QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2013

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission File No. 1-13881

MARRIOTT INTERNATIONAL, INC.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

52-2055918
(IRS Employer
Identification No.)

10400 Fernwood Road, Bethesda, Maryland
(Address of principal executive offices)
(301) 380-3000
(Registrant's telephone number, including area code)

20817
(Zip Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller Reporting Company

Indicate by checkmark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date: 307,129,596 shares of Class A Common Stock, par value \$0.01 per share, outstanding at April 19, 2013.

MARRIOTT INTERNATIONAL, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Basis of Presentation

The condensed consolidated financial statements present the results of operations, financial position, and cash flows of Marriott International, Inc. ("Marriott," and together with its subsidiaries "we," "us," or the "Company"). In order to make this report easier to read, we refer throughout to (i) our Condensed Consolidated Financial Statements as our "Financial Statements," (ii) our Condensed Consolidated Statements of Income as our "Income Statements," (iii) our Condensed Consolidated Balance Sheets as our "Balance Sheets," (iv) our properties, brands, or markets in the United States and Canada as "North America" or "North American," and (v) our properties, brands, or markets outside of the United States and Canada as "international." In addition, references throughout to numbered "Footnotes" refer to the numbered Notes in these Notes to Condensed Consolidated Financial Statements, unless otherwise noted.

These condensed consolidated Financial Statements have not been audited. We have condensed or omitted certain information and footnote disclosures normally included in financial statements presented in accordance with U.S. generally accepted accounting principles ("GAAP"). Although we believe our disclosures are adequate to make the information presented not misleading, you should read the financial statements in this report in conjunction with the consolidated financial statements and notes to those financial statements in our Annual Report on Form 10-K for the fiscal year ended December 28, 2012, ("2012 Form 10-K"). Certain terms not otherwise defined in this Form 10-Q have the meanings specified in our 2012 Form 10-K.

Preparation of financial statements that conform with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements, the reported amounts of revenues and expenses during the reporting periods, and the disclosures of contingent liabilities. Accordingly, ultimate results could differ from those estimates.

Beginning with our 2013 fiscal year, we changed our financial reporting cycle to a calendar year-end reporting cycle and an end-of-month quarterly reporting cycle. Accordingly, our 2013 fiscal year began on December 29, 2012 (the day after the end of the 2012 fiscal year) and will end on December 31, 2013, and our 2013 quarters will include the three month periods ended March 31, June 30, September 30, and December 31, except that the period ended March 31, 2013 also includes December 29, 2012 through December 31, 2012. Our future fiscal years will begin on January 1 and end on December 31. Historically, our fiscal year was a 52-53 week fiscal year that ended on the Friday nearest to December 31, and our quarterly reporting cycle included twelve week periods for the first, second, and third quarters and a sixteen week period (or in some cases a seventeen week period) for the fourth quarter. We have not restated and do not plan to restate historical results.

As a result of the change in our calendar, our 2013 first quarter, which began on December 29, 2012 and ended on March 31, 2013 (our "2013 first quarter"), had 93 days of activity, 9 more days than our 2012 first quarter, which began on December 31, 2011, ended on March 23, 2012 (our "2012 first quarter"), and had 84 days of activity. While our 2013 full fiscal year will have only 4 more days (368 days in 2013 versus 364 days in 2012), our 2013 second quarter will have 7 additional days, our 2013 third quarter will have 8 additional days, and our 2013 fourth quarter will have 20 fewer days than the corresponding periods in 2012.

In our opinion, our Financial Statements reflect all normal and recurring adjustments necessary to present fairly our financial position as of March 31, 2013, and December 28, 2012, the results of our operations for the 93 days ended March 31, 2013, and 84 days ended March 23, 2012, and cash flows for the 93 days ended March 31, 2013, and 84 days ended March 23, 2012. Interim results may not be indicative of fiscal year performance because of seasonal and short-term variations. We have eliminated all material intercompany transactions and balances between entities consolidated in these Financial Statements.

Table of Contents

2. New Accounting Standards

Accounting Standards Update No. 2013-02 - "Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income" ("ASU No. 2013-02")

ASU No. 2013-02, which we adopted in our 2013 first quarter, amends existing guidance by requiring disclosure of the changes in the components of accumulated other comprehensive income for the current period and additional information about items reclassified out of accumulated other comprehensive income. Our adoption of this update required additional disclosures but did not have a material impact on our Financial Statements. Please see Footnote No. 10, "Comprehensive Income and Capital Structure" for those additional disclosures.

3. Income Taxes

We file income tax returns, including returns for our subsidiaries, in various jurisdictions around the world. The Internal Revenue Service ("IRS") has examined our federal income tax returns, and we have settled all issues for tax years through 2009. We participated in the IRS Compliance Assurance Program ("CAP"), which accelerates IRS examination of key transactions with the goal of resolving any issues before the taxpayer files its return, for the 2010, 2011, and 2012 tax years, and are also participating in the program for 2013. For the 2010 and 2011 tax years all but one issue, which we are appealing, has been resolved, including all matters that could affect the Company's cash tax benefits related to our spin-off in 2011 of our timeshare operations and timeshare development business. The audit for the 2012 tax year is currently ongoing. Various foreign, state, and local income tax returns are also under examination by the applicable taxing authorities.

For the 2013 first quarter, we decreased our unrecognized tax benefits by \$1 million from \$29 million at year-end 2012 chiefly due to new information related to a federal issue and expiring statutes of limitation in several foreign jurisdictions. The unrecognized tax benefits balance of \$28 million at the end of the 2013 first quarter included \$13 million of tax positions that, if recognized, would impact our effective tax rate.

As a large taxpayer, the IRS and other taxing authorities continually audit us. We anticipate resolving an international issue related to financing activity during the next 12 months for which we have an unrecognized tax benefit of \$5 million. Although the resolution of this issue could have a significant impact on our unrecognized tax balance, we do not anticipate that it will have a material impact on our Financial Statements.

On January 2, 2013, the American Taxpayer Relief Act of 2012 (the "Act") was signed into law. Some of the provisions contained in the Act were retroactive, and we recognized a \$3 million benefit related to the Act in the 2013 first quarter.

4. Share-Based Compensation

Under our Stock and Cash Incentive Plan (the "Stock Plan"), we award: (1) stock options (our "Stock Option Program") to purchase our Class A Common Stock (our "common stock"); (2) stock appreciation rights ("SARs") for our common stock (our "SAR Program"); (3) restricted stock units ("RSUs") of our common stock; and (4) deferred stock units. We grant awards at exercise prices or strike prices that equal the market price of our common stock on the date of grant. We recorded share-based compensation expense for award grants of \$22 million for the 2013 first quarter and \$19 million for the 2012 first quarter. Deferred compensation costs related to unvested awards totaled \$200 million at March 31, 2013 and \$122 million at December 28, 2012.

RSUs

We granted 2.5 million RSUs during the 2013 first quarter to certain officers and key employees, and those units vest generally over four years in equal annual installments commencing one year after the grant date. We also granted 0.2 million service and performance RSUs ("S&P RSUs") during the 2013 first quarter to certain named executive officers. In addition to generally being subject to pro-rata annual vesting conditioned on continued service consistent with the standard form of RSU, these S&P RSUs are also subject to the satisfaction of a

Table of Contents

performance condition, expressed as an EBITDA goal. RSUs, including S&P RSUs, granted in the 2013 first quarter had a weighted average grant-date fair value of \$37.

SARs and Stock Options

We granted 0.7 million SARs and 0.1 million stock options to officers and key employees during the 2013 first quarter. These SARs and options generally expire ten years after the grant date and both vest and may be exercised in cumulative installments of one quarter at the end of each of the first four years following the grant date. The weighted average grant-date fair value of SARs granted in the 2013 first quarter was \$13 and the weighted average exercise price was \$39. The weighted average grant-date fair value of stock options granted in the 2013 first quarter was \$13 and the weighted average exercise price was \$39.

On the grant date, we use a binomial lattice-based valuation model to estimate the fair value of each SAR and option granted. This valuation model uses a range of possible stock price outcomes over the term of the SAR and option, discounted back to a present value using a risk-free rate. Because of the limitations with closed-form valuation models, such as the Black-Scholes model, we have determined that this more flexible binomial model provides a better estimate of the fair value of our options and SARs because it takes into account employee exercise behavior based on changes in the price of our stock and also allows us to use other dynamic assumptions.

We used the following assumptions to determine the fair value of the SARs and stock options we granted to employees during the 2013 first quarter:

Expected volatility	31	%
Dividend yield	1.17	%
Risk-free rate	1.8	%
Expected term (in years)	8	

In making these assumptions, we base expected volatility on the historical movement of Marriott's stock price. We base risk-free rates on the corresponding U.S. Treasury spot rates for the expected duration at the date of grant, which we convert to a continuously compounded rate. The dividend yield assumption takes into consideration both historical levels and expectations of future payout. The weighted average expected terms for SARs and options are an output of our valuation model which utilizes historical data in estimating the period of time that the SARs and options are expected to remain unexercised. We calculate the expected terms for SARs and options for separate groups of retirement eligible and non-retirement eligible employees. Our valuation model also uses historical data to estimate exercise behaviors, which includes determining the likelihood that employees will exercise their SARs and options before expiration at a certain multiple of stock price to exercise price.

Other Information

As of the end of the 2013 first quarter, we had reserved 36 million shares under the Stock Plan, including 14 million shares under the Stock Option Program and the SAR Program.

Table of Contents

5. Fair Value of Financial Instruments

We believe that the fair values of our current assets and current liabilities approximate their reported carrying amounts. We show the carrying values and the fair values of noncurrent financial assets and liabilities that qualify as financial instruments, determined under current guidance for disclosures on the fair value of financial instruments, in the following table:

(\$ in millions)	At March 31, 2013		At December 28, 2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Senior, mezzanine, and other loans	\$170	\$171	\$180	\$172
Marketable securities	57	57	56	56
Total long-term financial assets	\$227	\$228	\$236	\$228
Senior Notes	\$(1,835)	\$(1,999)	\$(1,833)	\$(2,008)
Commercial paper	(1,238)	(1,238)	(501)	(501)
Other long-term debt	(128)	(138)	(130)	(139)
Other long-term liabilities	(61)	(61)	(69)	(69)
Total long-term financial liabilities	\$(3,262)	\$(3,436)	\$(2,533)	\$(2,717)

We estimate the fair value of our senior, mezzanine, and other loans, including the current portion, by discounting cash flows using risk-adjusted rates, both of which are Level 3 inputs.

We are required to carry our marketable securities at fair value. We value these securities using directly observable Level 1 inputs. The carrying value of our marketable securities at the end of our 2013 first quarter was \$57 million, which included debt securities of the U.S. Government, its sponsored agencies and other U.S. corporations invested for our self-insurance programs as well as shares of a publicly traded company.

We estimate the fair value of our other long-term debt, including the current portion and excluding leases, using expected future payments discounted at risk-adjusted rates, both of which are Level 3 inputs. We determine the fair value of our senior notes using quoted market prices, which are directly observable Level 1 inputs. As noted in Footnote No. 9, "Long-term Debt," even though our commercial paper borrowings generally have short-term maturities of 30 days or less, we classify outstanding commercial paper borrowings as long-term based on our ability and intent to refinance them on a long-term basis. As we are a frequent issuer of commercial paper, we use pricing from recent transactions as Level 2 inputs in estimating fair value. At the end of the 2013 first quarter and year-end 2012, we determined that the carrying value of our commercial paper approximated its fair value due to the short maturity. Our other long-term liabilities largely consist of guarantee costs. As noted in Footnote No. 11, "Contingencies," we measure our liability for guarantees at fair value on a nonrecurring basis, that is when we issue or modify a guarantee, using Level 3 internally developed inputs. At the end of the 2013 first quarter and year-end 2012, we determined that the carrying values of our guarantee costs approximated their fair values based on Level 3 inputs. See the "Fair Value Measurements" caption of Footnote No. 1, "Summary of Significant Accounting Policies" of our 2012 Form 10-K for more information on the input levels we use in determining fair value.

Table of Contents

6. Earnings Per Share

The table below illustrates the reconciliation of the earnings and number of shares used in our calculations of basic and diluted earnings per share:

	93 Days Ended March 31, 2013	84 Days Ended March 23, 2012
(in millions, except per share amounts)		
Computation of Basic Earnings Per Share		
Net income	\$ 136	\$ 104
Weighted average shares outstanding	311.8	333.7
Basic earnings per share	\$0.44	\$0.31
Computation of Diluted Earnings Per Share		
Net income	\$ 136	\$ 104
Weighted average shares outstanding	311.8	333.7
Effect of dilutive securities		
Employee stock option and SARs plans	4.3	6.8
Deferred stock incentive plans	0.8	0.9
Restricted stock units	3.1	3.2
Shares for diluted earnings per share	320.0	344.6
Diluted earnings per share	\$0.43	\$0.30

We compute the effect of dilutive securities using the treasury stock method and average market prices during the period. We determine dilution based on earnings.

Pursuant to the applicable accounting guidance for calculating earnings per share, we have not included the following stock options and SARs in our calculation of diluted earnings per share because the exercise prices were greater than the average market prices for the applicable periods:

- (a) for the 2013 first quarter, 0.4 million options and SARs; and
- (b) for the 2012 first quarter, 1.0 million options and SARs.

7. Property and Equipment

The following table shows the composition of our property and equipment balances at the end of the 2013 first quarter and year-end 2012:

(\$ in millions)	At Period End	
	March 31, 2013	December 28, 2012
Land	\$587	\$590
Buildings and leasehold improvements	696	703
Furniture and equipment	861	854
Construction in progress	428	383
	2,572	2,530
Accumulated depreciation	(998) (991
	\$ 1,574	\$ 1,539

Table of Contents

The following table shows the composition of these property and equipment balances that we recorded as capital leases:

(\$ in millions)	At Period End	
	March 31, 2013	December 28, 2012
Land	\$29	\$30
Buildings and leasehold improvements	141	143
Furniture and equipment	38	38
Construction in progress	5	4
	213	215
Accumulated depreciation	(84) (82
	\$129	\$133

8. Notes Receivable

The following table shows the composition of our notes receivable balances (net of reserves and unamortized discounts) at the end of the 2013 first quarter and year-end 2012:

(\$ in millions)	At Period End	
	March 31, 2013	December 28, 2012
Senior, mezzanine, and other loans	\$223	\$242
Less current portion	(53) (62
	\$170	\$180

The following table shows the expected future principal payments (net of reserves and unamortized discounts) as well as interest rates for our notes receivable as of the end of the 2013 first quarter:

Notes Receivable Principal Payments (net of reserves and unamortized discounts) and Interest Rates (\$ in millions)	Amount	
2013	\$44	
2014	52	
2015	66	
2016	1	
2017	—	
Thereafter	60	
Balance at March 31, 2013	\$223	
Weighted average interest rate at March 31, 2013	5.0	%
Range of stated interest rates at March 31, 2013	0 to 12.7%	

The following table shows the unamortized discounts for our notes receivable at the end of the 2013 first quarter and year-end 2012:

Notes Receivable Unamortized Discounts (\$ in millions)	Total
Balance at year-end 2012	\$11
Balance at March 31, 2013	\$12

Table of Contents

At the end of the 2013 first quarter, our recorded investment in impaired “Senior, mezzanine, and other loans” was \$96 million, and we had an \$81 million notes receivable reserve representing an allowance for credit losses, leaving \$15 million of our investment in impaired loans, for which we had no related allowance for credit losses. At year-end 2012, our recorded investment in impaired “Senior, mezzanine, and other loans” was \$93 million, and we had a \$79 million notes receivable reserve representing an allowance for credit losses, leaving \$14 million of our investment in impaired loans, for which we had no related allowance for credit losses. Our average investment in impaired “Senior, mezzanine, and other loans” totaled \$94 million for both the 2013 first quarter and 2012 first quarter. The following table summarizes the activity related to our “Senior, mezzanine, and other loans” notes receivable reserve for the 2013 first quarter:

(\$ in millions)	Notes Receivable Reserve
Balance at year-end 2012	\$79
Transfers and other	2
Balance at March 31, 2013	\$81

Past due senior, mezzanine, and other loans totaled \$7 million at the end of the 2013 first quarter.

9. Long-term Debt

We provide detail on our long-term debt balances in the following table as of the end of the 2013 first quarter and year-end 2012:

(\$ in millions)	At Period End	
	March 31, 2013	December 28, 2012
Senior Notes:		
Series G, interest rate of 5.810%, face amount of \$316, maturing November 10, 2015 (effective interest rate of 6.58%) ⁽¹⁾	\$310	\$309

All of our long-term debt was, and to the extent currently outstanding is, recourse to us but unsecured. Other debt in the preceding table includes capital leases, among other items.

Table of Contents

In the 2013 first quarter, we made a \$411 million cash payment of principal and interest to retire, at maturity, all of our outstanding Series J Notes.

We are party to a multicurrency revolving credit agreement (the "Credit Facility") that provides for \$1,750 million of aggregate borrowings to support general corporate needs, including working capital, capital expenditures, and letters of credit. The Credit Facility expires on June 23, 2016. The availability of the Credit Facility also supports our commercial paper program. Borrowings under the Credit Facility bear interest at LIBOR (the London Interbank Offered Rate) plus a spread, based on our public debt rating. We also pay quarterly fees on the Credit Facility at a rate also based on our public debt rating. While any outstanding commercial paper borrowings and/or borrowings under our Credit Facility generally have short-term maturities, we classify the outstanding borrowings as long-term based on our ability and intent to refinance the outstanding borrowings on a long-term basis.

We show future principal payments for our debt as of the end of the 2013 first quarter in the following table :

Debt Principal Payments (\$ in millions)	Amount
2013	\$48
2014	7
2015	317
2016	1,535
2017	300
Thereafter	1,048
Balance at March 31, 2013	\$3,255

We paid cash for interest, net of amounts capitalized, of \$21 million in the 2013 first quarter and \$10 million in the 2012 first quarter.

10. Comprehensive Income and Capital Structure

The following table details the changes in common shares outstanding and shareholders' deficit for the 2013 first quarter:

(in millions, except per share amounts)

Common Shares Outstanding	Total	Class A Common Stock	Additional Paid-in-Capital	Retained Earnings	Treasury Stock, at Cost	Accumulated Other Comprehensive Loss	
310.9	Balance at year-end 2012	\$(1,285)	\$5	\$2,585	\$3,509	\$(7,340)	\$(44)
—	Net income	136	—	—	136	—	—
—	Other comprehensive loss	(2)	—	—	—	—	(2)
—	Cash dividends (\$0.1300 per share)	(41)	—	—	(41)	—	—
3.8	Employee stock plan issuance	27	—	(43)	(55)	125	—
(5.4)	Purchase of treasury stock	(212)	—	—	—	(212)	—
309.3	Balance at March 31, 2013	\$(1,377)	\$5	\$2,542	\$3,549	\$(7,427)	\$(46)

Table of Contents

The following table details the accumulated other comprehensive income (loss) activity for the 2013 first quarter:

(\$ in millions)	Foreign Currency Translation Adjustments	Other Derivative Instrument Adjustments	Unrealized Gains on Available-For-Sale Securities	Accumulated Other Comprehensive Loss
Balance at year-end 2012	\$ (32) \$ (19) \$ 7	\$ (44
Other comprehensive income (loss) before reclassifications ⁽¹⁾	(13) 7	4	(2
Amounts reclassified from accumulated other comprehensive loss	—	—	—	—
Net other comprehensive income (loss)	(13) 7	4	(2
Balance at March 31, 2013	\$ (45) \$ (12) \$ 11	\$ (46

We present the portions of other comprehensive income (loss) before reclassifications that relate to other derivative ⁽¹⁾ instrument adjustments net of \$1 million of deferred taxes and the portions that relate to unrealized gains on available-for-sale securities net of \$3 million of deferred taxes.

11. Contingencies

Guarantees

We issue guarantees to certain lenders and hotel owners, chiefly to obtain long-term management contracts. The guarantees generally have a stated maximum funding amount and a term of four to ten years. The terms of guarantees to lenders generally require us to fund if cash flows from hotel operations are inadequate to cover annual debt service or to repay the loan at the end of the term. The terms of the guarantees to hotel owners generally require us to fund if the hotels do not attain specified levels of operating profit. Guarantee fundings to lenders and hotel owners are generally recoverable as loans repayable to us out of future hotel cash flows and/or proceeds from the sale of hotels. We also enter into project completion guarantees with certain lenders in conjunction with hotels that we or our joint venture partners are building.

We measure and record our liability for the fair value of a guarantee on a nonrecurring basis, that is when we issue or modify a guarantee, using Level 3 internally developed inputs. We generally base our calculation of the estimated fair value of a guarantee on the income approach or the market approach, depending on the type of guarantee. For the income approach, we use internally developed discounted cash flow and Monte Carlo simulation models that include the following assumptions, among others: projections of revenues and expenses and related cash flows based on assumed growth rates and demand trends; historical volatility of projected performance; the guaranteed obligations; and applicable discount rates. We base these assumptions on our historical data and experience, industry projections, micro and macro general economic condition projections, and our expectations. For the market approach, we use internal analyses based primarily on market comparable data and our assumptions about market capitalization rates, credit spreads, growth rates, and inflation. We show the maximum potential amount of our future guarantee fundings and the carrying amount of our liability for guarantees for which we are the primary obligor at March 31, 2013 in the following table:

(\$ in millions)	Maximum Potential Amount of Future Fundings	Liability for Guarantees
Guarantee Type		
Debt service	\$ 88	\$ 7
Operating profit	106	51
Other	15	2
Total guarantees where we are the primary obligor	\$ 209	\$ 60

Table of Contents

We included our liability at March 31, 2013 for guarantees for which we are the primary obligor in our Balance Sheet as follows: \$5 million in the "Other current liabilities" and \$55 million in the "Other long-term liabilities."

Our guarantees listed in the preceding table include \$34 million of debt service guarantees that will not be in effect until the underlying properties open and we begin to operate the properties or certain other events occur.

The preceding table does not include the following guarantees:

\$114 million of guarantees for Senior Living Services lease obligations of \$84 million (expiring in 2018) and lifecare bonds of \$30 million (estimated to expire in 2016), for which we are secondarily liable. Sunrise Senior Living, Inc. ("Sunrise") is the primary obligor on both the leases and \$5 million of the lifecare bonds; Health Care Property Investors, Inc., as successor by merger to CNL Retirement Properties, Inc. ("CNL"), is the primary obligor on \$24 million of the lifecare bonds, and Five Star Senior Living is the primary obligor on the remaining \$1 million of lifecare bonds. Before we sold the Senior Living Services business in 2003, these were our guarantees of obligations of our then consolidated Senior Living Services subsidiaries. Sunrise and CNL have indemnified us for any fundings we may be called upon to make under these guarantees. Our liability for these guarantees had a carrying value of \$3 million at March 31, 2013. In 2011 Sunrise provided us \$3 million cash collateral to cover potential exposure under the existing lease and bond obligations for 2012 and 2013. In conjunction with our consent of the extension in 2011 of certain lease obligations for an additional five-year term until 2018, Sunrise provided us an additional \$1 million cash collateral and an \$85 million letter of credit issued by Key Bank to secure our exposure under the lease guarantees for the continuing leases during the extension term and certain other obligations of Sunrise. During the extension term, Sunrise agreed to make an annual payment to us from the cash flow of the continuing lease facilities, subject to a \$1 million annual minimum. In the 2013 first quarter, Sunrise merged with Health Care REIT, Inc., and Sunrise's management business was acquired by an entity formed by affiliates of Kohlberg Kravis Roberts & Co. LP, Beecken Petty O'Keefe & Co., Coastwood Senior Housing Partners LLC, and Health Care REIT. In conjunction with this acquisition, Sunrise funded an additional \$2 million cash collateral and certified that the \$85 million letter of credit remains in full force and effect.

Lease obligations, for which we became secondarily liable when we acquired the Renaissance Hotel Group N.V. in 1997, consisting of annual rent payments of approximately \$6 million and total remaining rent payments through the initial term of approximately \$37 million. Most of these obligations expire by the end of 2020. CTF Holdings Ltd. ("CTF") had originally provided €35 million in cash collateral in the event that we are required to fund under such guarantees, approximately \$5 million (€4 million) of which remained at March 31, 2013. Our exposure for the remaining rent payments through the initial term will decline to the extent that CTF obtains releases from the landlords or these hotels exit the system. Since the time we assumed these guarantees, we have not funded any amounts, and we do not expect to fund any amounts under these guarantees in the future.

