NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

MARCH 31, 2001

(UNAUDITED)

1. The unaudited condensed consolidated financial statements printed herein have been prepared in accordance with the instructions to Form 10-QSB and do not include all of the information and disclosures required by generally accepted accounting principles. Therefore, these financial statements should be read in conjunction with the consolidated financial statements and related footnotes included in the Company's Form 10-KSB for the year ended December 31, 2000. These financial statements reflect all adjustments that are, in the opinion of management, necessary to fairly state the results for the interim periods reported.

2. The results of operations for the three months ended March 31, 2001 are not necessarily indicative of the results to be expected for the full year.

3.

A Private Placement of 12% Convertible Notes to raise \$750,000 was begun in March 2001 and \$110,000 was raised during the quarter. The notes are due in three years with dates in March 2004. Interest is compounded annually and payable at maturity, or, at the option of the note holder, can be paid annually in stock. The notes and accrued interest are convertible, at any time during the three year period, into the Company's restricted Common Stock, at \$0.15 per share. The Company may call the notes prior to the due date and, in that event, the note holder has 30 days to decide whether to convert the note and accrued interest into stock.

New lease financing on equipment during the first quarter amounted to approximately \$240,000, of which \$192,300 was received in cash.

Subsequent to March 31, 2001, the Company completed a financing by placing a first deed of trust on the Stead manufacturing facility. The mortgage is for \$550,000, carries an interest rate of 12%, and is amortized over 15 years. In addition, subsequent to March 31, 2001, the Company has received \$370,000 from the 12% Convertible Promissory Note Private Placement.

4. Following is financial information for each of the Company's segments. No changes

have occurred in the basis of segmentation since December 31, 2000.

Reconciliation of segment revenues and operating income (loss) to the respective consolidated amounts and to consolidated income (loss) before taxes:

Item 2. Management's Discussion and Analysis or Plan of Operations

I. Results of Operations

The Company reported a net loss of \$948,744 or \$0.0124 per share for the quarter ended March 31, 2001, compared to a net loss of \$804,750 or \$0.0112 per share for the comparable 2000 period. The primary factor contributing to the increased loss for the quarter was increased interest expense of \$82,100, reduced interest income of \$20,700, and an increased operating loss of \$41,200. The increased interest expense is primarily due to the prior year capitalization of \$41,000 of interest and increased lease financing and convertible promissory note interest. The decrease in interest income is due to lower invested cash balances during the quarter compared to the prior year.

To provide a more complete understanding of the factors contributing to the changes in sales, operating expenses and the resultant operating loss, the discussion presented below is separated into the Company's two operating segments.

PHOTOBYPRODUCT FERTILIZER

Edgar Filing: ITRONICS INC - Form 10QSB

This segment, managed by Itronics Metallurgical, Inc., operates a photobyproduct recycling plant, which includes related silver recovery. As part of the recycling process, the Company manufactures and markets a line of liquid fertilizer products which are being introduced into the markets in California, Nevada, Oregon, and Hawaii. Revenues are generated from photobyproduct management services, silver sales, and fertilizer sales.

	Three Months Ended March 31,	
	<u>2001</u>	<u>2000</u>
Sales revenue	\$ 207,588	\$ 92,810
Operating income	\$(770,233)	\$(688,507)

Total segment sales for the first quarter of 2001 were approximately \$207,600 for the quarter ended March 31, 2001, an increase of 124% over the prior year first quarter. Fertilizer sales for the quarter were approximately \$23,200, compared to \$11,400 for the 2000 first quarter, an increase of 104%. Photobyproduct recycling revenue for the quarter increased by \$1,400 on an increased volume of 16%, compared to the first quarter of 2000. Silver/gold sales increased \$101,500 from the first quarter of 2000, an increase of 293%. This increase reflects \$56,600 in gold sales under the processing agreement with Golden Phoenix Minerals, Inc. and \$65,100 in silver sales from melting down the remaining blemished "Silver Nevada Miner" bars. Cost of sales increased \$140,000 due to increases in direct materials costs of \$120,500 related to increased sales and \$43,600 in payroll and related costs due to a combination of increases in the allocable portion of management salary increases, the prior year capitalization of salary in the building construction, the prior year classification of wages as plant start-up costs, and increased production. These factors resulted in a gross loss of \$98,000 for the first quarter of 2001, compared to a gross loss of \$72,800 for the first quarter of 2000.

