

4125 South 6000 West, West Valley City, UT 84128
(Address of principal executive offices) (Zip Code)

Registrant's telephone number: **(801) 963-5112**

Securities registered under Section 12(b) of the Act: **None**

Securities registered under Section 12(g) of the Act: **Common Stock, \$0.001 par value**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically, every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant a large accelerated filer, an accelerated filer, a non-accelerated filer, small reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “small reporting company” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company
Emerging Growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes No

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant’s most recently completed second fiscal quarter. **The aggregate market value of voting and non-voting common equity held by non-affiliates of the registrant as of June 30, 2018, was \$0 due to the inability of our stockholders to liquidate shares.**

Indicate the number of shares outstanding of each of the registrant’s classes of common stock, as of the latest practicable date. **As of April 1, 2019, registrant had 4,499,918,984 shares of common stock, \$0.001 par value, outstanding.**

DOCUMENTS INCORPORATED BY REFERENCE: **None.**

INTRODUCTORY NOTE

This Form 10-K/A no. 1 amendment repeats the entire text of Item 1, as required by Exchange Act Rule 12b-15, but only changes the number of employees of the Registrant as of December 31, 2018.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report contains statements about the future, sometimes referred to as “forward-looking” statements. Forward-looking statements are typically identified by the use of the words “believe,” “may,” “could,” “should,” “expect,” “anticipate,” “estimate,” “project,” “propose,” “plan,” “intend,” and similar words and expressions. Statements that describe our future strategic plans, goals, or objectives are also forward-looking statements. Forward-looking statements involve known and unknown risks, uncertainties, and other factors that may cause our actual results, performance, or achievements to be materially different from any future results, performance, or achievements expressed or implied by such forward-looking statements.

Readers of this report are cautioned that any forward-looking statements, including those regarding us or our management’s current beliefs, expectations, anticipations, estimations, projections, strategies, proposals, plans, or intentions, are not guarantees of future performance or results of events and involve risks and uncertainties, such as:

We may be deemed to be insolvent and may face liquidation.

The auditors’ report for our most recent fiscal years contains explanatory paragraphs about our ability to continue as a going concern.

Playboy Enterprises, Inc., or Playboy, has obtained a judgment that precludes us from using the Playboy trademark in distributing an energy drink, our only source of revenue during recent years, and our likelihood of success in our pending motion for a retrial may be considered low.

We cannot assure that we will be able to use our energy drink formulations for any other branding or distribution.

We cannot assure that our efforts to identify and commercialize new products for manufacture and distribution will be successful or generate revenue.

All of our assets are encumbered to secure the payment of approximately \$2.6 million in indebtedness, plus \$1.3 million of accrued interest, that is convertible to common stock, and if the indebtedness is not converted before April 2027, our default could result in the loss of all of our assets.

We are a party to numerous lawsuits that require significant management attention and funds for attorneys’ fees and that subject us to risk of damages.

We will require substantial amounts of additional capital from external sources.

Any sizable increase in products being developed, manufactured, and distributed will require skilled management of growth.

Penny stock regulations impose certain restrictions on resales of our securities, which may cause an investor to lose some or all of its investment.

Risk factors, such as those set forth under “Management’s Discussion and Analysis of Analysis of Financial Condition and Results of Operation” and other factors that are not currently known to us, may emerge from time to time.

The forward-looking information is based on present circumstances and on our predictions respecting events that have not occurred, that may not occur, or that may occur with different consequences from those now assumed or anticipated. Actual events or results could vary significantly from those expressed or implied in such statements and are subject to a number of risks and uncertainties. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we can give no assurance that these expectations will prove to be correct.

Discussions containing these forward-looking statements may be found, among other places, in this report under the captions “Risk Factors,” “Business,” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Forward-looking statements speak only as of the date of the document in which they are contained, and we do not undertake any duty to update our forward-looking statements, except as may be required by law.

PART I

ITEM 1. BUSINESS

Overview

From 2007 until October 2016, we manufactured, marketed, and distributed internationally an energy drink under a license with Playboy through our subsidiary, CirTran Beverage Corporation (“CirTran Beverage”). CirTran Beverage conducted its activities under an agreement with Play Beverages, LLC (“PlayBev”), which held the Playboy license. During this time, PlayBev was considered a variable interest entity. On October 21, 2016, we deconsolidated PlayBev from our consolidated financial statements.

In October 2016, Playboy obtained a judgment against CirTran Beverage and PlayBev holding that the license is no longer valid, that PlayBev is no longer authorized to market the Playboy-branded energy drink, and awarding money damages to Playboy. CirTran Corporation was not a party to the lawsuit. CirTran Beverage and PlayBev filed a motion for a retrial, which was denied by the court in October 2018.

