Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or such shorter period that the Registrant was required to submit and post such files). YES

NO *

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer *Accelerated filer Non-accelerated filer *Smaller reporting company *

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). YES * NO

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the Registrant, computed by reference to the last sale price on June 30, 2013, as reported by the Nasdaq Capital Market, was approximately \$71.0 million.

As of March 3, 2014, there were issued 8,341,842 shares of the Registrant's Common Stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE:

(1) Proxy Statement for the 2014 Annual Meeting of Stockholders of the Registrant (Part III).

Explanatory Note

We are filing this Amendment No. 1 to our Report on Form 10-K for the year ended December 31, 2013 which was filed with the U.S. Securities and Exchange Commission on March 17, 2014, or the "Original Filing." The sole purpose of this Amendment No. 1 is to correct an omission in the signature page that was included in the Original Filing. We have repeated the entire text of the Original Filing in this Amendment No. 1. We have made no other changes to the Original Filing other than the inclusion of the signatures noted above.

This report on Form 10-K contains forward-looking statements that are based on assumptions and may describe future plans, strategies and expectations of BCB Bancorp, Inc. and subsidiaries. This document may include forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements, which are based on certain assumptions and describe future plans, strategies, and expectations of the Company, are generally identified by use of the words “anticipate,” “believe,” “estimate,” “expect,” “intend,” “plan,” “project,” “seek,” “strive,” “try,” or future or conditional verbs such as “will,” “would,” “could,” “may,” or similar expressions. Although we believe that our plans, intentions and expectations, as reflected in these forward-looking statements are reasonable, we can give no assurance that these plans, intentions or expectations will be achieved or realized. By identifying these statements for you in this manner, we are alerting you to the possibility that our actual results and financial condition may differ, possibly materially, from the anticipated results and financial condition indicated in these forward-looking statements. Important factors that could cause our actual results and financial condition to differ from those indicated in the forward-looking statements include, among others, those discussed below and under “Risk Factors” in Part I, Item 1A of this Annual Report on Form 10-K. You should not place undue reliance on these forward-looking statements, which reflect our expectations only as of the date of this report. We do not assume any obligation to revise forward-looking statements except as may be required by law.

PART I

ITEM 1. BUSINESS

BCB Bancorp, Inc.

BCB Bancorp, Inc. (the “Company”) is a New Jersey corporation, and is the holding company parent of BCB Community Bank (the “Bank”). The Company has not engaged in any significant business activity other than owning all of the outstanding common stock of BCB Community Bank. Our executive office is located at 104-110 Avenue C, Bayonne, New Jersey 07002. Our telephone number is (201) 823-0700. At December 31, 2013 we had \$1.21 billion in consolidated assets, \$968.7 million in deposits and \$100.1 million in consolidated stockholders’ equity. The Company is subject to extensive regulation by the Board of Governors of the Federal Reserve System.

BCB Community Bank

BCB Community Bank opened for business on November 1, 2000 as Bayonne Community Bank, a New Jersey chartered commercial bank. We changed our name from Bayonne Community Bank to BCB Community Bank in April of 2007. At December 31, 2013, we operated through eleven branches in Bayonne, Jersey City, Hoboken, Monroe Township, South Orange, and Woodbridge, New Jersey and through our executive office located at 104-110 Avenue C and our administrative office located at 591-595 Avenue C, Bayonne, New Jersey 07002. Our deposit accounts are insured by the Federal Deposit Insurance Corporation (FDIC) and we are a member of the Federal Home Loan Bank System.

We are a community-oriented financial institution. Our business is to offer FDIC-insured deposit products and to invest funds held in deposit accounts at the Bank, together with funds generated from operations, in investment securities and loans. We offer our customers:

- loans, including commercial and multi-family real estate loans, one- to four-family mortgage loans, home equity loans, construction loans, consumer loans and commercial business loans. In recent years the primary growth in our loan portfolio has been in loans secured by commercial real estate and multi-family properties;

FDIC-insured deposit products, including savings and club accounts, non-interest bearing accounts, money market accounts, certificates of deposit and individual retirement accounts; and
· retail and commercial banking services including wire transfers, money orders, traveler's checks, safe deposit boxes, a night depository, bond coupon redemption and automated teller services.

Significant Events

On October 30, 2013, the Company amended its Restated Certificate of Incorporation to revise Article V to amend certain terms related to the Series A 6% Noncumulative Perpetual Preferred Stock and to create a new Series B 6% Noncumulative Perpetual Preferred Stock, which sets forth the number of shares to be included in such series, and to fix the designation, powers, preferences, and rights of the shares of each such series and any qualifications, limitations or restrictions thereof. Such amendment to the Restated Certificate of Incorporation was approved by the directors of BCB Bancorp, Inc. on February 20, 2013.

On October 31, 2013, the Company closed a private placement of Series B Noncumulative Perpetual Preferred Stock, resulting in the issuance of 401 shares of Series B 6% Non-Cumulative Perpetual Preferred Shares for gross proceeds of \$4.01 million. The costs associated with the private placement were approximately \$24,000. The shares issued are callable by the Company after October 31, 2016, at \$10,000 per share (liquidation preference value). There is no ability to convert the preferred shares to common shares. Dividends on the preferred shares, if and when declared, will be paid quarterly in arrears.

At December 31, 2012, the Company closed a private placement of its Series A noncumulative perpetual preferred stock, par value \$0.01 per share ("preferred stock"). The Company sold \$8.65 million to certain investors at a purchase price of \$10,000 per share. The net proceeds of the private placement are expected to be used primarily to support the capital of BCB Community Bank.

On October 29th and 30th, 2012, Hurricane Sandy struck the Northeast section of the country. The Company's market area was significantly impacted by the storm which resulted in widespread flooding, wind damage and power outages. The storm temporarily disrupted our branch network and our ability to service our customers, however within one week, all of our offices were fully functional. In 2012, the Company conducted a quantitative analysis identifying 122 loans with outstanding principal loan balances totaling approximately \$38.0 million. At December 31, 2013, borrowers of \$30.5 million of the loans have either fully completed the restoration process or have paid the loan in full. The remaining \$7.5 million are at various stages of completion and are continually monitored by the Company. Based on this updated, current analysis, the Company which had initially established an additional Hurricane Sandy related provision for loan losses totaling \$500,000 to mitigate any potential losses has reduced this provision to \$34,000 at December 31, 2013. The Company will continue to monitor the ongoing status of the Hurricane Sandy impacted loans to determine if the established provision requires additional adjustment.

Business Strategy

Our business strategy is to operate as a well-capitalized, profitable and independent community-oriented financial institution dedicated to providing quality customer service. Management's and the Board of Directors' extensive knowledge of the markets we serve helps to differentiate us from our competitors. Our business strategy incorporates the following elements: maintaining a community focus, focusing on profitability, continuing our growth, concentrating on real estate based lending, capitalizing on market dynamics, providing attentive and personalized service and attracting highly qualified and experienced personnel. These attributes coupled with our desire to seek out under-served markets for banking products and services facilitate our ambition to continue to grow our franchise footprint organically and synergistically.

1

Maintaining a community focus. Our management and Board of Directors have strong ties to the communities we serve. Many members of the management team are New Jersey natives and are active in the communities we serve through non-profit board membership, local business development organizations, and industry associations. In addition, our board members are well established professionals and business people in the communities we serve. Management and the Board are interested in making a lasting contribution to these communities and have succeeded in attracting deposits and loans through attentive and personalized service.

Strengthening our balance sheet while returning to profitability. For the year ended December 31, 2013, our return on average equity was 10.18% and our return on average assets was 0.80%. Our earnings per diluted share was \$1.06 for the year ended December 31, 2013 compared to a loss per diluted share of \$0.23 for the year ended December 31, 2012. Earnings per share results have improved in 2013 primarily as a result of several initiatives completed in 2012 which included a \$25.9 million sale of non-performing loans executed in an effort to reduce legacy and legal costs associated with these non-performing assets. Additionally an asset reallocation program active through 2013 redeployed excess liquidity into higher yielding loan product facilitating a \$98.0 million or 10.6% increase in net loans in 2013. Management remains committed to strengthening the Bank's statements of financial condition and maintaining profitability by diversifying the products, pricing and services we offer. As a result of our efforts, our loans delinquent over 90 days have decreased from \$39.6 million at December 31, 2011 to \$14.8 million at December 31, 2012, to \$7.0 million at December 31, 2013.

Concentrating on real estate-based lending. A primary focus of our business strategy is to originate loans secured by commercial and multi-family properties. Such loans provide higher returns than loans secured by one- to four-family real estate. As a result of our underwriting practices, including debt service requirements for commercial real estate and multi-family loans, management believes that such loans offer us an opportunity to obtain higher returns, in the absence of a measurable increased level of risk.

Capitalizing on market dynamics. The consolidation of the banking industry in Hudson County, New Jersey has provided a unique opportunity for a customer focused banking institution, such as the Bank. We believe our local roots and community focus provides the Bank with an opportunity to capitalize on the consolidation in our market area. This consolidation has moved decision making away from local, community-based banks to much larger banks headquartered outside of New Jersey. We believe our local roots and community focus provides the Bank with an opportunity to capitalize on the consolidation in our market area.

Providing attentive and personalized service. Management believes that providing attentive and personalized service is the key to gaining deposit and loan relationships in the markets we serve and their surrounding communities. Since we began operations, our branches have been open seven (7) days a week.

Attracting highly experienced and qualified personnel. An important part of our strategy is to hire bankers who have prior experience in the markets we serve, as well as pre-existing business relationships. Our management team has an average of over 27 years of banking experience, while our lenders and branch personnel have significant prior experience at community banks and regional banks throughout New Jersey. Management believes that its knowledge of these markets has been a critical element in the success of BCB Community Bank. Management's extensive knowledge of the local communities has allowed us to develop and implement a highly focused and disciplined approach to lending and has enabled the Bank to attract a high percentage of low cost deposits.

Our Market Area

We are located in the City of Bayonne, Jersey City and Hoboken in Hudson County, Monroe Township and Woodbridge in Middlesex County, and South Orange in Essex County, New Jersey. The Bank's locations are easily accessible and provide convenient services to businesses and individuals throughout our market area

Our market area includes the City of Bayonne, Jersey City, portions of Hoboken, South Orange, Woodbridge, and Monroe Township, New Jersey. These areas are all considered "bedroom" or "commuter" communities to Manhattan. Our market area is well-served by a network of arterial roadways including Route 440 and the New Jersey Turnpike.

Our market area has a high level of commercial business activity. Businesses are concentrated in the service sector and retail trade areas. Major employers in our market area include certain medical centers and local boards of education. As a result of Hurricane Sandy, a significant number of businesses in our market area sustained losses which resulted in reduced economic activity during the last two months of 2012 and into 2013.

Competition

The banking business in New Jersey is extremely competitive. We compete for deposits and loans with existing New Jersey and out-of-state financial institutions that have longer operating histories, larger capital reserves and more established customer bases. Our competition includes large financial service companies and other entities in addition to traditional banking institutions such as savings and loan associations, savings banks, commercial banks and credit unions. Our larger competitors have a greater ability to finance wide-ranging advertising campaigns through their greater capital resources. Our marketing efforts depend heavily upon referrals from officers, directors, stockholders, selective advertising in local media and direct mail solicitations. We compete for business principally on the basis of personal service to customers, customer access to our officers and directors and competitive interest rates and fees.

In the financial services industry in recent years, intense market demands, technological and regulatory changes and economic pressures have eroded industry classifications that were once clearly defined. Banks have diversified their services, competitively priced their deposit products and become more cost effective as a result of competition

with one another and with new types of financial service companies, including non-banking competitors. Some of the results of these market dynamics in the financial services industry have been a number of new bank and non-bank competitors, increased merger activity, and increased customer awareness of product and service differences among competitors.

Lending Activities

Analysis of Loan Portfolio. Set forth below is selected data relating to the composition of our loan portfolio by type of loan as a percentage of the respective portfolio.

Commercial and Multi-family Real Estate Loans. Our commercial and multi-family real estate loans are secured by commercial real estate (for example, shopping centers, medical buildings, retail offices) and multi-family residential units, consisting of five or more units. Permanent loans on commercial and multi-family properties are generally originated in amounts up to 75% of the appraised value of the property. Our commercial real estate loans are secured by improved property such as office buildings, retail stores, warehouses, church buildings and other non-residential buildings. Commercial and multi-family real estate loans are generally made at rates that adjust above the five year U.S. Treasury interest rate, with terms of up to 25 years, or are balloon loans with fixed interest rates which generally mature in three to five years with principal amortization for a period of up to 30 years. Our largest commercial loan had a principal balance of \$12.6 million at December 31, 2013, was secured by commercial property and was performing in accordance with its terms on that date. Our largest multi-family loan had a principal balance of \$6.5 million at December 31, 2013. This loan was performing in accordance with its terms on that date.

Loans secured by commercial and multi-family real estate are generally larger and involve a greater degree of risk than one- to four-family residential mortgage loans. The borrower's creditworthiness and the feasibility and cash flow potential of the project is of primary concern in commercial and multi-family real estate lending. Loans secured by income properties are generally larger and involve greater risks than residential mortgage loans because payments on loans secured by income properties are often dependent on the successful operation or management of the properties. We intend to continue emphasizing the origination of loans secured by commercial real estate and multi-family properties.

