Unum Group
Form 10-Q
April 28, 2016

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D. C. 20549
FORM 10-Q
(Mark One)

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended March 31, 2016

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____
Commission file number 1-11294

Unum Group
(Exact name of registrant as specified in its charter)

Delaware 62-1598430
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

1 FOUNTAIN SQUARE
CHATTANOOGA, TENNESSEE 37402
(Address of principal executive offices) (Zip Code)

423.294.1011
(Registrant's telephone number, including area code)

Not Applicable
(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

(Check one): Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

237,758,775 shares of the registrant's common stock were outstanding as of April 26, 2016.

Cautionary Statement Regarding Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 (the Act) provides a "safe harbor" to encourage companies to provide prospective information, as long as those statements are identified as forward-looking and are accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those included in the forward-looking statements. Certain information contained in this Quarterly Report on Form 10-Q (including certain statements in the consolidated financial statements and related notes and Management's Discussion and Analysis), or in any other written or oral statements made by us in communications with the financial community or contained in documents filed with the Securities and Exchange Commission (SEC), may be considered forward-looking statements within the meaning of the Act. Forward-looking statements are those not based on historical information, but rather relate to our outlook, future operations, strategies, financial results, or other developments. Forward-looking statements speak only as of the date made. We undertake no obligation to update these statements, even if made available on our website or otherwise. These statements may be made directly in this document or may be made part of this document by reference to other documents filed by us with the SEC, a practice which is known as "incorporation by reference." You can find many of these statements by looking for words such as "will," "may," "should," "could," "believes," "expects," "anticipates," "estimates," "plans," "assumes," "intends," "projects," "goals," "objectives," or similar expressions in this document or in documents incorporated herein.

These forward-looking statements are subject to numerous assumptions, risks, and uncertainties, many of which are beyond our control. We caution readers that the following factors, in addition to other factors mentioned from time to time, may cause actual results to differ materially from those contemplated by the forward-looking statements:

• Sustained periods of low interest rates.

• Fluctuation in insurance reserve liabilities and claim payments due to changes in claim incidence, recovery rates, mortality and morbidity rates, and policy benefit offsets due to, among other factors, the rate of unemployment and consumer confidence, the emergence of new diseases, epidemics, or pandemics, new trends and developments in medical treatments, the effectiveness of our claims operational processes, and changes in government programs.

• Unfavorable economic or business conditions, both domestic and foreign.

• Legislative, regulatory, or tax changes, both domestic and foreign, including the effect of potential legislation and increased regulation in the current political environment.

• Investment results, including, but not limited to, changes in interest rates, defaults, changes in credit spreads, impairments, and the lack of appropriate investments in the market which can be acquired to match our liabilities.

• A cyber attack or other security breach could result in the unauthorized disclosure of confidential data.

• The failure of our business recovery and incident management processes to resume our business operations in the event of a natural catastrophe, cyber attack, or other event.

• Increased competition from other insurers and financial services companies due to industry consolidation, new entrants to our markets, or other factors.

• Execution risk related to our technology needs.

• Changes in our financial strength and credit ratings.

• Damage to our reputation due to, among other factors, regulatory investigations, legal proceedings, external events, and/or inadequate or failed internal controls and procedures.

• Actual experience that deviates from our assumptions used in pricing, underwriting, and reserving.

• Actual persistency and/or sales growth that is higher or lower than projected.

• Changes in demand for our products due to, among other factors, changes in societal attitudes, the rate of unemployment, consumer confidence, and/or legislative and regulatory changes, including healthcare reform.

• Effectiveness of our risk management program.

• Contingencies and the level and results of litigation.

• Availability of reinsurance in the market and the ability of our reinsurers to meet their obligations to us.

•

Edgar Filing: Unum Group - Form 10-Q

Ineffectiveness of our derivatives hedging programs due to changes in the economic environment, counterparty risk, ratings downgrades, capital market volatility, changes in interest rates, and/or regulation.

• Changes in accounting standards, practices, or policies.

• Fluctuation in foreign currency exchange rates.

• Ability to generate sufficient internal liquidity and/or obtain external financing.

• Recoverability and/or realization of the carrying value of our intangible assets, long-lived assets, and deferred tax assets.

• Terrorism, both within the U.S. and abroad, ongoing military actions, and heightened security measures in response to these types of threats.

For further discussion of risks and uncertainties which could cause actual results to differ from those contained in the forward-looking statements, see Part 1, Item 1A of our annual report on Form 10-K for the year ended December 31, 2015.

All subsequent written and oral forward-looking statements attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this section.

See notes to consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Unum Group and Subsidiaries

March 31, 2016

Note 1 - Basis of Presentation

The accompanying consolidated financial statements of Unum Group and its subsidiaries (the Company) have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. For further information, refer to the consolidated financial statements and footnotes included in our annual report on Form 10-K for the year ended December 31, 2015.

In our opinion, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Interim results are not necessarily indicative of full year performance.

Note 2 - Accounting Developments

Accounting Updates Adopted in 2016:

Accounting Standards Codification (ASC)	Description	Date of Adoption	Effect on Financial Statements
ASC 820 "Fair Value Measurement"	This update eliminated the requirement to categorize within the fair value hierarchy table investments whose fair value is measured at net asset value using the practical expedient. Instead, entities are required to disclose the fair value of these investments so that financial statement users can reconcile amounts reported in the fair value hierarchy table to the amounts reported on the consolidated balance sheets. The guidance is to be applied retrospectively.	January 1, 2016	The adoption of this update had no effect on our financial position or results of operations but will modify certain of our annual reporting period disclosures for invested assets held in our employee benefit plans.
ASC 835 "Interest - Imputation of Interest"	This update simplified the presentation of deferred debt issuance costs by requiring these costs to be presented in the balance sheet as a reduction of the carrying amount of the debt liability to which the deferred costs relate, rather than classifying the deferred costs as an asset. This classification is consistent with the treatment of debt discounts. We applied the amendments in the update retrospectively, adjusting all prior periods in our consolidated financial statements and accompanying notes.	January 1, 2016	The adoption of this update resulted in the following reclassification adjustments to our consolidated balance sheets but had no effect on our financial position or results of operations.

December 31, 2015

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

March 31, 2016

Note 2 - Accounting Developments - Continued

Accounting Updates Outstanding:

ASC	Description	Date of Adoption	Effect on Financial Statements
ASC 944 "Financial Services - Insurance"	This update changes the disclosure requirements for certain insurance contracts. These changes include a requirement to disclose the rollforward of the liability for unpaid claims and claim adjustment expenses in both interim and annual reporting periods for long-duration and short-duration insurance contracts. Additional claims disclosures will also be required for short-duration contracts. The guidance is to be applied retrospectively.	January 1, 2016 for annual reporting period disclosures and January 1, 2017 for interim reporting period disclosures.	The disclosure requirements for annual reporting period 2016 are not applicable to our insurance contracts. We will adopt the interim reporting period disclosures effective January 1, 2017. The adoption of this update will have no effect on our financial position or results of operations.
ASC 718 "Compensation - Stock Compensation"	This update changes the accounting and disclosure requirements for certain aspects of share-based payments to employees. The update requires all income tax effects of stock-based compensation awards to be recognized in the income statement when the awards vest or are settled. The update also allows an employer to repurchase more of an employee's shares than it can today for tax withholding purposes without triggering liability accounting and to make a policy election to account for forfeitures as they occur. Transition guidance for the amendments varies between the retrospective, modified retrospective, and prospective methods depending on the specific requirement of the update. Early adoption is also permitted.	January 1, 2017	We have not yet determined the expected impact on our financial position or results of operations.
ASC 606 "Revenue from Contracts with Customers"	This update supersedes virtually all existing guidance regarding the recognition of revenue from customers. Specifically excluded from the scope of this update are insurance contracts, although our fee-based service products are included within the scope. The core principle of this guidance is that revenue recognition should depict the transfer of goods or services to customers in an amount that reflects the consideration to which an entity expects to be entitled in exchange for those goods or services. The guidance is to be applied retrospectively.	January 1, 2018	The adoption of this update will not have a material effect on our financial position or results of operations.

ASC 825
"Financial
Instruments -
Overall"

This update changes the accounting and disclosure requirements for certain financial instruments. These changes include a requirement to measure equity investments, other than those that result in consolidation or are accounted for under the equity method, at fair value through net income unless the investment qualifies for certain practicability exceptions. In addition, the update clarifies guidance related to the valuation allowance assessment when recognizing deferred tax assets resulting from unrealized losses on available-for-sale fixed maturity securities. Changes also include the modification of certain disclosures around the fair value of financial instruments, including the requirement for separate presentation of financial assets and liabilities by measurement category, as well as the elimination of certain disclosures around methods and significant assumptions used to estimate fair value. The guidance is to be applied retrospectively.

January 1, 2018

We have not yet determined the expected impact on our financial position or results of operations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

March 31, 2016

Note 2 - Accounting Developments - Continued

ASC	Description	Date of Adoption	Effect on Financial Statements
ASC 842 "Leases"	This update changes the accounting for leases, requiring lessees to report most leases on their balance sheets, regardless of whether the lease is classified as a finance lease or an operating lease. For lessees, the initial lease liability is equal to the present value of lease payments, and a corresponding asset, adjusted for certain items, is also recorded. Expense recognition for lessees will remain similar to current accounting requirements for capital and operating leases. For lessors, the guidance modifies the classification criteria and the accounting for sales-type and direct financing leases. The guidance is to be applied using a modified retrospective approach at the beginning of the earliest comparative period presented.	January 1, 2019	We have not yet determined the expected impact on our financial position or results of operations.

Note 3 - Fair Values of Financial Instruments

Presented as follows are the carrying amounts and fair values of financial instruments. The carrying values of financial instruments such as short-term investments, cash and bank deposits, accounts and premiums receivable, accrued investment income, and securities lending agreements approximate fair value due to the short-term nature of the instruments. As such, these financial instruments are not included in the following chart.

	March 31, 2016		December 31, 2015	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
(in millions of dollars)				
Assets				
Fixed Maturity Securities	\$44,699.2	\$44,699.2	\$43,354.4	\$43,354.4
Mortgage Loans	1,881.3	2,042.6	1,883.6	2,013.9

Embedded Derivative in Modified Coinsurance Arrangement	93.2	93.2	87.6	87.6
Unfunded Commitments to Investment Partnerships	4.8	4.8	5.0	5.0

The methods and assumptions used to estimate fair values of financial instruments are discussed as follows.

11

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

March 31, 2016

Note 3 - Fair Values of Financial Instruments - Continued

Fair Value Measurements for Financial Instruments Not Carried at Fair Value

Mortgage Loans: Fair values are estimated using discounted cash flow analyses and interest rates currently being offered for similar loans to borrowers with similar credit ratings and maturities. Loans with similar characteristics are aggregated for purposes of the calculations. These financial instruments are assigned a Level 2 within the fair value hierarchy.

Policy Loans: Fair values for policy loans, net of reinsurance ceded, are estimated using discounted cash flow analyses and interest rates currently being offered to policyholders with similar policies. Carrying amounts for ceded policy loans, which equal \$3,094.5 million and \$3,150.1 million as of March 31, 2016 and December 31, 2015, respectively, approximate fair value and are reported on a gross basis in our consolidated balance sheets. A change in interest rates for ceded policy loans will not impact our financial position because the benefits and risks are fully ceded to reinsuring counterparties. These financial instruments are assigned a Level 3 within the fair value hierarchy.

Miscellaneous Long-term Investments: Carrying amounts for tax credit partnerships equal the unamortized balance of our contractual commitments and approximate fair value. Fair values for private equity partnerships are primarily derived from net asset values provided by the general partner in the partnerships' financial statements. Our private equity partnerships represent funds that are primarily invested in railcar leasing, the financial services industry, mezzanine debt, and bank loans. Distributions received from the funds arise from income generated by the underlying investments as well as the liquidation of the underlying investments. As of March 31, 2016, we estimate that the underlying assets of the funds will be liquidated over the next one to eleven years. These financial instruments are assigned a Level 3 within the fair value hierarchy. Our shares of FHLB common stock are carried at cost, which approximates fair value. These financial instruments are considered restricted investments and are assigned a Level 2 within the fair value hierarchy.

Policyholders' Funds: Policyholders' funds are comprised primarily of deferred annuity products and supplementary contracts without life contingencies and represent customer deposits plus interest credited at contract rates. Carrying amounts approximate fair value. These financial instruments are assigned a Level 3 within the fair value hierarchy.

Fair values for insurance contracts other than investment contracts are not required to be disclosed. However, the fair values of liabilities under all insurance contracts are taken into consideration in our overall management of interest rate risk, which seeks to minimize exposure to changing interest rates through the matching of investment maturities with amounts due under insurance contracts.

Short-term Debt: Fair values for short-term debt are determined based on prices from independent pricing services that generally use observable inputs for securities or comparable securities in active markets in their valuation techniques. These financial instruments are assigned a Level 1.

Long-term Debt: Fair values for long-term debt are obtained from independent pricing services or discounted cash flow analyses based on current incremental borrowing rates for similar types of borrowing arrangements. Debt instruments which are valued by pricing services using active trades for which there was current market activity in that specific debt instrument have fair values of \$1,806.4 million and \$956.4 million as of March 31, 2016 and December 31, 2015, respectively, and are assigned a Level 1 within the fair value hierarchy. Debt instruments which are valued by pricing services that generally use observable inputs for securities or comparable securities in active

markets in their valuation techniques have fair values of \$828.0 million and \$1,689.5 million as of March 31, 2016 and December 31, 2015, respectively, and are assigned a Level 2.

FHLB Funding Agreements: Funding agreements with the FHLB represent cash advances used for the purpose of investing in fixed maturity securities. Carrying amounts approximate fair value and are assigned a Level 2 within the fair value hierarchy.

Unfunded Commitments to Investment Partnerships: Unfunded equity commitments represent amounts that we have committed to fund certain investment partnerships. These commitments are legally binding, subject to the partnerships meeting specified conditions. Carrying amounts approximate fair value and are assigned a Level 2 within the fair value hierarchy.

Note 3 - Fair Values of Financial Instruments - Continued

Fair Value Measurements for Financial Instruments Carried at Fair Value

We report fixed maturity securities, derivative financial instruments, and unrestricted equity securities at fair value in our consolidated balance sheets. The degree of judgment utilized in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Financial instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices in active markets generally have more pricing observability and less judgment utilized in measuring fair value. An active market for a financial instrument is a market in which transactions for an asset or a similar asset occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value and should be used to measure fair value whenever available. Conversely, financial instruments rarely traded or not quoted have less observability and are measured at fair value using valuation techniques that require more judgment. Pricing observability is generally impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction, and overall market conditions.

Valuation techniques used for assets and liabilities accounted for at fair value are generally categorized into three types. The market approach uses prices and other relevant information from market transactions involving identical or comparable assets or liabilities. The income approach converts future amounts, such as cash flows or earnings, to a single present amount, or a discounted amount. The cost approach is based upon the amount that currently would be required to replace the service capacity of an asset, or the current replacement cost.

We use valuation techniques that are appropriate in the circumstances and for which sufficient data are available that can be obtained without undue cost and effort. In some cases, a single valuation technique will be appropriate (for example, when valuing an asset or liability using quoted prices in an active market for identical assets or liabilities). In other cases, multiple valuation techniques will be appropriate. If we use multiple valuation techniques to measure fair value, we evaluate and weigh the results, as appropriate, considering the reasonableness of the range indicated by those results. A fair value measurement is the point within that range that is most representative of fair value in the circumstances.

The selection of the valuation method(s) to apply considers the definition of an exit price and depends on the nature of the asset or liability being valued. For assets and liabilities accounted for at fair value, we generally use valuation techniques consistent with the market approach, and to a lesser extent, the income approach. We believe the market approach valuation technique provides more observable data than the income approach, considering the type of investments we hold. Our fair value measurements could differ significantly based on the valuation technique and available inputs. When using a pricing service, we obtain the vendor's pricing documentation to ensure we understand their methodologies. We periodically review and approve the selection of our pricing vendors to ensure we are in agreement with their current methodologies. When markets are less active, brokers may rely more on models with inputs based on the information available only to the broker. Our internal investment management professionals, which include portfolio managers and analysts, monitor securities priced by brokers and evaluate their prices for reasonableness based on benchmarking to available primary and secondary market information. In weighing a broker quote as an input to fair value, we place less reliance on quotes that do not reflect the result of market transactions. We also consider the nature of the quote, particularly whether the quote is a binding offer. If prices in an inactive market do not reflect current prices for the same or similar assets, adjustments may be necessary to arrive at fair value. When relevant market data is unavailable, which may be the case during periods of market uncertainty, the income approach

can, in suitable circumstances, provide a more appropriate fair value. During 2016, we have applied valuation techniques on a consistent basis to similar assets and liabilities and consistent with those techniques used at year end 2015.

Note 3 - Fair Values of Financial Instruments - Continued

We use observable and unobservable inputs in measuring the fair value of our fixed maturity and equity securities. For securities categorized as Level 1, fair values equal active Trade Reporting and Compliance Engine (TRACE) pricing or unadjusted broker market maker prices. For securities categorized as Level 2 or Level 3, inputs that may be used in valuing each class of securities at any given time period are presented as follows. Actual inputs used to determine fair values will vary for each reporting period depending on the availability of inputs which may, at times, be affected by the lack of market liquidity.

