Notes to the Condensed Consolidated Financial Statements (Unaudited)

A. Financial Statements

The accompanying unaudited Condensed Consolidated Financial Statements have been prepared in accordance with United States generally accepted accounting principles (GAAP) for interim financial information and with the requirements of Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by United States GAAP for complete financial statements. In the opinion of management, these statements include all adjustments (consisting of only normal recurring accruals, unless otherwise disclosed in this Form 10-Q) necessary for a fair presentation of the financial position of EQT Corporation and subsidiaries as of September 30, 2015 and December 31, 2014, the results of its operations for the three and nine month periods ended September 30, 2015 and 2014 and its cash flows for the nine month periods ended September 30, 2015 and 2014. In this Quarterly Report on Form 10-Q, references to “we,” “us,” “our,” “EQT,” “EQT Corporation,” and the “Company” refer collectively to EQT Corporation and its consolidated subsidiaries.

Certain previously reported amounts have been reclassified to conform to the current year presentation. The impact of these reclassifications was not material to any of the previously issued financial statements.

The balance sheet at December 31, 2014 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by United States GAAP for complete financial statements.

Amounts related to discontinued operations included within the Statements of Consolidated Income for the three and nine months ended September 30, 2014 relate to the sale of Equitable Gas Company, LLC and related transactions in 2013.

For further information, refer to the consolidated financial statements and footnotes thereto included in EQT Corporation’s Annual Report on Form 10-K for the year ended December 31, 2014 as well as “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 21 of this Quarterly Report on Form 10-Q.

B. Discontinued Operations

On December 17, 2013, the Company and its wholly owned subsidiary Distribution Holdco, LLC (Holdco) completed the disposition of their ownership interests in Equitable Gas Company, LLC (Equitable Gas) and Equitable Homeworks, LLC (Homeworks) to PNG Companies LLC (the Equitable Gas Transaction). Equitable Gas and Homeworks comprised substantially all of the Company’s previously reported Distribution segment. The financial information of Equitable Gas and Homeworks is reflected as discontinued operations for all periods presented in these financial statements.

During the second quarter of 2014, the Company received additional cash proceeds of \$7.4 million as a result of post-closing purchase price adjustments for the Equitable Gas Transaction. The Company recognized an additional gain of \$3.6 million for the nine months ended September 30, 2014, included in income from discontinued operations, net of tax, in the Statements of Consolidated Income. As consideration for the Equitable Gas Transaction, the Company received total cash proceeds of \$748.0 million, select midstream assets (including the Allegheny Valley Connector) with a fair value of \$140.9 million and other contractual assets with a fair value of \$32.5 million.

Income from discontinued operations before income taxes was \$3.1 million for the nine months ended September 30, 2014. Income from discontinued operations was \$1.8 million, net of tax of \$1.3 million, for the nine months ended

September 30, 2014.

EQT Corporation and Subsidiaries

Notes to the Condensed Consolidated Financial Statements (Unaudited)

C. EQT GP Holdings, LP

In January 2015, the Company formed EQT GP Holdings, LP (EQGP) (NYSE: EQGP), a Delaware limited partnership, to own partnership interests in EQT Midstream Partners, LP (EQM) (NYSE: EQM). In April 2015, EQT Midstream Investments, LLC, an indirect wholly owned subsidiary of the Company that held EQT's EQM common units, merged with and into EQGP, and EQT Gathering Holdings, LLC (EQT Gathering Holdings), an indirect wholly owned subsidiary of EQT, contributed 100% of the outstanding limited liability company interests in EQT Midstream Services, LLC, EQM's general partner, to EQGP. As a result of these restructuring transactions, EQGP owned the following EQM partnership interests as of September 30, 2015, which represent EQGP's only cash-generating assets: 21,811,643 EQM common units, representing a 29.89% limited partner interest in EQM; 1,443,015 EQM general partner units, representing a 1.98% general partner interest in EQM; and all of EQM's incentive distribution rights, or IDRs, which entitle EQGP to receive up to 48.0% of all incremental cash distributed in a quarter after \$0.5250 has been distributed in respect of each common unit and general partner unit of EQM for that quarter. The Company is the ultimate parent company of EQGP and EQM.

On May 15, 2015, EQGP completed an underwritten initial public offering (IPO) of 26,450,000 common units representing limited partner interests in EQGP, which represented 9.9% of EQGP's outstanding limited partner interests. The Company retained 239,715,000 common units, which represented a 90.1% limited partner interest, and a non-economic general partner interest, in EQGP. EQT Gathering Holdings, as the selling unitholder, sold all of the EQGP common units in the offering, resulting in net proceeds to the Company of approximately \$674.0 million after deducting underwriting discounts and structuring fees of approximately \$2.6 million. EQGP did not receive any of the proceeds from, or incur any expenses in connection with, EQGP's IPO.

The Company continues to consolidate the results of EQGP, but records an income tax provision only as to its ownership percentage. The Company records the noncontrolling interest of the EQGP public limited partners in its financial statements. In connection with the May 2015 EQGP IPO, the Company recorded a \$321.8 million gain to additional paid-in-capital, a decrease in noncontrolling interest in consolidated subsidiary of \$512.9 million and an increase to deferred tax liability of \$191.1 million.

On October 20, 2015, the Board of Directors of EQGP's general partner declared a cash distribution to EQGP's unitholders for the third quarter of 2015 of \$0.104 per common unit, or approximately \$27.7 million. The distribution will be paid on November 23, 2015 to unitholders of record, including the Company, at the close of business on November 2, 2015.

Net income attributable to noncontrolling interests (i.e., to the EQGP limited partner interests not owned by the Company and the EQM limited partner interests not owned by EQGP) was \$59.4 million and \$165.4 million for the three and nine months ended September 30, 2015, respectively. Net income attributable to noncontrolling interests (i.e., to the EQM limited partner interests not owned by the Company) was \$33.7 million and \$79.8 million for the three and nine months ended September 30, 2014, respectively.

D. EQT Midstream Partners, LP

In January 2012, the Company formed EQM to own, operate, acquire and develop midstream assets in the Appalachian Basin. EQM provides midstream services to the Company and other third parties. EQM is consolidated in the Company's consolidated financial statements. The Company records the noncontrolling interest of the EQM public limited partners in its financial statements.

In connection with EQM's IPO in July 2012, EQM issued 17,339,718 subordinated units of EQM to the Company. On February 17, 2015, the subordinated units converted into common units representing limited partner interests in EQM on a one-for-one basis as a result of satisfaction of certain conditions for termination of the subordination period set forth in EQM's partnership agreement.

On March 10, 2015, the Company and certain subsidiaries of the Company entered into a contribution and sale agreement (Contribution Agreement) with EQM and EQM Gathering Opco, LLC (EQM Gathering), an indirect wholly owned subsidiary of EQM. Pursuant to the Contribution Agreement, on March 17, 2015, a subsidiary of the Company contributed the Northern West Virginia Marcellus gathering system to EQM Gathering in exchange for total consideration of approximately \$925.7 million, consisting of approximately \$873.2 million in cash, 511,973 EQM common units and 178,816 EQM general partner units (the NWV Gathering Transaction). EQM Gathering is consolidated by the Company as it is still controlled by the Company. On April 15, 2015, pursuant to the Contribution Agreement, the Company transferred a preferred interest in EQT Energy Supply, LLC, a subsidiary of the Company that generates revenue from services provided to a local distribution company, to EQM in exchange for total consideration of approximately \$124.3 million.

Table of Contents

EQT Corporation and Subsidiaries

Notes to the Condensed Consolidated Financial Statements (Unaudited)

On March 17, 2015, EQM completed an underwritten public offering of 8,250,000 common units. On March 18, 2015, the underwriters exercised their option to purchase 1,237,500 additional common units on the same terms as the offering. EQM received net proceeds of approximately \$696.6 million from the offering after deducting the underwriters' discount and offering expenses of approximately \$24.5 million. In connection with the offering, the Company recorded a \$122.8 million gain to additional paid-in-capital, a decrease in noncontrolling interest in consolidated subsidiary of \$195.8 million and an increase to deferred tax liability of \$73.0 million.

On March 30, 2015, the Company assigned 100% of the membership interests in MVP Holdco, LLC (MVP Holdco), an indirect wholly owned subsidiary of the Company that owns a majority interest (the MVP Interest) in Mountain Valley Pipeline, LLC (MVP Joint Venture), to EQM for approximately \$54.2 million, which represented EQM's reimbursement to the Company for 100% of the capital contributions made by the Company to the MVP Joint Venture as of March 30, 2015. The MVP Joint Venture plans to construct the Mountain Valley Pipeline (MVP), an estimated 300-mile natural gas interstate pipeline spanning from northern West Virginia to southern Virginia. The MVP Joint Venture has secured a total of 2.0 Bcf per day of 20 - year firm capacity commitments, including an approximately 1.3 Bcf per day firm capacity commitment by the Company. The MVP project is subject to Federal Energy Regulatory Commission (FERC) approval. The voluntary pre-filing process with the FERC began in October 2014 and the pipeline is expected to be placed in-service during the fourth quarter of 2018. The MVP Joint Venture has been determined to be a variable interest entity because the MVP Joint Venture has insufficient equity to finance activities during the construction stage of the MVP. EQM is not the primary beneficiary because it does not have the power to direct the activities of the MVP Joint Venture that most significantly impact its economic performance. EQM accounted for the MVP Interest beginning on the date it was assumed from EQT as an equity method investment.

During the third quarter of 2015, EQM entered into an equity distribution agreement that established an "At the Market" (ATM) common unit offering program, pursuant to which a group of managers, acting as EQM's sales agents, may sell EQM common units having an aggregate offering price of up to \$750 million (the \$750 million ATM Program). During the three months ended September 30, 2015, EQM issued 827,975 common units at an average price per unit of \$76.58. EQM received net proceeds of approximately \$62.2 million after deducting commissions of approximately \$0.7 million and other offering expenses of approximately \$0.5 million. EQM used the net proceeds from the sales for general partnership purposes. EQM's general partner elected not to maintain its general partner ownership percentage at the previous level of 2.0%. In connection with the September offerings, the Company recorded a \$9.2 million gain to additional paid-in-capital, a decrease in noncontrolling interest in consolidated subsidiary of \$14.6 million and an increase to deferred tax liability of \$5.4 million.

On October 20, 2015, the Board of Directors of EQM's general partner declared a cash distribution to EQM's unitholders for the third quarter of 2015 of \$0.675 per common unit. The cash distribution will be paid on November 13, 2015 to unitholders of record, including EQGP, at the close of business on November 2, 2015. Based on the 71,870,181 EQM common units outstanding on October 22, 2015, the aggregate cash distributions to EQGP would be approximately \$28.6 million consisting of: \$14.7 million in respect of its limited partner interest, \$1.2 million in respect of its general partner interest and \$12.7 million in respect of its incentive distribution rights in EQM. The distributions in respect of EQGP's general partner interest and incentive distribution rights in EQM are subject to change if EQM issues additional common units on or prior to the record date for the third quarter 2015 distribution.