After the Playboy litigation was initiated, our activities declined rapidly, as management sought to obtain the forbearance of our principal secured and judgment creditors, seeking to resolve disputes respecting the PlayBev license to market Playboy-licensed energy drinks, defending the numerous lawsuits to which we were a party, and obtaining additional capital. Disputes respecting the status of the PlayBev license to market Playboy-licensed energy drinks impaired our ability to establish new distributors, damaged some of our relationships with existing distributors, and considerably depressed revenues.

We are now without significant operations. Reflecting our severely limited operations, we had minimal revenue of \$12,500 during the year ended December 31, 2017, and \$0 during the year ended December 31, 2018.

References to “us,” “we,” “our,” and correlative terms refer to CirTran Corporation and the subsidiaries and divisions through which we conduct our activities.

Consumer Product Commercialization—Contract Marketing

We are now seeking to commercialize one or more consumer products. Through these efforts, we will identify what we believe to be a product or other demand and then seek a product that may be distributed to address that demand. We pursue contract marketing relationships principally in the domestic consumer products markets, including products in areas such as home and garden, kitchen, health and beauty, toys, licensed merchandise, and apparel for film, television, sports, and other entertainment properties. If we deem it suitable, we may obtain rights from the product owner to manufacture and market a particular product, generally in consideration of the payment of a royalty, sometimes accompanied with an initial fee. Frequently, owners of undeveloped products or product concepts are seeking branding, marketing, manufacturing, order fulfillment, and distribution assistance. Where we identify a need but find no suitable available product, we may design our own product for commercialization.

Our commercialization effort includes developing product packaging, branding the product, arranging third-party manufacturing, establishing distribution channels, and arranging order fulfillment. We anticipate that these activities will generally be undertaken by third parties under contract. In some cases, we may brand a product under a license to use a third-party's recognized name, as we did in the case of the Playboy-branded energy drink, seek an endorsement from a publicly recognized celebrity, sports figure, or other person, or obtain the rights to use the image, likeness, or logo of a product or a person, such as a well-known celebrity. Licensed merchandise and apparel are then sold and marketed in the entertainment and sports franchise industries. We anticipate that these products will be introduced into the market under either one uniform brand name or separate trademarked names that we originate and own or acquire by license.

Although we are now investigating some commercialization opportunities, we are in the early stages of our efforts and cannot assure that we will be successful in completing commercialization of any product, generating revenues, or realizing a profit.

The contract-manufacturing industry specializes in providing the program management, technical and administrative support, and manufacturing expertise required to take products from the early design and prototype stages through volume production and distribution, providing the customer with a quality product, delivered on time and at a competitive cost. This full range of services gives the customer an opportunity to avoid large capital investments in plant, inventory, equipment, and staffing, so that instead, it can concentrate on innovation, design, and marketing. By using our contract-manufacturing services, customers will have the ability to improve the return on their investment with greater flexibility in responding to market demands and exploiting new market opportunities. Our efforts will be led by our current chief executive officer and others that we may hire as employees or engage as independent contractors.

In previous years, we found that customers increasingly required contract manufacturers to provide complete turn-key manufacturing and material handling services, rather than working on a consignment basis in which the customer supplies all materials and the contract manufacturer supplies only labor. Turn-key contracts involve design, manufacturing and engineering support, procurement of all materials, and sophisticated in-circuit and functional testing and distribution. The manufacturing partnership between customers and contract manufacturers involves an increased use of "just-in-time" inventory management techniques that minimize the customer's investment in component inventories, personnel, and related facilities, thereby reducing its costs.

Based on the trends we have observed in the contract-manufacturing industry, we believe we will benefit from the increased market acceptance of, and reliance upon, the use of manufacturing specialists by many original equipment manufacturers, or OEMs, marketing firms, distributors, and national retailers. We believe the trend towards outsourcing manufacturing will continue. OEMs use manufacturing specialists for many reasons, including reducing the time it takes to bring new products to market, reducing the initial investment required, accessing leading manufacturing technology, gaining the ability to better focus resources in other value-added areas, and improving inventory management and purchasing power. An important element of our strategy is to establish partnerships with major and emerging OEM leaders in diverse segments across our target industries. Due to the costs inherent in supporting customer relationships, we focus on customers with which the opportunity exists to develop long-term business partnerships. Our goal is to provide our customers with total manufacturing solutions through third-party providers for both new and more mature products, as well as across product generations—an idea we call “Concept to Consumer.”

We have also designed, engineered, manufactured, and supplied products in the international electronics, consumer products, and general merchandise industries for various marketers, distributors, and retailers selling overseas. We have provided manufacturing services to the direct-response and retail consumer markets. Our experience and expertise enables us to enter a project at various phases: engineering and design; product development and prototyping; tooling; and high-volume manufacturing. Our contacts with Asian suppliers have helped us to maintain our status as an international contract manufacturer for multiple products in a wide variety of industries, which will allow us to target larger-scale contracts.

