KULICKE AND SOFFA INDUSTRIES, INC.
(Exact name of registrant as specified in its charter)

PENNSYLVANIA 23-1498399
(State or other jurisdiction of incorporation) (IRS Employer
Identification No.)

23A Serangoon North, Avenue 5, #01-01 K&S Corporate Headquarters, Singapore 554369
(Address of principal executive offices and Zip Code)

(215) 784-7518
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting
company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes
" No ý

As of January 23, 2015, there were 76,771,266 shares of the Registrant's Common Stock, no par value, outstanding.

KULICKE AND SOFFA INDUSTRIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited

NOTE 1: BASIS OF PRESENTATION

These consolidated financial statements include the accounts of Kulicke and Soffa Industries, Inc. and its subsidiaries (the "Company"), with appropriate elimination of intercompany balances and transactions.

The interim consolidated financial statements are unaudited and, in management's opinion, include all adjustments (consisting only of normal and recurring adjustments) necessary for a fair presentation of results for these interim periods. The interim consolidated financial statements do not include all of the information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles ("GAAP") and should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended September 27, 2014, filed with the Securities and Exchange Commission, which includes Consolidated Balance Sheets as of September 27, 2014 and September 28, 2013, and the related Consolidated Statements of Operations, Statements of Other Comprehensive Income, Changes in Shareholders' Equity and Cash Flows for each of the years in the three-year period ended September 27, 2014. The results of operations for any interim period are not necessarily indicative of the results of operations for any other interim period or for a full year.

Fiscal Year

Each of the Company's first three fiscal quarters end on the Saturday that is 13 weeks after the end of the immediately preceding fiscal quarter. The fourth quarter of each fiscal year ends on the Saturday closest to September 30th. Fiscal 2015 quarters end on December 27, 2014, March 28, 2015, June 27, 2015 and October 3, 2015. Fiscal 2014 quarters ended on December 28, 2013, March 29, 2014, June 28, 2014 and September 27, 2014. In fiscal years consisting of 53 weeks, the fourth quarter will consist of 14 weeks.

Nature of Business

The Company designs, manufactures and sells capital equipment and expendable tools as well as services, maintains, repairs and upgrades equipment, all used to assemble semiconductor devices. The Company's operating results depend upon the capital and operating expenditures of semiconductor device manufacturers, outsourced semiconductor assembly and test providers ("OSATs"), and other electronics manufacturers including automotive electronics suppliers, worldwide which, in turn, depend on the current and anticipated market demand for semiconductors and products utilizing semiconductors. The semiconductor industry is highly volatile and experiences downturns and slowdowns which can have a severe negative effect on the semiconductor industry's demand for semiconductor capital equipment, including assembly equipment manufactured and sold by the Company and, to a lesser extent, expendable tools, including those sold by the Company. These downturns and slowdowns have in the past adversely affected the Company's operating results. The Company believes such volatility will continue to characterize the industry and the Company's operations in the future.

Use of Estimates

The preparation of consolidated financial statements requires management to make assumptions, estimates and judgments that affect the reported amounts of assets and liabilities, net revenue and expenses during the reporting periods, and disclosures of contingent assets and liabilities as of the date of the consolidated financial statements. On an ongoing basis, management evaluates estimates, including but not limited to, those related to accounts receivable, reserves for excess and obsolete inventory, carrying value and lives of fixed assets, goodwill and intangible assets, valuation allowances for deferred tax assets and deferred tax liabilities, repatriation of un-remitted foreign subsidiary earnings, equity-based compensation expense, and warranties. Management bases its estimates on historical experience and on various other assumptions believed to be reasonable. As a result, management makes judgments regarding the carrying values of its assets and liabilities that are not readily apparent from other sources. Authoritative pronouncements, historical experience and assumptions are used as the basis for making estimates, and on an ongoing basis, management evaluates these estimates. Actual results may differ from these estimates.

Vulnerability to Certain Concentrations

Financial instruments which may subject the Company to concentrations of credit risk as of December 27, 2014 and September 27, 2014 consisted primarily of short-term investments and trade receivables. The Company manages credit risk associated with investments by investing its excess cash in highly rated debt instruments of the U.S. Government and its agencies, financial institutions, and corporations. The Company has established investment guidelines relative to diversification and maturities designed to maintain safety and liquidity. These guidelines are periodically reviewed and modified as appropriate. The Company does not have any exposure to sub-prime financial instruments or auction rate securities.

Table of Contents

KULICKE AND SOFFA INDUSTRIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited (continued)

The Company's trade receivables result primarily from the sale of semiconductor equipment, related accessories and replacement parts, and expendable tools to a relatively small number of large manufacturers in a highly concentrated industry. Write-offs of uncollectible accounts have historically not been significant; however, the Company monitors its customers' financial strength to reduce the risk of loss.

The Company's products are complex and require raw materials, components and subassemblies having a high degree of reliability, accuracy and performance. The Company relies on subcontractors to manufacture many of these components and subassemblies and it relies on sole source suppliers for some important components and raw material inventory.

Foreign Currency Translation

The majority of the Company's business is transacted in U.S. dollars; however, the functional currencies of some of the Company's subsidiaries are their local currencies. In accordance with ASC No. 830, Foreign Currency Matters ("ASC 830"), for a subsidiary of the Company that has a functional currency other than the U.S. dollar, gains and losses resulting from the translation of the functional currency into U.S. dollars for financial statement presentation are not included in determining net income, but are accumulated in the cumulative translation adjustment account as a separate component of shareholders' equity (accumulated other comprehensive income (loss)). Under ASC 830, cumulative translation adjustments are not adjusted for income taxes as they relate to indefinite investments in non-U.S. subsidiaries. Gains and losses resulting from foreign currency transactions are included in the determination of net income.

The Company's operations are exposed to changes in foreign currency exchange rates due to transactions denominated in currencies other than the location's functional currency. The Company is also exposed to foreign currency fluctuations that impact the remeasurement of net monetary assets of those operations whose functional currency, the U.S. dollar, differs from their respective local currencies, most notably in Israel, Malaysia, Singapore and Switzerland. In addition to net monetary remeasurement, the Company has exposures related to the translation of subsidiary financial statements from their functional currency, the local currency, into its reporting currency, the U.S. dollar, most notably in China, Taiwan, Japan and Germany. The Company's U.S. operations also have foreign currency exposure due to net monetary assets denominated in currencies other than the U.S. dollar.

Derivative Financial Instruments

The Company's primary objective for holding derivative financial instruments is to manage the fluctuation in foreign exchange rates and accordingly is not speculative in nature. The Company's international operations are exposed to changes in foreign exchange rates as described above. The Company has established a program to monitor the forecasted transaction currency risk to protect against foreign exchange rate volatility. Generally, the Company uses foreign exchange forward contracts in these hedging programs. These instruments, which have maturities of up to six months, are recorded at fair value and are included in prepaid expenses and other current assets, or other accrued expenses and other current liabilities.

Our accounting policy for derivative financial instruments is based on whether they meet the criteria for designation as a cash flow hedge. A designated hedge with exposure to variability in the functional currency equivalent of the future foreign currency cash flows of a forecasted transaction is referred to as a cash flow hedge. The criteria for designating a derivative as a cash flow hedge include the assessment of the instrument's effectiveness in risk reduction, matching of the derivative instrument to its underlying transaction, and the assessment of the probability that the underlying transaction will occur. For derivatives with cash flow hedge accounting designation, we report the after-tax gain / (loss) from the effective portion of the hedge as a component of accumulated other comprehensive income / (loss) and reclassify it into earnings in the same period in which the hedged transaction affects earnings and in the same line item on the consolidated statement of income as the impact of the hedged transaction. Derivatives that we designate as cash flow hedges are classified in the consolidated statement of cash flows in the same section as the underlying item, primarily within cash flows from operating activities.

The hedge effectiveness of these derivative instruments is evaluated by comparing the cumulative change in the fair value of the hedge contract with the cumulative change in the fair value of the forecasted cash flows of the hedged item.

If a cash flow hedge is discontinued because it is no longer probable that the original hedged transaction will occur as previously anticipated, the cumulative unrealized gain or loss on the related derivative is reclassified from accumulated other comprehensive income / (loss) into earnings. Subsequent gain / (loss) on the related derivative instrument is recognized into earnings in each period until the instrument matures, is terminated, is re-designated as a qualified cash flow hedge, or is sold. Ineffective portions of cash flow hedges, as well as amounts excluded from the assessment of effectiveness, are recognized in earnings.

Table of Contents

KULICKE AND SOFFA INDUSTRIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited (continued)

Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less when purchased to be cash equivalents. Cash equivalents are measured at fair value based on level one measurement, or quoted market prices, as defined by ASC No. 820, Fair Value Measurements and Disclosures. As of December 27, 2014 and September 27, 2014, fair value approximated the cost basis for cash equivalents.

Investments

Investments, other than cash equivalents, are classified as “trading,” “available-for-sale” or “held-to-maturity,” in accordance with ASC No. 320, Investments-Debt & Equity Securities, and depending upon the nature of the investment, its ultimate maturity date in the case of debt securities, and management's intentions with respect to holding the securities. Investments classified as “trading” are reported at fair market value, with unrealized gains or losses included in earnings. Investments classified as “available-for-sale” are reported at fair market value, with net unrealized gains or losses reflected as a separate component of shareholders' equity (accumulated other comprehensive income (loss)). The fair market value of trading and available-for-sale securities is determined using quoted market prices at the balance sheet date. Investments classified as held-to-maturity are reported at amortized cost. Realized gains and losses are determined on the basis of specific identification of the securities sold.

Allowance for Doubtful Accounts

The Company maintains allowances for doubtful accounts for estimated losses resulting from its customers' failure to make required payments. If the financial condition of the Company's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. The Company is also subject to concentrations of customers and sales to a few geographic locations, which could also impact the collectability of certain receivables. If global or regional economic conditions deteriorate or political conditions were to change in some of the countries where the Company does business, it could have a significant impact on the results of operations, and the Company's ability to realize the full value of its accounts receivable.

Inventories

Inventories are stated at the lower of cost (on a first-in first-out basis) or market value. The Company generally provides reserves for obsolete inventory and for inventory considered to be in excess of demand. Demand is generally defined as 18 months forecasted future consumption for equipment, 24 months forecasted future consumption for all spare parts, and 12 months forecasted future consumption for expendable tools. Forecasted consumption is based upon internal projections, historical sales volumes, customer order activity and a review of consumable inventory levels at customers' facilities. The Company communicates forecasts of its future consumption to its suppliers and adjusts commitments to those suppliers accordingly. If required, the Company reserves the difference between the carrying value of its inventory and the lower of cost or market value, based upon projections about future consumption, and market conditions. If actual market conditions are less favorable than projections, additional inventory reserves may be required.