One- to Four-Family Lending. Our one- to four-family residential mortgage loans are secured by property located primarily in the State of New Jersey. We generally originate one- to four-family residential mortgage loans in amounts up to 80% of the lesser of the appraised value or selling price of the mortgaged property without requiring mortgage insurance. We will originate loans with loan to value ratios up to 90% provided the borrowers obtain private mortgage insurance. We originate both fixed rate and adjustable rate loans. One- to four-family loans may have terms of up to 30 years. The majority of one- to four-family loans we originate for retention in our portfolio have terms no greater than 15 years. We offer adjustable rate loans with fixed rate periods of up to five years, with principal and interest calculated using a maximum 30-year amortization period. We offer these loans with a fixed rate for the first five years with repricing every year after the initial period. Adjustable rate loans may adjust up to 200 basis points annually and 600 basis points over the term of the loan. We also broker for a third party lender one- to four-family residential loans, which are primarily fixed rate loans with terms of 30 years. Our loan brokerage activities permit us to offer customers longer-term fixed rate loans we would not otherwise originate while providing a source of fee income. During 2013, we originated for sale \$18.1 million in one- to four-family loans and recognized gains of \$408,000 from the sale of such loans.

Property appraisals on real estate securing our single-family residential loans are made by state certified and licensed independent appraisers approved by our Board of Directors. Appraisals are performed in accordance with applicable regulations and policies. As a result of Hurricane Sandy, we anticipate that appraised home values in our market area will be significantly lower than would otherwise be the case. At our discretion, we obtain either title insurance policies or attorneys' certificates of title on all first mortgage real estate loans originated. We also require fire and casualty insurance on all properties securing our one- to four-family loans. We also require the borrower to

obtain flood insurance where appropriate. In some instances, we charge a fee equal to a percentage of the loan amount commonly referred to as points.

Construction Loans. We offer loans to finance the construction of various types of commercial and residential property. Construction loans to builders generally are offered with terms of up to eighteen months and interest rates are tied to the prime rate plus a margin. These loans generally are offered as adjustable rate loans. We will originate residential construction loans for individual borrowers and builders, provided all necessary plans and permits are in order. Construction loan funds are disbursed as the project progresses. As of December 31, 2013, our largest construction loan was \$11.0 million, of which \$3.4 million was disbursed. This loan has been made for the construction of a 3-story commercial property built to suit the Hebrew Language Academy Charter Schools, Inc. As of December 31, 2013, this loan was performing in accordance with its terms.

Construction financing is generally considered to involve a higher degree of risk of loss than long-term financing on improved, occupied real estate. Risk of loss on a construction loan is dependent largely upon the accuracy of the initial estimate of the property's value at completion of construction and development and the estimated cost (including interest) of construction. During the construction phase, a number of factors could result in delays and cost overruns. If the estimate of construction costs proves to be inaccurate, we may be required to advance funds beyond the amount originally committed to permit completion of the project. Additionally, if the estimate of value proves to be inaccurate, we may be confronted, at or prior to the maturity of the loan, with a project having a value which is insufficient to assure full repayment.

Home Equity Loans and Home Equity Lines of Credit. We offer home equity loans and lines of credit that are secured by the borrower's primary residence. Our home equity loans can be structured as loans that are disbursed in full at closing or as lines of credit. Home equity loans and lines of credit are offered with terms up to 15 years. Virtually all of our home equity loans are originated with fixed rates of interest and home equity lines of credit are originated with adjustable interest rates tied to the prime rate. Home equity loans and lines of credit are underwritten under the same criteria that we use to underwrite one- to four-family loans. Home equity loans and lines of credit may be underwritten with a loan-to-value ratio of 80% when combined with the principal balance of the existing mortgage loan. At the time we close a home equity loan or line of credit, we file a mortgage to perfect our security interest in the underlying collateral. At December 31, 2013, the outstanding balances of home equity loans and lines of credit totaled \$56.1 million, or 5.41% of total loans.

Commercial Business Loans. Our commercial business loans are underwritten on the basis of the borrower's ability to service such debt from income. Our underwriting standards for commercial business loans include a review of the applicant's tax returns, financial statements, credit history and an assessment of the applicant's ability to meet existing obligations and payments on the proposed loan based on cash flow generated by the applicant's business. Commercial business loans are generally made to small and mid-sized companies located within the State of New Jersey. In most cases, we require collateral of real estate, equipment, accounts receivable, inventory, chattel or other assets before making a commercial business loan. Our largest commercial business loan at December 31, 2013 was a credit line, secured by a 7-story office building, for \$8.1 million, of which \$4.5 million was dispersed. This loan was performing in accordance with its terms as of that date. Commercial business loans generally have higher rates and shorter terms than one- to four-family residential loans, but they may also involve higher average balances and a higher risk of default since their repayment generally depends on the successful operation of the borrower's

business. As a result of Hurricane Sandy, economic activity in our market area has been disrupted and many of our commercial business borrowers have had their businesses impaired. Until our business borrowers recover from the effects of Hurricane Sandy we may experience higher than customary levels of delinquencies and losses.

5

Consumer Loans. We make various types of secured and unsecured consumer loans and loans that are collateralized by new and used automobiles. Consumer loans generally have terms of three years to ten years.

Consumer loans are advantageous to us because of their interest rate sensitivity, but they also involve more credit risk than residential mortgage loans because of the higher potential for default, the nature of the collateral and the difficulty in disposing of the collateral.

Loan Approval Authority and Underwriting. We establish various lending limits for executive management and also maintain a loan committee. The loan committee is comprised of the Chairman of the Board, the President, the Senior Lending Officer and a minimum of five non-employee members of the Board of Directors. The President or the Senior Lending Officer, together with one other loan officer, have authority to approve applications for real estate loans up to \$500,000, other secured loans up to \$500,000 and unsecured loans up to \$25,000. The loan committee considers all applications in excess of the above lending limits and the entire board of directors ratifies all such loans.

Upon receipt of a completed loan application from a prospective borrower, a credit report is ordered. Income and certain other information is verified. If necessary, additional financial information may be requested. An appraisal is required for the underwriting of all one- to four-family loans. We may rely on an estimate of value of real estate performed by our Senior Lending Officer for home equity loans or lines of credit of up to \$250,000. Appraisals are processed by state certified independent appraisers approved by the Board of Directors.

An attorney's certificate of title is required on all newly originated real estate mortgage loans. In connection with refinancing and home equity loans or lines of credit in amounts up to \$250,000, we will obtain a record owner's search in lieu of an attorney's certificate of title. Borrowers also must obtain fire and casualty insurance. Flood insurance is also required on loans secured by property that is located in a flood zone.

Loan Commitments. Written commitments are given to prospective borrowers on all approved real estate loans. Generally, we honor commitments for up to 90 days from the date of issuance. At December 31, 2013, our outstanding loan origination commitments totaled \$30.9 million, standby letters of credit totaled \$2.0 million, outstanding construction loans in progress totaled \$46.3 million and undisbursed lines of credit totaled \$64.3 million.

Loan Delinquencies. We send a notice of nonpayment to borrowers when their loan becomes 15 days past due. If such payment is not received by month end, an additional notice of nonpayment is sent to the borrower. After 60 days, if payment is still delinquent, a notice of right to cure default is sent to the borrower giving 30 additional days to bring the loan current before foreclosure is commenced. If the loan continues in a delinquent status for 90 days past due and no repayment plan is in effect, foreclosure proceedings will be initiated. In an effort to more closely monitor

the performance of our loan portfolio and asset quality, the Bank has created various concentration of credit reports, specifically as it relates to our construction and commercial real estate portfolios. These reports stress test declining property values up to and including a 25% value depreciation to the original appraised value to determine our potential exposure.

Loans are reviewed and are placed on a non-accrual status when the loan becomes more than 90 days delinquent or when, in our opinion, the collection of additional interest is doubtful. Once placed on non-accrual status, the accrual of interest income is discontinued. Income is subsequently recognized only to the extent that cash payments are received until delinquency status is reduced to less than ninety days, in which case the loan is returned to accrual status. At December 31, 2013, we had \$20.6 million in non-accruing loans. Our largest exposure of non-performing loans consisted of a relationship with one borrowing entity in which the loan is collateralized by a two story office building and a 1 & 2 story industrial building whose balance at December 31, 2013 was \$2.2 million.

A loan is considered impaired when it is probable the borrower will not repay the loan according to the original contractual terms of the loan agreement. We have determined that first mortgage loans on one- to four-family properties and all consumer loans represent large groups of smaller-balance homogeneous loans that are collectively evaluated. Additionally, we have determined that an insignificant delay (less than 90 days) will not cause a loan to be classified as impaired if we expect to collect all amounts due including interest accrued at the contractual interest rate for the period of delay. We independently evaluate all loans identified as impaired. We estimate credit losses on impaired loans based on the present value of expected cash flows or the fair value of the underlying collateral if the loan repayment will be derived from the sale or operation of such collateral. Impaired loans, or portions of such loans, are charged off when we determine a realized loss has occurred. Until such time, an allowance for loan losses is maintained for estimated losses. Cash receipts on impaired loans are applied first to accrued interest receivable unless otherwise required by the loan terms, except when an impaired loan is also a nonaccrual loan, in which case the portion of the receipts related to interest is recognized as income. At December 31, 2013, we had one hundred fifty-one loans with unpaid principal balances totaling \$46.3 million which are classified as impaired and on which loan loss allowances totaling \$2.6 million have been established. During 2013, interest income of \$2.1 million was recognized on impaired loans during the time of impairment.

The following table sets forth delinquencies in our loan portfolio as of the dates indicated:

For the year ended December 31, 2013, gross interest income which would have been recorded had our non-accruing loans been current in accordance with their original terms amounted to \$1.36 million. We received and

recorded \$769,000 in interest income for such loans for the year ended December 31, 2013.

9

Classified Assets. Our policies provide for a classification system for problem assets. When we classify problem assets, we may establish general allowances for loan losses in an amount deemed prudent by management. General allowances represent loss allowances which have been established to recognize the inherent risk associated with lending activities, but which, unlike specific allowances, have not been allocated to particular problem assets. A portion of general loss allowances established to cover possible losses related to assets classified as substandard or doubtful may be included in determining our regulatory capital. Specific valuation allowances for loan losses generally do not qualify as regulatory capital. At December 31, 2013, we had \$5.2 million in assets classified as doubtful, of which \$5.2 million were classified as impaired, \$17.6 million in assets classified as substandard, of which \$17.6 million were classified as impaired and \$22.5 million in assets classified as special mention, of which \$13.9 million were classified as impaired. The loans classified as substandard represent primarily commercial loans secured either by residential real estate, commercial real estate or heavy equipment. The loans that have been classified substandard were classified as such primarily because either updated financial information has not been timely provided, or the collateral underlying the loan is in the process of being revalued.

The Company's internal credit risk grades are based on the definitions currently utilized by the banking regulatory agencies. The grades assigned and definitions are as follows, and loans graded excellent, above average, good and watch list (risk ratings 1-4) are treated as "pass" for grading purposes:

5 – Special Mention- Loans currently performing but with potential weaknesses including adverse trends in borrower's operations, credit quality, financial strength, or possible collateral deficiency.

6 – Substandard- Loans that are inadequately protected by current sound worth, paying capacity, and collateral support. Loans on "nonaccrual" status. The loan needs special and corrective attention.

7 – Doubtful- Weaknesses in credit quality and collateral support make full collection improbable, but pending reasonable factors remain sufficient to defer the loss status.

8 – Loss- Continuance as a bankable asset is not warranted. However, this does not preclude future attempts at partial recovery.

Allowances for Loan Losses. A provision for loan losses is charged to operations based on management's evaluation of the losses that may be incurred in our loan portfolio. In addition, our determination of the amount of the allowance for loan losses is subject to review by the New Jersey Department of Banking and Insurance and the FDIC, as part of their examination process. After a review of the information available, our regulators might require the establishment of an additional allowance. Any increase in the loan loss allowance required by regulators would have a negative

impact on our earnings. Management reviews the adequacy of the allowance on at least a quarterly basis to ensure that the provision for loan losses has been charged against earnings in an amount necessary to maintain the allowance at a level that is adequate based on management's assessment of probable estimated losses. The Company's methodology for assessing the adequacy of the allowance for loan losses consists of several key elements. These elements include a general allocated allowance for impaired loans, a specific allowance for impaired loans, and an unallocated portion.

The Company consistently applies the following comprehensive methodology. During the quarterly review of the allowance for loan losses, the Company considers a variety of factors that include:

- General economic conditions.

- Trends in charge-offs.

- Trends and levels of delinquent loans.

- Trends and levels of non-performing loans, including loans over 90 days delinquent.

- Trends in volume and terms of loans.

- Levels of allowance for specific classified loans.
- Credit concentrations

The methodology includes the segregation of the loan portfolio into two divisions. Loans that are performing and loans that are impaired. Loans which are performing are evaluated homogeneously by loan class or loan type. The allowance of performing loans is evaluated based on historical loan experience, including consideration of peer loss analysis, with an adjustment for qualitative factors due to economic conditions in the market. Impaired loans are loans which are more than 60 days delinquent or troubled debt restructured. These loans are individually evaluated for loan loss either by current appraisal, estimated economic factor, or net present value. Management reviews the overall estimate for feasibility and bases the loan loss provision accordingly. As of December 31, 2013, non-accrual loans differed from the amount of total loans past due greater than 90 days due to troubled debt restructuring of loans which are maintained on non-accrual status for a minimum of six months until the borrower has demonstrated their ability to satisfy the terms of the restructured loan. The Company also maintains an unallocated allowance. The unallocated allowance is used to cover any factors or conditions which may cause a potential loan loss but are not specifically identifiable. It is prudent to maintain an unallocated portion of the allowance because no matter how detailed an analysis of potential loan losses is performed, these estimates lack some element of precision. Management must make estimates using assumptions and information that is often subjective and subject to change.

The following table sets forth an analysis of the Bank's allowance for loan losses.