	Level 2 Observable Inputs	Level 3 Unobservable Inputs
United States Government and Government Agencies and Authorities

Note 3 - Fair Values of Financial Instruments - Continued

The management of our investment portfolio includes establishing pricing policy and reviewing the reasonableness of sources and inputs used in developing pricing. We review all prices obtained to ensure they are consistent with a variety of observable market inputs and to verify the validity of a security's price. In the event we receive a vendor's market price that does not appear reasonable based on our market analysis, we may challenge the price and request further information about the assumptions and methodologies used by the vendor to price the security. We may change the vendor price based on a better data source such as an actual trade. We also review all price changes from the prior month which fall outside a predetermined corridor. The overall valuation process for determining fair values may include adjustments to valuations obtained from our pricing sources when they do not represent a valid exit price. These adjustments may be made when, in our judgment and considering our knowledge of the financial conditions and industry in which the issuer operates, certain features of the financial instrument require that an adjustment be made to the value originally obtained from our pricing sources. These features may include the complexity of the financial instrument, the market in which the financial instrument is traded, counterparty credit risk, credit structure, concentration, or liquidity. Additionally, an adjustment to the price derived from a model typically reflects our judgment of the inputs that other participants in the market for the financial instrument being measured at fair value would consider in pricing that same financial instrument. In the event an asset is sold, we test the validity of the fair value determined by our valuation techniques by comparing the selling price to the fair value determined for the asset in the immediately preceding month end reporting period.

The parameters and inputs used to validate a price on a security may be adjusted for assumptions about risk and current market conditions on a quarter to quarter basis, as certain features may be more significant drivers of valuation at the time of pricing. Changes to inputs in valuations are not changes to valuation methodologies; rather, the inputs are modified to reflect direct or indirect impacts on asset classes from changes in market conditions.

Fair values for derivatives other than embedded derivatives in modified coinsurance arrangements are based on market quotes or pricing models and represent the net amount of cash we would have paid or received if the contracts had been settled or closed as of the last day of the period. We analyze credit default swap spreads relative to the average credit spread embedded within the LIBOR-setting syndicate in determining the effect of credit risk on our derivatives' fair values. If net counterparty credit risk for a derivative asset is determined to be material and is not adequately reflected in the LIBOR-based fair value obtained from our pricing sources, we adjust the valuations obtained from our pricing sources. For purposes of valuing net counterparty risk, we measure the fair value of a group of financial assets and financial liabilities on the basis of the price that would be received to sell a net long position or transfer a net short position for a particular risk exposure in an orderly transaction between market participants at the measurement date under current market conditions. In regard to our own credit risk component, we adjust the valuation of derivative liabilities wherein the counterparty is exposed to our credit risk when the LIBOR-based valuation of our derivatives obtained from pricing sources does not effectively include an adequate credit component for our own credit risk.

Fair values for our embedded derivative in a modified coinsurance arrangement are estimated using internal pricing models and represent the hypothetical value of the duration mismatch of assets and liabilities, interest rate risk, and third party credit risk embedded in the modified coinsurance arrangement.

Certain of our investments do not have readily determinable market prices and/or observable inputs or may at times be affected by the lack of market liquidity. For these securities, we use internally prepared valuations combining matrix pricing with vendor purchased software programs, including valuations based on estimates of future profitability, to estimate the fair value. Additionally, we may obtain prices from independent third-party brokers to aid in establishing valuations for certain of these securities. Key assumptions used by us to determine fair value for these securities

include risk free interest rates, risk premiums, performance of underlying collateral (if any), and other factors involving significant assumptions which may or may not reflect those of an active market.

At March 31, 2016, approximately 20.9 percent of our fixed maturity securities were valued using active trades from TRACE pricing or broker market maker prices for which there was current market activity in that specific security (comparable to receiving one binding quote). The prices obtained were not adjusted, and the assets were classified as Level 1, the highest category of the three-level fair value hierarchy classification wherein inputs are unadjusted and represent quoted prices in active markets for identical assets or liabilities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

March 31, 2016

Note 3 - Fair Values of Financial Instruments - Continued

The remaining 79.1 percent of our fixed maturity securities were valued based on non-binding quotes or other observable and unobservable inputs, as discussed below.

Approximately 65.3 percent of our fixed maturity securities were valued based on prices from pricing services that generally use observable inputs such as prices for securities or comparable securities in active markets in their valuation techniques. These assets were classified as Level 2. Level 2 assets or liabilities are those valued using inputs (other than prices included in Level 1) that are either directly or indirectly observable for the asset or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life.

Approximately 2.8 percent of our fixed maturity securities were valued based on one or more non-binding broker quotes, if validated by observable market data, or on TRACE prices for identical or similar assets absent current market activity. When only one price is available, it is used if observable inputs and analysis confirms that it is appropriate. These assets, for which we were able to validate the price using other observable market data, were classified as Level 2.

Approximately 11.0 percent of our fixed maturity securities were valued based on prices of comparable securities, matrix pricing, market models, and/or internal models or were valued based on non-binding quotes with no other observable market data. These assets were classified as either Level 2 or Level 3, with the categorization dependent on whether there was other observable market data. Level 3 is the lowest category of the fair value hierarchy and reflects the judgment of management regarding what market participants would use in pricing assets or liabilities at the measurement date. Financial assets and liabilities categorized as Level 3 are generally those that are valued using unobservable inputs to extrapolate an estimated fair value.

We consider transactions in inactive or disorderly markets to be less representative of fair value. We use all available observable inputs when measuring fair value, but when significant other unobservable inputs and adjustments are necessary, we classify these assets or liabilities as Level 3.

Note 3 - Fair Values of Financial Instruments - Continued

Realized and unrealized investment gains and losses presented in the preceding tables represent gains and losses only for the time during which the applicable financial instruments were classified as Level 3. The transfers between levels resulted primarily from a change in observability of three inputs used to determine fair values of the securities transferred: (1) transactional data for new issuance and secondary trades, (2) broker/dealer quotes and pricing, primarily related to changes in the level of activity in the market and whether the market was considered orderly, and (3) comparable bond metrics from which to perform an analysis. For fair value measurements of financial instruments that were transferred either into or out of Level 3, we reflect the transfers using the fair value at the beginning of the period. We believe this allows for greater transparency, as all changes in fair value that arise during the reporting period of the transfer are disclosed as a component of our Level 3 reconciliation. Losses which are included in earnings and are attributable to the change in fair value of assets or liabilities valued using significant unobservable inputs and still held at period end were \$5.6 million and \$3.9 million for the three months ended March 31, 2016 and 2015, respectively. These amounts relate entirely to the change in fair value of an embedded derivative in a modified coinsurance arrangement and are reported as a component of realized investment gains and losses.

The table below provides quantitative information regarding the significant unobservable inputs used in Level 3 fair value measurements derived from internal models. Certain securities classified as Level 3 are excluded from the table below due to limitations in our ability to obtain the underlying inputs used by external pricing sources.

	March 31, 2016		
	Fair Value	Unobservable Input	Range/Weighted Average
	(in millions of dollars)

March 31, 2016

Note 3 - Fair Values of Financial Instruments - Continued

	December 31, 2015		
	Fair Value	Unobservable Input	Range/Weighted Average
	(in millions of dollars)		
Fixed Maturity Securities			
States, Municipalities, and Political Subdivisions - Private	\$73.3	Change in Benchmark Reference	(a) 0.50% - 1.00% / 0.70%
States, Municipalities, and Political Subdivisions - Public	12.0	Market Convention	(f) Priced at Par
		Comparability Adjustment	(b) 0.50% - 0.50% / 0.50%
		Discount for Size	(c) 0.50% - 0.50% / 0.50%
All Other Corporate Bonds - Private	151.0	Lack of Marketability	(d) 1.00% - 2.00% / 1.75%
		Volatility of Credit	(e) 0.25% - 5.56% / 0.94%
		Market Convention	(f) Priced at Par
All Other Corporate Bonds - Public	36.2	Lack of Marketability	(d) 1.00% - 1.00% / 1.00%
Equity Securities - Private	1.1	Market Convention	(f) Priced at Cost or Owner's Equity
Embedded Derivative in Modified Coinsurance Arrangement	(87.6)	Projected Liability Cash Flows	(g) Actuarial Assumptions

(a) Represents basis point adjustments for changes in benchmark spreads associated with various ratings categories

(b) Represents basis point adjustments for changes in benchmark spreads associated with various industry sectors

(c) Represents basis point adjustments based on issue/issuer size relative to the benchmark

(d) Represents basis point adjustments to apply a discount due to the illiquidity of an investment

(e) Represents basis point adjustments for credit-specific factors

(f) Represents a decision to price based on par value, cost, or owner's equity when limited data is available

(g) Represents various actuarial assumptions required to derive the liability cash flows including incidence, termination, and lapse rates

Isolated increases in unobservable inputs other than market convention will result in a lower fair value measurement, whereas isolated decreases will result in a higher fair value measurement. The unobservable input for market convention is not sensitive to input movements. The projected liability cash flows used in the fair value measurement of our Level 3 embedded derivative are based on expected claim payments. If claim payments increase, the projected liability cash flows will increase, resulting in a decrease in the fair value of the embedded derivative. Decreases in projected liability cash flows will result in an increase in the fair value of the embedded derivative.

At March 31, 2016, the fair value of investment-grade fixed maturity securities was \$41,305.8 million, with a gross unrealized gain of \$5,220.3 million and a gross unrealized loss of \$174.9 million. The gross unrealized loss on

investment-grade fixed maturity securities was 41.2 percent of the total gross unrealized loss on fixed maturity securities. Unrealized losses on investment-grade fixed maturity securities principally relate to changes in interest rates or changes in market or sector credit spreads which occurred subsequent to the acquisition of the securities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

March 31, 2016

Note 4 - Investments - Continued

At March 31, 2016, the fair value of below-investment-grade fixed maturity securities was \$3,393.4 million, with a gross unrealized gain of \$98.7 million and a gross unrealized loss of \$249.6 million. The gross unrealized loss on below-investment-grade fixed maturity securities was 58.8 percent of the total gross unrealized loss on fixed maturity securities. Generally, below-investment-grade fixed maturity securities are more likely to develop credit concerns than investment-grade securities. At March 31, 2016, the unrealized losses in our below-investment-grade fixed maturity securities were generally due to credit spreads in certain industries or sectors and, to a lesser extent, credit concerns related to specific securities. For each specific security in an unrealized loss position, we believe that there are positive factors which mitigate credit concerns and that the securities for which we have not recorded an other-than-temporary impairment will recover in value.

As of March 31, 2016, we held 145 individual investment-grade fixed maturity securities and 84 individual below-investment-grade fixed maturity securities that were in an unrealized loss position, of which 27 investment-grade fixed maturity securities and 34 below-investment-grade fixed maturity securities had been in an unrealized loss position continuously for over one year.

In determining when a decline in fair value below amortized cost of a fixed maturity security is other than temporary, we evaluate the following factors:

- Whether we expect to recover the entire amortized cost basis of the security
- Whether we intend to sell the security or will be required to sell the security before the recovery of its amortized cost basis
- Whether the security is current as to principal and interest payments
- The significance of the decline in value
 - The time period during which there has been a significant decline in value
- Current and future business prospects and trends of earnings
- The valuation of the security's underlying collateral
- Relevant industry conditions and trends relative to their historical cycles
- Market conditions
- Rating agency and governmental actions
- Bid and offering prices and the level of trading activity
- Adverse changes in estimated cash flows for securitized investments
- Changes in fair value subsequent to the balance sheet date
- Any other key measures for the related security

While determining other-than-temporary impairments is a judgmental area, we utilize a formal, well-defined, and disciplined process to monitor and evaluate our fixed income investment portfolio, supported by issuer specific research and documentation as of the end of each period. The process results in a thorough evaluation of problem investments and the recording of losses on a timely basis for investments determined to have an other-than-temporary impairment.

We held no fixed maturity securities as of March 31, 2016 or December 31, 2015 for which a portion of an other-than-temporary impairment was recognized in accumulated other comprehensive income.

At March 31, 2016, we had commitments of \$107.9 million to fund private placement fixed maturity securities, the amount of which may or may not be funded.

Variable Interest Entities

We invest in variable interests issued by variable interest entities. These investments include tax credit partnerships, private equity partnerships, and special purpose entities. For those variable interests that are not consolidated in our financial statements, we are not the primary beneficiary because we have neither the power to direct the activities that are most significant to economic performance nor the responsibility to absorb a majority of the expected losses. The determination of whether we are the primary beneficiary is performed at the time of our initial investment and at the date of each subsequent reporting period.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

March 31, 2016

Note 4 - Investments - Continued

As of March 31, 2016, the carrying amount of our variable interest entity investments that are not consolidated in our financial statements was \$441.6 million, comprised of \$192.9 million of tax credit partnerships and \$248.7 million of private equity partnerships. These variable interest entity investments are reported as other long-term investments in our consolidated balance sheets.

The Company invests in tax credit partnerships primarily for the receipt of income tax credits and tax benefits derived from passive losses on the investments. Amounts recognized in the consolidated statements of income are as follows:

	Three Months Ended March 31	
	2016	2015
	(in millions of dollars)	
Income Tax Credits	\$10.5	\$10.5
Amortization, net of tax	(5.8)	(5.8)
Income Tax Benefit	\$4.7	\$4.7

Contractually, we are a limited partner in these tax credit partnerships, and our maximum exposure to loss is limited to the carrying value of our investment, which includes \$4.8 million of unfunded unconditional commitments at March 31, 2016. We also had commitments of \$282.8 million to fund certain private equity partnerships at March 31, 2016, the amount of which may or may not be funded.

We are the sole beneficiary of a special purpose entity which is consolidated in our financial statements. This entity is a securitized asset trust containing a highly rated bond for principal protection and a private equity partnership investment which we contributed into the trust at the time it was established. There are no restrictions on the assets held in this trust, and the trust is free to dispose of the assets at any time. The fair values of the bond and partnership were \$151.9 million and \$1.0 million, respectively, as of March 31, 2016. The bond is reported as a component of fixed maturity securities, and the partnership is reported as a component of other long-term investments in our consolidated balance sheets. At March 31, 2016, we had no commitments to fund the underlying partnership, nor did we fund any amounts to the partnership during the three months ended March 31, 2016 and 2015.

Mortgage Loans

Our mortgage loan portfolio is well diversified by both geographic region and property type to reduce risk of concentration. All of our mortgage loans are collateralized by commercial real estate. When issuing a new loan, our general policy is not to exceed a loan-to-value ratio, or the ratio of the loan balance to the estimated fair value of the underlying collateral, of 75 percent. We update the loan-to-value ratios at least every three years for each loan, and properties undergo a general inspection at least every two years. Our general policy for newly issued loans is to have a debt service coverage ratio greater than 1.25 times on a normalized 25 year amortization period. We update our debt service coverage ratios annually.

We evaluate each of our mortgage loans individually for impairment and assign an internal credit quality rating based on a comprehensive rating system used to evaluate the credit risk of the loan. The factors we use to derive our internal credit ratings may include the following:

- Loan-to-value ratio
- Debt service coverage ratio based on current operating income
- Property location, including regional economics, trends and demographics
- Age, condition, and construction quality of property
- Current and historical occupancy of property
- Lease terms relative to market
- Tenant size and financial strength
- Borrower's financial strength
- Borrower's equity in transaction
- Additional collateral, if any

Although all available and applicable factors are considered in our analysis, loan-to-value and debt service coverage ratios are the most critical factors in determining whether we will initially issue the loan and also in assigning values and determining impairment. We assign an overall rating to each loan using an internal rating scale of Aa (highest

quality) to B (lowest quality). We review and adjust, as needed, our internal credit quality ratings on an annual basis. This review process is performed more frequently for mortgage loans deemed to have a higher risk of delinquency.

<= 65%	\$961.3	\$937.2
> 65% <= 75%	820.0	842.5
> 75% <= 85%	85.3	88.4
> 85%	14.7	15.5
Total	\$ 1,881.3	\$ 1,883.6

There were no troubled debt restructurings during the three months ended March 31, 2016 or 2015. At March 31, 2016 and December 31, 2015, we held no mortgage loans that were greater than 90 days past due regarding principal and/or interest payments.

There have been no changes to our accounting policies or methodology from the prior period regarding estimating the allowance for credit losses on our mortgage loans. As of March 31, 2016 and December 31, 2015, we had no allowance for credit losses. Our allowance of \$1.5 million as of March 31, 2015 was related to an impaired mortgage loan that was repaid in the third quarter of 2015. There was no activity in the allowance for credit losses during the three months ended March 31, 2016 or 2015.

We did not hold any impaired mortgage loans during the three months ended March 31, 2016, nor did we recognize any interest income on mortgage loans subsequent to impairment. Our average investment in impaired mortgage loans was \$13.1 million for the three months ended March 31, 2015, and interest income recognized on mortgage loans subsequent to impairment was \$0.2 million.

At March 31, 2016, we had commitments of \$83.5 million to fund certain commercial mortgage loans, the amount of which may or may not be funded.

Transfers of Financial Assets

To manage our cash position more efficiently, we may enter into repurchase agreements with unaffiliated financial institutions. We generally use repurchase agreements as a means to finance the purchase of invested assets or for short-term general business purposes until projected cash flows become available from our operations or existing investments. Our repurchase agreements are typically outstanding for less than 30 days. We post collateral through our repurchase agreement transactions whereby the counterparty commits to purchase securities with the agreement to resell them to us at a later, specified date. The fair value of collateral posted is generally 102 percent of the cash received.