Property, Plant and Equipment

Property, plant and equipment are carried at cost. The cost of additions and those improvements which increase the capacity or lengthen the useful lives of assets are capitalized, while repair and maintenance costs are expensed as incurred. Depreciation and amortization are provided on a straight-line basis over the estimated useful lives as follows: buildings 25 years; machinery and equipment 3 to 10 years; and leasehold improvements are based on the shorter of the life of lease or life of asset. Purchased computer software costs related to business and financial systems are amortized over a five-year period on a straight-line basis.

Valuation of Long-Lived Assets

In accordance with ASC No. 360, Property, Plant & Equipment ("ASC 360"), the Company's property, plant and equipment is tested for impairment based on undiscounted cash flows when triggering events occur, and if impaired, written-down to fair value based on either discounted cash flows or appraised values. ASC 360 also provides a single

accounting model for long-lived assets to be disposed of by sale and establishes additional criteria that would have to be met to classify an asset as held for sale. The carrying amount of an asset or asset group is not recoverable to the extent it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset or asset group. Estimates of future cash flows used to test the recoverability of a long-lived asset or asset group must incorporate the entity's own assumptions about its use of the asset or asset group and must factor in all available evidence.

ASC 360 requires that long-lived assets be tested for recoverability whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. Such events include significant under-performance relative to historical internal forecasts or projected future operating results; significant changes in the manner of use of the assets; significant negative industry

Table of Contents

KULICKE AND SOFFA INDUSTRIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited (continued)

or economic trends; and significant changes in market capitalization. During the three months ended December 27, 2014, no triggering events occurred.

Accounting for Impairment of Goodwill

The Company operates two reportable segments: Equipment and Expendable Tools. Goodwill was recorded in 2009 for the acquisition of Orthodyne Electronics Corporation ("Orthodyne"), which added wedge bonder products (also known as "reporting unit") to the Equipment business.

Accounting Standard Update 2011-08, Testing Goodwill for Impairment ("ASU 2011-08"), provides companies with the option to assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If, after assessing the qualitative factors, a company determines that it is not more likely than not that the fair value of a reporting unit is less than its carrying value, then performing the two-step impairment test is unnecessary. However, if a company concludes otherwise, then it is required to perform the first step of the two-step goodwill impairment test. If the carrying value of a reporting unit exceeds its fair value in the first step of the test, then a company is required to perform the second step of the goodwill impairment test to measure the amount of the reporting unit's goodwill impairment loss, if any.

As part of the annual evaluation, the Company performs an impairment test of its goodwill in the fourth quarter of each fiscal year to coincide with the completion of its annual forecasting and refreshing of its business outlook processes. On an ongoing basis, the Company monitors if a "triggering" event has occurred that may have the effect of reducing the fair value of a reporting unit below its respective carrying value. Adverse changes in expected operating results and/or unfavorable changes in other economic factors used to estimate fair values could result in a non-cash impairment charge in the future. During the three months ended December 27, 2014, no triggering events occurred. Impairment assessments inherently involve judgment as to the assumptions made about the expected future cash flows and the impact of market conditions on those assumptions. Future events and changing market conditions may impact the assumptions as to prices, costs, growth rates or other factors that may result in changes in the estimates of future cash flows. Although the Company believes the assumptions that it has used in testing for impairment are reasonable, significant changes in any one of the assumptions could produce a significantly different result. Indicators of potential impairment may lead the Company to perform interim goodwill impairment assessments, including significant and unforeseen customer losses, a significant adverse change in legal factors or in the business climate, a significant adverse action or assessment by a regulator, a significant stock price decline or unanticipated competition.

For further information on goodwill and other intangible assets, see Note 3 below.

Revenue Recognition

In accordance with ASC No. 605, Revenue Recognition, the Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the price is fixed or determinable, the collectability is reasonably assured, and customer acceptance, when applicable, has been received or we otherwise have been released from customer acceptance obligations. If terms of the sale provide for a customer acceptance period, revenue is recognized upon the expiration of the acceptance period or customer acceptance, whichever occurs first. The Company's standard terms are ex works (the Company's factory), with title transferring to its customer at the Company's loading dock or upon embarkation. The Company has a small percentage of sales with other terms, and revenue is recognized in accordance with the terms of the related customer purchase order.

Shipping and handling costs billed to customers are recognized in net revenue. Shipping and handling costs paid by the Company are included in cost of sales.

Research and Development

The Company charges research and development costs associated with the development of new products to expense when incurred. In certain circumstances, pre-production machines which the Company intends to sell are carried as inventory until sold.

Table of Contents

KULICKE AND SOFFA INDUSTRIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited (continued)

Income Taxes

In accordance with ASC No. 740, Income Taxes, deferred income taxes are determined using the liability method. The Company records a valuation allowance to reduce its deferred tax assets to the amount it expects is more likely than not to be realized. While the Company has considered future taxable income and its ongoing tax planning strategies in assessing the need for the valuation allowance, if it were to determine that it would be able to realize its deferred tax assets in the future in excess of its net recorded amount, an adjustment to the deferred tax asset would increase income in the period when such determination is made. Likewise, should the Company determine it would not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the deferred tax asset would decrease income in the period when such determination is made.

In accordance with ASC No. 740 Topic 10, Income Taxes, General (“ASC 740.10”), the Company accounts for uncertain tax positions taken or expected to be taken in its income tax return. Under ASC 740.10, the Company utilizes a two-step approach for evaluating uncertain tax positions. Step one, or recognition, requires a company to determine if the weight of available evidence indicates a tax position is more likely than not to be sustained upon audit, including resolution of related appeals or litigation processes, if any. Step two, or measurement, is based on the largest amount of benefit, which is more likely than not to be realized on settlement with the taxing authority.

Equity-Based Compensation

The Company accounts for equity-based compensation under the provisions of ASC No. 718, Compensation - Stock Compensation (“ASC 718”). ASC 718 requires the recognition of the fair value of the equity-based compensation in net income. Compensation expense associated with market-based restricted stock is determined using a Monte-Carlo valuation model, and compensation expense associated with time-based and performance-based restricted stock is determined based on the number of shares granted and the fair value on the date of grant. The fair value of the Company's stock option awards are estimated using a Black-Scholes option valuation model. In addition, the calculation of equity-based compensation costs requires that the Company estimate the number of awards that will be forfeited during the vesting period. The fair value of equity-based awards is amortized over the vesting period of the award and the Company elected to use the straight-line method for awards granted after the adoption of ASC 718.

Earnings per Share

Earnings per share (“EPS”) are calculated in accordance with ASC No. 260, Earnings per Share. Basic EPS include only the weighted average number of common shares outstanding during the period. Diluted EPS includes the weighted average number of common shares and the dilutive effect of stock options, restricted stock and share unit awards and convertible subordinated notes outstanding during the period, when such instruments are dilutive.

In accordance with ASC No. 260.10.55, Earnings per Share - Implementation & Guidance, the Company treats all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends as participating in undistributed earnings with common shareholders. Awards of this nature are considered participating securities and the two-class method of computing basic and diluted EPS must be applied.

Recent Accounting Pronouncements

There were no new accounting pronouncements applicable to the Company during the three months ended December 27, 2014.

The following tables reflect the components of significant balance sheet accounts as of December 27, 2014 and September 27, 2014:

(in thousands)	As of December 27, 2014	September 27, 2014
Short term investments, available-for-sale:		
Deposits maturing within one year (1)	\$10,787	\$9,105
Inventories, net:		
Raw materials and supplies	\$22,712	\$22,184
Work in process	24,545	18,783
Finished goods	18,203	22,590
	65,460	63,557
Inventory reserves	(13,530) (13,863
	\$51,930	\$49,694
Property, plant and equipment, net:		
Buildings and building improvements	\$31,178	\$31,159
Leasehold improvements	13,873	13,962
Data processing equipment and software	27,612	27,538
Machinery, equipment, furniture and fixtures	47,593	45,442
	120,256	118,101
Accumulated depreciation	(67,463) (65,346
	\$52,793	\$52,755
Accrued expenses and other current liabilities:		
Wages and benefits	\$13,355	\$21,498
Accrued customer obligations (2)	6,347	8,999
Commissions and professional fees	2,314	1,961
Deferred rent	2,422	2,161
Severance	617	1,067
Other	7,489	8,045
	\$32,544	\$43,731

All short-term investments were classified as available-for-sale and were measured at fair value based on level one measurement, or quoted market prices, as defined by ASC 820. As of December 27, 2014 and September 27, 2014, (1) fair value approximated the cost basis for short-term investments. The Company did not recognize any realized gains or losses on the sale of investments during the three months ended December 27, 2014 and December 28, 2013.

(2) Represents customer advance payments, customer credit program, accrued warranty expense and accrued retrofit obligations.

NOTE 3: GOODWILL AND INTANGIBLE ASSETS

Goodwill

Intangible assets classified as goodwill are not amortized. The Company performs an annual impairment test of its goodwill during the fourth quarter of each fiscal year, which coincides with the completion of its annual forecasting and refreshing of business outlook process. The Company performed its annual impairment test in the fourth quarter

of fiscal 2014 and concluded that no impairment charge was required. During the three months ended December 27, 2014, the Company reviewed the qualitative factors to ascertain if a "triggering" event may have taken place that may have the effect of reducing the fair value of the reporting unit below its carrying value and concluded that no triggering event had occurred.

Table of ContentsKULICKE AND SOFFA INDUSTRIES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Unaudited (continued)

In 2009, the Company acquired Orthodyne and added wedge bonder products to the business.

Intangible Assets

Intangible assets with determinable lives are amortized over their estimated useful lives. The Company's intangible assets consist primarily of wedge bonder developed technology and customer relationships.

The following table reflects net intangible assets as of December 27, 2014 and September 27, 2014:

(dollar amounts in thousands)	As of December 27, 2014	September 27, 2014	Average estimated useful lives (in years)
Wedge bonder developed technology	\$33,200	\$33,200	7.0
Accumulated amortization	(29,644) (28,458)
Net wedge bonder developed technology	\$3,556	\$4,742	
Wedge bonder customer relationships	\$19,300	\$19,300	5.0

NOTE 5: FAIR VALUE MEASUREMENTS

Accounting standards establish three levels of inputs that may be used to measure fair value: quoted prices in active markets for identical assets or liabilities (referred to as Level 1), inputs other than Level 1 that are observable for the asset or liability either directly or indirectly (referred to as Level 2) and unobservable inputs to the valuation methodology that are significant to the measurement of fair value of assets or liabilities (referred to as Level 3).