10

	Years Ended December 31,		
	2013	2012	2011
	(Dollars in Thousands)		
Balance at beginning of period	\$ 12,363	\$ 10,509	\$ 8,400

Investment Activities

Investment Securities. We are required under federal regulations to maintain a minimum amount of liquid assets that may be invested in specified short-term securities and certain other investments. The level of liquid assets varies depending upon several factors, including: (i) the yields on investment alternatives, (ii) our judgment as to the attractiveness of the yields then available in relation to other opportunities, (iii) expectation of future yield levels, and (iv) our projections as to the short-term demand for funds to be used in loan origination and other activities. Investment securities, including mortgage-backed securities, are classified at the time of purchase, based upon management's intentions and abilities, as securities held-to-maturity or securities available for sale. Debt securities acquired with the intent and ability to hold to maturity are classified as held-to-maturity and are stated at cost and adjusted for amortization of premium and accretion of discount, which are computed using the level yield method and recognized as adjustments of interest income. All other debt and equity securities are classified as available for sale to serve principally as a source of liquidity.

Current regulatory and accounting guidelines regarding investment securities require us to categorize securities as held-to-maturity, available for sale or trading. As of December 31, 2013, the amortized cost of securities classified as held-to-maturity was \$114.2 million. We had \$1.1 million in securities classified as available for sale, and no securities classified as trading. Securities classified as available for sale are reported for financial reporting purposes at the fair value with net changes in the fair value from period to period included as a separate component of stockholders' equity, net of income taxes. As of December 31, 2013, our securities classified as held-to-maturity had a fair value of \$115.1 million. Changes in the fair value of securities classified as held-to-maturity or available for sale do not affect our income, unless we determine there to be an other-than-temporary impairment for those securities in an unrealized loss position. As of December 31, 2013, management concluded that all unrealized losses were temporary in nature since they are related to interest rate fluctuations rather than any underlying credit quality of the issuers. Additionally, the Company has no plans to sell these securities and has concluded that it is unlikely it would have to sell these securities prior to the anticipated recovery of the unrealized losses. While these securities were classified as held to maturity, ASC 320 (formerly FAS 115) allows sales of securities so designated, provided that a substantial portion (at least 85%) of the principal balance has been amortized prior to the sale. During the year ended December 31, 2013, proceeds from sales of securities held to maturity totaled approximately \$9.5 million and resulted in gross gains of \$401,000 and gross losses of \$23,000.

As of December 31, 2013, our investment policy allowed investments in instruments such as: (i) U.S. Treasury obligations; (ii) U.S. federal agency or federally sponsored agency obligations; (iii) mortgage-backed securities; and (iv) certificates of deposit. The Board of Directors may authorize additional investments. As of December 31, 2012, we no longer had a U.S. Government agency securities portfolio. The decrease during 2012 reflects the exercise of call options of \$6.3 million in U.S. government agency securities.

As a source of liquidity and to supplement our lending activities, we have invested in residential mortgage-backed securities. Mortgage-backed securities generally yield less than the loans that underlie such securities because of the cost of payment guarantees or credit enhancements that reduce credit risk. Mortgage-backed securities can serve as collateral for borrowings and, through repayments, as a source of liquidity. Mortgage-backed

securities represent a participation interest in a pool of single-family or other type of mortgages. Principal and interest payments are passed from the mortgage originators, through intermediaries (generally government-sponsored enterprises) that pool and repackage the participation interests in the form of securities, to investors, like us. The government-sponsored enterprises guarantee the payment of principal and interest to investors and include Freddie Mac, Ginnie Mae, and Fannie Mae.

Mortgage-backed securities typically are issued with stated principal amounts. The securities are backed by pools of mortgage loans that have interest rates that are within a set range and have varying maturities. The underlying pool of mortgages can be composed of either fixed rate or adjustable rate mortgage loans. Mortgage-backed securities are generally referred to as mortgage participation certificates or pass-through certificates. The interest rate risk characteristics of the underlying pool of mortgages (i.e., fixed rate or adjustable rate) and the prepayment risk, are passed on to the certificate holder. The life of a mortgage-backed pass-through security is equal to the life of the underlying mortgages. Expected maturities will differ from contractual maturities due to scheduled repayments and because borrowers may have the right to call or prepay obligations with or without prepayment penalties.

Securities Portfolio. The following table sets forth the carrying value of our securities portfolio and FHLB stock at the dates indicated.

Sources of Funds

Our major external source of funds for lending and other investment purposes are deposits. Funds are also derived from the receipt of payments on loans, prepayment of loans, maturities of investment securities and mortgage-backed securities and borrowings. Scheduled loan principal repayments are a relatively stable source of funds, while deposit inflows and outflows and loan prepayments are significantly influenced by general interest rates and market conditions.

Deposits. Consumer and commercial deposits are attracted principally from within our primary market area through the offering of a selection of deposit instruments including demand, NOW, savings and club accounts, money market accounts, and term certificate accounts. Deposit account terms vary according to the minimum balance required, the time period the funds must remain on deposit, and the interest rate.

The interest rates paid by us on deposits are set at the direction of our senior management. Interest rates are determined based on our liquidity requirements, interest rates paid by our competitors, our growth goals, and applicable regulatory restrictions and requirements. As of December 31, 2013 and December 31, 2012 we had \$8.5 million and \$6.8 million in brokered deposits, respectively.

Deposit Accounts. The following table sets forth the dollar amount of deposits in the various types of deposit programs we offered as of the dates indicated.

Borrowings. Beginning September 7, 2010, the Federal Home Loan Bank of New York (“FHLBNY”) replaced the existing Overnight Repricing Advance Program and its associated companion products, the Overnight Line of Credit (“OLOC”), OLOC Plus, OLOC Companion, and OLOC Companion Plus with the new Overnight Advance. The new Overnight Advance permits the Bank to borrow overnight up to its maximum borrowing capacity at the FHLBNY. The Bank is no longer restricted to the previous borrowing limits of 10% (OLOC) or up to 20% (OLOC Plus) of total assets. At December 31, 2013, the Bank’s total credit exposure cannot exceed 50% of its total assets, or \$604.0 million, based on the borrowing limitations outlined in the Federal Home Loan Bank of New York’s member products guide. The total credit exposure limit to 50% of total assets is recalculated each quarter. Additionally, at December 31, 2013 we had a floating rate junior subordinated debenture of \$4.1 million which has been callable at the Company’s option since June 17, 2009, and quarterly thereafter.

The following table sets forth information concerning balances and interest rates on our short-term borrowings at the dates and for the periods indicated.

Employees

At December 31, 2013, we had 174 full-time equivalent and 75 part-time employees. None of our employees is represented by a collective bargaining group. We believe that our relationship with our employees is good.

Subsidiaries

We have three non-bank subsidiaries. BCB Holding Company Investment Corp. was established in 2004 for the purpose of holding and investing in securities. Only securities authorized to be purchased by BCB Community Bank are held by BCB Holding Company Investment Corp. At December 31, 2013, this company held \$96.7 million in securities. With the merger with Pamrapo Bancorp. Inc., we acquired Pamrapo Service Corporation which has been inactive since May 2010. BCB New York Management, Inc. was established in October 2012 for the purpose of holding and investing in various loan products and investing in securities. For the period ended December 31, 2013, there was no activity related to this subsidiary.

Supervision and Regulation

Bank holding companies and banks are extensively regulated under both federal and state law. These laws and regulations are intended to protect depositors, not shareholders. The description below is limited to certain material aspects of the statutes and regulations addressed, and is not intended to be a complete description of such statutes and regulations and their effects on the Company or the Bank.

As further described below under the heading “The Dodd-Frank Act”, the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”), will significantly change the current bank regulatory structure described in this section and will affect the lending, investment, trading and operating activities of financial institutions and their holding companies. These and any other changes in applicable laws or regulations, whether by Congress or regulatory agencies, may have a material effect on the business and prospects of the Company and the Bank.

The Dodd-Frank Act

The Dodd-Frank Act has changed the current bank regulatory structure and is affecting the lending, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act eliminated the Office of Thrift Supervision and requires that federal savings associations be regulated by the Office of the Comptroller of the Currency (the primary federal regulator for national banks). The Dodd-Frank Act also authorizes the Board of Governors of the Federal Reserve Board (“Federal Reserve”) to supervise and regulate all savings and loan holding companies.

The Dodd-Frank Act requires the Federal Reserve to set minimum capital levels for bank holding companies that are as stringent as those required for insured depository institutions, and the components of Tier 1 capital would be restricted to capital instruments that are currently considered to be Tier 1 capital for insured depository institutions. In addition, the proceeds of trust preferred securities are excluded from Tier 1 capital unless such securities were issued prior to May 19, 2010 by bank or savings and loan holding companies with less than \$15 billion of assets. The legislation also establishes a floor for capital of insured depository institutions that cannot be lower than the standards in effect today, and directs the federal banking regulators to implement new leverage and capital requirements within 18 months. These new leverage and capital requirements must take into account off-balance sheet activities and other risks, including risks relating to securitized products and derivatives.

The Dodd-Frank Act created a new Consumer Financial Protection Bureau with broad powers to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rulemaking authority for a wide range of consumer protection laws that apply to all banks and savings institutions, including the authority to prohibit “unfair, deceptive or abusive” acts and practices. The Consumer Financial Protection Bureau has examination and enforcement authority over all banks and savings institutions with more than \$10 billion in assets. Banks and savings institutions with \$10 billion or less in assets will be examined by their applicable bank regulators. The new legislation also weakens the federal preemption available for national banks and federal savings associations, and gives the state attorneys general the ability to enforce applicable federal consumer protection laws.

The Dodd-Frank Act also broadens the base for FDIC insurance assessments. In accordance with the Dodd-Frank Act, the FDIC has promulgated rules under which assessments are based on the average consolidated total assets less tangible equity capital of a financial institution. The Dodd-Frank Act also permanently increases the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per depositor, retroactive to January 1, 2008, and non-interest bearing transaction accounts had unlimited deposit insurance through December 31, 2012. Lastly, the Dodd-Frank Act increases stockholder influence over boards of directors by requiring companies to give stockholders a non-binding vote on executive compensation and so-called “golden parachute” payments, and by authorizing the Securities and Exchange Commission to promulgate rules that would allow stockholders to nominate and solicit votes for their own candidates using a company’s proxy materials. The legislation also directs the Federal Reserve to promulgate rules prohibiting excessive compensation paid to bank holding company executives, regardless of whether the company is publicly traded.

Bank Holding Company Regulation

As a bank holding company registered under the Bank Holding Company Act of 1956, as amended, the Company is subject to the regulation and supervision applicable to bank holding companies by the Federal Reserve. The Company is also subject to the provisions of the New Jersey Banking Act of 1948 (the “New Jersey Banking Act”) and the regulations of the Commissioner of the New Jersey Department of Banking and Insurance (“Commissioner”). The Company is required to file reports with the Federal Reserve and the Commissioner regarding its business operations and those of its subsidiaries.

Federal Regulation. The Bank Holding Company Act requires, among other things, the prior approval of the Federal Reserve in any case where a bank holding company proposes to (i) acquire all or substantially all of the assets of any other bank, (ii) acquire direct or indirect ownership or control of more than 5% of the outstanding voting stock of any bank (unless it owns a majority of such company’s voting shares) or (iii) merge or consolidate with any other bank holding company. The Federal Reserve will not approve any acquisition, merger, or consolidation that would have a substantially anti-competitive effect, unless the anti-competitive impact of the proposed transaction is clearly outweighed by a greater public interest in meeting the convenience and needs of the community to be served. The Federal Reserve also considers capital adequacy and other financial and managerial resources and future prospects of the companies and the banks concerned, together with the convenience and needs of the community to be served, when reviewing acquisitions or mergers.

The Bank Holding Company Act generally prohibits a bank holding company, with certain limited exceptions, from (i) acquiring or retaining direct or indirect ownership or control of more than 5% of the outstanding voting stock of any company which is not a bank or bank holding company, or (ii) engaging directly or indirectly in activities other than those of banking, managing or controlling banks, or performing services for its subsidiaries, unless such non-banking business is determined by the Federal Reserve to be so closely related to banking or managing or controlling banks as to be properly incident thereto.

The Bank Holding Company Act has been amended to permit bank holding companies and banks, which meet certain capital, management and Community Reinvestment Act standards, to engage in a broader range of non-banking activities. In addition, bank holding companies which elect to become financial holding companies may engage in certain banking and non-banking activities without prior Federal Reserve approval. At this time, the

Company has elected not to become a financial holding company, as it does not engage in any activities not permissible for banks.

There are a number of obligations and restrictions imposed on bank holding companies and their depository institution subsidiaries by law and regulatory policy that are designed to minimize potential loss to the depositors of such depository institutions and the FDIC insurance funds in the event the depository institution is in danger of default. Under a policy of the Federal Reserve with respect to bank holding company operations, a bank holding company is required to serve as a source of financial strength to its subsidiary depository institutions and to commit resources to support such institutions in circumstances where it might not do so absent such policy. The Federal Reserve also has the authority under the Bank Holding Company Act to require a bank holding company to terminate any activity or to relinquish control of

20

a non-bank subsidiary upon the Federal Reserve's determination that such activity or control constitutes a serious risk to the financial soundness and stability of any bank subsidiary of the bank holding company.

The Federal Reserve has adopted risk-based capital guidelines for bank holding companies. The risk-based capital guidelines are designed to make regulatory capital requirements more sensitive to differences in risk profile among banks and bank holding companies, to account for off-balance sheet exposure, and to minimize disincentives for holding liquid assets. Under these guidelines, assets and off-balance sheet items are assigned to broad risk categories each with appropriate weights. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance sheet items.

The Company is subject to regulatory capital requirements and guidelines imposed by the Federal Reserve, which are substantially similar to those imposed by the FDIC on depository institutions within their jurisdictions. At December 31, 2013, the Company, was considered to be a well capitalized Bank Holding Company.