Certain guarantees and commitments relating to the timeshare business, which were outstanding at the time of the 2011 Timeshare spin-off and for which we became secondarily liable as part of the spin-off. These Marriott Vacations Worldwide Corporation ("MVW") payment obligations, for which we currently have a total exposure of \$27 million, relate to a project completion guarantee, various letters of credit, and several guarantees. MVW has indemnified us for these obligations. Most of the obligations expire in 2013 and 2014, except for one guarantee in the amount of \$16 million (20 million Singapore Dollars) that expires in 2022. We have not funded any amounts under these obligations, and do not expect to do so in the future. Our liability for these obligations had a carrying value of \$2 million at March 31, 2013.

A guarantee for a lease, originally entered into in 2000, for which we became secondarily liable in 2012 as a result of our sale of the ExecuStay corporate housing business to Oakwood. Oakwood has indemnified us for the obligations under this guarantee. Our total exposure at the end of the 2013 first quarter for this guarantee is \$11 million in future rent payments if the lease is terminated through 2013 and will be reduced

Table of Contents

to \$6 million if the lease is terminated from 2014 through the end of the lease in 2019. Our liability for this guarantee had a carrying value of \$1 million at March 31, 2013.

In addition to the guarantees described in the preceding paragraphs, in conjunction with financing obtained for specific projects or properties owned by joint ventures in which we are a party, we may provide industry standard indemnifications to the lender for loss, liability, or damage occurring as a result of the actions of the other joint venture owner or our own actions.

Commitments and Letters of Credit

In addition to the guarantees we note in the preceding paragraphs, as of March 31, 2013, we had the following commitments outstanding:

A commitment to invest up to \$12 million of equity for a noncontrolling interest in a partnership that plans to purchase North American full-service and limited-service properties, or purchase or develop hotel-anchored mixed-use real estate projects. We expect to fund \$10 million of this commitment as follows: \$3 million in 2013, \$6 million in 2014, and \$1 million in 2015. We do not expect to fund the remaining \$2 million of this commitment.

A commitment to invest up to \$23 million of equity for noncontrolling interests in partnerships that plan to purchase or develop limited-service properties in Asia. We expect to fund \$20 million of this commitment as follows: \$7 million in 2013, \$10 million in 2014, and \$3 million in 2015. We do not expect to fund the remaining \$3 million of this commitment.

A commitment, with no expiration date, to invest up to \$11 million in a joint venture for development of a new property that we expect to fund in 2013.

A commitment to invest \$20 million in the renovation of a leased hotel. We expect to fund this commitment by the end of 2015.

We have a right and under certain circumstances an obligation to acquire our joint venture partner's remaining 45 percent interest in two joint ventures over the next eight years at a price based on the performance of the ventures. We made a \$12 million (€9 million) deposit in conjunction with this contingent obligation in 2011, \$8 million (€6 million) in deposits in 2012, and in the 2013 first quarter we acquired an additional five percent noncontrolling interest of each venture, applying \$5 million (€4 million) of those deposits. The remaining deposits are refundable to the extent we do not acquire our joint venture partner's remaining interests.

We have a right and under certain circumstances an obligation during the next two years to acquire the landlord's interest in the real estate property and attached assets of a hotel that we lease for approximately \$42 million (€33 million), which we record as part of our capital lease liability.

Various commitments for the purchase of information technology hardware, software, and maintenance services in the normal course of business totaling \$82 million. We expect to fund these commitments as follows: \$70 million in 2013, \$7 million in 2014, and \$5 million in 2015.

Several commitments aggregating \$33 million with no expiration date and which we do not expect to fund.

At March 31, 2013, we had \$68 million of letters of credit outstanding (\$67 million outside the Credit Facility and \$1 million under our Credit Facility), the majority of which were for our self-insurance programs. Surety bonds issued as of March 31, 2013, totaled \$125 million, the majority of which federal, state and local governments requested in connection with our self-insurance programs.

Legal Proceedings

On January 19, 2010, several former Marriott employees (the "plaintiffs") filed a putative class action complaint against us and the Stock Plan (the "defendants"), alleging that certain equity awards of deferred bonus stock granted to the plaintiffs and other current and former employees for fiscal years 1963 through 1989 are

Table of Contents

subject to vesting requirements under the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), that are in certain circumstances more rapid than those set forth in the awards, various other purported ERISA violations, and various breaches of contract in connection with the awards. The plaintiffs seek damages, class attorneys' fees and interest, with no amounts specified. The action is proceeding in the United States District Court for the District of Maryland (Greenbelt Division) and Dennis Walter Bond Sr. and Michael P. Steigman are the current named plaintiffs. The parties completed limited discovery concerning the issues of statute of limitations and class certification. We filed a motion for summary judgment on the issue of statute of limitations in December 2012, and a hearing on both issues is scheduled for June 7, 2013. We and the Stock Plan have denied all liability, and while we intend to vigorously defend against the claims being made by the plaintiffs, we can give you no assurance about the outcome of this lawsuit. We currently cannot estimate the range of any possible loss to the Company because an amount of damages is not claimed, there is uncertainty as to whether a class will be certified and if so as to the size of the class, and the possibility of our prevailing on our statute of limitations defense may significantly limit any claims for damages.

In March 2012, the Korea Fair Trade Commission ("KFTC") obtained documents from two of our managed hotels in Seoul, Korea in connection with an investigation which we believe is focused on pricing of hotel services within the Seoul region. Since then, the KFTC has conducted additional fact-gathering at those two hotels and also has collected information from another Marriott managed hotel located in Seoul. We understand that the KFTC also has sought documents from numerous other hotels in Seoul and other parts of Korea that we do not operate, own or franchise. We have not yet received a complaint or other legal process. We are cooperating with this investigation.

12. Business Segments

We are a diversified lodging company with operations in four business segments:

North American Full-Service Lodging, which includes the Marriott Hotels & Resorts, Marriott Conference Centers, JW Marriott, Renaissance Hotels, Renaissance ClubSport, Gaylord Hotels and Autograph Collection properties located in the United States and Canada;

North American Limited-Service Lodging, which includes the Courtyard, Fairfield Inn & Suites, SpringHill Suites, Residence Inn, and TownePlace Suites properties located in the United States and Canada, and, before its sale in the 2012 second quarter, our Marriott ExecuStay corporate housing business;

International Lodging, which includes the Marriott Hotels & Resorts, JW Marriott, Renaissance Hotels, Autograph Collection, Courtyard, AC Hotels by Marriott, Fairfield Inn & Suites, Residence Inn, and Marriott Executive Apartments properties located outside the United States and Canada; and

Luxury Lodging, which includes The Ritz-Carlton, Bulgari Hotels & Resorts, and EDITION properties worldwide (together with residential properties associated with some The Ritz-Carlton hotels).

We evaluate the performance of our segments based largely on the results of the segment without allocating corporate expenses, income taxes, or indirect general, administrative, and other expenses. We allocate gains and losses, equity in earnings or losses from our joint ventures, and divisional general, administrative, and other expenses to each of our segments. "Other unallocated corporate" represents that portion of our revenues, general, administrative, and other expenses, equity in earnings or losses, and other gains or losses that we do not allocate to our segments. "Other unallocated corporate" includes license fees we receive from our credit card programs and license fees from MVW. We aggregate the brands presented within our segments considering their similar economic characteristics, types of customers, distribution channels, the regulatory business environments and operations within each segment and our organizational and management reporting structure.

Table of Contents

13. Variable Interest Entities

Under the applicable accounting guidance for the consolidation of variable interest entities, we analyze our variable interests, including loans, guarantees, and equity investments, to determine if an entity in which we have a variable interest is a variable interest entity. Our analysis includes both quantitative and qualitative reviews. We base our quantitative analysis on the forecasted cash flows of the entity, and our qualitative analysis on our review of the design of the entity, its organizational structure including decision-making ability, and relevant financial agreements. We also use our qualitative analysis to determine if we must consolidate a variable interest entity as its primary beneficiary.

In conjunction with the transaction with CTF that we describe more fully in our Annual Report on Form 10-K for 2007 in Footnote No. 8, "Acquisitions and Dispositions," under the caption "2005 Acquisitions," we manage hotels on behalf of tenant entities that are 100 percent owned by CTF, which lease the hotels from third-party owners. Due to certain provisions in the management agreements, we account for these contracts as operating leases. At March 31, 2013, we managed five hotels on behalf of three tenant entities. The entities have minimal equity and minimal assets, consisting of hotel working capital and furniture, fixtures, and equipment. As part of the 2005 transaction, CTF placed money in a trust account to cover cash flow shortfalls and to meet rent payments. In turn, we released CTF from its guarantees fully for three of these properties and partially for the other two properties. The trust account was fully depleted prior to year-end 2011. The tenant entities are variable interest entities because the holder of the equity investment at risk, CTF, lacks the ability through voting rights to make key decisions about the entities' activities that have a significant effect on the success of the entities. We do not consolidate the entities because we do not have: (1) the power to direct the activities that most significantly impact the entities' economic performance or (2) the obligation to absorb losses of the entities or the right to receive benefits from the entities that could potentially be significant. We are liable for rent payments for three of the five hotels if there are cash flow shortfalls. Future minimum lease payments through the end of the lease term for these hotels totaled approximately \$10 million at the end of the 2013 first quarter. In addition, as of the end of the 2013 first quarter we are liable for rent payments of up to an aggregate cap of \$5 million for the two other hotels if there are cash flow shortfalls. Our maximum exposure to loss is limited to the rent payments and certain other tenant obligations under the lease, for which we are secondarily liable.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

We make forward-looking statements in Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere in this report based on the beliefs and assumptions of our management and on information currently available to us. Forward-looking statements include information about our possible or assumed future results of operations, which follow under the headings "Business and Overview," "Liquidity and Capital Resources," and other statements throughout this report preceded by, followed by or that include the words "believes," "expects," "anticipates," "intends," "plans," "estimates" or similar expressions.

Any number of risks and uncertainties could cause actual results to differ materially from those we express in our forward-looking statements, including the risks and uncertainties we describe below and other factors we describe from time to time in our periodic filings with the U.S. Securities and Exchange Commission (the "SEC"). We therefore caution you not to rely unduly on any forward-looking statement. The forward-looking statements in this report speak only as of the date of this report, and we undertake no obligation to update or revise any forward-looking statement, whether as a result of new information, future developments, or otherwise.

In addition, see the "Item 1A. Risk Factors" caption in the "Part II-OTHER INFORMATION" section of this report.

BUSINESS AND OVERVIEW

Change in Reporting Cycle

As further detailed in Footnote No. 1 "Basis of Presentation," beginning with our 2013 fiscal year, we changed our financial reporting cycle to a calendar year-end reporting cycle and an end-of-month quarterly reporting cycle.

Accordingly, our 2013 fiscal year began on December 29, 2012 (the day after the end of the 2012 fiscal year) and will end on December 31, 2013, and our 2013 first quarter is the period from December 29, 2012 through March 31, 2013 (93 days), while our 2012 first quarter is the period from December 31, 2011 through March 23, 2012 (84 days). As a result, we had nine more days of activity in the 2013 first quarter than we had in the 2012 first quarter, which we estimate resulted in \$37 million of additional combined base management fee, franchise fee, and incentive management fee revenues and \$23 million of additional operating income. We discuss the estimated impacts in more detail in the following sections beginning with "Revenues," to the extent significant.

Lodging Business

We are a worldwide operator, franchisor, and licensor of hotels and timeshare properties in 74 countries and territories under numerous brand names. We also develop, operate, and market residential properties and provide services to home/condominium owner associations. At the end of the 2013 first quarter, we had 3,822 properties (663,163 rooms) in our system, including 37 home and condominium products (4,067 units) for which we manage the related owners' associations.

We earn base management fees and in some cases incentive management fees from the properties that we manage, and we earn franchise fees on the properties that others operate under franchise agreements with us. Base fees typically consist of a percentage of property-level revenue while incentive fees typically consist of a percentage of net house profit adjusted for a specified owner return. Net house profit is calculated as gross operating profit (house profit) less noncontrollable expenses such as insurance, real estate taxes, capital spending reserves, and the like.