Assets and Liabilities Measured and Recorded at Fair Value on a Recurring Basis

We measure certain financial assets and liabilities at fair value on a recurring basis. There were no transfers between fair value measurement levels during the three months months ended December 27, 2014.

Table of Contents

KULICKE AND SOFFA INDUSTRIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited (continued)

Fair Value Measurements on a Nonrecurring Basis

Our non-financial assets such as intangible assets and property, plant and equipment are carried at cost unless impairment is deemed to have occurred.

Fair Value of Financial Instruments

Amounts reported as cash and equivalents, short-term investments, accounts receivables, prepaid expenses and other current assets, accounts payable and accrued expenses approximate fair value.

The fair value of our financial assets and liabilities at December 27, 2014 were determined using the following inputs: (in thousands)

	Fair Value Measurements at Reporting Date Using			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Cash	\$ 131,263	\$ 131,263	\$—	\$—
Cash equivalents:

NOTE 6: DERIVATIVE FINANCIAL INSTRUMENTS

The Company's international operations are exposed to changes in foreign exchange rates due to transactions denominated in currencies other than U.S. dollars. Most of the Company's revenue and cost of materials are transacted in U.S. dollars. However, a significant amount of the Company's operating expenses are denominated in local

currencies, primarily in Singapore.

The foreign currency exposure of our operating expenses are generally hedged with foreign exchange forward contracts. The Company's foreign exchange risk management programs include using foreign exchange forward contracts with cash flow hedge accounting designation to hedge exposures to the vari

Table of ContentsKULICKE AND SOFFA INDUSTRIES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Unaudited (continued)

ability in the U.S.-dollar equivalent of forecasted non-U.S.-dollar-denominated operating expenses. These instruments generally mature within 6 months. For these derivatives, we report the after-tax gain or loss from the effective portion of the hedge as a component of accumulated other comprehensive income (loss), and we reclassify it into earnings in the same period or periods in which the hedged transaction affects earnings and in the same line item on the consolidated statements of income as the impact of the hedged transaction.

The fair value of derivative instruments on our Consolidated Balance Sheets as of December 27, 2014 was as follows:

(in thousands)	As of December 27, 2014		
	Notional Amount	Fair Value Asset Derivatives ⁽¹⁾	Fair Value Liability Derivatives ⁽²⁾
Derivatives designated as hedging instruments:			
Foreign exchange forward contracts (3)	\$9,537	\$—	\$392
Total derivatives	\$9,537	\$—	\$392

(1) The fair value of derivative assets is measured using level 2 fair value inputs and is included in prepaid expenses and other current assets on our Consolidated Balance Sheets.

(2) Included in accrued expenses and other current liabilities on our Consolidated Balance Sheets.

(3) Hedged amounts expected to be recognized to income within the next twelve months.

The effect of derivative instruments designated as cash flow hedges in our Consolidated Statements of Income for the three months months ended December 27, 2014 was as follows:

(in thousands)	Three months ended December 27, 2014
Foreign exchange forward contract in cash flow hedging relationships:	
Net loss recognized in OCI, net of tax ⁽¹⁾	\$(640)
Net loss reclassified from accumulated OCI into income, net of tax ⁽²⁾	\$(249)
Net gain recognized in income ⁽³⁾	\$—

(1) Net change in the fair value of the effective portion classified in other comprehensive income (“OCI”).

(2) Effective portion classified as selling, general and administrative expense.

(3) Ineffective portion and amount excluded from effectiveness testing classified in selling, general and administrative expense.

KULICKE AND SOFFA INDUSTRIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited (continued)

NOTE 7: DEBT AND OTHER OBLIGATIONS

Financing obligation

On December 1, 2013, Kulicke & Soffa Pte Ltd. ("Pte"), the Company's wholly owned subsidiary, signed a lease with DBS Trustee Limited as trustee of Mapletree Industrial Trust (the "Landlord") to lease from the Landlord approximately 198,000 square feet, representing approximately 70% of a building in Singapore as our corporate headquarters, manufacturing, technology, sales and service center (the "Building"). The lease has a 10 year non-cancellable term (the "Initial Term") and contains options to renew for 2 further 10 -year terms. The annual rent and service charge for the Initial Term range from approximately \$4 million to approximately \$5 million Singapore dollars.

Pursuant to the agreement to develop and lease (the "ADL") and in accordance with ASC No. 840, Leases ("ASC 840"), the Company was considered to be the owner of the Building during the construction phase due to its involvement in the asset construction. Following the completion of construction, we performed a sale-leaseback analysis pursuant to ASC 840-40 to determine if we could remove the Landlord's asset and associated financing obligation from the consolidated balance sheet. Our lease contained collateral, considered a prohibited form of continuing involvement under ASC 840-40 and therefore involvement that precluded us from derecognizing the asset and associated financing obligation. As such, we reclassified the asset from construction in progress to Property, Plant and Equipment and began to depreciate the building over its estimated useful life of twenty-five years. We concluded that the term of the financing obligation is 10 years. This is equal to the non-cancellable term of our lease agreement with the Landlord. At the inception of the lease, the asset and financing obligation recorded on the balance sheet was \$20.0 million, which was based on using an interest rate of 6.3% over the Initial Term. The financing obligation will be settled through a combination of periodic cash rental payments and the return of the leased property at the expiration of the lease. We do not report rent expense for the property which is deemed owned for accounting purposes. Rather, rental payments required under the lease are considered debt service and applied to the deemed landlord financing obligation and interest expense. The Building and financing obligation are being amortized in a manner that will not generate a gain or loss upon lease termination.

Credit facility

On November 22, 2013, the Company obtained a \$5.0 million credit facility with Citibank in connection with the issuance of a bank guarantee of \$3.4 million Singapore dollars to the Landlord in connection with the lease. The bank guarantee was effective from December 1, 2013 to November 30, 2014. On November 19, 2014, the Company extended the expiration date of the bank guarantee to November 30, 2015 and increased the amount to \$3.5 million Singapore dollars.

NOTE 8: SHAREHOLDERS' EQUITY AND EMPLOYEE BENEFIT PLANS

Common Stock and 401(k) Retirement Income Plan

The Company has a 401(k) retirement income plan (the "Plan") for its employees. Historically, the Company's matching contributions to the Plan were made in the form of issued and contributed shares of Company common stock; however, beginning January 2, 2011, matching contributions to the Plan were made in cash instead of stock. The Plan allows for employee contributions and matching Company contributions up to 4% or 6% of the employee's contributed amount based upon years of service.

The following table reflects the Company's matching contributions to the Plan during the three months ended December 27, 2014 and December 28, 2013:

(in thousands)	Three months ended	
	December 27, 2014	December 28, 2013
Cash	\$295	\$281
Stock Repurchase Program		

On August 14, 2014, the Company's Board of Directors authorized a program (the "Program") to repurchase up to \$100 million of the Company's common stock on or before August 14, 2017. The Company has entered into a written trading plan under Rule 10b5-1 of the Exchange Act, to facilitate repurchases under the Program. The Program may be suspended or discontinued at any time and will be funded using the Company's available cash. Under the Program, shares may be repurchased through open market and/or privately negotiated transactions at prices deemed appropriate by management. The timing and amount of repurchase transactions under this program will depend on market conditions as well as corporate and regulatory considerations. During the three months ended December 27, 2014, the Company repurchased a total of 0.6 million shares of common stock at a cost of \$7.6 million. The stock repurchases were recorded in the periods they were delivered, and the payment of \$7.6 million was accounted for as treasury stock in the Company's Consolidated Balance Sheet. The Company records treasury stock purchases under the cost method using the first-in, fir

Table of Contents

KULICKE AND SOFFA INDUSTRIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited (continued)

st-out (FIFO) method. Upon reissuance of treasury stock, amounts in excess of the acquisition cost are credited to additional paid-in capital. If the Company reissues treasury stock at an amount below its acquisition cost and additional paid-in capital associated with prior treasury stock transactions is insufficient to cover the difference between acquisition cost and the reissue price, this difference is recorded against retained earnings.

Accumulated Other Comprehensive Income

The following table reflects accumulated other comprehensive income reflected on the Consolidated Balance Sheets as of December 27, 2014 and September 27, 2014:

(in thousands)	As of	
	December 27, 2014	September 27, 2014
Gain from foreign currency translation adjustments	\$2,520	\$3,199
Unrecognized actuarial loss Switzerland pension plan, net of tax	(609)	(609)
Switzerland pension plan curtailment	(346)	(346)
Unrealized loss on hedging	(392)	—
Accumulated other comprehensive income	\$1,173	\$2,244

Equity-Based Compensation

As of December 27, 2014, the Company had seven equity-based employee compensation plans (the “Employee Plans”) and three director compensation plans (the “Director Plans”) (collectively, the “Plans”). Under these Plans, market-based share awards (collectively, “market-based restricted stock”), time-based share awards (collectively, “time-based restricted stock”), performance-based share awards (collectively, “performance-based restricted stock”), stock options, or common stock have been granted at 100% of the market price of the Company's common stock on the date of grant. As of December 27, 2014, the Company's one active plan, the 2009 Equity Plan, had 3.1 million shares of common stock available for grant to its employees and directors.

Market-based restricted stock entitles the employee to receive common shares of the Company on the award vesting date, if market performance objectives which measure relative total shareholder return (“TSR”) are attained. Relative TSR is calculated based upon the 90-calendar day average price of the Company's stock as compared to specific peer companies that comprise the Philadelphia Semiconductor Index. TSR is measured for the Company and each peer company over a performance period, which is generally three years. Vesting percentages range from 0% to 200% of awards granted. The provisions of the market-based restricted stock are reflected in the grant date fair value of the award; therefore, compensation expense is recognized regardless of whether or not the market condition is ultimately satisfied. Compensation expense is reversed if the award is forfeited prior to the vesting date.

In general, stock options and time-based restricted stock awarded to employees vest annually over a three-year period provided the employee remains employed by the Company. The Company follows the non-substantive vesting method for stock options and recognizes compensation expense immediately for awards granted to retirement eligible employees, or over the period from the grant date to the date retirement eligibility is achieved.

In general, performance-based restricted stock (“PSU”) entitles the employee to receive common shares of the Company on the three-year anniversary of the grant date (if employed by the Company) if return on invested capital and revenue growth targets set by the Management Development and Compensation Committee (“MDCC”) of the Board of Directors on the date of grant are met. If return on invested capital and revenue growth targets are not met, performance-based restricted stock does not vest. Certain PSUs vest based on achievement of strategic goals over a certain time period or periods set by the MDCC. If the strategic goals are not achieved, the PSUs do not vest.