The Federal Reserve may set higher capital requirements for holding companies whose circumstances warrant it. For example, holding companies experiencing internal growth or making acquisitions are expected to maintain strong capital positions substantially above the minimum supervisory levels, without significant reliance on intangible assets.

As noted above, the Dodd-Frank Act requires the Federal Reserve to set minimum capital levels for bank holding companies that are as stringent as those required for insured depository institutions, and the components of Tier 1 capital would be restricted to capital instruments that are currently considered to be Tier 1 capital for insured depository institutions. In June 2012, proposed rules were issued that would implement these directives. Such changes when finalized, and others that may be proposed and implemented in the future, may affect the Company's capital ratios and risk-adjusted assets.

New Jersey Regulation. Under the New Jersey Banking Act, a company owning or controlling a savings bank is regulated as a bank holding company and must file certain reports with the Commissioner and is subject to examination by the Commissioner. Under the New Jersey Banking Act, as well as Federal law, no person may acquire control of the Company or the Bank without first obtaining approval of such acquisition of control from the Federal Reserve and the Commissioner.

Bank Regulation

As a New Jersey-chartered commercial bank, the Bank is subject to the regulation, supervision, and examination of the Commissioner. As an FDIC-insured institution, the Bank is subject to the regulation, supervision and examination of the FDIC. The regulations of the FDIC and the Commissioner impact virtually all of our activities, including the minimum level of capital we must maintain, our ability to pay dividends, our ability to expand through new branches or acquisitions and various other matters.

Insurance of Deposit Accounts. The FDIC insures deposits at FDIC insured financial institutions such as the Bank. Deposit accounts in the Bank are insured by the FDIC generally up to a maximum of \$250,000 per separately insured depositor and up to a maximum of \$250,000 for self-directed retirement accounts.

Under the FDIC's current risk-based assessment system, insured institutions are assigned to one of four risk categories based on supervisory evaluations, regulatory capital levels and certain other risk factors. Assessments are based on an institution's risk category and certain specified adjustments with higher assessments applying to institutions deemed most risky.

As part of its plan to restore the Deposit Insurance Fund in the wake of the large number of bank failures following the financial crisis, the FDIC imposed a special assessment of 5 basis points for the second quarter of 2009. In addition, the FDIC required all insured institutions to prepay their quarterly risk-based assessments for the fourth quarter of 2009, and for all of 2010, 2011 and 2012. As part of this prepayment, the FDIC assumed a 5% annual growth in the assessment base and applied a 3 basis point increase in assessment rates effective January 1, 2011. As of December 31, 2012 our prepaid FDIC premium assessment was fully utilized.

In February 2011, the FDIC published a final rule under the Dodd-Frank Act to reform the deposit insurance assessment system. The rule redefined the assessment base used for calculating deposit insurance assessments effective April 1, 2011. Under the new rule, assessments are based on an institution's average consolidated total assets minus average tangible equity as opposed to total deposits. Since the new base is much larger than the current base, the FDIC also lowered assessment rates so that the total amount of revenue collected from the industry is not significantly altered. The new rule is expected to benefit smaller financial institutions, which typically rely more on deposits for funding, and shift more of the burden for supporting the insurance fund to larger institutions, which have greater access to non-deposit sources of funding.

The Dodd-Frank Act also extended the unlimited deposit insurance on non-interest bearing transaction accounts through December 31, 2012. Unlike the FDIC's Temporary Liquidity Guarantee Program, the insurance provided under the Dodd-Frank Act did not extend to low-interest NOW accounts, and there was no separate assessment on covered accounts.

Insurance of deposits may be terminated by the FDIC upon a finding that an institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC. We do not currently know of any practice, condition or violation that may lead to termination of our deposit insurance.

In addition to the FDIC assessments, the Financing Corporation (“FICO”) is authorized to impose and collect, with the approval of the FDIC, assessments for anticipated payments, issuance costs and custodial fees on bonds issued by the FICO in the 1980s to recapitalize the former Federal Savings and Loan Insurance Corporation. The bonds issued by the FICO are due to mature in 2017 through 2019. For the year ended December 31, 2013, we paid \$68,000 in FICO assessments.

Capital Adequacy Guidelines. The FDIC has promulgated risk-based capital rules, which are designed to make regulatory capital requirements more sensitive to differences in risk profile among banks, to account for off-balance sheet exposure, and to minimize disincentives for holding liquid assets. Under these rules, assets and off-balance sheet items are assigned to broad risk categories, each with appropriate weights. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance sheet items. These rules are substantially similar to the Federal Reserve rules discussed above.

In addition to the risk-based capital rules, the FDIC has adopted a minimum Tier 1 capital (leverage) ratio. This measurement is substantially similar to the Federal Reserve leverage capital measurement discussed above. At December 31, 2013, the Bank’s ratio of total capital to risk-weighted assets was 13.66%. Our Tier 1 capital to risk-weighted assets was 12.41%, and our Tier 1 capital to average assets was 8.70%.

As noted above, the Dodd-Frank Act establishes a floor for capital of insured depository institutions that cannot be lower than the standards in effect today, and directs the federal banking regulators to implement new leverage and capital requirements within 18 months. These new leverage and capital requirements must take into account off-balance sheet activities and other risks, including risks relating to securitized products and derivatives. In June 2012, the Federal Bank Regulators issued proposed rules that would implement the Dodd-Frank Act's directives as well as recommendations of the international Basel Committee on Banking Supervision. The proposed rules would substantially revise capital requirements including establishing a new common equity Tier 1 requirement, certain raised risk-based requirement, and certain increased risk weights. It is not known when the rule will be finalized.

Transactions with Affiliates. Transactions between banks and their related parties or affiliates are limited by Sections 23A and 23B of the Federal Reserve Act. An affiliate of a bank is any company or entity that controls, is controlled by or is under common control with the bank. In a holding company context, the parent bank holding company and any companies which are controlled by such parent holding company are affiliates of the bank. Generally, Sections 23A and 23B of the Federal Reserve Act and Regulation W (i) limit the extent to which the bank or its subsidiaries may engage in "covered transactions" with any one affiliate to an amount equal to 10.0% of such institution's capital stock and surplus, and contain an aggregate limit on all such transactions with all affiliates to an amount equal to 20.0% of such institution's capital stock and surplus and (ii) require that all such transactions be on terms substantially the same, or at least as favorable, to the institution or subsidiary as those provided to non-affiliates. The term "covered transaction" includes the making of loans, purchase of assets, issuance of a guarantee and other similar transactions. In addition, loans or other extensions of credit by the financial institution to the affiliate are required to be collateralized in accordance with the requirements set forth in Section 23A of the Federal Reserve Act. The Sarbanes-Oxley Act of 2002 generally prohibits loans by a company to its executive officers and directors. However, the law contains a specific exception for loans by a depository institution to its executive officers and directors in compliance with federal banking laws assuming such loans are also permitted under the law of the institution's chartering state. Under such laws, the Bank's authority to extend credit to executive officers, directors and 10% shareholders ("insiders"), as well as entities such person's control, is limited. The law limits both the individual and aggregate amount of loans the Bank may make to insiders based, in part, on the Bank's capital position and requires certain board approval procedures to be followed. Such loans are required to be made on terms substantially the same as those offered to unaffiliated individuals and not involve more than the normal risk of repayment. There is an exception for loans made pursuant to a benefit or compensation program that is widely available to all employees of the institution and does not give preference to insiders over other employees. Loans to executive officers are further limited by specific categories.

The Dodd-Frank Act requires that the Federal Reserve make certain changes to the regulations governing transactions with affiliates described above. It is uncertain when such changes will become effective.

Dividends. The Bank may pay dividends as declared from time to time by the Board of Directors out of funds legally available, subject to certain restrictions. Under the New Jersey Banking Act of 1948, as amended, the Bank may not pay a cash dividend unless, following the payment, the Bank's capital stock will be unimpaired and the Bank will have a surplus of no less than 50% of the Bank capital stock or, if not, the payment of the dividend will not reduce the surplus. In addition, the Bank cannot pay dividends in amounts that would reduce the Bank's capital below

regulatory imposed minimums.

Federal Securities Laws

The Company's common stock is registered with the SEC under the Securities Exchange Act of 1934, as amended ("Exchange Act"). The Company is subject to the information, proxy solicitation, insider trading restrictions and other requirements under the Securities Exchange Act of 1934.

Under the Exchange Act, we are required to conduct a comprehensive review and assessment of the adequacy of our existing financial systems and controls. For the year ended December 31, 2013, our auditors are required to audit our internal control over financial reporting.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley"), contains a broad range of legislative reforms intended to address corporate and accounting fraud. In addition to the establishment of a new accounting oversight board that will enforce auditing, quality control and independence standards and will be funded by fees from all publicly traded companies, Sarbanes-Oxley places certain restrictions on the scope of services that may be provided by accounting firms to their public company audit clients. Any non-audit services being provided to a public company audit client will require preapproval by the company's audit committee. In addition, Sarbanes-Oxley makes certain changes to the requirements for audit partner rotation after a period of time. Sarbanes-Oxley requires chief executive officers and chief financial officers, or their equivalent, to certify to the accuracy of periodic reports filed with the Securities and Exchange Commission, subject to civil and criminal penalties if they knowingly or willingly violate this certification requirement. The Company's Chief Executive Officer and Chief Financial Officer have signed certifications to this Form 10-K as required by Sarbanes-Oxley. In addition, under Sarbanes-Oxley, counsel will be required to report evidence of a material violation of the securities laws or a breach of fiduciary duty by a company to its chief executive officer or its chief legal officer, and, if such officer does not appropriately respond, to report such evidence to the audit committee or other similar committee of the board of directors or the board itself.

Under Sarbanes-Oxley, longer prison terms will apply to corporate executives who violate federal securities laws; the period during which certain types of suits can be brought against a company or its officers is extended; and bonuses issued to top executives prior to restatement of a company's financial statements are now subject to disgorgement if such restatement was due to corporate misconduct. Executives are also prohibited from trading the company's securities during retirement plan "blackout" periods, and loans to company executives (other than loans by financial institutions permitted by federal rules and regulations) are restricted. In addition, a provision directs that civil penalties levied by the Securities and Exchange Commission as a result of any judicial or administrative action under Sarbanes-Oxley be deposited to a fund for the benefit of harmed investors. The Federal Accounts for Investor Restitution provision also requires the Securities and Exchange Commission to develop methods of improving collection rates. The legislation accelerates the time frame for disclosures by public companies, as they must

immediately disclose any material changes in their financial condition or operations. Directors and executive officers must also provide information for most changes in ownership in a company's securities within two business days of the change.

Sarbanes-Oxley also increases the oversight of, and codifies certain requirements relating to, audit committees of public companies and how they interact with the company's "registered public accounting firm." Audit Committee members must be independent and are absolutely barred from accepting consulting, advisory or other compensatory fees from the issuer. In addition, companies must disclose whether at least one member of the committee is a "financial expert" (as such term is defined by the Securities and Exchange Commission) and if not, why not. Under Sarbanes-Oxley, a company's registered public accounting firm is prohibited from performing statutorily mandated audit services for a company if such company's chief executive officer, chief financial officer, comptroller, chief accounting officer or any person serving in equivalent positions had been employed by such firm and participated in the audit of such company during the one-year period preceding the audit initiation date. Sarbanes-Oxley also prohibits any officer or director of a company or any other person acting under their direction from taking any action to fraudulently influence, coerce, manipulate or mislead any independent accountant engaged in the audit of the company's financial statements for the purpose of rendering the financial statements materially misleading. Sarbanes-Oxley also requires the Securities and Exchange Commission to prescribe rules requiring inclusion of any internal control

report and assessment by management in the annual report to shareholders. Sarbanes-Oxley requires the company's registered public accounting firm that issues the audit report to report on the company's internal control over financial planning.

Under Section 404 of the Sarbanes-Oxley Act of 2002, we are required to conduct a comprehensive review and assessment of the adequacy of our existing financial systems and controls.

AVAILABILITY OF ANNUAL REPORT

Our Annual Report is available on our website, www.bcb Bancorp.com. We will also provide our Annual Report on Form 10-K free of charge to shareholders who write to the Corporate Secretary at 104-110 Avenue C, Bayonne, New Jersey 07002.

ITEM 1A. RISK FACTORS

Our loan portfolio consists of a high percentage of loans secured by commercial real estate and multi-family real estate. These loans are riskier than loans secured by one- to four-family properties.

At December 31, 2013, \$677.1 million, or 65.3% of our loan portfolio consisted of commercial and multi-family real estate loans. We intend to continue to emphasize the origination of these types of loans. These loans generally expose a lender to greater risk of nonpayment and loss than one- to four-family residential mortgage loans because repayment of the loans often depends on the successful operation and income stream of the borrower's business. Such loans typically involve larger loan balances to single borrowers or groups of related borrowers compared to one- to four-family residential mortgage loans. Consequently, an adverse development with respect to one loan or one credit relationship can expose us to a significantly greater risk of loss compared to an adverse development with respect to a one- to four-family residential mortgage loan.

We may not be able to successfully maintain and manage our growth.

Our growth since July 2010 has primarily been driven by acquisitions. Our ability to continue to grow depends, in part, upon our ability to expand our market presence, successfully attract core deposits, identify attractive commercial lending opportunities, and identify potential acquisitions and complete such acquisitions.

We cannot be certain as to our ability to manage increased levels of assets and liabilities. We may be required to make additional investments in equipment and personnel to manage higher asset levels and loans balances, which may adversely impact our efficiency ratio, earnings and shareholder returns.

If our allowance for loan losses is not sufficient to cover actual loan losses, our earnings could decrease.

Our loan customers may not repay their loans according to the terms of their loans, and the collateral securing the payment of their loans may be insufficient to assure repayment. We may experience significant credit losses, which could have a material adverse effect on our operating results. We make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of many of our loans. In determining the amount of the allowance for loan losses, we review our loans and our loss and delinquency experience, and we evaluate economic conditions. If our assumptions prove to be incorrect, our allowance for loan losses may not cover losses in our loan portfolio at the date of the financial statements. Material additions to our allowance would materially decrease our net income. At December 31, 2013, our allowance for loan losses totaled \$14.3 million, representing 1.38% of total loans.

While we have only been operating for thirteen years, we have experienced significant growth in our loan portfolio, particularly our loans secured by commercial real estate. Although we believe we have underwriting standards to manage normal lending risks, and although we had \$22.8 million, or 1.89% of total assets consisting of non-performing assets at December 31, 2013, it is difficult to assess the future performance of our loan portfolio due to the relatively recent origination of many of these loans. We can give you no assurance that our non-performing loans will not increase or that our non-performing or delinquent loans will not adversely affect our future performance.

In addition, federal and state regulators periodically review our allowance for loan losses and may require us to increase our allowance for loan losses or recognize further loan charge-offs. Any increase in our allowance for loan losses or loan charge-offs as required by these regulatory agencies could have a material adverse effect on our results of operations and financial condition.

We depend primarily on net interest income for our earnings rather than fee income.

Net interest income is the most significant component of our operating income. We do not rely on traditional sources of fee income utilized by some community banks, such as fees from sales of insurance, securities or investment advisory products or services. For the years ended December 31, 2013 and 2012, our net interest income was \$46.8 million and \$41.7 million, respectively. The amount of our net interest income is influenced by the overall interest rate environment, competition, and the amount of interest-earning assets relative to the amount of interest-bearing liabilities. In the event that one or more of these factors were to result in a decrease in our net interest income, we do not have significant sources of fee income to make up for decreases in net interest income.

If Our Investment in the Federal Home Loan Bank of New York is Classified as Other-Than-Temporarily Impaired, Our Earnings and Stockholders' Equity Could Decrease.

We own common stock of the Federal Home Loan Bank of New York. We hold the FHLBNY common stock to qualify for membership in the Federal Home Loan Bank System and to be eligible to borrow funds under the FHLBNY's advance program. The aggregate cost and fair value of our FHLBNY common stock as of December 31, 2013 was \$7.8 million based on its par value. There is no market for our FHLBNY common stock.

Recent published reports indicate that certain member banks of the Federal Home Loan Bank System may be subject to accounting rules and asset quality risks that could result in materially lower regulatory capital levels. In an extreme situation, it is possible that the capitalization of a Federal Home Loan Bank, including the FHLBNY, could be substantially diminished or reduced to zero. Consequently, we believe that there is a risk that our investment in FHLBNY common stock could be

deemed other-than-temporarily impaired at some time in the future, and if this occurs, it would cause our earnings and stockholders' equity to decrease by the after-tax amount of the impairment charge.

Fluctuations in interest rates could reduce our profitability.

We realize income primarily from the difference between the interest we earn on loans and investments and the interest we pay on deposits and borrowings. The interest rates on our assets and liabilities respond differently to changes in market interest rates, which means our interest-bearing liabilities may be more sensitive to changes in market interest rates than our interest-earning assets, or vice versa. In either event, if market interest rates change, this "gap" between the amount of interest-earning assets and interest-bearing liabilities that reprice in response to these interest rate changes may work against us, and our earnings may be negatively affected.

We are unable to predict fluctuations in market interest rates, which are affected by, among other factors, changes in the following:

- inflation rates;

- business activity levels;

- money supply; and

- domestic and foreign financial markets.

The value of our investment portfolio and the composition of our deposit base are influenced by prevailing market conditions and interest rates. Our asset-liability management strategy, which is designed to mitigate the risk to us from changes in market interest rates, may not prevent changes in interest rates or securities market downturns from reducing deposit outflow or from having a material adverse effect on our results of operations, our financial condition or the value of our investments.

Adverse events in New Jersey, where our business is concentrated, could adversely affect our results and future growth.

Our business, the location of our branches and the real estate collateralizing our real estate loans are concentrated in New Jersey. As a result, we are exposed to geographic risks. The occurrence of an economic downturn in New Jersey, or adverse changes in laws or regulations in New Jersey, could impact the credit quality of our assets, the business of our customers and our ability to expand our business.

Our success significantly depends upon the growth in population, income levels, deposits and housing in our market area. If the communities in which we operate do not grow or if prevailing economic conditions locally or nationally are unfavorable, our business may be negatively affected. In addition, the economies of the communities in which we operate are substantially dependent on the growth of the economy in the State of New Jersey. To the extent that economic conditions in New Jersey are unfavorable or do not continue to grow as projected, the economy in our market area would be adversely affected. Moreover, we cannot give any assurance that we will benefit from any market growth or favorable economic conditions in our market area if they do occur.

In addition, the market value of the real estate securing loans as collateral could be adversely affected by unfavorable changes in market and economic conditions. As of December 31, 2013, approximately 93.7% of our total loans were secured by real estate. Adverse developments affecting commerce or real estate values in the local economies in our primary market areas could increase the credit risk associated with our loan portfolio. In addition, substantially all of our loans are to individuals and businesses in New Jersey. Our business customers may not have customer bases that are as diverse as businesses serving regional or national markets. Consequently, any decline in the economy of our market area could have an adverse impact on our revenues and financial condition. In particular, we may experience increased loan delinquencies, which could result in a higher provision for loan losses and increased charge-offs. Any sustained period of increased non-payment, delinquencies, foreclosures or losses caused by adverse market or economic conditions in our market area could adversely affect the value of our assets, revenues, results of operations and financial condition.

We operate in a highly regulated environment and may be adversely affected by changes in federal, state and local laws and regulations.

We are subject to extensive regulation, supervision and examination by federal and state banking authorities. Any change in applicable regulations or federal, state or local legislation could have a substantial impact on us and our operations. Additional legislation and regulations that could significantly affect our powers, authority and operations may be enacted or adopted in the future, which could have a material adverse effect on our financial condition and results of operations. Further, regulators have significant discretion and authority to prevent or remedy unsafe or unsound practices or violations of laws by banks and bank holding companies in the performance of their supervisory and enforcement duties. The exercise of regulatory authority may have a negative impact on our results of operations and financial condition.

Like other bank holding companies and financial institutions, we must comply with significant anti-money laundering and anti-terrorism laws. Under these laws, we are required, among other things, to enforce a customer identification

program and file currency transaction and suspicious activity reports with the federal government. Government agencies have substantial discretion to impose significant monetary penalties on institutions which fail to comply with these laws or make required reports. Because we operate our business in the highly urbanized greater Newark/New York City metropolitan area, we may be at greater risk of scrutiny by government regulators for compliance with these laws.

Failure to achieve and maintain effective internal control over financial reporting in accordance with rules of the Securities and Exchange Commission promulgated under Section 404 of the Sarbanes-Oxley Act could harm our business and operating results and/or result in a loss of investor confidence in our financial reports, which could in turn have a material adverse effect on our business and stock price.

Under rules of the Securities and Exchange Commission promulgated under Section 404 of the Sarbanes-Oxley Act of 2002, we were required to furnish a report by our management on our internal control over financial reporting in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011. In the course of our assessment of the effectiveness of our internal control over financial reporting as of December 31, 2011, which assessment was conducted during the fourth quarter of 2011 and the first quarter of 2012 in connection with the preparation of 2011 audited consolidated financial statements and our Annual Report on Form 10-K, we identified a material weakness in our internal control over financial reporting resulting from (i) a failure to document that monitoring controls were in place with respect to outside service organizations, and that (ii) we failed to test the operating effectiveness of such controls as of December 31, 2011. The Company did test the operating

effectiveness of its monitoring controls subsequent to December 31, 2011 and found them to be effective. The material weakness in our internal control over financial reporting, as described in Item 9A, Controls and Procedures, of our Annual Report on Form 10-K for the year ended December 31, 2011, as well as any other weaknesses or deficiencies that may exist or hereafter arise or be identified, could harm our business and operating results, and could result in adverse publicity and a loss in investor confidence in the accuracy and completeness of our financial reports, which in turn could have a material adverse effect on our stock price, and, if such weaknesses are not properly remediated, could adversely affect our ability to report our financial results on a timely basis.

As a result of the foregoing our independent registered public accounting firm identified a material weakness in the Company's internal controls and procedures citing the Company's failure to document monitoring controls over the use of outside service organizations and to test the operating effectiveness of such controls as of December 31, 2011. The material weakness was considered in determining the nature, timing and extent of audit tests applied in the independent public accounting firm's audit of our 2011 consolidated financial statements. Consequently, our independent registered public accounting firm concluded that the Company did not maintain effective internal control over financial reporting as of December 31, 2011.

Although we believe that we have identified the material weakness, identified in Item 9A. Controls and Procedures, of this report, we cannot assure you that additional deficiencies or weaknesses in our internal control over financial reporting will not be identified. In addition, we have as of the date of this filing revised our internal control over financial reporting to ensure that the material deficiency noted above does not occur in the future.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The Bank conducts its business through an executive office, one administrative office, and eleven branch offices. Six offices have drive-up facilities. The Bank has eleven automatic teller machines at its branch facilities and two other off-site locations. The following table sets forth information relating to each of the Bank's offices as of December 31, 2013. The total net book value of the Bank's premises and equipment at December 31, 2013 was \$13.8 million.

Location	Year Office Opened	Net Book Value	
		(In Thousands)	
Executive Office 104-110 Avenue C Bayonne, New Jersey	2003	\$ 2,686	
Administrative Office 591-597 Avenue C Bayonne, New Jersey	2010	2,272	
Branch Offices 860 Broadway Bayonne, New Jersey	2000	773	(1)

ITEM 3. LEGAL PROCEEDINGS

We are involved, from time to time, as plaintiff or defendant in various legal actions arising in the normal course of business. Other than as set forth below, as of December 31, 2013, we were not involved in any material legal proceedings, the outcome of which, if determined in a manner adverse to the Company, would have a material adverse affect on our financial condition or results of operations.

The Company is a named defendant in the lawsuit *Kontos v. Robbins, et al.*, filed in the Superior Court of New Jersey on May 15, 2012. The lawsuit alleges that Spencer Robbins, the former Chairman of the Board of Allegiance Community Bank and currently a director of the Company, and others misled Mr. Kontos with respect to his investment in a real estate project and induced Mr. Kontos to borrow money from Allegiance Community Bank, also a named defendant. The lawsuit seeks an unspecified dollar amount of damages. Insurance coverage is currently in effect. The Company has filed its Answer to the lawsuit. The Company is vigorously defending its interests in this litigation.

The Company, as the successor to Pamrapo Bancorp, Inc., and in its own corporate capacity, is a named defendant in a shareholder class action lawsuit, *Kube v. Pamrapo Bancorp, Inc., et al.*, filed in the Superior Court of New Jersey, Hudson County, Chancery Division, General Equity. On May 9, 2012, the Company obtained partial summary judgment, dismissing three of the five Counts of the Complaint. On May 9, 2012, plaintiff's counsel was awarded interim legal fees of approximately \$350,000. The Company's obligation to pay that amount has been stayed. By Order, dated December 10, 2013, the court denied the plaintiff's initial motion for class certification. The plaintiff thereafter filed a motion seeking certification for a substantially reduced class. That motion was granted on February 6, 2014. The Company filed a motion for summary judgment, seeking the dismissal of the remaining two Counts of the Complaint. That motion was denied on February 19, 2014. The parties have conferred in an effort to resolve this case. A final resolution is being pursued. The Company is vigorously defending its interests in this litigation.

The Company has made claims with both of the Directors' and Officers' Liability insurance carriers for Pamrapo Bancorp, Inc., and the Company, seeking indemnification and reimbursement of the attorney's fees and defense costs incurred by the Company in defending this litigation. These claims are pending.

The Company is a named defendant in a lawsuit, *Armstrong v. BCB Bancorp, Inc., and Brian M. Campbell*, which was filed in the Superior Court of New Jersey, Atlantic County, Law Division, on September 27, 2011. The Company is a named defendant as the successor to Pamrapo Bancorp, Inc. The lawsuit accuses Brian Campbell, the former Managing Director of Pamrapo Services Corporation, a wholly-owned subsidiary of Pamrapo Bancorp, Inc., of various violations of federal and state securities laws, fraud, breach of fiduciary duty and negligence. Prime Capital, Inc., and other entities have been named as additional, potentially-responsible parties by the Company and/or the plaintiff. The case has been transferred to FINRA arbitration. The arbitration is in its discovery stage. The plaintiff is

seeking unspecified damages. The arbitration hearing is scheduled to begin on June 23, 2014. Insurance coverage is currently in effect for the Company. The Company is vigorously defending its interests in this litigation. The parties have conferenced in an effort to resolve this case. A final resolution is being pursued.

ITEM 4. MINE SAFETY DISCLOSURE

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

BCB Bancorp, Inc.'s common stock trades on the Nasdaq Global Market under the symbol "BCBP." In order to list common stock on the Nasdaq Global Market, the presence of at least three registered and active market makers is required and BCB Bancorp, Inc. has at least three market makers.

The following table sets forth the high and low closing prices for BCB Bancorp, Inc. common stock for the periods indicated. As of December 31, 2013, there were 8,331,750 shares of BCB Bancorp, Inc. common stock outstanding. At December 31, 2013, BCB Bancorp, Inc. had approximately 2,000 stockholders of record.