## E. Financial Information by Business Segment

Operating segments are revenue-producing components of the enterprise for which separate financial information is produced internally and which are subject to evaluation by the Company's chief operating decision maker in deciding how to allocate resources.

The Company reports its operations in two segments, which reflect its lines of business. The EQT Production segment includes the Company's exploration for, and development and production of, natural gas, natural gas liquids (NGLs) and a limited amount of crude oil in the Appalachian and Permian Basins. The EQT Midstream segment's operations include the natural gas gathering, transmission, storage and marketing activities of the Company, including ownership and operation of EQM.

Operating segments are evaluated on their contribution to the Company's consolidated results based on operating income. Other income, interest and income taxes are managed on a consolidated basis. Headquarters' costs are billed to the operating segments based upon an allocation of the headquarters' annual operating budget. Differences between budget and actual headquarters' expenses are not allocated to the operating segments.

Substantially all of the Company's operating revenues, income from operations and assets are generated or located in the United States.

Includes non-cash capital expenditures of \$5.9 million and \$5.6 million for the three months ended September 30, 2015 and 2014, respectively, and \$18.5 million and \$13.7 million for the nine months ended September 30, 2015 (d) and 2014, respectively, for certain labor overhead costs including a portion of non-cash stock-based compensation expense. The Company also had accrued capital expenditures which had not yet been paid of \$164.1 million and \$233.3 million as of September 30, 2015 and 2014, respectively.

(e) Includes \$159.0 million of cash capital expenditures and \$353.1 million of non-cash capital expenditures for the exchange of assets with Range Resources Corporation (Range) (described in Note L) for the nine months ended September 30, 2014. Expenditures for segment assets in the EQT Production segment include \$41.8 million and \$37.2 million for property acquisitions during the three months ended September 30, 2015 and 2014, respectively, and \$180.9 million and \$646.9 million for property acquisitions during the nine months ended September 30, 2015 and 2014, respectively.

#### F. Derivative Instruments

The Company's primary market risk exposure is the volatility of future prices for natural gas and NGLs, which can affect the operating results of the Company primarily at EQT Production. The Company's overall objective in its hedging program is to protect cash flows from undue exposure to the risk of changing commodity prices.

The Company uses over the counter (OTC) derivative commodity instruments, primarily swap and collar agreements, that are primarily placed with financial institutions and the creditworthiness of all counterparties is regularly monitored. The Company also uses exchange traded futures contracts that obligate the Company to buy or sell a designated commodity at a future date for a specified price and quantity at a specified location. Swap agreements involve payments to or receipts from counterparties based on the differential between two prices for the commodity.

Collar agreements require the counterparty to pay the Company if the index price falls below the floor price and the Company to pay the counterparty if the index price rises above the cap price. The Company also engages in basis swaps to protect earnings from undue exposure to the risk of geographic disparities in commodity prices and interest rate swaps to hedge exposure to interest rate fluctuations on potential debt issuances. The Company has also engaged in a limited number of swaptions and call options.

The Company recognizes all derivative instruments as either assets or liabilities at fair value on a gross basis. The assets are reported as derivative instruments at fair value in the Condensed Consolidated Balance Sheets and liabilities are reported within other current liabilities in the Condensed Consolidated Balance Sheets. These derivative instruments are reported as either current assets or current liabilities due to their highly liquid nature. The Company can net settle its derivative instruments at any time.

Table of Contents

EQT Corporation and Subsidiaries

Notes to the Condensed Consolidated Financial Statements (Unaudited)

The accounting for the changes in fair value of the Company's derivative instruments depends on the use of the derivative instruments. To the extent that a derivative instrument had been designated and qualified as a cash flow hedge, the effective portion of the change in fair value of the derivative instrument is reported as a component of accumulated other comprehensive income (OCI), net of tax, and is subsequently reclassified into the Statements of Consolidated Income in the same period or periods during which the forecasted transaction affects earnings. In conjunction with the exchange of assets with Range that closed in June 2014 (see Note L), the Company de-designated certain derivative instruments that were previously designated as cash flow hedges because it was probable that the forecasted transactions would not occur, resulting in a pre-tax gain of \$28.0 million recorded within gain on sale / exchange of assets in the Statements of Consolidated Income for the nine months ended September 30, 2014. Any subsequent changes in fair value of these derivative instruments are recognized within operating revenues in the Statements of Consolidated Income each period.

Historically, derivative commodity instruments used by the Company to hedge its exposure to variability in expected future cash flows associated with the fluctuations in the price of natural gas related to the Company's forecasted sale of equity production and forecasted natural gas purchases and sales were designated and qualified as cash flow hedges. As of September 30, 2015 and December 31, 2014, the Company deferred net gains of \$94.4 million and \$217.1 million, respectively, in accumulated OCI, net of tax, related to the effective portion of the change in fair value of its derivative commodity instruments designated as cash flow hedges. Effective December 31, 2014, the Company elected to de-designate all cash flows hedges and discontinue the use of cash flow hedge accounting. As of September 30, 2015 and December 31, 2014, the forecasted transactions remained probable of occurring and as such, the amounts in accumulated OCI will continue to be reported in accumulated OCI and will be reclassified into earnings in future periods when the underlying hedged transactions occur. The Company estimates that approximately \$73.8 million of net gains on its derivative commodity instruments reflected in accumulated OCI, net of tax, as of September 30, 2015 will be recognized in earnings during the next twelve months due to the settlement of hedged transactions. As a result of the discontinuance of cash flow hedge accounting, beginning in 2015, all changes in fair value of the Company's derivative instruments are recognized in the Statements of Consolidated Income.

The Company also enters into fixed price natural gas sales agreements that are satisfied by physical delivery. These physical commodity contracts qualify for the normal purchases and sales exception and are not subject to derivative instrument accounting.

Exchange-traded instruments are generally settled with offsetting positions. OTC arrangements require settlement in cash. Settlements of derivative commodity instruments are reported as a component of cash flows from operations in the accompanying Statements of Condensed Consolidated Cash Flows.

Table of Contents

EQT Corporation and Subsidiaries

Notes to the Condensed Consolidated Financial Statements (Unaudited)

The absolute quantities of the Company's derivative commodity instruments totaled 585 Bcf and 624 Bcf as of September 30, 2015 and December 31, 2014, respectively, and were primarily related to natural gas swaps and collars. The open positions at September 30, 2015 and December 31, 2014 had maturities extending through December 2018.

The Company recognizes all derivative instruments as either assets or liabilities at fair value on a gross basis. Margin deposits remitted to financial counterparties or received from financial counterparties related to OTC natural gas swap agreements and options and any funds remitted to or deposits received from the Company's brokers are recorded on a gross basis. The Company has netting agreements with financial institutions and its brokers that permit net settlement of gross commodity derivative assets against gross commodity derivative liabilities. The table below reflects the impact of netting agreements and margin deposits on gross derivative assets and liabilities as of September 30, 2015 and December 31, 2014.

	Derivative instruments, recorded in the Condensed Consolidated Balance Sheet, gross (Thousands)	Derivative instruments subject to master netting agreements	Margin deposits remitted to counterparties	Derivative instruments, net
As of September 30, 2015				
Asset derivatives:				
Derivative instruments, at fair value	\$395,264	\$(15,411)	) \$—	\$379,853
Liability derivatives:				
Derivative instruments, at fair value (included in other current liabilities)	\$26,057	\$(15,411)	) \$—	\$10,646
As of December 31, 2014				
Asset derivatives:				
Derivative instruments, at fair value	\$458,460	\$(22,810)	) \$—	\$435,650
Liability derivatives:				
Derivative instruments, at fair value (included in other current liabilities)	\$22,942	\$(22,810)	) \$(132)	) \$—

Certain of the Company's derivative instrument contracts provide that if the Company's credit ratings by Standard & Poor's Ratings Services (S&P) or Moody's Investors Services (Moody's) are lowered below investment grade, additional collateral may be required to be deposited with the counterparty. The additional collateral can be up to 100% of the derivative liability. As of September 30, 2015, the aggregate fair value of all derivative instruments with credit risk-related contingent features that were in a net liability position was \$15.7 million, for which the Company had no collateral posted on September 30, 2015. If the Company's credit rating by S&P or Moody's had been downgraded below investment grade on September 30, 2015, the Company would not have been required to post any

additional collateral under the agreements with the respective counterparties. Investment grade refers to the quality of the Company's credit as assessed by one or more credit rating agencies. The Company's senior unsecured debt was rated BBB by S&P and Baa3 by Moody's at September 30, 2015. In order to be considered investment grade, the Company must be rated BBB- or higher by S&P and Baa3 or higher by Moody's. Anything below these ratings is considered non-investment grade. Having a non-investment grade rating may result in greater borrowing costs and collateral requirements than would be available if all credit ratings were investment grade.

EQT Corporation and Subsidiaries

Notes to the Condensed Consolidated Financial Statements (Unaudited)

## G. Fair Value Measurements

The Company records its financial instruments, principally derivative instruments, at fair value in its Condensed Consolidated Balance Sheets. The Company estimates the fair value using quoted market prices, where available. If quoted market prices are not available, fair value is based upon models that use market-based parameters as inputs, including forward curves, discount rates, volatilities and nonperformance risk. Nonperformance risk considers the effect of the Company's credit standing on the fair value of liabilities and the effect of the counterparty's credit standing on the fair value of assets. The Company estimates nonperformance risk by analyzing publicly available market information, including a comparison of the yield on debt instruments with credit ratings similar to the Company's or counterparty's credit rating and the yield of a risk-free instrument and credit default swaps rates where available.

The Company has categorized its assets and liabilities recorded at fair value into a three-level fair value hierarchy, based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). Assets and liabilities included in Level 1 include the Company's futures contracts. Assets and liabilities in Level 2 primarily include the Company's swap and collar agreements. There were no transfers between Level 1 and 2 during the periods presented. There were no transfers into or out of Level 3 during the periods presented. The Company recognizes transfers between Levels as of the actual date of the event or change in circumstances that caused the transfer.

The fair value of the assets and liabilities included in Level 2 is based on standard industry income approach models that use significant observable inputs, including New York Mercantile Exchange (NYMEX) forward curves, LIBOR-based discount rates and basis forward curves. The Company's collars, swaptions and options are valued using standard industry income approach option models. The significant observable inputs utilized by the option pricing models include NYMEX forward curves, natural gas volatilities and LIBOR-based discount rates.

The Company uses NYMEX forward curves to value futures, commodity swaps, collars, swaptions and options. The NYMEX forward curves, LIBOR-based discount rates, natural gas volatilities and basis forward curves are validated to external sources at least monthly.

