parties making such claims may be able to obtain injunctive relief that could effectively block the company's ability to further develop or commercialize our current and proposed product candidates in the United States and abroad and could result in the award of substantial damages. Defense of any lawsuit or failure to obtain any such license could substantially harm the company. Litigation, regardless of outcome, could result in substantial cost to, and a diversion of efforts by, the Company.

Our patents are expensive to maintain, our patent applications are expensive to prosecute, and we may face costly intellectual property disputes.

Our ability to compete effectively will depend in part on our ability to develop and maintain proprietary aspects of our technology and either to operate without infringing the proprietary rights of others or to obtain rights to technology owned by third parties. Pending patent applications relating to our BioLargo technology may not result in the issuance of any patents or any issued patents that will offer protection against competitors with similar technology. We must employ patent attorneys to prosecute our patent applications both in the United States and internationally. International patent protection requires the retention of patent counsel in multiple foreign countries and the payment of patent application fees in multiple foreign countries on or before filing deadlines set forth by the PCT. Our limited capital resources preclude us from filing for patent protection in every PCT member country, which has resulted, and will continue to result, in the irrevocable loss of patent rights in many foreign jurisdictions.

Patents we receive may be challenged, invalidated or circumvented in the future or the rights created by those patents may not provide a competitive advantage. We also rely on trade secrets, technical know-how and continuing invention to develop and maintain our competitive position. Others may independently develop substantially equivalent proprietary information and techniques or otherwise gain access to our trade secrets.

We are subject to risks related to future operations outside of North America.

Over time, we expect to develop operations outside of North America, and as those efforts are pursued, we will face risks related to our foreign operations such as:

- foreign currency fluctuations;
- unstable political, economic, financial and market conditions;
- import and export license requirements;
- trade restrictions;
- increases in tariffs and taxes;
- high levels of inflation;
- restrictions on repatriating foreign profits back to the United States;
- greater difficulty collecting accounts receivable and longer payment cycles;
- less favorable intellectual property laws;
- Regulatory requirements;
- unfamiliarity with foreign laws and regulations; and
- changes in labor conditions and difficulties in staffing and managing international operations.

The volatility of certain raw material costs may adversely affect operations and competitive price advantages for products that incorporate our BioLargo technology.

While most of the chemicals and other key materials that we use in our business, such as minerals, fiber materials, and packaging materials are neither generally scarce nor price sensitive, but prices for such chemicals and materials can be cyclical. SAP beads, which are a petrochemical derivative, have been subject to periodic scarcity and price volatility from time to time during recent years, although prices are relatively stable at present. Supply and demand factors, which are beyond our control, generally affect the price of our raw materials. We try to minimize the effect of price increases through production efficiency and the use of alternative suppliers. If we are unable to minimize the effects of increased raw material costs, our business, financial condition, results of operations and cash flows may be materially adversely affected.

There are potential claims from prior business affiliates of IOWC regarding the BioLargo technology.

During the history of the development of the BioLargo technology, Mr. Code previously assigned the two patents registered with the USPTO, which we acquired in April 2007, to a third party company. Mr. Code believes that the agreement between IOWC, Mr. Code and this other party was breached and terminated, and such parties have no rights to any part of our BioLargo technology. Nonetheless, such parties, or their successors or assigns, could make claims of rights of ownership to all or some portion of our BioLargo technology. In the event of a legal dispute, a lengthy and costly legal defense would be required to defend against any such claims, and notwithstanding the Company's position in these potential disputes, the Company cannot predict the outcome of such litigation. Loss of our ownership of our BioLargo technology would have a serious adverse affect on our business and plan of operations. Any financial settlement of claims, including royalties we might have to pay to third parties, could have a material adverse affect on our results of operations.

Because Mr. Code and an entity he controls hold the majority of our voting power, he can ensure the outcome of most matters on which our stockholders vote.

In connection with the completion of the acquisition of certain intellectual property and other assets from IOWC on April 30, 2007, as approved by the Company's stockholders on March 15, 2007, the Company issued an aggregate 22,139,012 shares, or approximately 56.3% of the Company's then issued and outstanding common stock, to IOWC, a company which Mr. Code controls. As a result of this issuance, combined with Mr. Code's previous stockholdings in the Company, and reducing for subsequent gifts, Mr. Code controls 22,259,649 shares, or approximately 51.2% of the total voting power of the outstanding shares of our common stock, and is now the principal stockholder of the Company.

Under Delaware law, as a result of Mr. Code's stockholdings, he has the power to elect each of the members of our board of directors. Mr. Code also has the power to control the outcome of most matters requiring stockholder approval. This control may discourage certain types of transactions involving an actual or potential change of control of our company, such as a merger or sale of the company. Mr. Code is a member of our board of directors and also serves as an executive officer of the Company.

Our common stock is thinly traded and largely illiquid.

Our stock is currently quoted on the OTCBB. Being quoted on the OTCBB has made it more difficult to buy or sell our stock and from time to time has lead to a significant decline in the frequency of trades and trading volume. Continued trading on the OTCBB will also likely adversely affect the Company's ability to obtain financing in the future due to the decreased liquidity of the Company's shares and other restrictions that certain investors have for investing in OTCBB traded securities. While the Company intends to seek listing on the Nasdaq Stock Market ("Nasdaq") or another stock exchange when the Company is eligible, there can be no assurance when or if the

Company's common stock will be listed on Nasdaq or another stock exchange.

- 24 -

The market price of our stock is subject to volatility.

Because our stock is thinly traded, its price can change dramatically over short periods, even in a single day. An investment in our stock is subject to such volatility and, consequently, is subject to significant risk. The market price of our common stock could fluctuate widely in response to many factors, including:

- developments with respect to patents or proprietary rights;
- announcements of technological innovations by us or our competitors;
- announcements of new products or new contracts by us or our competitors;
- actual or anticipated variations in our operating results due to the level of development expenses and other factors;
- changes in financial estimates by securities analysts and whether any future earnings of ours meet or exceed such estimates;
- Conditions and trends in our industry;
- new accounting standards;
- general economic, political and market conditions and other factors; and
- the occurrence of any of the risks described in this Report.

You may have difficulty selling our shares because they are deemed “penny stocks”.

Because our common stock is not quoted on the Nasdaq National Market or Nasdaq Capital Market or listed on a national securities exchange, if the trading price of our common stock remains below \$5.00 per share, trading in our common stock will be subject to the requirements of certain rules promulgated under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), which require additional disclosure by broker-dealers in connection with any trades involving a stock defined as a penny stock (generally, any non-Nasdaq equity security that has a market price of less than \$5.00 per share, subject to certain exceptions). Such rules require the delivery, prior to any penny stock transaction, of a disclosure schedule explaining the penny stock market and the risks associated therewith and impose various sales practice requirements on broker-dealers who sell penny stocks to persons other than established customers and accredited investors (generally defined as an investor with a net worth in excess of \$1,000,000 or annual income exceeding \$200,000 individually or \$300,000 together with a spouse). For these types of transactions, the broker-dealer must make a special suitability determination for the purchaser and have received the purchaser’s written consent to the transaction prior to the sale. The broker-dealer also must disclose the commissions payable to the broker-dealer, current bid and offer quotations for the penny stock and, if the broker-dealer is the sole market-maker, the broker-dealer must disclose this fact and the broker-dealer’s presumed control over the market. Such information must be provided to the customer orally or in writing before or with the written confirmation of trade sent to the customer. Monthly statements must be sent disclosing recent price information for the penny stock held in the account and information on the limited market in penny stocks. The additional burdens imposed upon broker-dealers by such requirements could discourage broker-dealers from effecting transactions in our common stock, which could severely limit the market liquidity of the common stock and the ability of holders of the common stock to sell their shares.

We may have violated certain securities laws in the course of our Fall 2008 Offering.

We may have violated certain disclosure requirements under Federal securities laws in the course of our private offering that commenced October 15, 2008 (the “Fall 2008 Offering”). After preparing and distributing the original Offering Memorandum dated October 15, 2008, we filed a Current Report on Form 8-K dated November 12, 2008 (the “November 8-K”) with the SEC and we filed our Quarterly Report on Form 10-Q for the period ended September 30, 2008 (the “Third Quarter 10-Q”). We filed both of these reports timely with the SEC but we did not provide a copy of the November 8-K and we may not have correctly provided a copy of the Third Quarter 10-Q to investors in the offering. In addition, on January 16, 2009, our Board of Directors amended the terms of the Fall 2008 Offering and amended the terms of warrants that we previously sold in a prior private offering of our securities. We should have filed a Current Report on Form 8-K with the SEC within four business days following the amendment of the terms of the warrants, but we omitted to do that. We did not file such Current Report on Form 8-K until February 19, 2009. The investors in the offering were entitled to have all such information before making their investment decision.

If we violated certain securities laws in the course of Fall 2008 Offering, investors who have already invested in the Fall 2008 Offering may have various remedies available to them, including the right to rescind their investment. We may not have the funds available to satisfy a demand for the rescission from these investors.

We raised \$185,000 in the Fall 2008 Offering from six investors prior to the amendment of the offering terms (the “Original Investors”). The Original Investors may have the right to rescind their investment in the Fall 2008 Offering. In addition, California law provides that these investors are also entitled to interest at the rate of 7% per annum. Were any of the six Original Investors to demand rescission, because of our continuing limited capital resources, we may not have the funds available to satisfy such demand. Demands for rescission, even if we were able to satisfy such demands, would have a material adverse affect on our capital resources, cash flow and overall financial condition.

In order to discharge our obligations under applicable securities laws, we intend to conduct a rescission offering to the Original Investors in the Fall 2008 Offering. We may have to use some of our remaining capital resources, including future proceeds from this Offering from other investors, to satisfy any demand by the Original Investors to rescind their investment.

We intend to conduct a rescission offering in compliance with applicable state securities laws (the “Rescission Offering”) to the Original Investors in the Fall 2008 Offering. After explaining to the Original Investors how we may have overlooked disclosing certain information in a timely manner, and then providing such information to the Original Investors, we will give the Original Investors the choice of either confirming their investment in the Fall 2008 Offering, on the amended terms that are applicable to all investors in the Fall 2008 Offering, or demanding a rescission of their investment with interest at the applicable legal rate. If an Original Investor confirms his investment in the Fall 2008 Offering on the amended terms as described herein, then he will be deemed to waive any objection to any violation we may have previously committed and he will not subsequently be able to seek rescission of his investment in the Fall 2008 Offering. If an Original Investor elects to rescind his investment in the Fall 2008 Offering, he will be entitled to the return of his full investment plus interest at the rate of 7% per annum and, thereafter, he will have no claim against us for any violation we may have committed in the Fall 2008 Offering. However, we may have to use some of our remaining capital resources, including future proceeds from the Fall 2008 Offering from other investors, to satisfy any demand by any of the Original Investors to rescind their investment. Payments we would be obligated to make in connection with demands for rescission would have a material adverse affect on our capital resources, financial condition and future prospects and, additionally, may require us to use some of the future proceeds of the Fall 2008 Offering to satisfy such obligations, meaning such proceeds would not be available to be used for the Company’s business.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our offices are located at 16333 Phoebe Ave, La Mirada, California 90638. We sublease our office space from the E.T. Horn Company.

ITEM 3. LEGAL PROCEEDINGS

In February 2008, we agreed to pay \$25,000, issue 15,000 shares of our common stock, and issue warrants to purchase an aggregate 15,000 shares of our common stock at \$1.50 per share, which warrants would expire three years from the date of issuance, in settlement of an account owed to a service provider. Since the date of the settlement, certain facts have come to light, and therefore, as of the date of this Report, we have not issued the common stock or the warrants, but have recorded a \$42,050 expense in connection therewith.

The Company is party to various other claims, legal actions and complaints arising periodically in the ordinary course of business. In the opinion of management, no such matters will have a material adverse effect on the Company's financial position or results of operations. As of December 31, 2009, there were no litigation proceedings.

- 27 -

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASE OF EQUITY SECURITIES

Market Information

Since January 23, 2008, our common stock has been quoted on the OTC Bulletin Board under the trading symbol "BLGO". Prior to that time, from October 31, 1998 until June 10, 2003, our common stock was listed on the Nasdaq Small Cap Market. From June 11, 2003 until January 22, 2008, our common stock was quoted on the Pink Sheets under the symbols "NMED" (from June 11, 2003 through March 21, 2007) and "BLGO" (from March 22, 2007 until January 22, 2008).

The table below represents the quarterly high and low bid prices for our common stock for the last two fiscal years as reported by Bloomberg L.P.

	2008		2009	
	High	Low	High	Low
First Quarter	\$ 2.00	\$ 0.75	\$ 0.89	\$ 0.25
Second Quarter	\$ 1.70	\$ 1.01	\$ 0.50	\$ 0.25
Third Quarter	\$ 1.30	\$ 0.61	\$ 0.60	\$ 0.21
Fourth Quarter	\$ 0.89	\$ 0.35	\$ 0.80	\$ 0.31

The closing bid price for our common stock on March 31, 2010, was \$0.50 per share. As of such date, there were approximately 501 registered owners of our common stock. We believe that the number of beneficial owners is substantially higher than this amount.