Our investment policy also permits us to lend fixed maturity securities to unaffiliated financial institutions in short-term securities lending agreements. These agreements increase our investment income with minimal risk. Our securities lending policy requires that a minimum of 102 percent of the fair value of the securities loaned be maintained as collateral. We may receive cash and/or securities as collateral under these agreements. Cash received as collateral is typically reinvested in short-term investments. If securities are received as collateral, we are not permitted to sell or re-post them.

As of March 31, 2016, the carrying amount of fixed maturity securities loaned to third parties under our securities lending program was \$194.3 million, for which we received collateral in the form of cash and securities of \$48.8 million and \$152.2 million, respectively. As of December 31, 2015, the carrying amount of fixed maturity securities loaned to third parties under our securities lending program was \$181.6 million, for which we received collateral in the form of cash and securities of \$29.0 million and \$159.3 million, respectively. We had no outstanding repurchase agreements at March 31, 2016 or December 31, 2015.

The remaining contractual maturities of our securities lending agreements disaggregated by class of collateral pledged are as follows:

	March 31, 2016 Overnight and Continuous (in millions of dollars)	December 31, 2015
United States Government and Government Agencies and Authorities	\$ 2.2	\$ 1.2
Public Utilities	2.8	4.0

Certain of our U.S. insurance subsidiaries are members of regional FHLBs. Membership, which requires that we purchase a minimum amount of FHLB common stock on which we receive dividends, provides access to low-cost funding. As of March 31, 2016 and December 31, 2015, we owned \$30.9 million of FHLB common stock and had obtained \$350.0 million in advances from the regional FHLBs for the purpose of purchasing fixed maturity securities. As of March 31, 2016, the carrying value of fixed maturity securities and commercial mortgage loans posted as collateral to the regional FHLBs was \$318.6 million and \$95.1 million, respectively. As of December 31, 2015, the carrying value of fixed maturity securities and commercial mortgage loans posted as collateral to the regional FHLBs was \$317.2 million and \$96.0 million, respectively. Additional common stock purchases may be required, based on the amount of funds we borrow from the FHLBs.

Offsetting of Financial Instruments

We enter into master netting agreements with each of our derivatives counterparties. These agreements provide for conditional rights of set-off upon the occurrence of an early termination event. An early termination event is considered a default, and it allows the non-defaulting party to offset its contracts in a loss position against any gain positions or payments due to the defaulting party. Under our agreements, default type events are defined as failure to pay or deliver as contractually agreed, misrepresentation, bankruptcy, or merger without assumption. See Note 5 for further discussion of collateral related to our derivative contracts.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

March 31, 2016

Note 4 - Investments - Continued

We have securities lending agreements with unaffiliated financial institutions that post collateral to us in return for the use of our fixed maturity securities. A right of set-off exists that allows us to keep and apply collateral received in the event of default by the counterparty. Default within a securities lending agreement would typically occur if the counterparty failed to return the securities borrowed from us as contractually agreed. In addition, if we default by not returning collateral received, the counterparty has a right of set-off against our securities or any other amounts due to us.

Shown below are our financial instruments that either meet the accounting requirements that allow them to be offset in our balance sheets or that are subject to an enforceable master netting arrangement or similar agreement. Our accounting policy is to not offset these financial instruments in our balance sheets. Net amounts disclosed below have been reduced by the amount of collateral pledged to or received from our counterparties.

Note 5 - Derivative Financial Instruments

Purpose of Derivatives

We are exposed to certain risks relating to our ongoing business operations. The primary risks managed by using derivative instruments are interest rate risk, risk related to matching duration for our assets and liabilities, foreign currency risk, and credit risk. Historically, we have utilized current and forward interest rate swaps and options on forward interest rate swaps and U.S. Treasury rates, current and forward currency swaps, forward treasury locks, currency forward contracts, forward contracts on specific fixed income securities, and credit default swaps. Transactions hedging interest rate risk are primarily associated with our individual and group long-term care and individual and group disability products. All other product portfolios are periodically reviewed to determine if hedging strategies would be appropriate for risk management purposes. We do not use derivative financial instruments for speculative purposes.

Derivatives designated as cash flow hedges and used to reduce our exposure to interest rate and duration risk are as follows:

Interest rate swaps are used to hedge interest rate risks and to improve the matching of assets and liabilities. An interest rate swap is an agreement in which we agree with other parties to exchange, at specified intervals, the difference between fixed rate and variable rate interest amounts. We use interest rate swaps to hedge the anticipated purchase of fixed maturity securities thereby protecting us from the potential adverse impact of declining interest rates on the associated policy reserves. We also use interest rate swaps to hedge the potential adverse impact of rising interest rates in anticipation of issuing fixed rate long-term debt.

Forward treasury locks are used to minimize interest rate risk associated with the anticipated purchase or disposal of fixed maturity securities. A forward treasury lock is a derivative contract without an initial investment where we and the counterparty agree to purchase or sell a specific U.S. Treasury bond at a future date at a pre-determined price.

Derivatives designated as fair value hedges and used to reduce our exposure to interest rate and duration risk are as follows:

Interest rate swaps are used to effectively convert certain of our fixed rate securities into floating rate securities which are used to fund our floating rate long-term debt. Under these swap agreements, we receive a variable rate of interest and pay a fixed rate of interest. Additionally, we use interest rate swaps to effectively convert certain fixed rate, long-term debt into floating rate long-term debt. Under these swap agreements, we receive a fixed rate of interest and pay a variable rate of interest.

Derivatives designated as cash flow hedges and used to reduce our exposure to foreign currency risk are as follows:

Foreign currency interest rate swaps have historically been used to hedge the currency risk of certain foreign currency-denominated fixed maturity securities owned for portfolio diversification and to hedge the currency risk associated with certain of the principal and interest payments of the U.S. dollar-denominated debt issued by one of our U.K. subsidiaries. For hedges of fixed maturity securities, we agree to pay, at specified intervals, fixed rate foreign currency-denominated principal and interest payments in exchange for fixed rate payments in the functional currency of the operating segment. For hedges of debt issued, we paid, at specified intervals, fixed rate foreign currency-denominated principal and interest payments to the counterparty in exchange for fixed rate U.S.

dollar-denominated principal and interest payments.

Derivatives not designated as hedging instruments and used to reduce our exposure to foreign currency risk and credit losses on securities owned are as follows:

Foreign currency interest rate swaps previously designated as hedges were used to hedge the currency risk of certain foreign currency-denominated fixed maturity securities owned for portfolio diversification. We agree to pay, at specified intervals, fixed rate foreign currency-denominated principal and interest payments in exchange for fixed rate payments in the functional currency of the operating segment. We hold offsetting swaps wherein we agree to pay fixed rate principal and interest payments in the functional currency of the operating segment in exchange for fixed rate foreign currency-denominated payments.

Note 5 - Derivative Financial Instruments - Continued

Credit default swaps are used as economic hedges against credit risk but do not qualify for hedge accounting. A credit default swap is an agreement in which we agree with another party to pay, at specified intervals, a fixed-rate fee in exchange for insurance against a credit event on a specific investment. If a defined credit event occurs, our counterparty may either pay us a net cash settlement or we may surrender the specific investment to them in exchange for cash equal to the full notional amount of the swap. Credit events typically include events such as bankruptcy, failure to pay, or certain types of debt restructuring.

Derivative Risks

The basic types of risks associated with derivatives are market risk (that the value of the derivative will be adversely impacted by changes in the market, primarily the change in interest and exchange rates) and credit risk (that the counterparty will not perform according to the terms of the contract). The market risk of the derivatives should generally offset the market risk associated with the hedged financial instrument or liability. To help limit the credit exposure of the derivatives, we enter into master netting agreements with our counterparties whereby contracts in a gain position can be offset against contracts in a loss position. We also typically enter into bilateral, cross-collateralization agreements with our counterparties to help limit the credit exposure of the derivatives. These agreements require the counterparty in a loss position to submit acceptable collateral with the other counterparty in the event the net loss position meets or exceeds an agreed upon amount. Our current credit exposure on derivatives, which is limited to the value of those contracts in a net gain position, including accrued interest receivable less collateral held, was de minimis at March 31, 2016. We held \$27.1 million and \$36.4 million cash collateral from our counterparties at March 31, 2016 and December 31, 2015, respectively. We post either fixed maturity securities or cash as collateral to our counterparties. The carrying value of fixed maturity securities posted as collateral to our counterparties was \$38.1 million and \$27.3 million at March 31, 2016 and December 31, 2015, respectively. We had no cash posted as collateral to our counterparties at March 31, 2016 or December 31, 2015. See Note 4 for further discussion of our master netting agreements.

The majority of our derivative instruments contain provisions that require us to maintain specified issuer credit ratings and financial strength ratings. Should our ratings fall below these specified levels, we would be in violation of the provisions, and our derivatives counterparties could terminate our contracts and request immediate payment. The aggregate fair value of all derivative instruments with credit risk-related contingent features that were in a liability position was \$58.0 million and \$50.2 million at March 31, 2016 and December 31, 2015, respectively.

Derivative Transactions

The table below summarizes, by notional amounts, the activity for each category of derivatives. The notional amounts represent the basis upon which our counterparty pay and receive amounts are calculated.

	Swaps			Credit Default	Total
	Receive Variable/ Fixed	Receive Pay/ Fixed	Receive Pay/ Variable		
Balance at December 31, 2014	\$ 150.0	\$ 840.4	\$ 600.0	\$ 97.0	\$ 1,687.4
Additions	—	—	—	—	—
Terminations	—	8.9	—	—	8.9

Edgar Filing: Unum Group - Form 10-Q

Balance at March 31, 2015	\$ 150.0	\$ 831.5	\$ 600.0	\$ 97.0	\$ 1,678.5
Balance at December 31, 2015	\$ 150.0	\$ 650.3	\$ 600.0	\$ 70.0	\$ 1,470.3
Additions	—	—	—	—	—
Terminations	24.0	—	—	—	24.0
Balance at March 31, 2016	\$ 126.0	\$ 650.3	\$ 600.0	\$ 70.0	\$ 1,446.3

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

March 31, 2016

Note 5 - Derivative Financial Instruments - Continued

Cash Flow Hedges

As of March 31, 2016 and December 31, 2015, we had \$427.9 million notional amount of receive fixed, pay fixed, open current and forward foreign currency interest rate swaps to hedge fixed income foreign currency-denominated securities.

For the three months ended March 31, 2016 and 2015, there was no material ineffectiveness related to our cash flow hedges, and no component of the derivative instruments' gain or loss was excluded from the assessment of hedge effectiveness.

As of March 31, 2016, we expect to amortize approximately \$54.5 million of net deferred gains on derivative instruments during the next twelve months. This amount will be reclassified from accumulated other comprehensive income into earnings and reported on the same income statement line item as the hedged item. The income statement line items that will be affected by this amortization are net investment income and interest and debt expense. Additional amounts that may be reclassified from accumulated other comprehensive income into earnings to offset the earnings impact of foreign currency translation of hedged items are not estimable.

As of March 31, 2016, we are hedging the variability of future cash flows associated with forecasted transactions through the year 2038.

Fair Value Hedges

As of March 31, 2016 and December 31, 2015, we had \$126.0 million and \$150.0 million notional amount of receive variable, pay fixed interest rate swaps to hedge the changes in fair value of certain fixed rate securities held. These swaps effectively convert the associated fixed rate securities into floating rate securities, which are used to fund our floating rate long-term debt. The change in fair value of the hedged fixed maturity securities attributable to the hedged benchmark interest rate resulted in a loss of \$1.8 million and \$0.5 million for the three months ended March 31, 2016 and 2015, respectively, with an offsetting gain on the related interest rate swaps. During the first quarter of 2016, we terminated \$24.0 million notional amount of receive variable, pay fixed interest rate swaps in connection with the sale of the hedged securities and recorded a loss on the swap terminations of \$1.2 million in our consolidated statements of income as a component of net realized investment gains and losses.

As of March 31, 2016 and December 31, 2015, we had \$600.0 million notional amount of receive fixed, pay variable interest rate swaps to hedge the changes in the fair value of certain fixed rate long-term debt. These swaps effectively convert the associated fixed rate long-term debt into floating rate debt and provide for a better matching of interest rates with our short-term investments, which have frequent interest rate resets similar to a floating rate security. The change in fair value of the hedged debt attributable to the hedged benchmark interest rate resulted in a loss of \$5.6 million and \$3.7 million for the three months ended March 31, 2016 and 2015, respectively, with an offsetting gain on the related interest rate swaps.

For the three months ended March 31, 2016, and 2015, there was no material ineffectiveness related to our fair value hedges, and no component of the derivative instruments' gain or loss was excluded from the assessment of hedge effectiveness. There were no instances wherein we discontinued fair value hedge accounting due to a hedged firm commitment no longer qualifying as a fair value hedge.

Derivatives not Designated as Hedging Instruments

As of March 31, 2016 and December 31, 2015, we held \$222.4 million notional amount of receive fixed, pay fixed, foreign currency interest rate swaps. These derivatives were not designated as hedges, and as such, changes in fair value related to these derivatives will be reported in earnings as a component of net realized investment gain or loss.

As of March 31, 2016 and December 31, 2015, we held \$70.0 million notional amount of single name credit default swaps. We entered into these swaps in order to mitigate the credit risk associated with specific securities owned.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

March 31, 2016

Note 5 - Derivative Financial Instruments - Continued

We have an embedded derivative in a modified coinsurance arrangement for which we include in our realized investment gains and losses a calculation intended to estimate the value of the option of our reinsurance counterparty to cancel the reinsurance contract with us. However, neither party can unilaterally terminate the reinsurance agreement except in extreme circumstances resulting from regulatory supervision, delinquency proceedings, or other direct regulatory action. Cash settlements or collateral related to this embedded derivative are not required at any time during the reinsurance contract or at termination of the reinsurance contract. There are no credit-related counterparty triggers, and any accumulated embedded derivative gain or loss reduces to zero over time as the reinsured business winds down.

Locations and Amounts of Derivative Financial Instruments

The following tables summarize the location and fair values of derivative financial instruments, as reported in our consolidated balance sheets.

	March 31, 2016			
	Asset Derivatives		Liability Derivatives	
	Balance Sheet	Fair	Balance Sheet	Fair
	Location	Value	Location	Value

We measure and analyze our segment performance using non-GAAP financial measures. A non-GAAP financial measure is a numerical measure of a company's performance, financial position, or cash flows that excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with GAAP. The non-GAAP financial measures of "operating revenue" and "operating income" or "operating loss" differ from total revenue and income before income tax as presented in our consolidated statements of income due to the exclusion of net realized investment gains and losses and non-operating retirement-related gains or losses as specified in the reconciliations below. We believe operating revenue and operating income or loss are better performance measures and better indicators of the revenue and profitability and underlying trends in our business.

Realized investment gains or losses depend on market conditions and do not necessarily relate to decisions regarding the underlying business of our segments. Our investment focus is on investment income to support our insurance liabilities as opposed to the generation of realized investment gains or losses. Although we may experience realized investment gains or losses which will affect future earnings levels, a long-term focus is necessary to maintain profitability over the life of the business since our underlying business is long-term in nature, and we need to earn the interest rates assumed in calculating our liabilities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

March 31, 2016

Note 7 - Segment Information - Continued

The amortization of prior period actuarial gains or losses, a component of the net periodic benefit cost for our pensions and other postretirement benefit plans, is driven by market performance as well as plan amendments and is not indicative of the operational results of our businesses. We believe that excluding the amortization of prior period gains or losses from operating income or loss provides investors with additional information for comparison and analysis of our operating results. Although we manage our non-operating retirement-related gains or losses separately from the operational performance of our business, these gains or losses impact the overall profitability of our company and have historically increased or decreased over time, depending on plan amendments and market conditions and the resulting impact on the actuarial gains or losses in our pensions and other postretirement benefit plans.

We may at other times exclude certain other items from our discussion of financial ratios and metrics in order to enhance the understanding and comparability of our operational performance and the underlying fundamentals, but this exclusion is not an indication that similar items may not recur and does not replace net income or net loss as a measure of our overall profitability.

A reconciliation of "operating revenue" to total revenue and "operating income" to income before income tax is as follows:

	Three Months Ended	
	March 31	
	2016	2015
	(in millions of dollars)	
Operating Revenue	\$2,745.9	\$2,662.7
Net Realized Investment Loss	(20.5)	(15.3)
Total Revenue	\$2,725.4	\$2,647.4
Operating Income	\$328.8	\$321.3
Net Realized Investment Loss	(20.5)	(15.3)
Non-operating Retirement-related Loss	(4.1)	(3.0)
Income Before Income Tax	\$304.2	\$303.0

Note 8 - Employee Benefit Plans

Defined Benefit Pension and Other Postretirement Benefit (OPEB) Plans

We sponsor several defined benefit pension and OPEB plans for our employees, including non-qualified pension plans. We maintain a separate defined benefit plan for eligible employees in our U.K. operation. The U.S. defined benefit pension plans were closed to new entrants and amended to freeze participation and benefit accruals for existing participants effective December 31, 2013. The U.K. defined benefit plan was closed to new entrants effective December 31, 2002 and was amended to freeze participation for existing participants effective June 30, 2014.

