

FIDELITY SOUTHERN CORP
Form 10-Q
May 08, 2014

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the
Securities Exchange Act of 1934
For the quarter ended March 31, 2014
Commission file number 001-34981

Fidelity Southern Corporation
(Exact name of registrant as specified in its charter)

Georgia (State or other jurisdiction of incorporation or organization) 3490 Piedmont Road, Suite 1550, Atlanta GA (Address of principal executive offices)	58-1416811 (I.R.S. Employer Identification No.) 30305 (Zip Code)
---	--

(404) 639-6500
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

As of April 30, 2014 (the most recent practicable date), the Registrant had outstanding approximately 21,289,718 shares of Common Stock.

FIDELITY SOUTHERN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
March 31, 2014
(UNAUDITED)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The unaudited consolidated financial statements include the accounts of Fidelity Southern Corporation ("FSC" or "Fidelity") and its wholly-owned subsidiaries. FSC owns 100% of Fidelity Bank (the "Bank") and LionMark Insurance Company, an insurance agency offering consumer credit related insurance products. FSC also owns three subsidiaries established to issue trust preferred securities, which are not consolidated for financial reporting purposes in accordance with current accounting guidance, as FSC is not the primary beneficiary. The "Company" or "our", as used herein, includes FSC and its subsidiaries, unless the context otherwise requires.

These unaudited consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles followed within the financial services industry for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required for complete financial statements.

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the period. Actual results could differ significantly from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, the calculations of and the amortization of capitalized servicing rights, valuation of deferred income taxes, the valuation of loans held-for-sale and certain derivatives, the valuation of real estate or other assets acquired in connection with foreclosures or in satisfaction of loans, estimates used for fair value acquisition accounting, and Federal Deposit Insurance Corporation (the "FDIC") receivable for loss share agreements. The Company principally operates in one business segment, which is community banking.

In the opinion of management, all adjustments considered necessary for a fair presentation of the financial position and results of operations for the interim periods have been included. All such adjustments are normal recurring accruals. All significant intercompany accounts and transactions have been eliminated in consolidation. These reclassifications had no impact on previously reported net income and shareholders' equity.

The Company's significant accounting policies are described in Note 1 of the Notes to Consolidated Financial Statements included in the 2013 Annual Report on Form 10-K/A filed with the Securities and Exchange Commission. There were no new accounting policies or changes to existing policies adopted in the first three months of 2014, which had a significant effect on the results of operations or statement of financial condition. For interim reporting purposes, the Company follows the same basic accounting policies and considers each interim period as an integral part of an annual period.

Operating results for the three-month period ended March 31, 2014, are not necessarily indicative of the results that may be expected for the year ended December 31, 2014. These statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K/A and Annual Report to Shareholders for the year ended December 31, 2013.

Recent Accounting Pronouncements

In January 2014, the FASB issued Accounting Standards Update ("ASU") 2014-04 "Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure." The amendments clarify when an in substance repossession or foreclosure occurs, such that the loan should be derecognized and real estate property should be recognized. The amendments will be effective for entities during annual reporting periods beginning after December 15, 2014, and interim reporting periods therein and those requirements should be applied prospectively. Early adoption is permitted. The adoption of this ASU is not expected to have a significant impact on the Company's Consolidated Financial Statements.

Other accounting standards that have been issued or proposed by the FASB or other standard-setting bodies are expected to have a material impact on the Company financial position, results of operations or cash flows.

Contingencies

Due to the nature of their activities, the Company and its subsidiaries are at times engaged in various legal proceedings that arise in the course of normal business, some of which were outstanding as of March 31, 2014. While it is difficult to predict or determine the outcome of these proceedings, it is the opinion of management, after consultation with its legal counsel, that the ultimate liabilities, if any, will not have a material adverse impact on the Company's consolidated results of operations, financial position, or cash flows.

Table of Contents

2. INVESTMENT SECURITIES

The amortized cost and fair value of debt securities are categorized in the table below by expected repricing dates. The expected maturities may differ from the contractual maturities of mortgage backed securities because the mortgage holder of the underlying mortgage loans has the right to prepay their mortgage loans without prepayment penalties. The expected maturities may differ from the contractual maturities of callable agencies and municipal securities because the issuer has the right to redeem the callable security at predetermined prices at specified times prior to maturity.

(in thousands)	March 31, 2014		December 31, 2013	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Available-for-sale:				
Obligations of U.S. Government sponsored enterprises and agencies:

Residential mortgage-backed securities	\$4,051	\$386	\$—	\$—	\$4,437
--	---------	-------	-----	-----	---------

At March 31, 2014 and December 31, 2013, all securities in an unrealized loss position had been in a loss position for less than 12 months, and result from fluctuations in interest rates and not credit-related issues. As of March 31, 2014, management does not intend to sell the temporarily impaired securities and it is not more likely than not that the Company will be required to sell the investments before recovery of the amortized cost basis. Accordingly, as of March 31, 2014, management believes the impairment detailed in the prior table is temporary and no impairment loss has been recognized in the Company's Consolidated Statements of Comprehensive Income.

3. LOANS HELD-FOR-SALE

Loans held-for-sale at March 31, 2014 and December 31, 2013 totaled \$180.6 million and \$187.4 million, respectively, and are shown in the table below:

(in thousands)	March 31, 2014	December 31, 2013
SBA	\$8,355	\$9,516
Real estate – mortgage – residential	112,195	127,850
Consumer installment	60,000	50,000
Total loans held-for-sale	\$180,550	\$187,366

4. LOANS

Loans outstanding, by class, are summarized in the following table and are presented net of deferred fees and costs of \$5.6 million and \$5.3 million at March 31, 2014 and December 31, 2013, respectively. Non-covered loans represent existing portfolio loans prior to the FDIC-assisted transactions, loans acquired but not covered under the Loss Share Agreements, and additional loans originated subsequent to the FDIC-assisted transactions.

(in thousands)	Non-covered		Covered	
	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013
Commercial	\$490,993	\$493,093	\$34,355	\$37,885

Total loans	\$1,796,256	\$1,834,672	\$51,836	\$58,365

Table of Contents

Loans in nonaccrual status totaled approximately \$56.6 million, and \$59.6 million at March 31, 2014 and December 31, 2013, respectively. Period-end nonaccrual loans, segregated by class of loans, are described in the following table.

(in thousands)	Non-covered		Covered	
	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013
Commercial	\$10,782	\$10,890	\$9,934	\$10,094
SBA	15,911	15,385	—	—
Total commercial loans	26,693	26,275	9,934	10,094
Construction	8,924	9,093	3,865	6,193
Indirect automobile	2,122	2,362	—	—
Installment	508	601	871	1,249
Total consumer loans	2,630	2,963	871	1,249
First mortgage	1,876	1,886	411	561
Second mortgage	860	727	536	541
Total mortgage loans	2,736	2,613	947	1,102
Total loans	\$40,983	\$40,944	\$15,617	\$18,638

Loans delinquent 30-89 days and troubled debt restructured loans accruing interest, segregated by class of loans at March 31, 2014 and December 31, 2013, were as follows:

(in thousands)	March 31, 2014		December 31, 2013	
	Accruing Delinquent 30-89 Days	Troubled Debt Restructured Loans Accruing	Accruing Delinquent 30-89 Days	Troubled Debt Restructured Loans Accruing

Construction	12	598	—	1,662
Indirect automobile	1,117	2,122	1,561	2,209
Installment	178	—	305	—
First mortgage	249	643	1,314	647
Second mortgage	631	—	163	—
Total loans	\$4,045	\$13,311	\$5,132	\$14,280

There was one loan in the construction portfolio 90 days or more past due and still accruing as of March 31, 2014 for \$488,000. There were no loans 90 days or more past due and still accruing at December 31, 2013.

Troubled Debt Restructurings (“TDRs”) are loans in which the borrower is experiencing financial difficulty and the Company has granted an economic concession to the borrower. Prior to modifying a borrower’s loan terms, the Company performs an evaluation of the borrower’s financial condition and ability to service the loan under the potential modified loan terms. The types of concessions granted are generally interest rate reductions or term extensions. If a loan is accruing at the time of modification, the loan remains on accrual status and is subject to the Company’s charge-off and nonaccrual policies. If a loan is on nonaccrual status before it is determined to be a TDR, then the loan remains on nonaccrual status. TDRs may be returned to accrual status if there has been at least a six-month sustained period of repayment performance by the borrower. Interest income recognition on impaired loans is dependent upon nonaccrual status.

During the periods ended March 31, 2014 and 2013, certain loans were modified, resulting in TDRs. The modification of the terms of such loans included one or a combination of the following modifications: a reduction of the stated interest rate of the loan or an extension of the maturity date at a stated rate of interest lower than the current market rate for new debt with similar risk.

