THE HILLSHIRE BRANDS COMPANY

Notes to Condensed Consolidated Financial Statements

(Unaudited)

1. Basis of Presentation

The Hillshire Brands Company is a U.S.-based company that primarily focuses on meat and meat-centric food products. The company's principal product lines are branded packaged meat products and frozen bakery products. Sales are made in both the retail channel, to supermarkets, warehouse clubs and national chains, and the foodservice channel. References to "we", "our", "us", "Hillshire Brands" and "the company" refer to The Hillshire Brands Company and its consolidated subsidiaries as a whole, unless the context otherwise requires. The company's reportable segments are Retail and Foodservice/Other.

The consolidated financial statements for the second quarter ended December 28, 2013 and December 29, 2012 have not been audited by an independent registered public accounting firm, but in the opinion of management, these financial statements include all normal and recurring adjustments necessary for a fair presentation of our financial statements in accordance with U.S. generally accepted accounting principles (GAAP). The results of operations for the second quarter ended December 28, 2013 are not necessarily indicative of the operating results to be expected for the full fiscal year.

The interim consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Although management believes the disclosures are adequate to make the information presented not misleading, certain information and footnote disclosures normally included in annual financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. The preparation of the consolidated financial statements in conformity with GAAP requires management to make use of estimates and assumptions that affect the reported amounts and related disclosures. Actual results could differ from these estimates. These unaudited interim consolidated financial statements and notes should be read in conjunction with the audited consolidated financial statements and notes thereto included in the company's Annual Report on Form 10-K for the year ended June 29, 2013 and other financial information filed with the SEC.

The company's fiscal year ends on the Saturday closest to June 30. Fiscal 2014 ends on June 28, 2014. The second quarter of fiscal 2014 ended on December 28, 2013, and the second quarter of fiscal 2013 ended on December 29, 2012. Each of the quarters was a thirteen-week period. Fiscal 2014 and fiscal 2013 are both 52-week years. Unless otherwise stated, references to years relate to fiscal years.

The condensed consolidated balance sheet as of June 29, 2013 has been derived from the company's audited financial statements included in our Annual Report on Form 10-K for the year ended June 29, 2013. The Australian bakery business, North American Fresh Bakery and North American Foodservice Beverage are presented as discontinued operations in the company's consolidated income statements. See Note 5 – "Discontinued Operations" for additional information regarding this discontinued operation. Unless stated otherwise, any reference to income statement items in these financial statements refers to results from continuing operations.

2. Net Income Per Share

Net income per share - basic is computed by dividing income by the weighted average number of common shares outstanding for the period. Net income per share - diluted reflects the potential dilution that could occur if options and fixed awards to be issued under stock-based compensation arrangements were converted into common stock. For the quarter and six months ended December 28, 2013, options to purchase 0.2 million shares of the company's common stock had exercise prices that were greater than the average market price of those shares during the respective reporting periods. For the quarter and six months ended December 29, 2012, options to purchase 3.2 million of the company's common stock had exercise prices that were greater than the average market price of those shares during the respective reporting periods.

The average shares outstanding increased in the first six months of 2014 as compared to the first six months of 2013 as a result of stock issuances related to the exercise of stock options and the vesting of restricted stock units (RSUs). During the first six months of 2014, the company repurchased 0.9 million shares at a cost of \$30 million under an

existing share repurchase program which authorized the company to repurchase \$1.2 billion of common stock.

As of December 28, 2013, the remaining amount authorized for repurchase is approximately \$1.2 billion of common stock under one of its existing share repurchase programs, plus 2.7 million shares of common stock that remain authorized for repurchase under the company's other share repurchase program.

8

Edgar Filing: Hillshire Brands Co - Form 10-Q

The following is a reconciliation of net income to net income per share – basic and diluted – for the second quarter and first six months of 2014 and 2013 (per share amounts are rounded and may not add to total):

Computation of Net Income per Common Share
(In millions, except per share data)

	Quarter ended		Six Months ended	
	December 28, 2013	December 29, 2012	December 28, 2013	December 29, 2012
Income from continuing operations	\$114	\$58	\$143	\$107
Income from discontinued operations, net of tax	1	7	1	11
Net income	\$115	\$65	\$144	\$118
Average shares outstanding – Basic	123	123	123	122
Dilutive effect of stock option and award plans	1	—	1	1
Diluted shares outstanding	124	123	124	123
Earnings per common share—Basic				
Income from continuing operations	\$0.92	\$0.47	\$1.16	\$0.88
Income from discontinued operations	0.01	0.06	0.01	0.09
Net income	\$0.93	\$0.53	\$1.17	\$0.97
Earnings per common share – Diluted				
Income from continuing operations	\$0.91	\$0.47	\$1.15	\$0.87
Income from discontinued operations	0.01	0.06	0.01	0.09
Net income	\$0.92	\$0.53	\$1.16	\$0.96

3. Accumulated Other Comprehensive Income

The changes in accumulated other comprehensive income (AOCI) by component for the six months ended December 28, 2013 and December 29, 2012 are as follows:

	Net Unrealized Gain (loss) on Qualifying Cash Flow Hedges	Pension/ Post-retirement Activity	Translation Adjustments	Total
Beginning Balance as of June 29, 2013	\$—	\$ (142)	\$1	\$(141)
Other comprehensive loss before reclassifications	(2)	—	(1)	(3)
Amounts reclassified from accumulated other comprehensive income:				
Prior-service benefit	—	(4) (b)	—	(4)
Net actuarial loss	—	2 (b)	—	2
Loss realized from derivatives	1 (a)	—	—	1
Tax expense	—	2 (c)	—	2
Net current-period other comprehensive loss	(1)	—	(1)	(2)
Ending Balance as of December 28, 2013	\$(1)	\$ (142)	\$—	\$(143)
Beginning Balance as of June 30, 2012	\$8	\$ (168)	\$16	\$(144)
Other comprehensive income before reclassifications	8	—	1	9
Amounts reclassified from accumulated other comprehensive income:				
Prior-service benefit	—	(4) (b)	—	(4)
Net actuarial loss	—	2 (b)	—	2
Gain realized from derivatives	(11) (a)	—	—	(11)
Tax expense (benefit)	(1) (c)	2 (c)	—	1
Net current-period other comprehensive income (loss)	(4)	—	1	(3)
Ending Balance as of December 29, 2012	\$4	\$ (168)	\$17	\$(147)

(a) Included as Cost of sales in the Consolidated Statements of Income

(b) These accumulated other comprehensive income components are included in the computation of net periodic pension cost (see Note 8 - "Pension and Other Postretirement Benefit Plans" for additional details)

(c) Included as Income tax expense (benefit) in the Consolidated Statements of Income

4. Segment Information

The following is a general description of the company's two business segments:

Retail – sells a variety of packaged meat and frozen bakery products to retail customers in North America. It also includes gourmet artisanal sausage, salami and jerky products.

Foodservice/Other – sells a variety of meats and bakery products to foodservice customers in North America such as broad-line foodservice distributors, restaurants, hospitals and other large institutions and includes commodity meat products.

The following is a summary of net sales and operating income by business segment:

(In millions)	Net Sales			
	Quarter Ended		Six Months Ended	
	December 28, 2013	December 29, 2012	December 28, 2013	December 29, 2012
Retail	\$799	\$777	\$1,513	\$1,496
Foodservice/Other	283	283	553	538
Net sales	\$1,082	\$1,060	\$2,066	\$2,034

(In millions)	Income from Continuing Operations Before Income Taxes			
	Quarter Ended		Six Months Ended	
	December 28, 2013	December 29, 2012	December 28, 2013	December 29, 2012
Retail	\$115	\$112	\$175	\$196
Foodservice/Other	31	28	56	53
Total operating segment income	146	140	231	249
General corporate expense	(9) (8) (19) (20
Mark-to-market derivative gains (losses)	3	(4) 5	1
Amortization of intangibles	(1) (1) (2) (2
Significant items	(23) (28) (44) (45
Total operating income	116	99	171	183
Net interest expense	(9) (10) (20) (19
Income from continuing operations before income taxes	\$107	\$89	\$151	\$164

Significant items primarily consist of restructuring charges and accelerated depreciation.

5. Discontinued Operations

During the second quarter of 2014, the company received a tax refund of approximately AUD 2.0 million (\$1.9 million USD) related to Australian bakery discontinued operations. The disposition of the Australian bakery business was completed prior to the end of fiscal 2013. The results of the Australian bakery business are classified as discontinued operations and are presented as discontinued operations in the consolidated statements of income for all periods presented.

On December 19, 2012, the company signed an agreement to sell its Australian bakery business to McCain Foods Limited. The results of this business were previously reported as the Australian Bakery business segment. Also included in the transaction were the license rights to certain intellectual property used by the Australian bakery business in the Asia-Pacific region. In February 2013, the company completed the sale of its Australian Bakery business. Using foreign currency exchange rates on the date of the transaction, the company received cash proceeds of \$85 million and reported an after tax gain on disposition of \$42 million.

The results of the fresh bakery and foodservice beverage operations in North America, which were disposed of prior to the end of fiscal 2012, are classified as discontinued operations and are presented as discontinued operations in the consolidated statements of income for all periods presented.