Segment operating expenses increased approximately \$56,500 over the first quarter of 2000, due to increases of \$46,900 in depreciation and \$85,600 in general and administration, which were partially offset by decreases of \$18,500 in sales and marketing and \$57,500 in plant start-up costs. The increase in depreciation is due to the manufacturing facility being placed in service on April 1, 2000. The increase in general and administration costs is due to \$51,200 in outside service costs, which primarily relates to a consulting agreement for acquisition services entered into in the third quarter of 2000, and \$24,800 in salaries and benefits related to prior year management salary increases. The reduction in sales and marketing expenses reflects a shift in marketing focus to a heavier emphasis on fertilizer marketing and a reduction in corporate marketing. Early in the first quarter of 2001, two veteran fertilizer sales representatives were hired to concentrate on fertilizer sales through Western Farm Services, Inc. in California. The added costs for their salary and travel expenses was offset by reduced corporate marketing expenses, which declined due to the decline in the Company's stock price compared to the prior year and to reduced advertising in business publications.

These factors resulted in a 2001 first quarter segment operating loss of \$770,200, compared to a loss of \$688,500 for the first quarter of 2000, an increased operating loss of \$81,700.

Edgar Filing: ITRONICS INC - Form 10QSB

This segment, known as Whitney & Whitney, Inc., provides mining and materials management, geology, engineering and economics consulting, and publishes specialized mineral economics and materials financial reports. It employs technical specialists with expertise in the areas of mining, geology, mining engineering, mineral economics, materials processing and technology development. Technical services have been provided to many of the leading U.S. and foreign mining companies, several public utilities with mineral interests, to various state agencies, the U.S. and foreign governments, and the United Nations and the World Bank.

	Three Months Ended March 31,	
	<u>2001</u>	<u>2000</u>
Sales revenue	\$ 150,631	\$ 188,828
Operating income (loss)	\$(52,490)	\$(93,039)

Mining technical services revenue was approximately \$150,600 for the quarter ended March 31, 2001, compared to \$188,800 for the comparable quarter of 2000, a decrease of \$38,200, or 20%. The sales decrease includes an increase of \$51,300 in professional service revenue, which was offset by decreased pass-through revenues of \$87,900 from ongoing technical services projects. Cost of sales decreased by \$58,300, due to a decrease of \$87,900 in pass-through costs, which was partially offset by an increase of \$19,900 in outside consultant fees. These factors resulted in a gross profit for the segment of \$42,900 compared to \$22,800 for the prior year first quarter.

Segment operating expenses decreased by \$20,500 due to a decrease of \$23,200 in sales and marketing costs, which reflects the segment's allocable portion of reduced corporate marketing costs.

The combination of these factors resulted in a 2001 first quarter segment operating loss of \$52,500, compared to a loss of \$93,000 for the first quarter of 2000, a decreased operating loss of \$40,500.

SUMMARY

On a consolidated basis, the various changes in revenues and operating expenses resulted in a first quarter 2001 operating loss of \$822,700, compared to \$781,500 for the first quarter of 2000, an increased loss of \$41,200.

II. Changes in Financial Condition; Capitalization

Cash amounted to \$19,241 as of March 31, 2001, compared to \$2,362,502 as of March 31, 2000. Net cash used for operating activities was approximately \$385,900 for the first three months of 2001. The cash used for operating activities during the period was financed by a combination of sales of common stock of \$154,700 under the Swartz Private Equity, LLC. (Swartz) agreement, \$40,000 in warrant exercises, \$192,300 in lease financing, and \$110,000 from the Private Placement of 12% convertible promissory notes. A total of \$43,600 was invested in property and equipment during the period, primarily for design costs for expansion of the manufacturing facility. \$15,000 was invested in an ongoing investment in Golden Phoenix Minerals, Inc. (GPXM). The market value of the GPXM investment was reduced by \$10,200 during the quarter, based on GPXM's stock price as of March 31, 2001.

Total assets decreased during the three months ended March 31, 2001 by approximately \$123,400 to \$4,486,200. Current assets decreased approximately \$151,800 due to decreases in accounts receivable of \$26,900, stock

subscription receivable of \$82,000, and inventory of \$43,800. The decrease in inventory is due to a reduction in "Silver Nevada Miner" bars and refined silver.

Current liabilities increased by approximately \$274,200 and total liabilities increased by \$547,700. The increase in total liabilities is due to combination of a net increase of \$180,600 in capital lease obligations due to lease financing of existing equipment, \$110,000 in 12% Convertible Promissory Notes, \$63,900 in accrued interest on the Convertible Promissory Notes, and \$198,000 in various current liabilities. Significant components of the increase in current liabilities include increases of \$77,400 in accounts payable, \$31,500 in accrued management salaries, \$50,300 in accrued expenses, due primarily to payroll taxes, and \$97,100 in current maturities of capital lease obligations and related accrued interest, which includes \$47,900 in equipment lease payments that were due prior to March 31, 2001.