Equity-based compensation expense recognized in the Consolidated Statements of Operations for the three months ended December 27, 2014 and December 28, 2013 was based upon awards ultimately expected to vest. In accordance with ASC No. 718, Stock Based Compensation, forfeitures have been estimated at the time of grant and were based upon historical experience. The Company reviews the forfeiture rates periodically and makes adjustments as

necessary.

Total equity-based compensation expense	\$3,435	\$3,396

NOTE 9: EARNINGS PER SHARE

Basic income (loss) per share is calculated using the weighted average number of shares of common stock outstanding during the period. Stock options and restricted stock are included in the calculation of diluted earnings per share, except when their effect would be anti-dilutive. For the three months ended December 28, 2013, 0.1 million stock options and 0.8 million restricted stocks were excluded due to the Company's net loss.

Diluted income (loss) per share is calculated using the weighted average number of shares of common stock outstanding during the period and, if there is net income during the period, the dilutive impact of common stock equivalents outstanding during the period.

Table of ContentsKULICKE AND SOFFA INDUSTRIES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Unaudited (continued)

The following tables reflect a reconciliation of the shares used in the basic and diluted net income (loss) per share computation for the three months ended December 27, 2014 and December 28, 2013:

(in thousands, except per share data)	Three months ended		December 28, 2013	
	December 27, 2014		Basic	Diluted
	Basic	Diluted	Basic	Diluted
NUMERATOR:				
Net income / (loss)	\$7,842	\$7,842	\$(1,957)	\$(1,957)
DENOMINATOR:				
Weighted average shares outstanding - Basic	76,888	76,888	75,912	75,912
Stock options		94	—	—

EPS:				
Net income / (loss) per share - Basic	\$0.10	\$0.10	\$(0.03)	\$(0.03)
Effect of dilutive shares		—		—
Net income / (loss) per share - Diluted		\$0.10		\$(0.03)

NOTE 10: INCOME TAXES

The following table reflects the provision for income taxes and the effective tax rate for the three months ended December 27, 2014 and December 28, 2013:

(dollar amounts in thousands)	Three months ended	
	December 27, 2014	December 28, 2013
Income / (loss) from operations before income taxes	\$9,685	\$(2,048)
Provision (benefit) for income taxes	1,843	(91)
Net income / (loss)	\$7,842	\$(1,957)
Effective tax rate	19.0	% 4.4 %

For the three months ended December 27, 2014, the effective income tax rate differed from the federal statutory tax rate primarily due to profits from foreign operations subject to a lower statutory tax rate than the U.S. statutory tax rate, and the impact of tax holidays, offset by an increase for deferred taxes on unremitted earnings, other U.S. deferred taxes and foreign withholding taxes.

For the three months ended December 28, 2013, the effective income tax rate differed from the federal statutory tax rate primarily due to profits from foreign operations subject to a lower statutory tax rate than the U.S. statutory tax rate, and the impact of tax holidays, offset by an increase for deferred taxes on unremitted earnings, other U.S. deferred taxes and additional foreign expenses or benefits related to returns filed in the period.

The effective tax rate for the period ended December 27, 2014 of 19.0% increased from the effective rate for the fiscal period ended September 27, 2014 of 18.3% primarily due to higher volume of local sales, which has a higher statutory tax rate. The Company's future effective tax rate would be affected if earnings were lower than anticipated in countries where it has lower statutory rates and higher than anticipated in countries where it has higher statutory rates, by changes in the valuation of its deferred tax assets and liabilities, or by changes in tax laws, regulations, accounting principles, or interpretations thereof. In addition, anticipated tax benefits from research expenditures and changes in assertions for foreign earnings permanently or non-permanently reinvested as a result of changes in facts and circumstances could significantly impact the effective tax rate. The Company regularly assesses the effects resulting

from these factors to determine the adequacy of its provision for income taxes.

It is reasonably possible that the amount of the unrecognized tax benefit with respect to certain unrecognized tax positions will decrease during the next 12 months due to the expected lapse of statutes of limitation. The Company does not expect the change to have a material effect on its statement of operations.

NOTE 11: SEGMENT INFORMATION

The Company operates two reportable segments: Equipment and Expendable Tools. The Equipment segment manufactures and sells a line of ball bonders and heavy wire wedge bonders that are sold to semiconductor device manufacturers, their outsourced semiconductor assembly and test subcontractors, other electronics manufacturers and automotive electronics suppliers. The Company also services, maintains, repairs and upgrades its equipment. The Expendable Tools segment manufactures and sells a variety of expendable tools for a broad range of semiconductor packaging applications.

The following table reflects operating information by segment for the three months ended December 27, 2014 and December 28, 2013:

(in thousands)	Three months ended	
	December 27, 2014	December 28, 2013

Expendable Tools	517	1,197
Capital expenditures	\$2,253	\$5,429
	Three months ended	
(in thousands)	December 27, 2014	December 28, 2013
Depreciation expense:		
Equipment	\$1,585	\$1,098
Expendable Tools	642	565
Depreciation expense	\$2,227	\$1,663

NOTE 12: COMMITMENTS, CONTINGENCIES AND CONCENTRATIONS

Warranty Expense

The Company's equipment is generally shipped with a one-year warranty against manufacturing defects. The Company establishes reserves for estimated warranty expense when revenue for the related equipment is recognized. The reserve for estimated warranty expense is based upon historical experience and management's estimate of future warranty costs.

The following table reflects the reserve for product warranty activity for the three months ended December 27, 2014 and December 28, 2013:

(in thousands)	Three months ended	
	December 27, 2014	December 28, 2013
Reserve for product warranty, beginning of period	\$1,542	\$1,194
Provision for product warranty	199	148
Product warranty costs paid	(526) (455
Reserve for product warranty, end of period	\$1,215	\$887

Other Commitments and Contingencies

The following table reflects obligations not reflected on the Consolidated Balance Sheet as of December 27, 2014:

(in thousands)	Total	Payments due by fiscal year				
		2015	2016	2017	2018	thereafter
Inventory purchase obligation (1)	\$77,658	\$77,658	\$—	\$—	\$—	\$—
Operating lease obligations (2)	28,537	2,892	3,414	3,039	2,566	16,626
Total	\$106,195	\$80,550	\$3,414	\$3,039	\$2,566	\$16,626

(1) The Company orders inventory components in the normal course of its business. A portion of these orders are non-cancelable and a portion may have varying penalties and charges in the event of cancellation.

(2) The Company has minimum rental commitments under various leases (excluding taxes, insurance, maintenance and repairs, which are also paid by the Company) primarily for various facility and equipment leases, which expire

periodically through 2018 (not including lease extension options, if applicable). Pursuant to ASC No. 840, Leases, for lessee's involvement in asset construction, the Company was considered the owner of the Building during the construction phase of the ADL. The building was completed on December 1, 2013 and Pte

Table of Contents

KULICKE AND SOFFA INDUSTRIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited (continued)

signed an agreement with the Landlord to lease from the Landlord approximately 198,000 square feet, representing approximately 70% of the Building. Following the completion of construction, we performed a sale-leaseback analysis pursuant to ASC 840-40 and determined that because of our continuing involvement, ASC 840-40 precluded us from derecognizing the asset and associated financing obligation. As such, we reclassified the asset from construction in progress to Property, Plant and Equipment and began to depreciate the building over its estimated useful life of twenty-five years. We concluded that the term of the financing obligation is 10 years. This is equal to the non-cancellable term of our lease agreement with the Landlord. As of December 27, 2014, we recorded a financing obligation of \$18.3 million. The financing obligation is not reflected in the table above.

Concentrations

There is no significant customer that represents 10% or more of our net revenue for the three months ended December 27, 2014 and December 28, 2013.

The following table reflects significant customer concentrations as a percentage of total accounts receivable as of December 27, 2014 and December 28, 2013:

	As of	
	December 27, 2014	December 28, 2013
Haoseng Industrial Co., Ltd	19.0	10.8
Siliconware Precision Industries Co. Limited	*	27.4

* Represents less than 10% of total accounts receivable

NOTE 13: SUBSEQUENT EVENTS

On December 29, 2014, Kulicke & Soffa Holdings B.V. (“KSH”), the Company's wholly owned subsidiary, entered into a Share Sale and Purchase Agreement (the “Agreement”) with Assembléon Holding B.V. Pursuant to the Agreement, KSH agreed to purchase all of the outstanding equity interests of Assembléon B.V. (“Assembléon”), a subsidiary of Assembléon Holding B.V., in an all cash transaction for EUR 80 million (approximately \$98 million). Assembléon is a leading technology solutions provider that, together with its subsidiaries, offers assembly equipment, processes and services for the automotive, industrial, and advanced packaging markets. The acquisition expands the Company presence in automotive, industrial and advanced packaging markets.

The acquisition was completed on January 9, 2015. Upon acquisition, Assembléon became a wholly owned subsidiary of the Company. The Company is in the process of determining the purchase price allocation for this acquisition.

Item 2. - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

In addition to historical information, this filing contains statements relating to future events or our future results. These statements are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended (the "Securities Act") and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and are subject to the safe harbor provisions created by statute. Such forward-looking statements include, but are not limited to, our future revenue, sustained, increasing, continuing or strengthening demand for our products, the continuing transition from gold to copper wire bonding, replacement demand, our research and development efforts, our ability to identify and realize new growth opportunities, our ability to control costs and our operational flexibility as a result of (among other factors): projected growth rates in the overall semiconductor industry, the semiconductor assembly equipment market, and the market for semiconductor packaging materials; and projected demand for ball, wedge and die bonder equipment and for expendable tools.

Generally, words such as "may," "will," "should," "could," "anticipate," "expect," "intend," "estimate," "plan," "continue," "g," "believe," or the negative of or other variations on these and other similar expressions identify forward-looking statements. These forward-looking statements are made only as of the date of this filing. We do not undertake to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise. Forward-looking statements are based on current expectations and involve risks and uncertainties. Our future results could differ significantly from those expressed or implied by our forward-looking statements. These risks and uncertainties include, without limitation, those described below and under the heading "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended September 27, 2014 (the "Annual Report") and our other reports and registration statements filed from time to time with the Securities and Exchange Commission. This discussion should be read in conjunction with the Consolidated Financial Statements and Notes included in this report, as well as our audited financial statements included in the Annual Report.

