**Magic Software Unveils iBOLT RFID Process Ready Initiative
at RFID World Expo in Dallas, Texas**

Dallas, Texas (March 1st, 2005) Magic Software Enterprises (Nasdaq: MGIC), a leading provider of state-of-the-art business integration and development technology, announced today at RFID World Expo, (March 1-3, Dallas, Texas), the introduction of its iBOLT RFID Process Ready initiative. With this new initiative, Magic Software will further its awareness of Radio Frequency Identification (RFID) solutions from a variety of vendors that can be seamlessly integrated into existing and new business processes using its iBOLT Integration Suite, the company's BPEL4WS compliant business process integration solution.

RFID enhances business decision-making, improves production management, sharpens inventory tracking and data collection, and accelerates customer service response times. With today's virtual explosion in data and data entry points created by RFID technology, IT departments face the challenge of integrating their processes. The iBOLT RFID Process Ready logo assures customers that an easy path to integration with existing systems and business processes is supported with little or no programming required.

The iBOLT Integration Suite supports user level configuration of processes by business analysts and architects. Vendors participating in the iBOLT RFID Process Ready program are provided with a full copy of the iBOLT Integration Suite and are given access to RFID component consulting and training.

Magic Software Enterprises will be demonstrating the iBOLT Integration Suite at RFID World Booth #333, March 1-3, 2005 at the Gaylord Texan Resort in Dallas, Texas. In addition, Magic Software Enterprises offers several online seminars detailing the benefits of RFID process integration solutions. For details, visit the website at <http://www.magicsoftware.com/webinars>.