III. Working Capital/Liquidity

During the three months ended March 31, 2001, working capital decreased by approximately \$426,000 to a deficit balance of \$691,300. Management has continued the Company's ongoing program of improving working capital and liquidity through exercise of warrants and payment of consulting and other labor services with common shares. In addition, a private placement of \$750,000 of 12% convertible promissory notes was begun during the first quarter. A total of \$110,000 was received during the quarter from this Placement. Also, \$154,700 was received under the Swartz agreement, \$40,000 was received from the exercise of warrants and \$192,300 was received from equipment financing. Approximately \$150,000 in various expenses were paid with common shares.

Subsequent to March 31, 2001, \$370,000 has been received from the Convertible Note Private Placement, \$62,500 has been received under the Swartz agreement, and \$510,400 has been received from placing a first deed of trust on the Stead manufacturing facility. The promissory note is for \$550,000, is amortized over 15 years, and carries an interest rate of 12%.

As noted above, current liabilities have increased, which is a result of a shortage of cash. Due to the decline in the Company's stock price, much of the funding anticipated under the Swartz agreement has not been available. In addition, approximately \$663,000 in warrants have not been exercised during the fourth quarter of 2000 and the first quarter of 2001. Receipt of the building loan proceeds has temporarily eased the cash situation and allowed the Company to be current on the lease payments, taxes, and with various suppliers. Because of the loan and the recent rebound in the stock price, management is evaluating closing the 12% Convertible Note Private Placement at less than \$750,000 and starting a new placement with similar terms, but with a higher stock conversion price.

IV. New Developments

During the first quarter of 2001, the Company's Gold'n Gro fertilizer marketing effort was focused on introducing the two new sales representatives to the Western Farm Services, Inc. (WFS) regional management and sales personnel in California. Marketing was also expanded into Hawaii and the Company received its first fertilizer sales order there. Efforts to establish sales with Intermountain Farmers in southern Nevada and Utah are ongoing, and the Company has received initial sales orders from that source as well.

On-going field trials of Gold'n Gro fertilizer products continue to show significant improvements in crop production and quality. The trials are providing agronomic data that is being used to develop Gold'n Gro nutrition programs for the crops being tested. The citrus trial started in the fourth quarter of 2000 is producing positive, and unexpected, results which will be reported later in the second quarter, once the measurement data is compiled. Field trials have been expanded into the cut flower, herbs, and sweet corn markets. Field trials in the alfalfa market are ongoing and

have been expanded.

During the quarter, the need for two "chloride free" products was identified as a result of requests from WFS and potential customers. Development was initiated, with a new chloride free "plant starter" product for the nursery, greenhouse, and vegetable markets, and a new chloride free "general purpose" product for the nursery, greenhouse, and golf course markets being readied for introduction during the second quarter of 2001.

Late in the third quarter of 2000, Whitney & Whitney, Inc. (WWI) signed a Pilot Program Contract (Contract) with a major generator of a material that may be usable as a raw material for the recycling program operated by Itronics Metallurgical, Inc. (IMI). The purpose of the Contract is to evaluate whether the material is suitable for use in Gold n Gro fertilizer products. If the Program is successful, both parties have agreed to work together to develop and implement a plan for marketing the fertilizer products. WWI has completed the Contract and is recommending that the evaluation program be continued for another year as initial results indicate that there is potential for the material to be used in IMI s Gold n Gro fertilizer products. The generator is now evaluating WWI s proposal. Each of the technical applications now being operated by IMI took from 2 to 6 years to develop. This new material could take a similar amount of time.

V. Forward-Looking Statements

The statements in this Form 10-QSB that are not historical facts or statements of current status are forward-looking statements (as defined in the Private Securities Litigation Reform Act of 1995) that involve risks and uncertainties. Actual results may differ materially.

PART II- OTHER INFORMATION

Item 2. Changes in Securities and Use of Proceeds

(c) Recent Sales of Unregistered Securities:

Following is a summary of sales of unregistered securities for the three months ended March 31, 2001. All securities were issued as restricted common shares which are subject to Rule 144 of the Securities and Exchange Commission. Generally, Rule 144 requires shareholders to hold the shares for a minimum of one year before sale. In addition, officers, directors and more than 10% shareholders are further restricted in their ability to sell such shares. There have been no underwriters of these securities and no commissions or underwriting discounts have been paid.

13

	Shares	Value
	<u>Issued</u>	<u>Received</u>
Exercise of warrants for cash	300,000	\$30,000
Labor services of management, directors and consultants	22,500	9,101
Other	577	225
	323,077	\$39,326

The above transactions qualified for exemption from registration under Sections 3(b) or 4(2) of the Securities Act of 1933. Private placements for cash were non-public transactions. The Company believes that all such investors are either accredited or, either alone or with their purchaser representative, have such knowledge and experience in financial and business matters that they are capable of evaluating the merits and risks of the prospective investment.