The following is a summary of the operating results of the company's discontinued operations for the second quarter and first six months of 2014 and 2013:

(In millions)	Second Quarter 2014			First Six Months of 2014		
	Net Sales	Pretax Income	Net Income	Net Sales	Pretax Income	Net Income
Australian Bakery	\$—	\$2	\$1	\$—	\$2	\$1

(In millions)	Second Quarter 2013			First Six Months of 2013		
	Net Sales	Pretax Income	Net Income	Net Sales	Pretax Income	Net Income
Australian Bakery	\$34	\$2	\$6	\$71	\$5	\$8
North American Foodservice Beverage	—	2	1	—	2	1
Total	\$34	\$4	\$7	\$71	\$7	\$9

The following is a summary of the gain on sale of the company's discontinued operations for the second quarter and first six months of 2013:

(In millions)	Second Quarter 2013			First Six Months of 2013		
	Pretax Gain on Sale	Tax Expense	After Tax Gain	Pretax Gain on Sale	Tax Expense	After Tax Gain
North American Fresh Bakery	\$—	\$—	\$—	\$1	\$—	\$1
North American Foodservice Beverage	—	—	—	2	(1)	1
Total	\$—	\$—	\$—	\$3	\$(1)	\$2

The gain on sale of discontinued operations reported in fiscal 2013 represents the impact of a final purchase price adjustment related to the North American fresh bakery disposition and gain related to the disposition of two manufacturing facilities related to the North American foodservice beverage operations.

The cash flows related to the discontinued operations for the first six months of 2014 and 2013 are summarized in the table below:

(In millions) – Increase / (Decrease)	Six Months Ended December 28, 2013	Six Months Ended December 29, 2012
Cash flow from operating activities	\$1	\$13
Cash flow from investing activities	—	6
Cash flow used in financing activities	(1)	(13)
Increase in net cash of discontinued operations	—	6
Cash and cash equivalents at beginning of year	—	—
Cash and cash equivalents at end of period	\$—	\$6

The cash used in financing activities primarily represents the net transfers of cash with the corporate office. The net assets of the discontinued operations assumed that the cash of those businesses has been retained as a corporate asset.

Exit, Disposal and Other Restructuring Activities

The company has incurred exit, disposition and restructuring charges for initiatives designed to improve its operational performance and reduce cost. The nature of the costs incurred under these plans determine where they are classified in the financial statements. Our restructuring activities are recorded in one of two areas:

1. Exit Activities, Asset and Business Disposition Actions

These amounts primarily relate to:

• Employee termination costs

• Lease and contractual obligation exit costs

• Gains or losses on the disposition of assets or asset groupings that do not qualify as discontinued operations

2. Costs recognized in Selling, general and administrative expenses

These costs are recognized in Selling, general and administrative expenses in the Consolidated Statements of Income as they do not qualify for treatment as an exit activity or asset and business disposition under the accounting rules for exit and disposal activities. However, management believes the disclosure of these charges provides the reader greater transparency to the total cost of the initiatives.

These amounts primarily relate to:

• Expenses associated with the installation of information systems

• Consulting costs

• Costs associated with the renegotiation of contracts for services with outside third-party vendors as part of the spin-off of the international coffee and tea operations

The following is a summary of the (income) expense associated with ongoing actions, which also highlights where the costs are reflected in the Consolidated Statements of Income:

(In millions)	Quarter Ended		Six Months ended	
	December 28, 2013	December 29, 2012	December 28, 2013	December 29, 2012
Selling, general and administrative expenses	11	6	\$25	\$15
Net charges for exit activities, asset and business dispositions	7	9	10	6
Decrease in income from continuing operations before income taxes	18	15	35	21

The impact of these actions on the company's business segments and general corporate expenses is summarized as follows:

(In millions)	Quarter Ended		Six Months ended	
	December 28, 2013	December 29, 2012	December 28, 2013	December 29, 2012
Retail	\$5	\$—	\$7	\$(3)
Foodservice/Other	1	—	2	(2)
Expense (income) in operating segments	6	—	9	(5)
General corporate expenses	12	15	26	26
Total	\$18	\$15	\$35	\$21

The following table summarizes the activity for the first six months of 2014 related to exit, disposal and restructuring related actions and the status of the related accruals as of December 28, 2013. The 2014 exit, disposal and restructuring related actions include recognized third party consulting costs related to cost saving and efficiency process, IT initiatives and recognized severance charges associated with planned employee terminations. The accrued amounts remaining represent the estimated cash expenditures necessary to satisfy remaining obligations and the majority are expected to be paid in the next 12 months.

(In millions)	Employee termination and other benefits	IT and other costs	Non-cancellable leases/ Contractual obligations	Total
Accrued Costs as of June 29, 2013	\$10	\$5	\$23	\$38
Exit, disposal and other costs recognized during 2014	10	25	—	35
Cash payments	(12) (23) (8) (43
Accrued costs as of December 28, 2013	\$8	\$7	\$15	\$30

7. Financial Instruments

Investment Securities

Beginning in the first quarter of fiscal year 2014, the company purchased securities for investment purposes. Under the current investment policy, the company may invest in debt securities deemed to be investment grade at the time of purchase. The company determines the appropriate categorization of debt securities at the time of purchase and reevaluates such designation at each balance sheet date. The company typically categorizes all debt securities as available-for-sale, as the company has the intent to convert these investments into cash if needed. Classification of available-for-sale marketable securities as current or non-current is based on whether the conversion to cash is expected to be necessary for operations in the upcoming year, which is consistent with the security's maturity date, if applicable.

Securities categorized as available-for-sale are stated at fair value, with unrealized gains and losses reported as a component of accumulated other comprehensive income (loss). The amortized cost, unrealized gains and losses, and fair market values of the company's investment securities available for sale at December 28, 2013 are summarized as follows:

(In millions)	December 28, 2013		
	Amortized Cost	Unrealized Gain/(Loss)	Fair Market Value
Available-for-sale: ⁽¹⁾			
Commercial Paper	\$137	\$—	\$137
Corporate Note	149	—	149
Total	\$286	\$—	\$286

(1) Categorized as Level 1: Observable input such as quoted prices in active markets for identical assets or liabilities

Derivative Instruments

The company uses derivative financial instruments, including futures, options and swap contracts to manage its exposures to commodity prices and interest rate risks. The use of these derivative financial instruments modifies the exposure of these risks with the intent to reduce the risk or cost to the company. The company does not use derivatives for trading or speculative purposes and is not a party to leveraged derivatives. More information concerning accounting for financial instruments can be found in Note 2, Summary of Significant Accounting Policies in the company's 2013 Annual Report.

Types of Derivative Instruments

Interest Rate Swaps

The company previously had utilized interest rate swap derivatives to manage interest rate risk in order to maintain a targeted amount of both fixed-rate and floating-rate long-term debt. Interest rate swap agreements that are effective at hedging the fair value of fixed-rate debt agreements are designated and accounted for as fair value hedges. The company has a fixed interest rate on virtually all of its long-term debt, and as of December 28, 2013 and June 29, 2013, the company is not a party to any interest rate swap agreements.

Commodity Futures and Options Contracts

The company uses commodity futures and options to hedge a portion of its commodity price risk. The principal commodities hedged by the company include pork, beef, natural gas, diesel fuel, corn, wheat and other ingredients. The company uses both commodity financial instruments and fixed rate supplier contracts to determine commodity pricing. In circumstances where commodity-derivative instruments are used, there is a high correlation between the commodity costs and the derivative instruments. For those instruments where the commodity instrument and underlying hedged item correlate between 80%-125%, the company accounts for those contracts as cash flow hedges. However, the majority of commodity derivative instruments are accounted for as mark-to-market hedges. The company only enters into futures and options contracts that are traded on established, well-recognized exchanges that offer high liquidity, transparent pricing, daily cash settlement and collateralization through margin requirements.

The notional values of the various derivative instruments used by the company are summarized in the following table:

Notional Values (In millions)	December 28, 2013	June 29, 2013	Hedge Coverage (Number of months)
Commodity Contracts:			
Commodity Future Contracts: ⁽¹⁾			
Grains/Oilseed	\$42	\$34	6
Energy	\$26	\$29	14
Other commodities	\$9	\$20	7

(1) Commodity futures contracts are determined by the initial cost of the contract

Cash Flow Presentation

The cash receipts and payments from a derivative instrument are classified according to the nature of the instrument, when realized, generally in investing activities unless otherwise disclosed. However, cash flows from a derivative instrument that are accounted for as a fair value hedge or cash flow hedge are classified in the same category as the cash flows from the items being hedged provided the derivative does not include a financing element at inception. If a derivative instrument includes a financing element at inception, all cash inflows and outflows of the derivative instrument are considered cash flows from financing activities. If, for any reason, hedge accounting is discontinued, any remaining cash flows after that date will be classified consistent with mark-to-market instruments.

Contingent Features/Concentration of Credit Risk

All of the company's derivative instruments are governed by International Swaps and Derivatives Association (ISDA) master agreements, requiring the company to maintain an investment grade credit rating from both Moody's and Standard & Poor's credit rating agencies. If the company's credit rating were to fall below investment grade, it would be in violation of these provisions, and the counterparties to the derivative instruments could request immediate payment or demand immediate collateralization on the derivative instruments in net liability positions. There are no derivative instruments with credit-risk-related contingent features that are in a liability position as of December 28, 2013 and June 29, 2013.