We use or license our trademarks for the sale of residential real estate, either in conjunction with hotel development or on a stand-alone basis, under our The Ritz-Carlton, EDITION, JW Marriott, Autograph Collection, and Marriott brand names. Third-party developers typically build and sell residences with little, if any, of our capital at risk. While the worldwide residential market is very large, the luxurious nature of our residential properties, the quality and exclusivity associated with our brands, and the hospitality services that we provide, all serve to make our residential properties distinctive.

Table of Contents

Under our business model, we typically manage or franchise hotels, rather than own them. At March 31, 2013, we operated 43 percent of the hotel rooms in our worldwide system under management agreements, our franchisees operated 54 percent under franchise agreements, unconsolidated joint ventures that we have an interest in held management and provided services to franchised hotels for 1 percent, and we owned or leased only 2 percent. Our emphasis on long-term management contracts and franchising tends to provide more stable earnings in periods of economic softness, while adding new hotels to our system generates growth, typically with little or no investment by the company. This strategy has driven substantial growth while minimizing financial leverage and risk in a cyclical industry. In addition, we believe minimizing our capital investments and adopting a strategy of recycling the investments that we do make maximizes and maintains our financial flexibility.

We remain focused on doing the things that we do well; that is, selling rooms, taking care of our guests, and making sure we control costs both at company-operated properties and at the corporate level ("above-property"). Our brands remain strong as a result of skilled management teams, dedicated associates, superior customer service with an emphasis on guest and associate satisfaction, significant distribution, our Marriott Rewards and The Ritz-Carlton Rewards loyalty programs, a multichannel reservations system, and desirable property amenities. We strive to effectively leverage our size and broad distribution.

We, along with owners and franchisees, continue to invest in our brands by means of new, refreshed, and reinvented properties, new room and public space designs, and enhanced amenities and technology offerings. We address, through various means, hotels in the system that do not meet standards. We continue to enhance the appeal of our proprietary, information-rich, and easy-to-use website, Marriott.com, and of our associated mobile smartphone applications and mobile website that connect to Marriott.com, through functionality and service improvements, and we expect to continue capturing an increasing proportion of property-level reservations via this cost-efficient channel. Our profitability, as well as that of owners and franchisees, has benefited from our approach to property-level and above-property productivity. Properties in our system continue to maintain very tight cost controls. We also control above-property costs, some of which we allocate to hotels, by remaining focused on systems, processing, and support areas.

Lodging Performance Measures

We believe Revenue per Available Room ("RevPAR"), which we calculate by dividing room sales for comparable properties by room nights available to guests for the period, is a meaningful indicator of our performance because it measures the period-over-period change in room revenues for comparable properties. RevPAR may not be comparable to similarly titled measures, such as revenues. References to RevPAR statistics, including occupancy and average daily rate, throughout this report are in constant dollars, unless otherwise noted, and reflect the three calendar months ended March 31, 2013 or March 31, 2012, as applicable. We calculate constant dollar statistics by applying exchange rates for the current period to the prior comparable period.

Lodging Results

Conditions for our lodging business continued to improve in the first quarter of 2013, and comparable worldwide systemwide average daily rates for the three months ended March 31, 2013 increased 3.8 percent on a constant dollar basis to \$144.50, RevPAR increased 4.6 percent to \$97.48, and occupancy increased 0.6 percentage points to 67.5 percent, as compared to the same period a year ago. The improvement in the lodging business reflected generally low supply growth, a favorable economic climate in many markets around the world, improved pricing in most markets, and a year-over-year increase in the number of properties in our system. Demand was particularly strong at luxury properties, followed by full-service properties and limited-service properties. However, uncertainty in the United States, particularly associated with government austerity and its impact on the overall economy, had a dampening effect on short-term corporate group customer demand. Government and government-related demand was constrained due to government spending restrictions, including in Washington D.C. and the surrounding areas. For full year 2012, we estimate that government and government-related business made up 5 percent of room nights across our North American system.

Table of Contents

Transient demand was strong in most North American markets, as we continued to eliminate discounts, pushed business into higher rated price categories, and raised room prices. Our markets in Florida, New York, California, and Texas experienced particularly strong RevPAR increases. Resort demand was very strong, including at ski resorts, Florida destinations, and resorts in the Caribbean and Mexico. In Europe, many economies continue to struggle, demand remained weak in markets more dependent on regional travel, and new supply constrained RevPAR growth in a few markets. Gateway cities in Europe, particularly London, also experienced less robust demand in the 2013 first quarter than in recent quarters. Demand was strong in the United Arab Emirates and Qatar, but remained weak in Egypt, although improving, and Jordan. Demand in the Asia Pacific region continued to moderate, and RevPAR in Greater China was flat in the 2013 first quarter, compared to the year-ago quarter, reflecting declines in government related travel due to the country's recent change in leadership, moderating economic growth, and new supply in several markets. Thailand and Indonesia had strong demand and RevPAR in the 2013 first quarter.

We monitor market conditions and carefully price our rooms daily in accordance with individual property demand levels, generally increasing room rates as demand increases. We also modify the mix of our business to increase revenue as demand changes. Demand for higher rated rooms improved in most markets in the first quarter of 2013, which allowed us to reduce discounting and special offers for transient business in many markets. This mix improvement benefited average daily rates. For our company-operated properties, we continue to focus on enhancing property-level house profit margins and actively pursue productivity improvements.

The properties in our system serve both transient and group customers. Business transient and leisure transient demand were very strong in the first quarter of 2013. For group business, two-thirds is typically booked before the year of arrival and one-third is booked in the year of arrival. Also, during an economic recovery, group pricing tends to lag transient pricing due to the significant lead times for group bookings. In the 2013 first quarter, the year-over-year timing of Easter reduced the number of days available for group business. In addition, in-the-quarter for-the-quarter group demand was weaker than in recent quarters, attendance was below meeting planner expectations for some government or government-related group events that took place, and we also saw a decline in new bookings for group stays later in 2013. This weakness in short-term group demand was largely related to weak corporate business customer demand and to a lesser extent government customers. Association group business for company-operated Marriott Hotels and Resorts brand properties was very strong in the 2013 first quarter. While the short-term group demand shortfalls were somewhat mitigated by strong transient demand and occupancy rates in most areas of the United States are at very high levels, property-level food and beverage revenues declined as compared to the year-ago quarter because transient customers typically spend less on food and beverage and because groups were more conservative with their food and beverage expenditures.

Group booking pace for company-operated Marriott Hotels and Resorts brand properties in North America for the remainder of 2013 is up 4 percent as compared to full-year pace up 6 percent one quarter ago for the 2013 full year, reflecting somewhat more cautious short-term corporate group demand. At the same time, our 2014 group booking pace has improved dramatically, now up 5 percent compared to a 4 percent decline a year ago, reflecting strong long-term group demand and correspondingly less availability.

Lodging System Growth and Pipeline

During the first quarter of 2013, we added 5,257 rooms (gross) to our system. Approximately 57 percent of new rooms are located outside the United States and 22 percent of the room additions are conversions from competitor brands. At the end of the 2013 first quarter, we have over 135,000 rooms in our lodging development pipeline. For the 2013 full year, we expect to add approximately 30,000 to 35,000 rooms (gross) to our system. We expect approximately 10,000 rooms to exit the system during the 2013 full year, largely due to financial and quality issues. The figures in this paragraph do not include residential and timeshare units.

Table of Contents

CONSOLIDATED RESULTS

The following discussion presents an analysis of the significant items of the results of our operations for the 2013 first quarter (93 days ended March 31, 2013), compared to the 2012 first quarter (84 days ended March 23, 2012).

Revenues

Revenues increased by \$590 million (23 percent) to \$3,142 million in the 2013 first quarter from \$2,552 million in the 2012 first quarter as a result of: higher cost reimbursements revenue (\$513 million), higher base management fees (\$29 million), higher franchise fees (\$25 million), higher incentive management fees (\$16 million (comprised of a \$12 million increase for North America and a \$4 million increase outside of North America)), and higher owned, leased, and other revenue (\$7 million). We estimate that the \$590 million increase in revenues included \$37 million of combined base management fee, franchise fee, and incentive management fee revenues due to the additional nine days of activity in the 2013 first quarter compared to the 2012 first quarter.

Cost reimbursements revenue represents reimbursements of costs incurred on behalf of managed, franchised, and licensed properties and relates, predominantly, to payroll costs at managed properties where we are the employer, but also includes reimbursements for other costs, such as those associated with our Marriott Rewards and Ritz-Carlton Rewards programs. As we record cost reimbursements based upon costs incurred with no added markup, this revenue and related expense has no impact on either our operating income or net income. The \$513 million increase in total cost reimbursements revenue, to \$2,548 million in the 2013 first quarter from \$2,035 million in the 2012 first quarter, reflected the impact of higher property-level demand and growth across the system. Since the end of the 2012 first quarter, our managed rooms increased by 8,582 rooms and our franchised rooms increased by 10,780 rooms, net of hotels exiting the system.

The \$29 million increase in total base management fees, to \$153 million in the 2013 first quarter from \$124 million in the 2012 first quarter, mainly reflected the additional nine days of activity in the 2013 first quarter (approximately \$15 million), stronger RevPAR due to increased demand (\$5 million), the impact of unit growth across the system (\$5 million), which included the Gaylord brand properties we began managing in the 2012 fourth quarter, and a favorable variance from fee reversals in the 2012 first quarter to reflect contract revisions (\$3 million). The \$25 million increase in total franchise fees, to \$151 million in the 2013 first quarter from \$126 million in the 2012 first quarter, primarily reflected the additional nine days of activity in the 2013 first quarter (approximately \$16 million), stronger RevPAR due to increased demand (\$4 million), and the impact of unit growth across the system (\$3 million). The \$16 million increase in incentive management fees from \$50 million in the first quarter of 2012 to \$66 million in the first quarter of 2013 largely reflected higher net property-level revenue, particularly for full-service hotels in North America, which resulted in higher property-level income and margins (\$10 million) and fees for the additional nine days of activity in the 2013 first quarter (approximately \$6 million).

The \$7 million increase in owned, leased, corporate housing, and other revenue, to \$224 million in the 2013 first quarter, from \$217 million in the 2012 first quarter, predominantly reflected \$9 million of higher branding fees, \$7 million of higher owned and leased revenue due to strong demand and the additional nine days of activity in the 2013 first quarter, \$3 million of higher hotel agreement termination fees, and \$3 million of higher other revenue, partially offset by \$16 million of lower corporate housing revenue due to the sale of the ExecuStay corporate housing business in the 2012 second quarter. Combined branding fees for credit card endorsements and the sale of branded residential real estate by others totaled \$25 million in the 2013 first quarter and \$16 million in the 2012 first quarter.

Table of Contents

Operating Income

Operating income increased by \$51 million to \$226 million in the 2013 first quarter from \$175 million in the 2012 first quarter. The \$51 million increase in operating income reflected a \$29 million increase in base management fees, a \$25 million increase in franchise fees, a \$16 million increase in incentive management fees, and \$14 million of higher owned, leased, corporate housing, and other revenue net of direct expenses, partially offset by a \$33 million increase in general, administrative and other expenses. Approximately \$23 million of the net increase in operating income was due the additional nine days of activity in the 2013 first quarter. We discuss the reasons for the increases in base management fees, franchise fees, and incentive management fees compared to the 2012 first quarter in the preceding “Revenues” section.

The \$14 million (64 percent) increase in owned, leased, corporate housing, and other revenue net of direct expenses was largely attributable to \$9 million of higher branding fees, \$3 million of higher hotel agreement termination fees, and \$3 million of higher other revenue, partially offset by \$3 million of lower owned and leased revenue, net of direct expenses primarily due to weaker results primarily at two International segment leased properties.