The following table provides the components of the net periodic benefit cost (credit) for the defined benefit pension and OPEB plans.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

March 31, 2016

Note 9 - Stockholders' Equity and Earnings Per Common Share

Earnings Per Common Share

Net income per common share is determined as follows:

	Three Months Ended March 31	
	2016	2015
	(in millions of dollars, except share data)	
Numerator		
Net Income	\$210.6	\$ 212.9
Denominator (000s)		
Weighted Average Common Shares - Basic	239,619	251,467.4
Dilution for Assumed Exercises of Stock Options and Nonvested Stock Awards	311.0	767.5
Weighted Average Common Shares - Assuming Dilution	239,930	252,234.9
Net Income Per Common Share		
Basic	\$0.88	\$ 0.85
Assuming Dilution	\$0.88	\$ 0.84

We use the treasury stock method to account for the effect of outstanding stock options, nonvested restricted stock units, and nonvested performance share units on the computation of diluted earnings per share. Under this method, these potential common shares will each have a dilutive effect, as individually measured, when the average market price of Unum Group common stock during the period exceeds the exercise price of the stock options and the grant price of the nonvested restricted stock units and the nonvested performance share units. The outstanding stock options have exercise prices ranging from \$11.37 to \$26.29, the nonvested restricted stock units have grant prices ranging from \$23.97 to \$36.95, and the nonvested performance share units have grant prices ranging from \$27.85 to \$34.08.

In computing earnings per share assuming dilution, only potential common shares that are dilutive (those that reduce earnings per share) are included. For the three month periods ended March 31, 2016 and 2015, there were approximately 0.5 million and 0.9 million potential common shares, respectively, that were excluded in the computation of diluted earnings per share because the impact would be antidilutive, based on then current market prices.

Common Stock

During the second quarter of 2015, our board of directors authorized the repurchase of up to \$750.0 million of Unum Group's outstanding common stock through November 21, 2016. This authorization replaced the previous authorization of \$750.0 million that was scheduled to expire on June 12, 2015. The remaining repurchase amount under the new program was \$402.3 million at March 31, 2016.

Common stock repurchases, which are accounted for using the cost method and classified as treasury stock until otherwise retired, were as follows:

Edgar Filing: Unum Group - Form 10-Q

	Three Months Ended March 31	
	2016	2015
	(in millions)	
Shares Repurchased	3.7	3.2
Cost of Shares Repurchased (1)	\$ 100.0	\$ 108.1

(1) Includes commissions of a de minimis amount and \$0.1 million for each of the three month periods ended March 31, 2016 and 2015, respectively.

Note 9 - Stockholders' Equity and Earnings Per Common Share - Continued

Preferred Stock

Unum Group has 25.0 million shares of preferred stock authorized with a par value of \$0.10 per share. No preferred stock has been issued to date.

Note 10 - Commitments and Contingent Liabilities

Contingent Liabilities

We are a defendant in a number of litigation matters. In some of these matters, no specified amount is sought. In others, very large or indeterminate amounts, including punitive and treble damages, are asserted. There is a wide variation of pleading practice permitted in the United States courts with respect to requests for monetary damages, including some courts in which no specified amount is required and others which allow the plaintiff to state only that the amount sought is sufficient to invoke the jurisdiction of that court. Further, some jurisdictions permit plaintiffs to allege damages well in excess of reasonably possible verdicts. Based on our extensive experience and that of others in the industry with respect to litigating or resolving claims through settlement over an extended period of time, we believe that the monetary damages asserted in a lawsuit or claim bear little relation to the merits of the case, or the likely disposition value. Therefore, the specific monetary relief sought is not stated.

Unless indicated otherwise in the descriptions below, reserves have not been established for litigation and contingencies. An estimated loss is accrued when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated.

Claims Handling Matters

We and our insurance subsidiaries, in the ordinary course of our business, are engaged in claim litigation where disputes arise as a result of a denial or termination of benefits. Most typically these lawsuits are filed on behalf of a single claimant or policyholder, and in some of these individual actions punitive damages are sought, such as claims alleging bad faith in the handling of insurance claims. For our general claim litigation, we maintain reserves based on experience to satisfy judgments and settlements in the normal course. We expect that the ultimate liability, if any, with respect to general claim litigation, after consideration of the reserves maintained, will not be material to our consolidated financial condition. Nevertheless, given the inherent unpredictability of litigation, it is possible that an adverse outcome in certain claim litigation involving punitive damages could, from time to time, have a material adverse effect on our consolidated results of operations in a period, depending on the results of operations for the particular period.

From time to time class action allegations are pursued where the claimant or policyholder purports to represent a larger number of individuals who are similarly situated. Since each insurance claim is evaluated based on its own merits, there is rarely a single act or series of actions which can properly be addressed by a class action. Nevertheless, we monitor these cases closely and defend ourselves appropriately where these allegations are made.

Miscellaneous Matters

Beginning in 2011, a number of state regulators began requiring insurers to cross-check specified insurance policies with the Social Security Administration's Death Master File to identify potential matches. If a potential match was identified, insurers were requested to determine if benefits were due, locate beneficiaries, and make payments where

appropriate. We initiated this process where requested, and in 2012 we began implementing this process in all states on a forward-looking basis. In addition to implementing this on a forward-looking basis, in 2013 we began an initiative to search for potential claims from previous years. During 2013, we completed our assessment of benefits which we estimate will be paid under this initiative, and as such, established additional reserves for payment of these benefits. Similar to other insurers, we are undergoing an examination by a third party acting on behalf of a number of state treasurers concerning our compliance with the unclaimed property laws of the participating states. We are cooperating fully with this examination, as well as with a Delaware Market Conduct examination involving the same issue. The legal and regulatory environment around unclaimed death benefits continues to evolve. It is possible that the current examination and/or similar investigations by other state jurisdictions may result in additional payments to beneficiaries, the payment of abandoned funds under state law, and/or administrative penalties, the total of which may be in excess of the reserves established.

Note 10 - Commitments and Contingent Liabilities - Continued

In December 2012, State of West Virginia ex rel. John D. Perdue v. Provident Life and Accident Insurance Company and State of West Virginia ex rel. John D. Perdue v. Colonial Life & Accident Insurance Company were filed in the Circuit Court of Putnam County, West Virginia. These two separate complaints alleged violations of the West Virginia Uniform Unclaimed Property Act by failing to identify and report all unclaimed insurance policy proceeds due to be escheated to West Virginia. The complaints sought to examine company records and assess penalties and costs in an undetermined amount. In December 2013, the court dismissed both complaints, holding that the West Virginia Uniform Unclaimed Property Act does not require insurance companies to periodically search the Social Security Administrations' Death Master File or escheat unclaimed life insurance benefits until a claim has been submitted. In January 2014, the plaintiff appealed the dismissal of both complaints. In June 2015, the appellate court reinstated the case, holding that the West Virginia Uniform Unclaimed Property Act requires insurers to make reasonable efforts to determine whether their insureds are still living. The case was remanded to the trial court where we answered the complaints.

In May 2013, a purported class action complaint was filed in the Superior Court of California, County of Los Angeles. The plaintiff sought to represent a class of California insureds who were issued long-term care policies containing an inflation protection feature. The plaintiff alleged we incorrectly administered the inflation protection feature, resulting in an underpayment of benefits. The complaint made allegations against us for breach of contract, bad faith, fraud, violation of Business and Professions Code 17200, and injunctive relief. We removed the case to the United States District Court for the Central District of California, and plaintiff filed an amended complaint on behalf of a nationwide class of insureds who were issued long-term care policies containing an inflation protection feature. After we answered the complaint, the court permitted the plaintiff to file another amended complaint entitled Michael Don, Executor of The Estate of Ruben Don, Leroy Little, by and through his Guardian ad Litem Tamara Pelham, and Carolyn Little v. Unum Group, and Unum Life Insurance Company of America containing similar allegations. In April 2015, we again answered the complaint. The plaintiffs filed a motion seeking certification of five subclasses, and we filed our opposition. In February 2016, the plaintiffs filed a motion for preliminary approval of settlement for a class of certain insureds issued long-term care policies containing an inflation protection feature as well as certain insureds who requested copies of their long-term care policies. In March 2016, the court preliminarily approved the settlement and set a final fairness hearing for June 2016. We accrued an estimated loss contingency in 2015, the amount of which was immaterial to our consolidated financial position and results of operations.

Summary

Various lawsuits against us, in addition to those discussed above, have arisen in the normal course of business. Further, state insurance regulatory authorities and other federal and state authorities regularly make inquiries and conduct investigations concerning our compliance with applicable insurance and other laws and regulations.

Given the complexity and scope of our litigation and regulatory matters, it is not possible to predict the ultimate outcome of all pending investigations or legal proceedings or provide reasonable estimates of potential losses, except if noted in connection with specific matters. It is possible that our results of operations or cash flows in a particular period could be materially affected by an ultimate unfavorable outcome of pending litigation or regulatory matters depending, in part, on our results of operations or cash flows for the particular period. We believe, however, that the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification, should not have a material adverse effect on our financial position.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

March 31, 2016

Note 11 - Other

Definitive Purchase Agreement

We have entered into a definitive agreement to acquire H&J Capital, LLC, parent of Starmount Life Insurance Company and AlwaysCare Benefits (which collectively we refer to as Starmount), for a purchase price of \$127 million plus net assets received. The acquisition of Starmount, a leading independent provider of dental and vision insurance in the U.S. workplace, will broaden our employee benefit offerings in both Unum US and Colonial Life. The transaction is expected to close by the end of the third quarter of 2016, subject to customary approvals and closing conditions.

Debt

At March 31, 2016, short-term debt consisted entirely of a senior secured note due in the third quarter of 2016. Also included in the carrying amount of short-term debt were deferred debt costs of \$0.3 million and a \$1.7 million fair value hedge liability on the notes, with a corresponding fair value hedge asset included in other long-term investments.

In March 2016, we amended the terms of our five-year \$400.0 million credit facility, which was previously set to expire in 2018, to extend through March 2021. At March 31, 2016, letters of credit totaling \$2.1 million had been issued from the credit facility, but there were no borrowed amounts outstanding.

During the three months ended March 31, 2016, we made principal payments of \$13.2 million on our senior secured non-recourse notes issued by Northwind Holdings, LLC.

Income Tax

In the first quarter of 2015, we reached agreement with the Internal Revenue Service on all outstanding issues related to the examinations for 2009 and 2010 tax years and refund claims filed for tax credits related to tax years 2003 through 2012. As a result of this agreement, we reduced our reserve for uncertain tax positions in our consolidated balance sheet by \$19.3 million. We also recognized in our consolidated statements of income a reduction in federal income taxes of \$5.8 million.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Executive Summary

Unum Group, a Delaware general business corporation, and its insurance and non-insurance subsidiaries, which collectively with Unum Group we refer to as the Company, operate in the United States, the United Kingdom, and, to a limited extent, in certain other countries. The principal operating subsidiaries in the United States are Unum Life Insurance Company of America, Provident Life and Accident Insurance Company, The Paul Revere Life Insurance Company, and Colonial Life & Accident Insurance Company, and in the United Kingdom, Unum Limited. We are the largest provider of disability insurance products in the United States and the United Kingdom. We also provide a complementary portfolio of other insurance products, including employer- and employee-paid group benefits, life insurance, and other related services.

We have three principal operating business segments: Unum US, Unum UK, and Colonial Life. Our other segments are the Closed Block and Corporate segments. These segments are discussed more fully under "Segment Results" included herein in this Item 2.

The benefits we provide help protect people from the financial hardship of illness, injury, or loss of life by providing support when it is needed most. As one of the leading providers of employee benefits in the U.S. and the U.K., we offer a broad portfolio of products and services through the workplace.

Specifically, we offer group, individual, and voluntary benefits, either as stand-alone products or combined with other coverages, that help employers of all sizes attract and retain a stronger workforce while protecting the incomes and livelihood of their employees. We believe employer-sponsored benefits represent the single most effective way to provide workers with access to the information and options they need to protect their financial stability. Working people and their families, particularly those at lower and middle incomes, are perhaps the most vulnerable in today's economy yet are often overlooked by many providers of financial services and products. For many of these people, employer-sponsored benefits are the primary defense against the potentially catastrophic fallout of death, illness, or injury.

We have established a corporate culture consistent with the social values our products provide. We are committed not only to meeting the needs of our customers who depend on us, but also to operating with integrity and being accountable for our actions. Our sound and consistent business practices, strong internal compliance program, and comprehensive risk management strategy enable us to operate efficiently as well as to identify and address potential areas of risk in our business. We have also applied these same values to our social responsibility efforts. Because we see important links between the obligations we have to all of our stakeholders, we place a strong emphasis on contributing to positive change in our communities.

This discussion and analysis should be read in conjunction with the consolidated financial statements and notes thereto in Part I, Item 1 contained in this Form 10-Q and with the "Cautionary Statement Regarding Forward-Looking Statements" included below the Table of Contents, as well as the discussion, analysis, and consolidated financial statements and notes thereto in Part I, Items 1 and 1A, and Part II, Items 6, 7, 7A, and 8 of our annual report on Form 10-K for the year ended December 31, 2015.

Operating Performance and Capital Management

For the first quarter of 2016, we reported net income of \$210.6 million, or \$0.88 per diluted common share, compared to net income of \$212.9 million, or \$0.84 per diluted common share, in the same period of 2015. Included in these

results are net realized investment gains and losses and non-operating retirement-related gains or losses. Adjusting for these items, after-tax operating income was \$226.8 million, or \$0.95 per diluted common share, in the first quarter of 2016, compared to \$224.8 million, or \$0.89 per diluted common share, in the same period of 2015. Our weighted average common shares outstanding, assuming dilution, equaled 239.9 million and 252.2 million for the three months ended March 31, 2016 and 2015, respectively, reflecting our capital management strategy of returning capital to shareholders through repurchases of our common stock.

Operating revenue, which excludes net realized investment gains and losses, increased in the first quarter of 2016 relative to the same period of 2015, driven by combined premium income growth of approximately 5 percent in our principal operating business segments. Net investment income, also a significant source of revenue for us, was slightly higher in the first quarter of 2016 compared to the same prior year period. Before-tax operating income, which excludes net realized investment gains and losses and non-operating retirement-related gains or losses, increased 2.3 percent in the first quarter of 2016 relative to the comparable prior year period.

Our Unum US segment reported an increase in operating income of 0.7 percent in the first quarter of 2016 compared to the same period of 2015, with 5.8 percent growth in premium income mostly offset by lower net investment income and less favorable benefits experience in certain product lines. The benefit ratio for our Unum US segment for the first quarter of 2016 was 69.3 percent compared to 68.3 percent in the same period of 2015. Unum US sales decreased 4.5 percent in the first quarter of 2016 compared to the same period of 2015. Persistency was generally stable relative to the prior year and is consistent with our expectations.

Our Unum UK segment reported an increase in operating income, as measured in Unum UK's local currency, of 9.3 percent in the first quarter of 2016 compared to the same period of 2015, with growth in premium income of 6.1 percent and higher net investment income partially offset by less favorable benefits experience. The benefit ratio for Unum UK was 67.9 percent in the first quarter of 2016 compared to 65.3 percent in the same period of 2015. Unum UK sales in local currency increased 16.4 percent in the first quarter of 2016, compared to the same period of 2015. Persistency was favorable relative to the prior year and is consistent with our expectations.

Our Colonial Life segment reported a decrease in operating income of 0.3 percent in the first quarter of 2016 compared to the same period of 2015, with growth in premium income of 5.7 percent and favorable benefits experience more than offset by a decline in net investment income. The benefit ratio for Colonial Life was 50.9 percent in the first quarter of 2016 compared to 51.3 percent in the same period of 2015. Colonial Life sales increased 16.0 percent in the first quarter of 2016 compared to the same period of 2015. Persistency declined relative to the prior year but remains within our expectations.

Our Closed Block segment reported an increase in operating income of 26.2 percent in the first quarter of 2016 compared to the same period of 2015, with higher net investment income and favorable expenses. Benefits experience in our individual disability and long-term care lines of business in the first quarter of 2016 was less favorable than the same period of 2015 but within our range of expectations.

Although our profit margins continue to be pressured by the impact of the low interest rate environment on our net investment income yields, our invested asset quality remains strong. The net unrealized gain on our fixed maturity securities was \$4.9 billion at March 31, 2016 compared to \$3.7 billion at December 31, 2015, with the increase due primarily to a decrease in U.S. Treasury rates during the first three months of 2016. The earned book yield on our investment portfolio was 5.24 percent for the first quarter of 2016 compared to a yield of 5.40 percent for full year 2015.

We believe our capital and financial positions are strong. At March 31, 2016, the risk-based capital (RBC) ratio for our traditional U.S. insurance subsidiaries, calculated on a weighted average basis using the NAIC Company Action Level formula, was approximately 390 percent, in line with our expectations but below the level of 2015 year end due primarily to the timing of dividend payments from subsidiaries. During the first quarter of 2016, we repurchased 3.7 million shares of Unum Group common stock under our share repurchase program, at a cost of approximately \$100 million. Cash equivalents and marketable securities held at Unum Group and our other intermediate holding companies, which are a significant source of liquidity for us, were approximately \$478 million at March 31, 2016.

Definitive Purchase Agreement

We have entered into a definitive agreement to acquire H&J Capital, LLC, parent of Starmount Life Insurance Company and AlwaysCare Benefits (which collectively we refer to as Starmount), for a purchase price of \$127 million plus net assets received. The acquisition of Starmount, a leading independent provider of dental and vision insurance in the U.S. workplace, will broaden our employee benefit offerings in both Unum US and Colonial Life. The transaction, which we anticipate will close by the end of the third quarter of 2016 subject to customary approvals and closing conditions, is not expected to materially impact our results of operations or financial position for 2016 or

alter our share repurchase and common stock dividend strategy.