Dividends

We have never declared or paid a cash dividend to stockholders. We intend to retain any earnings which may be generated in the future to finance operations.

Securities Authorized for Issuance Under Equity Compensation Plans

Equity Compensation Plan Information

	0	0	0

Equity compensation plans not approved by security holders

Total	1,667,135	\$	0.75	4,332,865
-------	-----------	----	------	-----------

(1) Consists of 6,000,000 shares issuable under our 2007 Equity Incentive Plan (the “2007 Plan”). The 2007 Plan was adopted by our Board of Directors on August 7, 2007 and approved by our stockholders at the 2007 Annual Meeting of Stockholders on September 6, 2007. Upon the adoption of the 2007 Plan, a prior plan approved in 2004 was frozen and no further grants will be made under that.

Sales of Unregistered Securities

Spring 2008 Offering

Pursuant to a private offering that commenced March 2008 (the “Spring 2008 Offering”) and terminated August 2008, we sold \$913,625 of our 10% convertible notes (the “Spring 2008 Notes”), which are due and payable on March 31, 2010, to 30 investors, convertible into an aggregate 676,775 shares of our common stock. The Spring 2008 Notes are convertible into shares of our common stock at an initial conversion price of \$1.35 per share. The Spring 2008 Notes can be converted voluntarily by the noteholders at any time prior to the maturity date. We can unilaterally convert the Spring 2008 Notes (i) on or after September 30, 2008, if we have received one or more written firm commitments, or have closed on one or more transactions, or a combination of the foregoing, of at least \$3 million gross proceeds of equity or debt; or (ii) on the maturity date. Accordingly, the Spring 2008 Notes may be repaid in cash or may be converted, at our sole option, into shares of our common stock, on or before the maturity date.

Each purchaser of the Spring 2008 Notes received, for no additional consideration, two stock purchase warrants (a one-year warrant and a three-year warrant), each of which entitled the holder to purchase the number of shares of our common stock into which the holder’s Spring 2008 Note is initially convertible. The “Spring 2008 One-Year Warrants” expire on March 31, 2009 and were exercisable at \$0.50 (originally \$1.50) per share. The “Spring 2008 Three-Year Warrants” are exercisable at an initial exercise price of \$2.00 per share and expire on March 31, 2011. On September 19, 2008, our Board of Directors reduced the exercise price of the Spring 2008 One-Year Warrants from \$1.50 per share (the original exercise price pursuant to the terms of the Spring 2008 Offering) to \$1.00 per share. On January 16, 2009, our Board of Directors reduced the exercise price of the Spring 2008 One-Year Warrants from \$1.00 per share to \$0.50 per share. The Spring 2008 One-Year Warrants expired unexercised on March 31, 2009.

On March 30, 2010, our board approved agreements mutually extending the maturity dates of the Spring 2008 Notes by one year, such that the Spring 2008 Notes mature on March 31, 2011.

Fall 2008 Offering

Pursuant to a private offering that commenced October 2008 (the “Fall 2008 Offering”) and terminated March 2009, we sold \$723,000 of our 10% convertible notes (the “Fall 2008 Notes”), which are due and payable October 15, 2011, to 18 investors, convertible into an aggregate 1,446,000 shares of our common stock. As originally offered, the Fall 2008 Notes were convertible into shares of our common stock at an initial conversion price of \$1.00 per share. The Fall 2008 Notes can be converted voluntarily by the noteholders at any time prior to the maturity date. We can unilaterally convert the Fall 2008 Notes (i) on or after April 30, 2009, if we have received one or more written firm commitments, or have closed on one or more transactions, or a combination of the foregoing, of at least \$3 million gross proceeds of equity or debt; or (ii) on the maturity date. Accordingly, the Fall 2008 Notes may be repaid in cash or may be converted, at the noteholders’ option or our option, into shares of our common stock, on or before the October 15, 2011 maturity date.

Each purchaser of the Fall 2008 Notes received, for no additional consideration, two stock purchase warrants (a one-year warrant and a three-year warrant), each of which entitled the holder to purchase the number of shares of our common stock into which the holder’s Fall 2008 Note is initially convertible. As originally offered, the first warrant (the “Fall 2008 One-Year Warrant”) was exercisable at \$1.00 per share and was due to expire on October 15, 2009. The second warrant (the “Fall 2008 Three-Year Warrant”) and together with the One-Year Warrant, the “Fall 2008 Warrants”) was exercisable at \$2.00 per share and was due to expire on October 15, 2011.

On January 16, 2009, our Board of Directors amended the terms of the Offering as follows: (i) the initial conversion price of the Fall 2008 Notes was reduced from \$1.00 per share to \$0.50 per share; (ii) the exercise price of the Fall 2008 One-Year Warrant was reduced from \$1.00 per share to \$0.75 per share; (iii) the exercise price of the Fall 2008 Three-Year Warrant was reduced from \$2.00 per share to \$1.00 per share; and the number of shares of our common stock for which the Fall 2008 One-Year Warrants and the Fall 2008 Three-Year Warrants may be exercised is being increased from one share per dollar invested to two shares for each dollar invested. The Fall 2008 One-Year Warrants expired unexercised on October 15, 2009.

Spring 2009 Offering

Pursuant to a private offering that commenced April 2009 (the "Spring 2009 Offering") and terminated November 2009, we sold \$681,410 [changed from your number to match your balance sheet] of our 10% convertible notes (the "Spring 2009 Notes"), which are due and payable on June 1, 2012, to 23 investors, convertible into an aggregate 1,238,935 shares of our common stock. The Spring 2009 Notes are convertible into shares of our common stock at an initial conversion price of \$0.55 per share. The Spring 2009 Notes can be converted voluntarily by the noteholders at any time prior to the maturity date. We can unilaterally convert the Spring 2009 Notes (i) on or after December 15, 2009, if we have received one or more written firm commitments, or have closed on one or more transactions, or a combination of the foregoing, of at least \$3 million gross proceeds of equity or debt; or (ii) on the maturity date. Accordingly, the Spring 2009 Notes may be repaid in cash or may be converted, at our sole option, into shares of our common stock, on or before the June 1, 2012 maturity date.

Each purchaser of the Spring 2009 Notes received, for no additional consideration, two stock purchase warrants, each of which entitle the holder to purchase the number of shares of our common stock into which the holder's Spring 2009 Note is initially convertible. The first warrant (the "Spring 2009 One-Year Warrant") is exercisable at a price of \$0.75 per share and expires on June 1, 2010. The second warrant (the "Spring 2009 Three-Year Warrant") is exercisable at a price of \$1.00 per share and expires on June 1, 2012.

Stock Issuances in 2009

On January 15, 2009, we issued 16,948 shares of our common stock, at a conversion price of \$0.59, to a director in exchange for his services as a director.

Between March 13, 2009 and August 18, 2009, pursuant to the terms of promissory notes issued in our 2007 private securities offering (the "2007 Offering"), we exercised our right to convert \$91,363 of accrued and unpaid interest related to our 2007 Notes and issued an aggregate 216,123 shares of our common stock at conversion prices ranging between \$0.37 - \$0.47, per share. The 2007 Notes called specified that any such conversions of accrued and unpaid interest be based on the average closing price of our common stock during the 20 day period prior to the interest due date.

On June 18, 2009, we issued 20,000 shares of our common stock, at a price of \$0.60 per share a consultant in exchange for consulting and advisory services to us in the areas of shareholder communications, public relations and relations with the investment community generally.

On June 18, 2009, we issued 100,000 shares of our common stock at a price of \$0.60 per share, pursuant to a placement agreement with an investment banking firm for services provided related to attempts to obtain financing for our business operations.

On October 15, 2009, pursuant to the terms of the Fall 2008 Notes, we exercised our right to convert \$42,211 of accrued and unpaid interest related to our Fall 2008 Notes and issued an aggregate 112,198 shares of our common stock at a conversion price of approximately \$0.38 per share. The Fall 2008 Notes specified that any such conversion of accrued and unpaid interest be based on the average closing price of our common stock during the 20 day period prior to the interest due date.

On November 23, 2009, a holder of a convertible promissory note issued pursuant to the 2007 Offering, in the aggregate principal amount of \$32,000, voluntarily converted the note, together with accrued and unpaid interest in the amount of \$8,364, into 57,663 shares of our common stock, at a conversion rate of \$0.70 per share in accordance with the terms of the note.

On December 11, 2009, we issued 10,000 shares of our common stock, at a price of \$0.70 per share to a consultant in exchange for consulting and advisory services to us in the areas of shareholder communications, public relations and relations with the investment community generally.

During 2009 we issued 213,828 shares of our common stock, at conversion prices ranging between \$0.35 - \$0.70, as payment of \$89,834 in rent pursuant to the sublease of our principal executive offices.

During 2009, we issued an aggregate 188,327 shares of our common stock, at price ranges between \$0.35 - \$0.68, to four consultants in exchange for consulting and advisory services to us in the areas of branding, marketing and product development related to our Odor-No-More branded product line.

All of these offerings and sales were made in reliance on the exemption from registration contained in Section 4(2) of the Securities Exchange Act and/or Regulation D promulgated thereunder as not involving a public offering of securities.

ITEM 6. SELECTED FINANCIAL DATA

Not applicable

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

The following discussion and analysis should be read in conjunction with our audited consolidated financial statements and the related notes to the consolidated financial statements included elsewhere in this report.

This discussion contains forward-looking statements that involve risks and uncertainties. Such statements, which include statements concerning future revenue sources and concentration, selling, general and administrative expenses, research and development expenses, capital resources, additional financings and additional losses, are subject to risks and uncertainties, including, but not limited to, those discussed above in Part I, Item 1 and elsewhere in this Annual Report, particularly in "Risk Factors," that could cause actual results to differ materially from those projected. The forward-looking statements set forth in this Annual Report are as of December 31, 2009 unless expressly stated otherwise, and we undertake no duty to update this information.

Overview

We launched our first commercial products based on our BioLargo technology in May 2009, and generated total revenues of \$138,133 during the remainder of the year from product sales. Our selling, general and administrative expenses were \$3,960,570, of which \$1,939,120 was related to non-cash expenses, and we incurred a net loss of \$15,612,532. The majority of our net loss was related to an impairment charge to our intangible assets of \$8,781,133.

We continue to be limited in terms of our capital resources. Our net cash used in operating activities for the year ended December 31, 2009 was \$1,369,394. This amount was financed primarily by our private securities offerings. We will need to raise significant additional capital in order to sustain our operations in 2010.

Results of Operations—Comparison of the Years Ended December 31, 2009 and 2008

Revenue

We generated \$138,133 of revenues from operations during the year ended December 31, 2009, compared with \$0 in revenues from operations during the year ended December 31, 2008. The increase in revenues is a reflection of the May 2009 commercial launch of our Odor-No-More branded products. Because we only recently launched our first products, we anticipate that our revenues from product sales will be uneven. Until we are successful in generating sustainable revenue streams from our Odor-No-More product line, or until we are successful in negotiating and securing advance payments for licensing rights from prospective licensing candidates, we do not anticipate generating significant revenue.

Cost of Goods Sold

Compared with revenues of \$138,133, our cost of goods sold during 2009 was \$114,551 or 83%. Our cost of goods sold includes costs of raw materials, contract manufacturing, and proportions of salaries and expenses related to the sales and marketing efforts of our Odor-No-More branded products. Because we only recently launched our first products, and we have not achieved a large revenue base, our cost of goods sold in both dollars and percentage will be higher and will fluctuate greater than we anticipate in future years.

Selling, General and Administrative Expense

Selling, General and Administrative expenses were \$3,960,570 for the year ended December 31, 2009, compared to \$4,829,061 for the year ended December 31, 2008, a decrease of \$868,491. The largest components of these expenses were:

- a. Salaries and Payroll-related Expenses: These expenses were \$1,802,782 for the year ended December 31, 2009, compared to \$1,784,988 for the year ended December 31, 2008, an increase of \$17,794. This increase is related to the contractual increases in the employment agreements with our officers Kenneth R. Code, Dennis P. Calvert, and Joseph L. Provenzano; offset by our non-cash stock option expense which comprised \$1,209,903, during 2009, compared to \$1,251,548 during the same period in 2008.

b. Consulting Expenses: These expenses were \$1,074,434 for the year ended December 31, 2009, compared to \$1,837,956 for the year ended December 31, 2008, a decrease of \$763,522. The decrease in 2009 is primarily attributable to non-cash stock option compensation expenses incurred in 2008, related to the vesting schedule of the options issued in connection with the long-term consulting agreements with Robert Szolomayer, our Director of Corporate Development, and Jeffrey Wallace, our Director of Sales and Marketing, both of which began in January 2008, as well as a warrants that vested in 2008 related to consultants and other professional advisors. No additional consultant warrants were issued in 2009.

c. Professional Fees: These expenses were \$271,453 for the year ended December 31, 2009, compared to \$522,334 for the year ended December 31, 2008, a decrease of \$250,881. The decrease in the year ended December 31, 2009 is primarily attributable to a reduction in our legal fees in 2009 compared with 2008, due to decreased need for such services.

d. Other Expense: These expenses were \$155,000 for the year ended December 31, 2009, compared to \$90,000 for the year ended December 31, 2008. The increase in these expenses was the result of the increase in the number of required payments in 2009 pursuant to our Marketing Agreement with Ioteq, which began in September 2008 and continued through December 2009.