We operate in a rapidly changing and competitive environment. New risks emerge from time to time and it is not possible for us to predict all risks that may affect us. Future events and actual results, performance and achievements could differ materially from those set forth in, contemplated by or underlying the forward-looking statements, which speak only as of the date on which they were made. Except as required by law, we assume no obligation to update or revise any forward-looking statement to reflect actual results or changes in, or additions to, the factors affecting such forward-looking statements. Given those risks and uncertainties, investors should not place undue reliance on forward-looking statements as predictions of actual results.

OVERVIEW

Kulicke and Soffa Industries, Inc. (the "Company" or "K&S") designs, manufactures and sells capital equipment and expendable tools used to assemble semiconductor devices, including integrated circuits ("ICs"), high and low powered discrete devices, light-emitting diodes ("LEDs"), and power modules. We also service, maintain, repair and upgrade our equipment. Our customers primarily consist of semiconductor device manufacturers, outsourced semiconductor assembly and test providers ("OSATs"), other electronics manufacturers and automotive electronics suppliers. We operate two main business segments, Equipment and Expendable Tools. Our goal is to be the technology leader and the most competitive supplier in terms of cost and performance in each of our major product lines. Accordingly, we invest in research and engineering projects intended to enhance our position at the leading edge of semiconductor assembly technology. We also remain focused on our cost structure through continuing improvement and optimization of operations. Cost reduction efforts remain an important part of our normal ongoing operations and are expected to generate savings without compromising overall product quality and service levels.

Business Environment

The semiconductor business environment is highly volatile, driven by internal dynamics, both cyclical and seasonal, in addition to macroeconomic forces. Over the long term, semiconductor consumption has historically grown, and is forecast to continue to grow. This growth is driven, in part, by regular advances in device performance and by price

declines that result from improvements in manufacturing technology. In order to exploit these trends, semiconductor manufacturers, both integrated device manufacturers (“IDMs”) and OSATs, periodically invest aggressively in latest generation capital equipment. This buying pattern often leads to periods of excess supply and reduced capital spending—the so-called semiconductor cycle. Within this broad semiconductor cycle there are also, generally weaker, seasonal effects that are specifically tied to annual, end-consumer purchasing patterns. Typically, semiconductor manufacturers prepare for heightened demand by adding or replacing equipment capacity by the end of the September quar

Table of Contents

ter. Occasionally, this results in subsequent reductions in the December quarter. This annual seasonality can occasionally be overshadowed by effects of the broader semiconductor cycle. Macroeconomic factors also affect the industry, primarily through their effect on business and consumer demand for electronic devices, as well as other products that have significant electronic content such as automobiles, white goods, and telecommunication equipment. Our Equipment segment is primarily affected by the industry's internal cyclical and seasonal dynamics in addition to broader macroeconomic factors that can positively or negatively affect our financial performance. The sales mix of IDM and OSAT customers in any period also impacts financial performance, as changes in this mix can affect our products' average selling prices and gross margins due to differences in volume purchases and machine configurations required by each customer type.

Our Expendable Tools segment is less volatile than our Equipment segment. Expendable Tools sales are more directly tied to semiconductor unit consumption rather than capacity requirements and production capability improvements. We continue to position our business to leverage our research and development leadership and innovation and to focus our efforts on mitigating volatility, improving profitability and ensuring longer-term growth. We remain focused on operational excellence, expanding our product offerings and managing our business efficiently throughout the business cycles. Our visibility into future demand is generally limited, forecasting is difficult, and we generally experience typical industry seasonality.

To limit potential adverse cyclical, seasonal and macroeconomic effects on our financial position, we have de-leveraged and strengthened our balance sheet. As of December 27, 2014, our total cash, cash equivalents and short-term investments were \$633.4 million, a \$36.3 million increase from the prior fiscal year end. We believe this strong cash position will allow us to continue to invest in product development and pursue organic and non-organic opportunities.

On August 14, 2014, the Company's Board of Directors authorized a program (the "Program") to repurchase up to \$100 million of the Company's common stock on or before August 14, 2017. The Company has entered into a written trading plan under Rule 10b5-1 of the Exchange Act to facilitate repurchases under the Program. The Program may be suspended or discontinued at any time and will be funded using the Company's available cash. Under the program, shares may be repurchased through open market and/or privately negotiated transactions at prices deemed appropriate by management. The timing and amount of repurchase transactions under this program will depend on market conditions as well as corporate and regulatory considerations. During the three months ended December 27, 2014, the Company repurchased a total of 0.6 million shares of common stock at a cost of \$7.6 million under the Program. As of December 27, 2014, our remaining stock repurchase authorization under the Program was approximately \$91.8 million.

On December 29, 2014, Kulicke & Soffa Holdings B.V. ("KSH"), the Company's wholly owned subsidiary, entered into a Share Sale and Purchase Agreement (the "Agreement") with Assembléon Holding B.V. Pursuant to the Agreement, KSH has agreed to purchase all of the outstanding equity interests of Assembléon B.V. ("Assembléon"), a subsidiary of Assembléon Holding B.V., in an all cash transaction for EUR 80 million (approximately \$98 million). Assembléon is a leading technology solutions provider that, together with its subsidiaries, offers assembly equipment, processes and services for the automotive, industrial, and advanced packaging markets. The acquisition expands the Company's presence in automotive, industrial and advanced packaging markets. The acquisition was completed on January 9, 2015 and was funded from the Company's available cash resources. Upon acquisition, Assembléon became a wholly owned subsidiary of the Company.

Technology Leadership

We compete largely by offering our customers among the most advanced equipment and expendable tools available for the wire and wedge bonding processes. Our equipment is typically the most productive and has the highest levels of process capability, and as a result, has a lower cost of ownership compared to other equipment in its market. Our expendable tools are designed to optimize the performance of the equipment in which they are used. We believe our technology leadership contributes to the strong market positions of our ball bonder, wedge bonder and expendable tools products. To maintain our competitive advantage, we invest in product development activities designed to produce a stream of improvements to existing products and to deliver next-generation products. These investments often focus as much on improvements in the semiconductor assembly process as on specific pieces of assembly

equipment or expendable tools. In order to generate these improvements, we often work in close collaboration with customers, end users, and other industry members. In addition to producing technical advances, these collaborative development efforts strengthen customer relationships and enhance our reputation as a technology leader and solutions provider.

In addition to gold, silver alloy wire and aluminum wire, our leadership in the industry's use of copper wire for the bonding process is an example of the benefits of our collaborative efforts. By working with customers, material suppliers, and other equipment suppliers, we have developed a series of robust, high-yielding production processes, which have made copper wire widely accepted and significantly reduced the cost of assembling an integrated circuit. Based on our industry leading copper bonding processes and the continued high price of gold, we believe the demand for copper configured wire bonders is likely to remain solid.

Table of Contents

Our leadership also has allowed us to maintain a competitive position in the latest generations of gold and copper ball bonders, which enable our customers to handle the leading technologies in terms of bond pad pitch, silicon with the latest node and complex wire bonding requirement. We continue to see demand for our large bondable area (“LA”) configured machines. This LA option is now available on all of our Power Series (“PS”) models and allows our customers to gain added efficiencies and to reduce the cost of packaging.

We also leverage the technology leadership of our equipment by optimizing our bonder platforms, and we deliver variants of our products to serve emerging high-growth markets. For example, we have developed extensions of our main ball bonding platforms to address opportunities in LED assembly, in particular for general lighting. We expect the next wave of growth in the LED market to be high brightness LED for general lighting. We also believe there is an opportunity for growth in wire bonding sales at wafer level using our AT Premier Plus.

Our leading technology for wedge bonder equipment uses ribbon or heavy wire for different applications such as power electronics, automotive and semiconductor applications. The advanced interconnect capabilities of PowerFusion^{PS} improve the processing of high-density power packages, due to an expanded bondable area, wider leadframe capability, superior indexing accuracy and teach mode. We have also initiated the design and development of our next generation hybrid wedge bonder, which we currently expect to release in 2015. In both cases, we are making a concerted effort to develop commonality of subsystems and design practices, in order to improve performance and design efficiencies. We believe this will benefit us in maintaining our leadership position in the wedge bonding market and increase synergies between the various engineering product groups. Furthermore, we continually research adjacent market segments where our technologies could be used. Many of these initiatives are in the early stages of development and may become business opportunities in the future.

Another example of our developing equipment for high-growth niche markets is our AT Premier Plus. This machine utilizes a modified wire bonding process to mechanically place bumps on devices in a wafer format, for variants of the flip chip assembly process. Typical applications include complementary metal-oxide semiconductor (“CMOS”) image sensors, surface acoustical wave (“SAW”) filters and high brightness LEDs. These applications are commonly used in most, if not all, smartphones available today in the market. We also have expanded the use of AT Premier Plus for wafer level wire bonding for micro-electro-mechanical systems (“MEMS”) and other sensors.

Our technology leadership and bonding process know-how have enabled us to develop highly function-specific equipment with best-in-class throughput and accuracy. This forms the foundation for our advanced packaging equipment development. We established a dedicated team to develop and manufacture advanced packaging bonders for the emerging 2.5 dimensional (“2.5D IC”) and 3 dimensional integrated circuit (“3D IC”) markets. By reducing the interconnect dimensions, 2.5D and 3D ICs are expected to provide form factor, performance and power efficiency enhancements over traditional flip-chip packages in production today. High-performance processing and memory applications, in addition to mobile devices such as smartphones and tablets, are anticipated to be earlier adopters of this new packaging technology.

With the acquisition of Assembléon, we have broadened our advanced packaging solutions to include flip chip, wafer level packaging (WLP), fan-out wafer level packaging (FOWLP), advanced package-on-package, embedded die, and System-in-Package (SiP). The acquisition also enables us to diversify our business in the automotive, medical and industrial markets with advanced surface-mount technology (SMT) solutions.

We bring the same technology focus to our expendable tools business, driving tool design and manufacturing technology to optimize the performance and process capability of the equipment in which our tools are used. For all our equipment products, expendable tools are an integral part of their process capability. We believe our unique ability to simultaneously develop both equipment and tools is a core strength supporting our products' technological differentiation.