Consolidated Company Outlook

We believe our disciplined approach to providing financial protection products at the workplace puts us in a position of strength as we seek to capitalize on the growing and largely unfilled need for our products and services. We believe the need for our products and services remains strong, and we intend to continue protecting our solid margins and returns through our pricing and risk actions. We continue to invest in our infrastructure and our employees, with a focus on quality and simplification of processes and offerings. Our strategy is centered on maintaining a strong customer focus while providing an innovative product portfolio of financial protection choices to deepen employee coverages, broaden employer relationships, and open new markets.

Our focus throughout 2016 will remain on profitably growing our business, maintaining solid margins through disciplined pricing, underwriting and expense management, and effectively managing our capital. Although the low interest rate

environment continues to place pressure on our profit margins and could unfavorably impact the adequacy of our reserves for some products, we continue to analyze and employ strategies that we believe will help us navigate this environment and allow us to maintain solid operating margins and significant financial flexibility to support the needs of our businesses, while also continuing to return capital to our shareholders. We have substantial leverage to rising interest rates and an improving economy which generates payroll growth and wage inflation. We believe that consistent operating results, combined with the implementation of strategic initiatives and the effective deployment of capital, will allow us to meet our long-term financial objectives.

Further discussion is contained in this Item 2 and in the "Notes to Consolidated Financial Statements" contained herein in Item 1.

Reconciliation of Non-GAAP Financial Measures

We analyze our performance using non-GAAP financial measures. A non-GAAP financial measure is a numerical measure of a company's performance, financial position, or cash flows that excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with GAAP. The non-GAAP financial measures of "operating revenue," "before-tax operating income" or "before-tax operating loss," and "after-tax operating income" differ from total revenue, income before income tax, and net income as presented in our consolidated operating results and income statements prepared in accordance with GAAP due to the exclusion of net realized investment gains and losses and non-operating retirement-related gains or losses as specified in the reconciliations below. We believe operating revenue and operating income or loss are better performance measures and better indicators of the revenue and profitability and underlying trends in our business.

Realized investment gains or losses depend on market conditions and do not necessarily relate to decisions regarding the underlying business of our segments. Our investment focus is on investment income to support our insurance liabilities as opposed to the generation of realized investment gains or losses. Although we may experience realized investment gains or losses which will affect future earnings levels, a long-term focus is necessary to maintain profitability over the life of the business since our underlying business is long-term in nature, and we need to earn the interest rates assumed in calculating our liabilities.

The amortization of prior period actuarial gains or losses, a component of the net periodic benefit cost for our pensions and other postretirement benefit plans, is driven by market performance as well as plan amendments and is not indicative of the operational results of our businesses. We believe that excluding the amortization of prior period gains or losses from operating income or loss provides investors with additional information for comparison and analysis of our operating results. Although we manage our non-operating retirement-related gains or losses separately from the operational performance of our business, these gains or losses impact the overall profitability of our company and have historically increased or decreased over time, depending on plan amendments and market conditions and the resulting impact on the actuarial gains or losses in our pensions and other postretirement benefit plans.

We may at other times exclude certain other items from our discussion of financial ratios and metrics in order to enhance the understanding and comparability of our operational performance and the underlying fundamentals, but this exclusion is not an indication that similar items may not recur and does not replace net income or net loss as a measure of our overall profitability.

A reconciliation of "operating revenue" to total revenue and "before-tax operating income" to income before income tax is as follows:

(in millions of dollars)

	Three Months Ended	
	March 31	
	2016	2015
Operating Revenue	\$2,745.9	\$2,662.7
Net Realized Investment Loss	(20.5)	(15.3)
Total Revenue	\$2,725.4	\$2,647.4
Before-tax Operating Income	\$328.8	\$321.3
Net Realized Investment Loss	(20.5)	(15.3)
Non-operating Retirement-related Loss	(4.1)	(3.0)
Income Before Income Tax	\$304.2	\$303.0

The after-tax impacts of these items are reflected in the following reconciliation of after-tax operating income to net income.

	Three Months Ended March 31			
	2016		2015	
	(in millions)*	per share	(in millions)*	per share
After-tax Operating Income	\$226.8	\$0.95	\$224.8	\$0.89
Net Realized Investment Loss, Net of Tax	(13.6)	(0.06)	(10.0)	(0.04)
Non-operating Retirement-related Loss, Net of Tax	(2.6)	(0.01)	(1.9)	(0.01)
Net Income	\$210.6	\$0.88	\$212.9	\$0.84

* Assuming Dilution

Critical Accounting Estimates

We prepare our financial statements in accordance with GAAP. The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions that affect amounts reported in our financial statements and accompanying notes. Estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed in our financial statements.

The accounting estimates deemed to be most critical to our financial position and results of operations are those related to reserves for policy and contract benefits, deferred acquisition costs, valuation of investments, pension and postretirement benefit plans, income taxes, and contingent liabilities. There have been no significant changes in our critical accounting estimates during the first three months of 2016.

For additional information, refer to our significant accounting policies in Note 1 of the "Notes to Consolidated Financial Statements" in Part II, Item 8 and "Critical Accounting Estimates" in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2015.

Accounting Developments

See Note 2 of the "Notes to Consolidated Financial Statements" contained herein in Item 1 for further information on accounting developments.

Consolidated Operating Results
(in millions of dollars)

	Three Months Ended March 31		
	2016	% Change	2015
Revenue			
Premium Income	\$2,087.5	4.0 %	\$2,006.3
Net Investment Income	606.4	0.7	602.0
Net Realized Investment Loss	(20.5)	34.0	(15.3)
Other Income	52.0	(4.4)	54.4
Total Revenue	2,725.4	2.9	2,647.4
Benefits and Expenses			
Benefits and Change in Reserves for Future Benefits	1,729.8	4.6	1,653.9
Commissions	259.9	1.2	256.9
Interest and Debt Expense	38.6	2.1	37.8
Deferral of Acquisition Costs	(152.5)	5.2	(145.0)
Amortization of Deferred Acquisition Costs	132.2	(1.6)	134.3
Compensation Expense	207.6	(2.6)	213.1
Other Expenses	205.6	6.3	193.4
Total Benefits and Expenses	2,421.2	3.3	2,344.4
Income Before Income Tax	304.2	0.4	303.0
Income Tax	93.6	3.9	90.1
Net Income	\$210.6	(1.1)	\$212.9

The comparability of our financial results between years is affected by the fluctuation in the British pound sterling to dollar exchange rate. The functional currency of our U.K. operations is the British pound sterling. In periods when the pound weakens relative to the preceding period, translating pounds into dollars decreases current period results relative to the prior period. In periods when the pound strengthens, translating pounds into dollars increases current period results relative to the prior period. Our weighted average pound/dollar exchange rate was 1.430 and 1.516 for the three months ended March 31, 2016 and 2015, respectively. If the first quarter of 2015 results for our U.K. operations had been translated at the lower exchange rate of 2016, our operating revenue and operating income by segment would have been lower by approximately \$9.2 million and \$1.8 million, respectively. However, it is important to distinguish between translating and converting foreign currency. Except for a limited number of transactions, we do not actually convert pounds into dollars. As a result, we view foreign currency translation as a financial reporting item and not a reflection of operations or profitability in the U.K.

Premium income for the first quarter of 2016 increased relative to the same period of 2015, with combined premium growth in our principal operating business segments of approximately 5 percent due primarily to sales growth, premium rate increases, and stable to favorable persistency for most of our product lines. Premium income continues to decline, as expected, in our Closed Block segment.

Net investment income increased in the first quarter of 2016 relative to the same period of 2015 due to an increase in the level of invested assets, higher miscellaneous investment income, and higher income from inflation index-linked bonds in our Unum UK segment. These favorable impacts were partially offset by a decrease in yield on invested assets.

Included in net realized investment losses were other-than-temporary impairment losses on fixed maturity securities of \$21.1 million and \$4.5 million for the first quarters of 2016 and 2015, respectively. The year over year increase was driven by impairments recognized on fixed maturity securities in the energy sector. Also, included in net realized investment losses were changes in the fair value of an embedded derivative in a modified coinsurance arrangement, which resulted in realized losses of \$5.6 million and \$3.9 million in the first quarters of 2016 and 2015, respectively. See Note 4 in the "Notes to Consolidated Financial Statements" contained herein in Item 1 for further information on realized investment gains and losses.

Although overall benefits experience was less favorable in the first quarter of 2016 relative to the prior year first quarter, our results were within our range of expectations. See "Executive Summary" contained in this Item 2 and "Segment Operating Results" as follows for further discussion by segment and product line.

Commissions and the deferral of acquisition costs increased in the first quarter of 2016 relative to the same period of 2015 due primarily to the timing of certain sales-related expenses in our Unum US group product lines and due to sales growth in our Unum US supplemental and voluntary product line and Colonial Life segment. Amortization of deferred acquisition costs was lower in the first quarter of 2016 relative to the same period of 2015 due primarily to the impact of a higher level of policy terminations in the first quarter of 2015 relative to assumptions for certain issue years within some of our Unum US supplemental and voluntary product lines.

Interest and debt expense was higher in the first quarter of 2016 relative to the same period of 2015 due to higher levels of outstanding debt.

Other expenses, including compensation expense, increased in the first quarter of 2016 compared to the same period of 2015, but our other expense ratio is favorable relative to prior year due to a continued focus on operating effectiveness and expense management.

Our effective income tax rate for the first quarter of 2016 was 30.8 percent of income before income tax, compared to 29.7 percent for the first quarter of 2015. Our effective tax rate differs from the U.S. statutory rate of 35 percent primarily due to the impact of tax credits as well as foreign earnings which are taxed at lower rates than the U.S. statutory rate. See Note 11 in the "Notes to Consolidated Financial Statements" contained herein in Item 1 for further discussion of our income tax.

Consolidated Sales Results

Shown below are sales results for our three principal operating business segments.

(in millions)

	Three Months Ended			
	March 31			
	2016	% Change	2015	
Unum US	\$237.1	(4.5)%	\$248.4	
Unum UK	£12.8	16.4 %	£11.0	
Colonial Life	\$89.9	16.0 %	\$77.5	

Sales shown in the preceding chart generally represent the annualized premium income on new sales which we expect to receive and report as premium income during the next 12 months following or beginning in the initial quarter in which the sale is reported, depending on the effective date of the new sale. Sales do not correspond to premium income reported as revenue in accordance with GAAP. This is because new annualized sales premiums reflect current sales performance and what we expect to recognize as premium income over a 12 month period, while premium income reported in our financial statements is reported on an "as earned" basis rather than an annualized basis and also includes renewals and persistency of in-force policies written in prior years as well as current new sales.

Sales, persistency of the existing block of business, employment and salary growth, and the effectiveness of a renewal program are indicators of growth in premium income. Trends in new sales, as well as existing market share, also indicate the potential for growth in our respective markets and the level of market acceptance of price changes and new product offerings. Sales results may fluctuate significantly due to case size and timing of sales submissions. See "Segment Results" as follows for a discussion of sales by segment.

Segment Results

Our reporting segments are comprised of the following: Unum US, Unum UK, Colonial Life, Closed Block, and Corporate.

Unum US Segment

The Unum US segment includes group long-term and short-term disability insurance, group life and accidental death and dismemberment products, and supplemental and voluntary lines of business, which are comprised of individual disability and voluntary benefits products.

Unum US Operating Results

Shown below are financial results for the Unum US segment. In the sections following, financial results and key ratios are also presented for the major lines of business within the segment.

(in millions of dollars, except ratios)

	Three Months Ended March 31			
	2016	% Change		2015
Operating Revenue				
Premium Income	\$1,301.3	5.8	%	\$1,230.2
Net Investment Income	207.4	(3.5)	215.0
Other Income	29.0	(6.1)	30.9
Total	1,537.7	4.2		1,476.1
Benefits and Expenses				
Benefits and Change in Reserves for Future Benefits	902.2	7.4		839.9
Commissions	149.0	2.1		145.9
Deferral of Acquisition Costs	(84.9)	6.0	(80.1
Amortization of Deferred Acquisition Costs	78.5	(5.9)	83.4
Other Expenses	277.0	1.6		272.7

Unum US Group Disability Operating Results

Shown below are financial results and key performance indicators for Unum US group disability.
(in millions of dollars, except ratios)

	Three Months Ended March 31			
	2016		% Change	2015
Operating Revenue				
Premium Income				
Group Long-term Disability	\$430.6	6.2	%	\$405.3
Group Short-term Disability	157.5	6.6		147.7
Total Premium Income	588.1	6.3		553.0
Net Investment Income	120.8	(3.4))	125.0
Other Income	22.9	(3.0))	23.6
Total	731.8	4.3		701.6
Benefits and Expenses				
Benefits and Change in Reserves for Future Benefits	474.3	7.1		443.0
Commissions	45.2	1.6		44.5
Deferral of Acquisition Costs	(12.4))	20.4	(10.3)
Amortization of Deferred Acquisition Costs	9.1	9.6		8.3
Other Expenses	145.2	2.4		141.8
Total	661.4	5.4		627.3
Operating Income	\$70.4	(5.2))	\$74.3
Operating Ratios (% of Premium Income):				
Benefit Ratio	80.6	%		80.1 %
Other Expense Ratio	24.7	%		25.6 %
Operating Income Ratio	12.0	%		13.4 %
Persistency:				
Group Long-term Disability	88.9	%		91.0 %
Group Short-term Disability	86.0	%		86.5 %

Premium income increased in the first quarter of 2016 compared to the same period of 2015, driven primarily by an increase in the in-force block resulting from prior year sales growth, partially offset by lower persistency resulting from our pricing actions. Net investment income was lower in the first quarter of 2016 relative to the same period of 2015 due primarily to a decline in yield on invested assets. Other income is comprised primarily of fees from administrative services products.

Benefits experience was slightly less favorable in the first quarter of 2016 compared to the same period of 2015 due primarily to a higher average claim size in our group long-term disability product line.

Commissions in the first quarter were generally consistent with the prior year first quarter. The deferral of acquisition costs was higher in the first quarter of 2016 relative to the same period of 2015 due primarily to the timing of certain sales-related expenses. The amortization of deferred acquisition costs increased in the first quarter of 2016 relative to the same period of 2015 due to growth in the level of the deferred asset. The premium income growth rate in the first quarter of 2016 more than offset the growth rate in other expenses as we continue our focus on expense management, resulting in a decline in the other expense ratio compared to the same period of 2015.

Edgar Filing: Unum Group - Form 10-Q

Unum US Group Life and Accidental Death and Dismemberment Operating Results

Shown below are financial results and key performance indicators for Unum US group life and accidental death and dismemberment.

(in millions of dollars, except ratios)

	Three Months Ended March 31			
	2016	% Change		2015
Operating Revenue				
Premium Income				
Group Life	\$351.5	4.9	%	\$335.0

Total Premium Income	386.1	5.0		367.6
Net Investment Income	28.5	(14.9)	33.5
Other Income	1.0	N.M.		0.3
Total	415.6	3.5		401.4
Benefits and Expenses				
Benefits and Change in Reserves for Future Benefits	275.9	5.8		260.8
Commissions	32.3	6.6		30.3
Deferral of Acquisition Costs	(9.8)	22.5	(8.0
Amortization of Deferred Acquisition Costs	7.5	15.4		6.5
Other Expenses	54.3	0.7		53.9
Total	360.2	4.9		343.5
Operating Income	\$55.4	(4.3)	\$57.9
Operating Ratios (% of Premium Income):				
Benefit Ratio	71.5	%		70.9
Other Expense Ratio	14.1	%		14.7
Operating Income Ratio	14.3	%		15.8
Persistency:				
Group Life	89.9	%		87.3
Accidental Death & Dismemberment	89.1	%		89.0

Premium income increased in the first quarter of 2016 compared to the same period of 2015 primarily due to favorable persistency in both group life and accidental death and dismemberment. Net investment income was lower in the first quarter of 2016 compared to the same period of 2015 due primarily to a decrease in the level of invested assets and a decline in yield.

Benefits experience was less favorable in the first quarter of 2016 compared to the same period of 2015 due primarily to higher claim incidence and a higher average claim size.

Commissions and the deferral of acquisition costs were higher in the first quarter of 2016 compared to the same period of 2015 due to the timing of certain sales-related expenses. The amortization of deferred acquisition costs increased in the first quarter of 2016 compared to the same period of 2015 due to growth in the level of the deferred asset. The premium income growth rate in the first quarter of 2016 more than offset the growth rate in other expenses as we continue our focus on expense management, resulting in a decline in the other expense ratio compared to the same period of 2015.

Unum US Supplemental and Voluntary Operating Results

Shown below are financial results and key performance indicators for Unum US supplemental and voluntary product lines.