Impairment expense

Impairment expense totaled \$8,781,133 for the year ended December 31, 2009. The impairment was recorded December 31, 2009 and is related to our intangible assets which included Licensing rights and Assignment agreements acquired from IOWC in April 2007. Management performed its assessment of the fair value of the intangible assets for the year ended December 31, 2009. In our undertaking we analyzed the projected cash flow from the assets discounted at appropriate rates, the length of time to full development of the cash flow potential and the current recessionary state of the world-wide economy. We determined that after this detailed analysis that it was appropriate for us to record an impairment charge.

Interest expense

Interest expense totaled \$1,626,230 for the year ended December 31, 2009, compared to \$1,141,153 for the year ended December 31, 2008, an increase of \$485,077.

Our interest expenses are comprised of two components – interest due on debt obligations, and fair value expense associated with warrants issued in our private offerings. Our interest expense increased for the year ended December 31, 2009 primarily because of additional amortization charges due to the extension and revaluation of our the warrants issued in our Fall 2006 offering. Additionally, for the year ended December 31, 2009, we incurred additional interest expense from the sale of an aggregate \$1,319,410 of our convertible promissory notes, warrants and the extension of our 2007 notes and from the issuance of promissory notes and related warrants, through our private security offerings.

Research and Development

Research and development expenses were \$170,117 for the year ended December 31, 2009, compared to \$113,748 for the year ended December 31, 2008, an increase of \$56,369. The increase in 2009 is primarily attributable to the commencement of research projects with the University of Alberta, the Miller Research Group in Idaho, and the University of Hawaii.

Net Loss

Net loss for the year ended December 31, 2009 was \$15,612,532, or a loss of \$0.37 per share, compared to a net loss for the year ended December 31, 2008 of \$7,142,750, or a loss of \$0.17 per share. The increase in net loss for the year ended December 31, 2009 is primarily attributable to the impairment of our intangible assets and also increases in research and development and interest expense offset by decreases in selling, general and administrative expenses. Excluding the one-time impairment expense we incurred a net loss per share of \$0.16.

Liquidity and Capital Resources

The financial statements accompanying this Report have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of our business. As reflected in the accompanying financial statements, we had a net loss of \$15,612,532 for the year ended December 31, 2009, and an accumulated stockholders' deficit of \$57,768,564 as of December 31, 2009. The foregoing factors raise substantial doubt about our ability to continue as a going concern. Ultimately, our ability to continue as a going concern is dependent upon our ability to attract significant new sources of capital, attain a reasonable threshold of operating efficiencies and achieve profitable operations by licensing or otherwise commercializing products incorporating our BioLargo technology. The financial statements do not include any adjustments that might be necessary if we are unable to continue as a going concern.

We have been, and anticipate that we will continue to be, limited in terms of our capital resources. Our total cash and cash equivalents was \$135,350 at December 31, 2009, compared to \$90,384 at December 31, 2008. We generated revenues of \$138,133 in the year ended December 31, 2009, which amount was not sufficient to fund our operations, and we incurred negative cash flow from operating activities of \$1,369,394 for the year ended December 31, 2009. We had negative working capital of \$3,300,820 for the year ended December 31, 2009. Our accounts payable and accrued expenses increased by \$279,597 during 2009 and were \$1,273,028 at December 31, 2009. We do not have enough cash or source of capital to pay our accounts payable and expenses as they arise, and have relied on the issuance of stock options and common stock, as well as extended payment terms with our vendors, to continue to operate. Additionally, our officers are continuing to finance operations by delaying the receipt of their salary and by incurring expenses which have not been reimbursed.

In an effort to fund our operations, we sold an aggregate \$1,344,460 of our convertible promissory notes pursuant to two private offerings during the year ended December 31, 2009. Until we are successful in either selling significant amounts of Odor-No-More branded products, or negotiating and securing advance payments for licensing rights from prospective licensing candidates, we expect to continue to have operating losses, and will continue to conduct private security offerings to fund operations. See Part II, Item 2, "Unregistered Sales of Equity Securities and Use of Proceeds" and Notes 4, 7 and 16 to "Notes to Financial Statements". We have spent all of the proceeds from our offerings.

As of December 31, 2009, we had \$3,356,035 aggregate principal amount, together with \$312,129 accrued and unpaid interest, outstanding on various convertible promissory notes. We may pay all of these amounts in cash or in stock, at our option, at maturity, or, in the case of interest, when due. In addition, as of December 31, 2009, we had \$810,899 in accrued and unpaid payables, and \$150,000 in accrued and unpaid interest to New Millennium Capital Partners, LLC, an entity controlled by Dennis P. Calvert, our President and Chief Executive Officer.

Because of our continuing liquidity difficulties, on January 16, 2010 we commenced another private offering (the Spring 2010 Offering). From the inception of the offering, through March 29, 2010, we (i) sold \$192,500 principal amount of Spring 2010 Notes convertible at \$0.575 per share, (ii) issued warrants to purchase up to 334,786 shares of our common stock at \$0.75 per share which expire July 15, 2011, and (iii) issued warrants to purchase up to an additional 334,786 shares of our common stock at \$1.00 per share which expire January 15, 2013. (See Note 16 and Part II, Item 2, “Unregistered Sales of Equity Securities and Use of Proceeds”).

We will be required to raise substantial additional capital to fully execute our business plan, which includes hiring additional personnel, conducting additional scientific and third-party testing, costs associated with obtaining regulatory approvals and filing additional patent applications to protect our intellectual property, and possible strategic acquisitions or alliances, as well as to meet our liabilities as they become due for the next 12 months. There can be no assurance that we will be able to continue to raise capital through our private security offerings. We have been, and will continue to be, compelled to reduce or curtail certain activities to preserve cash, including paying our vendors, fully prosecuting our patent applications, and our efforts to develop, test, market, evaluate and license our BioLargo technology. We believe our limited capital resources has already affected the execution of our business plan, and already had a material adverse impact on our financial condition and results. If we were forced to curtail further aspects of our operations, there could be a further material adverse impact on our financial condition and results of operations, and our business plan. See Part II, Item 1A, “Risk Factors”.

In addition to the private securities offerings discussed above, we are continuing to explore numerous alternatives for our current and longer-term financial requirements, including additional raises of capital from investors in the form of convertible debt or equity. To fully implement our business plan, we believe that we must raise up to an additional \$10 million in financing. There can be no assurance that we will be able to raise any additional capital. No commitments are in place as of the date of the filing of this report for any such additional financings. Moreover, in light of the current unfavorable economic conditions, we do not believe that any such financing is likely to be in place in the immediate future.

It is also unlikely that we will be able to qualify for bank or other financial institutional debt financing until such time as our operations are considerably more advanced and we are able to demonstrate the financial strength to provide confidence for a lender, which we do not currently believe is likely to occur for at least the next 12 months or more.

Under the terms of our sublease for our principal offices in La Mirada, we may issue, at our option, securities in consideration for payment of rent. We are also a party to other agreements that provide for the payment of, or permit us to pay at our option, securities in consideration for services provided to us. All such issuances are dilutive to our stockholders because they increase the total number of shares of our common stock issued and outstanding, even though such arrangements assist us with managing our cash flow. See Part II, Item 1A, “Risk Factors”.

Critical Accounting Policies

Our discussion and analysis of our results of operations and liquidity and capital resources are based on our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates and judgments, including those related to revenue recognition, valuation of intangible assets and investments, and share-based payments. We base our estimates on anticipated results and trends and on various other assumptions that we believe are reasonable under the circumstances, including assumptions as to future events. These estimates form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. By their nature, estimates are subject to an inherent degree of uncertainty. Actual results that differ from our estimates could have a significant adverse effect on our operating results and financial position. We believe that the following significant accounting

policies and assumptions may involve a higher degree of judgment and complexity than others.

- 35 -

The methods, estimates and judgments the Company uses in applying these most critical accounting policies have a significant impact on the results of the Company reports in its financial statements.

We anticipate that revenue will come from two sources: sales of Odor-No-More products and from royalties and license fees from our intellectual property. Odor-No-More revenue is recognized upon shipment of the product and all other contingencies have been met. Licensees typically pay a license fee in one or more installments and ongoing royalties based on their sales of products incorporating or using our licensed intellectual property. License fees are recognized over the estimated period of future benefit to the average licensee.

The Company has established a policy relative to the methodology to determine the value assigned to each intangible acquired with or licensed by the Company and/or services or products received for non-cash consideration of the Company's common stock. The value is based on the market price of the Company's common stock issued as consideration, at the date of the agreement of each transaction or when the service is rendered or product is received, as adjusted for applicable discounts.

Management periodically reviews the carrying value of its intangible assets to determine whether or not impairment to such value has occurred and has determined that there was an impairment to its intangible assets as of December 31, 2009. (See "Results of Operations – Impairment Expense," above.)

It is the Company's policy to expense share based payments as of the date of grant. We utilize the Black Scholes model for valuing options for which requires significant judgment regarding the assumptions used in the selected option pricing model, including stock price volatility and employee exercise behavior. Most of these inputs are either highly dependent on the current economic environment at the date of grant or forward-looking expectations projected over the expected term of the award. As a result, the actual impact of adoption on future earnings could differ significantly from our current estimate.

Recent Accounting Pronouncements

Only July 1, 2009, the Financial Accounting Standards Board (FASB) launched the FASB Accounting Standards Codification as the single source of authoritative nongovernmental U.S. generally accepted accounting principles (GAAP). The Codification is effective for interim and annual periods ending after September 15, 2009. All existing accounting standards documents are superseded as described in FASB Statement No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles. All other accounting literature not included in the Codification is nonauthoritative.

Other recent accounting pronouncements issued by FASB and the SEC did not or are not believed by management to have a material impact on the Company's present or future consolidated financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Not applicable

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Our consolidated financial statements as of and for the years ended December 31, 2009 and 2008 are presented in a separate section of this report following Item 14 and begin with the index on page F-1.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We conducted an evaluation, under the supervision and with the participation of management, including our chief executive officer and chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this Annual Report.

Our procedures have been designed to ensure that the information relating to our company, including our consolidated subsidiaries, required to be disclosed in our SEC reports is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow for timely decisions regarding required disclosure.

Based on this evaluation, our chief executive officer and chief financial officer concluded that as of the evaluation date our disclosure controls and procedures are effective but need improvement. We have implemented certain further steps that we believe are warranted and believe, subject to our continuing evaluation and review of these further steps, that yet additional steps may also be warranted. In February 2008, we hired a Chief Financial Officer who is a Certified Public Accountant. We have also adopted disclosure controls and procedures guidelines. Additional steps that we believe that we must undertake are to, among other things, design and implement adequate systems of accounting and financial statement disclosure controls during the current fiscal year to comply with the requirements of the SEC. We believe that the ultimate success of our plan to improve further our internal controls over financial reporting and disclosure controls and procedures will require a combination of additional financial resources, outside consulting services, legal advice, additional personnel, and further reallocation of responsibility among various executives.

It should be noted that the design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail,

accurately and fairly reflect the transactions and dispositions of the assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on the financial statements.

This Annual Report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the SEC that permit the company to provide only management's report in this Annual Report.

Our management, including our chief executive officer and chief financial officer, does not expect that our disclosure controls or our internal control over financial reporting, or any system we design or implement in the future, will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Changes in Internal Control

There have not been any changes in our internal control over financial reporting during the year ended December 31, 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

Certain information required by Part III is incorporated by reference from our Information Statement to be filed with the SEC in connection with the actions of our majority shareholder in lieu of holding a 2010 Annual Meeting of Stockholders (the “Information Statement”).

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE

The information required by this section is incorporated by reference from the section entitled “Proposal 1—Election of Directors” in the Information Statement. Item 405 of Regulation S-B calls for disclosure of any known late filing or failure by an insider to file a report required by Section 16 of the Exchange Act. This disclosure is incorporated by reference to the section entitled “Section 16(a) Beneficial Ownership Reporting Compliance” in the Information Statement. The information required by this Item with respect to our executive officers is contained in Item 1 of Part I of this Annual Report under the heading “Business—Executive Officers”.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this section is incorporated by reference from the information in the section entitled “Executive Compensation” in the Information Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this section is incorporated by reference from the information in the section entitled “Security Ownership of Certain Beneficial Owners and Management” in the Information Statement.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this section is incorporated by reference from the information in the section entitled “Certain Relationships and Related Transactions” in the Information Statement.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this section is incorporated by reference from the information in the section entitled “Ratification of Appointment of Independent Auditor” in the Information Statement.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) The following documents are filed as part of this Annual Report:

Financial Statements:

(i) The consolidated financial statements of BioLargo, Inc. under Item 8 of this Annual Report are listed on the “Index to Consolidated Financial Statements” on page F-1 of this report.