Table of Contents

The following table presents loans, by class, which were modified as TDRs that occurred during the three months ended March 31, 2014 and 2013 along with the type of modification:

Installment	127	96	—	—
First mortgage	155	—	—	76
Second mortgage	—	217	—	140
Total loans	\$282	\$487	\$214	\$649

The following table presents the amount of loans which were restructured in the previous twelve months ended March 31, 2013 and March 31, 2012 and subsequently defaulting during the periods ended March 31, 2014 and March 31, 2013:

(in thousands)	Troubled Debt Restructured during the last twelve months and subsequently defaulting during the periods ended ⁽¹⁾	
	March 31, 2014	March 31, 2013
Commercial	\$—	\$—
SBA	—	—
Construction	—	—
Indirect automobile	—	351
Installment	96	—
First mortgage	—	76
Second mortgage	—	—
Total loans	\$96	\$427

⁽¹⁾ A loan is considered to be in payment default once it is 30 days contractually past due under the modified terms. The Company had TDRs with a balance of \$24.8 million and \$25.6 million at March 31, 2014 and December 31, 2013, respectively. There were charge-offs of TDR loans of \$25,000 for the three months ended March 31, 2014 and \$1.9 million for the three months ended March 31, 2013. Charge-offs on such loans are factored into the rolling historical loss rate, which is one of the considerations used in establishing the allowance for loan losses. The Company is not committed to lend additional amounts as of March 31, 2014 and December 31, 2013 to customers with outstanding loans that are classified as TDRs.

Table of Contents

Impaired loans are evaluated based on the present value of expected future cash flows discounted at each loan's original effective interest rate, or at the loan's observable market price, or the fair value of the collateral, if the loan is collateral-dependent. Impaired loans at March 31, 2014 and December 31, 2013, by class, are shown in the table below:

(in thousands)	March 31, 2014			December 31, 2013		
	Unpaid Principal	Amortized Cost	Related Allowance	Unpaid Principal	Amortized Cost	Related Allowance
Impaired loans with allowance						
Commercial	\$9,706	\$9,588	\$4,096	\$9,501	\$9,381	\$4,037

Table of Contents

The Company uses an asset quality ratings system to assign a numeric indicator of the credit quality and level of existing credit risk inherent in a loan. These ratings are adjusted periodically as the Company becomes aware of changes in the credit quality of the underlying loans. The following are definitions of the asset ratings.

- Rating #1 - #4 (High - Acceptable Quality) – These categories include loans with good to acceptable business and credit risk.
- Rating #5 (Special Mention) – A special mention asset has potential weaknesses that deserve management's close attention.
- Rating #6 (Substandard) – A substandard asset is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any.
- Rating #7 (Doubtful) – Doubtful assets have all the weaknesses inherent in assets classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.
- Rating #8 (Loss) – Loss assets are considered uncollectable and of such little value that their continuance as recorded assets is not warranted.

The table below shows the weighted average asset rating by class as of March 31, 2014 and December 31, 2013:

	Weighted Average Asset Rating	
	March 31, 2014	December 31, 2013
Commercial	3.92	3.93
SBA	4.42	4.40
Construction	4.39	4.49
Indirect automobile	3.01	3.01
Installment	3.65	3.78
First mortgage	3.07	3.06
Second mortgage	3.31	3.31

The Company uses FICO scoring to help evaluate the likelihood consumer borrowers will pay their credit obligations as agreed. The weighted-average FICO score for the indirect loan portfolio, included in consumer installment loans, was 737 at March 31, 2014 and 733 at December 31, 2013.

Purchased Credit Impaired ("PCI") Loans:

The carrying amount of PCI loans at March 31, 2014 and December 31, 2013 follows.

(in thousands)	March 31, 2014	December 31, 2013
Commercial	\$36,506	\$40,060
Construction	6,113	8,769
Consumer	2,856	3,050
Mortgage	9,758	9,997
Outstanding balance	\$55,233	\$61,876

Accretible yield, or income expected to be collected on PCI loans at March 31, 2014 and March 31, 2013, is as follows.

(in thousands)	March 31, 2014	March 31, 2013
Beginning balance, January 1	\$14,045	\$20,171
Accretion of income	(771)	(1,611)
Other activity, net	(257)	(110)
Ending balance	\$13,017	\$18,450

Table of Contents

5. ALLOWANCE FOR LOAN LOSS

The allowance for loan losses is established as losses are estimated to have occurred through a provision charged to operations. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is maintained at a level which, in management's opinion, is adequate to absorb credit losses inherent in the portfolio. The Company utilizes both peer group analysis, as well as a historical analysis of the Company's portfolio to validate the overall adequacy of the allowance for loan losses. In addition to these objective criteria, the Company subjectively assesses the adequacy of the allowance for loan losses with consideration given to current economic conditions, changes to loan policies, the volume and type of lending, composition of the portfolio, the level of classified and criticized credits, seasoning of the loan portfolio, payment status and other factors.

A summary of changes in the allowance for loan losses, by loan portfolio category, for the three months ended March 31, 2014 and 2013 is as follows:

(in thousands)	Three Months Ended March 31, 2014							Total
	Commercial	Construction	Consumer	Mortgage	Covered	Acquired, Non-Covered	Unallocated

6. BORROWINGS

The following schedule details the Company's borrowings at March 31, 2014 and December 31, 2013.

(in thousands)	March 31, 2014	December 31, 2013
	\$13,685	\$14,233

Overnight repurchase agreements, primarily with commercial customers at an average rate of 0.16% and 0.14% at March 31, 2014 and December 31, 2013

Short-term borrowings	30,000	45,000
Total borrowings	\$43,685	\$59,233

Overnight repurchase agreements consist primarily of balances in the transaction accounts of commercial customers swept nightly to an overnight investment account. Overnight repurchase agreements are collateralized by investment securities having a market value equal to or greater than the balance borrowed. Short-term borrowings mature either overnight or have a remaining fixed maturity not to exceed one year and consist of advances from the Federal Home Loan Bank of Atlanta (the "FHLB") collateralized with pledged qualifying real estate loans or investment securities.

Table of Contents

7. FAIR VALUE OF FINANCIAL INSTRUMENTS

The Company reports the fair value of its financial assets and liabilities based on three levels of the fair value hierarchy as described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 – Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly;

Level 3 – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

A financial instrument's level within the hierarchy is based on the lowest level of input that is significant to the fair value measurement. Fair value enables a company to mitigate the non-economic earnings volatility caused from financial assets and financial liabilities being carried at different bases of accounting, as well as to more accurately portray the active and dynamic management of a company's balance sheet.

Mortgage Loans Held-for-Sale

The Company records mortgage loans held-for-sale at fair value. The Company chose to fair value these mortgage loans held-for-sale in order to eliminate the complexities and inherent difficulties of achieving hedge accounting and to better align reported results with the underlying economic changes in value of the loans and related hedge instruments. This election impacts the timing and recognition of origination fees and costs, as well as servicing value. Specifically, origination fees and costs, which had previously been deferred and previously recognized as part of the gain/loss on sale of the loans, are now recognized in earnings at the time of origination. Interest income on mortgage loans held-for-sale is recorded on an accrual basis in the Consolidated Statements of Comprehensive Income under the heading "Interest income-loans, including fees." The servicing value is included in the fair value of the mortgage loan held-for-sale and initially recognized at the time the Company enters into Interest Rate Lock Commitments ("IRLCs") with borrowers. The mark-to-market adjustments related to loans held-for-sale and the associated economic hedges are reported in noninterest income from mortgage banking activities in the Consolidated Statements of Comprehensive Income.

Valuation Methodologies and Fair Value Hierarchy

The primary financial instruments that the Company carries at fair value include investment securities, IRLCs, derivative instruments, and mortgage loan held-for-sale.

Debt securities issued by U.S. Government corporations and agencies, debt securities issued by states and political subdivisions, and agency residential mortgage-backed securities classified as available-for-sale are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things. The investments in the Company's portfolio are generally not quoted on an exchange but are actively traded in the secondary institutional markets. The fair value of mortgage loans held-for-sale is based on what secondary markets are currently offering for portfolios with similar characteristics. The fair value measurements consider observable data that may include market trade pricing from brokers and the mortgage-backed security markets. As such, the Company classifies these loans as Level 2.

The Company classifies IRLCs on residential mortgage loans held-for-sale, which are derivatives under ASC 815-10-15, on a gross basis within other liabilities or other assets. The fair value of these commitments, while based on interest rates observable in the market, is highly dependent on the ultimate closing of the loans. These "pull-through" rates are based on both the Company's historical data and the current interest rate environment and reflect the Company's best estimate of the likelihood that a commitment will ultimately result in a closed loan. The loan servicing value is also included in the fair value of IRLCs. Because these inputs are not transparent in market trades, IRLCs are considered to be Level 3 assets.

Derivative instruments are primarily transacted in the secondary mortgage and institutional dealer markets and priced with observable market assumptions at a mid-market valuation point, with appropriate valuation adjustments for liquidity and credit risk. For purposes of valuation adjustments to its derivative positions, the Company has evaluated

liquidity premiums that may be demanded by market participants, as well as the credit risk of its counterparties and its own credit if applicable. To date, no material losses due to a counterparty's inability to pay any net uncollateralized position have occurred.

Table of Contents

The credit risk associated with the underlying cash flows of an instrument carried at fair value was a consideration in estimating the fair value of certain financial instruments. Credit risk was considered in the valuation through a variety of inputs, as applicable, including, the actual default and loss severity of the collateral, and level of subordination. The assumption used to estimate credit risk applied relevant information that a market participant would likely use in valuing an instrument. Because mortgage loans held-for-sale are sold within a few weeks of origination, they were unlikely to demonstrate any of the credit weaknesses discussed above and as a result, there were no credit-related adjustments to fair value during the three month periods ended March 31, 2014 and 2013.

The following tables present financial instruments measured at fair value at March 31, 2014 and December 31, 2013, on a recurring basis. There have been no transfers between Level 1, 2, and 3.

(in thousands)	Assets Measured at Fair Value March 31, 2014	Fair Value Measurements at March 31, 2014

(1) Not Meaningful

Impaired loans are evaluated and valued at the time the loan is identified as impaired, at the lower of cost or fair value. For collateral-dependent loans, fair value is measured based on the value of the collateral securing these loans and is classified as a Level 3 in the fair value hierarchy. Collateral may include real estate or business assets, including equipment, inventory and accounts receivable. The value of real estate collateral is determined based on an appraisal by qualified licensed appraisers hired by the Company. If significant, the value of business equipment is based on an appraisal by qualified licensed appraisers hired by the Company; otherwise, the equipment's net book value on the business' financial statements is the basis for the value of business equipment. Inventory and accounts receivable collateral are valued based on independent field examiner review or aging reports. Appraised and reported values may be discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business. Impaired loans are evaluated on at least a quarterly basis for additional impairment and adjusted accordingly.

Foreclosed assets are adjusted to fair value upon transfer of the loans to ORE. Subsequently, foreclosed assets are carried at the lower of carrying value or fair value less estimated selling costs. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the foreclosed asset as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the foreclosed asset as nonrecurring Level 3. Appraised and reported values may be discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business. Increases or decreases in realization for properties sold impact the comparability adjustment for similar assets remaining on the balance sheet.

Mortgage and SBA servicing rights are initially recorded at fair value when loans are sold service retained. These assets are then amortized in proportion to and over the period of estimated net servicing income. On at least a quarterly basis, these servicing assets are assessed for impairment based on fair value. Management determines fair value by stratifying the servicing portfolio into homogeneous subsets with unique behavior characteristics, converting

those characteristics into income and expense streams, adjusting those streams for prepayments, present valuing the adjusted streams, and combining the present values into a total. If the cost basis of any loan stratification tranche is higher than the present value of the tranche, an impairment is recorded. See Note 10 for additional disclosures related to assumptions used in the fair value calculation for mortgage and SBA servicing rights.

Table of Contents

Management makes certain estimates and assumptions related to costs to service varying types of loans and pools of loans, prepayment speeds, the projected lives of loans and pools of loans sold servicing retained, and discount factors used in calculating the present values of servicing fees projected to be received. No less frequently than quarterly, management reviews the status of mortgage loans held-for-sale for which fair value has been elected and pools of servicing assets to determine if there is any impairment to those assets due to such factors as earlier than estimated repayments or significant prepayments. Any impairment identified in these assets will result in reductions in their carrying values through a valuation allowance and a corresponding increase in operating expenses.

The significant unobservable input used in the fair value measurement of the Company's IRLCs is the pull-through rate, which represents the percentage of loans currently in a lock position which management estimates will ultimately close. Generally, the fair value of an IRLC is positive (negative) if the prevailing interest rate is lower (higher) than the IRLC rate. Therefore, an increase in the pull-through rate (i.e., higher percentage of loans are estimated to close) will result in the fair value of the IRLC to increase if in a gain position, or decrease if in a loss position. The closing ratio is largely dependent on the loan processing stage that a loan is currently in and the change in prevailing interest rates from the time of the rate lock. The closing ratio is computed by the secondary marketing system using historical data and the ratio is periodically reviewed by the Company's Secondary Marketing Department of the Mortgage Banking Division for reasonableness.

Forward commitments are instruments that are used to hedge the value of the IRLCs and mortgage loans held -for-sale. Primarily, forward commitments are made up of Federal National Mortgage Association ("FNMA") 30 year and 15 year fixed rate MBS and, to a lesser extent, Government National Mortgage Association ("GNMA") 30 year and 15 year fixed rate MBS forward commitments. An MBS forward commitment is an agreement to sell an MBS security at an agreed-upon principal and interest rate pass through at a specific date in the future. The Company also takes investor commitments to sell a loan or pool of newly-originated loans to an investor for an agreed upon price for delivery in the future. This type of forward commitment is also known as a mandatory commitment. Generally, the fair value of a forward commitment is positive (negative) if the prevailing interest rate is lower (higher) than the current commitment interest rate. The value of these commitments is ultimately determined by the investor that sold the commitment and represents a significant unobservable input used in the fair value measurement of the Company's fair value of forward commitments.

The following table presents the difference between the aggregate fair value and the aggregate unpaid principal balance of loans held-for-sale for which the fair value option has been elected as of March 31, 2014 and December 31, 2013. There were no loans held-for-sale measured under the fair value option that are 90 days or more past due or in nonaccrual status at March 31, 2014 and December 31, 2013.

(in thousands)	Aggregate Fair Value March 31, 2014	Aggregate Unpaid Principal Balance Under FVO at March 31, 2014	Fair Value Over Unpaid Principal
Loans held-for-sale	\$ 112,195	\$ 110,835	\$ 1,360
(in thousands)	Aggregate Fair Value December 31, 2013	Aggregate Unpaid Principal Balance Under FVO at December 31, 2013	Fair Value Over Unpaid Principal
Loans held-for-sale	\$ 127,850	\$ 127,759	\$ 91

Table of Contents

ASC 825-10 requires interim disclosure of fair value information about financial instruments, whether or not recognized in the balance sheet, for which it is practicable to estimate that value. In cases where quoted market prices are not available, fair values are based on settlements using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets, and, in many cases, could not be realized in immediate settlement of the instrument. The aggregate fair value amounts presented in the table below do not represent the underlying value of the Company.

Fair Value Measurements at March 31, 2014:

(in thousands)	Carrying Amount	Quoted Prices in Active Markets for Identical Assets Level 1	Significant Other Observable Inputs Level 2	Significant Unobservable Inputs Level 3	Total Fair Value
Financial instruments (assets):					
Cash and cash equivalents	\$ 166,952	\$ 166,952	\$—	\$—	\$ 166,952
Investment securities available-for-sale	163,803	—	163,803	—	163,803
Investment securities held-to-maturity	3,795	—	4,161	—	4,161
Total loans ⁽¹⁾	1,997,845	—	112,195	1,889,010	2,001,205
Financial instruments (liabilities):

Other borrowings	59,233	—	59,233	—	59,233
Subordinated debt	46,393	—	45,737	—	45,737

(1) Includes \$112,195 and \$127,850 in mortgage loans held-for-sale at fair value at March 31, 2014 and December 31, 2013, respectively.

The carrying amounts reported in the Consolidated Balance Sheets for cash and cash equivalents approximate the fair values of those assets. For investment securities, fair value equals quoted market prices, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities or dealer quotes. Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type. The fair value of performing loans is calculated by discounting scheduled cash flows through the remaining maturities using estimated market discount rates that reflect the credit and interest rate risk inherent in the loans along with a market risk premium and liquidity discount.

Fair value for significant nonperforming loans is estimated taking into consideration recent external appraisals of the underlying collateral for loans that are collateral-dependent. If appraisals are not available or if the loan is not collateral-dependent, estimated cash flows are discounted using a rate commensurate with the risk associated with the estimated cash flows. Assumptions regarding credit risk, cash flows, and discount rates are judgmentally determined using available market information and specific borrower information.

Table of Contents

The fair value of deposits with no stated maturities, such as noninterest-bearing demand deposits, savings, interest-bearing demand, and money market accounts, is equal to the amount payable on demand. The fair value of time deposits is based on the discounted value of contractual cash flows based on the discount rates currently offered for deposits of similar remaining maturities.

The fair value of the Company's borrowings is estimated based on the quoted market prices for the same or similar issues or on the current rates offered for debt of the same remaining maturities.

For off-balance sheet instruments, fair values are based on rates currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing for loan commitments and letters of credit. Fees related to these instruments were immaterial at March 31, 2014 and December 31, 2013, and the carrying amounts represent a reasonable approximation of their fair values. Loan commitments, letters and lines of credit, and similar obligations typically have variable interest rates and clauses that deny funding if the customer's credit quality deteriorates. Therefore, the fair values of these items are not significant and are not included in the foregoing schedule.

Netting of Financial Instruments

Overnight repurchase agreements consist primarily of balances in the transaction accounts of commercial customers swept nightly to an overnight investment account. Overnight repurchase agreements are collateralized with investment securities having a market value that approximates the balance borrowed. Overnight repurchase agreements are not subject to offset. As of March 31, 2014, the Company had \$13.7 million in overnight repurchase agreements as presented in the Consolidated Balance Sheets, collateralized by securities with a fair value of \$20.8 million, resulting in a net position of \$7.1 million. There are no derivative contracts subject to master netting agreements or subject to offset.