A large number of major international financial institutions are counterparties to the company's financial instruments. The company enters into financial instrument agreements only with counterparties meeting very stringent credit standards (a credit rating of A-/A3 or better), limiting the amount of agreements or contracts it enters into with any one party and, where legally available, executing master netting agreements. The company regularly monitors these positions. While the company may be exposed to credit losses in the event of non-performance by individual counterparties of the entire group of counterparties, the company has not recognized any losses with these counterparties in the past and does not anticipate material losses in the future.

Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., exit price) in an orderly transaction between market participants at the measurement date. Assets and liabilities measured at fair

value must be categorized into one of three different levels depending on the assumptions (i.e., inputs) used in the valuation. Level 1 provides the most reliable measure of fair value while Level 3 generally requires significant management judgment. Assets and liabilities are classified in their entirety based on the lowest level of input significant to the fair value measurement.

The carrying amounts of cash and equivalents, trade accounts receivables, accounts payable, and derivative instruments approximate fair values due to their short-term nature and are considered Level 1 based on the valuation inputs. The carrying value of derivative instruments approximate fair value but may be considered Level 1 or Level 2 based on the valuation inputs used (see balance sheet classification and fair value determination in the table presented later in this disclosure). The fair value of the company's long-term debt (considered Level 2 based on the valuation inputs used), including the current portion, is estimated using available market data. Marketable securities available for sale values are derived solely from Level 1 inputs.

(In millions)	December 28, 2013		June 29, 2013	
	Fair Value	Carrying Amount	Fair Value	Carrying Amount
Long-term debt, including current portion	\$972	\$948	\$981	\$951

Information related to our cash flow hedges and other derivatives not designated as hedging instruments for the quarters and six months ended December 28, 2013 and December 29, 2012 is as follows:

(In millions)	Commodity Contracts	
	Quarter Ended December 28, 2013	Quarter Ended December 29, 2012
Cash Flow Derivatives:		
Amount of loss recognized in other comprehensive income (OCI) (a)	\$ (1)	\$ (4)

(d) Gain (loss) recognized in earnings is reported in SG&A expenses for commodity contracts

8. Pension and Other Postretirement Benefit Plans

The components of the net periodic benefit cost (benefit) for the pension and postretirement benefit plans for the quarter and six months ended December 28, 2013 and December 29, 2012 are as follows:

(In millions)	Pension Plans			
	Quarter Ended		Six Months Ended	
	December 28, 2013	December 29, 2012	December 28, 2013	December 29, 2012
Service cost	2	\$3	4	\$6
Interest cost	18	18	37	35
Expected return on plan assets	(22) (23) (44) (46
Amortization of:				
Net actuarial loss	1	1	2	2
Prior service cost	—	—	—	—
Settlement loss	—	1	—	1
Net periodic benefit	\$(1) \$—	\$(1) \$(2

(In millions)	Postretirement Benefit Plans			
	Quarter Ended		Six Months Ended	
	December 28, 2013	December 29, 2012	December 28, 2013	December 29, 2012
Service cost	\$1	\$1	\$1	\$1
Interest cost	1	1	2	2
Expected return on plan assets	—	—	—	—
Amortization of:				
Net actuarial loss	—	—	—	—
Prior service benefit	(2) (2) (4) (4
Settlement loss	—	—	—	—
Net periodic benefit	\$—	\$—	\$(1) \$(1

The company contributed approximately \$3 million to its defined benefit pension plans related to continuing operations during the first six months of 2014 and 2013, respectively. At the present time, the company expects to contribute approximately \$2 million to \$3 million of additional cash to its defined benefit pension plans in the remainder of 2014. The exact amount of cash contributions made to pension plans in any year is dependent upon a number of factors including minimum funding requirements in the jurisdictions in which the company operates. As a result, the actual funding in 2014 may differ from the current estimate.

9. Income Taxes

The following table sets out the tax expense and the effective tax rate for the company from continuing operations:

(In millions)	Quarter Ended		Six Months Ended		
	December 28, 2013	December 29, 2012	December 28, 2013	December 29, 2012	
	Continuing operations				
Income before income taxes	\$107	\$89	\$151	\$164	
Income tax expense (benefit)	(7) 31	8	57	
Effective tax rate	(6.4)% 34.4	% 5.2	% 34.8	%

Second Quarter 2014

In the second quarter of 2014, the company recognized a tax benefit of \$7 million on pretax income from continuing operations of \$107 million, or an effective tax rate of (6.4)%. The tax expense and related effective tax rate on continuing operations were impacted by recognizing \$45 million in tax benefits from discrete tax items, primarily resulting from the release of a valuation allowance on state deferred tax assets.

In the first six months of 2014, the company recognized a tax expense of \$8 million on pretax income from continuing operations of \$151 million, or an effective tax rate of 5.2%. The tax expense and related effective tax rate on continuing operations was determined by applying a 35.2% estimated annual effective tax rate to pretax earnings, and then recognizing \$45 million of tax benefits from discrete tax items, primarily resulting from the release of a valuation allowance on state deferred tax assets.

Second Quarter 2013

In the second quarter of 2013, the company recognized a tax expense of \$31 million on pretax income from continuing operations of \$89 million, or an effective tax rate of 34.4%.

In the first six months of 2013, the company recognized a tax expense of \$57 million on pretax income from continuing operations of \$164 million, or an effective tax rate of 34.8%. The tax expense and related effective tax rate on continuing operations was determined by applying a 34.9% estimated annual effective tax rate to pretax earnings and recognizing various discrete items, none of which were material individually or in the aggregate.

Unrecognized Tax Benefits

Each quarter, the company makes a determination of the tax liability needed for unrecognized tax benefits that should be recorded in the financial statements. For tax benefits to be recognized, a tax position must be more-likely-than-not to be

sustained upon examination by the taxing authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement.

The year-to-date net decrease in the liability for unrecognized tax benefits was \$4 million, resulting in a ending balance of \$63 million as of December 28, 2013. The \$4 million net decrease in the gross liability for uncertain tax positions is the result of a \$6 million decrease for audit settlements, primarily offset by a \$2 million increase related to prior years. At this time, the company estimates that it is reasonably possible that the liability for unrecognized tax benefits will decrease by \$5 million to \$30 million in the next twelve months from a variety of uncertain tax positions as a result of the completion of tax audits currently in process and the expiration of statutes of limitations.

The company's tax returns are routinely audited by federal, state, and foreign tax authorities and these audits are at various stages of completion at any given time. The Internal Revenue Service (IRS) has completed examinations of the company's U.S. income tax returns through 2010. With few exceptions, the company is no longer subject to state and local income tax examinations by tax authorities for years prior to 2005.

10. Contingencies and Commitments

The company is a party to various pending legal proceedings, claims and environmental actions by government agencies. The company records a provision with respect to a claim, suit, investigation or proceeding when it is probable that a liability has been incurred and the amount of the loss can reasonably be estimated. Any provisions are reviewed at least quarterly and are adjusted to reflect the impact and status of settlements, rulings, advice of counsel and other information pertinent to the particular matter.

Aris – This is a consolidation of cases filed by individual complainants with the Republic of the Philippines, Department of Labor and Employment and the National Labor Relations Commission (NLRC) from 1998 through July 1999. The complaint alleges unfair labor practices due to the termination of manufacturing operations in the Philippines by Aris Philippines, Inc. (Aris), a former subsidiary of the company. The complaint names the company as a party defendant. In 2006, the arbitrator ruled against the company and awarded the plaintiffs approximately \$80 million in damages and fees. This ruling was appealed by the company and subsequently set aside by the NLRC in December 2006. Both the complainants and the company have filed motions for reconsideration. The company continues to believe that the plaintiffs' claims are without merit; however, it is reasonably possible that this case will be ruled against the company and have a material adverse impact on the company's results of operations and cash flows. The company has initiated settlement discussions for this case and has established an accrual for the estimated settlement amount.

Multi-Employer Pension Plan – The company participates in one multi-employer pension plan that provides retirement benefits to certain employees covered by collective bargaining agreements (the MEPP). Participating employers in the MEPP are jointly responsible for any plan underfunding. The Pension Protection Act of 2006 (PPA) imposes minimum funding requirements on pension plans. Multi-employer pension plans that fail to meet certain funding standards (as defined by the PPA) are categorized as being either in critical or endangered status. The MEPP was certified by its actuary to be in critical status for the 2012 plan year; consequently, the trustees of the MEPP adopted a rehabilitation plan designed to improve the plan's funding within a prescribed period of time. The rehabilitation plan included increases in employer contributions and reductions in benefits. Unless otherwise agreed upon, any requirement to increase employer contributions will not take effect until the current collective bargaining agreements expire. However, a five percent surcharge for the initial critical year (increasing to ten percent for subsequent years) is imposed on contributions to the MEPP under the current collective bargaining agreement. Such surcharge remains in effect until the effective date of an adopted collective bargaining agreement which includes modifications consistent with the rehabilitation plan. Any surcharge assessed on an employer will also be included in the calculation of the compounded contribution rate increases required under the rehabilitation plan. In addition, the failure of the MEPP to meet funding improvement targets provided in its rehabilitation plan could result in the imposition of an excise tax on contributing employers.

