TRICO BANCSHARES ANNOUNCES RECORD HIGH EARNINGS IN
THIRD QUARTER 2004

CHICO, Calif. - (October 21, 2004) - TriCo Bancshares (NASDAQ: TCBK), parent company (the "Company") of Tri Counties Bank (the "Bank"), today announced record quarterly earnings of \$5,203,000 for the quarter ended September 30, 2004. This represents a 19.9% increase when compared with earnings of \$4,338,000 for the quarter ended September 30, 2003. Diluted earnings per share for the quarter ended September 30, 2004 increased 18.5% to \$0.32 from \$0.27 for the quarter ended September 30, 2003. Total assets of the Company increased \$132 million (9.2%) to \$1.573 billion at September 30, 2004 versus \$1.441 billion at September 30, 2003. Total loans of the Company increased \$196 million (21.1%) to \$1.126 billion at September 30, 2004 versus \$930 million at September 30, 2003. Total deposits of the Company increased \$96 million (8.0%) to \$1.292 billion at September 30, 2004 versus \$1.196 billion at September 30, 2003. Diluted earnings per share for the nine months ended September 30, 2004 and 2003 were \$0.91 and \$0.78, respectively, on earnings of \$14,827,000 and \$12,205,000, respectively.

"Tri Counties Bank continues to grow at an outstanding level and we are prepared to handle our anticipated rapid rate of expansion next year," said Richard Smith, President and Chief Executive Officer. "We are opening six new branches in the Sacramento area in the next year. We are excited about the opportunities this creates to add customers that enhance our source of low cost deposits,

service charges and fee revenue. Additionally, loan demand continues to be strong and the credit quality of our loan portfolio remains high."

The increase in earnings for the quarter ended September 30, 2004 over the year-ago quarter was due to a \$2,657,000 (16.8%) increase in net interest income to \$18,457,000, and a \$1,155,000 (22.2%) increase in noninterest income to \$6,361,000. The increase in net interest income was due to a \$222 million (25.3%) increase in average loan balances to \$1.098 billion, and a 0.11% increase in fully tax-equivalent net interest margin to 5.35% during the quarter ended September 30, 2004 compared to the year-ago quarter.

The following table shows the components of noninterest income for the three-month periods ended September 30, 2004 and 2003, and the changes therein:

	Three Months Ended September 30,		
	2004	2003	Change

Other noninterest income	347	213	134
	-----	-----	-----
Total noninterest income	\$ 6,361	\$ 5,206	\$ 1,155

Service charges on deposit accounts, ATM fees and surcharges, other service fees and mortgage servicing valuation provision increased \$1,316,000 (42.2%) to \$4,434,000 during the quarter ended September 30, 2004 compared to \$3,118,000 in the year-ago quarter. The increases in these categories are primarily due to an increase in number of customers as a result of the Bank's continued de-novo expansion and penetration of existing markets, and a decrease in mortgage refinance activity which resulted in higher net service fees, and value of servicing, related to mortgages the Company services for others. During the third quarter of 2003, when refinance activity was high, the Company recorded a \$600,000 valuation allowance for its mortgage servicing portfolio. During the first quarter of 2004, as refinance activity slowed, the Company recovered \$30,000 of the \$600,000 valuation allowance. During the second quarter of 2004, as refinance activity continued to slow, the Company recovered the remaining \$570,000 of this valuation allowance. As of September 30, 2004, the Company serviced \$371 million of residential mortgage loans for others, \$363 million of which is subject to potential valuation allowance. As of September 30, 2004, this servicing portfolio has an estimated market value of \$3.5 million, and is recorded in the Company's consolidated financial statements at \$3.5 million. The decrease in gain on sale of loans is also due to the slowdown in mortgage refinance activity that peaked in the middle of 2003.

The increases in net interest income and noninterest income were partially

offset by a \$1,150,000 (767%) increase in provision for loan losses to \$1,300,000, and a \$1,040,000 (7.4%) increase in noninterest expense to \$15,089,000 in the quarter ended September 30, 2004 versus the year-ago quarter. The increase in provision for loan losses is mainly due to loan growth of \$48 million during the quarter ended September 30, 2004 as loan quality remains high and loan charge-offs were moderate. During the quarter ended September 30, 2004, net loan charge-offs were \$613,000 or 0.22% of average outstanding loans on an annualized basis. As of September 30, 2004, nonperforming loans net of government guarantees, and the allowance for loan losses were 0.44% and 1.44%, respectively, of outstanding loans. The ratio of the allowance for loan losses to nonperforming loans was 329% at September 30, 2004. The increase in noninterest expense was mainly due to salary and benefit expense related to the addition of de-novo branches in Roseville (November 2003), Folsom (December 2003), and Turlock (April 2004), and regular salary increases.

As previously announced on March 11, 2004, the Board of Directors of TriCo Bancshares approved a two-for-one stock split of its common stock at its meeting held on March 11, 2004. The stock split was effected in the form of a stock dividend and provided each stockholder of record at the close of business on April 9, 2004 one additional share for every share of TriCo common stock held on that date. Shares resulting from the split were distributed on April 30, 2004. As of September 30, 2004, the Company had 15,698,000 common shares outstanding. All per share amounts for prior periods have been restated to reflect the stock split.

As of October 21, 2004, the Company had purchased 222,600 shares of its common stock under its stock repurchase plan announced on July 31, 2003 and amended on April 9, 2004, which leaves 277,400 shares available for repurchase under the plan.