8. DERIVATIVE FINANCIAL INSTRUMENTS

The Company maintains a risk management program to manage interest rate risk and pricing risk associated with its mortgage lending activities. The risk management program includes the use of forward contracts and other derivatives that are recorded in the financial statements at fair value and are used to offset changes in value of the mortgage inventory due to changes in market interest rates. As a normal part of its operations, the Company enters into derivative contracts to economically hedge risks associated with overall price risk related to IRLCs and mortgage loans held-for-sale for which the fair value option has been elected. Fair value changes occur as a result of interest rate movements as well as changes in the value of the associated servicing. Derivative instruments used include forward sale commitments and IRLCs. All derivatives are carried at fair value in the Consolidated Balance Sheets in other assets or other liabilities. A gross loss of \$605,000 and \$1.2 million was recorded for all related commitments for the three months ended March 31, 2014, and March 31, 2013, respectively, and is recorded in the Consolidated Statements of Comprehensive Income. The Company's derivative contracts are not subject to master netting arrangements.

The Company's risk management derivatives are based on underlying risks primarily related to interest rates and forward sales commitments. Forward sales commitments are contracts for the delayed delivery or net settlement of an underlying instrument, such as a mortgage loan, in which the seller agrees to deliver on a specified future date, either a specified instrument at a specified price or yield or the net cash equivalent of an underlying instrument. These hedges are used to preserve the Company's position relative to future sales of mortgage loans to third parties in an effort to minimize the volatility of the expected gain on sale from changes in interest rate and the associated pricing changes.

Credit and Market Risk Associated with Derivatives

Derivatives expose the Company to credit risk. If the counterparty fails to perform, most counterparties are government sponsored enterprises, so the credit risk at that time would be equal to the net derivative asset position, if any, for that counterparty. The Company minimizes the credit or repayment risk in derivative instruments by entering into transactions with high-quality counterparties that are reviewed periodically.

The Company's derivative positions as of March 31, 2014 and December 31, 2013 were as follows:

(in thousands)	Contract or Notional Amount	
	March 31, 2014	December 31, 2013

Edgar Filing: FIDELITY SOUTHERN CORP - Form 10-Q

Forward rate commitments	\$289,632	\$240,574
Interest rate lock commitments	189,197	122,343
Total derivatives contracts	\$478,829	\$362,917

19

Table of Contents

9. EARNINGS PER SHARE

Earnings per share were calculated as follows:

(in thousands, except per share data)	Three Months Ended March 31,	
	2014	2013
Net income	\$6,063	\$6,491
Less dividends on preferred stock and accretion of discount	—	(823)
Net income available to common equity	\$6,063	\$5,668
Average common shares outstanding ⁽¹⁾	21,288	14,827
Effect of stock dividends	—	431
Average common shares outstanding – basic	21,288	15,258
Dilutive stock options and warrant	2,159	1,977
Average common shares outstanding – diluted	23,447	17,235
Earnings per share – basic	\$0.28	\$0.37
Earnings per share – diluted	\$0.26	\$0.33

⁽¹⁾ Average number of common shares outstanding for the three months ended March 31, 2014 and 2013 includes participating securities related to unvested restricted stock awards, net of forfeitures during the period.

For the three months ended March 31, 2014 and March 31, 2013, there were 402,000 and 100,000 common stock options with an average exercise price of \$14.11 and \$9.00, respectively. These shares would have been included in the calculation of dilutive earnings per share, except that to do so would have an anti-dilutive impact on earnings per share.

10. CERTAIN TRANSFERS OF FINANCIAL ASSETS

The Company has transferred certain residential mortgage loans, SBA loans, and indirect automobile loans in which the Company has continuing involvement to third parties. The Company has not engaged in securitization activities with respect to such loans. All such transfers have been accounted for as sales by the Company. The Company's continuing involvement in such transfers has been limited to certain servicing responsibilities. The Company is not required to provide additional financial support to any of these entities, nor has the Company provided any support it was not obligated to provide. Servicing rights may give rise to servicing assets, which are initially recognized at fair value, subsequently amortized, and tested for impairment. Gains or losses upon sale, in addition to servicing fees and collateral management fees, are recorded in noninterest income.

The majority of the indirect automobile loan pools and certain SBA and residential mortgage loans are sold with servicing retained. When the contractually-specific servicing fees on loans sold with servicing retained are expected to be more than adequate compensation to a servicer for performing the servicing, a capitalized servicing asset is recognized based on fair value. When the expected costs to a servicer for performing loan servicing are not expected to adequately compensate a servicer, a capitalized servicing liability is recognized based on fair value. Servicing assets and servicing liabilities are amortized over the expected lives of the serviced loans utilizing the interest method. Management makes certain estimates and assumptions related to costs to service varying types of loans and pools of loans, prepayment speeds, the projected lives of loans and pools of loans sold servicing retained, and discount factors used in calculating the present values of servicing fees projected to be received.

At March 31, 2014 and December 31, 2013, the total fair value of servicing for mortgage loans was \$56.1 million and \$53.7 million, respectively. The fair value of servicing for SBA loans was \$4.7 million at March 31, 2014 and December 31, 2013. To estimate the fair values of these servicing assets, consideration was given to dealer indications of market value, where applicable, as well as the results of discounted cash flow models using key assumptions and inputs for prepayment rates, credit losses, and discount rates. The fair value of servicing for indirect loans approximates carrying value. Carrying value of these servicing assets is shown in the table below:

(in thousands)	March 31, 2014	December 31, 2013
Mortgage servicing	\$48,335	\$46,785

Edgar Filing: FIDELITY SOUTHERN CORP - Form 10-Q

SBA servicing	4,536	4,529
Indirect servicing	2,410	1,888
Total carrying value of servicing assets	\$55,281	\$53,202

20

Table of Contents

Residential Mortgage Loans

The Company typically sells first-lien residential mortgage loans to third party investors including Fannie Mae, Ginnie Mae, and Freddie Mac. Certain of these loans are exchanged for cash and servicing rights, which generate servicing assets for the Company. The servicing assets are recorded initially at fair value and subsequently at the lower of cost or market and amortized in proportion to, and over the estimated period that, net servicing income is expected to be received. As seller, the Company has made certain standard representations and warranties with respect to the originally transferred loans. The Company estimates its reserves under such arrangements predominantly based on prior experience. To date, the Company's estimate of reserve related to this liability, amount of loans repurchased as well as asserted claims under these provisions have been de minimis.

During the three months ended March 31, 2014 and 2013, the Company sold residential mortgage loans with unpaid principal balances of \$286.8 million and \$536.8 million, respectively, on which the Company retained the related mortgage servicing rights ("MSRs") and receives servicing fees. At March 31, 2014, December 31, 2013, and March 31, 2013 the approximate weighted average net servicing fee was 0.26%, 0.25%, and 0.25%, respectively. The weighted average coupon interest rate was 3.91%, 3.88%, and 3.89% at March 31, 2014, December 31, 2013, and March 31, 2013, respectively.

The table below is an analysis of the activity in the Company's residential MSRs and impairment for the three months ended March 31, 2014 and 2013:

(in thousands)	Three Months Ended March 31,	
	2014	2013
Residential mortgage servicing rights		
Beginning carrying value	\$46,785	\$23,085
Additions	3,744	6,176
Amortization	(1,574) (1,705
Recovery/(impairment), net	(620) 1,607
Ending carrying value	\$48,335	\$29,163
 Residential mortgage servicing impairment		
Beginning balance	\$3,129	\$5,070
Additions	667	—
Recoveries	(47) (1,607
Ending balance	\$3,749	\$3,463

Table of Contents

The Company uses assumptions and estimates in determining the impairment of capitalized MSR. These assumptions include prepayment speeds and discount rates commensurate with the risks involved and comparable to assumptions used by market participants to value and bid MSR available for sale in the market. At March 31, 2014, the sensitivity of the current fair value of the residential mortgage servicing rights to immediate 10% and 20% adverse changes in key economic assumptions are included in the accompanying table.

(\$ in thousands)	March 31, 2014	
Residential mortgage servicing rights		
Fair value	\$56,084	
Composition of residential loans serviced for others:		
Fixed-rate	99.6	%
Adjustable-rate	0.4	%
Total	100.0	%
Weighted average remaining term (years)	25.9	
Prepayment speed	7.65	%
Effect on fair value of a 10% increase	\$(1,586))
Effect on fair value of a 20% increase	(3,074))
Weighted average discount rate	10.04	%
Effect on fair value of a 10% increase	\$(2,066))
Effect on fair value of a 20% increase	(3,972))

The sensitivity calculations above are hypothetical and should not be considered to be predictive of future performance. As indicated, changes in value based on adverse changes in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in value may not be linear. Also, in this table, the effect of an adverse variation in a particular assumption on the value of the MSR is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments), which may magnify or counteract the effect of the change.