Fiscal 2013		High	Low	Cash Dividend Declared
Quarter Ended December 31, 2013	\$	14.37	\$ 10.70	\$ 0.12
Quarter Ended September 30, 2013		10.99	10.25	0.12
Quarter Ended June 30, 2013		11.30	9.85	0.12
Quarter Ended March 31, 2013		10.23	8.75	0.12
Fiscal 2012		High	Low	Cash Dividend Declared
Quarter Ended December 31, 2012	\$	10.74	\$ 8.71	\$ 0.12
Quarter Ended September 30, 2012		10.80	10.05	0.12
Quarter Ended June 30, 2012		10.99	9.80	0.12
Quarter Ended March 31, 2012		10.60	9.68	0.12

Please see "Item 1. Business—Bank Regulation—Dividends" for a discussion of restrictions on the ability of the Bank to pay the Company dividends.

Compensation Plans

Set forth below is information as of December 31, 2013 regarding equity compensation plans that have been approved by shareholders. The Company has no equity based benefit plans that were not approved by shareholders.

Edgar Filing: BCB BANCORP INC - Form 10-K/A

	Number of securities to be issued upon exercise of outstanding options and rights	Weighted average Exercise price(2) \$	Number of securities remaining available for issuance under plan
Equity compensation plans approved by shareholders	344,128(1)	11.09	715,000
Equity compensation plans not approved by shareholders	—	—	-0-
		\$	
Total	344,128	11.09	715,000

-
- (1) Consists of options to purchase (i) 21,620 shares of common stock under the 2002 Stock Option Plan and (ii) 109,347 shares of common stock under the 2003 Stock Option Plan and (iii) 13,569 shares of common stock under the 2003 Stock Option Plan from the former Pamrapo Bancorp, Inc., converted to options to purchase shares of common stock of BCB Bancorp under the terms of the merger agreement and 199,592 under the 2011 Stock Option Plan.
- (2) The weighted average exercise price reflects the exercise prices ranging from \$9.34 to \$15.65 per share for options granted under the 2003 Stock Option Plan and ranging from \$11.84 to \$15.65 per share for options under the 2002 Stock Option Plan and ranging from \$18.41 to \$29.25 per share for options under the 2003 Stock Option Plan from the former Pamrapo Bancorp, Inc., converted to options to purchase shares of common stock of BCB Bancorp under the terms of the merger agreement and at \$8.93-\$10.50 per share for options under the 2011 Stock Option Plan.

Set forth hereunder is a stock performance graph comparing (a) the cumulative total return on the common stock for the period beginning with the closing sales price on January 1, 2009 through December 31, 2013, (b) the cumulative total return on all publicly traded commercial bank stocks over such period, and (c) the cumulative total return of Nasdaq Market Index over such period. Cumulative return assumes the reinvestment of dividends, and is expressed in dollars based on an assumed investment of \$100.

BCB BANCORP, INC.

Index	Period Ending					
	12/31/08	12/31/09	12/31/10	12/31/11	12/31/12	12/31/13
BCB Bancorp, Inc.	100.00	91.05	104.58	112.68	110.53	164.74
NASDAQ Composite	100.00	145.36	171.74	170.38	200.63	281.22
SNL Bank	100.00	98.97	110.90	85.88	115.90	159.12

On May 9, 2012, the Company announced a sixth stock repurchase plan to repurchase 5% or 462,800 shares of the Company's common stock. On June 28, 2012, the Company announced a seventh stock repurchase plan to repurchase 5% of 440,000 shares of the Company's common stock. On July 17, 2013, the Company announced a stock repurchase plan to repurchase up to 400,000 shares of the Company's common stock. The Company's stock purchases for three months ended December 31, 2013 are as follows:

24

Period	Total number of shares purchased	Average price per share paid	Total number of shares purchased as part of a publicly announced program	Number of shares remaining to be purchased under program
October 1-31, 2013	568	10.84	568	416,830
November 1-30, 2013	1,041	13.95	1,609	415,221
December 1-31, 2013	-	-	-	-
Total	1,609	12.85	1,609	415,221

ITEM 6. SELECTED CONSOLIDATED FINANCIAL DATA

The following tables set forth selected consolidated historical financial and other data of BCB Bancorp, Inc. at and for the years ended December 31, 2013, 2012, 2011, 2010 and 2009. The information is derived in part from, and should be read together with, the audited Consolidated Financial Statements and Notes thereto of BCB Bancorp, Inc. Per share data has been adjusted for all periods to reflect the common stock dividends paid by the Company.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

General

This discussion, and other written material, and statements management may make, may contain certain forward-looking statements regarding the Company's prospective performance and strategies within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as

amended. The Company intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and is including this statement for purposes of said safe harbor provisions.

Forward-looking information is inherently subject to risks and uncertainties, and actual results could differ materially from those currently anticipated due to a number of factors, which include, but are not limited to, factors discussed in the Company's Annual Report on Form 10-K and in other documents filed by the Company with the Securities and Exchange Commission. Forward-looking statements, which are based on certain assumptions and describe future plans, strategies and expectations of the Company, are generally identified by the use of the words "plan," "believe," "expect," "intend," "anticipate," "estimate," "project," "may," "will," "should," "could," "predicts," "forecasts," "potential," or similar terms or the negative of these terms. The Company's ability to predict results or the actual effects of its plans or strategies is inherently uncertain. Accordingly, actual results may differ materially from anticipated results.

Factors that could have a material adverse effect on the operations of the Company and its subsidiaries include, but are not limited to, changes in market interest rates, general economic conditions, legislation, and regulation; changes in monetary and fiscal policies of the United States Government, including policies of the United States Treasury and Federal Reserve Board; changes in the quality or composition of the loan or investment portfolios; changes in deposit flows, competition, and demand for financial services, loans, deposits and investment products in the Company's local markets; changes in accounting principles and guidelines; war or terrorist activities; and other economic, competitive, governmental, regulatory, geopolitical and technological factors affecting the Company's operations, pricing and services.

Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this discussion. Although the Company believes that the expectations reflected in the forward-looking statements are reasonable, the Company cannot guarantee future results, levels of activity, performance or achievements. Except as required by applicable law or regulation, the Company undertakes no obligation to update these forward-looking statements to reflect events or circumstances that occur after the date on which such statements were made.

Critical Accounting Policies

Critical accounting policies are those accounting policies that can have a significant impact on the Company's financial position and results of operations that require the use of complex and subjective estimates based upon past experiences and management's judgment. Because of the uncertainty inherent in such estimates, actual results may differ from these estimates. Below are those policies applied in preparing the Company's consolidated financial statements that management believes are the most dependent on the application of estimates and assumptions. For additional accounting policies, see Note 2 of "Notes to Consolidated Financial Statements."

Allowance for Loan Losses

Loans receivable are presented net of an allowance for loan losses and net deferred loan fees. In determining the appropriate level of the allowance, management considers a combination of factors, such as economic and industry trends, real estate market conditions, size and type of loans in portfolio, nature and value of collateral held, borrowers' financial strength and credit ratings, and prepayment and default history. The calculation of the appropriate allowance for loan losses requires a substantial amount of judgment regarding the impact of the aforementioned factors, as well as other factors, on the ultimate realization of loans receivable. In addition, our determination of the amount of the allowance for loan losses is subject to review by the New Jersey Department of Banking and Insurance and the FDIC, as part of their examination process. After a review of the information available, our regulators might require the establishment of an additional allowance. Any increase in the loan loss allowance required by regulators would have a negative impact on our earnings.

Other-than-Temporary Impairment of Securities

If the fair value of a security is less than its amortized cost, the security is deemed to be impaired. Management evaluates all securities with unrealized losses quarterly to determine if such impairments are "temporary" or "other-than-temporary" in accordance with Accounting Standards Codification ("ASC") Topic 320,

Investments – Debt and Equity Securities.

Accordingly, temporary impairments are accounted for based upon the classification of the related securities as either available for sale or held to maturity. Temporary impairments on available for sale securities are recognized, on a tax-effected basis, through Other Comprehensive Income ("OCI") with offsetting entries adjusting the carrying value of the securities and the balance of deferred taxes. Conversely, the carrying values of held to maturity securities are not adjusted for temporary impairments. Information concerning the amount and duration of temporary impairments on both available for sale and held to maturity securities is generally disclosed in the notes to the consolidated financial statements.

Other-than-temporary impairments are accounted for based upon several considerations. First, other-than-temporary impairments on debt securities that the Company has decided to sell as of the close of a fiscal period, or will, more likely than not, be required to sell prior to the full recovery of fair value to a level equal to or exceeding amortized cost, are recognized in earnings. If neither of these conditions regarding the likelihood of the sale of debt securities are applicable, then the other-than-temporary impairment is bifurcated into credit-related and noncredit-related components. A credit-related impairment represents the amount by which the present value of the cash flows that are expected to be collected on a debt security fall below its amortized cost. The noncredit-related component represents the remaining portion of the impairment not otherwise designated as credit-related. Credit-related other-than-temporary impairments are recognized in earnings and noncredit-related other-than-temporary impairments are recognized in OCI. Equity securities on which there is an unrealized loss that is deemed other-than-temporary are written down to fair value with the write-down recognized in earnings.

Deferred Income Taxes

The Company records income taxes using the asset and liability method. Accordingly, deferred tax assets and liabilities: (i) are recognized for the expected future tax consequences of events that have been recognized in the consolidated financial statements or the consolidated and separate entity tax returns; (ii) are attributable to differences between the consolidated financial statement carrying amounts of existing assets and liabilities and their respective tax bases; and (iii) are measured using enacted tax rates expected to apply in the years when those temporary differences are expected to be recovered or settled.

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion of the deferred tax assets will not be realized. In making this assessment, management considers the profitability of current core operations, future market growth, forecasted earnings, future taxable income, and ongoing, feasible and permissible tax planning strategies. Deferred tax assets have been reduced by a valuation allowance for all portions determined not likely to be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income tax expense in the period of enactment. The valuation allowance is adjusted, by a charge or credit to income tax expense, as changes in facts and circumstances warrant.

Fair Value Measurements

Management uses its best judgment in estimating fair value measurements of the Company's financial instruments; however, there are inherent weaknesses in any estimation technique. Management utilized various inputs to determine fair value including but not limited to the use of, valuation techniques based on various assumptions, including, but not limited to cash flows, discount rates, rate of return, adjustments for nonperformance and liquidity, quoted market prices, and appraisals. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Company could have realized in a sales transaction on the dates indicated. The estimated fair value amounts have been measured as of their respective year-ends and have not been re-evaluated or updated for purposes of these consolidated financial statements subsequent to those respective

dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each year-end.

Financial Condition

Total assets increased by \$36.6 million or 3.1% to \$1.208 billion at December 31, 2013 from \$1.171 billion at December 31, 2012. The increase in total assets occurred as a result of an increase in net loans receivable of \$98.0 million, partially offset by a decrease in securities held to maturity of \$50.4 million and a decrease in total cash and cash equivalents of \$4.3 million. Management has historically concentrated on maintaining adequate liquidity in anticipation of funding loans in the loan pipeline as well as seeking opportunities in the secondary market that provide competitive returns in a risk-mitigated environment. During 2013 we have utilized our liquidity to take advantage of lending opportunities. It is our intention to grow the balance sheet at a measured pace consistent with our capital levels and as business opportunities permit.

Total cash and cash equivalents decreased by \$4.3 million or 12.6% to \$29.8 million at December 31, 2013 from \$34.1 million at December 31, 2012. Investment securities classified as held-to-maturity decreased by \$50.4 million or 30.6% to \$114.2 million at December 31, 2013 from \$164.6 million at December 31, 2012. This decrease in investment securities held-to-maturity resulted primarily from allowable sales of \$9.5 million of mortgage-backed securities from the held-to-maturity portfolio and \$46.0 million of repayments and prepayments in the mortgage-backed securities portfolio, partially offset by purchases of \$5.1 million in investment securities. The cash proceeds received from the sales and normal amortization discussed above have been utilized to fund loan originations.

Loans receivable, net increased by \$98.0 million or 10.6% to \$1.020 billion at December 31, 2013 from \$922.3 million at December 31, 2012. The increase resulted primarily from a \$104.1 million increase in real estate mortgages comprising commercial and multi-family, construction and participation loans with other financial institutions along with a \$3.8 million increase in business loans and commercial lines of credit partially offset by a decrease of \$2.6 million in residential real estate loans, along with a \$4.3 million decrease in home equity and home equity lines of credit, partially offset by a \$2.0 million increase in the allowance for loan losses. During the second quarter of 2013, the Company sold at par \$24.2 million in commercial real estate participation loans in which no gain or loss was incurred. During the fourth quarter the Company purchased \$16.7 million in commercial real estate loans. As of December 31, 2013, the allowance for loan losses was \$14.3 million or 69.7% of non-performing loans and 1.38% of gross loans. As a result of the loans acquired in the business combination transactions being recorded at their fair value, the balances in the allowance for loan losses that were on the balance sheets of the former Pamrapo Bancorp, Inc., and Allegiance Community Bank are precluded from being reported in the allowance balance previously discussed, consistent with generally accepted accounting principles.

Deposit liabilities increased by \$27.9 million or 3.0% to \$968.7 million at December 31, 2013 from \$940.8 million at December 31, 2012. The increase resulted primarily from a \$21.7 million increase in non-interest bearing deposits, an increase of \$28.0 million in NOW deposits, an increase of \$7.6 million in savings and club deposits and an increase of \$3.3 million in money market interest bearing deposits which more than offset a \$32.7 million decrease in time deposits. Consistent with our customers' preferences, we have attempted to shift our funding from higher cost time

deposit accounts to more liquid and lower cost core deposits. During the quarter ended December 31, 2013, the Federal Open Market Committee (FOMC) has continued its mindset of a continuing accommodative monetary policy. This has resulted in historically low short term market rates that have further resulted in low time deposit account yields which in turn has had the effect of decreasing interest expense.