(b) Exhibits: The exhibits listed below are required by Item 601 of Regulation S-B.

- 40 -

Exhibit No.	Description of Exhibit
3.1	Amended and Restated Certificate of Incorporation filed March 16, 2007(4)

F-1

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders
BioLargo, Inc.

I have audited the consolidated balance sheets of BioLargo, Inc. and Subsidiary the (“Company”) as of December 31, 2009 and 2008 and the related consolidated statements of operations, stockholders’ equity (deficit) and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company’s management. My responsibility is to express an opinion on these consolidated financial statements based on my audits.

I conducted my audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, I express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management as well as evaluating the overall financial statement presentation. I believe my audits provide a reasonable basis for my opinion.

In my opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of BioLargo, Inc. and Subsidiary as of December 31, 2009 and 2008 and the results of their operations and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note 1 to the consolidated financial statements, the Company has limited liquid resources, recurring losses, negative cash flow from operations, and is seeking to raise capital which will allow it to fund corporate maintenance and to implement its business plan, which requires the Company to exploit its acquired technology. These matters raise substantial doubt about its ability to continue as a going concern. Management’s plans in regard to these matters are also discussed in Note 1. The consolidated financial statements do not include any adjustment that might result from the outcome of this uncertainty.

/s/ JEFFREY S. GILBERT

Los Angeles, California

See accompanying notes to consolidated financial statements

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Business and Organization

Outlook

The financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of our business. As reflected in the accompanying financial statements, we had a net loss of \$15,612,532 for the year ended December 31, 2009, and an accumulated stockholders' deficit of \$57,768,564 as of December 31, 2009. The foregoing factors raise substantial doubt about our ability to continue as a going concern. Ultimately, our ability to continue as a going concern is dependent upon our ability to attract significant new sources of capital, attain a reasonable threshold of operating efficiencies and achieve profitable operations by licensing or otherwise commercializing products incorporating our BioLargo technology. The financial statements do not include any adjustments that might be necessary if we are unable to continue as a going concern.

We have been, and anticipate that we will continue to be, limited in terms of our capital resources. Our total cash and cash equivalents was \$135,350 at December 31, 2009. We generated revenues of \$138,133 in the year ended December 31, 2009, which amount was not sufficient to fund our operations, and we incurred negative cash flow from operating activities of \$1,369,394 for the year ended December 31, 2009. We had negative working capital of \$3,300,820 for the year ended December 31, 2009. Our accounts payable and accrued expenses increased by \$279,597 during 2009 and were \$1,273,028 at December 31, 2009. We do not have enough cash or source of capital to pay our accounts payable and expenses as they arise, and have relied on the issuance of stock options and common stock, as well as extended payment terms with our vendors, to continue to operate. Additionally, our officers are continuing to finance operations by delaying the receipt of their salary and by incurring expenses which have not been reimbursed.

As of December 31, 2009 we had \$3,356,035 aggregate principal amount, together with \$312,129 accrued and unpaid interest, outstanding on various promissory notes. We may pay all of these amounts in cash or in stock, at our option, at maturity. In addition, as of December 31, 2009, we had \$810,899 in accrued and unpaid payables (see Note 11) and \$150,000 in accrued and unpaid interest to New Millennium Capital Partners, LLC, an entity controlled by Dennis Calvert, our President and Chief Executive Officer. (See Note 13.)

On January 15, 2010 we commenced a private offering of our convertible promissory notes, and through March 31, 2010, we sold \$192,500 principal amount of convertible notes and issued warrants to purchase up to an aggregate 669,572 shares of our common stock. (See Note 16.)

In the opinion of management, the accompanying balance sheets and related statements of operations, cash flows, and stockholders' equity include all adjustments, consisting only of normal recurring items, necessary for their fair presentation in conformity with accounting principles generally accepted in the United States of America. Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, and expenses. Actual results and outcomes may differ from management's estimates and assumptions. Estimates are used when accounting for stock-based transactions, account payables and accrued expenses and taxes, among others.

Organization

We were initially organized under the laws of the State of Florida in 1989 as Repossession Auction, Inc. In 1991, we merged into a Delaware corporation bearing the same name. In 1994, we changed our name to Latin American Casinos, Inc. to reflect our new focus on the gaming and casino business in South and Central America, and in 2001

we changed our name to NuWay Energy, Inc. to reflect our new emphasis on the oil and gas development industry. During October 2002, we changed our name to NuWay Medical, Inc. coincident with the divestiture of our non-medical assets and the retention of new management. In March 2007, in connection with the approval by our stockholders of the acquisition of the BioLargo technology, we changed our name to BioLargo, Inc.

F-7

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Business Overview

By leveraging our suite of patented and patent-pending intellectual property, which we refer to as the BioLargo technology, our business strategy is to harness and deliver nature's best disinfectant – iodine – in a safe, efficient, environmentally sensitive and cost-effective manner. The centerpiece of our BioLargo technology is CupriDyne™, which works by combining minerals with water from any source and delivering “free-iodine” on demand, in controlled dosages, in order to balance efficacy of disinfectant or odor control performance with concerns about toxicity.

In addition to our BioLargo technology, in 2008 we acquired the rights to market an iodine based water disinfection system (the “Isan system”) from Ioteg IP Pty. Ltd., an Australian company, and its U.S. affiliate Ioteg Inc., and recently licensed the rights to commercialize the Isan system from Ioteg (see “Strategic Alliance with Ioteg” below). The Isan system is an automated water disinfection system that substantially reduces the incidence of fungal growth, spoilage, organisms and pathogens in water and on food.

Subsequent to December 31, 2009, we licensed the rights to commercialize the Isan system from Ioteg, and sublicensed those rights to a third party, in particular fields of use. (See Note 16.)

Both our BioLargo technology and the Isan system have potential commercial applications within global industries, including but not limited to agriculture, animal health, beach and soil environmental remediation, consumer products, food processing, medical, and water industries. While we believe the potential applications are many, we are currently focused in two primary areas – the development of certain products designed for the animal health industry, and agriculture.

First, in 2009, we launched our first products incorporating our BioLargo technology under the brand name “Odor-No-More”, in the animal health industry. The primary benefits of the products are odor and moisture control, and customers using our animal bedding additive experience a net savings on total bedding costs. In 2010, we intend to expand our marketing efforts into new industries, as well as continue evaluating new product opportunities within the same industry.

Second, we are focused on commercializing our BioLargo technology and the Isan system in products applicable to the agriculture industry. We are actively seeking to secure strategic partners to either license or partner with to exploit commercial opportunities for CupriDyne and for the Isan system. We continue research and product development in those areas. We continue to work with a number of global companies who are engaged in technology evaluation and testing processes. Simultaneously, we are also actively seeking to identify and negotiate regional or global partnerships to exploit commercial opportunities for these technologies. No such regional or global partnerships have been formed at this time, and we can make no representation about its ability to successfully conclude such arrangements.

Although we are focused primarily on odor control products and agriculture, we also intend to continue to advance our intellectual property, product designs and licensing opportunities for our technology for use in other industries, as capital resources are available to support these efforts. We continue to market both our BioLargo technology and the Isan system to various companies for licensure in numerous industry segments. (See Note 16.)

Odor-No-More Branded Products

In May of 2009 we officially launched our first products incorporating our BioLargo technology targeted to the animal health marketplace under the “Odor-No-More” brand name, which help customers save time and money while

controlling odor and moisture:

1. Animal Bedding Additive
2. Cat Litter Additive
3. Facilities and Equipment Wash

In the latter half of 2009, we introduced three additional animal bedding products directed at the small animal, birds and reptiles markets. These products are featured in a smaller size package (one pound) than the larger 10 pound package of animal bedding additive initially released. We have also modified the product formula to suit the new intended uses.

F-8

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Marketing – Equine Industry

We have focused our initial marketing efforts of our Odor-No-More products on our animal bedding additive for use in the equine industry. We chose this product and this market for two primary reasons. First, the size of the market is significant. With over nine million horses in the United States, horse owners spend an aggregate 4.6 billion dollars annually on “feed, bedding, and grooming supplies,” according to a 2005 study sponsored by the American Horse Council. Second, our selling proposition is compelling to the industry because we believe our animal bedding product can provide up to a 75% savings on horse bedding costs, while eliminating odor and moisture and helping create a safer and healthier environment for animals.

Since our product launch in May 2009, we have secured product distribution through multiple national and regional distributors in the animal care market, two of the largest catalog and eCommerce animal health supply retailers, a distributor in the exotic animal care market, and are currently in discussions with other industry leaders. We received our first large commercial order for Odor-No-More products, from national distributor E.T. Horn Company, in the summer of 2009. Despite our success in establishing distribution for our products, our sales will be limited until we can properly promote our products and brand.

We have not yet had the working capital necessary to fully execute a national advertising campaign to establish Odor-No-More as a recognizable brand throughout the equine industry. Without a comprehensive marketing and advertising campaign, we can make no assurance of the success of the sales of our Odor-No-More products. In addition to lacking the financial resources for a comprehensive advertising and marketing campaign, we lack the financial resources to hire a sales staff sufficient to generate significant sales. As such, we must rely on our wholesale distributor to sell through our products to their customers.

We also were honored to receive a Best New Product award at the SuperZoo 2009 convention for the pet industry, as well a featured product spotlight on a internationally known horse enthusiast television show named, “Best of America by Horseback”, which was broadcast on over 600 stations in 14 nations in the month of January 2010. Our products have also been written about in a number of articles, which have been published in trade related publications. As part of our promotional and advertising campaign we are sponsoring and participating in equestrian events, local fairs, trade shows, horse and livestock shows, and a horse rescue organization.

Note 2. Summary of Significant Accounting Policies

Principles of Consolidation.

As of December 31, 2009, we had one subsidiary, BioLargo Life Technologies, Inc. (“BLTI”). The consolidated balance sheets include the accounts of BioLargo, Inc. and BLTI. All significant inter-company balances have been eliminated in consolidation.

Cash and Cash Equivalents.

We consider all highly liquid investments with original maturities of three months or less or money market funds from substantial financial institutions to be cash equivalents. We place substantially all of our cash and cash equivalents in interest bearing demand deposit accounts with one financial institution.

Accounts Receivable.

Trade accounts receivable are recorded net of allowances for doubtful accounts. Estimates for allowances for doubtful accounts are determined based on payment history and individual customer circumstances. The allowance for doubtful accounts was zero at December 31, 2009.

We consider all other accounts receivable to be fully collectible.

F-9

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Inventory.

Inventories are stated at the lower of cost or net realizable value using the average cost method. Inventories at December 31, 2009 consisted of:

Raw Materials	\$	4,241
Finished Goods		5,437
	\$	9,678

Equipment.

Equipment is carried at cost and depreciated using the straight-line method over the estimated useful lives of the assets, which is three years. Equipment is stated on the balance sheet net of accumulated depreciation of \$25,954 as of December 31, 2009. Depreciation expense for the years ended December 31, 2008 and 2009 was \$2,736 and \$9,563, respectively.

Long-Lived Assets.

We review intangible assets using our best estimates based on reasonable assumptions and projections, an impairment loss to write such assets down to their estimated fair values is necessary if the carrying values of the assets exceed their related undiscounted expected future cash flows. We also determine impairment whenever events or changes in circumstances indicate that their carrying values may not be recoverable. Our intangible assets were impaired as of December 31, 2009. (See Note 3.)

Earnings (Loss) Per Share.

We report basic and diluted earnings (loss) per share ("EPS") for common and common share equivalents. Basic EPS is computed by dividing reported earnings by the weighted average shares outstanding. Diluted EPS is computed by adding to the weighted average shares the dilutive effect if stock options and warrants were exercised into common stock. For the years ended December 31, 2008 and 2009, the denominator in the diluted EPS computation is the same as the denominator for basic EPS due to the anti-dilutive effect of the warrants and stock options on the Company's net loss.

Use of Estimates.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and revenues and expenses during the period reported. Actual results could differ from those estimates. Estimates are used when accounting for stock-based transactions, uncollectible accounts receivable, asset depreciation and amortization, and taxes, among others.

Stock Options and Warrants issued for Services.

All share-based payments to employees, including grants of employee stock options, are recognized in the financial statements based on their fair values.

For stock issued to consultants and other non-employees for services, we record the expense based on the fair market value of the securities as of the date of the stock issuance. The issuance of stock warrants or options to non-employees are valued at the time of issuance utilizing the Black Scholes calculation and the amount is charged to expense.

Non-Cash Transactions.

We have established a policy relative to the methodology to determine the value assigned to each intangible we acquire, and/or services or products received for non-cash consideration of our common stock. The value is based on the market price of our common stock issued as consideration, at the date of the agreement of each transaction or when the service is rendered or product is received.

F-10

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The methods, estimates and judgments we use in applying these most critical accounting policies have a significant impact on the results of our financial statements.

Revenue Recognition.

We recognize revenues based upon contract terms and completion of the sales process in accordance the SEC codification of revenue recognition. All of our revenue was generated from the sale of Odor-No-More products.

Recent Accounting Pronouncements.