Under the current law regarding multi-employer pension plans, a withdrawal or partial withdrawal from any multi-employer pension plan that was underfunded would render a withdrawing employer liable for its proportionate

share of that underfunding. Such withdrawing employer is required to pay, in annual installment payments, a statutorily determined amount to satisfy the withdrawal liability. The annual installment payments for a complete withdrawal are capped at twenty years, except in the case of a mass withdrawal. In a mass withdrawal, the twenty-year payment cap does not apply. This potential unfunded pension liability also applies ratably to other contributing employers. Information regarding underfunding is generally not provided by plan administrators and trustees on a current basis and when provided, is difficult to independently validate. Any public information available relative to multi-employer pension plans may be dated as well. In the event a withdrawal or partial withdrawal was to occur with respect to the MEPP, the impact to the company's consolidated financial

statements could be material. Withdrawal liability triggers could include the company's decision to close a plant or the dissolution of a collective bargaining unit.

The company's regularly scheduled contributions to the MEPP are expected to be approximately \$2 million in 2014, and totaled approximately \$1 million in 2013.

Guarantees

The company is a party to a variety of agreements under which it may be obligated to indemnify a third party with respect to certain matters. Typically, these obligations arise as a result of contracts entered into by the company under which the company agrees to indemnify a third party against losses arising from a breach of representations and covenants related to matters such as title to assets sold, the collectibility of receivables, specified environmental matters, lease obligations assumed and certain tax matters. In each of these circumstances, payment by the company is conditioned on the other party making a claim pursuant to the procedures specified in the contract. These procedures allow the company to challenge the other party's claims. In addition, the company's obligations under these agreements may be limited in terms of time and/or amount, and in some cases the company may have recourse against third parties for certain payments made by the company. It is not possible to predict the maximum potential amount of future payments under certain agreements, due to the conditional nature of the company's obligations and the unique facts and circumstances involved in each particular agreement. Historically, payments made by the company under these agreements have not had a material effect on the company's business, financial condition or results of operations. The company believes that if it were to incur a loss in any of these matters, such loss would not have a material effect on the company's business, financial condition or results of operations.

The material guarantees for which the maximum potential amount of future payments can be determined, are as follows:

Contingent Lease Obligations – The company is contingently liable for leases on property operated by others. At December 28, 2013, the maximum potential amount of future payments the company could be required to make, if all of the current operators default on the rental arrangements, is \$13 million. The minimum annual rentals under these leases are \$4 million in 2014, \$8 million in 2015 and \$1 million in 2016. The largest components of these amounts relate to a number of retail store leases assumed by Coach, Inc. Coach, Inc. has issued a guarantee to the company and agreed to indemnify and reimburse the company from and against any payments or performance that may be required with respect to any obligation or liability imposed under the retail store leases. The company has not recognized a liability for the contingent obligation on the Coach, Inc. leases it assumed.

Contingent Debt Obligations and Other – The company has guaranteed the payment of certain third-party debt. The maximum potential amount of future payments that the company could be required to make, in the event that these third parties default on their debt obligations, is \$15 million. At the present time, the company does not believe it is probable that any of these third parties will default on the amount subject to guarantee.

ITEM 2

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

The following is management's discussion and analysis of the results of operations for the second quarter and first six months of 2014 compared with the second quarter and first six months of 2013 and a discussion of the changes in financial condition and liquidity during the first six months of 2014. Below is an outline of the analyses included herein:

Business Overview

Our Business

Hillshire Brands is a manufacturer and marketer of high-quality, brand name food products. Sales are principally in the United States, where it is a leader in branded, convenient foods for the retail and foodservice markets. In the retail channel, the company sells a variety of packaged meat products that include hot dogs, corn dogs, breakfast sandwiches, sausages and lunchmeats as well as a variety of frozen baked products and specialty items including cakes and cheesecakes. These products are sold primarily to supermarkets, warehouse clubs and national chains. The company also sells a variety of meat and bakery products to foodservice customers.

The company's portfolio of brands includes Jimmy Dean, Ball Park, Hillshire Farm, State Fair, Sara Lee frozen bakery and Chef Pierre, as well as artisanal brands Aidells, Gallo Salame and Golden Island.

Strategy

The company is focused on delivering long-term value creation through strengthening the core of its business through brand building and innovation; leveraging its heritage brand equities to extend into new adjacent categories; fueling growth by driving operating efficiencies; and evaluating opportunities to acquire on-trend brands that align with its strategy for value creation.

Summary of Results

The business highlights include the following:

Net sales for the second quarter of 2014 were \$1,082 million, which was \$22 million, or 2.1%, higher than the prior year. The increase in sales was driven by favorable mix and pricing actions taken to offset input cost inflation, which were partially offset by a decline in volume.

Reported operating income for the second quarter of 2014 was \$116 million, which was \$17 million, or 16.9%, higher than the prior year. This was mainly due to an increase in net sales of \$22 million and a decrease in SG&A costs of \$22 million, which were offset by a \$29 million increase in cost of sales driven by higher input costs. Adjusted operating income, which increased \$12 million, or 9%, was driven by decreased SG&A spending and investments in media, advertising and promotion (MAP) partially offset by higher input costs. Investment in MAP decreased 20.3% in the quarter primarily due to timing and spending efficiencies.

Diluted earnings per share from continuing operations for the second quarter increased from \$0.47 in 2013 to \$0.91 in 2014 primarily driven by lower SG&A and income tax expense partially offset by increased input costs. Adjusted EPS increased from \$0.62 in 2013 to \$0.66 in 2014 due to the increase in operating income and decreased SG&A costs. Average diluted shares outstanding increased from 123 million to 124 million on a year-over-year basis due to the increased dilutive impact of stock options and the granting of restricted stock units.

Total cash flow from operating activities improved from a source of cash of \$129 million in the first six months of 2013 to \$174 million for the first six months of 2014. The most significant drivers of the change were increased net income and improved inventory management.

Consolidated Results – Second Quarter 2014 Compared with Second Quarter 2013

The following table summarizes net sales and operating income for the second quarter of 2014 and 2013 and certain items that affected the comparability of these amounts:

Total Company Performance (In millions)	Quarter Ended		Change	Percent Change	
	December 28, 2013	December 29, 2012			
Net sales	\$1,082	\$1,060	\$22	2.1	%
Operating income	\$116	\$99	\$17	16.9	%
Less: Impact of significant items on operating income	(23)	(28)	5		
Adjusted operating income	\$139	\$127	\$12	9.0	%

Net Sales

Net sales increased by \$22 million, or 2.1%, due to pricing actions taken to offset input cost inflation and a favorable shift in sales mix partially offset by a decrease in volume. Volumes for the quarter decreased 3.2% primarily due to pricing taken within the quarter and lower commodity meat sales.

The components of the percentage change in net sales as compared to the prior year are as follows:

Second quarter 2014	Volumes	+	Price/Mix	+	Acquisitions	=	Net Sales Change
Net Sales Changes	(3.2)%		4.8 %		0.5 %		2.1 %
Operating Income							

Operating income increased by \$17 million, or 16.9%, driven primarily by pricing and decreased SG&A costs partially offset by unfavorable input costs and lower volumes. Adjusted operating income, which increased \$12 million, or 9%, was also positively affected by pricing and expense timing partially offset by unfavorable input costs.

Gross Margin

Gross margin dollars in the second quarter of 2014 decreased \$7 million over the prior year due to higher input costs which were only partially offset by pricing and a favorable shift in sales mix. The gross margin percent decreased from 31.3% in the second quarter of 2013 to 30.0% in the second quarter of 2014 primarily due to the impact of higher input costs.

Selling, General and Administrative Expenses

(In millions)	Quarter Ended		Change	Percent Change	
	December 28, 2013	December 29, 2012			
SG&A expenses in the business segment results:					
Media advertising and promotion	\$33	\$42	\$(9)	(20.3)	%
Other	149	154	(5)	(3.4)	%
Total business segments	182	196	(14)	(7.0)	%
General corporate	20	26	(6)	(21.8)	%
Mark-to-market derivative (gains) / losses	(1)	1	(2)	NM	
Amortization of identifiable intangibles	1	1	—	37.2	%
Total SG&A Expenses	\$202	\$224	\$(22)	(9.8)	%

Selling, general and administrative expenses decreased by \$22 million, or 9.8%. Measured as a percent of sales, SG&A expenses declined to 18.7% in 2014 from 21.1% in 2013. SG&A expenses in the business segments decreased by \$14 million, or 7%, primarily driven by timing and spending efficiencies in MAP. General corporate SG&A expenses were \$6 million lower in 2014 primarily due to decreased restructuring costs.

Exit Activities and Other Significant Items

The reported results for the second quarter of 2014 and 2013 reflect amounts recognized for actions associated with the company's ongoing business improvement and cost reduction programs and other exit and disposal actions. The amounts reported for exit activities, asset and business dispositions were \$7 million in the second quarter of 2014 versus \$9 million in the second quarter of 2013. As discussed in Note 6 to the financial statements, "Exit, Disposal and Other Restructuring Activities," the charges in 2014 relate to severance costs while the charges in 2013 are primarily for lease exit costs.

Net Interest Expense

Net interest expense of \$9 million in the second quarter of 2014 was \$1 million lower than the second quarter of the prior year. The decline was due to the increased interest income from short-term investments.