Information about the asset quality of residential mortgage loans serviced by the Company at March 31, 2014 is detailed in the following table:

(in thousands)	March 31, 2014			Three Months Ended
	Unpaid Principal	Delinquent (days)		March 31, 2014 Charge-offs
		30 to 89	90+	
Mortgage loan servicing portfolio	\$4,571,585	\$5,441	\$2,930	\$—
Mortgage loans held-for-sale	110,835	—	—	—
Mortgage loans held-for-investment	64,554	249	—	23
Total residential mortgages serviced	\$4,746,974	\$5,690	\$2,930	\$23

SBA Loans

The Company has executed certain transfers of SBA loans with third parties. These loans, which are typically partially guaranteed by the SBA or otherwise credit enhanced, are generally secured by business property such as real estate, inventory, equipment and accounts receivable. As seller, the Company has made certain standard representations and warranties with respect to the originally transferred loans and the Company has not incurred any material losses to date with respect to such representations and warranties. The Company estimates its reserves under such arrangements predominantly based on prior experience. To date, the Company's estimate of reserve related to this liability, amount of loans repurchased as well as asserted claims under these provisions have been de minimis.

During the three months ended March 31, 2014 and 2013, the Company sold SBA loans with unpaid principal balances of \$6.6 million and \$10.2 million, respectively. The Company retained the related loan servicing rights and receives servicing fees. The approximate weighted average net servicing fee was 0.96%, 0.88%, and 0.86% at March 31, 2014, December 31, 2013, and March 31, 2013, respectively. The weighted average coupon interest rate was 5.69%, 5.69%, and 4.96% at March 31, 2014, December 31, 2013, and March 31, 2013, respectively.

Table of Contents

The following is an analysis of the activity in the Company's SBA loan servicing rights and impairment for the three months ended March 31, 2014 and 2013:

(in thousands)	Three Months Ended March 31,	
	2014	2013
SBA loan servicing rights		
Beginning carrying value	\$4,529	\$6,192
Additions	274	489
Amortization	(176) (245
Impairment, net	(91) (203
Ending carrying value	\$4,536	\$6,233

(in thousands)	Three Months Ended March 31,	
	2014	2013
SBA servicing rights impairment		
Beginning balance	\$2,218	\$339
Additions	91	416
Recoveries	—	(213
Ending balance	\$2,309	\$542

SBA loan servicing rights are initially recorded on the Consolidated Balance Sheets at fair value and then accounted for at the lower of cost or market and amortized in proportion to, and over the estimated period that, net servicing income is expected to be received based on projections of the amount and timing of estimated future net cash flows.

The amount and timing of estimated future net cash flows are updated based on actual results and updated projections. The Company evaluates its SBA loan servicing rights for impairment on at least a quarterly basis.

The Company uses assumptions and estimates in determining the impairment of its SBA loan servicing rights. These assumptions include prepayment speeds and discount rates commensurate with the risks involved and comparable to assumptions used by market participants to value and bid servicing rights available for sale in the market. At March 31, 2014, the sensitivity of the current fair value of the SBA loan servicing rights to immediate 10% and 20% adverse changes in key economic assumptions are included in the accompanying table.

(\$ in thousands)	March 31,	
	2014	
SBA loan servicing rights		
Fair value	\$4,686	
Composition of loans serviced for others:		
Fixed-rate	0.1	%
Adjustable-rate	99.9	%
Total	100.0	%
Weighted average remaining term (years)	20.8	
Prepayment speed	5.94	%
Effect on fair value of a 10% increase	\$(79)
Effect on fair value of a 20% increase	(155)
Weighted average discount rate	13.50	%
Effect on fair value of a 10% increase	\$(175)
Effect on fair value of a 20% increase	(339)

The sensitivity calculations above are hypothetical and should not be considered to be predictive of future performance. As indicated, changes in value based on adverse changes in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in value may not be linear. Also in this table, the effect of an adverse variation in a particular assumption on the value of the SBA servicing rights is calculated without changing any other assumption. In reality, changes in one factor may magnify or counteract the effect of the change.

Table of Contents

Information about the asset quality of SBA loans managed by Fidelity at March 31, 2014 is shown in the table below.

(\$ in thousands)	March 31, 2014			Three Months Ended
	Unpaid Principal	Delinquent (days)		March 31, 2014
		30 to 89	90+	Charge-offs
SBA serviced for others portfolio	\$220,034	\$795	\$2,718	\$—
SBA loans held-for-sale	8,355	—	—	—
SBA loans held-for-investment	138,331	1,440	10,070	76
Total SBA loans serviced	\$366,720	\$2,235	\$12,788	\$76

Indirect Loans

The Bank purchases, on a nonrecourse basis, consumer installment contracts secured by new and used vehicles purchased by consumers from franchised motor vehicle dealers and selected independent dealers. A portion of the indirect automobile loans the Bank originates is sold with servicing retained. Certain of these loans are exchanged for cash and servicing rights, which generate servicing assets for the Company.

The servicing assets are recorded initially at fair value in the Consolidated Balance Sheets and then accounted for at lower of cost or market. The servicing assets are subsequently amortized in proportion to, and over the estimated period that net servicing income is expected to be received based on projections of the amount and timing of estimated future net cash flows. The Company evaluates its indirect loan servicing rights for impairment on at least a quarterly basis. As of March 31, 2014, the Company's indirect servicing asset had a balance of \$2.4 million with no impairment. As seller, the Company has made certain standard representations and warranties with respect to the originally transferred loans. The Company estimates its reserves under such arrangements predominantly based on prior experience and the Company has not incurred any material losses to date with respect to such representations and warranties. To date, the Company's estimate of reserve related to this liability, amount of loans repurchased as well as asserted claims under these provisions have been de minimis.

During the three months ended March 31, 2014 and 2013, the Company sold indirect loans with unpaid principal balances of \$195.0 million and \$58.1 million, respectively. Included in sales for the three months ended March 31, 2014, was one of the Company's largest indirect sale transactions at \$101.2 million.

The following is an analysis of the activity in the Company's indirect loan servicing rights for the three months ended March 31, 2014 and 2013. There was no impairment recorded on indirect loan servicing rights during the three months ended March 31, 2014 or March 31, 2013.

(in thousands)	Three Months Ended March 31,	
	2014	2013
Indirect loan servicing rights		
Beginning carrying value	\$1,888	\$967
Additions	730	273
Amortization	(208)) (107)
Ending carrying value	\$2,410	\$1,133

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following analysis reviews important factors affecting our financial condition at March 31, 2014, compared to December 31, 2013, and compares the results of operations for the three months ended March 31, 2014 and 2013. These comments should be read in conjunction with our consolidated financial statements and accompanying notes appearing in this report and the "Risk Factors" set forth in our Annual Report on Form 10-K/A for the year ended December 31, 2013. All percentage and dollar variances noted in the following analysis are calculated from the balances presented in the accompanying consolidated financial statements.

Forward-Looking Statements

This report on Form 10-Q includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that reflect our current expectations relating to present or future trends or factors generally affecting the banking industry and specifically affecting our operations, markets and services. Without limiting the foregoing, the words "believes," "expects," "anticipates," "estimates," "projects," "intends," and similar expressions are intended to identify forward-looking statements. These forward-looking statements are based upon assumptions we believe are reasonable and may relate to, among other things, the difficult economic conditions and the economy's impact on operating results, credit quality, liquidity, capital, the adequacy of the allowance for loan losses, changes in interest rates, and litigation results. These forward-looking statements are subject to risks and uncertainties. Actual results could differ materially from those projected for many reasons, including without limitation, changing events and trends that have influenced our assumptions.

These trends and events include (1) risks associated with our loan portfolio, including difficulties in maintaining quality loan growth, greater loan losses than historic levels, the risk of an insufficient allowance for loan losses, expenses associated with managing nonperforming assets, unique risks associated with our construction and land development loans, our ability to maintain and service relationships with automobile dealers and indirect automobile loan purchasers, and our ability to profitably manage changes in our indirect automobile lending operations; (2) risks associated with adverse economic conditions, including risk of continued stagnation in real estate values in the Atlanta, Georgia, metropolitan area and in eastern and northern Florida markets, conditions in the financial markets and economic conditions generally and the impact of efforts to address difficult market and economic conditions; a stagnant economy and its impact on operations and credit quality, the impact of a recession on our loan portfolio, changes in the interest rate environment and the impact on our net interest margin, and inflation; (3) risks associated with government regulation and programs, uncertainty with respect to future governmental economic and regulatory measures, new regulatory requirements imposed by the Consumer Financial Protection Bureau, new regulatory requirements for residential mortgage loan services, and numerous legislative proposals to further regulate the financial services industry, the impact of and adverse changes in the governmental regulatory requirements affecting us, and changes in political, legislative and economic conditions; (4) the ability to maintain adequate liquidity and sources of liquidity; (5) our ability to maintain sufficient capital and to raise additional capital; (6) the accuracy and completeness of information from customers and our counterparties; (7) the effectiveness of our controls and procedures; (8) our ability to attract and retain skilled people; (9) greater competitive pressures among financial institutions in our market areas; (10) failure to achieve the revenue increases expected to result from our investments in our growth strategies, including our branch additions and in our transaction deposit and lending businesses; (11) the volatility and limited trading of our common stock; (12) the impact of dilution on our common stock; (13) risks related to FDIC-assisted transactions; compliance with certain requirements under our FDIC loss share agreements; changes in national and local economic conditions resulting in higher charge-offs not covered by the FDIC loss share agreements; and (14) risks associated with technological changes and the possibility of Cyberfraud.

This list is intended to identify some of the principal factors that could cause actual results to differ materially from those described in the forward-looking statements included herein and are not intended to represent a complete list of all risks and uncertainties in our business. Investors are encouraged to read the related section in our 2013 Annual Report on Form 10-K/A, including the "Risk Factors" set forth therein. Additional information and other factors that could affect future financial results are included in our filings with the Securities and Exchange Commission.

Overview

Since our inception in 1974, we have pursued managed profitable growth through providing quality financial services. Our overall focus is on building shareholder value. Our mission is “to continue growth, improve earnings and increase shareholder value; to treat customers, employees, community and shareholders according to the Golden Rule; and to operate within a culture of strong internal controls.”

Our franchise primarily spans the metropolitan Atlanta market and also includes one branch office in Jacksonville, Florida. In addition, we conduct indirect automobile lending, residential mortgage lending and SBA lending activities in eleven Southern states. During 2013, we continued to expand our footprint with the opening of additional offices in our retail banking, mortgage lending, and indirect automobile lending divisions including the commencement of indirect automobile lending activities in Texas during the fourth quarter of 2013.

Our lending activities and the total of our nonperforming assets are significantly influenced by the local economic environments in the markets we serve. Since 2012 and continuing into the first quarter of 2014, the economic recession of 2007 to 2009 has begun to recede. This environment has supported our strategy to organically grow our consumer installment, mortgage and commercial loan portfolios. Our loan portfolio is well diversified among consumer, business, and real estate.

Our profitability, as with most financial institutions, is dependent upon net interest income, which is the difference between the interest we receive on interest-earning assets, such as loans and securities, and the interest we pay on interest-bearing liabilities, principally deposits and borrowings. Our net interest margin is affected by prevailing interest rates, nonperforming assets and competition among financial institutions for loans and deposits. During periods of economic slowdown, the lack of interest income from nonperforming assets and an additional provision for loan losses can greatly reduce our profitability.

For the last two years and so far in 2014, approximately half of our profitability was derived from noninterest income sources, such as service charges on deposit accounts and fees on other services, income from indirect automobile lending, SBA and mortgage banking activities, gain on ORE sales and gain on acquisitions. We anticipate this trend will continue as we expand our product offerings to serve the needs of our customers as we have recently done with the addition of our new wealth management department

Beginning in 2014, we have started to realize \$5.8 million in annual after-tax savings as a result of the redemption of \$48.2 million of preferred shares outstanding and \$20.5 million of trust preferred securities on August 30, 2013 and September 9, 2013, respectively. We used the majority of the net proceeds from our public offering which closed in June 2013 to fund these redemptions.

We continue to attract new customer relationships, and talented and experienced bankers to support our growth. The strong focus in 2014 will continue to be on credit quality, revenue growth, expense controls, and quality loan growth to reflect continual and conservative expansion of our deposit and lending footprints.

Results of Operations

Net Income

For the three months ended March 31, 2014, we recorded net income of \$6.1 million compared to net income of \$6.5 million for the same period of 2013. Net income available to common shareholders was \$6.1 million and \$5.7 million for the three months ended March 31, 2014 and 2013, respectively. Basic and diluted earnings per share for the first quarter of 2014 were \$0.28 and \$0.26, respectively, compared to \$0.37 and \$0.33, respectively, for the three months ended March 31, 2013.

The slight decrease in net income for the three months ended March 31, 2014, compared to the same period in 2013, is primarily the result of a \$7.2 million decrease in noninterest income from mortgage banking activities, a decrease of approximately \$800,000 in net interest income and a \$1.3 million decrease in other noninterest income. The decreases were partially offset by an increase in noninterest income from indirect lending activities of \$3.0 million and a negative provision for loan losses of \$2.5 million for the three months ended March 31, 2014, compared to a provision for loan losses of \$3.5 million for the three months ended March 31, 2013.

Table of Contents

Net Interest Income

Net interest margin in the first quarter of 2014 was 3.56%, and a decrease from the first quarter of 2013 result of 3.77%. The 21 basis point year over year decline occurred primarily due to lower market yields on newly originated loans as compared to higher rates on the loans sold or paid off since the first quarter of 2013.

Interest income for the first quarter of 2014 decreased to \$23.1 million from \$25.0 million compared to the first quarter of 2013. The decrease in interest income is primarily attributable to the decrease in mortgage loans held for sale production volume during the first quarter of 2014 as market trends in production have declined since the first half of 2013.

Interest expense for the first quarter of 2014 decreased to \$2.8 million from \$3.9 million compared to the first quarter of 2013, primarily due to a reduction of approximately \$600,000 in subordinated debt expense for the first quarter of 2014 from the repayment of \$20.5 million in subordinated debt in the third quarter of 2013.

(1) Interest income includes the effect of taxable equivalent adjustment for 2014 and 2013 of \$39,000 and \$23,000, respectively.

(2) Interest income includes the effect of taxable-equivalent adjustment for 2014 and 2013 of \$84,000 and \$97,000, respectively.

Table of Contents

Provision for Loan Losses

Management's policy is to maintain the allowance for loan losses at a level sufficient to absorb probable losses inherent in the loan portfolio. The allowance is increased by the provision for loan losses and decreased by charge-offs, net of recoveries, net of amounts due from the FDIC under the loss sharing agreements for our FDIC-assisted transactions.

For all loan categories, historical loan loss experience, adjusted for changes in the risk characteristics of each loan category, current trends, and other factors, is used to determine the level of allowance required. Additional amounts are allocated based on the probable losses of individual impaired loans and the effect of economic conditions on both individual loans and loan categories. Since the allocation is based on estimates and subjective judgment, it is not necessarily indicative of the specific amounts of losses that may ultimately occur.

The allowance for loan losses for homogeneous pools is allocated to loan types based on historical net charge-off rates adjusted for any current trends or other factors. The specific allowance for individually reviewed nonperforming loans and loans having greater than normal risk characteristics is based on a specific loan impairment analysis which in many cases relies predominantly on the adequacy of loan collateral.

In determining the appropriate level for the allowance, management ensures that the overall allowance appropriately reflects a margin for the imprecision inherent in most estimates of the range of probable credit losses. This additional amount, if any, is reflected in the overall allowance.

The provision for loan losses for the three month periods ended March 31, 2014 was a net recovery of \$2.5 million compared to provision expense of \$3.5 million for the same period in 2013. The decrease was due to continued improvement in asset quality due to improving trends in credit quality metrics, such as a reduction in classified and nonperforming loans, as well as a reduction in transfers to ORE. Management believes the allowance for loan losses is adequate to provide for losses inherent in the loan portfolio at March 31, 2014 (see "Asset Quality").

At the date of acquisition, no allowance for loan losses was recorded on acquired loans, including the covered loans acquired under the loss share agreements with the FDIC because these loans were recorded at fair value. On an ongoing basis, the Company re-evaluates the cash flows expected to be collected on the Purchased Credit Impaired ("PCI") loans based on updates of assumptions regarding default rates, loss severities, and other factors that are reflective of current market conditions and, based upon those evaluations, determines if additional provision expense is required for the PCI loans. Fidelity evaluates the recorded investment of the PCI loans by comparing the original Day 1 estimated losses to current estimated losses on at least a quarterly basis and recognizes impairment through the provision for loan losses.

The following schedule summarizes the changes in the allowance for loan losses for the periods indicated:

(\$ in thousands)	As of or for the Three Months Ended March 31,		
	2014	2013	
Balance at beginning of period	\$33,684	\$33,982	
Net (recoveries)/charge-offs:			
Commercial	364	2,441	
Construction	(1,680) 72	
Consumer installment	743	669	
Mortgage	35	332	
Covered	448	117	
Acquired, noncovered	(15) 20	
Total net (recoveries)/charge-offs	(105) 3,651	
Provision for loan losses ⁽¹⁾	(2,450) 3,475	
(Decrease)/increase in FDIC loss share receivable	(542) 104	
Balance at end of period	\$30,797	\$33,910	
Annualized ratio of net (recoveries)/charge-offs to average loans	(0.02)% 0.86	%
Allowance for loan losses as a percentage of loans at end of period	1.67	% 1.86	%
Allowance for loan losses as a percentage of loans, excluding covered loans	1.71	% 1.95	%

⁽¹⁾ Net of benefit attributable to FDIC loss share receivable.

Net (recoveries)/charge-offs for the three months ended 2014 totaled \$(105,000), down from \$3.7 million of net charge-offs recorded in the same period of 2013. The decrease is primarily due to a recovery in the construction portfolio of \$1.7 million, as well as a year-over-year decrease in commercial net charge-offs of \$2.1 million.