Table of Contents

Products and Services

We supply a range of bonding equipment and expendable tools. The following tables reflect net revenue by business segment for the three months ended December 27, 2014 and December 28, 2013, respectively:

(dollar amounts in thousands)	Three months ended December 27, 2014		December 28, 2013		
	Net revenues	% of total net revenue	Net revenues	% of total net revenue	
Equipment	\$90,956	84.7	% \$63,145	79.8	%
Expendable Tools	16,482	15.3	% 15,968	20.2	%
	\$107,438	100.0	% \$79,113	100.0	%

Equipment Segment

We manufacture and sell a line of ball bonders, wafer level bonders and heavy wire wedge bonders that are sold to semiconductor device manufacturers, OSATs, other electronics manufacturers and automotive electronics suppliers. Ball bonders are used to connect very fine wires, typically made of gold or copper, between the bond pads of the semiconductor device, or die, and the leads on its package. Wafer level bonders mechanically apply bumps to die, typically while still in the wafer format, for some variants of the flip chip assembly process. Heavy wire wedge bonders use either aluminum wire or ribbon to perform the same function in packages that cannot use gold or copper wire because of either high electrical current requirements or other package reliability issues. In September 2014, we introduced the APAMA (Advanced Packaging with Adaptive Machine Analytics) C2S bonder, which is designed for performance and high accuracy applications, delivering die-stacking solutions for 2.5 Dimensional, 3 Dimensional or Through Silicon Via (TSV) integrated chips. We believe our equipment offers competitive advantages by providing customers with high productivity/throughput, superior package quality/process control, and, as a result, a lower cost of ownership.

Table of Contents

Our principal Equipment segment products include:

Business Unit	Product Name (1)	Typical Served Market
Ball bonders	IConn ^{PS}	Advanced and ultra fine pitch applications
	IConn ^{PS} Plus	Advanced and ultra fine pitch applications
	IConn ^{PS} LA	Large area substrate and matrix applications
	IConn ^{PS} Plus LA	Large area substrate and matrix applications
	IConn ^{PS} ProCu	High-end copper wire applications demanding advanced process capability and high productivity
	IConn ^{PS} ProCu Plus	High-end copper wire applications demanding advanced process capability and high productivity
	IConn ^{PS} ProCu LA	Large area substrate and matrix applications for copper wire
	IConn ^{PS} ProCu Plus LA	Large area substrate and matrix applications for copper wire
	ConnX ^{PS} Plus	High productivity bonder for low-to-medium pin count applications
	ConnX ^{PS} LED	LED applications
	ConnX ^{PS} VLED	Vertical LED applications
	ConnX ^{PS} Plus LA	Cost performance large area substrate and matrix applications
	AT Premier Plus	Advanced wafer level bonding application
Wedge bonders	3600Plus	Power hybrid and automotive modules using either heavy aluminum wire or PowerRibbon®
	3700Plus	Hybrid and automotive modules using thin aluminum wire
	7200Plus	Power semiconductors using either aluminum wire or PowerRibbon®
	7200HD	Smaller power packages using either aluminum wire or PowerRibbon®
	PowerFusion ^{PS} TL	Power semiconductors using either aluminum wire or PowerRibbon®
	PowerFusion ^{PS} HL	Smaller power packages using either aluminum wire or PowerRibbon®

Advanced Packaging APAMA C2S Flip chip thermo-compression bonding applications

(1) Power Series (“PS”)

25

Table of Contents

Ball Bonders

Automatic ball bonders represent the largest portion of our semiconductor equipment business. Our main product platform for ball bonding is the Power Series - a family of assembly equipment that is setting new standards for performance, productivity, upgradeability, and ease of use.

Our portfolio of ball bonding products includes:

- The IConn^{PS} and IConn^{PS} Plus: high-performance ball bonders which can be configured for either gold or copper wire.

- The IConn^{PS} LA and IConn^{PS} Plus LA: high-performance large area ball bonders which can be configured for either gold or copper wire.

- The ConnX^{PS} Plus: cost-performance ball bonders which can be configured for either gold or copper wire.

- The ConnX^{PS} Plus LA: cost-performance large area ball bonders which can be configured for either gold or copper wire.

- The ConnX^{PS} LED and ConnX^{PS} VLED: ball bonders targeted specifically at the fast growing LED market.

- The IConn^{PS} ProCu Plus: high-performance copper wire ball bonders for advanced wafer nodes at 28 nanometer and below.

- The IConn^{PS} ProCu Plus LA: high-performance large area copper wire ball bonders for advanced wafer nodes at 28 nanometer and below.

The AT Premier Plus: ball bonders which utilize a modified wire bonding process to mechanically place bumps on devices, while still in a wafer format for variants of the flip chip assembly process. Typical applications include CMOS image sensors, SAW filters, MEMS and high brightness LEDs. These applications are commonly used in most, if not all, smartphones available today in the market.

In September 2014, we introduced ConnX^{PS} LED Plus, which offers higher performance and a larger bondable area for the LED market.

Our Power Series products are setting new standards in wire bonding. Our ball bonders are capable of performing very fine pitch bonding, as well as creating the complex loop shapes needed in the assembly of advanced semiconductor packages and bonding on the latest silicon node-28 nanometer. Most of our installed base of gold wire bonders can also be retrofitted for copper applications through kits we sell separately.

Heavy Wire Wedge Bonders

We are the leaders in the design and manufacture of heavy wire wedge bonders for the power semiconductor and automotive power module markets. Heavy wire wedge bonders may use either aluminum wire or aluminum ribbon to connect semiconductor chips in power packages, power hybrids and automotive modules for products such as motor control modules or inverters for hybrid cars. In addition, we see some potential use for our wedge bonder products in high reliability interconnections of rechargeable batteries in hybrid and electric automotive applications.

Our portfolio of wedge bonding products includes:

- The 3600Plus: high speed, high accuracy wire bonders designed for power modules, automotive packages and other heavy wire multi-chip module applications.

- The 3700Plus: wire bonders designed for hybrid and automotive modules using thin aluminum wire.

- The 7200Plus: dual head wedge bonders designed specifically for power semiconductor applications.

- The 7200HD: heavy wire wedge bonders designed for smaller power packages using either aluminum wire or ribbon.

- The PowerFusion^{PS} Semiconductor Wedge Bonders - Configurable in single, dual and multi-head configurations using aluminum wire and PowerRibbonTM:

- The PowerFusion^{PS} TL: designed for low-cost, high volume power semiconductor applications.

- The PowerFusion^{PS} HL: designed for advanced power semiconductor applications.

While wedge bonding traditionally utilizes aluminum wire, all of our heavy wire wedge bonders may be modified to bond aluminum ribbon using our proprietary PowerRibbon[®] process. Aluminum ribbon offers device makers performance advantages over traditional round wire and is being increasingly used for high current packages and automotive applications.

Our PowerFusion^{PS} series are driven by new powerful direct-drive motion systems and expanded pattern recognition capabilities. The advanced interconnect capabilities of PowerFusion^{PS} improves the processing of high-density power

packages, due to an expanded bondable area, wider leadframe capability, superior indexing accuracy and teach mode.

Table of Contents

In September 2014, we introduced the PowerFusion^{PS} HLx, which has similar capabilities of the PowerFusion^{PS} HL and extends the bondable width up to 105 millimeters.

Advanced Packaging Bonders

In September 2014, we introduced the APAMA C2S bonder, which is designed for performance and high accuracy applications, delivering die-stacking solutions for 2.5 Dimensional, 3 Dimensional or Through Silicon Via (TSV) integrated chips.

Other Equipment Products and Services

We also sell manual wire bonders, and we offer spare parts, equipment repair, maintenance and servicing, training services, and upgrades for our equipment through our Support Services business unit.

Our K&S Care service is designed to help customers operate their machines at an optimum level under the care of our trained specialists. K&S Care includes a range of programs, offering different levels of service depending on customer needs.

Expendable Tools Segment

We manufacture and sell a variety of expendable tools for a broad range of semiconductor packaging applications.

Our principal Expendable Tools segment products include:

Capillaries: expendable tools used in ball bonders. Made of ceramic and other elements, a capillary guides the wire during the ball bonding process. Its features help control the bonding process. We design and build capillaries suitable for a broad range of applications, including for use on our competitors' equipment. In addition to capillaries used for gold wire bonding, we have developed capillaries for use with copper wire to achieve optimal performance in copper wire bonding.

Bonding wedges: expendable tools used in heavy wire wedge bonders. Like capillaries, their features are tailored to specific applications. We design and build bonding wedges for use both in our own equipment and in our competitors' equipment.

Dicing blades: expendable tools used by semiconductor manufacturers to cut silicon wafers into individual semiconductor die and to cut semiconductor devices that have been moulded in a matrix configuration into individual units.

The Opto_{ceramic} and Opto_{PCB} package singulation blades for the LED market enable an improvement on package singulation quality, precision and productivity by providing a significantly longer life blade, and improved stability. We also offer ACS Pro Capillary, which is a new generation of copper capillary for advanced copper wire bonding applications.

In March 2014, we expanded the ACS series capillaries through the introduction of ACS Max and ACS Lite. ACS Max Capillary and ACS Lite Capillary are the new generation of copper capillary for medium-pin count and low-pin count copper wire applications.

RESULTS OF OPERATIONS

The following tables reflect our income from operations for the three months ended December 27, 2014 and December 28, 2013:

(dollar amounts in thousands)	Three months ended				
	December 27, 2014	December 28, 2013	\$ Change	% Change	
Net revenue	\$107,438	\$79,113	\$28,325	35.8	%
Cost of sales	52,704	40,748	11,956	29.3	%
Gross profit	54,734	38,365	16,369	42.7	%
Selling, general and administrative	25,427	23,102	2,325	10.1	%
Research and development	19,581	17,471	2,110	12.1	%
Operating expenses	45,008	40,573	4,435	10.9	%
Income / (loss) from operations	\$9,726	\$(2,208)) \$11,934	(540.5)%

Our net revenues for the three months ended December 27, 2014 increased as compared to our net revenues for the three months ended December 28, 2013 largely due to higher customer demand. The semiconductor industry is

volatile and our operating results have fluctuated significantly in the past and are expected to continue to do so in the future.

Table of Contents

Net Revenue

Approximately 88.9% and 94.1% of our net revenue for the three months ended December 27, 2014 and December 28, 2013, respectively, was for shipments to customer locations outside of the U.S., primarily in the Asia/Pacific region. We expect sales outside of the U.S. to continue to represent a substantial majority of our future revenue.

The following tables reflect net revenue by business segment for the three months ended December 27, 2014 and December 28, 2013:

(dollar amounts in thousands)	Three months ended		\$ Change	% Change	
	December 27, 2014	December 28, 2013			
Equipment	\$90,956	\$63,145	\$27,811	44.0	%
Expendable Tools	16,482	15,968	514	3.2	%
Total net revenue	\$107,438	\$79,113	\$28,325	35.8	%

Equipment

The following table reflects the components of Equipment net revenue change between the three months ended December 27, 2014 and December 28, 2013:

(in thousands)	December 27, 2014 vs. December 28, 2013		
	Three months ended		
	Price	Volume	\$ Change
Equipment	\$(433) \$28,244	\$27,811

For the three months ended December 27, 2014, the higher Equipment net revenue as compared to the prior year period was primarily due to the higher volume of our ball bonders and wedge bonders. The higher volume of ball bonders and wedge bonders was primarily driven by the strong demand from our customers.