Income Tax Expense

Note 9 to the Consolidated Financial Statements provides a detailed explanation of the determination of the interim tax provision. The following table sets out the tax expense and the effective tax rate for the company from continuing operations:

(In millions)	Second Quarter		
	2014	2013	
Continuing operations			
Income before income taxes	\$ 107	\$ 89	
Income tax expense (benefit)	(7) 31	
Effective tax rate	(6.4)% 34.4	%

In the second quarter of 2014, the company recognized a tax benefit of \$7 million on pretax income from continuing operations of \$107 million, or an effective tax rate of (6.4)%. The tax expense and related effective tax rate on continuing operations were impacted by recognizing \$45 million in tax benefits from discrete tax items, primarily related to the release of a valuation allowance on state deferred tax assets.

In the second quarter of 2013, the company recognized a tax expense of \$31 million on pretax income from continuing operations of \$89 million, or an effective tax rate of 34.4%.

Income from Continuing Operations and Diluted Earnings per Share (EPS)

Income from continuing operations in the second quarter of 2014 was \$114 million as compared to \$58 million in the prior year. The \$56 million increase is primarily due to lower income tax expense and SG&A costs partially offset by increased input costs.

Diluted EPS from continuing operations increased from \$0.47 in the second quarter of 2013 to \$0.91 in the second quarter of 2014 due to the increase in operating income noted above. Adjusted EPS, which excludes the impact of significant items, increased from \$0.62 in 2013 to \$0.66 in 2014 primarily due to decreased SG&A costs. Diluted EPS in 2014 were negatively impacted by the higher average shares outstanding. The average shares outstanding increased from 123 million in 2013 to 124 million in 2014 due to the increased dilutive impact of stock options and the granting of restricted stock units.

Discontinued Operations

Income from discontinued operations – Income from discontinued operations for the second quarter was \$6 million lower than the comparable period of the prior year. The results from both 2014 and 2013 related mainly to the Australian bakery operations, which were disposed of in February 2013. See Note 5 – "Discontinued Operations" for additional information.

Net Income and Diluted Earnings per Share (EPS)

In the second quarter of 2014, the company reported net income of \$115 million versus \$65 million in the comparable period of the prior year. In addition, income from continuing operations increased by \$56 million due to the increase in operating income and lower tax expense.

Diluted EPS was \$0.92 in the second quarter of 2014 as compared to \$0.53 per share in the second quarter of 2013. Diluted EPS was slightly negatively impacted by higher average shares outstanding during the second quarter of 2014 which was due to the increased dilutive impact of stock options and the granting of restricted stock units.

Consolidated Results – First Six Months of 2014 Compared with First Six Months of 2013

The following table summarizes net sales and operating income for the first half of 2014 and 2013 and certain items that affected the comparability of these amounts:

Total Company Performance (In millions)	Six Months ended		Change	Percent Change	
	December 28, 2013	December 29, 2012			
Net sales	\$2,066	\$2,034	\$32	1.6	%
Operating income	\$171	\$183	\$(12)	(7.1)	%
Less: Impact of significant items on operating income	(44)	(45)	1		
Adjusted operating income	\$215	\$228	\$(13)	(5.8)	%

Net Sales

Net sales increased by \$32 million, or 1.6%, driven by favorable mix and pricing actions taken to offset input cost inflation which were partially offset by a decline in volume.

The components of the percentage change in net sales as compared to the prior year are as follows:

First Six Months of 2014	Volumes	+	Price/Mix	+	Acquisitions	=	Net Sales Change	
Net Sales Changes	(1.8)%		3.1%		0.3%		1.6%	%
Operating Income								

Operating income decreased by \$12 million primarily driven by unfavorable input costs, declines in volume and higher slotting expenses partially offset by favorable mix and pricing. Adjusted operating income, which decreased \$13 million, or 5.8%, was also negatively affected by unfavorable input costs which were partially offset by pricing and decreased SG&A costs.

Gross Margin

Gross margin dollars in the first half of 2014 decreased \$36 million over the prior year due to higher input costs, which were only partially offset by pricing and a favorable shift in sales mix. The gross margin percent decreased from 30.8% in the first half of 2013 to 28.6% in the first half of 2014 primarily due to the impact of higher input costs. Selling, General and Administrative Expenses

(In millions)	Six Months ended		Change	Percent Change	
	December 28, 2013	December 29, 2012			
SG&A expenses in the business segment results:					
Media advertising and promotion	\$73	\$88	\$(15)	(16.7)	%
Other	291	292	(1)	(0.5)	%
Total business segments	364	380	(16)	(4.2)	%
General corporate	45	54	(9)	(16.5)	%
Mark-to-market derivative (gains) losses	(2)	1	(3)	NM	
Amortization of identifiable intangibles	2	2	—	18.6	%
Total SG&A Expenses	\$409	\$437	\$(28)	(6.3)	%

Selling, general and administrative expenses decreased by \$28 million, or 6.3%. Measured as a percent of sales, SG&A expenses declined year over year from 21.5% to 19.8%. SG&A expenses in the business segments decreased \$16 million, or 4.2%, primarily driven by timing and spending efficiencies in MAP, and higher slotting to support new item introduction. General corporate SG&A expenses were \$9 million lower in 2014 primarily due to decreased

restructuring costs.

24

Exit Activities and Other Significant Items

The reported results for the first half of 2014 and 2013 reflect amounts recognized for actions associated with the company's ongoing business improvement and cost reduction program and other exit and disposal actions. The amounts reported for exit activities, asset and business dispositions were charges of \$10 million in the first half of 2014 versus charges of \$6 million in the first half of 2013. As discussed in Note 6 to the financial statements, "Exit, Disposal and Other Restructuring Activities," the charges in 2014 relate to employee severance costs while the charges in 2013 were primarily lease termination costs net of gains related to the disposition of manufacturing facilities that had been held for sale.

Net Interest Expense

Net interest expense increased from \$19 million in the first half of 2013 to \$20 million in the first half of 2014. The \$1 million increase was primarily due to increased interest income from short term investments and a decrease of capitalized interest.

Income Tax Expense

Note 9 to the Consolidated Financial Statements provides a detailed explanation of the determination of the interim tax provision. The following table sets out the tax expense and the effective tax rate for the company from continuing operations:

(In millions)	Six Months ended		
	2014	2013	
Continuing operations			
Income before income taxes	\$151	\$164	
Income tax expense	8	57	
Effective tax rate	5.2	% 34.8	%

In the first half of 2014, the company recognized a tax expense of \$8 million on pretax income from continuing operations of \$151 million, or an effective tax rate of 5.2%. The tax expense and related effective tax rate on continuing operations was determined by applying a 35.2% estimated annual effective tax rate to pretax earnings, and then recognizing \$45 million of tax benefits from discrete tax items, primarily related to the release of a valuation allowance on state deferred tax assets.

In the first half of 2013, the company recognized a tax expense of \$57 million on pretax income from continuing operations of \$164 million, or an effective tax rate of 34.8%. The tax expense and related effective tax rate on continuing operations was determined by applying a 34.9% estimated annual effective tax rate to pretax earnings and recognizing various discrete items, none of which were material individually or in the aggregate.

Income from Continuing Operations and Diluted Earnings per Share (EPS)

Income from continuing operations in the first half of 2014 was \$143 million as compared to \$107 million in the prior year. The \$36 million increase in earnings was primarily due to increased net sales, decreased tax expenses and lower SG&A costs which were partially offset by increased input costs.

Diluted EPS from continuing operations increased from \$0.87 in the first half of 2013 to \$1.15 in the first half of 2014 due to the increase in operating income noted above. Adjusted EPS, which excludes the impact of significant items, decreased from \$1.10 in 2013 to \$1.01 in 2014. Diluted EPS in 2014 was negatively impacted by higher average shares outstanding. The average diluted shares outstanding increased from 123 million in 2013 to 124 million in 2014 due to the increased dilutive impact of stock options and the granting of restricted stock units.

Discontinued Operations

Income from discontinued operations – Discontinued operations reported \$1 million of income in the first half of 2014 versus \$9 million in 2013. The results from both 2014 and 2013 relate mainly to the Australian bakery operations, which were disposed of in February 2013.

Gain on sale of discontinued operations – In the first half of 2013 the company recognized a \$2 million gain related to the final purchase adjustment for the North American fresh bakery operation and the sale of manufacturing facilities related to the North American foodservice beverage operations.

Net Income and Diluted Earnings per Share (EPS)

For the first half of 2014, the company reported net income of \$144 million versus net income of \$118 million for the comparable period of the prior year. The \$26 million, or 21.7%, increase in net income was primarily driven by decreased tax expense offset by a decline in operating income as noted above.

Diluted EPS were \$1.16 in the first half of 2014 as compared to \$0.96 per share in the first half of 2013. Diluted EPS were impacted by higher average shares outstanding during the first half of 2014 due to the increased dilutive impact of stock options and the granting of restricted stock units.