The following assets and liabilities were measured at fair value on a recurring basis during the applicable period:

Description	As of September 30, 2015	Fair value measurements at reporting date using		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
	(Thousands)

Table of Contents

EQT Corporation and Subsidiaries

Notes to the Condensed Consolidated Financial Statements (Unaudited)

Description	As of December 31, 2014  (Thousands)	Fair value measurements at reporting date using		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
<b>Assets</b>				
Derivative instruments, at fair value	\$458,460	\$—	\$458,460	\$—
<b>Liabilities</b>				
Derivative instruments, at fair value (included in other current liabilities)	\$22,942	\$132	\$22,810	\$—

The carrying value of cash and cash equivalents, accounts receivable, amounts due to/from related parties and accounts payable approximate fair value due to the short maturity of the instruments. The carrying value of short-term loans under EQM's credit facility approximates fair value as the interest rates are based on prevailing market rates.

The Company estimates the fair value of its debt using its established fair value methodology. Because not all of the Company's debt is actively traded, the fair value of the debt is a Level 2 fair value measurement. Fair value for non-traded debt obligations is estimated using a standard industry income approach model which utilizes a discount rate based on market rates for debt with similar remaining time to maturity and credit risk. The estimated fair value of long-term debt (including EQM's long-term debt) on the Condensed Consolidated Balance Sheets was approximately \$3.1 billion and \$3.3 billion at September 30, 2015 and December 31, 2014, respectively. The carrying value of long-term debt (including EQM's long-term debt) on the Condensed Consolidated Balance Sheets was approximately \$3.0 billion at September 30, 2015 and December 31, 2014.

#### H. Income Taxes

The Company estimates an annual effective income tax rate based on projected results for the year and applies this rate to income before taxes to calculate income tax expense. All of EQGP's earnings are included in the Company's net income. However, the Company is not required to record income tax expense with respect to the portion of EQGP's earnings allocated to the noncontrolling public limited partners of EQGP and EQM, which reduces the Company's effective tax rate. Any refinements made due to subsequent information that affects the estimated annual effective income tax rate are reflected as adjustments in the current period.

The Company's effective income tax rate for the nine months ended September 30, 2015 was 6.9%, compared to 33.3% for the nine months ended September 30, 2014. Excluding the impact of recent Internal Revenue Service (IRS) guidance received by the Company (discussed below), the effective income tax rate for the nine months ended September 30, 2015 was 15.5%. The decrease in the effective income tax rate was primarily attributable to an increase in income allocated to the noncontrolling limited partners of EQGP and EQM, a decrease in state taxes in 2015 as a result of lower pre-tax income on state tax paying entities and increased tax credits recorded in 2015. The increase to noncontrolling limited partners income was primarily the result of higher net income at EQM and increased noncontrolling interests as a result of EQM's March 2015 underwritten public offering of common units, issuances of EQM common units under the \$750 million ATM Program and EQGP's May 2015 IPO.

The Company's income tax expense was lower for the nine months ended September 30, 2015 due to a realized \$35.5 million tax benefit in connection with recent IRS guidance received by the Company regarding the Company's sale of Equitable Gas Company, LLC, a regulated entity, in 2013. The transaction included a partial like-kind exchange of assets that resulted in tax deferral for the Company. However, in order to be in compliance with the normalization rules of the Internal Revenue Code, the IRS guidance held that the deferred tax liability associated with the exchanged regulatory assets should not be considered for ratemaking purposes. As a result, during the second quarter of 2015, the Company recorded a regulatory asset equal to the taxes deferred from the exchange and an associated income tax benefit. The regulatory asset and deferred taxes will be reversed when the assets are disposed of in a taxable transaction such as a sale of assets or amortized over the 32-year remaining life of the assets received in the exchange, in either event increasing tax expense at that time.

There were no material changes to the Company's methodology for determining unrecognized tax benefits during the three months ended September 30, 2015. The Company believes that it is appropriately reserved for uncertain tax positions.

EQT Corporation and Subsidiaries

Notes to the Condensed Consolidated Financial Statements (Unaudited)

## I. Revolving Credit Facilities

The Company has a \$1.5 billion credit facility that expires in February 2019. The Company had no loans or letters of credit outstanding under its revolving credit facility as of September 30, 2015 or December 31, 2014 or at any time during the three and nine months ended September 30, 2015 and 2014.

EQM has a \$750 million credit facility that expires in February 2019, and EQM had \$350.0 million of loans and no letters of credit outstanding under its revolving credit facility as of September 30, 2015. As of December 31, 2014, EQM had no loans or letters of credit outstanding under its revolving credit facility. The maximum amount of outstanding short-term loans under EQM's revolving credit facility at any time during the three and nine months ended September 30, 2015 was \$404 million. The maximum amount of outstanding short-term loans under EQM's revolving credit facility at any time during the three and nine months ended September 30, 2014 was \$330 million and \$450 million, respectively. The average daily balance of loans outstanding under EQM's credit facility was approximately \$357 million and \$241 million during the three and nine months ended September 30, 2015, respectively. The average daily balance of loans outstanding under EQM's credit facility was approximately \$133 million and \$159 million during the three and nine months ended September 30, 2014, respectively. Interest was incurred on the loans at a weighted average annual interest rate of approximately 1.7% for the three and nine months ended September 30, 2015 and 2014.

The Company incurred commitment fees averaging approximately 6 basis points for each of the three months ended September 30, 2015 and 2014, and approximately 17 basis points for each of the nine months ended September 30, 2015 and 2014, to maintain credit availability under its revolving credit facility. EQM incurred commitment fees averaging approximately 6 basis points for each of the three months ended September 30, 2015 and 2014, and 17 basis points and 18 basis points for the nine months ended September 30, 2015 and 2014, respectively, to maintain credit availability under its revolving credit facility.

## J. Earnings Per Share

Potentially dilutive securities, consisting of options and restricted stock awards, which were included in the calculation of diluted earnings per share, totaled 302,550 and 772,873 for the three months ended September 30, 2015 and 2014, respectively, and 462,317 and 935,027 for the nine months ended September 30, 2015 and 2014, respectively. Options to purchase common stock which were excluded from potentially dilutive securities because they were anti-dilutive totaled 291,700 and 133,500 for the three and nine months ended September 30, 2015, respectively. No options to purchase common stock were excluded from potentially dilutive securities because they were anti-dilutive for the three and nine months ended September 30, 2014. The impact of EQM's and EQGP's dilutive units did not have a material impact on the Company's earnings per share calculations for any of the periods presented.

## K. Changes in Accumulated Other Comprehensive Income by Component

The following tables explain the changes in accumulated OCI by component during the applicable period:

Three Months Ended September 30, 2015				Accumulated OCI, net of tax
Natural gas cash flow hedges,	Interest rate cash flow hedges, net of tax	Pension and other post- retirement		

Edgar Filing: EQT Corp - Form 10-Q

	net of tax		benefits liability adjustment, net of tax

EQT Corporation and Subsidiaries

Notes to the Condensed Consolidated Financial Statements (Unaudited)

L. Sale and Exchange of Properties

In June 2014, the Company exchanged assets with Range. The Company received approximately 73,000 net acres and approximately 900 producing wells, most of which are vertical wells, in the Permian Basin of Texas. In exchange, Range received approximately 138,000 net acres in the Nora field of Virginia (Nora), the Company's working interest in approximately 2,000 producing vertical wells in Nora, the Company's 50% ownership interest in Nora Gathering, LLC (Nora LLC), which owned the supporting gathering system in Nora, and \$167.3 million in cash. The Company previously recorded its 50% ownership interest in Nora LLC as a nonconsolidated investment in its consolidated financial statements.

The fair value of the assets exchanged by the Company was approximately \$516.5 million. Fair value of \$318.3 million was allocated to the acquired acreage and \$198.2 million was allocated to the acquired wells. The Company recorded a pre-tax gain of \$34.1 million, which is included in gain on sale / exchange of assets in the Statements of Consolidated Income. The gain on sale / exchange of assets includes a \$28.0 million pre-tax gain related to the de-designation of certain derivative instruments that were previously designated as cash flow hedges because it was probable that the forecasted transactions would not occur.

As the asset exchange qualified as a business combination under United States GAAP, the fair value of the acquired assets was determined using a discounted cash flow model under the market approach. Significant unobservable inputs used in the analysis included the determination of estimated developed reserves, NYMEX forward pricing and comparable sales transactions, which classify the acquired assets as a Level 3 measurement.

M. Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers. The standard requires an entity to recognize revenue in a manner that depicts the transfer of goods or services to customers at an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU No. 2014-09 will supersede most of the existing revenue recognition requirements in United States GAAP when it becomes effective and is required to be adopted using one of two retrospective application methods. In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers - Deferral of the Effective Date which approved a one year deferral of ASU 2014-09 for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early application is permitted as of the original effective date for annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. The Company is currently evaluating the method of adoption and impact this standard will have on its financial statements and related disclosures.

In February 2015, the FASB issued ASU No. 2015-02, Consolidation. The standard changes the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. The ASU will be effective for public entities for annual reporting periods beginning after December 15, 2015, including interim periods therein. The Company has evaluated this standard and determined that the adoption of it will have no significant impact on reported results.

In April 2015, the FASB issued ASU No. 2015-03, Interest - Imputation of Interest. The standard requires an entity to present the debt issuance costs related to a recognized debt liability as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. In August 2015, the FASB issued ASU No. 2015-15, Interest -

Imputation of Interest. The standard added Securities and Exchange Commission (SEC) paragraphs to clarify the applicability of ASU No. 2015-03 to debt issuance costs related to line-of-credit arrangements. The guidance in ASU No. 2015-03 is effective for public entities for annual reporting periods beginning after December 15, 2015, including interim periods therein. Early adoption is permitted. The Company is currently evaluating the timing of adoption and impact this standard will have on its financial statements and related disclosures.