Short-term borrowings increased by \$1.0 million or 5.9% to \$18.0 million at December 31, 2013 from \$17.0 million at December 31, 2012. Long-term borrowings remained constant at \$114.1 million at December 31, 2013 and December 31, 2012, respectively. The purpose of the borrowings reflects the use of long term and short term Federal Home Loan Bank advances to augment deposits as the Company's funding source for originating loans and investing in GSE investment securities.

Stockholders' equity increased by \$8.5 million or 9.3% to \$100.1 million at December 31, 2013 from \$91.6 million at December 31, 2012. The increase in stockholders' equity is primarily attributable to net income of \$9.4 million offset by the Company repurchasing during the period 184,808 shares of the Company's common stock at a cost of \$1.9 million along with cash dividends paid during the period totaling \$4.0 million on outstanding common shares of stock and \$559,000 on outstanding preferred shares of stock. The Company accrued a dividend payable for the fourth quarter on the preferred shares for \$170,000 which will be paid in the first quarter of 2014. As of December 31, 2013, the Bank's Tier 1, Tier 1 Risk-Based and Total Risk Based Capital Ratios were 8.70%, 12.41% and 13.66% respectively.

Analysis of Net Interest Income

Net interest income is the difference between interest income on interest-earning assets and interest expense on interest-bearing liabilities. Net interest income depends on the relative amounts of interest-earning assets and interest-bearing liabilities and the interest rates earned or paid on them, respectively.

The following tables set forth balance sheets, average yields and costs, and certain other information for the periods indicated. All average balances are daily average balances. The yields set forth below include the effect of deferred fees, discounts and premiums, which are included in interest income.

	At December 31, 2013		Year ended December 31, 2013				Year ended Decem

(3)Interest rate spread represents the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities.

(4)Net interest margin represents net interest income as a percentage of average interest-earning assets.

(5)Average yields are computed using annualized interest income and expense for the periods.

Rate/Volume Analysis

The table below sets forth certain information regarding changes in our interest income and interest expense for the periods indicated. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (i) changes in average volume (changes in average volume multiplied by old rate); (ii) changes in rate (change in rate multiplied by old average volume); (iii) changes due to combined changes in rate and volume; and (iv) the net change.

Results of Operations for the Years Ended December 31, 2013 and 2012

Net income was \$9.42 million for the year ended December 31, 2013 compared with a net loss of (\$2.06) million for the year ended December 31, 2012. Our net income reflects increases in net interest income and non-interest income and decreases in non-interest expense and provision for loan losses, partially offset by an increase in income tax provision.

Net interest income increased by \$5.1 million or 12.2% to \$46.8 million for the year ended December 31, 2013 from \$41.70 million for the year ended December 31, 2012. This increase in net interest income resulted primarily from an increase in the average yield of interest earning assets to 4.97% for the year ended December 31, 2013 from 4.63% for the year ended December 31, 2012, partially offset by a decrease of \$4.5 million or 0.4% in the average balance of interest earning assets to \$1.153 billion for the year ended December 31, 2013 from \$1.158 billion for the year ended December 31, 2012. The average balance of interest bearing liabilities decreased by \$30.0 million or 3.0% to \$974.7 million for the year ended December 31, 2013 from \$1.005 billion for the year ended December 31, 2012, while the average cost of interest bearing liabilities decreased to 1.09% for the year ended December 31, 2013 from 1.19% for the year ended December 31, 2012. As a consequence of the aforementioned, our net interest margin increased to 4.06% for the year ended December 31, 2013 from 3.60% for the year ended December 31, 2012. The increase in the average yield of interest earning assets and the decrease in the average cost of interest bearing liabilities represents management's efforts to competitively price certain products to maximize profitability. The decrease in the average balance of both interest earning assets and interest bearing liabilities represents a pre-planned minor deleveraging of the balance sheet.

Interest income on loans receivable increased by \$5.76 million or 12.1% to \$53.52 million for the year ended December 31, 2013 from \$47.76 million for the year ended December 31, 2012. The increase was primarily attributable to an increase in the average balance of loans receivable of \$116.2 million or 13.4% to \$980.8 million for the year ended December 31, 2013 from \$864.6 million for the year ended December 31, 2012, partially offset by a slight decrease in the average yield of loans receivable to 5.46% for the year ended December 31, 2013 from 5.52% for the year ended December 31, 2012. The increase in the average balance of loans is primarily attributable to the re-allocation of excess liquidity into higher yielding loan products. The decrease in average yield reflects the competitive price environment prevalent in the Bank's primary market area on loan facilities as well as the repricing downward of variable rate loans.

Interest income on securities decreased by \$1.99 million or 34.4% to \$3.79 million for the year ended December 31, 2013 from \$5.78 million for the year ended December 31, 2012. This decrease was primarily due to a decrease in the average balance of securities of \$64.0 million or 31.3% to \$140.4 million for the year ended December 31, 2013 from \$204.4 million for the year ended December 31, 2012, as well as a decrease in the average yield of investment securities to 2.70% for the year ended December 31, 2013 from 2.83% for the year ended December 31, 2012. The decrease in the average balance represents the amortization of the portfolio in the absence of any material purchases of investment securities. The decrease in the average yield reflects the persistent low interest rate environment during the year ended December 31, 2013.

Interest income on other interest-earning assets decreased by \$60,000 or 53.6% to \$52,000 for the year ended December 31, 2013 from \$112,000 for the year ended December 31, 2012. This decrease was primarily due to a decrease of \$56.8 million or 64.0% in the average balance of other interest-earning assets to \$32.0 million for the year ended December 31, 2013 from \$88.8 million for the year ended December 31, 2012. The average yield on other interest-earning assets increased slightly to 0.16% for the year ended December 31, 2013 from 0.13% for the year ended December 31, 2012. The somewhat static nature of the average yield on other interest-earning assets reflects the current philosophy by the FOMC of keeping short term interest rates at historically low levels for the last several years.

Total interest expense decreased by \$1.37 million or 11.5% to \$10.58 million for the year ended December 31, 2013 from \$11.95 million for the year ended December 31, 2012. The decrease resulted primarily from a decrease in the average balance of interest bearing liabilities of \$30.0 million or 3.0% to \$974.7 million for the year ended December 31, 2013 from \$1.005 billion for the year ended December 31, 2012 as well as a decrease in the cost of interest-bearing liabilities of ten basis points to 1.09% for the year ended December 31, 2013 from 1.19% for the year ended December 31, 2012. The decrease in the average cost of interest bearing liabilities reflects the Company's reaction to the lower short term interest rate environment and our ability to reduce our pricing on a select number of retail deposit products.

The provision for loan losses totaled \$2.75 million and \$4.9 million for the years ended December 31, 2013 and 2012, respectively. The provision for loan losses is established based upon management's review of the Bank's loans and consideration of a variety of factors including, but not limited to, (1) the risk characteristics of the loan portfolio, (2) current economic conditions, (3) actual losses previously experienced, (4) the activity and fluctuating balance of loans receivable, and (5) the existing level of reserves for loan losses that are probable and estimable. During the year ended December 31, 2013, the Company experienced \$771,000 in net charge-offs (consisting of \$971,000 in charge-offs and \$200,000 in recoveries). During the year ended December 31, 2012, the Company experienced \$3.05 million in net charge-offs (consisting of \$3.08 million in charge-offs and \$35,000 in recoveries). The Company had non-performing loans totaling \$20.6 million or 1.98% of gross loans at December 31, 2013 and \$22.9 million or 2.45% of gross loans at December 31, 2012. The decrease in non-performing loans resulted primarily from the sales of approximately \$25.9 million in non-performing loans during the second and third quarters of 2012. The sale resulted in a pre-tax loss of approximately \$10.8 million. The primary reason for these transactions was the elimination of carrying and legacy costs associated with these non-interest earning assets. The allowance for loan losses was \$14.3 million or 1.38% of gross loans at December 31, 2013 as compared to \$12.4 million or 1.32% of gross loans at December 31, 2012. The amount of the allowance is based on estimates and the ultimate losses may vary from such estimates. Management assesses the allowance for loan losses on a quarterly basis and makes provisions for loan losses as necessary in order to maintain the adequacy of the allowance. While management uses available information to recognize losses on loans, future loan loss provisions may be necessary based on changes in the aforementioned criteria. In addition various regulatory agencies, as an integral part of their examination process, periodically review the allowance for loan losses and may require the Company to recognize additional provisions based on their judgment of information available to them at the time of their examination. Management believes that the allowance for loan losses was adequate at both December 31, 2013 and December 31, 2012.

Total non-interest income (loss) was \$3.38 million for the year ended December 31, 2013 compared with a loss of (\$7.23) million for the year ended December 31, 2012. The increase in our non-interest income was primarily due to a

decrease in loss on sale of loans of \$10.3 million for the year ended December 31, 2013 compared to December 31, 2012. During the year ended December 31, 2013, we reflected a loss on sale of loans for \$474,000 compared with a loss of \$10.8 million for the year ended December 31, 2012. Gain on sale of loans originated for sale increased by \$309,000 or 25.3% to \$1.53 million for the year ended December 31, 2013 from \$1.22 million for the year ended December 31, 2012. The increase in gain on sale of loans originated for sale occurred primarily from an increase in gain on selling SBA originated loans. Gain on sale of securities held to maturity increased by \$29,000 or 8.3% to \$378,000 for the year ended December 31, 2013 from \$349,000 for the year ended December 31, 2012. Fees and service charges and other non-interest income increased by \$218,000 or 12.6% to \$1.94 million for the year ended December 31, 2013 from \$1.72 million for the year ended December 31, 2012. This increase was primarily due to increases in deposit account service charges of \$425,000 partially offset by a decrease in late charges of \$196,000. These increases were partially offset by a decrease in gain on sale of loans acquired as for the year ended December 31, 2012, the Company sold approximately \$10.7 million of commercial business loans acquired in the Allegiance Community Bank acquisition which resulted in a gain of approximately \$286,000. No such transaction occurred during the year ended December 31, 2013.

Total non-interest expense decreased by \$2.45 million or 7.2% to \$31.44 million for the year ended December 31, 2013 from \$33.89 million for the year ended December 31, 2012. Salaries and employee benefits expense increased by \$674,000 or 4.5% to \$15.69 million for the year ended December 31, 2013 from \$15.02 million

for the year ended December 31, 2012. The increase resulted primarily from an increase in employee salaries of \$985,000, which more than offset decreases in overtime paid of \$173,000 and employee group insurance of \$185,000 compared to December 31, 2012. Occupancy expense decreased by \$42,000 or 1.2% to \$3.52 million for the year ended December 31, 2013 from \$3.56 million for the year ended December 31, 2012. Equipment expense increased by \$300,000 or 6.1% to \$5.21 million for the year ended December 31, 2013 from \$4.91 million for the year ended December 31, 2012. The primary component of this expense item is data service provider expense. Professional fees decreased by \$240,000 or 9.6% to \$2.25 million for the year ended December 31, 2013 from \$2.49 million for the year ended December 31, 2012. The decrease resulted primarily from a decrease in legal and legacy costs associated with the sale of the non-performing loan portfolio in 2012. Director fees decreased by \$56,000 or 7.7% to \$672,000 for the year ended December 31, 2013 from \$728,000 for the year ended December 31, 2012. Regulatory assessments decreased by \$76,000 or 6.5% to \$1.10 million for the year ended December 31, 2013 from \$1.17 million for the year ended December 31, 2012 primarily due to the new assessment base methodology pursuant to Dodd-Frank which lowered the Company's deposit insurance premiums. Advertising expense increased by \$99,000 or 20.5% to \$583,000 for the year ended December 31, 2013 from \$484,000 for the year ended December 31, 2012. The increase was primarily due to our marketing efforts to increase business at the Woodbridge Branch location. Other real estate owned expense decreased by \$1.89 million or 97.6% to \$46,000 for the year ended December 31, 2013 from \$1.94 million for the year ended December 31, 2012. The decrease in OREO expenses was primarily due to a decrease in write-downs of OREO properties of \$1.07 million or 111.4% to a write-up of (\$110,000) for the year ended December 31, 2013 compared to a write-down of \$965,000 for the year ended December 31, 2012 along with a decrease in loss on sale of OREO properties of \$786,000 or 115.6% to a gain of \$106,000 for the years ended December 31, 2013 from a loss on sale of OREO properties of \$680,000 for the year ended December 31, 2012 along with a decrease in OREO expenses of \$100,000 or 24.2% to \$313,000 for the year ended December 31, 2013 from \$413,000 for the year ended December 31, 2012, partially offset by a decrease in OREO rental income of \$70,000 or 57.9% to (\$51,000) for the year ended December 31, 2013 from (\$121,000) for the year ended December 31, 2012. Other non-interest expense decreased by \$1.22 million or 33.9% to \$2.38 million for the year ended December 31, 2013 from \$3.60 million for the year ended December 31, 2012. The decrease was primarily due to the sale of the non-performing loan portfolio in 2012 which alleviated the carrying and legacy costs associated with these non-performing loans which totaled approximately \$1.06 million. Other non-interest expense is comprised of loan expense, stationary, forms and printing, check printing, correspondent bank fees, telephone and communication, and other fees and expenses.

Income tax provision was \$6.55 million for the year ended December 31, 2013 compared with an income tax benefit of \$2.25 million for the year ended December 31, 2012, reflecting increased taxable income during the year ended December 31, 2013. The consolidated effective tax rate for the year ended December 31, 2013 was a tax provision of 41.0% compared to a tax benefit of 52.2% for the year ended December 31, 2012.

Results of Operations for the Years Ended December 31, 2012 and 2011

We experienced a net loss of \$2.06 million for the year ended December 31, 2012 compared with net income of \$6.05 million for the year ended December 31, 2011. The net loss was due to a decrease in the non-interest income primarily associated with losses incurred from the sale of non-performing loans in 2012, and increases in the provision for loans losses and non-interest expense, partially offset by an increase in net interest income and a decrease in income taxes.