30

Table of Contents

Noninterest Income

The categories of noninterest income, and the dollar and percentage change between periods, are as follows:

(\$ in thousands)	Three Months Ended March 31,			
	2014	2013	\$ Change	% Change
Service charges on deposit accounts	\$1,009	\$949	\$60	6.3 %
Other fees and charges	920	887	33	3.7
Mortgage banking activities	10,587	17,795	(7,208)	(40.5)
Indirect lending activities	4,676	1,646	3,030	184.1
SBA lending activities	844	1,084	(240)	(22.1)
Bank owned life insurance	301	313	(12)	(3.8)
Other	1,046	2,373	(1,327)	(55.9)
Total noninterest income	\$19,383	\$25,047	\$(5,664)	(22.6)%

For the first quarter of 2014, noninterest income was \$19.4 million compared to \$25.0 million in the first quarter of 2013. This decrease is primarily attributable to a \$7.2 million decrease in noninterest income from mortgage banking activities, primarily due to decreased loans held for sale production volume for the first quarter of 2014. During the three months ended March 31, 2014 and 2013, the Company sold residential mortgage loans with unpaid principal balances of \$328.1 million and \$634.1 million, respectively. In addition to the decrease in income from mortgage banking activities, there was a decrease in other noninterest income of \$1.3 million related to a decrease in net gain on sales of ORE in first quarter of 2014 compared to first quarter of 2013. The decrease in noninterest income from mortgage banking activities was partially offset by an increase of \$3.0 million in noninterest income from indirect lending activities in the first quarter of 2014.

Noninterest Expense

The categories of noninterest expense, and the dollar and percentage change between periods, are as follows:

(\$ in thousands)	Three Months Ended March 31,			
	2014	2013	\$ Change	% Change
Salaries and employee benefits	\$16,085	\$14,282	\$1,803	12.6 %
Commissions	3,470	6,390	(2,920)	(45.7)
Occupancy, net	2,603	2,407	196	8.1
Communication	972	760	212	27.9
Other	9,526	8,685	841	9.7
Total noninterest expense	\$32,656	\$32,524	\$132	0.4 %

Noninterest expense for the first quarter of 2014 was relatively flat at \$32.7 million compared to \$32.5 million for the same period in 2013. Commissions expense was lower primarily due to a decrease in mortgage production for the first quarter of 2014. The reduction in commissions expense was offset by an increase in higher salaries and benefits and general operating costs during the first quarter of 2014 as the Bank continues to expand its employee base in both production and support departments.

Provision for Income Taxes

The provision for income taxes for the first quarter of 2014 was \$3.4 million, compared to \$3.6 million for the same period in 2013. The change in income tax expense for the three months ended March 31, 2014 correlated directly with the change in income before taxes as the income tax rate for both quarters was 35.8%.

Financial Condition

Total assets were flat from year to year with a balance of \$2.6 billion at March 31, 2014, and December 31, 2013. Cash and cash equivalents increased by \$50.4 million, during the first three months of 2014 or 43.2%, to \$167.0 million at March 31, 2014, compared to \$116.6 million at December 31, 2013. This balance varies with the Bank's liquidity needs and is influenced by loan production from scheduled loan closings, investment purchases, timing of customer deposits, loan sales, and repayment of short-term borrowings.

Loans decreased by \$44.9 million, or 2.4%, during the first three months of 2014 to \$1.8 billion at March 31, 2014, compared to \$1.9 billion at December 31, 2013. Net loans increased during the quarter by \$6.7 million which was offset by a reduction in the portfolio due to the sale of \$51.2 million in loans during the first quarter of 2014 due to

increased demand for this asset from investors. The fluctuations in the balances from year end are due to loan production levels, the timing of loan sales and the demands for loan purchases by loan investors.

Total average deposits	\$2,160.6	0.47	% 100.0	% \$2,150.6	0.48	% 100.0	% \$2,031.9	0.52	% 100.0	%

Total deposits at March 31, 2014, were relatively flat compared to total deposits at December 31, 2013. Time deposits greater than \$100,000 decreased \$6.0 million, or 1.78%, to \$329.2 million. Noninterest-bearing demand deposits increased \$37.6 million, or 7.7%, to \$525.9 million. Interest-bearing demand deposits and money market deposits decreased \$1.3 million, or 0.18%, to \$700.3 million. Noninterest-bearing demand accounts increased and interest-bearing deposits decreased as management worked to move customers to low-cost deposit products to improve the net interest margin and lower the total cost of funds.

Liquidity and Capital Resources

Market and public confidence in our financial strength and that of financial institutions in general will largely determine the access to appropriate levels of liquidity. This confidence is significantly dependent on our ability to maintain sound credit quality and the ability to maintain appropriate levels of capital resources.

Liquidity is defined as the ability to meet anticipated customer demands for funds under credit commitments and deposit withdrawals at a reasonable cost and on a timely basis. Management measures the liquidity position by giving consideration to both on-balance sheet and off-balance sheet sources of and demands for funds on a daily and weekly basis. In addition, due to FSC being a separate entity and apart from the Bank, it must provide for its own liquidity. FSC is responsible for the payment of dividends declared for its common and preferred shareholders, and interest and principal on any outstanding debt or trust preferred securities.

Sources of the Bank's liquidity include cash and cash equivalents, net of federal requirements to maintain reserves against deposit liabilities; investment securities eligible for sale or pledging to secure borrowings from dealers and customers pursuant to securities sold under agreements to repurchase; loan repayments; loan sales; deposits and certain interest-sensitive deposits; brokered deposits; a collateralized line of credit at the Federal Reserve Bank of Atlanta ("FRB") Discount Window; a collateralized line of credit from the Federal Home Loan Bank of Atlanta ("FHLB"); and borrowings under unsecured overnight Federal funds lines available from correspondent banks. The principal demands for liquidity are new loans, anticipated fundings under credit commitments to customers and deposit withdrawals. Substantially all of FSC's liquidity is obtained from capital raises, subsidiary service fees and dividends from the Bank, which is limited by applicable law.

Management seeks to maintain a stable net liquidity position while optimizing operating results, as reflected in net interest income, the net yield on interest-earning assets and the cost of interest-bearing liabilities in particular. Our Asset Liability Management Committee ("ALCO") meets regularly to review the current and projected net liquidity positions and to review actions taken by management to achieve this liquidity objective. Managing the levels of total liquidity, short-term liquidity, and short-term liquidity sources continues to be an important exercise because of the coordination of the projected mortgage, SBA and indirect automobile loan production and sales, loans held-for-sale balances, and individual loans and pools of loans sold anticipated to fluctuate during the year.

In addition to the ability to increase brokered deposits and retail deposits, as of March 31, 2014, we had approximately \$1.0 billion in sources of available unused liquidity.

Our loans held for sale are considered highly liquid. The majority of commitments to purchase mortgage loans held-for-sale will be funded within one month of the loan closing. Also, the majority of these loans are conforming residential mortgage loans sold to GNMA, FNMA and FHLMC. Other loans held for sale include commitments for both SBA loans and indirect automobile loans.

Shareholders' Equity

Shareholders' equity was \$242.4 million at March 31, 2014, and \$236.2 million at December 31, 2013. The increase in shareholders' equity in the first three months of 2014 was primarily attributable to net income earned during the quarter.

Table of Contents

Capital Ratios

The Company is regulated by the Board of Governors of the Federal Reserve Board and is subject to the securities registration and public reporting regulations of the Securities and Exchange Commission. The Bank is regulated by the Federal Deposit Insurance Corporation and the Georgia Department of Banking and Finance. As of March 31, 2014, the Company is not aware of any current recommendations of applicable regulatory authorities which, if they were to be implemented, would reasonably likely have a material adverse effect on our liquidity, capital resources, or operations, except as provided for in the Dodd-Frank Act and the Basel III rules.

The Bank must comply with regulatory capital requirements established by the regulators. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on our financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Our capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. These capital standards require us to maintain minimum ratios of "Tier 1" capital to total risk-weighted assets and total capital to risk-weighted assets of 4.00% and 8.00%, respectively. Tier 1 capital is comprised of total shareholders' equity calculated in accordance with generally accepted accounting principles, excluding accumulated other comprehensive income (loss), less intangible assets, and total capital is comprised of Tier 1 capital plus certain adjustments, the largest of which is our allowance for loan losses.

Risk-weighted assets refer to our on- and off-balance sheet exposures, adjusted for their related risk levels using formulas set forth in FDIC regulations.

In addition to the risk-based capital requirements described above, we are subject to a leverage capital requirement, which calls for a minimum ratio of Tier 1 capital to quarterly average total assets of 4.00%.

At March 31, 2014, the Bank's capital ratios exceeded the regulatory minimum ratios discussed above. The following table presents the Bank's capital ratios and the minimum regulatory requirements:

	Fidelity Bank	Minimum Regulatory Requirement	
		Adequately Capitalized	Well Capitalized
Tier 1 risk-based capital ratio	12.19%	4.00%	6.00%
Total risk-based capital ratio	13.91%	8.00%	10.00%
Leverage capital ratio	10.36%	4.00%	5.00%

The Company is not subject to the provisions of prompt corrective action. The Company had Tier 1 risk-based capital ratio, total risk-based capital ratio, and leverage capital ratio of 13.20%, 14.46%, and 11.21%, respectively, at March 31, 2014.