Only July 1, 2009, the Financial Accounting Standards Board (FASB) launched the FASB Accounting Standards Codification as the single source of authoritative nongovernmental U.S. generally accepted accounting principles (GAAP). The Codification is effective for interim and annual periods ending after September 15, 2009. All existing accounting standards documents are superseded as described in FASB Statement No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles. All other accounting literature not included in the Codification is nonauthoritative.

Other recent accounting updates issued by FASB and the SEC did not or are not believed by management to have a material impact on the Company's present or future consolidated financial statements.

Note 3. Intangible Assets/Long-lived Assets and Impairment

Amortization expense for the intangible assets for the years ended December 31, 2008 and 2009 was \$1,107,205.

Management performed its assessment of the fair value of the intangible assets for the year ended December 31, 2009. In our undertaking we analyzed the projected cash flow from the assets discounted at appropriate rates, the length of time to full development of the cash flow potential and the current recessionary state of the world-wide economy. We determined after this analysis that it was appropriate for us to record an impairment charge of 8,781,133 consisting of \$8,610,940, which was the remaining net book value of our licensing rights acquired from IOWC Technologies, Inc., in March 2007, and \$170,193, which was the remaining net book value of certain agreements assigned to us as part of the acquisition of the BioLargo technology from IOWC Technologies, Inc., in March 2007. This impairment charge reduces the net book value of the asset to zero.

Note 4. Private Security Offerings

Spring 2009 Offering

Pursuant to a private offering that commenced April 2009 (the "Spring 2009 Offering") and terminated November 2009, we sold \$681,410 of our 10% convertible notes (the "Spring 2009 Notes"), which are due and payable on June 1, 2012, to 23 investors, convertible into an aggregate 1,238,935 shares of our common stock. The Spring 2009 Notes are convertible into shares of our common stock at an initial conversion price of \$0.55 per share. The Spring 2009 Notes can be converted voluntarily by the noteholders at any time prior to the maturity date. We can unilaterally convert the Spring 2009 Notes (i) on or after December 15, 2009, if we have received one or more written firm commitments, or have closed on one or more transactions, or a combination of the foregoing, of at least \$3 million gross proceeds of equity or debt; or (ii) on the maturity date. Accordingly, the Spring 2009 Notes may be repaid in cash or may be converted, at our sole option, into shares of our common stock, on or before the June 1, 2012 maturity date.

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Each purchaser of the Spring 2009 Notes received, for no additional consideration, two stock purchase warrants, each of which entitle the holder to purchase the number of shares of our common stock into which the holder's Spring 2009 Note is initially convertible. The first warrant (the "Spring 2009 One-Year Warrant") is exercisable at a price of \$0.75 per share and expires on June 1, 2010. The second warrant (the "Spring 2009 Three-Year Warrant") is exercisable at a price of \$1.00 per share and expires on June 1, 2012. (See Note 8.)

Fall 2008 Offering

Pursuant to a private offering that commenced October 2008 (the "Fall 2008 Offering") and terminated March 2009, we sold \$723,000 of our 10% convertible notes (the "Fall 2008 Notes"), which are due and payable October 15, 2011, to 18 investors, convertible into an aggregate 1,446,000 shares of our common stock. As originally offered, the Fall 2008 Notes were convertible into shares of our common stock at an initial conversion price of \$1.00 per share. The Fall 2008 Notes can be converted voluntarily by the noteholders at any time prior to the maturity date. We can unilaterally convert the Fall 2008 Notes (i) on or after April 30, 2009, if we have received one or more written firm commitments, or have closed on one or more transactions, or a combination of the foregoing, of at least \$3 million gross proceeds of equity or debt; or (ii) on the maturity date. Accordingly, the Fall 2008 Notes may be repaid in cash or may be converted, at the noteholders' option or our option, into shares of our common stock, on or before the October 15, 2011 maturity date.

Each purchaser of the Fall 2008 Notes received, for no additional consideration, two stock purchase warrants (a one-year warrant and a three-year warrant), each of which entitled the holder to purchase the number of shares of our common stock into which the holder's Fall 2008 Note is initially convertible. As originally offered, the first warrant (the "Fall 2008 One-Year Warrant") was exercisable at \$1.00 per share and was due to expire on October 15, 2009. The second warrant (the "Fall 2008 Three-Year Warrant" and together with the One-Year Warrant, the "Fall 2008 Warrants") was exercisable at \$2.00 per share and was due to expire on October 15, 2011. (See Note 8.)

On January 16, 2009, our Board of Directors amended the terms of the Offering as follows: (i) the initial conversion price of the Fall 2008 Notes was reduced from \$1.00 per share to \$0.50 per share; (ii) the exercise price of the Fall 2008 One-Year Warrant was reduced from \$1.00 per share to \$0.75 per share; (iii) the exercise price of the Fall 2008 Three-Year Warrant was reduced from \$2.00 per share to \$1.00 per share; and the number of shares of our common stock for which the Fall 2008 One-Year Warrants and the Fall 2008 Three-Year Warrants may be exercised is being increased from one share per dollar invested to two shares for each dollar invested. The Fall 2008 One-Year Warrants expired unexercised on October 15, 2009.

Spring 2008 Offering

Pursuant to a private offering that commenced March 2008 (the "Spring 2008 Offering") and terminated August 2008, we sold \$913,625 of our 10% convertible notes (the "Spring 2008 Notes"), which are due and payable on March 31, 2010, to 30 investors, convertible into an aggregate 676,775 shares of our common stock. The Spring 2008 Notes are convertible into shares of our common stock at an initial conversion price of \$1.35 per share. The Spring 2008 Notes can be converted voluntarily by the noteholders at any time prior to the maturity date. We can unilaterally convert the Spring 2008 Notes (i) on or after September 30, 2008, if we have received one or more written firm commitments, or have closed on one or more transactions, or a combination of the foregoing, of at least \$3 million gross proceeds of equity or debt; or (ii) on the maturity date. Accordingly, the Spring 2008 Notes may be repaid in cash or may be converted, at our sole option, into shares of our common stock, on or before the maturity date.

Each purchaser of the Spring 2008 Notes received, for no additional consideration, two stock purchase warrants (a one-year warrant and a three-year warrant), each of which entitled the holder to purchase the number of shares of our common stock into which the holder's Spring 2008 Note is initially convertible. The "Spring 2008 One-Year Warrants" expire on March 31, 2009 and were exercisable at \$0.50 (originally \$1.50) per share. The "Spring 2008 Three-Year Warrants" are exercisable at an initial exercise price of \$2.00 per share and expire on March 31, 2011. On September 19, 2008, our Board of Directors reduced the exercise price of the Spring 2008 One-Year Warrants from \$1.50 per share (the original exercise price pursuant to the terms of the Spring 2008 Offering) to \$1.00 per share. On January 16, 2009, our Board of Directors reduced the exercise price of the Spring 2008 One-Year Warrants from \$1.00 per share to \$0.50 per share. The Spring 2008 One-Year Warrants expired unexercised on March 31, 2009.

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

On March 30, 2010, our board accepted proposals from the holders of the Spring 2008 Notes to extend the maturity date of the notes by one year, such that the Spring 2008 Notes mature on March 31, 2011. (See Note 16.)

2007 Offering

Pursuant to a private offering that commenced May 2007 (the “2007 Offering”) and terminated December 2007, we sold \$1,000,000 of our convertible notes (the “2007 Notes”), which are due and payable on June 30, 2009, to 21 investors, convertible into an aggregate 1,428,582 shares of our common stock. The 2007 Notes bear interest at a rate of 10% compounding annually, such interest to be paid, at our option, in cash or stock at a conversion rate of \$0.70 per share. The 2007 Notes are convertible into shares of the Company’s common stock at an initial conversion price of \$0.70 per share, and can be converted voluntarily by the noteholders at any time. We can elect to convert the 2007 Notes (i) on or after September 30, 2007, if we have received one or more written firm commitments, or have closed on one or more transactions, or a combination of the foregoing, of at least \$3 million gross proceeds of equity or debt; or (ii) on the maturity date. Accordingly, on the maturity date, we may repay the 2007 Notes in cash or choose to convert the notes, at our sole option, into shares of our common stock.

Each purchaser of the 2007 Notes received, for no additional consideration, a stock purchase warrant (the “2007 Warrants”) entitling the holder to purchase a number of shares of our common stock equal to the number of shares of our common stock into which the principal amount of the investor’s 2007 Note is convertible. The 2007 Warrants are exercisable at \$1.30 per share and will expire on June 30, 2010.

Note 5. Extension of Maturity Date of 2007 Offering

On June 30, 2009, we agreed to extend, by one year, the maturity dates of an aggregate principal amount of \$1,000,000 of promissory notes (the “2007 Notes”) issued in the 2007 Offering. (See Note 4.) The 2007 Notes now mature on June 30, 2010.

Note 6. Conversion of our Fall 2006 Notes

During 2008 we converted an aggregate principal amount of \$1,000,000 and \$172,876 of accrued but unpaid interest of convertible promissory notes, issued pursuant to a private securities offering which commenced September 2006, into 1,706,216 shares of our common stock, at a conversion rate of \$0.6875 per share. All of our Fall 2006 Notes and accrued and unpaid interest related to these notes were converted during 2008.

Note 7. Issuance of Securities in exchange for payment of payables

Payment of Interest on Convertible Promissory Notes

Between March 13, 2009 and August 18, 2009, we issued an aggregate 216,123 shares of our common stock at conversion prices ranging between \$0.37 - \$0.47, per share, as payment for \$91,363 of accrued and unpaid interest related to our 2007 Notes. The 2007 Notes called for the conversion of accrued and unpaid interest at the anniversary date of each note holder based on the average exercise price of the prior 20 day period. We recorded \$3,357 of additional interest expense related to the conversion as the closing price of our common stock on the date of conversion was greater than the conversion price used.

On October 15, 2009, we issued an aggregate 112,198 shares of our common stock at a conversion price of \$0.376, per share, as payment for \$42,211 of accrued and unpaid interest related to our 2008 Notes. The 2008 Notes called for

the conversion of accrued and unpaid interest at the anniversary date of each note holder based on the average exercise price of the prior 20 day period.

On November 23, 2009, a holder of a convertible promissory note issued pursuant to the 2007 Offering, in the aggregate principal amount of \$32,000, voluntarily converted the note, together with accrued and unpaid interest in the amount of \$8,364, into 57,663 shares of our common stock, at a conversion rate of \$0.70 per share in accordance with the terms of the note.

F-13

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Payment of Officer Salaries and Board of Director Fees

On January 15, 2009, we issued 16,948 shares of our common stock, at a conversion price of \$0.59, to a director in exchange for his services as a director.

On April 27, 2009 we issued options to purchase an aggregate 450,000 shares of our common stock, pursuant to our 2007 Equity Plan, in exchange for a reduction of outstanding payables to our officers and board of directors in an aggregate amount of \$150,000. (See Note 10.)

Payment of Third Party Consultant and Vendor Obligations

On April 27, 2009 we issued options to purchase an aggregate 227,036 shares of our common stock, pursuant to our 2007 Equity Plan, in exchange for a reduction of outstanding payables to third party consultants and vendors in an aggregate amount of \$75,678. (See Note 10.)

On June 18, 2009, we issued 20,000 shares of our common stock, at a price of \$0.60 per share a consultant in exchange for consulting and advisory services to us in the areas of shareholder communications, public relations and relations with the investment community generally.

On June 18, 2009, we issued 100,000 shares of our common stock at a price of \$0.60 per share, pursuant to a placement agreement with an investment banking firm for services provided related to attempts to obtain financing for our business operations.

On December 11, 2009, we issued 10,000 shares of our common stock, at a price of \$0.70 per share to a consultant in exchange for consulting and advisory services to us in the areas of shareholder communications, public relations and relations with the investment community generally.

During 2009 we issued 213,828 shares of our common stock, at conversion prices ranging between \$0.35 - \$0.70, as payment of \$89,834 in rent pursuant to the sublease of our principal executive offices.

During 2009, we issued 188,327 shares of our common stock, at price ranges between \$0.35 - \$0.68 to four consultants in exchange for consulting and advisory services to us in the areas of branding, marketing and product development related to Odor-No-More.

All of these offerings and sales were made in reliance on the exemption from registration contained in Section 4(2) of the Securities Exchange Act and/or Regulation D promulgated thereunder as not involving a public offering of securities.

Note 8. Warrants

We have certain warrants outstanding to purchase our common stock, at various prices, as described in the following table:

	Number of Shares	Price Range
Outstanding as of December 31, 2008	5,559,697	\$ 0.125 – 2.00

Edgar Filing: BIOLARGO, INC. - Form 10-K

Issued	5,129,870	\$	0.75 – 1.25
Exercised	—	\$	—
Expired	(923,111)	\$	0.50 – 0.875
Outstanding as of December 31, 2009	9,766,456	\$	0.125 – 2.00

F-14

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

To determine interest expense related to our outstanding warrants issued in conjunction with debt offerings, the fair value of each award grant is estimated on the date of grant using the Black-Scholes option-pricing model and the calculated value is amortized over the life of the warrant. The determination of expense of warrants issued for services or settlement also uses the option-pricing model. The principal assumptions we used in applying this model were as follows:

	2008	2009
Risk free interest rate	1.83 – 2.49%	0.40 – 1.70%
Expected volatility	203 – 615%	253 – 493%
Expected dividend yield	—	—
Forfeiture rate	—	—
Expected life in years	0.50 – 3.00	0.50 – 3.00

The risk-free interest rate is based on U.S Treasury yields in effect at the time of grant. Expected volatilities are based on historical volatility of our common stock. The expected term is presumed to be the mid-point between the vesting date and the end of the contractual term.