In April 2015, the FASB issued ASU No. 2015-05, Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40): Customer's Accounting for Fees Paid in a Cloud Computing Arrangement. The ASU adds guidance that will help entities evaluate the accounting for fees paid by a customer in a cloud computing arrangement. The ASU will be effective for annual reporting periods beginning after December 15, 2015. The Company is currently evaluating the impact this standard will have on its financial statements and related disclosures.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

CAUTIONARY STATEMENTS

Disclosures in this Quarterly Report on Form 10-Q contain certain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended. Statements that do not relate strictly to historical or current facts are forward-looking and usually identified by the use of words such as "anticipate," "estimate," "could," "would," "will," "may," "forecast," "approximate," "expect," "plan," "believe" and other words of similar meaning in connection with any discussion of future operating or financial matters. Without limiting the generality of the foregoing, forward-looking statements contained in this Quarterly Report on Form 10-Q include the matters discussed in the section captioned "Outlook" in Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations," and the expectations of plans, strategies, objectives and growth and anticipated financial and operational performance of the Company and its subsidiaries, including guidance regarding the Company's strategy to develop its Marcellus, Utica and other reserves; drilling plans and programs (including the number, type, feet of pay and location of wells to be drilled and the availability of capital to complete these plans and programs); production sales volumes (including liquids volumes) and growth rates; gathering and transmission volumes; infrastructure programs (including the timing, cost and capacity of the transmission and gathering expansion projects); the timing, cost, capacity and expected interconnects with facilities and pipelines of the Ohio Valley Connector (OVC) and Mountain Valley Pipeline (MVP) projects; the ultimate terms, partners and structure of the MVP joint venture; technology (including drilling techniques); monetization transactions, including midstream asset sales (dropdowns) to EQT Midstream Partners, LP (EQM) and other asset sales, joint ventures or other transactions involving the Company's assets; natural gas prices and changes in basis; reserves; projected capital expenditures; the amount and timing of any repurchases under the Company's share repurchase authorization; liquidity and financing requirements, including funding sources and availability; hedging strategy; the effects of government regulation and litigation; and tax position. The forward-looking statements included in this Quarterly Report on Form 10-Q involve risks and uncertainties that could cause actual results to differ materially from projected results. Accordingly, investors should not place undue reliance on forward-looking statements as a prediction of actual results. The Company has based these forward-looking statements on current expectations and assumptions about future events. While the Company considers these expectations and assumptions to be reasonable, they are inherently subject to significant business, economic, competitive, regulatory and other risks and uncertainties, many of which are difficult to predict and beyond the Company's control. The risks and uncertainties that may affect the operations, performance and results of the Company's business and forward-looking statements include, but are not limited to, those set forth under Item 1A, "Risk Factors", and elsewhere in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

Any forward-looking statement speaks only as of the date on which such statement is made, and the Company does not intend to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise.

In reviewing any agreements incorporated by reference in or filed with this Quarterly Report on Form 10-Q, please remember such agreements are included to provide information regarding the terms of such agreements and are not intended to provide any other factual or disclosure information about the Company. The agreements may contain representations and warranties by the Company, which should not in all instances be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties to such agreements should those statements prove to be inaccurate. The representations and warranties were made only as of the date of the relevant agreement or such other date or dates as may be specified in such agreement and are subject to more recent developments. Accordingly, these representations and warranties alone may not describe the actual state of affairs of the Company or its affiliates

as of the date they were made or at any other time.

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

CORPORATE OVERVIEW

Three Months Ended September 30, 2015 vs. Three Months Ended September 30, 2014

Income from continuing operations attributable to EQT Corporation for the three months ended September 30, 2015 was \$40.8 million, \$0.27 per diluted share, compared with \$98.6 million, \$0.65 per diluted share, for the three months ended September 30, 2014. The \$57.8 million decrease in income from continuing operations attributable to EQT Corporation between periods was primarily attributable to a 42% decrease in the average realized price for production sales volumes, higher operating expenses and higher net income attributable to noncontrolling interests, partially offset by increased gains on derivatives not designated as hedges, increased production sales volumes, lower income tax expense and increased gathering and transmission firm reservation revenues.

The average realized price to EQT Corporation for production sales volumes was \$2.12 per Mcfe for the three months ended September 30, 2015 compared to \$3.63 per Mcfe for the three months ended September 30, 2014. The decrease in the average realized price was driven by lower New York Mercantile Exchange (NYMEX) natural gas prices net of cash settled derivatives, a lower average differential and lower natural gas liquids (NGLs) prices.

The average NYMEX natural gas index price was \$2.77 per MMBtu during the third quarter of 2015, 32% lower than the average index price of \$4.06 per MMBtu during the third quarter of 2014. In addition, the average differential decreased \$0.13 per Mcf primarily due to lower recoveries. Recoveries represent differences in natural gas prices between the Appalachian Basin and the sales points of other markets reached by utilizing transportation capacity, differences in natural gas prices between Appalachian Basin and fixed price sales contracts, term sales with fixed differentials to NYMEX and other marketing activity, including the resale of unused pipeline capacity. The average NGL price was \$8.10 per barrel for the three months ended September 30, 2015 compared to \$42.27 per barrel for the three months ended September 30, 2014.

Net income attributable to noncontrolling interests of EQT GP Holdings, LP (EQGP) and EQM was \$59.4 million for the three months ended September 30, 2015 compared to \$33.7 million for the three months ended September 30, 2014. The \$25.7 million increase was primarily the result of increased net income at EQM and increased noncontrolling interests as a result of EQM's March 2015 public offering of common units, EQGP's May 2015 initial public offering (IPO), and EQM's September 2015 issuances of common units in connection with the \$750 million ATM Program (as defined in Note D to the Condensed Consolidated Financial Statements). In March 2015, EQM completed a public offering of additional EQM common units in connection with the NWV Gathering Transaction (as defined in Note D to the Condensed Consolidated Financial Statements). In May 2015, EQGP completed an IPO of 26,450,000 common units representing limited partner interests in EQGP, which represented 9.9% of EQGP's outstanding limited partner interests. The Company retained a 90.1% limited partner interest and a non-economic general partner interest in EQGP (as described in Note C to the Condensed Consolidated Financial Statements). During September 2015, EQM issued 827,975 common units pursuant to the \$750 million ATM Program.

Income tax expense was \$35.9 million for the three months ended September 30, 2015, compared to income tax expense of \$64.5 million for the three months ended September 30, 2014. The Company's effective income tax rate was 26.4% and 32.8% for the three months ended September 30, 2015 and 2014, respectively. The decrease in the effective income tax rate was primarily attributable to an increase in income allocated to the noncontrolling limited partners of EQGP and EQM, a decrease in EQT Production's operating income, a decrease in state taxes in 2015 as a result of lower pre-tax income on state tax paying entities and increased tax credits recorded in 2015. The Company's effective income tax rate was reduced for both periods as the Company consolidates 100% of the pre-tax income related to the noncontrolling public limited partners' share of EQGP earnings, but is not required to record an income

tax provision with respect to the portion of the earnings allocated to EQGP and EQM noncontrolling public limited partners. Earnings allocated to the EQGP and EQM noncontrolling public limited partners increased in the third quarter 2015 compared to the third quarter 2014 due to higher net income at EQM and increased noncontrolling interests as a result of EQM's March 2015 public offering of common units, EQGP's May 2015 IPO and issuances of EQM common units under the \$750 million ATM Program.

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Nine Months Ended September 30, 2015 vs. Nine Months Ended September 30, 2014

Income from continuing operations attributable to EQT Corporation for the nine months ended September 30, 2015 was \$219.8 million, \$1.44 per diluted share, compared with \$399.9 million, \$2.62 per diluted share, for the nine months ended September 30, 2014. The \$180.1 million decrease in income from continuing operations attributable to EQT Corporation between periods was primarily attributable to a 37% decrease in the average realized price for production sales volumes, higher operating expenses and higher net income attributable to noncontrolling interests, partially offset by increased gains on derivatives not designated as hedges, lower income tax expense, increased production sales volumes and increased gathering and transmission firm reservation revenues.

The average realized price to EQT Corporation for production sales volumes was \$2.71 per Mcfe for the nine months ended September 30, 2015 compared to \$4.32 per Mcfe for the nine months ended September 30, 2014. The decrease in the average realized price was driven by lower NYMEX natural gas prices net of cash settled derivatives, a lower average differential and lower NGL prices.

The average NYMEX natural gas index price was \$2.80 per MMBtu during the nine months ended September 30, 2015, 38% lower than the average index price of \$4.55 per MMBtu during the nine months ended September 30, 2014. In addition, the average differential decreased \$0.25 per Mcf primarily due to lower Appalachian Basin basis, which was partially offset by increased recoveries. The average NGL price was \$15.17 per barrel for the nine months ended September 30, 2015 compared to \$46.46 per barrel for the nine months ended September 30, 2014.

Net income attributable to noncontrolling interests of EQGP and EQM was \$165.4 million for the nine months ended September 30, 2015 compared to \$79.8 million for the nine months ended September 30, 2014. The \$85.6 million increase was primarily the result of increased net income at EQM and increased noncontrolling interests as a result of EQM's March 2015 public offering of common units, EQGP's May 2015 IPO, and EQM's September 2015 issuances of common units in connection with the \$750 million ATM Program. Additionally, during May of 2014, EQM completed a public offering of common units in connection with its acquisition of the Jupiter gathering system from the Company.

Interest expense increased \$11.0 million during the nine months ended September 30, 2015 compared to the nine months ended September 30, 2014 primarily as a result of EQM's 4.00% Senior Notes due 2024 issued during the third quarter of 2014.

Income tax expense decreased \$211.5 million in the nine months ended September 30, 2015 compared to the nine months ended September 30, 2014 primarily as a result of lower pre-tax income and a realized \$35.5 million tax benefit in connection with recent Internal Revenue Service (IRS) guidance received by the Company in connection with the Company's sale of Equitable Gas Company, LLC in 2013 (discussed below). The Company's effective income tax rate decreased to 6.9% in 2015 from 33.3% in 2014. The decrease in the effective income tax rate from the nine months of 2014 is primarily attributable to the effects of the IRS guidance, an increase in earnings allocated to noncontrolling limited partners of EQGP and EQM, a decrease in EQT Production's operating income, a decrease in state taxes in 2015 as a result of lower pre-tax income on state paying entities and increased tax credits in 2015. The overall rate was lower for both periods as the Company consolidates 100% of the pre-tax income related to the noncontrolling public limited partners' share of EQGP earnings, but is not required to record an income tax provision with respect to the portion of the earnings allocated to EQM and EQGP noncontrolling public limited partners. Earnings allocated to the EQM and EQGP noncontrolling public limited partners increased in the nine months ended September 30, 2015 compared to the nine months ended September 30, 2014 due to higher net income at EQM and increased noncontrolling interests as a result of EQM's March 2015 public offering of common units, EQGP's May

2015 IPO and issuances of EQM common units under the \$750 million ATM Program.

For the nine months ended September 30, 2015, the Company realized a \$35.5 million tax benefit in connection with recent IRS guidance received by the Company regarding the Company's sale of Equitable Gas Company, LLC, a regulated entity, in 2013. The transaction included a partial like-kind exchange of assets that resulted in tax deferral for the Company. However, in order to be in compliance with the normalization rules of the Internal Revenue Code, the IRS guidance held that the deferred tax liability associated with the exchanged regulatory assets should not be considered for ratemaking purposes. As a result, during the second quarter of 2015, the Company recorded a regulatory asset equal to the taxes deferred from the exchange and an associated income tax benefit. The regulatory asset and deferred taxes will be reversed when the assets are disposed of in a taxable transaction such as a sale of assets or amortized over the 32-year remaining life of the assets received in the exchange, in either event increasing tax expense at that time.

See "Business Segment Results of Operations" for a discussion of production sales volumes and gathering and transmission firm reservation revenues.

See "Investing Activities" under the caption "Capital Resources and Liquidity" for a discussion of capital expenditures.