General, administrative, and other expenses increased by \$33 million (22 percent) to \$180 million in the 2013 first quarter from \$147 million in the 2012 first quarter. The increase largely reflected approximately \$15 million of expenses related to the additional nine days of activity in the 2013 first quarter, \$6 million of higher compensation and other overhead expenses (including \$2 million associated with a change in estimate for incentive compensation paid in 2013 related to 2012), \$4 million of increased other expenses primarily associated with higher costs in international markets and branding and service initiatives to enhance and grow our brands globally, \$3 million of increased expenses due to unfavorable foreign exchange rates, \$3 million of increased amortization of deferred contract acquisition costs, primarily related to the Gaylord brand and hotel management company acquisition, and an unfavorable variance from a \$2 million guarantee accrual reversal in the 2012 first quarter for a Luxury segment property. The \$33 million increase in total general, administrative, and other expenses included \$18 million that we did not allocate to any of our segments, and \$15 million that we allocated as follows: \$6 million to our International segment, \$5 million to our Luxury segment, \$2 million to our North American Full-Service segment, and \$2 million to our North American Limited-Service segment.

Interest Expense

Interest expense decreased by \$2 million (6 percent) to \$31 million in the 2013 first quarter compared to \$33 million in the 2012 first quarter. This decrease in interest expense principally reflected \$4 million of increased capitalized interest associated with construction projects largely to develop four EDITION hotels.

Income Tax

Our tax provision increased by \$22 million (51 percent) to \$65 million in the 2013 first quarter compared to \$43 million in the 2012 first quarter. The increase over the year-ago quarter, resulted from higher income before income taxes, principally due to increased demand, a higher effective tax rate (32 percent in 2013 and 29 percent in 2012) due to a 2012 tax provision to tax return true-up benefit that did not recur in 2013.

Net Income

Net income increased by \$32 million to \$136 million in the 2013 first quarter from \$104 million in the 2012 first quarter, and diluted earnings per share increased by \$0.13 per share (43 percent) to \$0.43 per share from \$0.30 per share in the 2012 first quarter. As discussed in more detail in the preceding sections beginning with “Revenues” or as shown in the Consolidated Statements of Income, the \$32 million increase in net income compared to the year-ago quarter was due to higher base management fees (\$29 million), higher franchise fees (\$25 million), higher incentive management fees (\$16 million), higher owned, leased, corporate housing, and other revenue net of direct expenses (\$14 million), lower interest expense (\$2 million), higher gains and other income (\$1 million), and lower equity in losses (\$1 million). These increases were partially offset by higher general, administrative, and other expenses (\$33 million), higher income taxes (\$22 million), and lower interest income (\$1 million).

Table of Contents**Earnings Before Interest Expense, Taxes, Depreciation and Amortization (“EBITDA”)**

EBITDA, a financial measure that is not prescribed or authorized by United States generally accepted accounting principles (“GAAP”), reflects earnings excluding the impact of interest expense, provision for income taxes, depreciation and amortization. We believe that EBITDA is a meaningful indicator of operating performance because we use it to measure our ability to service debt, fund capital expenditures, and expand our business. We also use EBITDA, as do analysts, lenders, investors and others, to evaluate companies because it excludes certain items that can vary widely across different industries or among companies within the same industry. For example, interest expense can be dependent on a company’s capital structure, debt levels, and credit ratings. Accordingly, the impact of interest expense on earnings can vary significantly among companies. The tax positions of companies can also vary because of their differing abilities to take advantage of tax benefits and because of the tax policies of the jurisdictions in which they operate. As a result, effective tax rates and provision for income taxes can vary considerably among companies. EBITDA also excludes depreciation and amortization because companies utilize productive assets of different ages and use different methods of both acquiring and depreciating productive assets. These differences can result in considerable variability in the relative costs of productive assets and the depreciation and amortization expense among companies.

EBITDA has limitations and should not be considered in isolation or as a substitute for performance measures calculated under GAAP. This non-GAAP measure excludes certain cash expenses that we are obligated to make. Other companies in our industry may also calculate EBITDA differently than we do or may not calculate it at all, limiting EBITDA's usefulness as a comparative measure.

We show our 2013 first quarter and 2012 first quarter EBITDA calculations and reconcile those measures with Net Income in the following table:

(\$ in millions)	93 Days Ended March 31, 2013	84 Days Ended March 23, 2012
Net Income	\$ 136	\$ 104
Interest expense	31	33
Tax provision	65	43
Depreciation and amortization	37	29
Less: Depreciation reimbursed by third-party owners	(5) (4
Interest expense from unconsolidated joint ventures	1	4
Depreciation and amortization from unconsolidated joint ventures	3	6
EBITDA	\$ 268	\$ 215

BUSINESS SEGMENTS

We are a diversified lodging company with operations in four business segments: North American Full-Service Lodging, North American Limited-Service Lodging, International Lodging, and Luxury Lodging. See Footnote No. 12, “Business Segments,” to our Financial Statements for further information on our segments including how we aggregate our individual brands into each segment and other information about each segment, including revenues and assets, as well as a reconciliation of segment results to net income.

We added 130 properties (28,942 rooms) and 43 properties (9,737 rooms) exited our system since the end of the 2012 first quarter. These figures do not include residential units. During that time we also added 3 residential properties (229 units) and no residential properties exited the system.

See the "CONSOLIDATED RESULTS" caption earlier in this report for additional information.

Total segment financial results increased by \$60 million to \$289 million in the 2013 first quarter from \$229 million in the 2012 first quarter, and total segment revenues increased by \$578 million to \$3,081 million in the 2013 first quarter, a 23 percent increase from revenues of \$2,503 million in the 2012 first quarter.

Table of Contents

The quarter-over-quarter increase in segment revenues of \$578 million was a result of a \$509 million increase in cost reimbursements revenue, a \$29 million increase in base management fees, a \$24 million increase in franchise fees, and a \$16 million increase in incentive management fees. The quarter-over-quarter increase in segment results of \$60 million across our lodging business reflected a \$29 million increase in base management fees, a \$24 million increase in franchise fees, a \$16 million increase in incentive management fees, and a \$6 million increase in owned, leased, corporate housing, and other revenue net of direct expenses, partially offset by an increase of \$15 million in general, administrative, and other expenses. For more information on the variances see the preceding sections beginning with “Revenues.”

In the 2013 first quarter, 33 percent of our managed properties paid incentive management fees to us versus 29 percent in the 2012 first quarter. In addition, in the 2013 first quarter, 52 percent of our incentive fees came from properties outside the United States, versus 61 percent in the 2012 first quarter. In North America, 19 percent of managed properties paid incentive management fees to us in the 2013 first quarter, compared to 14 percent in the 2012 first quarter. Further, in North America, 17 North American Full-Service segment properties, 16 North American Limited-Service segment properties, and 3 Luxury segment properties earned a combined \$6 million in incentive management fees in the 2013 first quarter, but did not earn any incentive management fees in the year ago quarter. See “Statistics” below for detailed information on Systemwide RevPAR and Company-operated RevPAR by segment, region, and brand.

Summary of Properties by Brand

Including residential properties, we added 32 lodging properties (5,257 rooms) during the 2013 first quarter, while 11 properties (2,322 rooms) exited the system, increasing our total properties to 3,822 (663,163 rooms). These figures include 37 home and condominium products (4,067 units), for which we manage the related owners’ associations. Unless otherwise indicated, our references to Marriott Hotels & Resorts throughout this report include JW Marriott and Marriott Conference Centers, references to Renaissance Hotels include Renaissance ClubSport, and references to Fairfield Inn & Suites include Fairfield Inn.

Table of Contents

The following tables show occupancy, average daily rate, and RevPAR for comparable properties, for each of the brands in our North American Full-Service and North American Limited-Service segments, for our International segment by region, and our Luxury segment. Systemwide statistics include data from our franchised properties, in addition to our owned, leased, and managed properties.

Reporting periods and currency. The RevPAR statistics, including occupancy and average daily rate, we use throughout this report reflect the three calendar months ended March 31, 2013 or March 31, 2012, as applicable. For the properties located in countries that use currencies other than the U.S. dollar, the comparisons to the prior year period are on a constant U.S. dollar basis.

Table of Contents

North American Full-Service Lodging includes Marriott Hotels & Resorts, JW Marriott, Renaissance Hotels, Gaylord Hotels, and Autograph Collection.

(\$ in millions)	93 Days Ended March 31, 2013	84 Days Ended March 23, 2012	Change 2013/2012	
Segment revenues	\$1,662	\$1,301	28	%
Segment results	\$116	\$89	30	%

Since the 2012 first quarter, across our North American Full-Service Lodging segment we added 17 properties (11,137 rooms) and 10 properties (4,191 rooms) left the system.

For the three months ended March 31, 2013, compared to the same three months of 2012, RevPAR for comparable systemwide North American Full-Service properties increased by 5.1 percent to \$113.40, occupancy for these properties increased by 0.8 percentage points to 68.8 percent, and average daily rates increased by 3.9 percent to \$164.83.

The \$27 million increase in segment results, compared to the 2012 first quarter, was driven by \$21 million of higher base management and franchise fees and \$9 million of higher incentive management fees, partially offset by \$2 million of lower owned, leased, and other revenue net of direct expenses and \$2 million of higher general, administrative, and other expenses. Higher base management and franchise fees stemmed from both higher RevPAR due to increased demand and unit growth, including the Gaylord brand properties we began managing in the 2012 fourth quarter, and also reflected fees for the additional nine days of activity in the 2013 first quarter. The \$9 million increase in incentive management fees primarily reflected higher property-level revenue which resulted in higher property-level income and margins, and also reflected fees for the additional nine days of activity in the 2013 first quarter.

Cost reimbursements revenue and expenses for our North American Full-Service Lodging segment properties totaled \$1,484 million in the 2013 first quarter, compared to \$1,158 million in the 2012 first quarter.

North American Limited-Service Lodging includes Courtyard, Fairfield Inn & Suites, SpringHill Suites, Residence Inn, TownePlace Suites, and included Marriott ExecuStay until we sold that business in the 2012 second quarter.

(\$ in millions)	93 Days Ended March 31, 2013	84 Days Ended March 23, 2012	Change 2013/2012	
Segment revenues	\$612	\$532	15	%
Segment results	\$105	\$84	25	%

Since the 2012 first quarter, across our North American Limited-Service Lodging segment we added 72 properties (8,335 rooms) and 19 properties (2,577 rooms) left the system. The majority of the properties that left the system were Courtyard properties.

For the three months ended March 31, 2013, compared to the same three months of 2012, RevPAR for comparable systemwide North American Limited-Service properties increased by 4.1 percent to \$75.84, occupancy for these properties increased by 0.1 percentage points to 67.1 percent, and average daily rates increased by 4.0 percent to \$113.07.

The \$21 million increase in segment results, compared to the 2012 first quarter, primarily reflected \$21 million of higher base management and franchise fees and \$2 million of higher owned, leased, corporate housing, and other revenue net of direct expenses, partially offset by \$2 million of lower gains and other income. Higher base management and franchise fees were driven by higher RevPAR due to increased demand, some of which is attributable to the favorable effect of property renovations, and the additional nine days of activity in the 2013 first quarter.

Table of Contents

Cost reimbursements revenue and expenses for our North American Limited-Service Lodging segment properties totaled \$465 million in the 2013 first quarter, compared to \$394 million in the 2012 first quarter.

International Lodging includes Marriott Hotels & Resorts, JW Marriott, Renaissance Hotels, Autograph Collection, Courtyard, AC Hotels by Marriott, Fairfield Inn & Suites, Residence Inn, and Marriott Executive Apartments located outside the United States and Canada.

(\$ in millions)	93 Days Ended March 31, 2013	84 Days Ended March 23, 2012	Change 2013/2012	
Segment revenues	\$340	\$271	25	%
Segment results	\$35	\$35	—	%

Since the 2012 first quarter, across our International Lodging segment we added 35 properties (8,158 rooms) and 14 properties (2,969 rooms) left the system.

For the three months ended March 31, 2013, compared to the same three months of 2012, RevPAR for comparable systemwide international properties increased by 2.5 percent to \$107.05, occupancy for these properties increased by 1.4 percentage points to 66.0 percent, and average daily rates increased by 0.3 percent to \$162.16. Comparable company-operated RevPAR improved significantly in Thailand and Indonesia, and the United Arab Emirates, while Europe experienced continued softness. Demand remained particularly weak in Egypt, although improving, Jordan, and markets in Europe more dependent on regional travel. Gateway cities in Europe, particularly London, also experienced less robust demand in the 2013 first quarter than in recent quarters. Demand in our Asia Pacific region continued to moderate, and RevPAR in Greater China was flat in the 2013 first quarter, compared to the year-ago quarter, reflecting declines in government related travel due to the country's recent change in leadership, moderating economic growth, and new supply in several markets.

Segment results remained unchanged in the 2013 first quarter, compared to the 2012 first quarter, predominantly reflecting \$4 million of higher base management and franchise fees and \$2 million higher incentive management fees, offset by \$6 million of higher general, administrative, and other expenses. The increase in base management and franchise fees largely reflected the additional nine days of activity in the 2013 first quarter, new unit growth, and higher RevPAR. The \$6 million increase in general, administrative, and other expenses primarily reflected increased expenses for functions moved from corporate headquarters to the continent offices and initiatives to enhance and grow our brands globally, as well as the additional nine days of activity in the 2013 first quarter.

Cost reimbursements revenue and expenses for our International Lodging segment properties totaled \$200 million in the 2013 first quarter, compared to \$137 million in the 2012 first quarter.

Luxury Lodging includes The Ritz-Carlton, Bulgari Hotels & Resorts, and EDITION worldwide.

(\$ in millions)	93 Days Ended March 31, 2013	84 Days Ended March 23, 2012	Change 2013/2012	
Segment revenues	\$467	\$399	17	%
Segment results	\$33	\$21	57	%

Since the 2012 first quarter, across our Luxury Lodging segment we added 5 properties (1,216 rooms) and no properties left the system. Since the 2012 first quarter, we also added 3 residential products (229 units) and no residential products left the system.

For the three months ended March 31, 2013, compared to the same three months of 2012, RevPAR for comparable systemwide luxury properties increased by 9.8 percent to \$250.27, occupancy increased by 2.6 percentage points to 68.6 percent, and average daily rates increased by 5.6 percent to \$364.98.

Table of Contents

The \$12 million increase in segment results, compared to the 2012 first quarter, reflected \$7 million of higher base management fees, \$6 million of higher owned, leased, and other revenue net of direct expenses, and a \$4 million increase in incentive management fees, partially offset by a \$5 million increase in general, administrative, and other expenses. Higher base management fees stemmed from a favorable variance from \$3 million of fee reversals in the 2012 first quarter for two properties with contract revisions, increased RevPAR due to increased demand, and unit growth, as well as the additional nine days of activity in the 2013 first quarter. Higher owned, leased, and other revenue net of direct expenses largely reflected higher branding fees. The increase in incentive management fees was primarily driven by higher property-level revenue which resulted in higher property-level income and margins, and also reflected fees for the extra nine days of activity in the 2013 first quarter. The increase in general, administrative, and other expenses reflected an unfavorable variance from a \$2 million guarantee accrual reversal in the 2012 first quarter, expenses for the additional nine days of activity in the 2013 first quarter, as well as other miscellaneous cost increases.

Cost reimbursements revenue and expenses for our Luxury Lodging segment properties totaled \$376 million in the 2013 first quarter, compared to \$327 million in the 2012 first quarter.

SHARE-BASED COMPENSATION

Under our Stock and Cash Incentive Plan, we award: (1) stock options to purchase our common stock (“Stock Option Program”); (2) stock appreciation rights (“SARs”) for our common stock (“Stock Appreciation Right Program”); (3) restricted stock units (“RSUs”) of our common stock; and (4) deferred stock units. We grant awards at exercise prices or strike prices that equal the market price of our common stock on the date of grant.

During the 2013 first quarter, we granted 2.5 million RSUs, 0.2 million service and performance RSUs, 0.7 million Employee SARs, and 0.1 million stock options. See Footnote No. 4, “Share-Based Compensation,” to our Financial Statements for more information.

NEW ACCOUNTING STANDARDS

See Footnote No. 2, “New Accounting Standards,” to our Financial Statements for information related to our adoption of new accounting standards in the 2013 first quarter.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Cash Requirements and Our Credit Facilities

Our Credit Facility provides for \$1,750 million of aggregate effective borrowings. The facility supports general corporate needs, including working capital, capital expenditures, and letters of credit. The availability of the Credit Facility also supports our commercial paper program. Borrowings under the Credit Facility bear interest at LIBOR (the London Interbank Offered Rate) plus a spread, based on our public debt rating. We also pay quarterly fees on the Credit Facility at a rate based on our public debt rating. The term of the facility expires on June 23, 2016.

The Credit Facility contains certain covenants, including a single financial covenant that limits our maximum leverage (consisting of the ratio of Adjusted Total Debt to Consolidated EBITDA, each as defined in the Credit Facility) to not more than 4 to 1. Our outstanding public debt does not contain a corresponding financial covenant or a requirement that we maintain certain financial ratios. We currently satisfy the covenants in our Credit Facility and public debt instruments, including the leverage covenant under the Credit Facility, and do not expect the covenants to restrict our ability to meet our anticipated borrowing and guarantee levels or increase those levels should we decide to do so in the future.

We believe the Credit Facility and our access to capital markets, together with cash we expect to generate from operations, remain adequate to meet our short-term and long-term liquidity requirements, finance our long-term growth plans, meet debt service, and fulfill other cash requirements.

We issue commercial paper in the United States. We do not have purchase commitments from buyers for our commercial paper; therefore, our ability to issue commercial paper is subject to market demand. We classify any outstanding commercial paper and Credit Facility borrowings as long-term debt based on our ability and intent to refinance them on a long-term basis. We reserve unused capacity under our Credit Facility to repay outstanding commercial paper borrowings in the event that the commercial paper market is not available to us for any reason when outstanding borrowings mature. We do not expect fluctuations in the demand for commercial paper to affect our liquidity, given our borrowing capacity under the Credit Facility.

At March 31, 2013, our available borrowing capacity amounted to \$732 million and reflected borrowing capacity of \$511 million under our Credit Facility and our cash balance of \$221 million. We calculated that borrowing capacity by taking \$1,750 million of effective aggregate bank commitments under our Credit Facility and subtracting \$1,238 million of outstanding commercial paper and \$1 million of outstanding letters of credit under our Credit Facility.

We monitor the status of the capital markets and regularly evaluate the effect that changes in capital market conditions may have on our ability to execute our announced growth plans. We expect to continue meeting part of our financing and liquidity needs through commercial paper borrowings and access to long-term committed credit facilities. If conditions in the lodging industry deteriorate, or if disruptions in the commercial paper market take place as they did in the immediate aftermath of both the 2008 worldwide financial crisis and the events of September 11, 2001, we may be unable to place some or all of our commercial paper on a temporary or extended basis and may have to rely more on borrowings under the Credit Facility, which we believe will be adequate to fund our liquidity needs, including repayment of debt obligations, but which may or may not carry a higher cost than commercial paper. Since we continue to have ample flexibility under the Credit Facility's covenants, we expect that undrawn bank commitments under the Credit Facility will remain available to us even if business conditions were to deteriorate markedly.

Cash and cash equivalents totaled \$221 million at March 31, 2013, an increase of \$133 million from year-end 2012, reflecting cash inflows associated with the following: increased borrowings related to the issuance of commercial paper (\$722 million), operating cash inflows (\$118 million), common stock issuances (\$41 million), and loan collections and sales, net of loan advances (\$17 million). The following cash outflows partially offset these cash inflows: long-term debt repayments (\$402 million) primarily related to the maturity of Series J Senior Notes, purchase of treasury stock (\$217 million), capital expenditures (\$70 million), dividend payments (\$41 million),

Table of Contents

contract acquisition costs (\$14 million), equity and cost method investments (\$14 million), and net other investing cash outflows (\$7 million).

Our ratio of current assets to current liabilities was roughly 0.7 to 1.0 at the end of the 2013 first quarter. We minimize working capital through cash management, strict credit-granting policies, and aggressive collection efforts. We also have significant borrowing capacity under our Credit Facility should we need additional working capital.

We made capital expenditures of \$70 million in the 2013 first quarter and \$197 million in the 2012 first quarter that included expenditures related to the development and construction of new hotels and acquisitions of hotel properties, as well as improvements to existing properties and systems initiatives. Capital expenditures for the 2013 first quarter decreased by \$127 million compared to the prior year quarter, primarily due to the 2012 first quarter acquisition of land and a building we plan to develop into a hotel. We expect investment spending for the 2013 full year will total approximately \$600 million to \$800 million, including approximately \$100 million for maintenance capital spending. Investment spending also includes other capital expenditures (including property acquisitions), loan advances, contract acquisition costs, and equity and other investments. See our Condensed Consolidated Statements of Cash Flows for information on investment spending for the 2013 first quarter.

Over time, we have sold lodging properties, both completed and under development, subject to long-term management agreements. The ability of third-party purchasers to raise the debt and equity capital necessary to acquire such properties depends in part on the perceived risks inherent in the lodging industry and other constraints inherent in the capital markets as a whole. We monitor the status of the capital markets and regularly evaluate the potential impact of changes in capital market conditions on our business operations. We expect to continue making selective and opportunistic investments to add units to our lodging business, which may include loans and noncontrolling equity investments.

Fluctuations in the values of hotel real estate generally have little impact on our overall business results because:

(1) we own less than one percent of hotels that we operate or franchise; (2) management and franchise fees are generally based upon hotel revenues and profits rather than current hotel property values; and (3) our management agreements generally do not terminate upon hotel sale or foreclosure.

From time to time we make loans to owners of hotels that we operate or franchise. Loan collections and sales, net of loan advances, amounted to \$17 million in the 2013 first quarter and \$82 million in the 2012 first quarter. In the 2013 first quarter, our notes receivable balance for senior, mezzanine, and other loans decreased by \$19 million, primarily reflecting collections on two MVW notes receivable issued to us in conjunction with the 2011 Timeshare spin-off.

Spin-off Cash Tax Benefits

As noted in Footnote No. 3, "Income Taxes," all tax matters that could affect the Company's cash tax benefits related to the 2011 spin-off of our timeshare operations and timeshare development business were resolved in the 2013 first quarter, and we expect that the spin-off will result in our realization through 2014 of approximately \$480 million of cash tax benefits relating to the value of the timeshare business. We realized \$228 million of those benefits through year-end 2012 and expect to realize approximately \$143 million of further cash tax benefits in the second half of 2013. We did not realize any cash tax benefits in the 2013 first quarter.

Contractual Obligations

As of the end of the 2013 first quarter, there have been no significant changes to our "Contractual Obligations" table in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," of our 2012 Form 10-K, other than those resulting from changes in the amount of outstanding debt, including the maturity of Series J Notes discussed below.

At the end of the 2013 first quarter, debt increased by \$320 million to \$3,255 million, compared to \$2,935 million at year-end 2012, and reflected a \$737 million increase in commercial paper borrowings, partially offset by the \$400 million (book value) retirement, at maturity, of our Series J Senior Notes, \$15 million in decreased

Table of Contents

borrowings under our Credit Facility, and decreases of \$2 million in other debt (which includes capital leases). At the end of the 2013 first quarter, future debt payments plus interest (not including capital leases) totaled \$3,691 million and are due as follows: \$81 million in 2013; \$98 million in 2014; \$410 million in 2015; \$1,600 million in 2016; \$346 million in 2017; and \$1,156 million thereafter.

During our 2013 first quarter, we made a \$411 million cash payment of principal and interest to retire, at maturity, all of our outstanding Series J Senior Notes. Our financial objectives include diversifying our financing sources, optimizing the mix and maturity of our long-term debt, and reducing our working capital. At the end of the 2013 first quarter, our long-term debt had an average interest rate of 3.1 percent and an average maturity of approximately 4.8 years. The ratio of fixed-rate long-term debt to total long-term debt was 0.6 to 1.0 at the end of the 2013 first quarter.

Guarantee Commitments

There have been no significant changes to our "Guarantee Commitments" table in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," of our 2012 Form 10-K, other than those resulting from: (1) changes in the amount of guarantees where we are the primary obligor; and (2) changes in the amount of guarantees where we are secondarily liable.

At the end of the 2013 first quarter, guarantees where we are the primary obligor decreased by \$15 million to \$209 million, compared to \$224 million at year-end 2012, and reflected an \$18 million increase in operating profit guarantees, partially offset by a \$3 million decrease in other guarantees. At the end of the 2013 first quarter, future guarantee commitment expirations are as follows: \$4 million in 2013; \$35 million in 2014; \$20 million in 2015; \$25 million in 2016; \$38 million in 2017; and \$87 million thereafter.