The aggregate fair value of the warrants issued and outstanding as of December 31, 2009 totaled \$4,446,724. Of this total, \$87,500 was related to warrants issued to a consultant of which \$35,000 was expensed during the year ended December 31, 2008 and \$52,500 was expensed during 2009. The remaining fair value of \$4,359,224 was issued in conjunction with our convertible notes and is recorded on our balance sheet as discount on convertible notes net of amortization of \$1,264,345. We recorded \$1,101,365 and \$1,343,021 of interest expense related to the amortization of the discount on convertible notes for the years ended December 31, 2008 and 2009, respectively.

Spring 2009 Warrants

From April 2009 through November 2009, we issued warrants to purchase up to an aggregate 2,477,870 shares of our common stock to purchasers of our Spring 2009 Notes, consisting of Spring 2009 One-Year Warrants to purchase up to an aggregate 1,238,935 shares which expire June 1, 2010, at an exercise price of \$0.75 per share, and Spring 2009 Three-Year Warrants to purchase up to an aggregate 1,238,935 shares which expire June 1, 2012, at an exercise price of \$1.00 per share.

Fall 2008 Warrants

From January 2009 through June 2009, we issued warrants to purchase up to an aggregate 2,652,000 shares of our common stock to purchasers of our Fall 2008 Notes, consisting of Fall 2008 One-Year Warrants to purchase an aggregate 1,326,000 shares which expire October 15, 2009, at an exercise price of \$0.75 per share (initially issued at \$1.00 per share), and Fall 2008 Three-Year Warrants to purchase up to an aggregate 1,326,000 shares which expire October 15, 2011, at an exercise price of \$1.00 per share (initially issued at \$2.00 per share).

On January 16, 2009, the exercise price of the Fall 2008 One-Year Warrants was reduced from \$1.00 to \$0.75, and the exercise price of the Fall 2008 Three-Year Warrants was reduced from \$2.00 to \$1.00, resulting in additional fair value totaling \$52,967, which was recorded as interest expense.

From October 2008 through December 2008, we issued warrants to purchase up to an aggregate 240,000 shares of our common stock to purchasers of our Fall 2008 Notes, consisting of Fall 2008 One-Year Warrants to purchase an

aggregate 120,000 shares which expire October 15, 2009, at an exercise price of \$0.75 per share (initially issued at \$1.00 per share), and Fall 2008 Three-Year Warrants to purchase up to an aggregate 120,000 shares which expire October 15, 2011, at an exercise price of \$1.00 per share (initially issued at \$2.00 per share).

Spring 2008 Warrants

On March 31, 2009, our Spring 2008 One-Year Warrants, which allowed the investors in our Spring 2008 Offering (see Note 4) to purchase up to an aggregate 676,775 shares of our common stock at an exercise price of \$0.50, expired unexercised.

Other Warrants

On January 16, 2009, the exercise price of the Spring 2008 One-Year Warrants was reduced from \$1.50 to \$1.00, resulting in an immaterial fair value adjustment. These Spring 2008 One-Year Warrants to purchase up to an aggregate 676,775 shares of our common stock at an exercise price of \$0.50, expired unexercised.

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

On September 13, 2009, we extended by one year, to September 13, 2010, the expiration date of the Fall 2006 Warrants, resulting in a fair value of \$370,768 which is recorded as discount on convertible notes, net of current portion on our balance sheet. The Fall 2006 Warrants allow for the purchase up to an aggregate 1,454,564 shares of our common stock at an exercise price of \$1.25.

During 2009 a warrant to purchase up to 246,336 shares of our common stock at an exercise price of \$0.875, expired unexercised.

Note 9. Stockholders' Equity

Preferred Stock

Our certificate of incorporation authorizes our Board of Directors to issue preferred stock, from time to time, on such terms and conditions as they shall determine. As of December 31, 2009 and December 31, 2008 there were no outstanding shares of our preferred stock.

Common Stock

As of December 31, 2008 and 2009 there were 42,261,268 and 43,196,355 shares of common stock outstanding, respectively. The increase in shares during the year ended December 31, 2009 is comprised of the following stock issuances: (i) 385,984 shares of our common stock for a note payable and accrued and unpaid interest related to our 2007 Notes, (ii) 16,948 shares of our common stock to a director in exchange for his services as a director, (iii) 213,828 shares of our common stock in payment of rent of our principal offices, and (iv) 318,327 shares of our common stock pursuant to consulting agreements. (See Note 7.)

During 2008 we issued (i) 50,000 shares of our common stock to a consultant in exchange for consulting and advisory services to us in the areas of shareholder communications, public relations and relations with the investment community generally, (ii) 16,950 shares of our common stock to a director in exchange for his services as a director, and (iii) 20,491 shares of our common stock in payment of rent of our principal offices.

Note 10. Stock-Based Compensation and Other Employee Benefit Plans

2007 Equity Incentive Plan

On August 7, 2007, our Board of Directors adopted the BioLargo, Inc. 2007 Equity Incentive Plan ("2007 Plan") as a means of providing our directors, key employees and consultants additional incentive to provide services. Both stock options and stock grants may be made under this plan. The Compensation Committee administers this plan. The plan allows grants of common shares or options to purchase common shares. As plan administrator, the Compensation Committee has sole discretion to set the price of the options. The Compensation Committee may at any time amend or terminate the plan.

Under this plan, 6,000,000 shares of our common stock are reserved for issuance under awards. Any shares that are represented by awards under the 2007 Plan that are forfeited, expire, or are canceled or settled in cash without delivery of shares, or that are forfeited back to us or reacquired by us after delivery for any reason, or that are tendered to us or withheld to pay the exercise price or related tax withholding obligations in connection with any award under the 2007 Plan, will again be available for awards under the 2007 Plan. Only shares actually issued under the 2007 Plan will

reduce the share reserve. If we acquire another entity through a merger or similar transaction and issue replacement awards under the 2007 Plan to employees, officers and directors of the acquired entity, those awards, to the extent permitted under applicable laws and securities exchange rules, will not reduce the number of shares reserved for the 2007 Plan.

The 2007 Plan imposes additional maximum limitations, which limitations will be adjusted to take into account stock splits, reverse stock splits and other similar occurrences. The maximum aggregate fair market value of stock that may be issued in connection with incentive stock options granted to any one person in any calendar year intended to qualify under Internal Revenue Code Section 422 is \$100,000. The maximum number of shares that may be subject to stock options or stock appreciation rights granted to any one person in any calendar year is 200,000 shares, except that this limit is 400,000 shares if the grant is made in the year of the recipient's initial employment. The maximum number of shares that may be subject to restricted stock or restricted stock units granted to any one person in any calendar year is 200,000 shares.

F-16

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The maximum number shares that may be subject to awards granted to any one Participant in any calendar year of (i) performance shares, and/or performance units (the value of which is based on the Fair Market Value of a share of our common stock), is 200,000 shares; and (ii) of performance units (the value of which is not based on the Fair Market Value of a share of our common stock) that could result a payment of more than \$500,000.

During the year ended December 31, 2009, we granted options to purchase an aggregate 140,000 shares of our common stock to our Chief Financial Officer, pursuant to the terms of our engagement agreement with him. These options are exercisable at various exercise prices ranging between \$0.28 and \$0.70 depending upon their respective dates of grant. Each option is fully vested upon grant and is exercisable for ten years from its respective date of grant.

Issuance of Stock Options in exchange for payment of payables

On April 27, 2009, in an effort to preserve the Company's cash and reduce outstanding payables, we offered to third parties, officers and board members an option ("Option") to purchase common stock in lieu of cash payment to reduce amounts we owed to these individuals. The Options may be exercised at \$0.50 cents a share, an amount which was \$0.20 cents a share above the \$0.30 cents per share closing price of our common stock on April 27, 2009, would be issued pursuant to the Company's 2007 Equity Incentive Plan, and would expire April 27, 2012. The members of the Board, as well as the Company's Chief Financial Officer, opted to reduce their outstanding accrued and unpaid compensation by an aggregate \$150,000 in exchange for Options to purchase up to an aggregate 450,000 shares of common stock. The Options issued to Board members Dennis P. Calvert and Kenneth R. Code were issued at an exercise price of \$0.55 per share, rather than \$0.50 per share. In addition, seven individuals who provided services to the Company agreed to reduce their payables by an aggregate \$75,678 and accept Options to purchase up to an aggregate 272,135 shares, under the terms set forth by the Board. The fair value of the options granted resulted in additional expense totaling \$8,941.

On July 1, 2009, we issued two options pursuant to the 2007 Plan to purchase up to 10,000 shares of our common stock (20,000 shares in the aggregate) at an exercise price of \$0.33 per share to each of our independent directors. Each option is exercisable for ten years and vests on the first anniversary of its date of grant. The fair value of these was \$6,600, all of which was expensed in the year ended December 31, 2009.

During the year ended December 31, 2008, we granted options to purchase an aggregate 140,000 shares of our common stock to our Chief Financial Officer, pursuant to the terms of our engagement agreement with him. These options are exercisable at various exercise prices ranging between \$0.35 and \$1.89 depending upon their respective dates of grant. Each option is fully vested upon grant and is exercisable for ten years from its respective date of grant.

On May 29, 2008, we issued two options pursuant to the 2007 Plan to purchase up to 10,000 shares of our common stock (20,000 shares in the aggregate) at an exercise price of \$1.45 per share to each of our independent directors. Each option is exercisable for ten years and vests on the first anniversary of its date of grant. The fair value of these options was \$29,000, all of which was expensed in the year ended December 31, 2008.

During the year ended December 31, 2008, we issued options pursuant to the 2007 Plan to purchase up to an aggregate 625,000 shares of our common stock. The fair value of these options was an aggregate \$576,700. The options are exercisable at a price range of \$0.40 to \$1.03 and expire ten years from the grant date. Of this amount, \$106,700 was expensed during the year ended December 31, 2008. The remaining fair value of \$470,000 will be expensed ratably over the applicable vesting period.

During the years ended December 31, 2008 and 2009 we recorded an aggregate \$365,561 and \$481,533 in option compensation expense related to options issued pursuant to the 2007 Plan.

F-17

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Activity for our stock options under the 2007 Plan for the year ended December 31, 2009 is as follows:

	Options Outstanding	Shares Available	Price per share	Weighted Average Price per share
Balances, December 31, 2008	785,000	5,215,000	\$ 0.35 – \$1.89	\$ 1.02
Granted	882,135	(882,135)	\$ 0.28 – 0.70	\$ 0.48
Exercised	—	—	—	—
Canceled	—	—	—	—
Balances, December 31, 2009	1,667,135	4,332,865	\$ 0.28 – \$1.89	\$ 0.75

The following table summarizes the stock options issued under the 2007 Equity Plan outstanding at December 31, 2009.

Options Outstanding at December 31, 2009	Exercise Price	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Currently Exercisable Number of Shares at December 31, 2009	Weighted Average Exercise Price
20,000	\$ 0.40	8	\$ 0.40	20,000	\$ 0.40
	0.94 –				
605,000	\$ 1.03	8	\$ 0.97	105,000	\$ 0.94

30,000	\$ 0.57	5	\$ 0.57	30,000	\$ 0.57

Stock Options Issued Outside the 2007 Equity Incentive Plan

On April 27, 2009, New Millennium agreed to accept an option to purchase common stock as payment of \$230,658 of the outstanding \$380,658 in accrued but unpaid interest. The option allows New Millennium to purchase up to 691,974 shares of the Company's common stock at \$0.55 cents per share, on or before April 27, 2012. New Millennium further agreed to extend the due date for the remaining \$150,000 accrued and unpaid interest to April 30, 2010. (See Note 13.)

On January 10, 2008, pursuant to consulting agreements with Jeffrey C. Wallace and Robert J. Szolomayer (see Note 15), we issued options outside the 2007 Equity Plan to purchase 2,400,000 shares of our common stock at \$0.99 per share. Each option is exercisable for five years, and vests in four equal installments commencing on the date of the respective consulting agreement and continuing on each of December 31, 2008, December 31, 2009 and December 31, 2010 (each, an "Option Vesting Date"); provided that no additional portion of each option shall vest if Mr. Wallace or Mr. Szolomayer, as the case may be, is not providing services under his consulting agreement as of such Option Vesting Date. The fair value of these options was \$2,358,240, and for the years ended December 31, 2008 and 2009 we recognized \$0 and \$1,181,340 of consulting expense, respectively.