Consolidated Operational Data

Revenues earned by the Company from the sale of natural gas, NGLs and oil are split between EQT Production and EQT Midstream. The split is reflected in the calculation of EQT Production's average realized price. The following operational information presents detailed gross liquid and natural gas operational information as well as midstream deductions to assist in the understanding of the Company's consolidated operations.

The operational information in the table below presents an average realized price (\$/Mcf) to EQT Production and EQT Corporation, which is based on EQT Production adjusted net operating revenues, a non-GAAP supplemental financial measure. EQT Production adjusted net operating revenues is presented because it is an important measure used by the Company's management to evaluate period-to-period comparisons of earnings trends. EQT Production adjusted net operating revenues should not be considered as an alternative to EQT Corporation total operating revenues as reported in the Statements of Consolidated Income, the most directly comparable GAAP financial measure. See "Reconciliation of Non-GAAP Measures" for a reconciliation of EQT Production adjusted net operating revenues to EQT Corporation total operating revenues.

(a) NGLs and crude oil were converted to Mcfe at the rate of six Mcfe per barrel for all periods.

The Company's volume weighted NYMEX natural gas price (actual average NYMEX natural gas price (\$/MMBtu) (b) was \$2.77 and \$4.06 for the three months ended September 30, 2015 and 2014, respectively, and \$2.80 and \$4.55 for the nine months ended September 30, 2015 and 2014, respectively).

Recoveries represent differences in natural gas prices between the Appalachian Basin and the sales points of other markets reached by utilizing transportation capacity, differences in natural gas prices between Appalachian Basin and fixed price sales contracts, term sales with fixed differentials to NYMEX and other marketing activity, (c) including the sale of unused pipeline capacity. Recoveries include approximately \$0.20 and \$0.19 per Mcf for the three months ended September 30, 2015 and 2014, respectively, and \$0.20 and \$0.18 per Mcf for the nine months ended September 30, 2015 and 2014, respectively, for the sale of unused pipeline capacity.

Management's Discussion and Analysis of Financial Condition and Results of Operations

## Reconciliation of Non-GAAP Measures

The table below reconciles EQT Production adjusted net operating revenues, a non-GAAP supplemental financial measure, to EQT Corporation total operating revenues as reported in the Statements of Consolidated Income, its most directly comparable financial measure calculated in accordance with GAAP.

The Company reports gain (loss) for hedging ineffectiveness and gain (loss) on derivatives not designated as hedges within total operating revenues in the Statements of Consolidated Income.

EQT Production adjusted net operating revenues is presented because it is an important measure used by the Company's management to evaluate period-over-period comparisons of earnings trends. EQT Production adjusted net operating revenues as presented excludes the revenue impact of changes in the fair value of derivative instruments prior to settlement and is net of transportation and processing costs. Management utilizes EQT Production adjusted net operating revenues to evaluate earnings trends because the measure reflects only the impact of settled derivative contracts and thus does not burden the revenue from natural gas sales with the often volatile fluctuations in the fair value of derivatives prior to settlement. EQT Production adjusted net operating revenues also reflects third-party transportation and processing costs as deductions from operating revenues because management considers the net price realized for sales of products, after the costs of processing and transporting the product to sales points, to be an indicator of the quality of earnings period-over-period. Management also considers this to be an indicator of how well the Company is utilizing its transportation and processing contracts. The sale price for natural gas is significantly impacted by the market in which the gas is sold and the expense incurred to transport and process the gas is important in evaluating the quality of earnings period-over-period because the cost of reaching a higher priced market may exceed the incremental price benefit of that market as compared to the market where the gas is produced. This is particularly important to natural gas producers in the Appalachian Basin given pipeline constraints and the impact on pricing in the area. Management further believes that EQT Production adjusted net operating revenues as presented provides useful information for investors for evaluating period-over-period earnings and is consistent with industry practices.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Business Segment Results of Operations

Business segment operating results from continuing operations are presented in the segment discussions and financial tables on the following pages. Operating segments are evaluated on their contribution to the Company's consolidated results based on operating income. Other income, interest, and income taxes are managed on a consolidated basis. Headquarters' costs are billed to the operating segments based upon a fixed allocation of the headquarters' annual operating budget. Unallocated expenses consist primarily of incentive compensation expense and administrative costs.

The Company has reported the components of each segment's operating income from continuing operations and various operational measures in the sections below and, where appropriate, has provided information describing how a measure was derived. EQT's management believes that presentation of this information provides useful information to management and investors regarding the financial condition, operations and trends of each of EQT's business segments without being obscured by the financial condition, operations and trends for the other segments or by the effects of corporate allocations of interest, income taxes and other income. In addition, management uses these measures for budget planning purposes. Purchased gas costs at EQT Midstream include natural gas purchases, including natural gas purchases from affiliates, purchased gas costs adjustments and other gas supply expenses. These purchased gas costs are primarily attributable to transactions with affiliates and are eliminated in consolidation. Consistent with the consolidated results, energy trading contracts recorded within storage, marketing and other revenues are reported net within operating revenues, regardless of whether the contracts are physically or financially settled. The Company has reconciled each segment's operating income to the Company's consolidated operating income and net income in Note E to the Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Three Months Ended September 30, 2015 vs. Three Months Ended September 30, 2014

EQT Production's operating income totaled \$56.4 million for the three months ended September 30, 2015 compared to \$140.0 million for the three months ended September 30, 2014. The \$83.6 million decrease in operating income was primarily due to a lower average realized price to EQT Production and increased operating expenses, partly offset by increased gains on derivatives not designated as hedges and increased sales of produced natural gas.

Total operating revenues were \$381.5 million for the three months ended September 30, 2015 compared to \$411.7 million for the three months ended September 30, 2014. The \$30.2 million decrease in operating revenues was primarily due to a 55% decrease in the average realized price to EQT Production and a prior year gain on hedge ineffectiveness, partly offset by increased gains on derivatives not designated as hedges and a 27% increase in production sales volumes in the current year.

The components of average realized price are outlined in the table on page 25. The \$1.48 per Mcfe decrease in the average realized price to EQT Production for the three months ended September 30, 2015 was primarily due to the decrease in the average NYMEX natural gas price net of cash settled derivatives of \$0.74 per Mcf and a decrease in the average natural gas differential of \$0.13 per Mcf and lower NGL prices. The change in the average differential includes decreased recoveries of \$0.16 per Mcf as a result of reduced spreads between prices in the Appalachian Basin and ultimate sales prices.

The increase in production sales volumes was primarily the result of increased production from the 2013 and 2014 drilling programs, primarily in the Marcellus play. This increase was partially offset by the normal production decline in the Company's producing wells.

Total operating revenues for the quarter ended September 30, 2015 included a \$160.5 million gain on derivatives not designated as hedges compared to a gain of \$0.8 million for the quarter ended September 30, 2014. The gains for the quarter ended September 30, 2015 related to favorable changes in the fair market value of EQT Production's NYMEX swaps due to a decrease in forward NYMEX prices during the third quarter of 2015. During the quarter ended September 30, 2015, EQT Production received \$33.2 million of net cash settlements for derivatives not designated as hedges. For the quarter ended September 30, 2014, EQT Production received \$3.0 million of net cash settlements for derivatives not designated as hedges. These net cash settlements are included in the average realized price discussion above.

Operating expenses totaled \$325.2 million for the three months ended September 30, 2015 compared to \$271.7 million for the three months ended September 30, 2014. The increase in operating expenses was the result of increases in DD&A, transportation and processing, exploration expense, SG&A expense and LOE partially offset by a decrease in production taxes. The increase in DD&A expense was the result of higher produced volumes partially offset by a lower overall depletion rate in the current year. Transportation and processing expense increased by \$16.2 million primarily due to additional contracted capacity to move EQT Production's natural gas out of the Appalachian Basin and increased liquids processing fees. Transportation and processing expenses are included in the average realized price to EQT Production. Exploration expense increased \$4.6 million primarily due to increased impairments of unproved lease acreage associated with leased acreage outside of core development areas. The increase in SG&A expense was primarily due to \$3.5 million of rig release penalties and a \$3.5 million increase in personnel costs, partly offset by a \$1.8 million favorable adjustment to the reserve for uncollectible accounts and \$1.4 million of lower professional services costs. The increase in LOE was mainly due to increased Marcellus activity. The decrease in production taxes was primarily driven by a \$4.6 million decrease in severance taxes due to lower market sales prices partly offset by higher production sales volumes in certain jurisdictions subject to these taxes and a \$1.0 million

increase in property taxes.

Table of Contents

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Nine Months Ended September 30, 2015 vs. Nine Months Ended September 30, 2014

EQT Production's operating income totaled \$175.3 million for the nine months ended September 30, 2015 compared to \$561.9 million for the nine months ended September 30, 2014. The \$386.6 million decrease in operating income was primarily due to a lower average realized price to EQT Production, increased operating expenses and a gain on the sale / exchange of assets in 2014, which was partly offset by increased sales of produced natural gas and current year gains on derivatives not designated as hedges.

Total operating revenues were \$1,127.3 million for the nine months ended September 30, 2015 compared to \$1,297.6 million for the nine months ended September 30, 2014. The \$170.3 million decrease in operating revenues was primarily due to a 47% decrease in the average realized price to EQT Production and a prior year gain on hedging ineffectiveness, partly offset by a 32% increase in production sales volumes and gains on derivatives not designated as hedges in the current year.

The \$1.60 per Mcfe decrease in the average realized price to EQT Production for the nine months ended September 30, 2015 was primarily due to the decrease in the average NYMEX natural gas price net of cash settled derivatives of \$0.93 per Mcf, a decrease in the average natural gas differential of \$0.25 per Mcf and lower NGL prices. The change in the average differential includes lower Appalachian Basin basis of \$0.36 per Mcf and increased recoveries of \$0.09 per Mcf. For the nine months ended September 30, 2015, EQT Production recognized higher recoveries compared to the nine months ended September 30, 2014 primarily by using its contracted transportation capacity to sell gas in higher priced markets as well as from favorable fixed price sales contracts. The Company had more contracted transportation capacity available to move gas out of the Appalachian Basin in the nine months ended September 30, 2015 compared to the nine months ended September 30, 2014, primarily related to Texas Eastern Transmission capacity of 300,000 MMBtu per day which came online in November 2014.

The increase in production sales volumes was the result of increased production from the 2013 and 2014 drilling programs, primarily in the Marcellus play. This increase was partially offset by the normal production decline in the Company's producing wells.

Total operating revenues for the nine months ended September 30, 2015 included a \$209.9 million gain on derivatives not designated as hedges compared to \$13.0 million of derivative losses for the nine months ended September 30, 2014. The gains for the nine months ended September 30, 2015 related to favorable changes in the fair market value of EQT Production's NYMEX hedges due to a decrease in forward NYMEX prices during the nine months ended September 30, 2015. During the nine months ended September 30, 2015, EQT Production received \$69.7 million of net cash settlements for derivatives not designated as hedges. For the nine months ended September 30, 2014, EQT Production paid \$5.9 million of net cash settlements for derivatives not designated as hedges. These net cash settlements are included in the average realized price discussion above.