We intend to pursue manufacturing relationships beyond printed circuit board assemblies, cables, harnesses, and injection-molding systems by establishing complete “box-build” or “turn-key” relationships in the electronics, retail, and direct consumer markets.

We have developed markets for several fitness and exercise products, household and kitchen products and appliances, and health and beauty aids that are manufactured in China. We anticipate that offshore contract manufacturing will play an increased role moving forward as resources become available to us.

Beverage Distribution

We are no longer authorized to manufacture or market the Playboy-branded energy drink but we may seek to rebrand and remarket an energy drink based on our own brand and product formula, relying at least in part on the beverage distribution network that we previously developed.

Sales and Marketing

We review opportunities to identify products that we may market through current sales channels. We also seek new paths to deliver products and services directly to end users and are pursuing strategic and reciprocal relationships with retail distribution firms whereby they would act as our retail distribution arm and we would act as their manufacturing arm, with each party giving the other priority and first opportunity to work on the other's products.

Our contacts in China may allow us to increase our manufacturing capacity and output with minimal capital investment required. By using various subcontractors, we may leverage our upfront payments for inventories and tooling to control costs and receive benefits from economies of scale in Asian manufacturing facilities.

Typically, and depending on the contract, we may be required to prepay a portion of the purchase orders for materials. In exchange for financial commitments, we may receive dedicated manufacturing responsiveness and eliminate the costly expense associated with capitalizing completely proprietary facilities. For example, we previously expanded our manufacturing capabilities for our beverage division outside the United States to accommodate international customers by contracting with manufacturers in Hungary and India.

During a typical contract manufacturing sales process, a customer provides us with specifications for the product it wants, and we develop a bid price for manufacturing a minimum quantity that includes manufacture engineering, parts, labor, testing, and shipping. If the bid is accepted, the customer is required to purchase the minimum quantity, and additional product is sold through purchase orders issued under the original contract. Special engineering services are provided at either an hourly rate or a fixed contract price for a specified task.

Competition

Competition in our targeted markets is comprised of manufacturing technology, merchandise quality, responsiveness, the provision of value-added services, and price. To be competitive, we must provide technologically advanced manufacturing services, maintain quality levels, offer flexible delivery schedules, and deliver finished products on a reliable basis and for a favorable price.

The manufacturing services industry is large and diverse and serviced by many companies, including several that have achieved significant market share. We will compete with different companies depending on the type of service or geographic area. Certain of our competitors may have greater manufacturing, financial, research and development, and marketing resources than we have.

We will also face competition from current and prospective customers that evaluate our capabilities against the merits of manufacturing products internally.

Regulation

We are subject to typical federal, state, and local regulations and laws governing the operations of manufacturing concerns, including environmental disposal, storage, and discharge regulations and laws; employee safety laws and regulations; and labor practices laws and regulations. We are not required under current laws and regulations to obtain or maintain any specialized or agency-specific licenses, permits, or authorizations to conduct our manufacturing services. We believe we are in substantial compliance with all relevant regulations applicable to our business and operations. All international sales permits are the responsibility of the local distributors, and they are required to obtain all local licenses and permits.

Employees

At December 31, 2018, we had three full-time employees, including our officers and directors, and two part-time employees.

Corporate Background and History

In 1987, CirTran Corporation was incorporated in Nevada under the name Vermillion Ventures, Inc., for the purpose of acquiring other operating corporate entities. We were largely inactive until July 1, 2000, when we acquired substantially all of the assets and certain liabilities of Circuit Technology, Inc., through a wholly owned subsidiary, CirTran Corporation (Utah), that we created for the purpose of completing the acquisition.

Our predecessor business in Circuit Technology, Inc. was commenced in 1993 by our president, Iehab Hawatmeh. In 2001, we effected a 15-for-1 forward-split of our shares and a stock distribution, which increased the number of our issued and outstanding shares of common stock. We also increased our authorized capital from 500,000,000 to 750,000,000 shares. In 2007, our stockholders approved a 1.2-for-1 forward-split of our shares and an amendment to our articles of incorporation that increased our authorized capital to 1,500,000,000 shares of common stock. In August 2011, we increased our authorized capitalization to 4,500,000,000 shares of common stock, par value \$0.001.

In May 2015, our stockholders and board of directors approved an amendment to our articles of incorporation to complete a 1,000-to-1 reverse split, or consolidation, of our common stock, decrease our authorized common stock to 100,000,000 shares, par value \$0.001, and authorize a class of 5,000,000 shares of preferred stock having such terms as the board of directors may determine prior to issuance (the "Amendment"). However, FINRA refused to approve the Amendment until such time as we became current in our periodic reports and received approval for our common stock to resume trading. While we have become current in our periodic reports, we are continuing to work with FINRA to allow trading of our common stock.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused the report to be signed on its behalf by the undersigned, thereunto duly authorized.

CirTran Corporation
