NOTE REGARDING FORWARD-LOOKING STATEMENTS

Some information in this report may contain forward-looking statements within the meaning of Section 27A of the U.S. Securities Act of 1933 and Section 21E of the U.S. Securities Exchange Act of 1934. We have based these forward-looking statements on our current beliefs, expectations and intentions as to facts, actions and events that will or may occur in the future. Such statements generally are identified by forward-looking words such as believe, plan, anticipate, continue, estimate, expect, may, will or other similar words.

A forward-looking statement may include a statement of the assumptions or bases underlying the forward-looking statement. We have chosen these assumptions or bases in good faith. These forward-looking statements are subject to risks, uncertainties and assumptions, some of which are beyond our control. In addition, these forward-looking statements reflect our current views with respect to future events and are not a guarantee of future performance. Actual results may differ materially from information contained in the forward-looking statements as a result of a number of factors, including, without limitation, the risk factors set forth in Item 3. Key Information Risk Factors in our annual report on Form 20-F for the fiscal year ended December 31, 2008. You should also keep in mind that any forward-looking statement made by us in this report or elsewhere speaks only as at the date on which we made it. New risks and uncertainties come up from time to time, and it is impossible for us to predict these events or how they may affect us. We have no duty to, and do not intend to, update or revise the statements in this report after the date hereof. In light of these risks and uncertainties, you should keep in mind that actual results may differ materially from any forward-looking statement made in this report or elsewhere.

BLUE OCEAN WIRELESS ANNOUNCES SHAREHOLDER SUPPORT FOR ROLLOUT OF FLEETBROADBAND PRODUCT

Additional shareholder investment

14th July, 2009: Blue Ocean Wireless (BOW), a company delivering GSM communication capability for the merchant maritime sector, today announces that it has successfully completed full FleetBroadband (FBB) testing and the service is now fully operational and commercially available to existing and potential BOW customers.

BOW also announces that Smart Communications, Inc. (SMART), a wholly owned mobile subsidiary of the Philippine Long Distance Telephone Company (PLDT), NTT DOCOMO, Inc. (DOCOMO), and Altobridge Limited will invest a further US\$7.5million into BOW to accelerate the rapid introduction of FleetBroadband and next generation maritime communication services.

BOW has established itself as the leading provider of GSM services to the merchant maritime sector. With a customer base and order book of over 650 vessels, BOW has demonstrated rapid growth since it was founded two years ago. The objective now is to further accelerate this growth and facilitate the introduction of next generation maritime communication services.

Expanding Range of Maritime Services

Blue Ocean Wireless provides, for the first time, FleetBroadband and mobile GSM connectivity at sea, where no other network exists. This allows officers and crew to make and receive voice calls, send and receive text messages and emails and access the internet. FleetBroadband also supports the latest technologies for both conducting business remotely and effective fleet operation, including the ability to access corporate networks and FTP facilities from anywhere around the globe. The BOW FBB service is supported by both Inmarsat s FB250 & FB500 and the VSAT satellite terminal.

Fleet Broadband

FleetBroadband is the first maritime communications service to provide cost-effective global broadband data and voice, simultaneously, through a compact antenna. FBB provides unprecedented connectivity between vessels and the shore, regardless of your global position or conditions at sea. FleetBroadband is cost-effective, fast, reliable and an easy-to-use always-available solution for email, internet, corporate networks and voice services. FleetBroadband utilises Inmarsat's I-4 satellite constellation enabling global coverage.

Blue Ocean Wireless provides the opportunity to expand the range of value-added services, beyond the basic FleetBroadband services which exist. These value-added services provide users with cost and traffic control, firewall management, data optimisation, high security options, easy VPN access, messaging services and a full IP range.

Investment in Blue Ocean Wireless.

The proceeds from this investment further strengthen BOW's balance sheet and underpin its strategy to aggressively enhance and grow its service offering within the merchant maritime sector.

Exhibit 1

Paul Wallace, Chief Executive Officer commented: *We are pleased to announce this further investment by SMART, NTT DOCOMO and Altobridge. With the introduction of Fleet Broadband, we have significantly enhanced our range of available services and, we look forward to continuing to enhance our service offering and growing our global fleet of customers*

About Blue Ocean Wireless

Blue Ocean Wireless is focused on expanding communication capability in the merchant maritime sector. Blue Ocean Wireless, founded in March, 2007 provides, for the first time, GSM connectivity for seafarers in deep ocean water, where no other network exists. This allows users to make and receive voice calls, send and receive SMS text messages and, in time, browse the internet using their existing handsets. This technology can also be used, in conjunction with RFID technology, to track and monitor shipping containers while they are in transit at sea. Blue Ocean Wireless works in partnership with communications industry leaders including, Altobridge, JRC, Seacom, Smart and Stratos to provide the best products to its customers. For more information, please visit www.blueoceanwireless.com