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

On April 30, 2007, we issued an option outside the 2007 Equity Plan to our Chief Executive Officer to purchase 7,733,259 shares of our common stock at \$0.18 per share, a discount to the \$0.37 closing price on the date of issuance. This option vests over three years in equal amounts on the anniversary date, and expires ten years from the date of issuance. The fair value of this option was \$2,861,306, and for the years ended December 31, 2008 and 2009 we recognized \$953,768 and \$953,768 of compensation expense, respectively.

We recognize compensation expense for stock option awards on a straight-line basis over the applicable service period of the award, which is the vesting period. Share-based compensation expense is based on the grant date fair value estimated using the Black-Scholes Option Pricing Model. The following methodology and assumptions were used to calculate share based compensation for the year ended December 31, 2009:

	Non plan Option	2007 Plan
Risk free interest rate	1.50%	1.03 – 2.75%
Expected volatility	482%	482 – 766%
Expected dividend yield	—	—
Forfeiture rate	—	—
Expected life in years	5	5

Expected price volatility is the measure by which our stock price is expected to fluctuate during the expected term of an option. Expected volatility is derived from the historical daily change in the market price of our common stock, as we believe that historical volatility is the best indicator of future volatility.

Following the SEC guidance, we use the “shortcut” method to determine the expected term of plain vanilla options issued to employees and Directors. The expected term is presumed to be the mid-point between the vesting date and the end of the contractual term.

The risk-free interest rate used in the Black-Scholes calculation is based on the prevailing U.S Treasury yield as determined by the U.S. Federal Reserve. We have never paid any cash dividends on our common stock and do not anticipate paying cash dividends on our common stock in the foreseeable future.

We recognize compensation expense for stock option awards on a straight-line basis over the applicable service period of the award, which is the vesting period. Share-based compensation expense is based on the grant date fair value estimated using the Black-Scholes Option Pricing Model. Historically, we have not had significant forfeitures of unvested stock options granted to employees and Directors. A significant number of our stock option grants are fully vested at issuance or have short vesting provisions. Therefore, we have estimated the forfeiture rate of our outstanding stock options as zero.

Note 11. Accounts Payable and Accrued Expenses

Accounts payable and accrued expenses included the following:

	December 31, 2008	December 31, 2009
Accounts payable and accrued expenses	\$ 302,518	\$ 479,034
Accrued interest	560,031	462,129

Edgar Filing: BIOLARGO, INC. - Form 10-K

Officer and Board of Director payable	130,882	331,865
Total Accounts Payable and Accrued Expenses \$	993,431	\$ 1,273,028

F-19

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Accounts Payable and Accrued Expenses

Accounts payable and accrued expenses were reduced as certain vendors, consultants and professionals agreed to accept options to purchase shares of our common stock as payment of an aggregate \$75,678, of which \$45,543 was outstanding as of December 31, 2008, and the balance of \$30,135 related to expenses incurred in the three-month period ended March 31, 2009. (See Note 7.) Our accounts payable increased during the year ended December 31, 2009, due to our lack of capital resources and lack of operating revenues.

Accrued Interest

Accrued interest as of December 31, 2008, includes \$380,658 of accrued and unpaid interest related to a note previously held by New Millennium Capital Partners, LLC ("New Millennium"), a related party. On April 27, 2009, New Millennium agreed to accept from the Company an option to purchase common stock as payment of \$230,658 of the outstanding \$380,658 in accrued but unpaid interest. New Millennium further agreed to extend the due date for the remaining \$150,000 accrued and unpaid interest to April 30, 2010. (See Note 13.) The remaining \$312,129 of accrued and unpaid interest relates to outstanding convertible promissory notes issued by the Company pursuant to private securities offerings. (See Note 4.)

During 2009 we converted \$141,983 of accrued and unpaid interest into 340,335 shares of our common stock at prices ranging between \$0.38 – 0.70, per share. During the years ended December 31, 2008 and 2009, we recorded \$237,228 and \$283,209 of interest expense related to the convertible notes outstanding, respectively.

Officer and Board of Director payable

Officer and Board of Director payables were reduced as certain offices and board members agreed to accept options to purchase shares of our common stock as payment of an aggregate \$150,000, of which \$100,000 was outstanding as of December 31, 2008, and the balance of \$50,000 related to expenses incurred in the three-month period ended March 31, 2009. (See Note 7.) Our Officer and Board of Director payables increased during the year ended December 31, 2009, due to our lack of capital resources and lack of operating revenues.

Note 12. Note Payable

On August 3, 2009, we received \$70,000 and issued a promissory note with a maturity date of October 31, 2009 which accrued interest at a rate of 10%. For the year ended December 31, 2009 we recorded \$4,104 of interest expense. On October 31, 2009 the maturity date of this promissory note was extended to February 1, 2010. Subsequent to December 31, 2009, the maturity date was further extended to June 1, 2010, and a \$20,000 payment on the note was made. (See Note 16.)

Note 13. Related Party Transactions

New Millennium

In March 2003, New Millennium, a company controlled by our president and chief executive officer, Dennis Calvert, purchased from a third party a promissory note in the principal amount of \$1,120,000 we assumed pursuant to a licensing transaction in October 2002.

On April 28, 2006, New Millennium agreed to amend the terms of the \$1,120,000 promissory note (the "New Millennium Note") to (i) extend the due date to January 15, 2008; (ii) waive any payments of interest until it becomes due; (iii) reduce the principal amount from \$1,120,000 to \$900,000, equal to a 19.6% reduction; and (iv) correspondingly reduce the accrued but unpaid interest due under the terms of the note from \$318,000 to \$256,000, also equal to a 19.6% reduction.

On April 13, 2007, we entered into an agreement with New Millennium whereby the \$900,000 principal amount of the New Millennium Note was converted into 1,636,364 shares of our common stock, at a price of \$0.55 per share, which was the last bid price on the date of conversion. The remaining accrued but unpaid interest in the amount of \$380,658 was not converted, and the parties agreed that no further interest would accrue, and that the interest would be paid on or before January 15, 2008, subsequently extended to April 30, 2009 by the Board of Directors and New Millennium.

F-20

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

On April 27, 2009, New Millennium agreed to accept an option to purchase common stock as payment of \$230,658 of the outstanding \$380,658 in accrued but unpaid interest. The option allows New Millennium to purchase up to 691,974 shares of the Company's common stock at \$0.55 cents per share, on or before April 27, 2012. New Millennium further agreed to extend the due date for the remaining \$150,000 accrued and unpaid interest to April 30, 2010. (See Notes 7 and 11.)

Note 14. Provision for Income Taxes

At December 31, 2009 we had federal and California tax net operating loss carry-forwards of approximately \$48.6 million and \$38.6 million, respectively. The difference between federal and California tax loss carry-forwards is primarily due to limitations on California loss carry-forwards. Due to changes in our ownership through various common stock issuances during 2002 and 2007, the utilization of net operating loss carry-forwards may be subject to annual limitations under provisions of the Internal Revenue Code. Such limitations could result in the permanent loss of a portion of the net operating loss carry-forwards. Realization of our deferred tax assets, which relate to operating loss carry-forwards and timing differences, is dependent on future earnings. The timing and amount of future earnings are uncertain and therefore we have established a 100% valuation allowance.

Note 15. Commitments and Contingencies

Litigation

We are not currently a party to any litigation.

Attorney Fee Settlement

In February 2008, we agreed to pay \$25,000, issue 15,000 shares of our common stock, and issue warrants to purchase an aggregate 15,000 shares of our common stock at \$1.50 per share, which warrants would expire three years from the date of issuance, in settlement of an account owed to a legal service provider. Since the date of the settlement, certain facts have come to light, and therefore, as of the date of this Report, we have not issued the common stock or the warrants, but have recorded a \$42,050 expense during 2008 in connection therewith.

Joseph L. Provenzano Employment Agreement

On January 10, 2008, we entered into an employment agreement with Joseph L. Provenzano (the "Provenzano Employment Agreement"), pursuant to which Mr. Provenzano agreed to serve as Vice President of Operations effective January 1, 2008, in addition to continuing to serve as Corporate Secretary. The Provenzano Employment Agreement replaces a previous employment agreement dated March 1, 2003.

The Provenzano Employment Agreement provides that Mr. Provenzano will receive base compensation of \$79,200 annually (with automatic 10% annual increases). Mr. Provenzano is also entitled to reimbursement for authorized expenses he incurs in the course of his employment. In addition, Mr. Provenzano is eligible to receive discretionary bonuses, participate in benefits made generally available to our employees, and receive grants under our 2007 Equity Incentive Plan.

The initial term of the Provenzano Employment Agreement is one year and is automatically renewable for additional one-year periods unless we give at least 90 days notice of non-renewal. The Provenzano Employment Agreement also contains additional provisions typical of an agreement of this nature.

In connection with the execution of the Provenzano Employment Agreement, Mr. Provenzano also executed a non-disclosure agreement requiring him to keep certain information confidential, assigning to us creations and inventions during the term of his employment, and prohibiting him from soliciting business during the term of his employment and for a period of time thereafter.

F-21

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Engagement of Charles K. Dargan, II as Chief Financial Officer

On February 1, 2008, we engaged Charles K. Dargan, II to serve as our Chief Financial Officer for a term of one year, subject to earlier termination on 30 days' notice, and simultaneously Dennis P. Calvert resigned as our Chief Financial Officer. Mr. Calvert continued to serve as our Chief Executive Officer, President and a director. During the term of the agreement, Mr. Dargan will receive a fee of \$4,000 per month, which amount will be increased to \$8,000 or more in months during which we file our periodic reports with the Securities and Exchange Commission.

In addition to the cash compensation specified above, the agreement calls for Mr. Dargan to be issued stock options over the term, as follows:

- an option to purchase 50,000 shares of our common stock, granted on February 1, 2008, at an exercise price equal to the closing price of a share of our common stock on the grant date, such option to vest in full 90 days after grant; and
- options to purchase 10,000 shares of our common stock, each such option to be granted on the last day of each month commencing April 2009 and ending January 2010, provided that this Agreement has not been terminated prior to each such grant date, at an exercise price equal to the closing price of a share of our common stock on each grant date, each such option to be fully vested upon grant.

Mr. Dargan will be reimbursed for business expenses he incurs in connection with the performance of his services as our Chief Financial Officer. The agreement with Mr. Dargan also contains provisions regarding indemnification and arbitration of disputes.

The one year agreement was mutually extended on the same terms for a period to end January 31, 2010. Subsequent to the year ended December 31, 2009, Mr. Dargan's agreement was further extended. (See Note 16.)

Other Consulting Agreements

On January 10, 2008, we entered into consulting agreements with each of Jeffrey C. Wallace (the "Wallace Consulting Agreement") and Robert J. Szolomayer (individually the "Szolomayer Consulting Agreement" and collectively with the Wallace Consulting Agreement, the "Consulting Agreements"). Pursuant to the Wallace Consulting Agreement, Mr. Wallace has agreed to serve as our Director of Sales and Marketing effective January 1, 2008, and pursuant to the Szolomayer Consulting Agreement, Mr. Szolomayer has agreed to serve as our Director of Corporate Development effective January 1, 2008.

Other than referring to respective titles, the terms of the Consulting Agreements are identical. The Consulting Agreements provide that each of Messrs. Wallace and Szolomayer will receive (i) base compensation of \$90,000 annually, (ii) a share of a commission pool (the "Commission Pool") to be established with respect to revenue it receives from third-parties evaluating, developing or licensing our BioLargo technology; and (iii) a stock purchase option (the "Option"). Each of Messrs. Wallace and Szolomayer is also entitled to reimbursement for authorized expenses he incurs in the course of his consultancy. The Commission Pool shall consist of an amount of money equal to a percentage of net licensing revenue (as defined in each Consulting Agreement), in the following amounts:

-

not less than 4% nor more than 7% of the Net Licensing Revenue actually and indefeasibly received by BioLargo in the first 12 months of the License Agreement Period for such License Agreement;

- not less than 3% nor more than 5% of the Net Licensing Revenue actually and indefeasibly received by BioLargo in the second 12 months of the License Agreement Period for such License Agreement;
- not less than 1% nor more than 3% of the Net Licensing Revenue actually and indefeasibly received by BioLargo in the third 12 months of the License Agreement Period for such License Agreement; and
- not less than 0.75% nor more than 2% of the Net Licensing Revenue actually and indefeasibly received by BioLargo in the fourth 12 months and for each 12 month period thereafter, of the License Agreement Period for such License Agreement.

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Each of Messrs. Wallace and Szolomayer shall be entitled to one-half (1/2) of the above-stated minimum amounts included in the Commission Pool during each calendar year during the term of the Consulting Agreements. Any and all of amounts in the Commission Pool which we may, in our sole and absolute discretion, contribute in excess of such above-stated minimum amounts up to the above-stated maximum amounts shall be paid to such persons, including either or both of Messrs. Wallace and Szolomayer, and in such amounts as we shall determine in its sole and absolutely discretion. Pursuant to the Consulting Agreements, each of Messrs. Wallace and Szolomayer received an Option to purchase 1,200,000 shares of our common stock at \$0.99 per share. Each Option is exercisable for five years, and vests in four equal installments commencing on the date of the respective Consulting Agreement and continuing on each of December 31, 2008, December 31, 2009 and December 31, 2010 (each, an "Option Vesting Date"); provided that no additional portion of each Option shall vest if Mr. Wallace or Mr. Szolomayer, as the case may be, is not providing services under his Consulting Agreement as of such Option Vesting Date. (See Note 10.)