Operating Results by Business Segment

Net sales and income before income taxes by business segment for 2014 and 2013 are as follows:

(In millions)	Net Sales			
	Quarter Ended		Six Months ended	
	December 28, 2013	December 29, 2012	December 28, 2013	December 29, 2012
Retail	\$799	\$777	\$1,513	\$1,496
Foodservice/Other	283	283	553	538
Total net sales	\$1,082	\$1,060	\$2,066	\$2,034

(In millions)	Income from Continuing Operations Before Income Taxes			
	Quarter Ended		Six Months Ended	
	December 28, 2013	December 29, 2012	December 28, 2013	December 29, 2012
Retail	\$115	\$112	\$175	\$196
Foodservice/Other	31	28	56	53
Total operating segment income	146	140	231	249
General corporate expense	(9) (8) (19) (20
Mark-to-market derivative gains (losses)	3	(4) 5	1
Amortization of intangibles	(1) (1) (2) (2
Significant items	(23) (28) (44) (45
Total operating income	116	99	171	183
Net interest expense	(9) (10) (20) (19
Income from continuing operations before income taxes	\$107	\$89	\$151	\$164

The following tables illustrate the components of the change in net sales versus the prior year for each business segment and the total company:

Second quarter 2014	Volumes	+	Price/Mix	+	Acquisitions	=	Net Sales Change	
Net Sales Changes								
Retail	(1.8)%	3.8	%	0.7	%	2.7	%
Foodservice/Other	(6.0)%	6.3	%	—	%	0.3	%
Total	(3.2)%	4.8	%	0.5	%	2.1	%

First Six Months of 2014	Volumes	+	Price/Mix	+	Acquisitions	=	Net Sales Change	
Net Sales Changes								
Retail	(1.2)%	1.9	%	0.4	%	1.1	%
Foodservice/Other	(3.0)%	5.9	%	—	%	2.9	%
Total	(1.8)%	3.1	%	0.3	%	1.6	%

Edgar Filing: Hillshire Brands Co - Form 10-Q

The following tables summarize the net sales and operating segment income for each of the business segments for 2014 and 2013 and certain items that affected the comparability of these amounts:

Retail

(In millions)	Quarter ended				Six Months ended				
	December 28, 2013	December 29, 2012	Change	Percent Change	December 28, 2013	December 29, 2012	Change	Percent Change	
Net Sales	\$799	\$777	\$22	2.7 %	\$1,513	\$1,496	\$17	1.1 %	
Operating segment income	\$115	\$112	\$3	2.8 %	\$175	\$196	\$(21)	(10.3 %)	

Second Quarter -

Net sales increased slightly versus the prior year as pricing and a favorable shift in sales mix was partially offset by declines in volume. Volume increases for Jimmy Dean breakfast sandwiches and Aidells were offset by volume declines for Ball Park hot dogs, deli meats and frozen sweet goods.

Operating segment income increased by \$3 million, or 2.8%, due to the impact of pricing, a favorable shift in mix and lower MAP investments partially offset by higher input costs and declines in volumes.

First Six Months -

Net sales increased slightly versus the prior year as pricing and a favorable shift in sales mix was partially offset by declines in volume. Volume increases for Jimmy Dean breakfast sandwiches and Aidells were offset by volume declines for Ball Park hot dogs, deli meats and frozen sweet goods.

Operating segment income decreased by \$21 million, or 10.3%, due to higher input costs, decreased volumes and increased slotting spend partially offset by pricing and a favorable sales mix.

Foodservice/Other

(In millions)	Quarter ended				Six Months ended				
	December 28, 2013	December 29, 2012	Change	Percent Change	December 28, 2013	December 29, 2012	Change	Percent Change	
Net sales	\$283	\$283	\$—	0.3 %	\$553	\$538	\$15	2.9 %	
Operating segment income	\$31	\$28	\$3	10.9 %	\$56	\$53	\$3	4.9 %	

Second Quarter -

Net sales were relatively flat with an increase of 0.3% due to pricing and favorable sales mix offset by decreased volumes. Overall volume decreased 6.0% primarily driven by decreased commodity meat sales as a result of improved internal utilization.

Operating segment income increased \$3 million, or 10.9%, driven primarily by pricing, favorable mix and expense timing which was partially offset by increased input costs and lower volume.

First Six Months -

Net sales increased by \$15 million, or 2.9% due to pricing and favorable sales mix which were partially offset by a decrease in volume. Overall volume decreased 3.0% primarily driven by decreased commodity meat sales as a result of improved internal utilization.

Operating segment income increased \$3 million, or 4.9%, driven primarily by pricing, favorable mix and expense timing which was partially offset by increased input costs and lower volume.

Financial Condition

The Consolidated Statement of Cash Flows for the first six months of 2014 and 2013 includes amounts related to discontinued operations. See Note 5 – “Discontinued Operations” for additional information.

Cash received from Operating Activities

The cash from operating activities generated by continuing and discontinued operations is summarized in the following table:

(In millions)	Six Months Ended	
	December 28, 2013	December 29, 2012
Cash from Operating Activities:		
Continuing Operations	\$ 173	\$ 116
Discontinued Operations	1	13
Total	\$ 174	\$ 129

The cash from operating activities increased by \$45 million versus the prior year due primarily to higher income, improved inventory management and lower accrued taxes which were partially offset by decreases in payables and liabilities. Discontinued operations related to the Australian bakery operations generated \$1 million of cash in 2014 and \$13 million of cash in 2013.

Cash used in Investing Activities

The cash used in investing activities was \$294 million in 2014 as compared to a use of cash of \$62 million in 2013. The year-over-year change was primarily due to a \$269 million increase in the cash used to purchase short-term commercial paper and corporate note investments and \$35 million used for the acquisition of our Golden Island jerky business.

Cash received from (used in) Financing Activities

Net cash used in financing activities in 2014 was \$75 million versus cash proceeds of \$3 million in the prior year. The year-over-year change was primarily due to a decrease in stock issuances of approximately \$37 million, a \$6 million increase in dividend payments and \$30 million of purchases of common stock.

Liquidity

Cash and Equivalents

The company had cash and cash equivalents, defined as highly liquid investments with a maturity of three months or less at the time of purchase, on the balance sheet at December 28, 2013 of \$205 million. The decrease of \$195 million from the balance at June 29, 2013 was primarily due to the purchase of short-term investments as well as the acquisition of the Golden Island jerky business.

Credit Facility and Credit Ratings

The company has a \$750 million credit facility that expires in June 2017. The credit facility has an annual fee of 0.15% as of December 28, 2013 and pricing under this facility is based on the company’s current credit rating. At December 28, 2013, the company did not have any borrowings outstanding under this facility, but it did have approximately \$15 million of letters of credit outstanding under this credit facility at an annual interest rate of 1.1%. The facility does not mature or terminate upon a credit rating downgrade. In addition, in the first quarter of 2014, the company entered into a \$65 million uncommitted bilateral letter of credit facility agreement. Under the terms of the agreement, there is no annual fee for the facility and the company is subject to an annual interest rate of 0.85% on issuances. As of December 28, 2013, the company had letters of credit totaling \$20 million outstanding under this facility.

The company’s debt agreements and credit facility contain customary representations, warranties and events of default, as well as affirmative, negative and financial covenants with which the company is in compliance as of December 28, 2013. One financial covenant includes a requirement to maintain an interest coverage ratio of not less than 2.0 to 1.0. The interest coverage ratio is based on the ratio of EBIT to consolidated net interest expense with consolidated EBIT equal to net income plus interest expense, income tax expense, and extraordinary or non-recurring non-cash charges and gains. For the twelve months ended December 28, 2013, the company’s interest coverage ratio was 8.5 to 1.0.

The financial covenants also include a requirement to maintain a leverage ratio of not more than 3.5 to 1.0. The leverage ratio is based on the ratio of consolidated total indebtedness to an adjusted consolidated EBITDA. For the twelve months ended December 28, 2013, the leverage ratio was 2.0 to 1.0.

The company maintains investment grade credit ratings by Standard & Poor's, Moody's Investors Service and FitchRatings. The company's ratings as of December 28, 2013 are shown in the table below. These ratings remain unchanged from the previous year end.

	Senior Unsecured Obligations	Short-term Borrowings	Outlook
Standard & Poor's	BBB	A-2	Stable
Moody's	Baa2	P-2	Stable
Fitch Ratings	BBB	F-2	Stable

Changes in the company's credit ratings may result in changes in the company's borrowing costs. The company's current short-term credit rating allows it to participate in a commercial paper market that has a number of potential investors and a historically high degree of liquidity. A downgrade of the company's short-term credit rating would place the company in a commercial paper market that would contain significantly less market liquidity than it currently operates in with a rating of "A-2," "P-2," or "F-2." This would reduce the amount of commercial paper the company could issue and raise its commercial paper borrowing cost and would require immediate payment or the posting of collateral on the derivative instruments in net liability positions in accordance with ISDA rules. See Note 7, "Financial Instruments" for more information. To the extent that the company's operating requirements were to exceed its ability to issue commercial paper following a downgrade of its short-term credit rating, the company has the ability to use our available credit facility to satisfy operating requirements, if necessary.

Debt

The company's total long-term debt of \$948 million at December 28, 2013 remained virtually unchanged from the previous year end balance of \$951 million. The company's total long-term debt is due to be repaid as follows: \$9 million in the remainder of 2014, \$99 million in 2015, \$400 million in 2016, nil in 2017, \$1 million in 2018, \$1 million in 2019 and \$438 million thereafter. Debt obligations are expected to be satisfied with cash on hand or the issuance of new debt.

From time to time, the company opportunistically may repurchase or retire its outstanding debt through cash purchases and/or exchanges for equity securities, in open market purchases, privately negotiated transactions or otherwise. Such repurchases or exchanges, if any, will depend on prevailing market conditions, the company's liquidity requirements, contractual restrictions and other factors. The amounts involved could be material.