As of the end of the 2013 first quarter, guarantees where we are secondarily liable decreased by \$49 million to \$190 million, compared to \$239 million at year-end 2012, and primarily reflected a \$40 million decrease for an operating profit guarantee, which terminated upon restructuring of the underlying debt. At the end of the 2013 first quarter, future guarantee commitment expirations are as follows: \$26 million in 2013; \$38 million in 2014; \$31 million in 2015; \$22 million in 2016; \$20 million in 2017; and \$53 million thereafter. See the "Guarantees" caption in Footnote No. 11, "Contingencies" for additional information on our guarantees.

Share Repurchases

We purchased 5.4 million shares of our common stock during the 2013 first quarter, at an average price of \$39.65 per share. See Part II, Item 2 of this Form 10-Q for more information on our share repurchases. As of March 31, 2013, 28.9 million shares remained available for repurchase under authorizations from our Board of Directors.

Dividends

On February 15, 2013, our Board of Directors declared a quarterly cash dividend of \$0.13 per share, which we paid on March 29, 2013 to shareholders of record on March 1, 2013.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect reported amounts and related disclosures. We have discussed those policies and estimates that we believe are critical and require the use of complex judgment in their application in our 2012 Form 10-K. Since the date of our 2012 Form 10-K, there have been no material changes to our critical accounting policies or the methodologies or assumptions we apply under them.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our exposure to market risk has not materially changed since December 28, 2012.

Table of Contents

Item 4. Controls and Procedures

Disclosure Controls and Procedures

As of the end of the period covered by this quarterly report, we evaluated, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (the “Exchange Act”). Management necessarily applied its judgment in assessing the costs and benefits of such controls and procedures, which by their nature, can provide only reasonable assurance about management’s control objectives. You should note that the design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and we cannot assure you that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote. Based upon this evaluation, our Chief Executive Officer and the Chief Financial Officer concluded that our disclosure controls and procedures were effective and operating to provide reasonable assurance that we record, process, summarize and report the information we are required to disclose in the reports that we file or submit under the Exchange Act within the time periods specified in the rules and forms of the SEC, and to provide reasonable assurance that we accumulate and communicate such information to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions about required disclosure.

Internal Control Over Financial Reporting

We made no changes in internal control over financial reporting during the first quarter of 2013 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. However, in the first quarter of 2013, we began the phased implementation of an enterprise-wide financial systems project to upgrade our general ledger and reporting tools. In conjunction with that effort, we converted to a calendar year-end reporting cycle and an end-of-month quarterly reporting cycle. We are performing the implementation in the ordinary course of business to increase efficiency and align our processes on a global basis, and we expect to continue the implementation over the next several quarters.

Table of Contents

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

Please see the information under "Legal Proceedings" in Footnote No. 11, "Contingencies" to our Financial Statements in Part I, Item 1 of this Form 10-Q.

From time to time, we are also subject to other legal proceedings and claims in the ordinary course of business, including adjustments proposed during governmental examinations of the various tax returns we file. While management presently believes that the ultimate outcome of these proceedings, individually and in the aggregate, will not materially harm our financial position, cash flows, or overall trends in results of operations, legal proceedings are inherently uncertain, and unfavorable rulings could, individually or in aggregate, have a material adverse effect on our business, financial condition, or operating results.

Item 1A. Risk Factors

We are subject to various risks that could have a negative effect on us or on our financial condition. You should understand that these risks could cause results to differ materially from those expressed in forward-looking statements contained in this report or in other Company communications. Because there is no way to determine in advance whether, or to what extent, any present uncertainty will ultimately impact our business, you should give equal weight to each of the following:

Our industry is highly competitive, which may impact our ability to compete successfully with other hotel properties for customers. We generally operate in markets that contain numerous competitors. Each of our hotel brands competes with major hotel chains in national and international venues and with independent companies in regional markets. Our ability to remain competitive and to attract and retain business and leisure travelers depends on our success in distinguishing the quality, value, and efficiency of our lodging products and services, including our loyalty programs and consumer-facing technology platforms and services, from those offered by others. If we cannot compete successfully in these areas, our operating margins could contract, our market share could decrease, and our earnings could decline.

Economic uncertainty could continue to impact our financial results and growth. Weak economic conditions in Europe and other parts of the world, the strength or continuation of recovery in countries that have experienced improved economic conditions, potential disruptions in the U.S. economy as a result of governmental action or inaction on the federal deficit, budget, and related issues, political instability in some areas, and the uncertainty over how long any of these conditions will continue, could continue to have a negative impact on the lodging industry. U.S. government travel is also a significant part of our business, and our business may suffer as automatic U.S. federal spending cuts that began in March 2013 reduce the amount of travel by U.S. government employees and contractors and result in potential limitations on other aspects of travel. As a result of such current economic conditions and uncertainty, we continue to experience weakened demand for our hotel rooms in some markets. Recent improvements in demand trends in other markets may not continue, and our future financial results and growth could be further harmed or constrained if the recovery stalls or conditions worsen.

Operational Risks

Premature termination of our management or franchise agreements could hurt our financial performance. Our hotel management and franchise agreements may be subject to premature termination in certain circumstances, such as the bankruptcy of a hotel owner or franchisee, or a failure under some agreements to meet specified financial or performance criteria that are subject to the risks described in this section, which the Company fails or elects not to cure. A significant loss of agreements due to premature terminations could hurt our financial performance or our ability to grow our business.

Our lodging operations are subject to global, regional, and national conditions. Because we conduct our business on a global platform, our activities are affected by changes in global and regional economies. In recent years, our business has been hurt by decreases in travel resulting from weak economic conditions and the heightened travel security measures that have resulted from the threat of further terrorism. Our future performance

Table of Contents

could be similarly affected by the economic environment in each of the regions in which we operate, the resulting unknown pace of business travel, and the occurrence of any future incidents in those regions.

The growing significance of our operations outside of the United States also makes us increasingly susceptible to the risks of doing business internationally, which could lower our revenues, increase our costs, reduce our profits, or disrupt our business. We currently operate or franchise hotels and resorts in 74 countries, and our operations outside the United States represented approximately 15 percent of our revenues in the 2013 first quarter. We expect that the international share of our total revenues will continue to increase in future years. As a result, we are increasingly exposed to the challenges and risks of doing business outside the United States, which could reduce our revenues or profits, increase our costs, result in significant liabilities or sanctions, or otherwise disrupt our business. These challenges include: (1) compliance with complex and changing laws, regulations and policies of governments that may impact our operations, such as foreign ownership restrictions, import and export controls, and trade restrictions; (2) compliance with U.S. and foreign laws that affect the activities of companies abroad, such as anti-corruption laws, competition laws, currency regulations, and laws affecting dealings with certain nations; (3) limitations on our ability to repatriate non-U.S. earnings in a tax effective manner; (4) the difficulties involved in managing an organization doing business in many different countries; (5) uncertainties as to the enforceability of contract and intellectual property rights under local laws; (6) rapid changes in government policy, political or civil unrest in the Middle East and elsewhere, acts of terrorism, or the threat of international boycotts or U.S. anti-boycott legislation; and (7) currency exchange rate fluctuations.

Our new programs and new branded products may not be successful. We cannot assure you that our recently launched EDITION, Autograph Collection, and AC Hotels by Marriott brands, our recent acquisition of the Gaylord brand, or any new programs or products we may launch in the future will be accepted by hotel owners, potential franchisees, or the traveling public or other customers. We also cannot be certain that we will recover the costs we incurred in developing or acquiring the brands or any new programs or products, or that the brands or any new programs or products will be successful. In addition, some of our new brands involve or may involve cooperation and/or consultation with one or more third parties, including some shared control over product design and development, sales and marketing, and brand standards. Disagreements with these third parties could slow the development of these new brands and/or impair our ability to take actions we believe to be advisable for the success and profitability of such brands.

Risks relating to natural or man-made disasters, contagious disease, terrorist activity, and war could reduce the demand for lodging, which may adversely affect our revenues. So called "Acts of God," such as hurricanes, earthquakes, tsunamis, and other natural disasters and man-made disasters in recent years, such as Hurricane Sandy in the Northeastern United States, the earthquake and tsunami in Japan, and the spread of contagious diseases in locations where we own, manage, or franchise significant properties and areas of the world from which we draw a large number of customers, could cause a decline in the level of business and leisure travel and reduce the demand for lodging. Actual or threatened war, terrorist activity, political unrest, or civil strife, such as recent events in Syria, Egypt, Libya, and Bahrain, and other geopolitical uncertainty could have a similar effect. Any one or more of these events may reduce the overall demand for hotel rooms and corporate apartments or limit the prices that we can obtain for them, both of which could adversely affect our profits.

Disagreements with the owners of the hotels that we manage or franchise may result in litigation or may delay implementation of product or service initiatives. Consistent with our focus on management and franchising, we own very few of our lodging properties. The nature of our responsibilities under our management agreements to manage each hotel and enforce the standards required for our brands under both management and franchise agreements may be subject to interpretation and will from time to time give rise to disagreements, which may include disagreements over the need for or payment for new product or service initiatives. Such disagreements may be more likely when hotel returns are weaker. We seek to resolve any disagreements in order to develop and maintain positive relations with current and potential hotel owners and joint venture partners but are not always able to do so. Failure to resolve such disagreements has resulted in litigation, and could do so in the future. If any such litigation results in a significant adverse judgment, settlement, or court order, we could suffer significant losses, our profits could be reduced, or our future ability to operate our business could be constrained.

Table of Contents

Our business depends on the quality and reputation of our brands, and any deterioration in the quality or reputation of these brands could have an adverse impact on our market share, reputation, business, financial condition, or results of operations. Events that may be beyond our control could affect the reputation of one or more of our properties or more generally impact the reputation of our brands. If the reputation or perceived quality of our brands declines, our market share, reputation, business, financial condition, or results of operations could be affected.

Actions by our franchisees and licensees could adversely affect our image and reputation. We franchise and license many of our brand names and trademarks to third parties in connection with lodging, timeshare, and residential services. Under the terms of their agreements with us, our franchisees and licensees interact directly with customers and other third parties under our brand and trade names. If these franchisees or licensees fail to maintain or act in accordance with applicable brand standards, experience operational problems, or project a brand image inconsistent with ours, our image and reputation could suffer. Although our franchise and license agreements provide us with recourse and remedies in the event of a breach by the franchisee or licensee, including termination of the agreements under certain circumstances, pursuing any such recourse, remedy, or termination could be expensive and time consuming. In addition, we cannot assure you that a court would ultimately enforce our contractual termination rights in every instance.

Damage to, or losses involving, properties that we own, manage, or franchise may not be covered by insurance. We have comprehensive property and liability insurance policies with coverage features and insured limits that we believe are customary. Market forces beyond our control may nonetheless limit the scope of the insurance coverage we can obtain or our ability to obtain coverage at reasonable rates. Certain types of losses, generally of a catastrophic nature, such as earthquakes, hurricanes and floods, or terrorist acts, or liabilities that result from breaches in the security of our information systems may be uninsurable or too expensive to justify obtaining insurance. As a result, we may not be successful in obtaining insurance without increases in cost or decreases in coverage levels. In addition, in the event of a substantial loss, the insurance coverage we carry may not be sufficient to pay the full market value or replacement cost of our lost investment or that of hotel owners or in some cases could result in certain losses being totally uninsured. As a result, we could lose some or all of the capital we have invested in a property, as well as the anticipated future revenue from the property, and we could remain obligated for guarantees, debt, or other financial obligations for the property.