Net interest income increased by \$2.12 million or 5.4% to \$41.70 million for the year ended December 31, 2012 from \$39.58 million for the year ended December 31, 2011. This increase in net interest income resulted primarily from an increase of \$57.5 million or 5.3% in the average balance of interest earning assets to \$1.16 billion for the year ended December 31, 2012 from \$1.10 billion for the year ended December 31, 2011, partially offset by a decrease in the average yield on interest earning assets to 4.63% for the year ended December 31, 2012 from 4.81% for the year ended December 31, 2011. The average balance of interest bearing liabilities increased by \$56.5 million or 6.0% to \$1.01 billion for the year ended December 31, 2012 from \$948.3 million for the year ended December 31, 2011, while the average cost of interest bearing liabilities decreased to 1.19% for the year ended December 31, 2012 from 1.41% for the year ended December 31, 2011. As a consequence of the aforementioned, our net interest margin remained static at 3.60% for the years ended December 31, 2012 and December 31, 2011. The increase in the average balance of interest earning assets and the average balance of interest bearing liabilities reflects the completion of the acquisition of Allegiance Community Bank.

Interest income on loans receivable increased by \$2.73 million or 6.1% to \$47.76 million for the year ended December 31, 2012 from \$45.02 million for the year ended December 31, 2011. The increase was primarily attributable to an increase in the average balance of loans receivable of \$60.6 million or 7.5% to \$864.6 million for the year ended December 31, 2012 from \$804.0 million for the year ended December 31, 2011, partially offset by a decrease in the average yield on loans receivable to 5.52% for the year ended December 31, 2012 from 5.60% for the year ended December 31, 2011. The increase in the average balance of loans is primarily attributable to the completion of the acquisition of Allegiance Community Bank. The decrease in average yield reflects the competitive price environment prevalent in the Bank's primary market area on loan facilities as well as the repricing downward of variable rate loans.

Interest income on securities decreased by \$1.99 million or 25.6% to \$5.78 million for the year ended December 31, 2012 from \$7.77 million for the year ended December 31, 2011. This decrease was due to a decrease in the average balance of securities held-to-maturity of \$13.0 million or 6.0% to \$204.4 million for the year ended December 31, 2012 from \$217.4 million for the year ended December 31, 2011, along with a decrease in the average yield of securities held-to-maturity to 2.83% for the year ended December 31, 2012 from 3.57% for the year ended December 31, 2011. The decrease in the average yield reflects the low interest rate environment during the year ended December 31, 2012.

Interest income on other interest-earning assets increased by \$25,000 or 28.7% to \$112,000 for the year ended December 31, 2012 from \$87,000 for the year ended December 31, 2011. This increase was primarily due to an increase of \$10.0 million or 12.7% in the average balance of other interest-earning assets to \$88.8 million for the year ended December 31, 2012 from \$78.8 million for the year ended December 31, 2011. The average yield on other interest-earning assets remained relatively static at 0.13% for the year ended December 31, 2012 and 0.11% for the year ended December 31, 2011. The static nature of the average yield on other interest-earning assets reflects the current philosophy by the FOMC of keeping short term interest rates at historically low levels for the last several years. The increased balance of other interest earning assets reflects management's decision to have higher liquid investments affording the Bank the latitude of capitalizing on advantageous market opportunities.

Total interest expense decreased by \$1.35 million or 10.2% to \$11.95 million for the year ended December 31, 2012 from \$13.30 million for the year ended December 31, 2011. The decrease resulted primarily from a decrease in the average cost of interest-bearing liabilities of twenty-one basis points to 1.19% for the year ended December 31, 2012 from 1.40% for the year ended December 31, 2011, partially offset by an increase in the balance of average interest-bearing liabilities of \$56.5 million or 5.9% to \$1.01 billion for the year ended December 31, 2012 from \$948.3 million for the year ended December 31, 2011. The increase in the balance of average interest-bearing liabilities is primarily attributable to the completion of the acquisition of Allegiance Community Bank. The decrease in the average cost reflects the lower short term interest rate environment and our ability to reduce our pricing on a select number of retail deposit products.

The provision for loan losses totaled \$4.9 million and \$4.1 million for the years ended December 31, 2012 and 2011, respectively. The provision for loan losses is established based upon management's review of the Bank's loans and consideration of a variety of factors including, but not limited to, (1) the risk characteristics of the loan portfolio, (2) current economic conditions, (3) actual losses previously experienced, (4) the dynamic activity and fluctuating balance of loans receivable, and (5) the existing level of reserves for loan losses that are probable and estimable. During the year ended December 31, 2012, the Bank experienced \$3.05 million in net charge-offs (consisting of \$3.08 million in charge-offs and \$35,000 in recoveries). During the year ended December 31, 2011, the Bank experienced \$2.01 million in net charge-offs (consisting of \$2.03 million in charge-offs and \$25,000 in recoveries). The Bank had non-performing loans totaling \$22.9 million or 2.45% of gross loans at December 31, 2012 and \$47.8 million or 5.61% of gross loans at December 31, 2011. The decrease in non-performing loans resulted primarily from the sales of approximately \$25.9 million in non-performing loans during the second quarter and third quarters of 2012. The primary reason for this transaction was the elimination of carrying and legacy costs associated with these non-interest earning assets. These sales resulted in a pre-tax loss of approximately \$10.8 million. The allowance for loan losses was \$12.4 million or 1.32% of gross loans at December 31, 2012 as compared to \$10.5 million or 1.23% of gross loans at December 31, 2011. Despite the decrease in non-performing loans, the provision and allowance for loan losses increased in recognition of the growth in the loan portfolio and due to uncertainty regarding the impact of Hurricane Sandy. The amount of the allowance is based on estimates and the ultimate losses may vary from such estimates. Management assesses the allowance for loan losses on a quarterly basis and makes provisions for loan losses as necessary in order to maintain the adequacy of the allowance. While management uses available information to recognize losses on loans, future loan loss provisions may be necessary based on changes in the aforementioned criteria. In addition various regulatory agencies, as an integral part of their examination process, periodically review the allowance for loan losses and may require the Bank to recognize additional provisions based on their judgment of information available to them at the time of their examination. Management believes that the allowance for loan losses was adequate at both December 31, 2012 and 2011.

Total non-interest income (loss) was a loss of (\$7.23) million for the year ended December 31, 2012 compared with income of \$2.45 million for the year ended December 31, 2011. The decrease in non-interest income resulted

primarily from the aforementioned \$10.8 million loss on sale of non-performing loans partially offset by an increase of \$333,000 or 37.5% in gain on sale of loans originated for sale to \$1.22 million for the year ended December 31, 2012 from \$887,000 for the year ended December 31, 2011. The increase in gain on sale of loans originated for sale occurred primarily as a result of the active local market for refinancing one-four family residential mortgages, aided in large part by the low interest rate environment. In addition, the Bank sold approximately \$10.6 million of commercial business loans acquired in the Allegiance Community Bank acquisition which resulted in a gain of approximately \$286,000. Gain on sale of securities held to maturity increased by \$331,000 or 1,838.9% to \$349,000 for the year ended December 31, 2012 from \$18,000 for the year ended December 31, 2011. Fees and service charges and other non-interest income increased by \$627,000 or 57.2% to \$1.72 million for the year ended December 31, 2012 primarily due to increases in deposit account service charges, loan application fees, and late charges from \$1.10 million for the year ended December 31, 2011.

Total non-interest expense increased by \$5.38 million or 18.9% to \$33.89 million for the year ended December 31, 2012 from \$28.51 million for the year ended December 31, 2011. Unless specified otherwise, the increase in the categories of non-interest expense occurred primarily as a result of the acquisition of Allegiance Community Bank. Salaries and employee benefits expense increased by \$2.34 million or 18.5% to \$15.02 million for the year ended December 31, 2012 from \$12.68 million for the year ended December 31, 2011. Occupancy expense increased by \$519,000 or 17.1% to \$3.56 million for the year ended December 31, 2012 from \$3.04 million for the year ended December 31, 2011. Equipment expense increased by \$606,000 or 14.2% to \$4.91 million for the year ended December 31, 2012 from \$4.30 million for the year ended December 31, 2011. The primary component of this expense item is data service provider expense which increases with the growth of the Bank's assets. In addition, system conversion costs following the acquisition of Allegiance Community Bank totaled approximately \$250,000. Professional fees increased by \$1.2 million or 93.5% to \$2.49 million for the year ended December 31, 2012 from \$1.29 million for the year ended December 31, 2011. The increase is primarily due to several legacy lawsuits that arose as a result of the business combination transaction with Pamrapo Bancorp, Inc. Director fees increased by \$39,000 or 5.7% to \$728,000 for the year ended December 31, 2012 from \$689,000 for the year ended December 31, 2011. Regulatory assessments decreased by \$9,000 or 0.85% to \$1.17 million for the year ended December 31, 2012 from \$1.18 million for the year ended December 31, 2011 primarily due to the new assessment base methodology pursuant to the Dodd-Frank Act which lowered the Bank's insurance premiums. Advertising expense increased by \$85,000 or 21.3% to \$484,000 for the year ended December 31, 2012 from \$399,000 for the year ended December 31, 2011. Merger related expenses decreased by \$538,000, as we had no such expenses for the year ended December 31, 2012. Other real estate owned expenses increased by \$732,000 or 60.8% to \$1.94 million for the year ended December 31, 2012 from \$1.20 million for the year ended December 31, 2011. The increase was primarily due to an increase in write-downs of OREO properties of \$455,000 or 89.2% to \$965,000 for the year ended December 31, 2012 compared to \$510,000 for the year ended December 31, 2011, along with increases in losses on sales of OREO properties by \$183,000 or 36.5% to \$681,000 for the year ended December 31, 2012 compared to \$498,000 for the year ended December 31, 2011. Other non-interest expense increased by \$409,000 or 12.83% to \$3.6 million for the year ended December 31, 2012 from \$3.19 million for the year ended December 31, 2011. Other non-interest expense is comprised of loan expense, stationary, forms and printing, check printing, correspondent bank fees, telephone and communication, and other fees and expenses. Also included in other non-interest expense were settlements in the amount of \$353,000 relating to several lawsuits that arose as a result of the business combination transaction with Pamrapo Bancorp, Inc and during normal course of business.

We had an income tax benefit of \$2.25 million for the year ended December 31, 2012 compared with a tax provision of \$3.37 million for the year ended December 31, 2011. The tax benefit resulted from the pre-tax loss we experienced during the year ended December 31, 2012. The consolidated effective tax rate for the year ended December 31, 2012 was a tax benefit of 52.2% compared to tax provision of 35.8% for the year ended December 31, 2011.

Contractual Obligations and Commitments

The following table sets forth our contractual obligations and commercial commitments at December 31, 2013.

Contractual obligations	Payments due by period				
	Total	Less than 1 Year	1-3 Years	More than 3-5 Years	More than 5 Years
	(In Thousands)				
Benefit Plans	\$ 8,728	\$ 658	\$ 1,316	\$ 1,329	\$ 5,425
Borrowed money	132,124	18,000	55,000	55,000	4,124
Lease obligations	9,368	1,230	2,052	1,517	4,569
Certificates of deposit	380,781	273,092	75,362	32,125	202
Total	\$ 531,001	\$ 292,980	\$ 133,730	\$ 89,971	\$ 14,320

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Management of Market Risk

Qualitative Analysis. The majority of our assets and liabilities are monetary in nature. Consequently, one of our most significant forms of market risk is interest rate risk. Our assets, consisting primarily of mortgage loans, have longer maturities than our liabilities, consisting primarily of deposits. As a result, a principal part of our business strategy is to manage interest rate risk and reduce the exposure of our net interest income to changes in market interest rates. Accordingly, our Board of Directors has established an Asset/Liability Committee which is responsible for evaluating the interest rate risk inherent in our assets and liabilities, for determining the level of risk that is appropriate given our business strategy, operating environment, capital, liquidity and performance objectives, and for managing this risk consistent with the guidelines approved by the Board of Directors. Senior management monitors the level of interest rate risk on a regular basis and the Asset/Liability Committee, which consists of senior management and outside directors operating under a policy adopted by the Board of Directors, meets as needed to review our asset/liability policies and interest rate risk position.

Quantitative Analysis. The following table presents the Company's net portfolio value ("NPV"). These calculations were based upon assumptions believed to be fundamentally sound, although they may vary from assumptions utilized by other financial institutions. The information set forth below is based on data that included all financial instruments as of December 31, 2013. Assumptions have been made by the Company relating to interest rates, loan prepayment rates, core deposit duration, and the market values of certain assets and liabilities under the various interest rate scenarios. Actual maturity dates were used for fixed rate loans and certificate accounts. Investment securities were scheduled at either the maturity date or the next scheduled call date based upon management's judgment of whether the particular security would be called in the current interest rate environment and under assumed interest rate scenarios. Variable rate loans were scheduled as of their next scheduled interest rate repricing date. Additional assumptions made in the preparation of the NPV table include prepayment rates on loans and mortgage-backed securities, core deposits without stated maturity dates were scheduled with an assumed term of 48 months, and money market and noninterest bearing accounts were scheduled with an assumed term of 24 months. The NPV at "PAR" represents the difference between the Company's estimated value of assets and estimated value of liabilities assuming no change in interest rates. The NPV for a decrease of 200 to 300 basis points has been excluded since it would not be meaningful in the interest rate environment as of December 31, 2013. The following sets forth the Company's NPV as of December 31, 2013.

Change in calculation	Net Portfolio Value	\$ Change from PAR	% Change from PAR	NPV as a % of Assets	
				NPV Ratio	Change