Expendable Tools

The following table reflects the components of Expendable Tools net revenue change between the three months ended December 27, 2014 and December 28, 2013:

(in thousands)	December 27, 2014 vs. December 28, 2013		
	Three months ended		
	Price	Volume	\$ Change
Expendable Tools	\$(629) \$1,143	\$514

For the three months ended December 27, 2014, the higher Expendable Tools net revenue as compared to the prior year period was primarily due to volume increase in our wire bonding tools business, and partially offset by the price reduction in our wire bonding tools business.

Gross Profit

The following tables reflect gross profit by business segment for the three months ended December 27, 2014 and December 28, 2013:

(dollar amounts in thousands)	Three months ended		\$ Change	% Change	
	December 27, 2014	December 28, 2013			
Equipment	\$44,857	\$28,672	\$16,185	56.4	%
Expendable Tools	9,877	9,693	184	1.9	%
Total gross profit	\$54,734	\$38,365	\$16,369	42.7	%

Table of Contents

The following tables reflect gross profit as a percentage of net revenue by business segment for the three months ended December 27, 2014 and December 28, 2013:

	Three months ended		Basis Point Change
	December 27, 2014	December 28, 2013	
Equipment	49.3	% 45.4	% 390
Expendable Tools	59.9	% 60.7	% (80)
Total gross margin	50.9	% 48.5	% 240

Equipment

The following table reflects the components of Equipment gross profit change between the three months ended December 27, 2014 and December 28, 2013:

(in thousands)	December 27, 2014 vs. December 28, 2013			
	Three months ended			
	Price	Cost	Volume	\$ Change
Equipment	\$(433)) \$633	\$15,985	\$16,185

For the three months ended December 27, 2014, the higher Equipment gross profit as compared to the prior year period was primarily due to the higher volume of our ball bonders and wedge bonders. The higher volume of ball bonders and wedge bonders was primarily driven by the strong demand from our customers.

Expendable Tools

The following table reflects the components of Expendable Tools gross profit change between the three months ended December 27, 2014 and December 28, 2013:

(in thousands)	December 27, 2014 vs. December 28, 2013			
	Three months ended			
	Price	Cost	Volume	\$ Change
Expendable Tools	\$(629)) \$366	\$447	\$184

For the three months ended December 27, 2014, the higher Expendable Tools gross profit as compared to the prior year period primarily due to higher volume and lower cost due to higher absorption of the fixed manufacturing costs. This was offset by the price reduction in our wire bonding tools business.

Operating Expenses

The following tables reflect operating expenses as a percentage of net revenue for the three months ended December 27, 2014 and December 28, 2013:

	Three months ended		Basis point change
	December 27, 2014	December 28, 2013	
Selling, general & administrative	23.7	% 29.2	% (550)
Research & development	18.2	% 22.1	% (390)
Total	41.9	% 51.3	% (940)

Selling, General and Administrative ("SG&A")

SG&A increased \$2.3 million during three months ended December 27, 2014 as compared to the three months ended December 28, 2013 primarily due to an increase in incentive compensation of \$2.7 million as a result of current fiscal quarter profit, and an increase in professional services of \$0.5 million. This was partially offset by a \$0.8 million provision of input tax receivables in prior year fiscal quarter.

Research and Development ("R&D")

R&D expense increased \$2.1 million during the three months ended December 27, 2014 as compared to the three months ended December 28, 2013 primarily due to additional investment in the development of new products.

Table of Contents

Income from Operations

For the three months ended December 27, 2014, total income from operations was higher by \$11.9 million as compared to the three months ended December 28, 2013, which was a loss of \$2.2 million. This was primarily due to higher revenue and margin for equipment sales as explained above.

Interest Income and Expense

The following tables reflect interest income and interest expense for the three months ended December 27, 2014 and December 28, 2013:

(dollar amounts in thousands)	Three months ended		\$ Change	% Change	
	December 27, 2014	December 28, 2013			
Interest income	\$262	\$279	\$(17)) (6.1)%
Interest expense	\$(303)	\$(119)	\$(184)) 154.6	%

Interest income for the three months ended December 27, 2014 was derived from short term investments and cash and cash equivalents balance.

Interest expense for the three months ended December 27, 2014 was attributable to the interest on financing obligation relating to the new building, which was incurred subsequent to the completion of the new building in December 2013 (Refer to Note 7 of Item 1).

Provision for Income Taxes

The following table reflects the provision for income taxes and the effective tax rate for the three months ended December 27, 2014 and December 28, 2013:

(in thousands)	Three months ended		Effective tax rate
	December 27, 2014	December 28, 2013	
Income / (loss) from operations before income taxes	\$9,685	\$(2,048))
Provision for income taxes	1,843	(91))
Net income / (loss)	\$7,842	\$(1,957))
Effective tax rate	19.0	% 4.4	%

For the three months ended December 27, 2014, the effective income tax rate differed from the federal statutory tax rate primarily due to profits from foreign operations subject to a lower statutory tax rate than the U.S. statutory tax rate, and the impact of tax holiday, offset by an increase for deferred taxes on unremitted earnings, other U.S. deferred taxes and foreign withholding taxes.

For the three months ended December 28, 2013, the effective income tax rate differed from the federal statutory tax rate primarily due to profits from foreign operations subject to a lower statutory tax rate than the U.S. statutory tax rate, and the impact of tax holidays, offset by an increase for deferred taxes on unremitted earnings, other U.S. deferred taxes and additional foreign expenses or benefits related to returns filed in the period.

The effective tax rate for the period ended December 27, 2014 of 19.0% increased from the effective rate for the fiscal period ended September 27, 2014 of 18.3% primarily higher volume of local sales, which has a higher statutory tax rate. The Company's future effective tax rate would be affected if earnings were lower than anticipated in countries where it has lower statutory rates and higher than anticipated in countries where it has higher statutory rates, by changes in the valuation of its deferred tax assets and liabilities, or by changes in tax laws, regulations, accounting principles, or interpretations thereof. In addition, anticipated tax benefits from research expenditures and changes in assertions for foreign earnings permanently or non-permanently reinvested as a result of changes in facts and circumstances could significantly impact the effective tax rate. The Company regularly assesses the effects resulting from these factors to determine the adequacy of its provision for income taxes.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

The following table reflects total cash and investments as of December 27, 2014 and September 27, 2014:

(dollar amounts in thousands)	As of		
	December 27, 2014	September 27, 2014	Change
Cash and cash equivalents	\$622,590	\$587,981	\$34,609
Percentage of total assets	67.1	% 62.3	%

The following table reflects summary Consolidated Statement of Cash Flow information for the three months ended December 27, 2014 and December 28, 2013:

(in thousands)	Three months ended	
	December 27, 2014	December 28, 2013
Net cash provided by operating activities	\$46,442	\$37,249
Net cash used in investing activities	(4,176) (8,729
Net cash (used in) / provided by financing activities	(7,621) 258
Effect of exchange rate changes on cash and cash equivalents	(36) 32
Changes in cash and cash equivalents	\$34,609	\$28,810
Cash and cash equivalents, beginning of period	587,981	521,788
Cash and cash equivalents, end of period	\$622,590	\$550,598

Three months ended December 27, 2014

Net cash provided by operating activities was primarily the result of net income of \$7.8 million, non-cash adjustments of \$6.1 million and working capital changes of \$32.5 million. The change in working capital was primarily driven by a decrease in accounts receivable of \$49.3 million and decrease in prepaid expenses and other current assets of \$4.0 million. This was partially offset by a decrease in accounts payable and accrued expenses of \$18.2 million and increase in inventories of \$2.9 million.

The decrease in accounts receivables is in line with lower sales in the first quarter of fiscal 2015 compared to the fourth quarter of fiscal 2014 due to variations in the timing of our customer orders within the seasonal cycle, as customers tend to add or replace equipment capacity by the end of the September quarter. The reduction in prepaid expenses and other current assets is due to lower goods and services tax of \$3.8 million and refunds of \$0.3 million of income taxes. The decrease in accounts payable and accrued expenses is due to lower purchases and the Company's shutdown of certain operations in selective locations in the first quarter of 2015. The increase in inventories is due to higher purchases during the first quarter of fiscal 2015 in anticipation of an increase in production in the second quarter of fiscal 2015.

Net cash used in investing activities was primarily due to capital expenditures of \$2.5 million and purchase of short-term investments of \$1.6 million.

Net cash used in financing activities relates to the repurchase of common stock of \$7.6 million.

Three months ended December 28, 2013

The decrease in net cash provided by operating activities was primarily the result of working capital changes, which provided \$31.8 million driven by decreases in accounts receivables of \$49.2 million due to cash collections and a lower level of sales, a reduction in prepaid expenses and other current assets of \$7.2 million, a reduction in inventories of \$1.0 million, and a increase of income tax payable of \$0.5 million, partially offset by a decrease in accounts payable and accrued expenses of \$26.0 million. In addition, the non-cash adjustments of \$7.4 million, partially offset by net loss of \$2.0 million, also contributed to the decrease in net cash provided by operating activities.

The decrease in accounts receivables is in line with lower sales in the first quarter of fiscal 2014 compared to the fourth quarter of fiscal 2013 due to variations in the timing of our customer orders within the seasonal cycle, as customers tend to add or replace equipment capacity by the end of the September quarter. The reduction in prepaid expenses and other current assets is due to refunds of \$2.2 million of income taxes and \$2.4 million of goods and services tax and the refund of cash deposit of \$2.7 million in relation to the Agreement to Develop and Lease (the "ADL") following the execution of the Lease Agreement. The decrease in accounts payable and accrued expenses is due to lower purchases and the Company's shutdown of certain operations in selective locations in the first quarter of

2014.

31

Table of Contents

Net cash used in investing activities was primarily due to capital expenditures of \$5.4 million and increase in short term investments of \$3.3 million.

Net cash provided by financing activities relates primarily to proceeds from the exercise of stock options.

Fiscal 2015 Liquidity and Capital Resource Outlook

We expect our fiscal 2015 capital expenditures to be between \$17.0 and \$19.0 million. Expenditures are anticipated to be primarily used for R&D projects, enhancements to our manufacturing operations in Asia and improvements to our information technology infrastructure.

We believe that our existing cash and investments and anticipated cash flows from operations will be sufficient to meet our liquidity and capital requirements for at least the next twelve months. Our liquidity is affected by many factors, some based on normal operations of our business and others related to global economic conditions and industry uncertainties, which we cannot predict. We also cannot predict economic conditions and industry downturns or the timing, strength or duration of recoveries. We intend to continue to use our cash for working capital needs and for general corporate purposes.