(in millions of dollars, except ratios)

	Three Months Ended March 31			
	2016	% Change		2015
Operating Revenue				
Premium Income				
Individual Disability	\$123.9	5.1	%	\$117.9
Voluntary Benefits	203.2	6.0		191.7
Total Premium Income	327.1	5.7		309.6
Net Investment Income	58.1	2.8		56.5
Other Income	5.1	(27.1))	7.0
Total	390.3	4.6		373.1
Benefits and Expenses				
Benefits and Change in Reserves for Future Benefits	152.0	11.7		136.1
Commissions	71.5	0.6		71.1
Deferral of Acquisition Costs	(62.7))	1.5	(61.8)
Amortization of Deferred Acquisition Costs	61.9	(9.8))	68.6
Other Expenses	77.5	0.6		77.0
Total	300.2	3.2		291.0
Operating Income	\$90.1	9.7		\$82.1
Operating Ratios (% of Premium Income):				
Benefit Ratios:				
Individual Disability	50.9	%		48.9 %
Voluntary Benefits	43.8	%		40.9 %
Other Expense Ratio	23.7	%		24.9 %
Operating Income Ratio	27.5	%		26.5 %
Persistency:				
Individual Disability	91.3	%		90.1 %
Voluntary Benefits	76.7	%		75.5 %

Premium income was higher in the first quarter of 2016 compared to the same period of 2015, driven primarily by favorable persistency and sales growth. Net investment income was higher in the first quarter of 2016 than in the comparable period of 2015 due to growth in the level of invested assets, partially offset by a decrease in yield on invested assets. Other income decreased in the first quarter of 2016 relative to the first quarter of 2015 due primarily to an expected decline in surrender fees as our interest sensitive life products mature.

Benefits experience for the individual disability product line in the first quarter of 2016 was less favorable than the comparable prior year period due primarily to higher new claim activity in the first quarter of 2016. Benefits experience for voluntary benefits in the first quarter of 2016 was less favorable compared to the same period of 2015 due primarily to a prior year release of active life reserves resulting from a higher level of policy terminations during the first quarter of 2015.

Commissions and deferral of acquisition costs were higher in the first quarter of 2016 compared to the same period of 2015 due primarily to sales growth. The amortization of deferred acquisition costs was lower in the first quarter of 2016 compared to the same period of 2015 due primarily to the impact of a higher level of policy terminations in the first quarter of 2015 relative to assumptions for certain issue years within certain product lines. The premium income growth rate in the first quarter of 2016 more than offset the growth rate in other expenses as we continue our focus on expense management, resulting in a decline in the other expense ratio compared to the same period of 2015.

Sales

	2016	% Change	2015
Sales by Product			
Group Disability and Group Life and AD&D			
Group Long-term Disability	\$37.5	0.5 %	\$37.3
Group Short-term Disability	16.2	(32.5)	24.0
Group Life and AD&D	40.8	(4.9)	42.9
Subtotal	94.5	(9.3)	104.2
Supplemental and Voluntary			
Individual Disability	16.7	35.8	12.3
Voluntary Benefits	125.9	(4.5)	131.9
Subtotal	142.6	(1.1)	144.2
Total Sales	\$237.1	(4.5)	\$248.4

Sales by Market Sector

Group Disability and Group Life and AD&D			
Core Market (< 2,000 lives)	\$58.2	(19.7)%	\$72.5
Large Case Market	36.3	14.5	31.7
Subtotal	94.5	(9.3)	104.2
Supplemental and Voluntary	142.6	(1.1)	144.2
Total Sales	\$237.1	(4.5)	\$248.4

Sales of our group products decreased in the first quarter of 2016 compared to the same period of 2015, primarily driven by a decline in sales to new customers in the core market segment, partially offset by an increase in sales to existing customers in the large case market segment. The core market segment consists of employee groups with fewer than 2,000 lives. The sales mix in the group market sector for the first quarter of 2016 was approximately 62 percent core market and 38 percent large case market.

Individual disability sales, which are primarily concentrated in the multi-life market, increased in the first quarter of 2016 compared to the same period of 2015 due to increased sales to new and existing customers. The decrease in sales of voluntary benefits was driven by a single large case market sale in the first quarter of 2015, which was partially offset by favorable sales growth to new and existing customer accounts within the core market segment.

Segment Outlook

During 2016, we expect to achieve year over year premium growth resulting from stable persistency and disciplined sales growth. We believe additional improvement in our premium and sales growth rates may occur if the overall economic recovery further accelerates. The low interest rate environment continues to place pressure on our profit margins by impacting net investment income yields. Our net investment income may also be impacted, either favorably or unfavorably, by fluctuations in miscellaneous investment income. As part of our continued pricing discipline and our reserving strategy, we continuously monitor emerging interest rate experience and adjust our pricing and reserve discount rates, as appropriate. The implementation of premium rate increases may unfavorably impact persistency in certain of our product lines. Unfavorable economic conditions could lead to a higher rate of claim incidence, lower levels of claim recoveries, or lower claim discount rates, but we currently expect our group disability benefit ratio for full year 2016 to be generally consistent with the level of 2015. Our amortization of deferred acquisition costs may be unfavorably impacted, particularly in our supplemental and voluntary product line, by higher than expected policy terminations. We continuously monitor key indicators to assess our risks and attempt to adjust our business plans accordingly.

We remain confident in our strategy of providing consumers with valuable financial protection benefits, broadening our employer client relationships, and building collaborative partnerships with complementary product manufacturers, technology firms, and distributors. Our continued investment in our franchise includes active client management and a differentiated integrated experience across our product lines. There are significant growth opportunities in each of our markets and within our existing client base, and we continue to invest in the people, processes, and technologies that will allow us to enhance our ability to grow the market over the long term. The planned acquisition of Starmount will broaden our employee benefit offerings but is not expected to materially impact our operating or sales results for 2016.

We believe future profit margin improvement is achievable, driven primarily by our continued product mix shift, expense efficiencies, and consistent operating effectiveness. Underpinning our strategy is our continued commitment to risk management discipline, talent development, and our core values.

Unum UK Segment

The Unum UK segment includes insurance for group long-term disability, group life, and supplemental lines of business which include dental, individual disability, and critical illness. Unum UK's products are sold primarily in the United Kingdom through field sales personnel and independent brokers and consultants.

Foreign Currency Translation

The functional currency of Unum UK is the British pound sterling. Unum UK's premium income, net investment income, claims, and expenses are received or paid in pounds, and we hold pound-denominated assets to support Unum UK's pound-denominated policy reserves and liabilities. We translate Unum UK's pound-denominated financial statement items into dollars for our consolidated financial reporting. We translate income statement items using an average exchange rate for the reporting period, and we translate balance sheet items using the exchange rate at the end of the period. We report unrealized foreign currency translation gains and losses in accumulated other comprehensive income in our consolidated balance sheets.

Fluctuations in the pound to dollar exchange rate have an effect on Unum UK's reported financial results and our consolidated financial results. In periods when the pound strengthens relative to the preceding period, translating pounds into dollars increases current period results relative to the prior period. In periods when the pound weakens, translating pounds into dollars decreases current period results relative to the prior period. The discussion of financial and sales results as follows is based on local currency.

Operating Ratios (% of Premium Income):			
Benefit Ratio	67.9 %		65.3 %
Other Expense Ratio	20.2 %		19.0 %
Operating Income Ratio	24.2 %		23.4 %
Persistency:			
Group Long-term Disability	87.5 %		86.6 %
Group Life	79.6 %		79.3 %
Supplemental	90.5 %		87.5 %

Premium income was higher in the first quarter of 2016 compared to the same period of 2015 due primarily to growth in the supplemental product line associated with the addition of the dental product offering in the third quarter of 2015. Also contributing to the increase in premium income is sales growth and favorable persistency in our group long-term disability product line.

Net investment income increased in the first quarter of 2016 relative to the same prior year period due primarily to higher income from inflation index-linked bonds which we invest in to support the claim reserves associated with certain of our group policies that provide for inflation-linked increases in benefits. The increase in net investment income attributable to these index-linked bonds was partially offset by an increase in the reserves for future claims payments related to the inflation index-linked group long-term disability and group life policies.

Benefits experience was less favorable in the first quarter of 2016 compared to the first quarter of 2015 due primarily to a higher claim incidence rate and a higher average claim size in our group life product line. Partially offsetting this

was favorable benefits experience in our group long-term disability product line due primarily to a lower average claim size, somewhat offset by lower claim recoveries. Benefits experience in the supplemental line of business was less favorable in the first quarter of 2016 as compared to the same period of 2015 due primarily to a higher average claim size in the individual disability product line and the addition of the dental product line, which typically has a higher benefit ratio than other product lines reported in our supplemental line of business.

Edgar Filing: Unum Group - Form 10-Q

Commissions were lower in the first quarter of 2016 compared to the same prior year period due primarily to an unusually high level of incentive payments during the first quarter of 2015 which has now returned to more normal levels. The deferral and amortization of acquisition costs during the first quarter of 2016 were generally consistent with the same prior year period. The other expense ratio was higher in the first quarter of 2016 relative to the same period of 2015 driven by volatility in the timing of expenses during 2015 but is below the full year 2015 expense ratio as we continue to focus on expense management initiatives.

Supplemental	2.5	N.M.	0.4
Total Sales	£12.8	16.4	£11.0

N.M. = not a meaningful percentage

Group long-term disability sales were generally consistent in the first quarter of 2016 compared to the same period of 2015, with growth in sales to both new and existing customers in the core market, or employee groups with fewer than 500 lives. Sales in the large case market declined year over year due to a decrease in sales to new customers.

Group life sales decreased in the first quarter of 2016 compared to the same period of 2015 due to lower sales to both new and existing customers in the large case market, partially offset by higher sales to both new and existing customers in the core market.

The increase in supplemental sales during the first quarter of 2016 compared to the same period of 2015 was due to higher sales in our group critical illness product line as well as the addition of sales related to our new dental product offering.

Segment Outlook

Our primary focus during 2016 remains building on the key capabilities that we believe will enable us to deliver future growth. We expect to further improve our profitability through an increased focus on new to market sales, premium rate increases, and continued pursuit of efficiency opportunities.

We expect the low interest rate environment to continue to contribute to a dampening of overall earnings growth, and unfavorable economic conditions may lead to a higher rate of claim incidence, lower levels of claim recoveries, or lower claim discount rates. As part of our continued pricing discipline and our reserving strategy, we continuously monitor emerging interest rate experience and adjust our pricing and reserve discount rates, as appropriate. We believe the current low levels of inflation in the U.K., despite the slight increase in the first quarter of 2016, may continue to adversely impact our index-linked net investment income, with an expected corresponding reduction in the cost of benefits. We continuously monitor key indicators to assess our risks and attempt to adjust our business plans accordingly.

We remain committed to driving growth in the U.K. market. We will continue to follow a disciplined approach to new sales activity in the competitive pricing environment. We do, however, see genuine opportunities to grow the market in the U.K. through establishing new relationships with employers, deepening the level of coverage with our existing corporate clients, and through new offerings such as our dental product. We anticipate returning to more normal levels of premium growth as our rate increases continue to be placed in the market and as we continue to increase sales to new and existing customers. We have seen some positive results in terms of new to market sales and increased coverage in existing cases. We believe the outlook for higher levels of employment, increases in corporate payrolls, and expansion of benefit spending is beginning to improve and will positively impact our sales and operating results. In addition, we continue to focus on new market opportunities by raising awareness of the need for income protection. Expanding group long-term disability market penetration remains a significant opportunity and priority.

Colonial Life Segment

The Colonial Life segment includes insurance for accident, sickness, and disability products, life products, and cancer and critical illness products issued primarily by Colonial Life & Accident Insurance Company and marketed to employees at the workplace through an independent contractor agency sales force and brokers.

Operating Results

Shown below are financial results and key performance indicators for the Colonial Life segment.

Operating Income Ratio	22.0	%		23.4
Persistency:				
Accident, Sickness, and Disability	74.8	%		75.5
Life	84.7	%		85.4
Cancer and Critical Illness	81.6	%		83.8

N.M. = not a meaningful percentage

Premium income increased in the first quarter of 2016 relative to the same period of 2015 as a result of sales growth in all lines of business, partially offset by a decline in persistency. Net investment income was lower in the first quarter of 2016 relative to the same period of 2015 due to lower miscellaneous investment income and a decrease in yield on invested assets, partially offset by an increase in the level of invested assets.

Benefits experience was favorable in the first quarter of 2016 as compared to the same period of 2015, driven primarily by favorable claims experience in the accident, sickness, and disability and critical illness product lines.

Commissions and the deferral of acquisition costs were higher in the first quarter of 2016 compared to the same period of 2015 due primarily to higher sales. The amortization of deferred acquisition costs was higher in the first quarter of 2016 compared to same period of 2015 due primarily to growth in the level of the deferred asset. The other expense ratio in the first quarter of 2016 was consistent with the same period of 2015, with the growth rate in expenses generally commensurate with our premium growth rate.

Sales

(in millions of dollars)

	Three Months Ended		
	March 31		
	2016	% Change	2015
Sales by Product			
Accident, Sickness, and Disability	\$58.3	18.3 %	\$49.3
Life	17.0	6.9	15.9
Cancer and Critical Illness	14.6	18.7	12.3
Total Sales	\$89.9	16.0	\$77.5

Sales by Market Sector

Commercial			
Core Market (< 1,000 lives)	\$62.0	11.3 %	\$55.7
Large Case Market	10.2	39.7	7.3
Subtotal	72.2	14.6	63.0
Public Sector	17.7	22.1	14.5
Total Sales	\$89.9	16.0	\$77.5

Sales were higher in the first quarter of 2016 as compared to the same period of 2015 due to growth in new and existing customer account sales. Commercial market sales increased in the first quarter of 2016 as compared to the same period of 2015 due to higher new and existing customer account sales in both the core market, which we define as accounts with fewer than 1,000 lives, and in the large case market. The growth in our public sector market sales for the first quarter of 2016 was attributable to increases in both new and existing customer account sales. The number of new accounts increased 23.0 percent in the first quarter of 2016 relative to the same period of 2015, and the average new case size increased 0.7 percent.

Segment Outlook

We expect to see continued favorable sales and premium growth trends in 2016. Volatility in net investment income is likely to continue as a result of fluctuations in miscellaneous investment income. We expect our annual benefit ratio for 2016 to be generally consistent with the level of 2015. While we expect the low interest rate environment to continue to pressure our profit margins, we believe our underlying profitability will remain strong.

Disciplined execution of our growth strategy should deliver sales and premium growth that are in line with long-term expectations. Unfavorable U.S. economic conditions and the increasing competition in the voluntary market are seen as external risks to achievement of our business plans. We continuously monitor key indicators to assess our risks and attempt to adjust our business plans accordingly.

We believe our success will be driven primarily by execution in the core commercial and public sector segments and through expansion of the overall market. We believe the current market environment offers considerable opportunities to meet the emerging needs of employers, brokers, and consumers. We intend to continue to focus on growth, the customer experience, productivity, and talent development. Key drivers in our 2016 plan include a focus on strategic growth markets, distribution expansion, third-party connectivity, enrollment solutions, service capabilities, and operational excellence.

Closed Block Segment

The Closed Block segment consists of individual disability, group and individual long-term care, and other insurance products no longer actively marketed. The individual disability line of business in this segment generally consists of policies we sold prior to the mid-1990s and entirely discontinued selling in 2004, other than update features contractually allowable on existing policies. We discontinued offering individual long-term care in 2009 and group long-term care in 2012. Other insurance products include group pension, individual life and corporate-owned life insurance, reinsurance pools and management operations, and other miscellaneous product lines.

Operating Results

Shown below are financial results and key performance indicators for the Closed Block segment.
(in millions of dollars, except ratios)

	Three Months Ended March 31			
	2016	%	Change	2015
Operating Revenue				
Premium Income				
Individual Disability	\$133.6	(8.8)%	\$146.5
Long-term Care	161.7	2.2		158.2
All Other	0.4	100.0		0.2
Total Premium Income	295.7	(3.0)	304.9
Net Investment Income	333.4	4.1		320.4
Other Income	22.4	(3.4)	23.2
Total	651.5	0.5		648.5
Benefits and Expenses				
Benefits and Change in Reserves for Future Benefits	554.0	0.2		552.7
Commissions	24.1	(5.9)	25.6
Interest and Debt Expense	1.7	—		1.7
Other Expenses	38.0	(9.1)	41.8
Total	617.8	(0.6)	621.8
Operating Income	\$33.7	26.2		\$26.7
Interest Adjusted Loss Ratios:				
Individual Disability	84.0	%		80.0 %
Long-term Care	88.9	%		87.3 %
Operating Ratios (% of Premium Income):				
Other Expense Ratio	12.9	%		13.7 %
Operating Income Ratio	11.4	%		8.8 %
Persistency:				
Individual Disability	90.9	%		91.3 %
Long-term Care	95.5	%		95.3 %

Premium income for individual disability decreased in the first quarter of 2016 compared to the same period of 2015 due to expected policy terminations and maturities. Premium income for long-term care increased slightly due to rate increases and stable persistency. We continue to file requests with various state insurance departments for premium

rate increases on certain of our individual and group long-term care policies. The rate increases reflect current interest rates and claims experience, higher expected future claims, longevity, persistency, and other factors related to pricing long-term care coverage. In states for which a rate increase is submitted and approved, we routinely provide customers options for coverage changes or other approaches that might fit their current financial and insurance needs.

Net investment income was higher in the first quarter of 2016 relative to the same period of 2015 due to higher miscellaneous investment income and an increase in the level of invested assets. Other income, which includes the underlying results of certain blocks of individual disability reinsured business and the net investment income thereon, was consistent in the first quarter of 2016 relative to the same period of 2015.