Operating expenses totaled \$952.0 million for the nine months ended September 30, 2015 compared to \$766.6 million for the nine months ended September 30, 2014. The increase in operating expenses was the result of increases in DD&A, transportation and processing, exploration expense, SG&A, and LOE partially offset by a decrease in production taxes. The increase in DD&A expense was the result of higher produced volumes partly offset by a lower overall depletion rate in the current year. Transportation and processing expense increased by \$42.4 million primarily due to additional contracted capacity to move EQT Production's natural gas out of the Appalachian Basin and increased liquids processing fees. Transportation and processing expenses are included in the average realized price to EQT Production. Exploration expense increased \$19.7 million due to impairments of unproved lease acreage totaling \$18.6 million primarily from lease expirations and increased delay rental payments. The increase in SG&A expense

was primarily due to \$12.5 million of higher personnel costs, \$10.4 million of drilling program reduction charges, including rig release penalties, and \$4.3 million of Utica proved property impairment, partly offset by a \$4.6 million reduction to the reserve for uncollectible accounts and \$4.0 million of higher litigation and environmental remediation costs in the prior year. The increase in LOE was due to increased Permian maintenance costs and Marcellus activities as well as insurance costs. Production taxes decreased primarily due to a \$12.3 million decrease in severance taxes due to lower market sales prices, partly offset by higher production sales volumes in certain jurisdictions subject to these taxes, and a \$3.6 million increase in property taxes.

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Three Months Ended September 30, 2015 vs. Three Months Ended September 30, 2014

EQT Midstream's operating income totaled \$113.0 million for the three months ended September 30, 2015 compared to \$93.6 million for the three months ended September 30, 2014. The increase in operating income was primarily the result of increased gathering and transmission operating revenues, partly offset by increased operating expenses and a decrease in storage, marketing and other net operating revenues.

Gathering revenues increased by \$23.5 million primarily as a result of higher affiliate volumes gathered for the three months ended September 30, 2015 compared to the three months ended September 30, 2014, driven by production development in the Marcellus Shale. EQT Midstream significantly increased firm reservation fee revenues in 2015 compared to 2014 as a result of increased capacity under firm contracts with affiliates. The decrease in usage fees was primarily due to affiliates contracting for additional firm capacity.

Transmission operating revenues increased by \$6.9 million in the third quarter of 2015 compared to 2014, reflecting continued production development in the Marcellus Shale by affiliate and third-party producers. The increase primarily resulted from higher firm reservation fees of \$11.2 million partly offset by lower usage fees under both firm and interruptible contracts. The decrease in usage fees was primarily due to customers contracting for additional firm capacity.

Storage, marketing and other net operating revenues decreased from the prior year primarily as a result of lower revenues on NGLs marketed for non-affiliate producers due to lower liquids pricing in the current year.

Total operating expenses increased by \$9.4 million for the three months ended September 30, 2015 compared to the three months ended September 30, 2014. O&M expense increased \$4.5 million as a result of \$2.1 million of higher compressor and pipeline expenses related to an increase in Marcellus activity, higher personnel costs of \$1.1 million and higher property taxes. SG&A expense increased \$2.7 million primarily due to increased allocated expenses from affiliates of \$1.3 million and higher personnel costs. DD&A increased \$2.1 million as a result of additional assets placed in-service.

Total operating revenues increased \$24.7 million primarily as a result of increased gathering and transmission revenue offset by reduced gas marketing activity for storage, marketing and other. Purchased gas costs decreased \$4.1 million primarily as a result of reduced natural gas purchases from affiliates for gas marketing activities.

Nine Months Ended September 30, 2015 vs. Nine Months Ended September 30, 2014

EQT Midstream's operating income totaled \$350.9 million for the nine months ended September 30, 2015 compared to \$265.2 million for the nine months ended September 30, 2014. The increase in operating income was primarily the result of increased gathering and transmission operating revenues partly offset by increased operating expenses, a decrease in storage, marketing and other net operating revenues and a gain on the sale / exchange of assets in 2014.

Gathering revenues increased by \$94.7 million primarily as a result of higher affiliate volumes gathered for the nine months ended September 30, 2015 compared to the nine months ended September 30, 2014, driven by production development in the Marcellus Shale. EQT Midstream significantly increased firm reservation fee revenues in 2015 compared to 2014 as a result of increased capacity under firm contracts with affiliates. The decrease in usage fees was primarily due to affiliates contracting for additional firm capacity.

Transmission operating revenues increased by \$36.3 million in the first three quarters of 2015 compared to 2014, reflecting continued production development in the Marcellus Shale by affiliate and third-party producers. The increase primarily resulted from higher firm reservation fees of \$42.5 million partly offset by lower usage fees under both firm and interruptible contracts. The decrease in usage fees was primarily due to customers contracting for additional firm capacity.

Storage, marketing and other net operating revenues decreased from the prior year primarily as a result of lower revenues on NGLs marketed for non-affiliate producers as a result of lower liquids pricing in the current year and reduced marketing activity.

Total operating expenses increased \$31.2 million for the nine months ended September 30, 2015 compared to the nine months ended September 30, 2014. O&M expense increased \$12.0 million as a result of higher compressor and pipeline expenses of \$3.4 million related to an increase in Marcellus activity, higher personnel costs of \$2.9 million, higher property taxes and increased allocated expenses from affiliates. SG&A expense increased \$12.7 million primarily as a result of increased allocated expenses

Table of Contents

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

from affiliates of \$4.7 million, higher personnel costs of \$3.0 million, the impairment of certain expiring right of way options of \$1.9 million, higher professional services and higher bad expense as a result of reserve reductions in 2014. DD&A increased \$6.6 million as a result of additional assets placed in-service.

Total operating revenues increased by \$96.8 million primarily as a result of increased gathering and transmission revenue offset by reduced gas marketing activity for storage, marketing and other. Purchased gas costs decreased \$26.9 million primarily as a result of reduced natural gas purchases from affiliates for gas marketing activities.

OUTLOOK

The Company is committed to profitably developing its natural gas, NGL and oil reserves through environmentally responsible, cost-effective and technologically advanced horizontal drilling. Despite the continued uncertainty of natural gas, NGL and oil prices, the Company believes the long-term outlook for its businesses is favorable due to the Company's resource base, financial strength, risk management, including commodity hedging strategy, and disciplined investment of capital. The Company believes the combination of these factors provide it with an opportunity to exploit and develop its positions and maximize efficiency through economies of scale in its key operating areas.

The market prices for natural gas, NGLs and oil can be volatile and have been depressed in 2015. A prolonged low price environment could adversely affect, among other things, the Company's development plans, including the pace of the development of the Company's reserves, as well as the Company's revenues, earnings, liquidity and reserves. As a result of the continued low price environment, the Company suspended drilling on its Permian Basin acreage in the first quarter of 2015 and reduced its estimate of 2015 capital investment, excluding acquisitions, from \$2.55 billion to \$2.4 billion (including EQM). The Company further reduced its estimate to \$2.3 billion in the third quarter of 2015 (including EQM). The reduction was primarily attributable to lower expected drilling and completion service costs.

In July 2015, the Company turned in-line its first dry gas focused Utica well, which has experienced prolific initial results. Given the success of its first Utica well in Greene County, Pennsylvania, the Company has decided to begin development of its Utica acreage and suspend the Upper Devonian and Central Pennsylvania Marcellus drilling programs. The Utica development plan includes two additional Utica wells for 2015, a second Utica well in Pennsylvania and one Utica well in West Virginia.

Capital investment for EQT Production in 2015 is expected to be approximately \$1.6 billion, including \$1.5 billion related to well development (primarily drilling and completion), to support the drilling and completion of approximately 166 gross wells, including 138 Marcellus wells, 24 Upper Devonian wells, 2 Utica wells and 2 other wells.

Sales volumes for 2015 are expected to be 595 - 605 Bcfe, which would result in production sales volume growth of approximately 25% in 2015. To support continued growth in production, the Company plans to invest approximately \$0.7 billion, including \$0.5 billion at EQM, on midstream infrastructure in 2015.

The 2015 capital investment plan is expected to be funded by cash on hand, cash flow generated from operations, proceeds from EQGP's IPO, proceeds from midstream asset sales (dropdowns) to EQM and EQM capital raises.

Table of Contents

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

CAPITAL RESOURCES AND LIQUIDITY

Overview

The Company's primary sources of cash for the nine months ended September 30, 2015 were cash flows from operating activities, cash on hand, proceeds from the IPO of EQGP's common units, proceeds from the public offerings of EQM common units and an increase in EQM's short term debt, while the primary use of cash was for capital expenditures.

Operating Activities

Net cash flows provided by operating activities totaled \$900.2 million for the nine months ended September 30, 2015 compared to \$1,141.9 million for the nine months ended September 30, 2014. The \$241.7 million decrease in operating activities was primarily the result of a 37% lower average realized price to EQT Corporation on natural gas, NGLs and oil sales, partially offset by a 32% increase in production sales volume and increased gathering and transmission firm reservation revenues.

Investing Activities

Net cash flows used in investing activities totaled \$1,975.2 million for the nine months ended September 30, 2015 compared to \$2,100.7 million for the nine months ended September 30, 2014. The \$125.5 million decrease was primarily due to a \$338.6 million decrease in restricted cash deposits and a \$163.3 million decrease in capital expenditures used in connection with the exchange of assets with Range, partially offset by a \$293.0 million increase in capital expenditures for continuing operations and \$75.8 million of capital contributions made to the MVP joint venture, through EQM.

Capital expenditures for continuing operations totaled \$1,899.3 million in the first nine months of 2015 compared to \$1,606.3 million in 2014. The higher capital expenditures for continuing operations in 2015 compared to 2014 were primarily the result of an increase in well development and acreage acquisition expenditures, including payment for capital expenditures accrued at December 31, 2014 and 2013, respectively. The increase in well development was driven by an increase in completed frac stages in the Marcellus play with 4,915 stages completed in the first nine months of 2015 compared to 3,475 stages in the first nine months of 2014.

The Company spud 134 gross wells in the first nine months of 2015, including 130 horizontal Marcellus and Upper Devonian wells, 2 horizontal Utica wells and 2 horizontal Permian Basin wells. The Company spud 244 gross wells in the first nine months of 2014, including 171 horizontal Marcellus and Upper Devonian wells, 72 horizontal Huron wells and 1 horizontal Permian Basin well.

Capital expenditures as reported on the Statement of Condensed Consolidated Cash Flows exclude non-cash capital expenditures for certain labor overhead costs for a portion of non-cash stock-based compensation expense of approximately \$18.5 million and \$13.7 million and accrued but unpaid expenditures at the balance sheet date of \$164.1 million and \$233.3 million for the nine months ended September 30, 2015 and 2014, respectively.

