## **DATA I/O RELEASES PRELIMINARY FIRST QUARTER RESULTS**

### ***Completed Common Share Repurchase Programs***

**Redmond, WA, April 9, 2012** – Data I/O Corporation (NASDAQ: DAIO), the leading provider of manual and automated device programming systems, today announced that for the first quarter of 2012, it expects to report revenues of approximately \$3.7 million and a net loss in the range of \$1.7 to \$2.0 million. Bookings for the quarter were \$4.2 million, and backlog grew to \$1.6 million as of March 31, 2012. The Company believes the decline in orders and revenue relates primarily to reduced capital spending resulting from economic uncertainty related to the European sovereign debt and to a downturn in Asia-based electronics manufacturing. Orders in those two regions were each down approximately 40% compared to the first quarter of 2011; however, orders from the Americas were up 14% compared to the first quarter of 2011.

“Our orders during the quarter were primarily performance- and process-related with our new RoadRunner3, RoadRunner, and new Factory Integration Software 'FIS' product lines showing growth,” stated Fred Hume, President and CEO. “The Company’s sales funnel continues to grow for our new RoadRunner 3 and Factory Integration Software, and the overall funnel is at approximately the same level as it was a year ago. Also, we launched the new FLXHD in February, and it received high interest from potential customers at the Apex 2012 trade show and on demonstration tours in Asia. We expect that interest to translate into sales in the future.”

The Company remains in a strong financial position with cash of approximately \$12 million and no debt at the end of the first quarter. The Company expects to announce final results for the first quarter of 2012 on April 30, 2012.

### **Share Repurchase Programs Results**

Data I/O announced the completion of \$6 million in repurchases of common stock under the new and expanded 2012 stock repurchase program announced on January 9, 2012. The purchases were made under a 10b5-1 plan under the Exchange Act that provided the flexibility to make purchases at any time.

Previously on October 20, 2011, Data I/O announced a stock repurchase program to buy back up to \$1 million dollars of stock over four quarters. Prior to termination of the October 20, 2011 original plan on January 13, 2012, repurchases of 10,581 shares at an average price of \$3.94 for a total repurchase amount of \$41,706 were accomplished during the first quarter of 2012. Under the new and expanded program announced January 9, 2012, Data I/O repurchased an additional 1.47 million shares of stock at an average price of \$4.07 for a total repurchase amount of \$5,984,875 including commissions. Data I/O Corporation had 7.7 million shares of common stock outstanding as of March 31, 2012.

### **About Data I/O Corporation**

With almost 40 years of expertise in delivering intellectual property to programmable devices, Data I/O offers complete, integrated manufacturing solutions in wireless, automotive, programming center, semiconductor, and industrial control market segments for OEM, ODM, EMS and semiconductor companies. Data I/O is the leader in programming and provides hardware and software solutions for turn-key programming and device testing services, as well as in-system (on-board), in-line (right before use at the SMT line), or in-socket (off-line) programming. These solutions are scalable for small, medium and large volume applications with different device mixes. Data I/O Corporation has headquarters in Redmond, Wash., with sales and services worldwide. ### **Forward Looking Statement**

Statements in this news release concerning expected revenue, expected margins, expected loss, orders and financial positions, cash position, share repurchases, new products and any other statement that may be construed as a prediction of future performance or events are forward-looking statements which involve known and unknown risks, uncertainties and other factors which may cause actual results to differ materially from those expressed or implied by such statements. These factors include uncertainties as to ability to record revenues based upon the timing of product deliveries and installations, accrual of expenses, changes in economic conditions and other risks including those described in the Company's filings on Forms 10K and 10Q with the Securities and Exchange Commission (SEC), press releases and other communications.