Individual disability benefits experience for the first quarter of 2016 was unfavorable compared to the same period of 2015 due primarily to a slight reduction in the claim reserve discount rate to recognize the impact on future portfolio yields from the higher than normal level of bond tenders during the first quarter of 2016. Long-term care benefits experience was unfavorable in the first quarter of 2016 compared to the same period of 2015 due primarily to a higher average submitted claim size.

The other expense ratio in the first quarter of 2016 was lower than the same period of 2015 due to our continued focus on operating effectiveness and expense management.

Segment Outlook

We intend to continue our focus on operational effectiveness, rate increases, enhancement of our experience analysis tools, and capital management. We expect operating revenue to decline over time as these closed blocks of business wind down, although we anticipate additional premium income associated with long-term care rate increases. We will likely experience volatility in net investment income due to fluctuations of miscellaneous investment income. We continuously monitor key indicators to assess our risks and attempt to adjust our business plans accordingly. We expect the low interest rate environment to continue to place pressure on our earnings and the adequacy of our reserves.

Profitability of our long-tailed products is affected by claims experience related to mortality and morbidity, investment returns, premium rate increases, and persistency. We believe that the interest adjusted loss ratios for the individual disability and long-term care lines of business will be relatively flat over the long term, but these product lines may continue to experience quarterly volatility, particularly in the near term for our long-term care product lines as our claim block matures. Claim resolution rates, which measure the resolution of claims from recovery, deaths, settlements, and benefit expirations, are very sensitive to operational and external factors and can be volatile. Our claim resolution rate assumption used in determining reserves is our expectation of the resolution rate we will experience over the life of the block of business and will vary from actual experience in any one period. It is possible that variability in any of our reserve assumptions, including, but not limited to, interest rates, mortality, morbidity, premium rate increases, benefit change elections, and persistency, could result in a material impact on the adequacy of our reserves, including adjustments to reserves established under loss recognition.

Corporate Segment

The Corporate segment includes investment income on corporate assets not specifically allocated to a line of business, interest expense on corporate debt other than non-recourse debt, and certain other corporate income and expense not allocated to a line of business.

Operating Results

(in millions of dollars)

	Three Months Ended		
	March 31		
	2016	% Change	2015
Operating Revenue			
Net Investment Income	\$4.8	(21.3)%	\$6.1
Other Income	0.3	—	0.3
Total	5.1	(20.3)	6.4
Interest and Other Expenses	36.9	1.7	36.3
Operating Loss	\$(31.8)	(6.4)	\$(29.9)

The operating loss was higher in the first quarter of 2016 compared to the same period of 2015 due primarily to a decline in net investment income, which was driven by a decrease in yield on invested assets and lower miscellaneous investment income.

Segment Outlook

We expect the low interest rate environment to continue to place pressure on investment income. We are currently holding capital at our insurance subsidiaries and holding companies at levels that exceed our long-term requirements, and we expect to continue to generate excess capital on an annual basis through our statutory earnings. While we intend to maintain our disciplined approach to risk management, we believe we are well positioned with substantial flexibility to preserve our capital strength and at the same time explore opportunities to deploy the excess capital that is generated.

Investments

Overview

Investment activities are an integral part of our business, and profitability is significantly affected by investment results. We segment our invested assets into portfolios that support our various product lines. Generally, our investment strategy for our portfolios is to match the effective asset cash flows and durations with related expected liability cash flows and durations to consistently meet the liability funding requirements of our businesses. We seek to earn investment income while assuming credit risk in a prudent and selective manner, subject to constraints of quality, liquidity, diversification, and regulatory considerations. Our overall investment philosophy is to invest in a portfolio of high quality assets that provide investment returns consistent with that assumed in the pricing of our insurance products. Assets are invested predominately in fixed maturity securities. Changes in interest rates may affect the amount and timing of cash flows.

We actively manage our asset and liability cash flow match and our asset and liability duration match to limit interest rate risk. We may redistribute investments among our different lines of business, when necessary, to adjust the cash flow and/or duration of the asset portfolios to better match the cash flow and duration of the liability portfolios. Asset and liability portfolio modeling is updated on a quarterly basis and is used as part of the overall interest rate risk management strategy. Cash flows from the in-force asset and liability portfolios are projected at current interest rate

levels and also at levels reflecting an increase and a decrease in interest rates to obtain a range of projected cash flows under the different interest rate scenarios. These results enable us to assess the impact of projected changes in cash flows and duration resulting from potential changes in interest rates. Testing the asset and liability portfolios under various interest rate scenarios enables us to choose what we believe to be the most appropriate investment strategy, as well as to limit the risk of disadvantageous outcomes. Although we test the asset and liability portfolios under various interest rate scenarios as part of our modeling, the majority of our liabilities related to insurance contracts are not interest rate sensitive, and we therefore have minimal exposure to policy withdrawal risk. Our determination of investment strategy relies on long-term measures such as reserve adequacy analysis and the relationship between the portfolio yields supporting our various product lines and the aggregate discount rate assumptions embedded in the reserves. We also use this analysis in determining hedging strategies and utilizing derivative financial instruments for managing interest rate risk and

the risk related to matching duration for our assets and liabilities. We do not use derivative financial instruments for speculative purposes.

Our investment portfolio is well diversified by type of investment and industry sector. We have established an investment strategy that we believe will provide for adequate cash flows from operations and allow us to hold our securities through periods where significant decreases in fair value occur. We believe our emphasis on risk management in our investment portfolio, including credit and interest rate management, has positioned us well and generally reduced the volatility in our results.

Fixed Maturity Securities

The fair values and associated unrealized gains and losses of our fixed maturity securities portfolio, by industry classification, are as follows:

Fixed Maturity Securities - By Industry Classification As of March 31, 2016

(in millions of dollars)

Classification	Fair Value	Net Unrealized Gain (Loss)	Fair Value of Fixed Maturity Securities with Gross Unrealized Loss	Gross Unrealized Loss	Fair Value of Fixed Maturity Securities with Gross Unrealized Gain	Gross Unrealized Gain

Total	\$44,699.2	\$ 4,894.5	\$ 4,610.6	\$ 424.5	\$ 40,088.6	\$ 5,319.0

The following two tables show the length of time our investment-grade and below-investment-grade fixed maturity securities had been in a gross unrealized loss position as of March 31, 2016 and at the end of the prior four quarters. The relationships of the current fair value to amortized cost are not necessarily indicative of the fair value to amortized cost relationships for the securities throughout the entire time that the securities have been in an unrealized loss position nor are they necessarily indicative of the relationships after March 31, 2016. The decrease in the unrealized loss on fixed maturity securities during the first quarter of 2016 was due primarily to a decrease in U.S. Treasury rates.

The following table shows our fixed maturity securities with a gross unrealized loss of \$10.0 million or greater, by industry type. We held no securities at March 31, 2016 with a gross unrealized loss of \$20.0 million or greater.

Gross Unrealized Losses \$10.0 Million or Greater on Fixed Maturity Securities

As of March 31, 2016

(in millions of dollars)

Classification	Fair Value	Gross Unrealized Loss	Number of Issuers
Investment-Grade			
Energy	\$210.2	\$ 27.0	2
Below-Investment-Grade			
Energy	\$68.0	\$ 53.6	4

During the first quarter of 2016, we recognized an other-than-temporary impairment loss of \$11.6 million on fixed maturity securities issued by a large U.S.-based energy company. At the time of the impairment loss, the company had a high debt-to-equity ratio, and its projected liquidity had decreased significantly as a result of the declines in oil prices and the likelihood that prices may stay at depressed levels for an extended period of time. The company has assets it can sell, but liquidation may be difficult in the current environment. Additionally, the lower oil prices resulted in the company's banks significantly reducing the availability on the company's revolving line of credit. At the time of the impairment loss, these securities had been in an unrealized loss position for a period of greater than one year but less than two years. During the first quarter of 2016, we also recognized two smaller other-than-temporary impairment losses on fixed maturity securities issued by energy companies. These two losses combined totaled \$9.5 million.

We had no individual realized investment losses of \$10.0 million or greater from the sale of fixed-maturity securities during the first quarters of 2016 and 2015 and no individual realized investment losses of \$10.0 million or greater from other-than-temporary impairments during the first quarter of 2015.

At March 31, 2016, we had minimal exposure to investments for which the payment of interest and principal is guaranteed under a financial guaranty insurance policy, and the securities in aggregate have a weighted average credit rating of investment-grade absent the guaranty insurance policy. At March 31, 2016, we held \$139.4 million fair value (\$128.4 million amortized cost) of perpetual debentures, or "hybrid" securities, that generally have no fixed maturity date. Interest on these securities due on any payment date may be deferred by the issuer. The interest payments are generally deferrable only to the extent that the issuer has suspended dividends or other distributions or payments to any of its shareholders or any other perpetual debt instrument.

At March 31, 2016, our mortgage/asset-backed securities had an average life of 4.45 years, effective duration of 4.50 years, and a weighted average credit rating of Aaa. The mortgage/asset-backed securities are valued on a monthly basis using valuations supplied by the brokerage firms that are dealers in these securities as well as independent pricing services. One of the risks involved in investing in mortgage/asset-backed securities is the uncertainty of the timing of cash flows from the underlying loans due to prepayment of principal with the possibility of reinvesting the funds in a lower interest rate environment. We use models which incorporate economic variables and possible future interest rate scenarios to predict future prepayment rates. The timing of prepayment cash flows may also cause volatility in our recognition of investment income. We recognize investment income on these securities using a constant effective yield based on projected prepayments of the underlying loans and the estimated economic life of the securities. Actual prepayment experience is reviewed periodically, and effective yields are recalculated when differences arise between prepayments originally projected and the actual prepayments received and currently projected. The effective yield is recalculated on a retrospective basis, and the adjustment is reflected in net investment

income.

We have no exposure to subprime mortgages, "Alt-A" loans, or collateralized debt obligations in our investment portfolios. We have not invested in mortgage-backed derivatives, such as interest-only, principal-only, or residuals, where market values can be highly volatile relative to changes in interest rates. The credit quality of our mortgage-backed securities portfolio has not been negatively impacted by the issues in the market concerning subprime mortgage loans. The change in value of our mortgage-backed securities portfolio has moved in line with that of prime agency-backed mortgage-backed securities.

As of March 31, 2016, the amortized cost and fair value of our below-investment-grade fixed maturity securities was \$3,544.3 million and \$3,393.4 million, respectively. Below-investment-grade securities are inherently more risky than investment-grade securities since the risk of default by the issuer, by definition and as exhibited by bond rating, is higher. Also, the secondary

71

market for certain below-investment-grade issues can be highly illiquid. Additional downgrades may occur, but we do not anticipate any liquidity problems resulting from our investments in below-investment-grade securities, nor do we expect these investments to adversely affect our ability to hold our other investments to maturity.

Our investments in issuers in foreign countries are chosen for specific portfolio management purposes, including asset and liability management and portfolio diversification across geographic lines and sectors to minimize non-market risks. In our approach to investing in fixed maturity securities, specific investments within approved countries and industry sectors are evaluated for their market position and specific strengths and potential weaknesses. For each security, we consider the political, legal, and financial environment of the sovereign entity in which an issuer is domiciled and operates. The country of domicile is based on consideration of the issuer's headquarters, in addition to location of the assets and the country in which the majority of sales and earnings are derived. We do not have exposure to foreign currency risk, as the cash flows from these investments are either denominated in currencies or hedged into currencies to match the related liabilities. We continually evaluate our foreign investment risk exposure. Our monitoring is heightened for investments in certain countries due to our concerns over the current economic and political environments, and we believe these investments are more vulnerable to potential credit problems. At March 31, 2016, we had minimal exposure in those countries and had no direct exposure to financial institutions of those countries.

Fixed Maturity Securities - Energy Sector

Our investment portfolio has exposure to companies whose businesses are negatively impacted by lower oil and natural gas prices. These include exploration and production companies, refineries, midstream and pipeline companies, and oilfield service businesses. The sharp drop in the price of oil has put pressure on the earnings and cash flows of some of these businesses. The degree to which a business is affected by oil and gas prices can vary greatly depending on, among other things, its energy subsector, exposure to different types of oil and gas within a subsector, geographic locations, cost structure flexibility, capital structure, and hedging policies. At March 31, 2016, approximately one-third of our exposure to the energy sector was represented by the independent and oilfield subsectors where demand for products is highly correlated with oil and gas prices. The remaining two-thirds of our exposure to the energy sector was represented by the midstream, integrated, refining, and other energy subsectors, which tend to be more correlated to product volume sales as opposed to the commodity price. The majority of our energy sector holdings are investment-grade fixed maturity securities. At March 31, 2016, the fair value of investment-grade fixed maturity securities in the energy sector was \$4,334.9 million, with a gross unrealized gain of \$315.6 million and a gross unrealized loss of \$118.8 million. The fair value of below-investment-grade fixed maturity securities in the energy sector was \$602.8 million, with a gross unrealized gain of \$0.7 million and a gross unrealized loss of \$178.6 million.

We perform sensitivity analysis on all energy-related investments in our portfolios, using different oil and gas price scenarios, and we continue to closely monitor this situation. While downgrades and impairments may occur, we currently believe that the impact would not materially alter our financial position or capital plans. If oil prices were to remain at the current depressed levels for a period of several years, we would expect losses on these investments to increase. The following table shows additional information related to our holdings in the energy sector.

Fixed Maturity Securities - Energy Sector

At March 31, 2016

(in millions of dollars)

Classification by Subsector	Fair Value	Net Unrealized Gain(Loss)	Fair Value of Fixed Maturity	Gross Unrealized Loss	Fair Value of Fixed Maturity	Gross Unrealized Gain

72

Mortgage Loans

Our mortgage loan portfolio was \$1,881.3 million and \$1,883.6 million on an amortized cost basis at March 31, 2016 and December 31, 2015, respectively. Our mortgage loan portfolio is comprised entirely of commercial mortgage loans. We believe our mortgage loan portfolio is well diversified geographically and among property types. The incidence of problem mortgage loans and foreclosure activity continues to be low. Due to conservative underwriting, we expect the level of problem loans to remain low relative to the industry.

We held no impaired mortgage loans at March 31, 2016 or December 31, 2015.

Derivative Financial Instruments

We use derivative financial instruments primarily to manage reinvestment, duration, foreign currency, and credit risks. Historically, we have utilized current and forward interest rate swaps and options on forward interest rate swaps and U.S. Treasury rates, current and forward currency swaps, forward treasury locks, currency forward contracts, forward contracts on specific fixed income securities, and credit default swaps. Our current credit exposure on derivatives, which is limited to the value of those contracts in a net gain position, including accrued interest receivable less collateral held, was de minimis at March 31, 2016. We held \$27.1 million of cash collateral from our counterparties at March 31, 2016. The carrying value of fixed maturity securities posted as collateral to our counterparties was \$38.1 million at March 31, 2016. We had no cash collateral posted to our counterparties at March 31, 2016. We believe that our credit risk is mitigated by our use of multiple counterparties, all of which have an investment-grade credit rating, and by our use of cross-collateralization agreements.

Other

Our exposure to non-current investments, defined as foreclosed real estate and invested assets which are delinquent as to interest and/or principal payments, totaled \$48.8 million and \$36.8 million on a fair value basis at March 31, 2016 and December 31, 2015, respectively.

For further information see "Investments" in Part I, Item 1 and "Critical Accounting Estimates" and "Investments" in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2015, and Notes 4 and 5 of the "Notes to Consolidated Financial Statements" contained herein in Item 1.

Liquidity and Capital Resources

Overview

Our liquidity requirements are met primarily by cash flows provided from operations, principally in our insurance subsidiaries. Premium and investment income, as well as maturities and sales of invested assets, provide the primary sources of cash. Debt and/or securities offerings provide additional sources of liquidity. Cash is applied to the payment of policy benefits, costs of acquiring new business (principally commissions), operating expenses, and taxes, as well as purchases of new investments.

We have established an investment strategy that we believe will provide for adequate cash flows from operations. We attempt to match our asset cash flows and durations with expected liability cash flows and durations to meet the funding requirements of our business. However, deterioration in the credit market may delay our ability to sell our positions in certain of our fixed maturity securities in a timely manner and adversely impact the price we receive for such securities, which may negatively impact our cash flows. Furthermore, if we experience defaults on securities held in the investment portfolios of our insurance subsidiaries, this will negatively impact statutory capital, which could reduce our insurance subsidiaries' capacity to pay dividends to our holding companies. A reduction in dividends to our holding companies could force us to seek external financing to avoid impairing our ability to pay dividends to our

stockholders or meet our debt and other payment obligations. As requirements of Dodd-Frank continue to take effect in 2016 and in subsequent years, to the extent that we enter into derivatives that are subject to centralized exchanges and cleared through a regulated clearinghouse, we may be subject to stricter collateral requirements which could have an adverse effect on our overall liquidity.

Our policy benefits are primarily in the form of claim payments, and we have minimal exposure to the policy withdrawal risk associated with deposit products such as individual life policies or annuities. A decrease in demand for our insurance products or an increase in the incidence of new claims or the duration of existing claims could negatively impact our cash flows from operations. However, our historical pattern of benefits paid to revenues is consistent, even during cycles of economic downturns, which serves to minimize liquidity risk.

As previously discussed, we entered into a definitive agreement to acquire Starmount for a purchase price of \$127 million plus net assets received. We expect to fund the acquisition through holding company cash and some incremental debt. The transaction, which we anticipate will close by the end of the third quarter of 2016, is not expected to materially impact our results of operations or financial position for 2016 or alter our share repurchase and common stock dividend strategy.