Including the impact of swaps that are effective hedges and convert the economic characteristics of the debt, the company's long-term debt is virtually all fixed-rate debt as of December 28, 2013 and June 29, 2013. The company monitors the interest rate environments in the geographic regions in which it operates and modifies the components of its debt portfolio as necessary to manage interest rate and foreign currency risks.

Leases

The company has numerous operating leases for manufacturing facilities, warehouses, office space, vehicles, machinery and equipment. Operating lease obligations for continuing operations are scheduled to be paid as follows: \$10 million in the remainder of 2014, \$18 million in 2015, \$15 million in 2016, \$10 million in 2017, \$10 million in 2018, \$10 million in 2019, and \$82 million thereafter. The company is contingently liable for certain long-term leases on property operated by others. These leased properties relate to certain businesses that have been sold. The company continues to be liable for the remaining terms of the leases on these properties in the event that the owners of the businesses are unable to satisfy the lease liability. The minimum annual rentals under these leases are as follows: \$4 million in the remainder of 2014, \$8 million in 2015, \$1 million in 2016, nil thereafter.

The company has various funding obligations and certain contingent guaranty obligations that are outlined below.

Pension Plans

The funded status of the company's defined benefit pension plans is defined as the amount by which the projected benefit obligation exceeds the plan assets. For continuing operations, the plans were 92% funded, or underfunded by \$123 million, as of the end of 2013. Further information on the company's pension plans is contained in Note 8 to these Consolidated Financial Statements. The company anticipates recognizing income of approximately \$2 million in continuing operations for its defined benefit pension plans in 2014.

The company contributed approximately \$2 million in the second quarter of 2014 to these defined benefit pension plans. The company anticipates that it will make approximately \$5 million to \$6 million of cash contributions for the entire fiscal year. The exact amount of cash contributions made to pension plans in any year is dependent upon a number of factors. As a result, actual funding in 2014 may be materially different from the current estimate. The Significant Accounting Policies section and Note 16 to the Consolidated Financial Statements – "Defined Benefit Pension Plans," that are included in the company's 2013 Annual Report on Form 10-K, provide a more complete description of the measurement date, assumptions, funded status, expected benefit payments and funding policies related to these defined benefit plans.

The company participates in one multi-employer pension plan that provides retirement benefits to certain employees covered by collective bargaining agreements (the MEPP). Participating employers in the MEPP are jointly responsible for any plan underfunding. The Pension Protection Act of 2006 (PPA) imposes minimum funding requirements on pension plans. Multi-employer pension plans that fail to meet certain funding standards (as defined by the PPA) are categorized as being either in critical or endangered status. The MEPP was certified by its actuary to be in critical status for the 2012 plan year; consequently, the trustees of the MEPP adopted a rehabilitation plan designed to improve the plan's funding within a prescribed period of time. The rehabilitation plan included increases in employer contributions and reductions in benefits. Unless otherwise agreed upon, any requirement to increase employer contributions will not take effect until the current collective bargaining agreements expire. However, a five percent surcharge for the initial critical year (increasing to ten percent for subsequent years) is imposed on contributions to the MEPP under the current collective bargaining agreement. Such surcharge remains in effect until the effective date of an adopted collective bargaining agreement which includes modifications consistent with the rehabilitation plan. Any surcharge assessed on an employer will also be included in the calculation of the compounded contribution rate increases required under the rehabilitation plan. In addition, the failure of the MEPP to meet funding improvement targets provided in its rehabilitation plan could result in the imposition of an excise tax on contributing employers.

Under the current law regarding multi-employer pension plans, a withdrawal or partial withdrawal from any multi-employer pension plan that was underfunded would render a withdrawing employer liable for its proportionate share of that underfunding. Such withdrawing employer is required to pay, in annual installment payments, a statutorily determined amount to satisfy the withdrawal liability. The annual installment payments for a complete withdrawal are capped at twenty years, except in the case of a mass withdrawal. In a mass withdrawal, the twenty-year payment cap does not apply. This potential unfunded pension liability also applies ratably to other contributing employers. Information regarding underfunding is generally not provided by plan administrators and trustees on a current basis and when provided, is difficult to independently validate. Any public information available relative to multi-employer pension plans may be dated as well. In the event a withdrawal or partial withdrawal was to occur with respect to the MEPP, the impact to the company's consolidated financial statements could be material. Withdrawal liability triggers could include the company's decision to close a plant or the dissolution of a collective bargaining unit.

The company's regularly scheduled contributions to the MEPP are expected to be approximately \$2 million in 2014, and totaled approximately \$1 million in 2013.

Restructuring Action Liabilities

The company has recognized amounts for various restructuring charges. At December 28, 2013, the company had recognized liabilities of approximately \$30 million that relate primarily to future severance and other lease and contractual payments. These amounts will be paid when the obligation becomes due, and the company expects a significant portion of these amounts will be paid over the next twelve months.

Cost Savings Initiatives

In June 2012, the company announced that it expected to deliver \$100 million of savings between 2013 and 2015. At that time, initiatives to deliver \$65 million of savings had been identified. The company subsequently identified the remaining \$35 million of cost savings, as well as approximately \$45 million of additional savings through 2016. The cost savings are expected to result from improved revenue management, supply chain and support processes. The company expects to recognize cash charges of approximately \$80 million to \$100 million between 2013 and 2016 related to these savings. Non-cash charges may also be recognized as the initiatives are implemented. The company expects to recognize approximately \$50 million of cash

charges in 2014 related to these new cost savings initiatives. When fully implemented, these initiatives are expected to deliver ongoing annual savings of \$80 million.

Guarantees

The company is a party to a variety of agreements under which it may be obligated to indemnify a third party with respect to certain matters. Typically, these obligations arise as a result of contracts entered into by the company, under which the company agrees to indemnify a third party against losses arising from a breach of representations and covenants related to such matters as title to assets sold, the collectability of receivables, specified environmental matters, lease obligations assumed and certain tax matters. In each of these circumstances, payment by the company is conditioned on the other party making a claim pursuant to the procedures specified in the contract. These procedures allow the company to challenge the other party's claims. In addition, the company's obligations under these agreements may be limited in terms of time and/or amount, and in some cases the company may have recourse against third parties for certain payments made by the company. It is not possible to predict the maximum potential amount of future payments under certain of these agreements, due to the conditional nature of the company's obligations and the unique facts and circumstances involved in each particular agreement. Historically, payments made by the company under these agreements have not had a material effect on the company's business, financial condition or results of operations. The company believes that if it were to incur a loss in any of these matters, such loss would not have a material effect on the company's business, financial condition or results of operations.

The material guarantees for which the maximum potential amount of future payments can be determined include the company's contingent liability on leases on property operated by others and the company's guarantees of certain third-party debt. These debt guarantees require the company to make payments under specific debt arrangements in the event that the third parties default on their debt obligations. The maximum potential amount of future payments that the company could be required to make in the event that these third parties default on their debt obligations is approximately \$15 million. At the present time, the company does not believe it is probable that any of these third parties will default on the amount subject to guarantee.

Challenges and Risks

As a consumer products company, we face certain risks and challenges that impact our business and financial performance. The risks and challenges described below have impacted our performance and are likely to impact our future results as well.

The food and consumer products businesses are highly competitive, with an emphasis on product quality, innovation and value. In many product categories, we compete not only with widely advertised branded products, but also with private label products that are generally sold at lower prices. As a result, from time to time, we may need to reduce the prices for some of our products to respond to competitive pressures. Economic uncertainty may result in increased pressure to reduce the prices for some of our products, limit our ability to increase or maintain prices or lead to a continued shift toward private label products. Any reduction in prices or our inability to increase prices when raw material costs increase could negatively impact profit margins and the overall profitability of our reporting units, which could potentially trigger a goodwill impairment.

Commodity prices directly impact our business because of their effect on the cost of raw materials used to make our products and the cost of inputs to manufacture, package and ship our products. Many of the commodities we use, including pork, beef, poultry, packaging, energy, cheese, fruit, seasoning blends, flour and sugar have experienced price volatility due to factors beyond our control. The company's objective is to offset commodity price increases with pricing actions over time and to offset any operating cost increases with continuous improvement savings. During the first nine months of fiscal 2013, commodity costs, excluding mark-to-market derivative gains/losses, decreased over the prior year. The company experienced material input cost inflation throughout the last quarter of 2013 and first half of fiscal 2014. The company expects continued inflationary input costs throughout the second half of 2014.

Interest Rate and Commodity Risks

To mitigate the risk from interest rate and commodity price fluctuations, the company may enter into various hedging transactions that have been authorized pursuant to the company's policies and procedures. The company does not use financial instruments for trading purposes and is not a party to any leveraged derivatives.

Interest Rates—As of December 28, 2013, the company has no significant exposure to changing interest rates on our long-term debt because the interest rates are fixed on virtually 100% of the company's long-term debt. Market risk for fixed-rate long-term debt is estimated as the potential decrease in fair value resulting from a hypothetical 10% increase in interest rates, which would result in a maximum potential decrease in the fair value of debt of approximately \$15 million. The underlying fair values of our long-term debt were estimated based on quoted market prices or on the current rates offered for debt with similar maturities.

The company has interest rate risk associated with its pension and post-retirement benefit obligations. Changes in interest rates impact the liabilities associated with these benefit plans as well as the amount of income or expense recognized for these plans. Declines in the value of the plan assets could diminish the funded status of the pension plans and potentially increase the requirements to make cash contributions to these plans. See Note 16 and 17 to the Consolidated Financial Statements in the company's 2013 Annual Report for additional information.