Financing Activities

Cash flows provided by financing activities totaled \$1,660.2 million for the nine months ended September 30, 2015 compared to \$1,284.6 million for the nine months ended September 30, 2014, an increase of \$375.6 million between

periods. During the first nine months of 2015, the Company received net proceeds of \$758.8 million from EQM's public offerings of common units, including sales under the \$750 million ATM Program, net proceeds of \$674.0 million from EQGP's IPO and net proceeds of \$350.0 million from increased borrowings on EQM's revolving line of credit. The Company also paid distributions to noncontrolling interests of \$85.2 million and \$46.5 million for income tax withholdings related to the vesting or exercise of equity awards during the nine months ended September 30, 2015. Under the Company's share-based incentive awards, in connection with the settlement of equity awards, the Company may withhold shares or accept surrendered shares from Company employees holding the awards in exchange for satisfying the cash income tax withholding obligations with respect to the settlement of the awards. The Company received \$35.2 million during the nine months ended September 30, 2015 to satisfy the associated taxes on awards exercised.

During the nine months ended September 30, 2014, the Company received net proceeds of \$902.5 million from EQM's public offering of common units, proceeds of \$500.0 million from EQM's August 2014 issuance of 4% Senior Notes due 2024, and \$42.2 million to satisfy taxes due on equity awards exercised. These proceeds were partially offset by \$49.0 million of income tax

Table of Contents

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

payments related to the vesting or exercise of equity awards, \$46.2 million of distributions paid to noncontrolling interests and \$32.4 million used to repurchase and retire shares of the Company's common stock.

## Security Ratings and Financing Triggers

The table below reflects the credit ratings for debt instruments of the Company at September 30, 2015. Changes in credit ratings may affect the Company's cost of short-term and long-term debt (including interest rates and fees under its lines of credit), collateral requirements under derivative instruments, pipeline capacity contracts, joint venture arrangements and subsidiary construction contracts and access to the credit markets.

Rating Service	Senior Notes	Outlook
Moody's Investors Service	Baa3	Stable
Standard & Poor's Ratings Service	BBB	Stable
Fitch Ratings Service	BBB-	Stable

The table below reflects the credit ratings for debt instruments of EQM at September 30, 2015. Changes in credit ratings may affect EQM's cost of short-term and long-term debt (including interest rates and fees under its lines of credit), collateral requirements under joint venture arrangements and construction contracts and access to the credit markets.

Rating Service	Senior Notes	Outlook
Moody's Investors Service	Ba1	Stable
Standard & Poor's Ratings Service	BBB-	Stable
Fitch Ratings Service	BBB-	Stable

The Company's and EQM's credit ratings are subject to revision or withdrawal at any time by the assigning rating organization, and each rating should be evaluated independently of any other rating. The Company and EQM cannot ensure that a rating will remain in effect for any given period of time or that a rating will not be lowered or withdrawn by a credit rating agency if, in its judgment, circumstances so warrant. If the credit rating agencies downgrade the ratings, particularly below investment grade, the Company's or EQM's access to the capital markets may be limited, borrowing costs and margin deposits on the Company's derivative contracts would increase, counterparties may request additional assurances and the potential pool of investors and funding sources may decrease. The required margin on the Company's derivative instruments is also subject to significant change as a result of factors other than credit rating, such as gas prices and credit thresholds set forth in agreements between the hedging counterparties and the Company.

The Company has a \$1.5 billion credit facility that expires in February 2019, and the Company had no amounts outstanding under the facility as of September 30, 2015. The Company's debt agreements and other financial obligations contain various provisions that, if not complied with, could result in termination of the agreements, require early payment of amounts outstanding or similar actions. The most significant covenants and events of default under the debt agreements relate to maintenance of a debt-to-total capitalization ratio, limitations on transactions with affiliates, insolvency events, nonpayment of scheduled principal or interest payments, acceleration of other financial obligations and change of control provisions. The Company's credit facility contains financial covenants that require a total debt-to-total capitalization ratio of no greater than 65%. The calculation of this ratio excludes the effects of accumulated other comprehensive income (OCI). As of September 30, 2015, the Company was in compliance with all debt provisions and covenants.

EQM has a \$750 million credit facility that expires in February 2019, and EQM had \$350.0 million of outstanding borrowings under the facility as of September 30, 2015. EQM's debt agreements and other financial obligations contain various provisions that, if not complied with, could result in termination of the agreements, require early payment of amounts outstanding or similar actions. The covenants and events of default under the debt agreements relate to maintenance of permitted leverage ratio, limitations on transactions with affiliates, limitations on restricted payments, insolvency events, nonpayment of scheduled principal or interest payments, acceleration of and certain other defaults under other financial obligations and change of control provisions. Under EQM's credit facility, EQM is required to maintain a consolidated leverage ratio of not more than 5.00 to 1.00 (or not more than 5.50 to 1.00 for certain measurement periods following the consummation of certain acquisitions). As of September 30, 2015, EQM was in compliance with all debt provisions and covenants.

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

## EQM ATM Program

During the third quarter of 2015, EQM entered into an equity distribution agreement that established an "At the Market" (ATM) common unit offering program, pursuant to which a group of managers acting as EQM's sales agents may sell EQM common units having an aggregate offering price of up to \$750 million, under which EQM had approximately \$663 million in remaining capacity as of October 22, 2015.

## Commodity Risk Management

The substantial majority of the Company's commodity risk management program is related to hedging sales of the Company's produced natural gas. The Company's overall objective in this hedging program is to protect cash flow from undue exposure to the risk of changing commodity prices. The derivative commodity instruments currently utilized by the Company are primarily NYMEX swaps and collars. The Company may also use other contractual agreements in implementing its commodity hedging strategy. The Company also enters into fixed price natural gas sales agreements that are satisfied by physical delivery. The Company's fixed price natural gas sales agreements include contracts that fix only the NYMEX portion of the price and contracts that fix NYMEX and basis. The Company does not currently hedge its oil or NGL exposure.

As of October 21, 2015, the approximate volumes and prices of the Company's total hedge position through December 2017 were:

NYMEX swaps and fixed price sales	2015 (b)	2016 (c)	2017 (c)
Total Volume (Bcf)	75	248	103
Average Price per Mcf (a)	\$4.04	\$3.81	\$3.66
Collars			
Total Volume (Bcf)	9	—	7
Average Floor Price per Mcf (NYMEX) (a)	\$4.47	\$—	\$3.15
Average Cap Price per Mcf (NYMEX) (a)	\$7.19	\$—	\$4.03

(a) The average price is based on a conversion rate of 1.05 MMBtu/Mcf.

(b) October through December 31.

(c) For 2016 and 2017, the Company also has a natural gas sales agreement for approximately 35 Bcf that includes a NYMEX ceiling price of \$4.88 per Mcf. The Company also sold calendar year 2016 and 2017 calls for approximately 11 Bcf and 17 Bcf at strike prices of \$3.65 per Mcf and \$3.79 per Mcf, respectively.

See Item 3, "Quantitative and Qualitative Disclosures About Market Risk," and Note F to the Company's Condensed Consolidated Financial Statements for further discussion of the Company's hedging program.

## Commitments and Contingencies

In the ordinary course of business, various legal and regulatory claims and proceedings are pending or threatened against the Company. While the amounts claimed may be substantial, the Company is unable to predict with certainty the ultimate outcome of such claims and proceedings. The Company accrues legal and other direct costs related to loss contingencies when actually incurred. The Company has established reserves it believes to be appropriate for pending matters and, after consultation with counsel and giving appropriate consideration to available insurance, the Company believes that the ultimate outcome of any matter currently pending against the Company will not materially affect the Company's financial position, results of operations or liquidity.

Off-Balance Sheet Arrangements

As of September 30, 2015, EQM has issued a \$110 million performance guarantee (the Initial Guarantee) in connection with the obligations of MVP Holdco, LLC (MVP Holdco) to fund its proportionate share of the construction budget for the MVP. Upon the Federal Exchange Regulatory Commission's initial release to begin construction of the MVP, the Initial Guarantee will terminate, and EQM will be obligated to issue a new guarantee in an amount equal to 33% of MVP Holdco's remaining obligations to make capital contributions to the MVP joint venture in connection with the then remaining construction budget.

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Dividend

On October 14, 2015, the Board of Directors of the Company declared a regular quarterly cash dividend of three cents per share, payable December 1, 2015, to the Company's shareholders of record at the close of business on November 13, 2015.

On October 20, 2015, the Board of Directors of EQGP's general partner declared a cash distribution to EQGP's unitholders for the third quarter of 2015 of \$0.104 per common unit, or approximately \$27.7 million. The distribution will be paid on November 23, 2015 to unitholders of record, including the Company, at the close of business on November 2, 2015.

On October 20, 2015, the Board of Directors of EQM's general partner declared a cash distribution to EQM's unitholders for the third quarter of 2015 of \$0.675 per common unit. The cash distribution will be paid on November 13, 2015 to unitholders of record, including EQGP, at the close of business on November 2, 2015. Based on the 71,870,181 EQM common units outstanding on October 22, 2015, the aggregate cash distributions to EQGP would be approximately \$28.6 million consisting of: \$14.7 million in respect of its limited partner interest, \$1.2 million in respect of its general partner interest and \$12.7 million in respect of its incentive distribution rights in EQM. The distributions in respect of EQGP's general partner interest and incentive distribution rights in EQM are subject to change if EQM issues additional common units on or prior to the record date for the third quarter 2015 distribution.

Critical Accounting Policies

The Company's critical accounting policies are described in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," for the year ended December 31, 2014 contained in the Company's Annual Report on Form 10-K. Any new accounting policies or updates to existing accounting policies as a result of new accounting pronouncements have been included in the notes to the Company's Condensed Consolidated Financial Statements contained in this Quarterly Report on Form 10-Q for the three and nine month periods ended September 30, 2015. The application of the Company's critical accounting policies may require management to make judgments and estimates about the amounts reflected in the Condensed Consolidated Financial Statements. Management uses historical experience and all available information to make these estimates and judgments. Different amounts could be reported using different assumptions and estimates.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Derivative Instruments

The Company's primary market risk exposure is the volatility of future prices for natural gas and NGLs, which can affect the operating results of the Company, primarily at EQT Production. The Company's use of derivatives to reduce the effect of this volatility is described in Note F to the Condensed Consolidated Financial Statements and under the caption "Commodity Risk Management" in the "Capital Resources and Liquidity" section of Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations" of this Quarterly Report on Form 10-Q. The Company uses derivative commodity instruments that are placed primarily with financial institutions and the creditworthiness of these institutions is regularly monitored. The Company also enters into derivative instruments to hedge other forecasted natural gas purchases and sales, to hedge basis and to hedge exposure to fluctuations in interest rates. The Company's use of derivative instruments is implemented under a set of policies approved by the Company's Hedge & Financial Risk Committee and reviewed by the Audit Committee of the Board of Directors.