The initial term of each of the Consulting Agreements is four years. Each of the Consulting Agreements also contains additional provisions typical of an agreement of this nature.

In connection with the execution of his respective Consulting Agreement, each of Messrs. Wallace and Szolomayer also executed a non-disclosure agreement requiring him to keep certain information confidential, assigning creations and inventions during the term of his consultancy and prohibiting him from soliciting business during the term of his consultancy and for a period of time thereafter.

Stock-Based Commitments

We have utilized and presently utilize the services of a number of consultants who have been and are compensated with shares of our common stock or securities convertible into or exercisable for shares of our common stock. Therefore, we may be obligated to issue additional securities to these consultants pursuant to the terms of our arrangements or agreements with them.

Note 16. Subsequent Events

Relocation of Principal Offices

Effective February 4, 2010, we relocated our principal executive office to 16333 Phoebe, La Mirada, California, pursuant to a sublease with the E.T. Horn Company. We can terminate our lease upon 60 days notice, and our monthly obligation is less than \$1,000.

Stock option issuances

On February 1, 2010, the Company's Compensation Committee issued options and a restricted stock award pursuant to the Company's 2007 Equity Incentive Plan to certain employees, outside consultants and professionals, consistent with management's recommendations to the committee.

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In total, options to purchase an aggregate 1,060,000 shares of the Company's common stock were issued, at an exercise price of \$0.575 per share, which price was \$0.075 more than the \$0.50 closing price of the Company's common stock on the date of grant. Of the options issued, 400,000 were issued to third party consultants for their respective roles within the Company and the remaining 660,000 options were issued to the Company's principal executive officer, principal financial officer, and named executive officers, as set forth in the following table:

Name	Position	Number of Shares Underlying Options
Dennis P. Calvert	President and Chief Executive Officer	200,000
Charles K. Dargan II	Chief Financial Officer	60,000
Kenneth R. Code	Chief Technology Officer	200,000
Joseph L. Provenzano	Secretary, VP of Operations	200,000
	Total	660,000

With one exception, the options issued expire ten years from the date of grant (the option issued to Mr. Code expires five years from the date of grant).

In addition to the options issued, the Compensation Committee issued one restricted stock award of 200,000 shares, at \$0.50 per share which was the closing price of the Company's common stock at the date of grant, to an individual who had provided business development services to the Company during the years 2008 and 2009, and continues to provide services to the Company. The shares issued are restricted from transfer for a period of two years from the date of grant.

Common Stock issuance

On January 4, 2010, we issued an aggregate 114,287 shares of our common stock, at a conversion price of \$0.70, which was the closing price of our common stock on the day of issuance, to two members of our board of directors in lieu of \$80,000 in accrued and unpaid payables for their services as a director.

Spring 2010 Private Securities Offering

January 16, 2010 we commenced a private offering (the Spring 2010 Offering). From the inception of the offering, through March 29, 2010, we (i) sold \$192,500 principal amount of Spring 2010 Notes convertible at \$0.575 per share, (ii) issued warrants to purchase up to 334,786 shares of our common stock at \$0.75 per share which expire July 15, 2011, and (iii) issued warrants to purchase up to an additional 334,786 shares of our common stock at \$1.00 per share which expire January 15, 2013.

Extension of Engagement of Charles K. Dargan, II as Chief Financial Officer

On February 1, 2010, we agreed to extend the engagement agreement dated February 1, 2008 (the "Engagement Agreement", which had been previously extended by one year by agreement dated February 23, 2009), pursuant to which Mr. Dargan served as the Company's Chief Financial Officer for a period of two years, expiring January 31, 2010. The extension agreement dated as of February 1, 2010 (the "Engagement Extension Agreement") provides for an additional one-year term effective February 1, 2010 (the "Extended Term"). During the Extended Term, Mr. Dargan will continue to receive a fee of \$4,000 per month, which amount will be increased to \$8,000 or more in months during which the Company files its periodic reports with the Securities and Exchange Commission.

In addition to the cash compensation specified above, Mr. Dargan will be issued stock options over the Extended Term. Each option will allow Mr. Dargan to purchase 10,000 shares of the Company's common stock, and will be granted on the last business day of each month commencing February 2010 and ending January 2010, provided that the Engagement Extension Agreement with Mr. Dargan has not been terminated prior to each such grant date, at an exercise price equal to the closing price of a share of the Company's common stock on each grant date, each such option to be fully vested upon grant.

Mr. Dargan will continue to be reimbursed for business expenses he incurs in connection with the performance of his services as our Chief Financial Officer. All other provisions of the Engagement Agreement not expressly amended pursuant to the Engagement Extension Agreement remain the same, including provisions regarding indemnification and arbitration of disputes.

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Extension of Note Payable

On August 3, 2009, we received \$70,000 and issued a promissory note with a maturity date of October 31, 2009 which accrued interest at a rate of 10%. For the year ended December 31, 2009 we recorded \$4,104 of interest expense. On October 31, 2009 the maturity date of this promissory note was extended to February 1, 2010. Subsequent to December 31, 2009, the maturity date was further extended to June 1, 2010, and a \$20,000 payment on the note was made.

Extension of Spring 2008 Notes

On March 30, 2010, our board approved agreements mutually extending the maturity dates of the Spring 2008 Notes by one year, such that the Spring 2008 Notes mature on March 31, 2011.

License of Isan System

In August 2008, BioLargo, Inc. (“we”, or the “Company”) entered into a marketing and representation agreement (the “Marketing Agreement”) with Ioteq IP Pty. Ltd., an Australian company (“Ioteq-Australia”), and its United States affiliate Ioteq Inc. (“Ioteq-US”, and collectively with Ioteq-Australia, “Ioteq”), pursuant to which we represent and market Ioteq’s iodine-based disinfection technology, the Isan system, on an exclusive basis in the United States and on a non-exclusive basis in the rest of the world, with respect to seeking, identifying, introducing and negotiating various business opportunities. The Marketing Agreement obligated us to make monthly payments to Ioteq of \$20,000 per month commencing September 1, 2008. For our efforts in seeking, identifying, introducing and negotiating business opportunities, Ioteq agreed to reimburse us our actual out-of-pocket costs incurred and pay us a royalty.

On March 26 and March 29, 2010, we entered into a series of transactions whereby we licensed the Isan system technology from Ioteq, and then sublicensed the technology to a third party. These transactions are described in the following paragraphs.

Sublicense to BioLargo and Amendment of Marketing Agreement

On March 26, 2010, Ioteq-US and BioLargo entered into a sublicense agreement (the “Ioteq Sublicense Agreement”) which grants BioLargo the exclusive rights to use, exploit, develop and commercialize certain technology, including patented and proprietary technologies (referred to in this report as the “Isan System Technology”) in the United States, Canada and Mexico, in any field of use. The agreement includes rights allowing BioLargo to sublicense the technology. Pursuant to the Ioteq Sublicense Agreement, BioLargo agreed to pay a royalty of 5% to Ioteq-US, as well as 60% of revenues generated from sublicense agreements, up to AUD\$800,000 (Australian dollars; unless otherwise noted, all figures in U.S. dollars). Once Ioteq-US has received AUD\$800,000 from BioLargo, the royalty rate is automatically reduced from 5% to 2.5%, and sublicensing fees are reduced from 60% to 30%. BioLargo is required to pay a minimum annual license fee to Ioteq Inc. of \$150,000, which will be divided into twelve equal payments of \$12,500 per month. The Ioteq Sublicense Agreement also contains customary provisions relating to indemnity, insurance, governing law, assignment of rights and obligations, attorneys’ fees, force majeure and other matters standard for license transactions.

Simultaneously with the execution of the Ioteq Sublicense Agreement, BioLargo and Ioteq amended the terms of the Marketing Agreement. As amended, BioLargo will no longer be required to pay to Ioteq a monthly payment of \$20,000. A final payment obligation will accrue April 1, 2010, and BioLargo agreed to pay Ioteq \$50,000, which

amount represents accrued and unpaid monthly payment amounts, including the final April 2010 accrual.

Sublicense to Isan USA

On March 29, 2010, BioLargo and Isan USA, Inc. (“Isan USA”) entered into a sublicense agreement (the “Isan USA Sublicense”) which grants Isan USA the exclusive rights to use, exploit, develop and commercialize the Isan System Technology in the United States, in particular fields of use (set forth below). Isan USA is a California corporation founded and organized by Bert Fenenga. Mr. Fenenga also invested in our private securities offering which commenced June 1, 2009.

F-25

BIOLARGO, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Isan USA Sublicense grants Isan USA exclusive rights to commercialize the Isan System Technology in the United States, in the following fields of use (as further defined in the agreement): (i) horticulture, (ii) post-harvest sanitation of fruits and vegetables, (iii) dairy use, and (iv) poultry drinking water. Additional fields of use may be added by Isan USA upon the satisfaction of certain conditions, including the submission of the proposed field of use, and a plan and budget for development and commercialization of product(s) in the proposed field of use. BioLargo would have 30 days after any such submission to review and respond to the proposal. If the parties agree, the sublicense agreement would be amended to include the proposed field of use.

In addition to the exclusive rights granted in the United States, the Isan USA Sublicense grants Isan USA rights to export licensed products to Canada and Mexico. Furthermore, should BioLargo enter into a sublicense agreement with a third party to commercialize the Isan System technology in the United States in a field of use not licensed to Isan USA, BioLargo is required to pay to Isan USA 15% of any revenue generated from that sublicense agreement. If BioLargo desires to commercialize the Isan System Technology in the United States in a field of use not subject to the Isan USA Sublicense, it must provide Isan USA the option to purchase the United States rights to the proposed field of use for an amount equal to one-third of the proposed commercialization budget, such payment to be made as expenses are accrued, and subject to increase or decrease based on actual expenditures.

Pursuant to the Isan USA Sublicense, Isan USA paid to BioLargo a \$100,000 initial license fee, fully earned upon payment, and has agreed to pay a 6% royalty on sales of licensed products, and 30% of revenues generated from sublicense agreements. The royalty on sales of licensed products decreases to 5% if annual net sales revenues exceed \$10,000,000, and decrease to 4% if annual net sales revenues exceed \$15,000,000. Isan USA has agreed to pay a minimum annual license fee to BioLargo of \$20,000 per month for the first 24 months of the agreement, and \$33,333 per month thereafter, paid quarterly, in arrears, commencing June 30, 2010. Each of Ioteq-Australia and Ioteq-US executed a written consent to the Isan USA Sublicense.

As partial consideration for the Isan USA Sublicense, BioLargo was granted an option to purchase a 20% non-dilutive common stock interest in Isan USA, for a purchase price equal to the basis upon which the founders of Isan USA purchased their shares, not to exceed an aggregate of \$200,000. These essential terms, and other standard terms and conditions, will be set forth in a written agreement, to be mutually prepared by the parties.

The Isan USA Sublicense grants Isan USA the right to conduct research and development activities, and pursue regulatory approval, field trials, and all other work necessary to develop, improve, enhance and commercialize the Isan System Technology within the defined fields of use in the United States. Any improvements to the Isan System Technology remain the property of BioLargo.

If Isan USA determines that the continuation of the Isan USA Sublicense will not be, or is no longer, economically viable, Isan USA may terminate the Isan USA Sublicense upon not less than 90 days written notice to BioLargo. Otherwise, the Isan USA Sublicense will expire on the earlier of (i) the expiration of the patent rights licensed, or (ii) on the 10th anniversary of the agreement. Isan USA may extend the agreement for six additional periods of five years, provided that the licensed patent rights remain valid. The Isan USA Sublicense also contains customary provisions relating to indemnity, insurance, governing law, assignment of rights and obligations, attorneys' fees, force majeure and other matters standard for license transactions.

Agency Agreement

In addition to the Isan USA Sublicense, on March 29, 2010, BioLargo and Isan USA entered into an agency agreement (“Agency Agreement”) whereby BioLargo was designated a non-exclusive representative of Isan USA in the United States, with respect to seeking, identifying, introducing and negotiating –“business opportunities” to commercialize the Isan System Technology. As consideration for the designation, Isan USA agreed to pay to BioLargo 7% of any net royalty or payment received by Isan USA derived directly or indirectly from such business opportunities. The parties may agree on a different percentage. If BioLargo proposes to Isan USA a sublicense in a field of use sublicensed to Isan USA pursuant to the Isan USA Sublicense, with a party with whom BioLargo has entered into a product evaluation agreement, and within one year of the March 29, 2010 effective date of the Isan USA Sublicense, Isan USA has agreed to pay to BioLargo a sublicensing fee of 75% of any revenue received from such sublicense agreement. If the sublicense is commenced subsequent to one year from the March 29, 2010 effective date of the Isan USA Sublicense, Isan USA has agreed to pay to BioLargo a sublicensing fee of 50% of any revenue received from such sublicense agreement.