Commodities - The company is a purchaser of certain commodities such as beef, pork, chicken, packaging, fruit, seasoning blends, flour, corn, corn syrup, soybean and corn oils, butter, sugar, natural gas and diesel fuel. We also raise turkeys and contract with turkey growers to meet our raw material requirements for whole birds and processed turkey products. Our costs for turkey are affected by the cost and supply of feed grains, including corn and soybean meal. Commodities are subject to price risk due to factors such as fluctuations in the commodity market, the availability of supply, severe weather, consumer or industrial demand and changes in governmental and international trade, alternative energy and agricultural programs. Where possible, the company attempts to reduce the market risk associated with these by entering into either physical forward contracts or derivative instruments. The company has policies governing the hedging instruments that can be used. In circumstances where hedged commodity derivative instruments are used, there is a high correlation between the commodity costs and the derivative instrument.

For commodity derivative instruments held, the company uses a sensitivity analysis technique to evaluate the effect that a 10% change in the underlying commodity price would have on the market value of the company's commodity derivative instruments. The impact is not significant compared with the earnings and equity of the company.

(In millions)	Second quarter 2014	Year ended 2013
Effect of a 10% change in Market Price:		
Grains & Oilseeds	\$4	\$3
Energy	3	3
Other Commodities	1	2

Non-GAAP Financial Measures Definitions

Non-GAAP Measures

The following is an explanation of the non-GAAP financial measures presented in this quarterly report. It also adjusts for the impact of an additional week in those fiscal years that include a 53rd week. Results for businesses acquired are included from the date of acquisition onward. Adjusted EPS excludes from diluted EPS for continuing operations the impact of significant items and the 53rd week.

Significant Items Affecting Comparability

The reported results for 2014 and 2013 reflect amounts recognized for restructuring actions and other significant amounts that impact comparability.

Significant items are income or charges (and related tax impact) that management believes have had a significant impact on the earnings of the applicable business segment or on the total company for the period in which the item is recognized, are not indicative of the company's core operating results and affect the comparability of underlying results from period to period. Significant items may include, but are not limited to: charges for exit activities; various restructuring programs; spin-off related costs; impairment charges; pension partial withdrawal liability charges; benefit plan curtailment gains and losses; tax charges on deemed repatriated earnings; tax costs and benefits resulting from the disposition of a business; impact of tax law changes; changes in tax valuation allowances; and favorable or unfavorable resolution of open tax matters based on the finalization of tax authority examinations or the expiration of statutes of limitations.

The impact of significant items on net income and diluted earnings per share is summarized below:

(In millions, except per share data)	Quarter Ended December 28, 2013			Quarter Ended December 29, 2012		
	Pretax Impact	Net Income (Loss) ⁽²⁾	Diluted EPS Impact ⁽¹⁾	Pretax Impact	Net Income (Loss) ⁽²⁾	Diluted EPS Impact ⁽¹⁾
Continuing operations:						
Total restructuring actions excluding accelerated depreciation	\$(18)	\$(11)	\$(0.08)	\$(15)	\$(10)	\$(0.08)
Accelerated depreciation	(5)	(3)	(0.02)	(10)	(6)	(0.05)
Other significant items(*)	—	46	0.36	(3)	(2)	(0.01)

(2) Taxes computed at applicable statutory rates.

* Includes impact from tax settlements, tax valuation allowance adjustments and other costs.

** Includes impact from gain on disposition of Fresh Bakery and North American Foodservice businesses and impact of tax-related matters on dispositions.

Significant Accounting Policies and Critical Estimates

The company's significant accounting policies are discussed in the Notes to the Consolidated Financial Statements that are incorporated in the 2013 Annual Report on Form 10-K that is filed with the Securities and Exchange Commission. The accounting policies and estimates that can have a significant impact on the operating results, financial position and footnote disclosures of the company are described in the Financial Review in the company's 2013 Annual Report on Form 10-K.

Issued but not yet Effective Accounting Standards

A summary of new accounting pronouncements issued, but not yet effective, which are relevant to the operations of the company are summarized below.

Presentation of Unrecognized Tax Benefits - In July 2013, the Financial Accounting Standards Board (FASB) issued an accounting standard to clarify the presentation of unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists to address issues with diversity in practice. The standard states that, with limited exceptions, the unrecognized tax benefit should be presented in the financial statements as a reduction to a deferred tax asset. While the standard is effective for fiscal years, and interim periods within those years, beginning after December 15, 2014, the company has historically presented such information in accordance with the newly issued guidance. As such, there will be no impact to the financial statements as a result of the issuance of this amendment.

Forward-Looking Information

This document contains forward-looking statements regarding Hillshire Brands' business prospects and future financial results and metrics. In addition, from time to time, in oral statements and written reports, the company discusses its expectations regarding the company's future performance by making forward-looking statements preceded by terms such as will, anticipates, intends, expects, likely or believes. These forward-looking statements are based on currently available competitive, financial and economic data and management's views and assumptions regarding future events and are inherently uncertain.

Investors must recognize that actual results may differ from those expressed or implied in the forward-looking statements, and the company wishes to caution readers not to place undue reliance on any forward-looking statements. Among the factors that could cause Hillshire Brands' actual results to differ from such forward-looking statements are those described under Item 1A, Risk Factors in Hillshire Brands' most recent Annual Report on Form 10-K and other SEC Filings, as well as factors relating to:

- The consumer marketplace, such as (i) intense competition, including advertising, promotional and price competition; (ii) changes in consumer behavior due to economic conditions, such as a shift in consumer demand toward private label; (iii) fluctuations in raw material costs, Hillshire Brands' ability to increase or maintain product prices in response to cost fluctuations and the impact on profitability; (iv) the impact of various food safety issues and regulations on sales and profitability of Hillshire Brands products; and (v) inherent risks in the marketplace associated with product innovations, including uncertainties related to execution and trade and consumer acceptance;

- Hillshire Brands' relationship with its customers, such as (i) a significant change in Hillshire Brands' business with any of its major customers, such as Wal-Mart, its largest customer; and (ii) credit and other business risks associated with customers operating in a highly competitive retail environment;

- Hillshire Brands' spin-off of its international coffee and tea business in June 2012, including potential tax liabilities and other indemnification obligations; and

- Other factors, such as (i) Hillshire Brands' ability to generate margin improvement through cost reduction and productivity improvement initiatives; (ii) Hillshire Brands' credit ratings, the impact of Hillshire Brands' capital plans on such credit ratings and the impact these ratings and changes in these ratings may have on Hillshire Brands' cost to

borrow funds and access to capital/debt markets; and (iii) the settlement of a number of ongoing reviews of Hillshire Brands' income tax filing positions and inherent uncertainties related to the interpretation of tax regulations in the jurisdictions in which Hillshire Brands transacts business.

In addition, Hillshire Brands' results may also be affected by general factors, such as economic conditions, political developments, interest and inflation rates, accounting standards, taxes and laws and regulations in markets where the company competes. Hillshire Brands undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

ITEM 4 – CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in reports the company files or submits under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the company's management, including its Chief Executive Officer and Chief Financial Officer as appropriate, to allow timely decisions regarding required disclosure based on the definition of "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e). In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable, rather than absolute, assurance of achieving the desired control objectives due to inherent limitations.

Hillshire Brands' Chief Executive Officer and Chief Financial Officer, with assistance from other members of management, evaluated the effectiveness of Hillshire Brands' disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this Quarterly Report on Form 10-Q (the "Evaluation Date") and, based upon such evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that as of the Evaluation Date, the company's disclosure controls and procedures were effective at the level of reasonable assurance.

Changes in Internal Control over Financial Reporting

During the fiscal quarter ended December 28, 2013, there were no changes in the Company's internal control over financial reporting that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II

ITEM 1A – RISK FACTORS

There have been no material changes from the risk factors disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended June 29, 2013.

ITEM 2 – UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Repurchases of Equity Securities by the Issuer

Hillshire Brands has two stock repurchase programs under which it may repurchase shares of common stock in either open market or private transactions. As of December 28, 2013, under one of these programs, the company is authorized to repurchase up to \$1.2 billion of its shares of common stock. Under the other program, the company is authorized to repurchase up to 2.7 million shares of its common stock. There is no expiration date for either program. The following table outlines Hillshire Brands purchases of shares of its common stock during the second quarter of 2014.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number and Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
Sept. 29, 2013 to Nov. 2, 2013	—	—	—	2,691,824 \$ 1.2 billion
Nov. 3, 2013 to Nov. 30, 2013	433,020	\$32.17	433,020	2,691,824 \$ 1.2 billion
Dec. 1, 2013 to Dec. 28, 2013	200,200	\$32.44	200,200	2,691,824 \$ 1.2 billion
Total	633,220	\$32.26	633,220	2,691,824 \$ 1.2 billion

ITEM 6—EXHIBITS

Exhibit Number	Description
31.1	Certification of Chief Executive Officer under Section 302 of the Sarbanes-Oxley Act of 2002
31.2	Certification of Chief Financial Officer under Section 302 of the Sarbanes-Oxley Act of 2002
32.1	Certification of Chief Executive Officer under Section 906 of the Sarbanes-Oxley Act of 2002