## Commodity Price Risk

For the derivative commodity instruments used to hedge the Company's forecasted sales of production, most of which are hedged at NYMEX natural gas prices, the Company sets policy limits relative to the expected production and sales levels which are exposed to price risk. For the derivative commodity instruments used to hedge forecasted natural gas purchases and sales which are exposed to price risk, the Company sets limits related to acceptable exposure levels. The Company does not have any natural gas derivative commodity instruments for trading purposes.

The financial instruments currently utilized by the Company are primarily fixed price swap agreements and collar agreements which may require payments to or receipt of payments from counterparties based on the differential between two prices for the commodity. The Company may also use other contractual agreements in implementing its commodity hedging strategy.

## Table of Contents

The Company monitors price and production levels on a continuous basis and makes adjustments to quantities hedged as warranted. The Company's overall objective in its hedging program is to protect cash flows from undue exposure to the risk of changing commodity prices.

With respect to the derivative commodity instruments held by the Company as of September 30, 2015 and December 31, 2014, the Company hedged portions of expected sales of equity production, portions of forecasted purchases and sales, and portions of its basis exposure covering approximately 527 Bcf and 563 Bcf of natural gas, respectively. See the "Commodity Risk Management" section in the "Capital Resources and Liquidity" section of Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations" of this Quarterly Report on Form 10-Q for further discussion.

A hypothetical decrease of 10% in the market price of natural gas from the September 30, 2015 and December 31, 2014 levels would increase the fair value of natural gas derivative instruments by approximately \$112.8 million and \$126.6 million, respectively. A hypothetical increase of 10% in the market price of natural gas from the September 30, 2015 and December 31, 2014 levels would decrease the fair value of natural gas derivative instruments by approximately \$113.7 million and \$126.5 million, respectively.

The Company determined the change in the fair value of the derivative commodity instruments using a method similar to its normal determination of fair value as described in Note G to the Condensed Consolidated Financial Statements. The Company assumed a 10% change in the price of natural gas from its levels at September 30, 2015 and December 31, 2014. The price change was then applied to the natural gas derivative commodity instruments recorded on the Company's Condensed Consolidated Balance Sheets, resulting in the change in fair value.

The above analysis of the derivative commodity instruments held by the Company does not include the offsetting impact that the same hypothetical price movement may have on the Company's physical sales of natural gas. The portfolio of derivative commodity instruments held to hedge the Company's forecasted equity production approximates a portion of the Company's expected physical sales of natural gas. Therefore, an adverse impact to the fair value of the portfolio of derivative commodity instruments held to hedge the Company's forecasted production associated with the hypothetical changes in commodity prices referenced above should be offset by a favorable impact on the Company's physical sales of natural gas, assuming the derivative commodity instruments are not closed out in advance of their expected term, the derivative commodity instruments continue to function effectively as hedges of the underlying risk, the anticipated transactions occur as expected and basis does not significantly change.

If the underlying physical transactions or positions are liquidated prior to the maturity of the derivative commodity instruments, a loss on the financial instruments may occur or the derivative commodity instruments might be worthless as determined by the prevailing market value on their termination or maturity date, whichever comes first.

## Interest Rate Risk

Changes in interest rates affect the amount of interest the Company, EQGP and EQM earn on cash, cash equivalents and short-term investments and the interest rates the Company and EQM pay on borrowings under their respective revolving credit facilities. All of the Company's and EQM's long-term borrowings are fixed rate and thus do not expose the Company to fluctuations in its results of operations or liquidity from changes in market interest rates. Changes in interest rates do affect the fair value of the Company's and EQM's fixed rate debt. See Note I to the Condensed Consolidated Financial Statements for further discussion of the Company's borrowings and Note G to the Condensed Consolidated Financial Statements for a discussion of fair value measurements, including the fair value of long-term debt.

#### Other Market Risks

The Company is exposed to credit loss in the event of nonperformance by counterparties to derivative contracts. This credit exposure is limited to derivative contracts with a positive fair value, which may change as market prices change. The Company believes that NYMEX-traded futures contracts have limited credit risk because Commodity Futures Trading Commission regulations are in place to protect exchange participants, including the Company, from potential financial instability of the exchange members. The Company's OTC derivative instruments are primarily with financial institutions and, thus, are subject to events that would impact those companies individually as well as that industry as a whole.

The Company utilizes various processes and analyses to monitor and evaluate its credit risk exposures. These include closely monitoring current market conditions, counterparty credit fundamentals and credit default swap rates. Credit exposure is controlled through credit approvals and limits based on counterparty credit fundamentals. To manage the level of credit risk, the Company enters into transactions with financial counterparties that are of investment grade or better, enters into netting agreements whenever possible and may obtain collateral or other security.

## Table of Contents

Approximately 94%, or \$395.3 million, of the Company's OTC derivative contracts at September 30, 2015 had a positive fair value. Approximately 95%, or \$458.5 million, of the Company's OTC derivative contracts at December 31, 2014 had a positive fair value.

As of September 30, 2015, the Company was not in default under any derivative contracts and had no knowledge of default by any counterparty to its derivative contracts. The Company made no adjustments to the fair value of derivative contracts due to credit related concerns outside of the normal non-performance risk adjustment included in the Company's established fair value procedure. The Company monitors market conditions that may impact the fair value of derivative contracts reported in the Condensed Consolidated Balance Sheets.

The Company is also exposed to the risk of nonperformance by credit customers on physical sales or transportation of natural gas. A significant amount of revenues and related accounts receivable of EQT Production are generated from the sale of produced natural gas, NGLs and crude oil to certain marketers, utility and industrial customers located mainly in the Appalachian Basin and the Northeastern United States as well as the Permian Basin of Texas and a gas processor in Kentucky and West Virginia. Additionally, a significant amount of revenues and related accounts receivable of EQT Midstream are generated from the transportation or gathering of natural gas in Kentucky, Virginia, Pennsylvania and West Virginia.

The Company has a \$1.5 billion revolving credit facility that expires in February 2019. The credit facility is underwritten by a syndicate of financial institutions, each of which is obligated to fund its pro-rata portion of any borrowings by the Company. As of September 30, 2015, the Company had no loans or letters of credit outstanding under the facility. No one lender of the large group of financial institutions in the syndicate holds more than 10% of the facility. The Company's large syndicate group and relatively low percentage of participation by each lender is expected to limit the Company's exposure to problems or consolidation in the banking industry.

EQM has a \$750 million revolving credit facility that expires in February 2019. The credit facility is underwritten by a syndicate of financial institutions, each of which is obligated to fund its pro-rata portion of any borrowings by EQM. As of September 30, 2015, EQM had \$350 million of loans and no letters of credit outstanding under the credit facility. No one lender of the large group of financial institutions in the syndicate holds more than 10% of the facility. EQM's large syndicate group and relatively low percentage of participation by each lender is expected to limit EQM's exposure to problems or consolidation in the banking industry.

### Item 4. Controls and Procedures

#### Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of management, including the Company's Principal Executive Officer and Principal Financial Officer, an evaluation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act)), was conducted as of the end of the period covered by this report. Based on that evaluation, the Principal Executive Officer and Principal Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

#### Changes in Internal Control over Financial Reporting

There were no changes in internal control over financial reporting (as such term is defined in Rule 13a-15(f) under the Exchange Act) that occurred during the third quarter of 2015 that have materially affected, or are reasonably likely to

materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

In the ordinary course of business, various legal and regulatory claims and proceedings are pending or threatened against the Company. While the amounts claimed may be substantial, the Company is unable to predict with certainty the ultimate outcome of such claims and proceedings. The Company accrues legal and other direct costs related to loss contingencies when actually incurred. The Company has established reserves it believes to be appropriate for pending matters and, after consultation with counsel and giving appropriate consideration to available insurance, the Company believes that the ultimate outcome of any matter currently pending against the Company will not materially affect the financial position, results of operations or liquidity of the Company.

Environmental Proceedings

In June and August 2012, the Company received three Notices of Violation (NOVs) from the Pennsylvania Department of Environmental Protection (the PADEP). The NOVs alleged violations of the Pennsylvania Oil and Gas Act and Clean Streams Law in connection with the unintentional release in May 2012, by a Company vendor, of water from an impaired water pit at a Company well location in Tioga County, Pennsylvania. Since confirming a release, the Company has cooperated with the PADEP in remediating the affected areas.

During the second quarter of 2014, the Company received a proposed consent assessment of civil penalty (CACP) from the PADEP and the Pennsylvania Fish and Boat Commission (the PFBC). Under the CACP, the PADEP proposed a civil penalty related to the NOVs and the PFBC proposed a civil penalty related to possible violations of the Pennsylvania Fish and Boat Code. The Company was unable to resolve the PADEP claims due to the agency's interpretation of the penalty provisions of the Clean Streams Law. Accordingly, on September 19, 2014, the Company filed a declaratory judgment action in the Commonwealth Court of Pennsylvania against the PADEP seeking a court ruling on the legal interpretation. A Commonwealth Court decision upholding the PADEP's preliminary objections to the Company's complaint is on appeal to the Pennsylvania Supreme Court. On October 7, 2014, the PADEP filed a complaint against the Company before the Pennsylvania Environmental Hearing Board seeking \$4.53 million in civil penalties. The Company believes the PADEP's penalty assessment is legally flawed and unsupportable under the Clean Streams Law.

While the Company expects the PADEP's claims to result in penalties that exceed \$100,000, the Company expects the resolution of these matters, individually and in the aggregate, will not have a material impact on the financial position, results of operations or liquidity of the Company.

Item 1A. Risk Factors

Information regarding risk factors is discussed in Item 1A, "Risk Factors" of the Company's Annual Report on Form 10-K for the year ended December 31, 2014. There have been no material changes from the risk factors previously disclosed in the Company's Form 10-K.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table sets forth the Company's repurchases of equity securities registered under Section 12 of the Exchange Act that have occurred during the three months ended September 30, 2015:

Period	Total number of shares purchased (a)	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs (b)
July 2015 (July 1 – July 31)	—	\$—	—	700,000
August 2015 (August 1 – August 31)	2,136	78.47	—	700,000
September 2015 (September 1 – September 30)	—	—	—	700,000
Total	2,136	\$78.47	—	

(a) Reflects shares withheld by the Company to pay taxes upon vesting of restricted stock.

During 2014, the Company's Board of Directors approved a share repurchase authorization of up to 1,000,000 shares of the Company's outstanding common stock. The Company may repurchase shares from time to time in open market or in privately negotiated transactions. The share repurchase authorization does not obligate the Company to acquire any specific number of shares, has no pre-established end date and may be discontinued by the Company at any time. As of September 30, 2015, the Company had repurchased 300,000 shares under this authorization since its inception.