Development and Financing Risks

While we are predominantly a manager and franchisor of hotel properties, our hotel owners depend on capital to buy, develop, and improve hotels, and our hotel owners may be unable to access capital when necessary. In order to fund new hotel investments, as well as refurbish and improve existing hotels, both the Company and current and potential hotel owners must periodically spend money. The availability of funds for new investments and improvement of existing hotels by our current and potential hotel owners depends in large measure on capital markets and liquidity factors, over which we can exert little control. The difficulty of obtaining financing on attractive terms can, at times, be constrained by the capital markets for hotel and real estate investments. In addition, owners of existing hotels that we franchise or manage may have difficulty meeting required debt service payments or refinancing loans at maturity. Our growth strategy depends upon third-party owners/operators, and future arrangements with these third parties may be less favorable. Our growth strategy for development of additional lodging facilities entails entering into and maintaining various arrangements with property owners. The terms of our management agreements, franchise agreements, and leases for each of our lodging facilities are influenced by contract terms offered by our competitors, among other things. We cannot assure you that any of our current arrangements will continue or that we will be able to enter into future collaborations, renew agreements, or enter into new agreements in the future on terms that are as favorable to us as those that exist today.

Our ability to grow our management and franchise systems is subject to the range of risks associated with real estate investments. Our ability to sustain continued growth through management or franchise agreements for new hotels and the conversion of existing facilities to managed or franchised Marriott brands is affected, and may potentially be limited, by a variety of factors influencing real estate development generally. These include site

Table of Contents

availability, financing, planning, zoning and other local approvals, and other limitations that may be imposed by market and submarket factors, such as projected room occupancy, changes in growth in demand compared to projected supply, territorial restrictions in our management and franchise agreements, costs of construction, and anticipated room rate structure.

Our development activities expose us to project cost, completion, and resale risks. We develop new hotel and residential properties, and previously developed timeshare interval and fractional ownership properties, both directly and through partnerships, joint ventures, and other business structures with third parties. As demonstrated by the 2009 and 2011 impairment charges for our former Timeshare business, our ongoing involvement in the development of properties presents a number of risks, including that: (1) continued weakness in the capital markets may limit our ability, or that of third parties with whom we do business, to raise capital for completion of projects that have commenced or for development of future properties; (2) properties that we develop could become less attractive due to further decreases in demand for residential properties, increases in mortgage rates and/or decreases in mortgage availability, market absorption or oversupply, with the result that we may not be able to sell such properties for a profit or at the prices or selling pace we anticipate, potentially requiring additional changes in our pricing strategy that could result in further charges; (3) construction delays, cost overruns, lender financial defaults, or so called “Acts of God” such as earthquakes, hurricanes, floods, or fires may increase overall project costs or result in project cancellations; and (4) we may be unable to recover development costs we incur for any projects that we do not pursue to completion.

Development activities that involve our co-investment with third parties may result in disputes that could increase project costs, impair project operations, or increase project completion risks. Partnerships, joint ventures, and other business structures involving our co-investment with third parties generally include some form of shared control over the operations of the business and create added risks, including the possibility that other investors in such ventures could become bankrupt or otherwise lack the financial resources to meet their obligations, or could have or develop business interests, policies, or objectives that are inconsistent with ours. Although we actively seek to minimize such risks before investing in partnerships, joint ventures, or similar structures, actions by another investor may present additional risks of project delay, increased project costs, or operational difficulties following project completion. Such disputes may also be more likely in difficult business environments.

Risks associated with development and sale of residential properties associated with our lodging properties or brands may reduce our profits. In certain hotel and timeshare projects we participate, either directly or through noncontrolling interests and/or licensing agreements, in the development and sale of residential properties associated with our brands, including residences and condominiums under our The Ritz-Carlton, EDITION, JW Marriott, Autograph Collection, and Marriott brand names and trademarks. Such projects pose further risks beyond those generally associated with our lodging businesses, which may reduce our profits or compromise our brand equity, including the following: (1) the continued weakness in residential real estate and demand generally may continue to reduce our profits and could make it more difficult to convince future hotel development partners of the value added by our brands; (2) increases in interest rates, reductions in mortgage availability, or increases in the costs of residential ownership could prevent potential customers from buying residential products or reduce the prices they are willing to pay; and (3) residential construction may be subject to warranty and liability claims, and the costs of resolving such claims may be significant.

Technology, Information Protection, and Privacy Risks

A failure to keep pace with developments in technology could impair our operations or competitive position. The lodging industry continues to demand the use of sophisticated technology and systems, including those used for our reservation, revenue management, and property management systems, our Marriott Rewards and The Ritz-Carlton Rewards programs, and technologies we make available to our guests. These technologies and systems must be refined, updated, and/or replaced with more advanced systems on a regular basis, and if we cannot do so as quickly as our competitors or within budgeted costs and time frames, our business could suffer. We also may not achieve the benefits that we anticipate from any new technology or system, and a failure to do so could result in higher than anticipated costs or could impair our operating results.

Table of Contents

An increase in the use of third-party Internet services to book online hotel reservations could adversely impact our business. Some of our hotel rooms are booked through Internet travel intermediaries such as Expedia.com[®], Travelocity.com[®], and Orbitz.com[®], as well as lesser-known online travel service providers. These intermediaries initially focused on leisure travel, but now also provide offerings for corporate travel and group meetings. Although Marriott's Look No Further[®] Best Rate Guarantee has helped prevent customer preference shift to the intermediaries and greatly reduced the ability of intermediaries to undercut the published rates at our hotels, intermediaries continue to use a variety of aggressive online marketing methods to attract customers, including the purchase, by certain companies, of trademarked online keywords such as "Marriott" from Internet search engines such as Google[®], Bing[®], Yahoo[®], and Baidu[®] to steer customers toward their websites (a practice that has been challenged by various trademark owners in federal court). Although Marriott has successfully limited these practices through contracts with key online intermediaries, the number of intermediaries and related companies that drive traffic to intermediaries' websites is too large to permit us to eliminate this risk entirely. In addition, recent class action litigation against several online travel intermediaries and lodging companies, including Marriott, challenges the legality under antitrust law of contract provisions that support programs such as Marriott's Look No Further[®] Best Rate Guarantee, and we cannot assure you that the courts will ultimately uphold such provisions. Our business and profitability could be harmed if online intermediaries succeed in significantly shifting loyalties from our lodging brands to their travel services, diverting bookings away from Marriott.com, or through their fees increasing the overall cost of Internet bookings for our hotels.

Failure to maintain the integrity of internal or customer data could result in faulty business decisions, operational inefficiencies, damage to our reputation and/or subject us to costs, fines, or lawsuits. Our businesses require collection and retention of large volumes of internal and customer data, including credit card numbers and other personally identifiable information of our customers in various information systems that we maintain and in those maintained by third parties with whom we contract to provide services, including in areas such as human resources outsourcing, website hosting, and various forms of electronic communications. We and third parties who provide services to us also maintain personally identifiable information about our employees. The integrity and protection of that customer, employee, and company data is critical to us. If that data is inaccurate or incomplete, we could make faulty decisions. Our customers and employees also have a high expectation that we and our service providers will adequately protect their personal information. The information, security, and privacy requirements imposed by governmental regulation and the requirements of the payment card industry are also increasingly demanding, in both the United States and other jurisdictions where we operate. Our systems may not be able to satisfy these changing requirements and employee and customer expectations, or may require significant additional investments or time in order to do so. Efforts to hack or breach security measures, failures of systems or software to operate as designed or intended, viruses, operator error, or inadvertent releases of data all threaten our and our service provider's information systems and records. Our reliance on computer, Internet-based and mobile systems and communications and the frequency and sophistication of efforts by hackers to gain unauthorized access to such systems have increased significantly in recent years. A significant theft, loss, or fraudulent use of customer, employee, or company data could adversely impact our reputation and could result in remedial and other expenses, fines, or litigation. A breach in the security of our information systems or those of our service providers could lead to an interruption in the operation of our systems, resulting in operational inefficiencies and a loss of profits.

Changes in privacy law could adversely affect our ability to market our products effectively. We rely on a variety of direct marketing techniques, including email marketing, online advertising, and postal mailings. Any further restrictions in laws such as the CANSPAM Act, and various U.S. state laws, or new federal laws on marketing and solicitation or international data protection laws that govern these activities could adversely affect the continuing effectiveness of email, online advertising, and postal mailing techniques and could force further changes in our marketing strategy. If this occurs, we may not be able to develop adequate alternative marketing strategies, which could impact the amount and timing of our sales of certain products. We also obtain access to potential customers from travel service providers or other companies with whom we have substantial relationships and market to some individuals on these lists directly or by including our marketing message in the other company's marketing materials. If access to these lists was prohibited or otherwise restricted, our ability to develop new customers and introduce them

to our products could be impaired.

Table of Contents

Other Risks

Changes in laws and regulations could reduce our profits or increase our costs. Our businesses are subject to a wide variety of laws, regulations, and policies in jurisdictions around the world, including those for financial reporting, taxes, health care, and the environment. Changes to these laws, regulations, and policies, including those associated with healthcare reform or financial reform, could reduce our profits. Further, we anticipate that many of the jurisdictions in which we do business will continue to review tax and other revenue raising laws, regulations, and policies, and any resulting changes could impose new restrictions, costs, or prohibitions on our current practices and reduce our profits. In particular, governments may revise tax laws, regulations, or official interpretations in ways that could have a significant impact on us, including modifications that could reduce the profits that we can effectively realize from our non-U.S. operations, or that could require costly changes to those operations, or the way in which they are structured. For example, most U.S. company effective tax rates reflect the fact that income earned and reinvested outside the United States is generally taxed at local rates, which are often much lower than U.S. tax rates. If changes in tax laws, regulations, or interpretations significantly increase the tax rates on non-U.S. income, our effective tax rate could increase and our profits could be reduced. If such increases resulted from our status as a U.S. company, those changes could place us at a disadvantage to our non-U.S. competitors if those competitors remain subject to lower local tax rates.

The 2011 spin-off of our former Timeshare business could result in significant tax liability to us and our shareholders. As discussed in more detail in Footnote No. 16, "Spin-off" to our Financial Statements in our 2012 Form 10-K, in 2011 we completed the spin-off of our timeshare operations and timeshare development business. Although we received a private letter ruling from the Internal Revenue Service ("IRS") and an opinion from our tax counsel confirming that the distribution of MVW common stock will not result in the recognition, for U.S. federal income tax purposes, of income, gain or loss to us or our shareholders (except to the extent of cash received in lieu of fractional shares of MVW common stock), the private letter ruling and opinion that we received are subject to the continuing validity of any assumptions and representations reflected therein. In addition, an opinion from our tax counsel is not binding on the IRS or a court. Moreover, certain future events that may or may not be within our control, including certain extraordinary purchases of our stock or MVW's stock, could cause the distribution not to qualify as tax-free. Accordingly, the IRS could determine that the distribution of the MVW common stock was a taxable transaction and a court could agree with the IRS. If the distribution of the MVW common stock was determined to be taxable for U.S. federal income tax purposes, we and our shareholders who received shares of MVW common stock in the spin-off could incur significant tax liabilities. Under the tax sharing and indemnification agreement that we entered into with MVW, we are entitled to indemnification from MVW for certain taxes and related losses resulting from the failure of the distribution of MVW common stock to qualify as tax-free as a result of (1) any breach by MVW or its subsidiaries of the covenants on the preservation of the tax-free status of the distribution, (2) certain acquisitions of equity securities or assets of MVW or its subsidiaries, and (3) any breach by MVW or its subsidiaries of certain representations in the documents submitted to the IRS and the separation documents relating to the spin-off. If, however, the distribution failed to qualify as a tax-free transaction for reasons other than those specified in the indemnification provisions of the tax sharing and indemnification agreement, liability for any resulting taxes for the distribution would be apportioned between us and MVW based on our relative fair market values.

If we cannot attract and retain talented associates, our business could suffer. We compete with other companies both within and outside of our industry for talented personnel. If we cannot recruit, train, develop, and retain sufficient numbers of talented associates, we could experience increased associate turnover, decreased guest satisfaction, low morale, inefficiency, or internal control failures. Insufficient numbers of talented associates could also limit our ability to grow and expand our businesses.

Delaware law and our governing corporate documents contain, and our Board of Directors could implement, anti-takeover provisions that could deter takeover attempts. Under the Delaware business combination statute, a stockholder holding 15 percent or more of our outstanding voting stock could not acquire us without Board of Director consent for at least three years after the date the stockholder first held 15 percent or more of the voting stock. Our governing corporate documents also, among other things, require supermajority votes for mergers and similar transactions. In addition, our Board of Directors could, without stockholder approval, implement other anti-takeover

defenses, such as a stockholder's rights plan.