Cash equivalents and marketable securities held at Unum Group and our intermediate holding companies are a significant source of liquidity for us and were \$478 million and \$475 million at March 31, 2016 and December 31, 2015, respectively. The March 31, 2016 balance, which includes approximately \$61 million held in certain of our foreign subsidiaries in the U.K., was comprised primarily of commercial paper, fixed maturity securities with a current average maturity of 3.4 years, and various money-market funds. No significant restrictions exist on our ability to use or access these funds. We currently have no intent, nor do we foresee a need, to repatriate funds from our foreign subsidiaries in the U.K. We believe we hold domestic resources sufficient to fund our liquidity requirements for the next 12 months. If we repatriate additional funds from our subsidiaries in the U.K., the amounts repatriated would be subject to repatriation tax effects which generally equal the difference in the U.S. tax rate and the U.K. tax rate.

As part of our capital deployment strategy, we have in recent years repurchased shares of Unum Group's common stock, as authorized by our board of directors. Our current share repurchase program was approved by our board of directors in May 2015 and authorizes the repurchase of up to \$750 million of common stock through November 2016, with the pace of repurchase activity to depend upon various factors such as the level of available cash, alternative uses for cash, and our stock price. During the first three months of 2016, we repurchased 3.7 million shares at a cost of \$100 million. The dollar value of shares remaining under the current repurchase program was \$402 million at March 31, 2016. See Note 9 of the "Notes to Consolidated Financial Statements" contained herein in Item 1.

Cash Available from Subsidiaries

Unum Group and certain of its intermediate holding company subsidiaries depend on payments from subsidiaries to pay dividends to stockholders, to pay debt obligations, and/or to pay expenses. These payments by our insurance and non-insurance subsidiaries may take the form of dividends, operating and investment management fees, and/or interest payments on loans from the parent to a subsidiary.

Restrictions under applicable state insurance laws limit the amount of dividends that can be paid to a parent company from its insurance subsidiaries in any 12-month period without prior approval by regulatory authorities. For life insurance companies domiciled in the U.S., that limitation generally equals, depending on the state of domicile, either ten percent of an insurer's statutory surplus with respect to policyholders as of the preceding year end or the statutory net gain from operations, excluding realized investment gains and losses, of the preceding year. The payment of dividends to a parent company from a life insurance subsidiary is generally further limited to the amount of unassigned funds.

Certain of our domestic insurance subsidiaries cede blocks of business to Northwind Reinsurance Company (Northwind Re) and Fairwind Insurance Company (Fairwind), both of which are affiliated captive reinsurance subsidiaries domiciled in the United States with Unum Group as the ultimate parent. The ability of Northwind Re and Fairwind to pay dividends to their respective parent companies will depend on their satisfaction of applicable regulatory requirements and on the performance of the business reinsured by Northwind Re and Fairwind.

The ability of Unum Group and certain of its intermediate holding company subsidiaries to continue to receive dividends from their insurance subsidiaries also depends on additional factors such as RBC ratios and capital

adequacy and/or solvency requirements, funding growth objectives at an affiliate level, and maintaining appropriate capital adequacy ratios to support desired ratings.

Unum Group and/or certain of its intermediate holding company subsidiaries may also receive dividends from our U.K. subsidiaries, the payment of which may be subject to applicable insurance company regulations and capital guidance in the U.K. As of January 1, 2016, Solvency II, a European Union directive that prescribes new capital requirements and risk management standards for the European insurance industry, replaced the previous capital requirements for Unum Limited. Our European holding company is also subject to the Solvency II requirements relevant to insurance holding companies, while its subsidiaries (the Unum European Economic Area (EEA) Group), which includes Unum Limited, are subject to group supervision under Solvency II. The Unum EEA Group received approval from the U.K. Prudential Regulation Authority to use its own internal model for calculating regulatory capital and also received approval for certain associated regulatory

permissions including transitional relief as the Solvency II capital regime is implemented. As a result, there is no material change to capital requirements or to solvency ratios for the Unum EEA Group.

The payment of dividends to the parent company from our subsidiaries also requires the approval of the individual subsidiary's board of directors.

During 2016, we intend to maintain a level of capital in our U.S. and U.K. insurance subsidiaries above the applicable capital adequacy requirements and minimum solvency margins.

Insurance regulatory restrictions do not limit the amount of dividends available for distribution from non-insurance subsidiaries except where the non-insurance subsidiaries are held directly or indirectly by an insurance subsidiary and only indirectly by Unum Group.

Funding for Employee Benefit Plans

During the first three months of 2016 we made contributions of \$20.6 million and £1.0 million to our U.S. and U.K. defined contribution plans, respectively, and expect to make additional contributions of approximately \$49 million and £3 million during the remainder of 2016. We do not expect to make contributions to our U.S. or U.K. qualified defined benefit pension plans during 2016. We have met all minimum pension funding requirements set forth by the Employee Retirement Income Security Act. We have estimated our future funding requirements under the Pension Protection Act of 2006 and under applicable U.K. law and do not believe that any future funding requirements will cause a material adverse effect on our liquidity.

Debt

At March 31, 2016, we had short-term debt of \$351.4 million, consisting of our 7.125% notes due in the third quarter of 2016 and the related deferred debt cost and fair value hedge liability. Our long-term debt balance at March 31, 2016 was \$2,442.5 million and consisted primarily of secured and unsecured senior notes and junior subordinated debt securities. Our short-term and long-term debt carrying values are reduced by deferred debt issuance costs, net of accumulated amortization, of \$0.3 million and \$25.8 million at March 31, 2016, respectively, as a result of our adoption, as of January 1, 2016, of an accounting update issued by the Financial Accounting Standards Board that changes the presentation of such costs on the balance sheet. See Note 2 of the "Notes to Consolidated Financial Statements" contained herein in Item 1 for further information.

Northwind Holdings made principal payments on its floating rate, senior secured non-recourse notes of \$13.2 million in the first three months of 2016.

In March 2016, we amended the terms of our five-year \$400.0 million credit facility, which was previously set to expire in 2018, to extend through March 2021. At March 31, 2016, letters of credit totaling \$2.1 million had been issued from the credit facility, but there were no borrowed amounts outstanding.

There are no significant financial covenants associated with any of our outstanding debt obligations. We continually monitor our compliance with our debt covenants and remain in compliance. We have not observed any current trends that would cause a breach of any debt covenants. See Note 11 of the "Notes to Consolidated Financial Statements" contained herein in Item 1 and "Debt" and Note 8 of the "Notes to Consolidated Financial Statements" contained in Part II, Items 7 and 8, respectively, of our annual report on Form 10-K for the year ended December 31, 2015 for further discussion.

Commitments

At March 31, 2016, we had unfunded unconditional commitments of \$4.8 million to fund tax credit partnership investments and \$22.7 million to fund the purchase of transferable state tax credits. These commitments are recognized as liabilities in our consolidated balance sheets, with a corresponding recognition of other long-term investments and other assets, respectively. In addition, we had commitments of \$107.9 million to fund certain investments in private placement fixed maturity securities, \$282.8 million to fund certain private equity partnerships, and \$83.5 million to fund certain commercial mortgage loans, which may or may not be funded.

With respect to our commitments and off-balance sheet arrangements, see the discussion under "Commitments" in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2015. During the first three months of 2016, there were no substantive changes in our commitments, contractual obligations, or other off-balance sheet arrangements other than the changes noted herein.

Transfers of Financial Assets

Our investment policy permits us to lend fixed maturity securities to unaffiliated financial institutions in short-term securities lending agreements, which increases our investment income with minimal risk. We account for all of our securities lending agreements and repurchase agreements as secured borrowings. We had \$48.8 million of securities lending agreements outstanding at March 31, 2016 which were collateralized by cash and reported as payables for collateral on investments in our consolidated balance sheets. The cash received as collateral was reinvested in short-term investments. The average balance during the first three months of 2016 was \$58.5 million, and the maximum amount outstanding at any month end was \$63.9 million. In addition, at March 31, 2016, we had \$152.2 million of off-balance sheet securities lending agreements which were collateralized by securities that we were neither permitted to sell nor control. The average balance of these off-balance sheet transactions during the first three months of 2016 was \$152.3 million, and the maximum amount outstanding at any month end was \$155.7 million.

We had no repurchase agreements outstanding at March 31, 2016, nor did we utilize any repurchase agreements during the first three months of 2016. Our use of repurchase agreements and securities lending agreements can fluctuate during any given period and will depend on our liquidity position, the availability of long-term investments that meet our purchasing criteria, and our general business needs.

Certain of our U.S. insurance subsidiaries are members of regional Federal Home Loan Banks (FHLB). As of March 31, 2016, we owned \$30.9 million of FHLB common stock and had obtained \$350.0 million in advances from the regional FHLBs for the purpose of purchasing fixed maturity securities.

See Note 4 of the "Notes to Consolidated Financial Statements" contained herein in Item 1 for further information.

Consolidated Cash Flows

(in millions of dollars)

	Three Months	
	Ended March 31	
	2016	2015
Net Cash Provided by Operating Activities	\$293.3	\$400.1
Net Cash Used by Investing Activities	(110.5)	(233.6)
Net Cash Used by Financing Activities	(175.0)	(184.9)
Net Increase (Decrease) in Cash and Bank Deposits	\$7.8	\$(18.4)

Operating Cash Flows

Operating cash flows are primarily attributable to the receipt of premium and investment income, offset by payments of claims, commissions, expenses, and income taxes. Premium income growth is dependent not only on new sales, but on policy renewals and growth of existing business, renewal price increases, and persistency. Investment income growth is dependent on the growth in the underlying assets supporting our insurance reserves and capital and on the earned yield. The level of commissions and operating expenses is attributable to the level of sales and the first year acquisition expenses associated with new business as well as the maintenance of existing business. The level of paid claims is affected partially by the growth and aging of the block of business and also by the general economy, as previously discussed in the operating results by segment.

Investing Cash Flows

Investing cash inflows consist primarily of the proceeds from the sales and maturities of investments. Investing cash outflows consist primarily of payments for purchases of investments. Our investment strategy is to match the cash

flows and durations of our assets with the cash flows and durations of our liabilities to meet the funding requirements of our business. When market opportunities arise we may sell selected securities and reinvest the proceeds to improve the yield and credit quality of our portfolio. We may at times also sell selected securities and reinvest the proceeds to improve the duration matching of our assets and liabilities and/or re-balance our portfolio. As a result, sales before maturity may vary from period to period. The sale and purchase of short-term investments is influenced by our securities lending program and by the amount of cash which is at times

held in short-term investments to facilitate the availability of cash to fund the purchase of appropriate long-term investments and/or to fund our capital deployment program.

See Notes 4 and 5 of the "Notes to Consolidated Financial Statements" contained herein in Item 1 for further information.

Financing Cash Flows

Financing cash flows consist primarily of borrowings and repayments of debt, issuance or repurchase of common stock, and dividends paid to stockholders.

During the first quarters of 2016 and 2015, we made principal payments of \$13.2 million and \$29.1 million, respectively, on our senior secured non-recourse notes issued by Northwind Holdings.

Cash used to repurchase shares of Unum Group's common stock during the first quarters of 2016 and 2015 was \$108.8 million and \$108.1 million, respectively, with a portion of the cash used in the first quarter of 2016 related to the settlement of amounts due on shares purchased in the fourth quarter of 2015. During the first quarters of 2016 and 2015, we paid dividends of \$45.2 million and \$42.3 million, respectively, to holders of Unum Group's common stock.

See Notes 9 and 11 of the "Notes to Consolidated Financial Statements" contained herein in Item 1 and "Debt" contained in this Item 2 for further information.

Ratings

AM Best, Fitch Ratings (Fitch), Moody's Investors Service (Moody's), and Standard & Poor's Rating Services (S&P) are among the third parties that assign issuer credit ratings to Unum Group and financial strength ratings to our insurance subsidiaries. Issuer credit ratings reflect an agency's opinion of the overall financial capacity of a company to meet its senior debt obligations. Financial strength ratings are specific to each individual insurance subsidiary and reflect each rating agency's view of the overall financial strength (capital levels, earnings, growth, investments, business mix, operating performance, and market position) of the insuring entity and its ability to meet its obligations to policyholders. Both the issuer credit ratings and financial strength ratings incorporate quantitative and qualitative analyses by rating agencies and are routinely reviewed and updated on an ongoing basis.

We compete based in part on the financial strength ratings provided by rating agencies. A downgrade of our financial strength ratings can be expected to adversely affect us and could potentially, among other things, adversely affect our relationships with distributors of our products and services and retention of our sales force, negatively impact persistency and new sales, particularly large case group sales and individual sales, and generally adversely affect our ability to compete. A downgrade in the issuer credit rating assigned to Unum Group can be expected to adversely affect our cost of capital or our ability to raise additional capital.

The table below reflects the outlook as well as the issuer credit ratings for Unum Group and the financial strength ratings for each of our traditional insurance subsidiaries as of the date of this filing.

	AM Best	Fitch	Moody's	S&P
Outlook	Stable	Stable	Stable	Stable

NR = not rated

We maintain an ongoing dialogue with the four rating agencies that evaluate us in order to inform them of progress we are making regarding our strategic objectives and financial plans as well as other pertinent issues. A significant component of our communications involves our annual review meeting with each of the four agencies. We hold other meetings throughout the year regarding our business, including, but not limited to, quarterly updates. There have been no changes in any of the rating agencies' outlook statements or ratings during 2016 prior to the date of this filing.

Agency ratings are not directed toward the holders of our securities and are not recommendations to buy, sell, or hold our securities. Each rating is subject to revision or withdrawal at any time by the assigning rating organization, and each rating should be regarded as an independent assessment, not conditional on any other rating. Given the dynamic nature of the ratings process, changes by these or other rating agencies may or may not occur in the near-term. Based on our ongoing dialogue with the rating agencies concerning our insurance risk profile, our financial flexibility, our operating performance, and the quality of our investment portfolio, we do not expect any negative actions from any of the four rating agencies related to either Unum Group's current issuer credit ratings or the financial strength ratings of our insurance subsidiaries. However, in the event that we are unable to meet the rating agency specific guideline values to maintain our current ratings, including but not limited to maintenance of our capital management metrics at the threshold values stated and maintenance of our financial flexibility and operational consistency, we could be placed on a negative credit watch, with a potential for a downgrade to both our issuer credit ratings and our financial strength ratings.

See our annual report on Form 10-K for the year ended December 31, 2015 for further information regarding our debt and financial strength ratings and the risks associated with rating changes.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are subject to various market risk exposures including interest rate risk and foreign exchange rate risk. With respect to our exposure to market risk, see the discussion under "Investments" in Item 2 of this Form 10-Q and in Part II, Item 7A of our annual report on Form 10-K for the year ended December 31, 2015. During the first three months of 2016, there was no substantive change to our market risk or the management of this risk.

ITEM 4. CONTROLS AND PROCEDURES

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this quarterly report. We assessed those controls based on criteria established in the 2013 Internal Control - Integrated Framework from the Committee of Sponsoring Organizations of the Treadway Commission. Based on that evaluation, these officers concluded that our disclosure controls and procedures were effective as of March 31, 2016.

There have been no changes in our internal control over financial reporting, as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended, during the quarter ended March 31, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Refer to Part I, Item 1, Note 10 of the "Notes to Consolidated Financial Statements" for information on legal proceedings.

ITEM 1A. RISK FACTORS

There have been no material changes from the risk factors disclosed in our annual report on Form 10-K for the year ended December 31, 2015.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table provides information about our share repurchase activity for the first quarter of 2016:

	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share (1)	(c) Total Number of Shares Purchased as Part of Publicly Announced Program (2)	(d) Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program (2)
January 1, 2016 - January 31, 2016	—	\$	—	\$ 502,346,496
February 1 - February 29, 2016	3,045,000	26.63	3,045,000	421,250,427
March 1 - March 31, 2016	612,100	30.90	612,100	402,336,097
Total	3,657,100		3,657,100	

(1) The average price paid per share excludes the cost of commissions.

(2) In May 2015, our board of directors authorized the repurchase of up to \$750 million of Unum Group's common stock through November 21, 2016.

ITEM 6. EXHIBITS

Index to Exhibits

- Exhibit 3.1 Amended and Restated Bylaws of Unum Group, effective February 24, 2016 (incorporated by reference to Exhibit 3.1 of Unum Group's Form 8-K filed on February 26, 2016).
- Exhibit 10.1 Second Amendment to Credit Agreement, dated as of March 16, 2016, among Unum Group, as Borrower, the lenders party thereto, and Wells Fargo Bank, National Association, as Administrative Agent.
- Exhibit 10.2 Form of Restricted Stock Unit Agreement with Employee for awards in 2016 under the Unum Group Stock Incentive Plan of 2012.
- Exhibit 10.3 Form of Performance Share Unit Agreement with Employee for awards in 2016 under the Unum Group Stock Incentive Plan of 2012.
- Exhibit 31.1 Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- Exhibit 31.2 Certification of Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- Exhibit 32.1 Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- Exhibit 32.2 Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- Exhibit 101 The following financial statements from Unum Group's Quarterly Report on Form 10-Q for the quarter ended March 31, 2016, filed on April 28, 2016, formatted in XBRL: (i) Consolidated Balance Sheets, (ii) Consolidated Statements of Income, (iii) Consolidated Statements of Comprehensive Income, (iv) Consolidated Statements of Stockholders' Equity, (v) Consolidated Statements of Cash Flows, (vi) the Notes to Consolidated Financial Statements.