Basel III

On April 25, 2014, the FDIC adopted as final the revised risk-based and leverage capital requirements for FDIC-supervised institutions, with no substantive changes, which were previously approved on July 9, 2013, as an interim final rule implementing the Basel Committee on Banking Supervision's ("BCBS") capital guidelines for U.S. banks. The FDIC's rule is identical in substance to the final rules issued by the FRB. The phase-in period for the final rules will begin for the Company on January 1, 2015, with full compliance with all requirements phased in over a multi-year schedule ending in 2019.

The rules include a new common equity Tier 1 capital to risk-weighted assets ratio of 4.5% and a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets. The final rules also raise the minimum ratio of Tier 1 capital to risk-weighted assets from 4.0% to 6.0% and require a minimum leverage ratio of 4.0%. The final rules also implement strict eligibility criteria for regulatory capital instruments.

We continue to evaluate the ultimate impact of the implementation of the new capital and liquidity standards under the Basel III Capital Rules and the Dodd-Frank Act on the Company's liquidity management functions and capital position. Under the final rules, minimum requirements will increase for both the quantity and quality of capital held by the Company. Management believes, at March 31, 2014, that the Company and the Bank would meet all capital

adequacy requirements under the Basel III capital rules on a fully phased-in basis if such requirements were currently effective.

Table of Contents

Dividends

In April of 2014, we declared a cash dividend of \$0.08 per share. In January of 2014, we declared a stock dividend equal to one share for every 250 shares owned and a cash dividend of \$0.04 per share. Basic and diluted earnings per share for prior periods have been retroactively adjusted to reflect the January 2014 stock dividend. Future dividends require a quarterly review of current and projected earnings for the remainder of 2014 in relation to capital requirements prior to the determination of the dividend, and be subject to regulatory restrictions under applicable law. The Board of Directors for both the Bank and FSC will review on a quarterly basis whether to declare and pay dividends for the remainder of 2014, with the declared and paid dividend consistent with current regulatory limitations, earnings, capital requirements, and forecasts of future earnings.

Market Risk

Our primary market risk exposures are credit risk and interest rate risk and, to a lesser extent, liquidity risk. We have little or no risk related to trading accounts, commodities, or foreign exchange.

Interest rate risk, which encompasses price risk, is the exposure of a banking organization's financial condition and earnings ability to withstand adverse movements in interest rates. Accepting this risk can be an important source of profitability and shareholder value; however, excessive levels of interest rate risk can pose a significant threat to assets, earnings, and capital. Accordingly, effective risk management that maintains interest rate risk at prudent levels is essential to our success.

ALCO, which includes senior management representatives, monitors and considers methods of managing the rate and sensitivity repricing characteristics of the balance sheet components consistent with maintaining acceptable levels of changes in portfolio values and net interest income with changes in interest rates. The primary purposes of ALCO are to manage interest rate risk consistent with earnings and liquidity, to effectively invest our capital, and to preserve the value created by our core business operations. Our exposure to interest rate risk compared to established tolerances is reviewed on at least a quarterly basis by our Board of Directors.

Evaluating a financial institution's exposure to changes in interest rates includes assessing both the adequacy of the management process used to control interest rate risk and the organization's quantitative levels of exposure. When assessing the interest rate risk management process, we seek to ensure that appropriate policies, procedures, management information systems, and internal controls are in place to maintain interest rate risk at prudent levels with consistency and continuity. Evaluating the quantitative level of interest rate risk exposure requires us to assess the existing and potential future effects of changes in interest rates on our consolidated financial condition, including capital adequacy, earnings, liquidity, and, where appropriate, asset quality.

A form of interest rate sensitivity analysis referred to as equity at risk, is used to measure our interest rate risk by computing estimated changes in earnings and the net present value of our cash flows from assets, liabilities, and off-balance sheet items in the event of a range of assumed changes in market interest rates. Net present value represents the market value of portfolio equity and is equal to the market value of assets minus the market value of liabilities, with adjustments made for off-balance sheet items. This analysis assesses the risk of loss in the market risk sensitive instruments in the event of a sudden and sustained 100, 200 and 300 basis point increase or decrease in market interest rates. In addition, management reviews the impact of various yield curve scenarios on earnings and cash flows.

Our policy states that a negative change in net present value (equity at risk) as a result of an immediate and sustained 200 basis point increase or decrease in interest rates should not be lower than negative 20% as calculated from a base fair value. It also states that a similar increase or decrease in interest rates should not negatively impact net interest income or net income by more than 10% or 20%, respectively.

The most recent rate shock analysis indicated that the effects of an immediate and sustained change in rates would fall within policy parameters and approved tolerances for equity at risk, net interest income and net income.

Rate shock analysis provides only a limited, point in time view of interest rate sensitivity. The gap analysis also does not reflect factors such as the magnitude (versus the timing) of future interest rate changes and asset prepayments. The actual impact of interest rate changes upon earnings and net present value may differ from that implied by any static rate shock or gap measurement. In addition, net interest income and net present value under various future interest rate scenarios are affected by multiple other factors not embodied in a static rate shock or gap analysis, including

competition, changes in the shape of the Treasury yield curve, divergent movement among various interest rate indices, and the speed with which interest rates change.

Table of Contents

Interest Rate Sensitivity

The major elements used to manage interest rate risk include the mix of fixed and variable rate assets and liabilities and the maturity and repricing patterns of these assets and liabilities. It is our policy not to invest in derivatives outside of our mortgage hedging process. We perform a quarterly review of assets and liabilities that reprice and the time bands within which the repricing occurs. Balances generally are reported in the time band that corresponds to the instrument's next repricing date or contractual maturity, whichever occurs first. However, fixed rate indirect automobile loans, mortgage-backed securities, and residential mortgage loans are primarily included based on scheduled payments with a prepayment factor incorporated. Through such analyses, we monitor and manage our interest sensitivity gap to minimize the negative effects of changing interest rates.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See Item 2 "Market Risk" and "Interest Rate Sensitivity" for quantitative and qualitative discussion about our market risk.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934, Fidelity's management supervised and participated in an evaluation, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures (as defined under Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based on, or as of the date of, that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There has been no change in the Company's internal control over financial reporting during the three months ended March 31, 2014, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

We are a party to claims and lawsuits arising in the course of normal business activities. Although the ultimate outcome of all claims and lawsuits outstanding as of March 31, 2014, cannot be ascertained at this time, it is the opinion of management that these matters, when resolved, will not have a material adverse effect on our results of operations or financial condition.

Item 1A. Risk Factors

While the Company attempts to identify, manage, and mitigate risks and uncertainties associated with its business to the extent practical under the circumstances, some level of risk and uncertainty will always be present. Item 1A of our Annual Report on Form 10-K/A for the year ended December 31, 2013 describes some of the risks and uncertainties associated with our business. These risks and uncertainties have the potential to materially affect our cash flows, results of operations, and financial condition. We do not believe that there have been any material changes to the risk factors previously disclosed in our Annual Report on Form 10-K/A for the year ended December 31, 2013.

Item 6. Exhibits

(a) Exhibits. The following exhibits are filed as part of this Report.

- Amended and Restated Articles of Incorporation of Fidelity Southern Corporation, as amended effective
- 3(a) December 16, 2008 (incorporated by reference from Exhibit 3(a) to Fidelity Southern Corporation's Annual Report on Form 10-K filed March 17, 2009)
- 3(b) Articles of Amendment to the Articles of Incorporation of Fidelity Southern Corporation (incorporated by reference from Exhibit 3.1 to Fidelity Southern Corporation's Form 8-K filed November 23, 2010)
- 3(c) By-Laws of Fidelity Southern Corporation, as amended (incorporated by reference from Exhibit 3(b) to Fidelity Southern Corporation's Quarterly Report on Form 10-Q for the quarter ended September 30, 2007)
- 3(d) Amendment to By-Laws of Fidelity Southern Corporation (incorporated by reference from Exhibit 3.2 to Fidelity Southern Corporation's Form 8-K filed November 23, 2010)
- 4(a) See Exhibits 3(a) and 3(b) for provisions of the Amended and Restated Articles of Incorporation, as amended, and Bylaws, which define the rights of the shareholders.
- 4(b) Tax Benefits Preservation Plan dated November 19, 2010 between Fidelity Southern Corporation and Mellon Investor Services LLC as Rights Agent (incorporated by reference from Exhibit 4.1 to Fidelity Southern Corporation's Form 8-K filed November 23, 2010)
- 31.1 Certification of Principal Executive Officer pursuant to Securities Exchange Act Rules 13a-14 and 15d-14, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
- 31.2 Certification of Principal Financial Officer pursuant to Securities Exchange Act Rules 13a-14 and 15d-14, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
- 32.1 Certification of Principal Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
- 32.2 Certification of Principal Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
- 101 Financial Statements submitted in XBRL format