We may seek, as we believe appropriate, additional debt or equity financing which would provide capital for corporate purposes, working capital funding, additional liquidity needs or to fund future growth opportunities. The timing and amount of potential capital requirements cannot be determined at this time and will depend on a number of factors, including our actual and projected demand for our products, semiconductor and semiconductor capital equipment industry conditions, competitive factors, and the condition of financial markets.

On August 14, 2014, the Company's Board of Directors authorized a program to repurchase up to \$100 million of the Company's common stock on or before August 14, 2017. The Company has entered into a written trading plan under Rule 10b5-1 of the Exchange Act to facilitate repurchases under the repurchase program. The repurchase program is effective immediately, may be suspended or discontinued at any time and will be funded using the Company's available cash. Under the program, shares may be repurchased through open market and/or privately negotiated transactions at then-prevailing market prices. The timing and amount of repurchase transactions under this program will depend on market conditions as well as corporate and regulatory considerations.

During the three months ended December 27, 2014, the Company repurchased a total of 0.6 million shares of common stock at a cost of \$7.6 million under the repurchase program. As of December 27, 2014, our remaining stock repurchase authorization under the repurchase program was approximately \$91.8 million.

On December 29, 2014, Kulicke & Soffa Holdings B.V. ("KSH"), the Company's wholly owned subsidiary, entered into a Share Sale and Purchase Agreement (the "Agreement") with Assembléon Holding B.V. Pursuant to the Agreement, KSH has agreed to purchase all of the outstanding equity interests of Assembléon B.V. ("Assembléon"), a subsidiary of Assembléon Holding B.V., in an all cash transaction for EUR 80 million (approximately \$98 million). The acquisition was completed on January 9, 2015 and was funded from the Company's available cash resources. Upon acquisition, Assembléon became a wholly owned subsidiary of the Company.

Other Obligations and Contingent Payments

In accordance with U.S. generally accepted accounting principles, certain obligations and commitments are not required to be included in the Consolidated Balance Sheets and Statements of Operations. These obligations and commitments, while entered into in the normal course of business, may have a material impact on our liquidity. Certain of the following commitments as of December 27, 2014 are appropriately not included in the Consolidated Balance Sheets and Statements of Operations included in this Form 10-Q; however, they have been disclosed in the table below for additional information.

The following table reflects obligations and contingent payments under various arrangements as of December 27, 2014:

Table of Contents

(in thousands)	Total	Payments due by fiscal period			
		Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
Current and long-term liabilities:					
Pension plan obligations	\$2,195	\$—	\$—	\$—	\$2,195
Severance (1)	2,339	—	721	—	1,618
Operating lease retirement obligations	1,507	377	51	—	1,079
Long-term income taxes payable	3,403	—	—	—	3,403
Total Obligations and Contingent Payments reflected on the Consolidated Financial Statements	\$9,444	\$377	\$772	\$—	\$8,295
Contractual Obligations:					
Inventory purchase obligations (2)	\$77,658	\$77,658	\$—	\$—	\$—
Operating lease obligations (3)	28,537	3,743	6,332	4,859	13,603
Total Obligations and Contingent Payments not reflected on the Consolidated Financial Statements	\$106,195	\$81,401	\$6,332	\$4,859	\$13,603

(1) In accordance with regulations in some of our foreign subsidiaries, we are required to provide for severance obligations that are payable when an employee leaves the Company.

(2) We order inventory components in the normal course of our business. A portion of these orders are non-cancellable and a portion may have varying penalties and charges in the event of cancellation.

(3) We have minimum rental commitments under various leases (excluding taxes, insurance, maintenance and repairs, which are also paid by us) primarily for various facility and equipment leases, which expire periodically through 2026 (not including lease extension options, if applicable).

The annual rent and service charge for the Initial Term for the Building under the ADL ranges from approximately \$4 million to approximately \$5 million Singapore dollars and is not included in the table above.

In accordance with ASC No. 840, Leases ("ASC 840"), the Company was considered to be the owner of the Building during the construction phase due to its involvement in the asset construction. As a result of the Company's continued involvement during the lease term, the Company did not fulfill the criteria to apply sale-leaseback accounting under ASC 840. Therefore, at completion, the building remained on the Consolidated Balance Sheet, and the corresponding financing obligation was reclassified to long-term liability. As of December 27, 2014 we recorded a financing obligation of \$18.3 million. The financing obligation is not reflected in the table above.

Off-Balance Sheet Arrangements

Credit facility

On November 22, 2013, the Company obtained a \$5.0 million credit facility with Citibank in connection with the issuance of a bank guarantee of \$3.4 million Singapore dollars to the Landlord in connection with the corporate headquarter lease. The bank guarantee was effective from December 1, 2013 to November 30, 2014. On November 19, 2014, the Company extended the expiry date of the bank guarantee to November 30, 2015 and increased the amount to \$3.5 million Singapore dollars. As of September 27, 2014, we did not have any other off-balance sheet arrangements, such as derivatives, contingent interests or obligations associated with variable interest entities.

Table of Contents

Item 3. - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk

Our available-for-sale securities, if applicable, may consist of short-term investments in highly rated debt instruments of the U.S. Government and its agencies, financial institutions, and corporations. We continually monitor our exposure to changes in interest rates and credit ratings of issuers with respect to any available-for-sale securities and target an average life to maturity of less than 18 months. Accordingly, we believe that the effects to us of changes in interest rates and credit ratings of issuers are limited and would not have a material impact on our financial condition or results of operations. As of December 27, 2014, we had deposits maturing within one year of \$10.8 million.

Foreign Currency Risk

Our international operations are exposed to changes in foreign currency exchange rates due to transactions denominated in currencies other than the location's functional currency. Our international operations are also exposed to foreign currency fluctuations that impact the remeasurement of net monetary assets of those operations whose functional currency, the U.S. dollar, differs from their respective local currencies, most notably in Israel, Malaysia, Singapore and Switzerland. In addition to net monetary remeasurement, we have exposures related to the translation of subsidiary financial statements from their functional currency, the local currency, into its reporting currency, the U.S. dollar, most notably in China, Taiwan, Japan and Germany. Our U.S. operations also have foreign currency exposure due to net monetary assets denominated in currencies other than the U.S. dollar.

Based on our foreign currency exposure as of December 27, 2014, a 10.0% fluctuation could impact our financial position, results of operations or cash flows by \$3.0 to \$4.0 million. We may enter into foreign exchange forward contracts and other instruments in the future; however, our attempts to hedge against these risks may not be successful and may result in a material adverse impact on our financial results and cash flow.

On October 10, 2014, the Company entered into foreign exchange forward contracts with notional amounts of \$23.9 million. We entered into these foreign exchange forward contracts to hedge a portion of our forecasted foreign currency-denominated expenses in the normal course of business and, accordingly, they are not speculative in nature. These foreign exchange forward contracts have maturities of up to six months.

Item 4. - CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of December 27, 2014. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of December 27, 2014 our disclosure controls and procedures were effective in providing reasonable assurance the information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934, as amended, is (i) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and (ii) accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure.

Changes in internal control over financial reporting

In connection with the evaluation by our management, including with the participation of our Chief Executive Officer and Chief Financial Officer, of our internal control over financial reporting, no changes during the three months ended December 27, 2014 were identified to have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. - OTHER INFORMATION

Item 1A. - RISK FACTORS

Certain Risks Related to Our Business

Risks related to our business are detailed in our Annual Report on Form 10-K for the year ended September 27, 2014 filed with the Securities and Exchange Commission.

Certain Risks Related to the Assembléon Acquisition

We face risks associated with incorporating Assembléon into the Company.

The successful expansion of our business and operations resulting from the Assembléon acquisition will require significant time, effort, attention and dedication of management and may strain our operational and financial resources. It is possible that incorporating Assembléon and its businesses into the Company could result in changes to, or pressure on compliance with standards, controls, procedures and policies. This process could expose us to risks and challenges, including:

- unanticipated issues in coordinating information, communication and other systems;
- unexpected loss of key employees;
- distraction of management attention from our other businesses;
- failure to retain key customers;
- the need to modify operating and accounting controls and procedures; and
- foreign currency fluctuation that could negatively impact our financial results and cash flows.

In addition, it is possible that our exposure to potential liabilities resulting from Assembléon's business, some of which may be material or unknown, could exceed amounts we can recover through indemnification claims.

These types of challenges and uncertainties could have a material adverse effect on our business, cash flows, results of operations and financial condition.

We may fail to realize the anticipated benefits of the Assembléon acquisition.

The Assembléon acquisition is intended to expand our presence in the automotive, industrial and advanced packaging markets. The success of the Assembléon acquisition will depend on, among other things, our ability to incorporate Assembléon and its businesses into the Company in a manner that permits growth opportunities and does not disrupt existing client relationships or result in decreased revenues due to customer attrition or other factors. Assembléon's businesses are also subject to certain risks that may negatively affect the financial results for our Equipment and Expendable Tools business segments, including, among others, the following:

Assembléon's businesses are largely dependent on the health of the industries in which it participates. These industries may be impacted by market and regulatory factors, and there can be no assurance that we will realize the potential growth opportunities from these industries.

We anticipate that goodwill and other intangible assets will be established in connection with our acquisition of Assembléon. Goodwill represents the estimated future economic benefits arising from the assets we have acquired that did not qualify to be identified and recognized individually, and includes the value of expected future cash flows of Assembléon, expected synergies with our other affiliates and other unidentifiable intangible assets. Goodwill is deemed to have an indefinite useful life and is subject to review for impairment annually, or more frequently, whenever circumstances indicate potential impairment. The value of goodwill is supported by revenue, which is driven primarily by transaction volume. Intangible assets other than goodwill primarily consist of customer relationships, client backlog, trade name and trademarks, software and non-competition agreements.

The calculation of the estimated fair value of goodwill and other intangibles requires the use of significant estimates and assumptions that are highly subjective in nature, such as attrition rates, discount rates, future expected cash flows and market conditions. Our estimates are based upon assumptions believed to be reasonable, but which are inherently

uncertain and unpredictable. If actual results differ from our assumptions, we may not realize the full value of our intangible assets and goodwill.

Table of Contents

For these and other reasons there can be no assurance that the anticipated synergies and benefits from the transaction will be realized fully or at all. If we fail to realize the anticipated benefits of the Assembléon acquisition, we may not realize the full value of our intangible assets and goodwill related to the acquisition, in which case we may be required to write down or write off all such intangible assets or goodwill. Such an impairment of our goodwill or intangible assets could have a material adverse effect on our results of operations.
