Item 5. Other Events and Regulation FD Disclosure.

The following information is being provided by Freeport-McMoRan Copper & Gold Inc. to comply with Securities and Exchange Commission rules, which became effective on March 28, 2003. The new rules require us to reconcile certain financial measures provided in our Annual Report on Form 10-K for the year ended December 31, 2002, to the most directly comparable measures in our audited financial statements. Our reconciliations cover PT Freeport Indonesia's product revenues and production costs, and cathode cash production costs per pound of copper for Atlantic Copper and PT Smelting for the five years ended December 31, 2002.

PT FREEPORT INDONESIA PRODUCT REVENUES AND PRODUCTION COSTS

Net cash production costs per pound of copper is a measure intended to provide investors with information about the cash generating capacity of our mining operations in Indonesia. This measure is presented by other copper and gold mining companies, although our measure may not be comparable to similarly titled measures reported by other companies.

We calculate gross profit per pound of copper under a by-product method, while the copper, gold and silver contained within our concentrates are treated as co-products in our financial statements. We use the by-product method in our presentation of gross profit per pound of copper because (1) we believe the market views us as a copper company, (2) we produce and sell one product, concentrates, which contains all three metals and (3) there is no objective basis for specifically assigning our costs to revenues from the copper, gold and silver we produce in concentrates. In the co-product method presentation below, we have allocated costs to the different products based on their relative revenue values for each period presented. Presentations under both methods are presented below along with a reconciliation to amounts reported in FCX's consolidated financial statements.

CATHODE CASH PRODUCTION COST PER POUND OF COPPER

Cathode cash production cost per pound of copper is a measure intended to provide investors with information about the costs associated with our smelting operations in Spain and with our 25 percent-owned smelting operations in Indonesia. Other smelting companies present this measure, although our measure may not be comparable to similarly titled measures reported by other companies.

ATLANTIC COPPER. Below is a reconciliation of our smelting and refining segment production costs reported in FCX's consolidated financial statements to the production costs used to calculate our cathode cash production cost per pound of copper for Atlantic Copper (in thousands, except per pound amounts):

	Years Ended December 31,				
	2002	2001	2000	1999	1998
Smelting and refining segment production costs reported in FCX's consolidated financial statements	\$ 729,789	\$ 738,618	\$ 734,083	\$ 723,966	\$ 667,904
Less:
