UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

Form 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended September 30, 2011

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from _____ to _____

Commission File Number 0-19858

USA TRUCK, INC.
(Exact Name of Registrant as Specified in Its
Charter)

Delaware (State or other jurisdiction of incorporation or organization) 71-0556971 (I.R.S. employer identification no.)

3200 Industrial Park Road (Address of principal executive offices) Van Buren, Arkansas 72956 (Zip code)

(479) 471-2500 (Registrant's telephone number, including area code)

Not applicable (Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes X No

Edgar Filing: USA TRUCK INC - Form 10-Q

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer _____ Accelerated Filer Non-Accelerated Filer _____ Smaller Reporting Company _____
(Do not check if a Smaller Reporting Company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of the registrant’s Common Stock, par value \$.01, as of November 2, 2011 is 10,437,667.

USA TRUCK, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

September 30, 2011

NOTE 1 – BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the three month and nine month periods ended September 30, 2011, are not necessarily indicative of the results that may be expected for the year ending December 31, 2011. For further information, refer to the financial statements, and footnotes thereto, included in our Annual Report on Form 10-K for the year ended December 31, 2010.

We have three operating segments: Trucking (which consists of our General Freight and Dedicated Freight service offerings), Strategic Capacity Solutions (“SCS”) (which consists entirely of our freight brokerage service offering), and Intermodal (which consists of our rail intermodal service offering). As further explained in Note 5 – Segment Reporting, these three operating segments are disclosed as two reportable segments with Trucking and Intermodal being aggregated into one reportable segment.

The balance sheet at December 31, 2010, has been derived from the audited consolidated financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

By agreement with our customers, and consistent with industry practice, we add a graduated fuel surcharge to the rates we charge our customers as diesel fuel prices increase above an agreed-upon baseline price per gallon. Base revenue in the consolidated statements of operations represents revenue excluding this fuel surcharge revenue.

NOTE 2 – REVENUE RECOGNITION

Revenue generated by our Trucking operating segment is recognized in full upon completion of delivery of freight to the receiver’s location. For freight in transit at the end of a reporting period, we recognize revenue pro rata based on relative transit time completed as a portion of the estimated total transit time. Expenses are recognized as incurred.

Revenue generated by our SCS and Intermodal operating segments is recognized upon completion of the services provided. Revenue is recorded on a gross basis, without deducting third party purchased transportation costs because we have responsibility for billing and collecting such revenue.

Management believes these policies most accurately reflect revenue as earned and direct expenses, including third party purchased transportation costs, as incurred.

NOTE 3 – STOCK-BASED COMPENSATION

The USA Truck, Inc. 2004 Equity Incentive Plan provides for the granting of incentive or nonqualified options or other equity-based awards covering up to 1,050,000 shares of Common Stock to directors, officers and other key employees. No options were granted under this 2004 Equity Incentive Plan for less than the fair market value of the

Edgar Filing: USA TRUCK INC - Form 10-Q

Common Stock as defined in the 2004 Equity Incentive Plan at the date of the grant. Options granted under the 2004 Equity Incentive Plan generally vest ratably over three to five years. The option price under the 2004 Equity Incentive Plan is the fair market value of our Common Stock at the date the options were granted. The exercise prices of outstanding options granted under the 2004 Equity Incentive Plan range from \$11.19 to \$30.22 as of September 30, 2011. At September 30, 2011, 571,829 shares were available for granting future options or other equity awards under this 2004 Equity Incentive Plan. The Company issues new shares upon the exercise of stock options.

Compensation expense related to incentive and nonqualified stock options granted under the Company's plans is included in salaries, wages and employee benefits in the accompanying consolidated statements of operations. The amount of compensation expense recognized, net of forfeiture recoveries, is reflected in the table below for the periods indicated.

	(in thousands)			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Compensation expense	\$ 38	\$ 47	\$ 70	\$ 90

The table below sets forth the assumptions used to value stock options granted during the periods indicated:

	2011	2010
Dividend yield	0%	0%
Expected volatility	22.6 – 33.7%	32.8 – 50.2%
Risk-free interest rate	1.1 – 1.7%	0.9 – 2.1%
Expected life (in years)	4.00 – 4.25	4.13 – 4.25

The expected volatility is a measure of the expected fluctuation in our share price based on the historical volatility of our stock. Expected life represents the length of time we anticipate the options to be outstanding before being exercised. The risk-free interest rate is based on an implied yield on United States zero-coupon treasury bonds with a remaining term equal to the expected life of the outstanding options. In addition to the above, we also include a factor for anticipated forfeitures, which represents the number of shares under options expected to be forfeited over the expected life of the options.

Information related to option activity for the nine months ended September 30, 2011 is as follows:

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value (1)
Outstanding - beginning of year	152,600	\$ 16.01		
Granted	46,460	12.25		
Exercised	(8,104)	11.47		\$ 7,424
Cancelled/forfeited	(18,965)	14.49		
Expired	(29,538)	17.47		
Outstanding at September 30, 2011	142,453	\$ 14.94	3.4	\$ --
Exercisable at September 30, 2011	58,700	\$ 16.54	1.9	\$ --

- (1) The intrinsic value of outstanding and exercisable stock options is determined based on the amount by which the market value of the underlying stock exceeds the exercise price of the option. The per share market value of our Common Stock, as determined by the closing price on September 30, 2011 (the last trading day of the quarter), was \$7.76.

Compensation expense related to restricted stock awarded under the Company's plans is included in salaries, wages and employee benefits in the accompanying consolidated statements of operations. The compensation expense recognized is based on the market value of our Common Stock on the date the restricted stock award is granted and is not adjusted in subsequent periods. The amount to be recognized, net of forfeiture recoveries, is amortized over the vesting period. The amount of compensation expense recognized is reflected in the table below for the periods indicated.

(in thousands)	
Three Months Ended September 30,	Nine Months Ended September 30,

Edgar Filing: USA TRUCK INC - Form 10-Q

	2011	2010	2011	2010
Compensation expense (credit)	\$ 81	\$ 97	\$ (25)	\$ 9

The 2003 Restricted Stock Award Plan terminated August 31, 2009. During the quarter ended June 30, 2010, management determined that the performance criteria for 2010 would not be met and therefore the remaining 2,000 shares outstanding under this Plan were deemed forfeited and recorded as treasury stock. The previously recorded expense in the amount of \$0.05 million relating to the forfeited shares was recovered during the quarter ended June 30, 2010. The shares remained outstanding until their scheduled vest date of March 1, 2011, at which time their forfeiture became effective. Pursuant to the provisions of the Plan, at that time, the shares were returned to Mr. Robert M. Powell, who originally contributed the shares for the awards made under this Plan. Upon the return of these shares to Mr. Powell, no other shares awarded under this Plan remain outstanding.

Information related to the restricted stock awarded under the 2004 Equity Incentive Plan for the nine months ended September 30, 2011, is as follows:

	Number of Shares	Weighted Average Grant Price (1)
Nonvested shares – December 31, 2010	198,370	\$ 12.33
Granted	13,315	11.83
Forfeited	(38,516)	12.33
Vested	(7,510)	13.81
Nonvested shares – September 30, 2011	165,659	\$ 12.22

(1) The shares were valued at the closing price of the Company's common stock on the dates of the awards.

On July 16, 2008, the Executive Compensation Committee of the Board of Directors of the Company, pursuant to the 2004 Equity Incentive Plan, granted thereunder awards totaling 200,000 restricted shares of the Company's Common Stock to certain officers of the Company. The grants were made effective as of July 18, 2008 and were valued at \$12.13 per share, which was the closing price of the Company's Common Stock on that date. Each officer's restricted shares of Common Stock will vest in varying amounts over the ten year period beginning April 1, 2011, subject to the Company's attainment of defined retained earnings growth. Management must attain an average five-year trailing retained earnings annual growth rate of 10.0% (before dividends) in order for the shares to qualify for full vesting (pro rata vesting will apply down to 50.0% at a 5.0% annual growth rate). Any shares which fail to vest as a result of the Company's failure to attain a performance goal will forfeit and result in the recovery of the previously recorded expense. These forfeited shares will revert to the 2004 Equity Incentive Plan where they will remain available for grants under the terms of that Plan until that Plan expires in 2014. During the second quarter of 2011, management determined that the performance criteria will not be met for the shares that were scheduled to vest on April 1, 2012 and April 1, 2013; therefore, these shares were deemed forfeited and recorded as Treasury Stock. The shares will remain outstanding until their scheduled vesting dates, at which time their forfeitures will become effective and the shares will revert to the 2004 Equity Incentive Plan. The table below sets forth the information relating to the forfeitures of these shares.

July 16, 2008 Restricted Stock Award Forfeitures				
Scheduled Vest Date	Date Deemed Forfeited and Recorded as Treasury Stock	Shares Forfeited (in thousands)	Expense Recovered (in thousands)	Date Shares Returned to Plan
April 1, 2011	June 30, 2010	9	\$ 70	April 1, 2011
April 1, 2012	June 30, 2011	8	66	April 1, 2012
April 1, 2013	June 30, 2011	15	101	April 1, 2013

During the quarter ended June 30, 2010, due to the termination of the employment of an officer of the Company, 26,119 restricted shares of the above-mentioned performance based grant were forfeited resulting in recovery of the previously recorded expense in the amount of approximately \$0.08 million. The forfeited shares were returned to the 2004 Equity Incentive Plan. Also, related to this termination of employment, 2,000 restricted shares were forfeited resulting in the recovery of previously recorded expense in the amount of approximately \$0.05 million and, in accordance with the provisions of the Plan under which they were awarded, these shares were returned to Mr. Powell, who originally contributed the shares used for the award.

During the quarter ended March 31, 2011, an executive officer of the Company submitted his notice to retire effective April 30, 2011. Accordingly, during the quarter ended March 31, 2011, the Company recovered an estimate of the expense associated with 27,910 shares of outstanding, unvested restricted stock held by this executive officer in the approximate amount of \$0.08 million. During the quarter ended June 30, 2011, the Company recovered the remaining amount related to this forfeiture in the amount of approximately \$0.04 million. As of June 30, 2011, all expense previously recorded in relation to this forfeiture has been recovered.

Information set forth in the following table is related to stock options and restricted stock as of September 30, 2011.

	(in thousands, except weighted average data)			
	Stock Options		Restricted Stock	
Unrecognized compensation expense	\$	181	\$	1,175
Weighted average period over which unrecognized compensation expense is to be recognized (in years)		1.6		5.4

NOTE 4 – REPURCHASE OF EQUITY SECURITIES

On October 21, 2009, the Board of Directors of the Company approved the repurchase of up to 2,000,000 shares of the Company's Common Stock expiring on October 21, 2012. Subject to applicable timing and other legal requirements, these repurchases may be made on the open market or in privately negotiated transactions on terms approved by the Company's Chairman of the Board or President. Repurchased shares may be retired or held in treasury for future use for appropriate corporate purposes including issuance in connection with awards under the Company's employee benefit plans. During the nine months ended September 30, 2011, we did not repurchase any shares of our Common Stock. Our current repurchase authorization has 2,000,000 shares remaining.

NOTE 5 – SEGMENT REPORTING

The service offerings we provide relate to the transportation of truckload quantities of freight for customers in a variety of industries. The services generate revenue, and to a great extent incur expenses, primarily on a per mile basis. As the revenue generated by these service offerings is becoming increasingly more significant, management determined that additional disclosures were needed.

September 30, 2011	84.6	%	15.4	%
September 30, 2010	91.3	%	8.7	%

(1) Includes Intermodal revenue.

Except with respect to the relatively minor components of our operations that do not involve the use of our trucks, key operating statistics for both operating segments include, for example, revenue per mile and miles per tractor per week. While the operations of our SCS segment typically do not involve the use of our equipment and drivers, we nevertheless provide truckload freight services to our customers through arrangements with third party carriers who are subject to the same general regulatory environment and cost sensitivities imposed upon our Trucking operations. Our Intermodal business does involve the use of our equipment as we utilize our trailers and leased containers to provide this service. Accordingly, the operations of this segment are subject to the same general regulatory environment and cost sensitivities imposed upon our Trucking operations. Therefore, we have aggregated the reporting of our Intermodal operations with our reporting for Trucking operations. Based on Intermodal's relatively small size, and the interrelationship of Trucking and Intermodal operations on the drayage portion of intermodal movements, we determined that separate reporting was not justified. We will continue separate reporting

for our SCS segment.

Assets are not allocated to our SCS segment as the significant majority of our SCS operations provide truckload freight services to our customers through arrangements with third party carriers who utilize their own equipment. Depreciation and amortization expense is allocated to our SCS segment based on the various assets specifically utilized to generate revenue. All intercompany transactions between segments are consummated at rates similar to those negotiated with independent third parties. All other expenses are allocated to our SCS segment based on headcount and specifically identifiable direct costs, as appropriate.

Edgar Filing: USA TRUCK INC - Form 10-Q

A summary of base revenue and fuel surcharge revenue by reportable segments is as follows:

	(in thousands)			
	Revenue			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Base revenue				
Trucking	\$ 84,254	\$ 90,667	\$ 262,940	\$ 260,061
SCS	21,144	11,687	56,629	28,973
Eliminations	(2,755)	(1,584)	(8,800)	(4,157)
Total base revenue	102,643	100,770	310,769	284,877
Fuel surcharge revenue	27,494	17,996	82,438	53,194
Total revenue	\$ 130,137	\$ 118,766	\$ 393,207	\$ 338,071

A summary of operating (loss) income by reportable segments is as follows:

	(in thousands)			
	Operating (loss) income			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Operating (loss) income				
Trucking	\$ (7,733)	\$ 1,183	\$ (12,310)	\$ (579)
SCS	1,874	1,133	5,481	2,433
Operating (loss) income	\$ (5,859)	\$ 2,316	\$ (6,829)	\$ 1,854

NOTE 6 – NEW ACCOUNTING PRONOUNCEMENTS

In June 2011, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update No. 2011-05, Comprehensive Income (Topic 220): Presentation of Comprehensive Income. This standard eliminates the current option to report other comprehensive income and its components in the statement of changes in stockholders’ equity. The standard allows an entity to elect to present items of net income and other comprehensive income in one continuous statement – referred to as the statement of comprehensive income – or in two separate, but consecutive, statements. Each component of net income and each component of other comprehensive income, together with totals for comprehensive income and its two parts – net income and other comprehensive income, would need to be displayed under either alternative. While the options for presenting other comprehensive income change under the standard, many items would not change, including the items that constitute net income and other comprehensive income, when an item of other comprehensive income must be reclassified to net income and the earnings per share computation, which will continue to be based on net income. The standard is effective for public entities as of the beginning of a fiscal year that begins after December 15, 2011. Early adoption is permitted, but full retrospective application is required. The Company does not expect this standard to have a material impact on its financial reporting.

NOTE 7 – NOTE RECEIVABLE

During November 2010, the Company sold its terminal facility in Shreveport, Louisiana. In connection with this sale, the buyer gave the Company cash in the amount of \$0.2 million and a note receivable in the amount of \$2.1 million. The note receivable bears interest at an annual rate of 7.0%, matures in five years and has scheduled principal and interest payments based on a 30-year amortization schedule. A balloon payment in the approximate amount of

\$1.9 million is payable to the Company when the note matures in five years. Accordingly, the Company deferred the approximate \$0.7 million gain on the sale of this facility, and will record this gain into earnings as payments on the note receivable are received. During the three and nine month periods ended September 30, 2011, the Company recognized approximately \$1,600 and \$4,300, respectively, of this gain. The Company believes that the note receivable balance at September 30, 2011, in the approximate amount of \$2.0 million, is fully collectible and accordingly has not recorded any valuation allowance against the note receivable.

NOTE 8 – DERIVATIVE FINANCIAL INSTRUMENTS

We record derivative financial instruments in the balance sheet as either an asset or liability at fair value based on the active market in which the derivative financial instrument is traded, with classification as current or long-term depending on the duration of the instrument.

Changes in the derivative instrument's fair value must be recognized currently in earnings unless specific hedge accounting criteria are met. For cash flow hedges that meet the criteria, the derivative instrument's gains and losses, to the extent effective, are recognized in accumulated other comprehensive income and reclassified into earnings in the same period during which the hedged transaction affects earnings.

On February 6, 2009, we entered into a \$10.0 million interest rate swap agreement with an effective date of February 19, 2009. The rate on the swap was fixed at 1.57% until its expiration date of February 19, 2011. The interest rate swap agreement was accounted for as a cash flow hedge.

On May 25, 2010, we entered into a contract to hedge approximately 0.5 million gallons of diesel fuel per month for the time period of July 2010 through June 2012. Under this agreement, we pay a fixed rate per gallon of heating oil and receive the monthly average price of NYMEX HO heating oil. As diesel fuel is not a traded commodity on the futures market, heating oil is used as a substitute for diesel fuel as prices for both generally move in similar directions.

On June 28, 2010, the Company sold its contract related to the forecasted purchase of diesel fuel for the time period of July 2010 through June 2012 to lock in related gains. The purchase contract had not been designated as a hedge; therefore, the related gain was recorded as a reduction in fuel expense of approximately \$1.2 million on a pre-tax basis and on a net of tax basis of approximately \$0.7 million or \$0.07 per share.

NOTE 9 – COMPREHENSIVE (LOSS) INCOME

Comprehensive (loss) income was comprised of net (loss) income plus the market value adjustment on our interest rate swap that expired on February 19, 2011, which was designated as a cash flow hedge. Comprehensive (loss) income consisted of the following components:

	(in thousands)			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Net (loss) income	\$ (4,305)	\$ 586	\$ (6,423)	\$ (1,510)
Change in fair value of interest rate swap, net of income tax benefit of \$(5) for the three months ended September 30, 2010, and net of income tax of \$1 for the nine months ended September 30, 2011 and net of income tax benefit of \$(19) for the nine months ended September 30, 2010	--	(8)	1	(30)
Reclassification of derivative net losses to statement of operations, net of income tax of \$12 for the three months ended September 30, 2010, and net of income tax of \$7 for the nine months ended September 30, 2011 and net of income tax of \$37 for the nine months ended	--	20	10	60

September 30, 2010

Total comprehensive (loss) income	\$	(4,305)	\$	598	\$	(6,412)	\$	(1,480)
-----------------------------------	----	---------	----	-----	----	---------	----	---------

NOTE 10 – CLAIMS LIABILITIES

We are self-insured up to certain limits for bodily injury, property damage, workers’ compensation, cargo loss and damage claims and medical benefits. Provisions are made for both the estimated liabilities for known claims as incurred and estimates for those incurred but not reported.

Our self-insurance retention levels are \$0.5 million for workers’ compensation claims per occurrence, \$0.05 million for cargo loss and damage claims per occurrence and \$1.0 million for bodily injury and property damage claims per occurrence. For medical benefits, the Company self-insures up to \$0.25 million per plan participant per year with an aggregate claim exposure limit determined by our year-to-date claims experience and the number of covered lives. We are completely self-insured for physical damage to our own tractors and trailers, except that we carry catastrophic physical damage coverage to protect against natural disasters. We maintain insurance above the amounts for which we self-insure, to certain limits, with licensed insurance carriers. We have excess general, auto and employer’s liability coverage in amounts substantially exceeding minimum legal requirements, and we believe this coverage is sufficient to protect against material loss.

We record claims accruals at the estimated ultimate payment amounts based on information such as individual case estimates or historical claims experience. The current portion reflects the amounts of claims expected to be paid in the next twelve months. In making the estimates of ultimate payment amounts and the determinations of the current portion of each claim we rely on past experience with similar claims, negative or positive developments in the case and similar factors. We re-evaluate these estimates and determinations each reporting period based on developments that occur and new information that becomes available during the reporting period.

NOTE 11 – ACCRUED EXPENSES

Accrued expenses consisted of the following:

	(in thousands)	
	September 30, 2011	December 31, 2010
Salaries, wages and employee benefits	\$ 3,596	\$ 3,288
Other	6,553	5,113
(1)		
Total accrued expenses	\$ 10,149	\$ 8,401

(1) As of September 30, 2011 and December 31, 2010, no single item included within other accrued expenses exceeded 5.0% of our total current liabilities.

NOTE 12 – NOTE PAYABLE

On October 14, 2011, the Company entered into an unsecured note payable of \$1.8 million. The note, which is scheduled to mature on September 1, 2012, is payable in monthly installments of principal and interest of approximately \$0.2 million and bears interest at 1.9%. The note is payable to a third party other than the insurance company and is being used to finance a portion of the Company's annual insurance premiums.

At December 31, 2010, we had an unsecured note payable of \$1.0 million. The note, which is payable in monthly installments of principal and interest of approximately \$0.1 million and bearing interest at 2.6% matured on September 1, 2011. The note was payable to a third party other than the insurance company and was being used to finance a portion of the Company's annual insurance premiums.

NOTE 13 – LONG-TERM DEBT

Long-term debt consisted of the following:

	(in thousands)	
	September 30, 2011	December 31, 2010
Revolving credit agreement (1)	\$ 70,000	\$ 49,900
Capitalized lease obligations (2)	58,146	48,616
	128,146	98,516
Less current maturities	(26,078)	(18,766)
Long-term debt and capital leases, less current maturities	\$ 102,068	\$ 79,750

- (1) On April 19, 2010, we entered into a new Credit Agreement with Branch Banking and Trust Company as Administrative Agent, which replaced our Amended and Restated Senior Credit Facility scheduled to mature on September 1, 2010. The Credit Agreement provides for available borrowings of up to \$100.0 million, including letters of credit not to exceed \$25.0 million. Availability may be reduced by a borrowing base limit as defined in the Credit Agreement. The Credit Agreement provides an accordion feature allowing us to increase the maximum borrowing amount by up to an additional \$75.0 million in the aggregate in one or more increases, subject to certain conditions. The Credit Agreement bears variable interest based on the type of borrowing and on the Administrative Agent's prime rate or the London Interbank Offered Rate plus a certain percentage, which is determined based on our attainment of certain financial ratios. A quarterly commitment fee is payable on the unused portion of the credit line and bears a rate which is determined based on our attainment of certain financial ratios. The obligations of the Company under the Credit Agreement are guaranteed by the Company and secured by a pledge of substantially all of the Company's assets with the exception of real estate. The Credit Agreement includes usual and customary events of default for a facility of this nature and provides that, upon the occurrence and continuation of an event of default, payment of all amounts payable under the Credit Agreement may be accelerated, and the lenders' commitments may be terminated. The Credit Agreement contains certain restrictions and covenants relating to, among other things, dividends, liens, acquisitions and dispositions outside of the ordinary course of business, and affiliate transactions. The new Credit Agreement will expire on April 19, 2014.

Borrowings under the Credit Agreement are classified as “base rate loans,” “LIBOR loans” or “Euro dollar loans.” Base rate loans accrue interest at a base rate equal to the Administrative Agent’s prime rate plus an applicable margin that is adjusted quarterly between 0.0% and 1.0%, based on the Company’s leverage ratio. LIBOR loans accrue interest at LIBOR plus an applicable margin that is adjusted quarterly between 2.00% and 3.25% based on the Company’s leverage ratio. Euro dollar loans accrue interest at the LIBOR rate in effect at the beginning of the month in which the borrowing occurs plus an applicable margin that is adjusted quarterly between 2.00% and 3.25% based on the Company’s leverage ratio. On a quarterly basis, the Company must pay a fee on the unused amount of the revolving credit facility of between 0.25% and 0.375% based on the Company’s leverage ratio, and it must pay an annual administrative fee to the Administrative Agent of 0.03% of the total commitments.

The interest rate on our overnight borrowings under the Credit Agreement at September 30, 2011 was 3.5%. The interest rate including all borrowings made under the Credit Agreement at September 30, 2011 was 2.8%. The interest rate on the Company’s borrowings under the agreements for the nine months ended September 30, 2011 was 2.7%. A quarterly commitment fee is payable on the unused portion of the credit line and bears a rate which is determined based on our attainment of certain financial ratios. At September 30, 2011, the rate was 0.25% per annum. The Credit Agreement is collateralized by revenue equipment having a net book value of \$171.3 million at September 30, 2011, and all trade and other accounts receivable. The Credit Agreement requires us to meet certain financial covenants (i.e., a maximum leverage ratio of 3.00 and a minimum fixed charge ratio of 1.4) and to maintain a minimum tangible net worth of approximately \$106.4 million at September 30, 2011. We were in compliance with these covenants at September 30, 2011. The covenants would prohibit the payment of dividends by us if such payment would cause us to be in violation of any of the covenants. The borrowings under the Credit Agreement approximate its fair value and, at September 30, 2011, the Company had outstanding \$1.8 million in letters of credit.

- (2) Our capitalized lease obligations have various termination dates extending through March 2015 and contain renewal or fixed price purchase options. The effective interest rates on the leases range from 1.6% to 4.1% at September 30, 2011. The lease agreements require us to pay property taxes, maintenance and operating expenses.

NOTE 14 – LEASES AND COMMITMENTS

The Company leases certain revenue equipment under capital leases with terms of 36, 42 or 45 months. Balances related to these capitalized leases are included in property and equipment in the accompanying consolidated balance sheets and are set forth in the table below for the periods indicated.

	(in thousands)		
	Capitalized Costs	Accumulated Amortization	Net Book Value
September 30, 2011	\$ 85,434	\$ 26,892	\$ 58,542
December 31, 2010	69,795	20,777	49,018

We have entered into leases with lenders who participated in our Amended and Restated Senior Credit Facility and who participate in the Credit Agreement we entered into on April 19, 2010. Those leases contain cross-default provisions with the Facility and the new Credit Agreement, which replaced that Facility. We have also entered into leases with other lenders who do not participate in our Credit Agreement. Multiple leases with lenders who do not participate in our Credit Agreement generally contain cross-default provisions.

We routinely monitor our equipment acquisition needs and adjust our purchase schedule from time to time based on our analysis of factors such as new equipment prices, the condition of the used equipment market, demand for our freight services, prevailing interest rates, technological improvements, fuel efficiency, equipment durability, equipment specifications, our operating performance and the availability of qualified drivers.

As of September 30, 2011, for the remainder of 2011, we had commitments for purchases of non-revenue equipment of approximately \$0.5 million and commitments for the purchases of revenue equipment in the amount of approximately \$7.0 million, of which \$4.3 million is cancelable by us upon advance written notice.

NOTE 15 – INCOME TAXES

During the three months ended September 30, 2011 and 2010, our effective tax rates were 34.4% and 60.0%, respectively. During the nine months ended September 30, 2011 and 2010, our effective tax rates were 29.1% and 69.8%, respectively. Income tax expense varies from the amount computed by applying the statutory federal tax rate to income before income taxes primarily due to state income taxes, net of federal income tax effect, adjusted for permanent differences, the most significant of which is the effect of the per diem pay structure for drivers. Drivers may elect to receive non-taxable per diem pay in lieu of a portion of their taxable wages. This per diem program increases our drivers' net pay per mile, after taxes, while decreasing gross pay, before taxes. As a result, salaries, wages and employee benefits are slightly lower, and our effective income tax rate is higher than the statutory rate. Generally, as pre-tax income increases, the impact of the driver per diem program on our effective tax rate decreases because aggregate per diem pay becomes smaller in relation to pre-tax income. Due to the partially nondeductible effect of per diem pay, our tax rate will fluctuate in future periods based on fluctuations in earnings and in the number of drivers who elect to receive this pay structure.

We account for any uncertainty in income taxes by determining whether it is more likely than not that a tax position we have taken in a tax return will be sustained upon examination by the appropriate taxing authority based on the technical merits of the position. In that regard, we have analyzed filing positions in our federal and applicable state tax returns as well as in all open tax years. The only periods subject to examination for our federal returns are the 2008, 2009 and 2010 tax years. We believe that our income tax filing positions and deductions will be sustained on audit and do not anticipate any adjustments that will result in a material change to our consolidated financial position, results of operations and cash flows. In conjunction with the above, our policy is to recognize interest related to unrecognized tax benefits as interest expense and penalties as operating expenses. We have not recorded any unrecognized tax benefits through September 30, 2011.

NOTE 16 – CHANGE IN ACCOUNTING ESTIMATE

Effective May 1, 2011, the Company changed the time period over which it depreciates its 2005 model year and newer trailers and it changed the amount of the salvage value to which those trailers are being depreciated. The depreciation time period was changed to 14 years from 10 years and the salvage value was changed to \$500 from 25.0% of the original purchase price. The Company believes that both of these changes more clearly and appropriately reflect the state of the current trailer market and thus, will more reasonably and accurately report the value of the trailers on the balance sheet. This change is being accounted for as a change in estimate. This change in estimate resulted in a reduction of depreciation expense as set forth in the following table:

	(in thousands, except per share data)		
	Pre-tax Basis	Net of Tax	Per Share Effect
Three Months Ended September 30, 2011	\$ 606	\$ 374	\$ 0.04
Nine Months Ended September 30, 2011	1,011	623	0.06

NOTE 17 – (LOSS) EARNINGS PER SHARE

Basic (loss) earnings per share is computed based on the weighted average number of shares of Common Stock outstanding during the period. Diluted (loss) earnings per share is computed by adjusting the weighted average number of shares of Common Stock outstanding by Common Stock equivalents attributable to dilutive stock options and restricted stock. The computation of diluted (loss) earnings per share does not assume conversion, exercise, or

contingent issuance of securities that would have an antidilutive effect on (loss) earnings per share.

Edgar Filing: USA TRUCK INC - Form 10-Q

The following table sets forth the computation of basic and diluted (loss) earnings per share:

	(in thousands, except per share amounts)			
	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Numerator:				
Net (loss) income	\$ (4,305)	\$ 586	\$ (6,423)	\$ (1,510)
Denominator:				
Denominator for basic (loss) earnings per share – weighted average shares	10,294	10,297	10,304	10,294
Effect of dilutive securities:				
Employee stock options and restricted stock	--	15	--	--
Denominator for diluted (loss) earnings per share – adjusted weighted average shares and assumed conversions	10,294	10,312	10,304	10,294
Basic (loss) earnings per share	\$ (0.42)	\$ 0.06	\$ (0.62)	\$ (0.15)
Diluted (loss) earnings per share	\$ (0.42)	\$ 0.06	\$ (0.62)	\$ (0.15)
Weighted average anti-dilutive employee stock options and restricted stock	167	101	140	123

NOTE 18 – LITIGATION

We are party to routine litigation incidental to our business, primarily involving claims for personal injury and property damage incurred in the transportation of freight. We maintain insurance to cover liabilities in excess of certain self-insured retention levels. Though management believes these claims to be routine and immaterial to our long-term financial position, adverse results of one or more of these claims could have a material adverse effect on our financial position or results of operations in any given reporting period.

On July 2, 2010, a former driver team member filed a lawsuit against us titled *Hermes Cerdania vs. USA Truck, Inc.* in the Superior Court of the State of California for the County of San Bernardino, alleging various violations of the California Labor Code and seeking certification of the suit as a class action to include “all individuals currently and formerly employed in California as drivers, or other similarly titled positions.” We successfully removed the case to the United States District Court, Central District of California and filed an answer denying the plaintiff’s allegations. The lawsuit sought monetary damages for the alleged violations. In February 2011, we negotiated settlement of the lawsuit through mediation subject to the District Court’s review and approval. Such approval of the \$250,000 settlement was received in October 2011. We had fully accrued the agreed upon settlement amount during the second quarter of 2011.

On July 28, 2008, a former commission sales agent, Mr. William Blankenship (“Blankenship”), filed an action in the United States District Court, Western District of Arkansas entitled *William Blankenship, Jr. v. USA Truck, Inc.*, asking the court to set aside a previously consummated settlement agreement between the parties. The matter was dismissed by the District Court based upon our Motion to Dismiss, but was later reinstated by the 8th Circuit Court of Appeals and set for trial in the United States District Court in Fort Smith, Arkansas. In October 2011, the trial was held in the United States District Court and the jury returned a favorable verdict for the Company on all counts and determined that the Company had no additional liability in this matter.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. These statements generally may be identified by their use of terms or phrases such as “expects,” “estimates,” “anticipates,” “projects,” “believes,” “plans,” “intends,” “may,” “will,” “should,” “could,” “potential,” “continue,” “future” and terms or phrases of similar substance. Forward-looking statements are based upon the current beliefs and expectations of our management and are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified, which could cause future events and actual results to differ materially from those set forth in, contemplated by, or underlying the forward-looking statements. Accordingly, actual results may differ from those set forth in the forward-looking statements. Readers should review and consider the factors that may affect future results and other disclosures by the Company in its press releases, Annual Report on Form 10-K and other filings with the Securities and Exchange Commission. Additional risks associated with our operations are discussed in our Annual Report on Form 10-K for the year ended December 31, 2010 under the heading “Risk Factors” in Item 1A of that report and updates, if any, to that information are included in Item 1A of Part II of this report. We disclaim any obligation to update or revise any forward-looking statements to reflect actual results or changes in the factors affecting the forward-looking information. In light of these risks and uncertainties, the forward-looking events and circumstances discussed in this report might not occur.

All forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by this cautionary statement.

References to the “Company,” “we,” “us,” “our” and words of similar import refer to USA Truck, Inc. and its subsidiary.

The following discussion should be read in conjunction with our consolidated financial statements and notes thereto and other financial information that appears elsewhere in this report.

Overview

The following Management's Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”) is intended to help the reader understand USA Truck, Inc., our operations and our present business environment. MD&A is provided as a supplement to, and should be read in conjunction with, our consolidated financial statements and notes thereto and other financial information that appears elsewhere in this report. This overview summarizes the MD&A, which includes the following sections:

Our Business – a general description of our business, the organization of our operations and the service offerings that comprise our operations.

Results of Operations – an analysis of our consolidated results of operations for the periods presented in our consolidated financial statements and a discussion of seasonality, the potential impact of inflation and fuel availability and cost.

Off-Balance Sheet Arrangements – a discussion of significant financial arrangements, if any, that are not reflected on our balance sheet.

Liquidity and Capital Resources – an analysis of cash flows, sources and uses of cash, debt, equity and contractual obligations.

Critical Accounting Estimates – a discussion of accounting policies that require critical judgment and estimates.

Our Business

We operate primarily in the for-hire truckload segment of the trucking industry. Customers in a variety of industries engage us to haul truckload quantities of freight, with the trailer we use to haul that freight being assigned exclusively to that customer's freight until delivery. Our business is classified into two reportable segments: our Trucking operating segment consisting primarily of our General Freight, Dedicated Freight and rail intermodal service offerings and our Strategic Capacity Solutions ("SCS") operating segment consisting entirely of our freight brokerage service offering. We previously included the results of our freight brokerage and Container-on-Flat-Car ("COFC") portion of our rail Intermodal service offering in our SCS operating segment. The Trailer-on-Flat-Car ("TOFC") portion of our rail Intermodal service offering was classified within our Trucking operating segment. We later combined COFC and TOFC and reported them as Intermodal and brokerage was reported as SCS. This quarter, based on several factors including the relatively small size of Intermodal and the interrelationship of Trucking and Intermodal operations on the drayage portion of intermodal movements, we aggregated Intermodal with the Trucking operating segment.

Our SCS operating segment is intended to provide services which complement our Trucking services, primarily to existing customers of our Trucking operating segment. A majority of the customers using our SCS services are also customers of our Trucking operating segment. We have steadily grown SCS revenue over the past year, and for the nine months ended September 30, 2011 this service represented approximately 15.4% of our consolidated revenue.

Substantially all of our base revenue from the two reportable segments is generated by transporting, or arranging for the transportation of, freight for customers and is predominantly affected by the rates per mile received from our customers and similar operating costs. For the three and nine month periods ended September 30, 2011, Trucking base revenue represented 82.1% and 84.6% of base revenue, respectively, with the remaining base revenue being generated through SCS. For the three and nine month periods ended September 30, 2010, Trucking base revenue represented 90.0% and 91.3% of total base revenue, respectively, with the remaining base revenue being generated through SCS.

We generally charge customers for our services on a per-mile basis. The expenses which have a major impact on our profitability are the variable costs of transporting freight for our customers. The variable costs include fuel expense, insurance and claims and driver-related expenses, such as wages and benefits.

Trucking. Trucking includes the following primary service offerings provided to our customers:

- **General Freight.** Our General Freight service offering provides truckload freight services as a short- to medium-haul common carrier. We have provided General Freight services since our inception and we derive the largest portion of our revenue from these services.
- **Dedicated Freight.** Our Dedicated Freight service offering is a variation of our General Freight service, whereby we agree to make our equipment and drivers available to a specific customer for shipments over particular routes at specified times. In addition to serving specific customer needs, our Dedicated Freight service offering also aids in driver recruitment and retention.
- **Intermodal.** Our rail Intermodal service offering provides our customers cost savings over General Freight with a slightly slower transit speed, while allowing us to reposition our equipment to maximize our freight network yield. Based on Intermodal's relatively small size, and the interrelationship of Trucking and Intermodal operations on the drayage portion of intermodal movements, we have determined that separate reporting is not justified. Therefore, we have aggregated the reporting of our Intermodal operations with those of our Trucking operations.

Strategic Capacity Solutions. Our SCS operating segment consists entirely of our freight brokerage service offering which matches customer shipments with available equipment of authorized carriers and provides services that complement our Trucking operations. We provide these services primarily to our existing Trucking customers, many of whom prefer to rely on a single carrier, or a small group of carriers, to provide all their transportation needs. To date, a majority of the customers of SCS have also engaged us to provide services through one or more of our Trucking service offerings. For the three month and nine month periods ended September 30, 2011, SCS services generated approximately 17.9% and 15.4%, respectively, of total base revenue. For the three month and nine month periods ended September 30, 2010, SCS services generated approximately 10.0% and 8.7%, respectively, of total base revenue.

Results of Operations

Executive Overview

Overview

The third quarter of 2011 presented several challenges. These included a major operating system transition, softer than expected freight volumes, and a persistently high number of unmanned tractors. We were unable to overcome these challenges and produce sufficient revenue to operate profitably. We have addressed a number of the underlying problems, but we still have work to do in order to achieve sustained profitability.

We completed our migration to new operating software in our Trucking division during the third quarter. We had planned for a modest reduction of efficiency during the transition, but the magnitude and duration of the disruption was much greater than we had anticipated. The operating system conversion was complicated by problems with a customized portion of the software. This software shortcoming hampered our network visibility for several weeks as a solution was developed. We believe the ripple effects included significant disruption to our load velocity, overly conservative booking of customers' loads, lost freight opportunities, and increased driver turnover.

Our business environment was softer than in the second quarter. We felt a modest step-down in overall freight demand in our markets, which we attribute to slower growth in the U.S. economy. In addition, we began phasing out service on two major accounts, one due to the end of a project and one due to inadequate pricing. In a softer overall freight market, we had fewer opportunities to replace all of this business with high-quality freight. Industry-wide, we believe freight demand and trucking capacity are in relative equilibrium, but the spot market is less robust than during the second quarter. This contributed to a reduction in overall miles and an increase in our percentage of non-revenue miles.

For the quarter, in our Trucking operations, tractor utilization decreased 13.2% and our empty mile factor increased approximately 200 basis points, to 12.4%, compared with the third quarter of 2010. Base Trucking revenue per mile was a positive, however, rising approximately 7.2% compared with the third quarter of 2010. In addition, revenue in our SCS segment (Strategic Capacity Solutions, our freight brokerage service offering) increased 82%, and the amount of gross margin increased approximately 80%.

From a cost perspective, driver wages, net fuel cost, equipment repairs, and insurance and claims all increased on a per mile basis. These increases more than offset our increase in Trucking revenue per mile. In addition, the decrease in tractor utilization less effectively covered our fixed costs, and increased empty miles percentage hurt fuel surcharge recovery as well as overall base revenue per mile.

Balance Sheet and Liquidity

Our balance sheet remains solid, and we continue to have significant liquidity to operate the business. At September 30, 2011, we were in compliance with all our debt covenants, and we have \$28.2 million available under our revolving credit agreement and \$28.8 million available through equipment financing commitments. During the third quarter of 2011, we reduced the size of our in-service fleet by 49 tractors due to the high unmanned tractor count. We also reduced our expected tractor purchases for the second half of 2011 from 250 tractors to 155 tractors, which will reduce our expected net capital expenditures for the second half of 2011 from \$18.1 million to \$10.1 million.

Management Team

We are streamlining our management structure to improve accountability and speed of execution. Our executive management team has been reduced from nine members at the beginning of the second quarter to seven members at the end of the second quarter, to five members today. As part of this realignment, we are consolidating accountability for revenue production in our Trucking segment under a single executive officer. On August 1, 2011, David B. Hartline joined the Company as Chief Operating Officer for Trucking. During mid-October, after stabilizing our fleet

operations, he assumed direct responsibility for all sales, pricing and operations activities in our Trucking segment. As part of this realignment, the corporate strategy department was eliminated, and management information systems and engineering, which formerly reported to the corporate strategy department, now report to the Chief Financial Officer.

Outlook

Since August, we have been implementing changes in our operational discipline, market emphasis, customer service, and driver relations to reflect the experience and philosophies of our Chief Operating Officer for Trucking. Along with the implementation of our new operating system, this has required a significant investment in training our operations personnel. We believe certain metrics associated with on-time delivery, pre-booking of freight, load planning, freight market selection, and driver miles are beginning to show improvement. Nevertheless, revenue-related operational measures currently indicate potential softness in fourth quarter operating results. We caution, however, that it remains too early in the quarter to draw definite conclusions because of the numerous changes underway and the significant operating leverage in our income statement. Among other factors, changes in revenue items such as base Trucking revenue per mile, seated truck count, and miles per tractor, as well as expense items such as insurance and claims, net fuel cost and equipment maintenance, significantly impact operating results.

Base Trucking revenue per mile for the first few weeks of October decreased 1.1% from the average of the third quarter of 2011, while average length of haul has remained relatively constant at 509 miles for the first two weeks of October and the third quarter of 2011.

The number of Company-owned tractors without drivers was approximately 10.0% of the fleet for the third quarter and for the first two weeks of October.

Miles per seated truck for the first two weeks of October were approximately 3.1% higher than the average for the third quarter of 2011.

From a cost perspective, the Company has improved its fuel purchasing efficiency, reduced headcount, implemented new maintenance procedures, and identified a wide range of additional cost-saving measures that are expected to contribute to several million dollars of annual savings. These savings are expected to be phased in over the fourth quarter of 2011.

Our path forward requires that we perform the basic processes fundamental to our Trucking business. During the third quarter, we completed our operating system conversion. We also completed our search for a Chief Operating Officer for Trucking who could bring substantial experience and success in managing regional operations. Despite the near-term disruptions we have experienced, we believe we have the right systems and leadership to drive future success. Now it is up to us to execute.

Three Months Ended September 30, 2011 Compared to Three Months Ended September 30, 2010

Results of Operations – Combined Services

Total base revenue increased 1.9% to \$102.6 million for the quarter ended September 30, 2011 from \$100.8 million for the same quarter of 2010. We reported a net loss of \$4.3 million (\$0.42 per share) for the quarter ended September 30, 2011 as compared to net income of \$0.6 million (\$0.06 per share) for the prior year period.

Our effective tax rate was 34.4% for the quarter ended September 30, 2011 compared to 60.0% for the same quarter of 2010. Income tax expense varies from the amount computed by applying the federal tax rate to income before income taxes primarily due to state income taxes, net of federal income tax effect, adjusted for permanent differences, the most significant of which is the effect of the per diem pay structure for drivers. Due to the partially nondeductible effect of per diem payments, our tax rate will vary in future periods based on fluctuations in earnings and in the number of drivers who elect to receive this pay structure.

Results of Operations – Trucking

Relationship of Certain Items to Base Revenue

The following table sets forth the percentage relationship of certain items to base revenue of our Trucking operations for the periods indicated. Fuel and fuel taxes are shown net of fuel surcharges.

	Three Months Ended			
	2011		2010	
		%		%
Base Trucking revenue	100.0	%	100.0	%
Operating expenses and costs:				
Salaries, wages and employee benefits	39.0		36.0	

Edgar Filing: USA TRUCK INC - Form 10-Q

Fuel and fuel taxes	11.6		13.1	
Purchased transportation	16.3		12.4	
Depreciation and amortization	14.7		13.8	
Operations and maintenance	13.7		11.0	
Insurance and claims	6.6		5.8	
Operating taxes and licenses	1.5		1.5	
Communications and utilities	1.2		1.1	
Gain on disposal of revenue equipment, net	(0.8)		--	
Other	5.3		4.0	
Total operating expenses and costs	109.1		98.7	
Operating (loss) income	(9.1)	%	1.3	%

Key Operating Statistics:

	Three Months Ended September 30,	
	2011	2010
Operating (loss) income (in thousands)	\$ (7,733)	\$ 1,183
Total miles (in thousands) (1)	53,640	61,852
Empty mile factor (2)	12.4%	10.3%
Weighted average number of tractors (3)	2,342	2,345
Average miles per tractor per period	22,904	26,376
Average miles per tractor per week	1,743	2,007
Average miles per trip (4)	507	546
Base Trucking revenue per tractor per week	\$ 2,737	\$ 2,942
Number of tractors at end of period (3)	2,284	2,366
Operating ratio (5)	109.1%	98.7%

(1) Total miles include both loaded and empty miles.

(2) The empty mile factor is the number of miles traveled for which we are not typically compensated by any customer as a percent of total miles traveled.

(3) Tractors include Company-operated tractors in-service plus tractors operated by independent contractors.

(4) Average miles per trip is based upon loaded miles divided by the number of Trucking shipments.

(5) Operating ratio is based upon total operating expenses, net of fuel surcharge revenue, as a percentage of base revenue.

Our base Trucking revenue decreased 7.1% from \$90.7 million to \$84.3 million; our operating loss was \$7.7 million compared to operating income of \$1.2 million for the same quarter of 2010. The decrease in our base Trucking revenue resulted from a softening freight market during the quarter combined with the migration to a new Trucking operating software, which caused greater than anticipated disruption in our operations.

Overall, our operating ratio deteriorated by 10.4 percentage points of base revenue to 109.1% from 98.7% as a result of the following factors:

- Salaries, wages and employee benefits expense increased by 3.0 percentage points of base revenue predominately due to a 7.1% reduction in Trucking base revenue, an increase in driver sign-on bonuses related to hiring more qualified drivers and an increase in health and benefit costs. Driver compensation costs increased nearly \$0.02 per mile or \$0.07 per share for the quarter. Also during the quarter, we had an increase in wages in our maintenance department as we have increased the number of terminal locations and the hours of operation at our existing terminals to better service our operations. During the third quarter of 2011, we continued to see evidence of a tightening market of eligible drivers related to the implementation of the Department of Transportation's ("DOT") Compliance, Safety, Accountability ("CSA") program. New hours-of-service rules being reviewed by the DOT and CSA may further reduce the pool of eligible drivers and may lead to increases in driver related expenses that would increase salaries, wages and employee benefits.
- Fuel and fuel taxes expense decreased 1.5 percentage points of base Trucking revenue over the comparable quarter of 2010. Contributing to this decrease, was an improved fuel economy in the third quarter compared to the same

period of 2010 as well as an increase in our net Trucking revenue per mile. Partially offsetting this decrease was an average 34.1% increase in the price of fuel over the comparable quarter of 2010. Fuel costs may continue to be affected in the future by price fluctuations, the terms and collectability of fuel surcharge revenue and the percentage of total miles driven by independent contractors.

- Purchased transportation expense, which is comprised of independent contractor compensation, fees paid to external transportation providers such as Mexican carriers and the railroads, increased by 3.9 percentage points of base Trucking revenue. This increase was the result of an increase in carrier expense related to our Mexico operations, as we saw our revenue from shipments into and out of the country increase 10.9% over the same period in 2010, and an increase in intermodal shipments. These increases were partially offset by a decrease of 21.6% in the number of independent contractors in our fleet. Over the longer term, we expect our purchased transportation expense to increase if we achieve our long-term goal to grow our independent contractor fleet.

- Depreciation and amortization expense increased 0.9 percentage points of base Trucking revenue. During the quarter, we purchased 130 tractors and disposed a total of 101 tractors and 155 trailers. We are continuing our efforts to replace older equipment and reduce the age of our fleet. Prices for new equipment have risen in recent years due to Environmental Protection Agency (“EPA”) mandates related to engine emissions. As a result of our plan to reduce the age of our fleet and the increased costs of new equipment, we expect depreciation and amortization expense to increase as a percentage of base Trucking revenue in future periods. Effective May 1, 2011, the Company changed the time period over which it depreciates its 2005 model year and newer trailers from 14 years to 10 years and it changed the amount of the salvage value to which those trailers are being depreciated from 25.0% of the original purchase price to \$500. This change in estimate resulted in a reduction of depreciation expense on a pre-tax basis of approximately \$0.6 million and on a net-of-tax basis of approximately \$0.4 million (\$0.04 per share). Depreciation and amortization expense may be affected in the future as equipment manufacturers change prices and if the prices of used equipment fluctuate.
- Operations and maintenance expense increased 2.7 percentage points of base Trucking revenue primarily due to a 27.7% increase in direct repair costs related to the DOT’s CSA program, new engine emissions requirements mandated by the EPA, various rules imposed by California’s Air Resources Board and the higher mileage equipment remaining in our fleet. Our average tractor age as of September 30, 2011 was 25.1 months compared to 28.8 months at September 30, 2010 whereas our average trailer age was 69.3 months and 65.3 months, respectively. This increase was partially offset by the above mentioned increase in our base Trucking revenue per mile. On April 1, 2009, we changed our method of accounting for tires, which changed the way we recognized cost for tires placed into service. Accordingly, operations and maintenance expense related to this change increased in 2011 over that of 2010 by approximately \$1.0 million. Operations and maintenance expense may decrease as the age of our fleet decreases, but we do not expect to see the benefits of the new equipment in this line item for a number of quarters.
- Insurance and claims expense increased 0.8 percentage points of base Trucking revenue, driven by a reduction in base Trucking revenue and a 12.9% increase in physical damage expense for the quarter compared to the same quarter of 2010 due to adverse claims experience and an increase in expense related to miscellaneous legal costs.
 - Other expenses increased 1.3 percentage points of base Trucking revenue in the third quarter of 2011 compared to the third quarter of 2010 predominately driven by higher recruiting related expenses, an increase in the number of maintenance terminals to service our equipment and the above mentioned decrease in Trucking base revenue. The DOT’s CSA program has increased the difficulty of recruiting qualified drivers as the demand for those highly qualified drivers has increased, while the program has simultaneously decreased the overall supply of drivers. The number of unmanned trucks in the third quarter increased from 4.2% to 9.8% of the fleet from the third quarter of the prior year and led to elevated driver-related costs as we worked to man those trucks with qualified drivers. While our driver recruiting costs have trended upward the past several quarters, we expect that most of these costs will subside upon reaching our goal of 3% unmanned tractors, but this could take several months to achieve.
- Gain on the disposal of equipment increased 0.8 percentage points in the quarter ended September 30, 2011 as compared to the third quarter of 2010. We have capitalized on the strong used equipment market in our continued effort to reduce the age of our tractor fleet as we have sold older model tractors and replaced those units with new equipment. Also, as we have outfitted a large percentage of our trailers with SkyBitz trailer tracking, which has enabled us to systematically reduce the number of trailers in our fleet while also replacing those older model trailers with current model year equipment. This reduction in the number of trailers, combined with the stronger used equipment market, is responsible for the increase.

Results of Operations – Strategic Capacity Solutions

The following table sets forth certain information relating to our SCS segment for the periods indicated:

	Three Months Ended September 30,	
	2011	2010
Total SCS revenue	\$ 21,144	\$ 11,687
Intercompany revenue	(2,755)	(1,584)
Net revenue	\$ 18,389	\$ 10,103
Operating income (in thousands)	\$ 1,874	\$ 1,133
Gross margin (1)	14.7 %	15.6%

(1)Gross margin is calculated by taking total base revenue, less purchased transportation expense net of fuel surcharge revenue and dividing that amount by total base revenue. This calculation includes intercompany revenue and expenses.

Net revenue from SCS increased 82.0% to \$18.4 million from \$10.1 million, while operating income increased from \$1.1 million to \$1.9 million. This increase was primarily a result of the continued expansion of our SCS operations, as we added six branch offices since the third quarter of 2010, bringing the total number of branches to 13 at September 30, 2011, and increased productivity of SCS team members. The resulting increase in operating expenses has been more than offset with the increase in revenues from these additional branch locations. If we are successful in continuing to build our SCS business, we would expect to see expenses as a percent of total revenue decline further in the next several quarters.

Nine Months Ended September 30, 2011 Compared to Nine Months Ended September 30, 2010

Results of Operations – Combined Services

Total base revenue increased 9.1% to \$310.8 million for the nine months ended September 30, 2011 from \$284.9 million for the same quarter of 2010. We incurred a net loss of \$6.4 million, or \$0.62 per share, for the nine months ended September 30, 2011 as compared to a net loss of \$1.5 million, or \$0.15 per share, for the same period of 2010. In the second quarter of 2010, the Company entered into, and subsequently sold, a fuel hedge contract and recognized an after-tax gain of approximately \$0.7 million, or \$0.07 per share.

Our effective tax rate was 29.1% for the nine month period ended September 30, 2011 compared to 69.8% for the same period of 2010. Income tax expense varies from the amount computed by applying the federal tax rate to income before income taxes primarily due to state income taxes, net of federal income tax effect, adjusted for permanent differences, the most significant of which is the effect of the per diem pay structure for drivers. Due to the partially nondeductible effect of per diem payments, our tax rate will vary in future periods based on fluctuations in earnings and in the number of drivers who elect to receive this pay structure.

Results of Operations – Trucking

Relationship of Certain Items to Base Revenue

The following table sets forth the percentage relationship of certain items to base revenue of our Trucking operations for the periods indicated. Fuel and fuel taxes are shown net of fuel surcharges.

	Nine Months Ended			
	September 30,			
	2011		2010	
Base Trucking revenue	100.0	%	100.0	%
Operating expenses and costs:				
Salaries, wages and employee benefits	37.4		37.2	
Fuel and fuel taxes	12.2		13.4	
Purchased transportation	15.8		12.1	
Depreciation and amortization	14.2		14.3	
Operations and maintenance	12.1		9.9	
Insurance and claims	6.5		6.4	
Operating taxes and licenses	1.5		1.6

Gain on disposal of revenue equipment, net	(1.1)		--	
Other	5.0		4.2	
Total operating expenses and costs	104.7		100.2	
Operating (loss) income	(4.7)	%	(0.2)	%

Key Operating Statistics:

	Nine Months Ended	
	September 30,	
	2011	2010
Operating loss (in thousands)	\$(12,310)	\$ (579)
Total miles (in thousands) (1)	170,148	183,958
Empty mile factor (2)	11.1%	10.0%
Weighted average number of tractors (3)	2,341	2,340
Average miles per tractor per period	72,682	78,614
Average miles per tractor per week	1,864	2,016
Average miles per trip (4)	532	547
Base Trucking revenue per tractor per week	\$ 2,880	\$ 2,850
Number of tractors at end of period (3)	2,284	2,366
Operating ratio (5)	104.7%	100.2%

(1) Total miles include both loaded and empty miles.

(2) The empty mile factor is the number of miles traveled for which we are not typically compensated by any customer as a percent of total miles traveled.

(3) Tractors include Company-operated tractors in-service plus tractors operated by independent contractors.

(4) Average miles per trip is based upon loaded miles divided by the number of Trucking shipments.

(5) Operating ratio is based upon total operating expenses, net of fuel surcharge revenue, as a percentage of base revenue.

Our base Trucking revenue increased 1.1% from \$260.1 million to \$262.9 million; our operating loss was \$12.3 million during the nine month period ended September 30, 2011, compared to an operating loss of \$0.6 million for the same period of 2010. The decrease in our base Trucking revenue resulted from a softening freight market during the period combined with the migration to a new Trucking operating software, which caused greater than anticipated disruption in our operations.

Overall, our operating ratio deteriorated by 4.5 percentage points of base revenue to 104.7% as a result of the following factors:

- Salaries, wages and employee benefits expense increased by 0.2 percentage points of base revenue due to an increase in driver compensation costs and an increase in wages in our maintenance department, the result of increasing the number of terminal locations and hours of operation to better service our operations. During 2011, we saw evidence of a tightening market of eligible drivers related to the implementation of the DOT's CSA program. New hours-of-service rules being reviewed by the DOT and CSA may further reduce the pool of eligible drivers and lead to increases in driver expenses that would increase salaries, wages and employee benefits.
- Fuel and fuel taxes expense decreased 1.2 percentage points of total Trucking revenue. We experienced an increase in our fuel economy in 2011 compared to the same period of 2010 as well as an increase in our net Trucking revenue per mile. During the period we saw fuel prices increase an average of 34.4% over the comparable period of 2010, which offset some of the savings from the improved fuel economy. In addition, during the second quarter of 2010, the Company recognized a \$1.2 million pre-tax gain on the sale of a fuel contract, the gain of which reduced that quarter's fuel and fuel taxes expense. Fuel costs may continue to be affected in the future by price fluctuations, the terms and collectability of fuel surcharge revenue and the percentage of total miles driven by independent contractors.
- Purchased transportation expense, which is comprised of independent contractor compensation, fees paid to external transportation providers such as Mexican carriers and the railroads, increased by 3.7 percentage points of base Trucking revenue. This increase was the result of an increase in carrier expense related to our Mexico operations, as we saw our revenue from shipments into and out of the country increase 19.4% over the same period in 2010, and an increase in intermodal shipments. These increases were partially offset by a decrease of 12.7% in the number of independent contractors in our fleet. Over the longer term, we expect our purchased transportation expense to increase if we achieve our long-term goal to grow our independent contractor fleet.
- Depreciation and amortization expense remained relatively flat. Through September 30, 2011, we have purchased 435 tractors and 350 trailers, which will be used to replace existing older equipment in an effort to reduce the age of our fleet. Prices for new equipment have risen in recent years and tractors more so due to EPA mandates related to engine emissions. As a result of our plan to reduce the age of our fleet and the increased costs of new equipment, we expect depreciation and amortization expense to increase as a percentage of base Trucking revenue in future periods. Effective May 1, 2011, the Company changed the time period over which it depreciates its 2005 model year and newer trailers to 14 years from 10 years and it changed the amount of the salvage value to which those trailers are being depreciated from 25% of the original purchase price to \$500. For the nine months ended September 30, 2011, this change in estimate resulted in a reduction of depreciation expense on a pre-tax basis of approximately \$1.0 million and on a net-of-tax basis of approximately \$0.6 million (\$0.06 per share). Depreciation and amortization expense may be affected in the future as equipment manufacturers change prices and if the prices of used equipment fluctuate.
- Operations and maintenance expense increased 2.2 percentage points of base Trucking revenue primarily due to a 30.5% increase in direct repair costs related to the DOT's CSA program, new engine emissions requirements mandated by the EPA, various rules imposed by California's Air Resources Board, harsh winter weather during the first quarter and the higher mileage equipment remaining in our fleet. This increase was partially offset by the above mentioned increase in our base Trucking revenue per mile. On April 1, 2009, we changed our method of accounting for tires which changed the way we recognized cost for tires placed into service. Accordingly, operations and maintenance expense related to this change increased in 2011 over that of 2010 by approximately \$2.8 million. Operations and maintenance expense may decrease as the age of our fleet decreases, but we do not expect to see the benefits of the new equipment in this line item for a number of quarters.

- Other expenses increased 0.8 percentage points of base Trucking revenue in the first nine months of 2011 compared to the same period of 2010 predominately driven by higher recruiting related expenses and an increase in the number of maintenance terminals to service our equipment. The DOT's CSA program has increased the difficulty of recruiting qualified drivers as the demand for those qualified drivers has increased, while the program has simultaneously decreased the overall supply of drivers. For the nine months ending September 30, 2011, 9.1% of our fleet was unmanned, compared to 5.3% in the previous year and our goal of 3.0%.
- Gain on the disposal of equipment increased 1.1 percentage points for the nine months ended September 30, 2011 as compared to the same period of 2010. We have capitalized on the strong used equipment market in our continued effort to reduce the age of our tractor fleet as we have sold older model tractors and replaced those units with new equipment. Also, as we have outfitted a large percentage of our trailers with SkyBitz trailer tracking, we have been able to systematically reduce the number of trailers in our fleet while also replacing those older model trailers with current model year equipment.

Results of Operations – Strategic Capacity Solutions

The following table sets forth certain information relating to our SCS segment for the periods indicated:

	Nine Months Ended	
	September 30,	
	2011	2010
Total SCS revenue	\$ 56,629	\$ 28,973
Intercompany revenue	(8,800)	(4,157)
Net revenue	\$ 47,829	\$ 24,816
Operating income (in thousands)	\$ 5,481	\$ 2,433
Gross margin (1)	15.4 %	14.9%

(1)Gross margin is calculated by taking total base revenue, less purchased transportation expense net of fuel surcharge revenue and dividing that amount by total base revenue. This calculation includes intercompany revenue and expenses.

Net revenue from SCS increased 92.7% to \$47.8 million from \$24.8 million, while operating income increased from \$2.4 million to \$5.5 million. This increase was primarily a result of the continued expansion of our SCS operations, as we added six branches since the third quarter of 2010, bringing the total number of branches to 13 at September 30, 2011. In addition, we experienced an increase in productivity of SCS team members. The resulting increase in operating expenses has been more than offset with the increase in revenues from these additional branch locations. If we are successful in continuing to build our SCS business, we would expect to see expenses as a percent of total revenue decline further in the next several quarters.

Seasonality

In the trucking industry, revenue generally decreases as customers reduce shipments during the winter holiday season and as inclement weather impedes operations. At the same time, operating expenses increase due primarily to decreased fuel efficiency and increased maintenance costs. Future revenue could be impacted if customers, particularly those with manufacturing operations, reduce shipments due to temporary plant closings. Historically, many of our customers have closed their plants for maintenance or other reasons during January and July.

Inflation

Most of our operating expenses are inflation sensitive, and we have not always been able to offset inflation-driven cost increases through increases in our revenue per mile and our cost control efforts. The effect of inflation-driven cost increases on our overall operating costs is not expected to be greater for us than for our competitors.

Fuel Availability and Cost

The motor carrier industry is dependent upon the availability of fuel. Fuel shortages or increases in fuel taxes or fuel costs have adversely affected our profitability and will continue to do so. Fuel prices have fluctuated widely, and fuel prices and fuel taxes have generally increased in recent years. We have not experienced difficulty in maintaining necessary fuel supplies, and in the past we generally have been able to partially offset increases in fuel costs and fuel taxes through increased freight rates and through a fuel surcharge that increases incrementally as the price of fuel

increases above an agreed upon baseline price per gallon. Typically, we are not able to fully recover increases in fuel prices through rate increases and fuel surcharges, primarily because those items do not provide any benefit with respect to empty and out-of-route miles, for which we typically do not receive compensation from customers.

On May 25, 2010, we entered into a contract to hedge approximately 0.5 million gallons of diesel fuel per month for the time period of July 2010 through June 2012. Under this agreement we were to pay a fixed rate per gallon of heating oil and receive the monthly average price of NYMEX HO heating oil. As diesel fuel is not a traded commodity on the futures market, heating oil is used as a substitute for diesel fuel as prices for both generally move in similar directions.

On June 28, 2010, the Company sold its contract related to the forecasted purchase of diesel fuel for the time period of July 2010 through June 2012 to lock in related gains. The purchase contract had not been designated as a hedge; therefore, the related gain was recorded as a reduction in fuel expense of approximately \$1.2 million on a pre-tax basis and on a net of tax basis of approximately \$0.7 million or \$0.07 per share.

We do not have any long-term fuel purchase contracts and we have not entered into any other hedging arrangements that protect us against fuel price increases.

Off-Balance Sheet Arrangements

We do not currently have off-balance sheet arrangements that have or are reasonably likely to have a material current or future effect on our consolidated financial condition, revenue or expenses, results of operations, liquidity, capital expenditures or capital resources. From time to time, we enter into operating leases relating to facilities and office equipment that are not reflected in our balance sheet.

Liquidity and Capital Resources

On April 19, 2010, we entered into a new Credit Agreement with Branch Banking and Trust Company (“BB&T”) as Administrative Agent, which replaced our Amended and Restated Senior Credit Facility that was to mature on September 1, 2010. The Credit Agreement provides for available borrowings of up to \$100.0 million, including letters of credit not exceeding \$25.0 million. Availability may be reduced by a borrowing base limit as defined in the Credit Agreement. The Credit Agreement provides an accordion feature allowing us to increase the maximum borrowing amount by up to an additional \$75.0 million in the aggregate in one or more increases, subject to certain conditions. The Credit Agreement bears variable interest based on the type of borrowing and on the Administrative Agent’s prime rate or the London Interbank Offered Rate plus a certain percentage, which is determined based on our attainment of certain financial ratios. A quarterly commitment fee is payable on the unused portion of the credit line and bears a rate which is determined based on our attainment of certain financial ratios. The obligations of the Company under the Credit Agreement are guaranteed by the Company and secured by a pledge of substantially all of the Company’s assets with the exception of real estate. The Credit Agreement includes usual and customary events of default for a facility of this nature and provides that, upon the occurrence and continuation of an event of default, payment of all amounts payable under the Credit Agreement may be accelerated, and the lenders’ commitments may be terminated. The Credit Agreement contains certain restrictions and covenants relating to, among other things, dividends, liens, acquisitions and dispositions outside of the ordinary course of business, and affiliate transactions. The Credit Agreement will expire on April 19, 2014.

The nature of our business requires significant investments in new revenue equipment. We have financed new tractor and trailer purchases predominantly with cash flows from operations, the proceeds from sales or trades of used equipment, borrowings under our Credit Agreement and capital lease purchase arrangements. We have historically met our working capital needs with cash flows from operations and with borrowings under financing arrangements. We use these financing arrangements to minimize fluctuations in cash flow needs and to provide flexibility in financing revenue equipment purchases. Management is not aware of any known trends or uncertainties that would cause a significant change in our sources of liquidity. We expect our principal sources of capital to be sufficient to finance our operations, annual debt maturities, lease commitments, letter of credit commitments, stock repurchases and capital expenditures over the next twelve months. There can be no assurance, however, that such sources will be sufficient to fund our operations and all expansion plans for the next several years, or that any necessary additional financing and facility renewal will be available, if at all, in amounts required or on terms satisfactory to us.

Our balance sheet debt, less cash, represents 49.0% of our total capitalization, and we have no material off-balance sheet debt. Our capital leases currently represent 45.4% of our total debt and carry an average fixed rate of 3.0%. On September 30, 2011, we have \$28.8 million available through equipment financing commitments and approximately \$28.2 million of additional availability on our revolving credit line. We expect the cash we will receive from the sale of our used equipment to exceed the amount we plan to spend on the purchase of our new equipment for the remainder of the year. Accordingly, we expect our net capital expenditures for the remainder of 2011 will be approximately \$(0.9) million.

Cash Flows

(in thousands)

Nine Months Ended September 30,

	2011	2010
Net cash provided by operating activities	\$ 12,089	\$ 34,299
Net cash used in investing activities	(22,363)	(22,475)
Net cash provided by (used in) financing activities	8,453	(11,292)

Cash generated from operations decreased \$22.2 million during the first nine months of 2011 as compared to the same time period of 2010, primarily due to the net effect of the following factors:

- A \$6.4 million net loss was incurred for the nine months ended September 30, 2011 compared to the \$1.5 million net loss for the comparable prior year period. This loss was primarily due to the software transition, a softer than anticipated freight environment, and an increase in unmanned trucks.
- A \$17.2 million decrease in cash provided from accounts receivable resulting from extended payment terms, a larger proportional share of revenue from our SCS segment and delays in billing due to our recent software transition.
- A decrease of approximately \$3.3 million in our tax liability resulting from the loss incurred during the current year.
- A \$2.8 million increase in the gain on disposal of revenue equipment. We continue to experience a stronger used equipment market in the first nine months of 2011 as compared to 2010.
- A \$3.7 million decrease in cash used in inventories and prepaid expenses, primarily due to additional tire purchases affecting our prepaid tire account during the first nine months of 2010 and fees related to the 2010 renewal of our Credit Facility.
- A \$1.8 million decrease in cash used in insurance and claims primarily due to resolutions of older claims during the first nine months of 2010.

For the nine months ended September 30, 2011, net cash used in investing activities was \$22.4 million, compared to \$22.5 million for the same period of 2010. The \$0.1 million decrease in cash used in investing activities resulted from an increase in cash used to purchase property and equipment and an increase in cash proceeds from the sale of equipment. Cash used to purchase property and equipment increased \$8.1 million during the first nine months of 2011 as compared to the same time period of 2010. This increase was primarily due to two factors; the method utilized to finance the acquisition of revenue equipment and the number of tractors we purchased. In regard to the financing of the equipment, we primarily utilized borrowings from our Credit Agreement to fund revenue equipment acquisitions during 2010 and for the same time period of 2011, we utilized more lease based financing. For the nine months ended September 30, 2011, we leased \$21.2 million in revenue equipment acquisitions compared to \$4.9 million during the same time period of 2010. In regard to the volume of purchases, through the first nine months of 2011, we purchased 435 tractors compared to 301 tractors during the same period of 2010. We were able to partially

offset the amount of cash used to purchase property and equipment with the proceeds from the sale of our used equipment. During the first nine months of 2011, we sold \$17.6 million of property and equipment as compared to \$9.3 million during the same period of the prior year resulting in a difference of \$8.3 million in proceeds between the periods.

Cash provided by financing activities increased \$19.7 million during the first nine months of 2011 as compared to the same time period in 2010. During the first nine months of 2011, we borrowed a net amount on our Credit Agreement of \$20.1 million compared to \$2.7 million in net borrowings for the same time period in 2010. The additional net borrowing resulted in a \$17.4 million increase on our Credit Agreement. The additional borrowing primarily related to funding the purchase of revenue equipment. In addition to the additional borrowing, cash provided by financing activities increased due to a \$3.4 million increase in bank drafts outstanding, which was partially offset by a \$0.9 million increase in principal payments on capitalized lease obligations.

Debt

On April 19, 2010, we entered into a new Credit Agreement with BB&T as Administrative Agent, which replaced our Amended and Restated Senior Credit Facility that was to mature on September 1, 2010. The Credit Agreement provides for available borrowings of up to \$100.0 million, including letters of credit not exceeding \$25.0 million. Availability may be reduced by a borrowing base limit as defined in the Credit Agreement. The Credit Agreement provides an accordion feature allowing us to increase the maximum borrowing amount by up to an additional \$75.0 million in the aggregate in one or more increases, subject to certain conditions. The Credit Agreement bears variable interest based on the type of borrowing and on the Administrative Agent's prime rate or the London Interbank Offered Rate plus a certain percentage, which is determined based on our attainment of certain financial ratios. A quarterly commitment fee is payable on the unused portion of the credit line and bears a rate which is determined based on our attainment of certain financial ratios. The obligations of the Company under the Credit Agreement are guaranteed by the Company and secured by a pledge of substantially all of the Company's assets with the exception of real estate. The Credit Agreement includes usual and customary events of default for a facility of this nature and provides that, upon the occurrence and continuation of an event of default, payment of all amounts payable under the Credit Agreement may be accelerated, and the lenders' commitments may be terminated. The Credit Agreement contains certain restrictions and covenants relating to, among other things, dividends, liens, acquisitions and dispositions outside of the ordinary course of business, and affiliate transactions. The new Credit Agreement will expire on April 19, 2014.

Borrowings under the Credit Agreement are classified as "base rate loans," "LIBOR loans" or "Euro dollar loans." Base rate loans accrue interest at a base rate equal to the Administrative Agent's prime rate plus an applicable margin that is adjusted quarterly between 0.0% and 1.0%, based on the Company's leverage ratio. LIBOR loans accrue interest at LIBOR plus an applicable margin that is adjusted quarterly between 2.00% and 3.25% based on the Company's leverage ratio. Euro dollar loans accrue interest at the LIBOR rate in effect at the beginning of the month in which the borrowing occurs plus an applicable margin that is adjusted quarterly between 2.00% and 3.25% based on the Company's leverage ratio. On a per annum basis, the Company must pay a fee on the unused amount of the revolving credit facility of between 0.25% and 0.375% based on the Company's leverage ratio, and it must pay an annual administrative fee to the Administrative Agent of 0.03% of the total commitments.

The interest rate on our overnight borrowings under the Credit Agreement at September 30, 2011 was 3.5%. The interest rate including all borrowings made under the Credit Agreement at September 30, 2011 was 2.8% and for the nine months ended September 30, 2011 was 2.7%. A quarterly commitment fee is payable on the unused portion of the credit line and bears a rate which is determined based on our attainment of certain financial ratios. At September 30, 2011, the rate was 0.25% per annum. The Credit Agreement is collateralized by revenue equipment having a net book value of \$171.3 million at September 30, 2011, and all trade and other accounts receivable.

The Credit Agreement requires us to meet certain financial covenants (i.e., a maximum leverage ratio of 3.00 (currently and through the end of the Credit Agreement), and a minimum fixed charge ratio of 1.4) and to maintain a minimum tangible net worth of approximately \$106.4 million at September 30, 2011. We were in compliance with these covenants at September 30, 2011. The covenants would prohibit the payment of dividends by us if such payment would cause us to be in violation of any of the covenants.

We have entered into leases with lenders who participate in our Credit Agreement and who participated in our Amended and Restated Senior Credit Facility, which was replaced by the Credit Agreement. Those leases contain cross-default provisions with the Credit Agreement and the previous Facility. We have also entered into leases with other lenders who do not participate in our Credit Agreement nor participated in our previous Facility. Multiple leases with lenders who do not participate in our Credit Agreement generally contain cross-default provisions.

We record derivative financial instruments in the balance sheet as either an asset or liability at fair value, with classification as current or long-term depending on the duration of the instrument. Changes in the derivative instrument's fair value must be recognized currently in earnings unless specific hedge accounting criteria are met. For cash flow hedges that meet the criteria, the derivative instrument's gains and losses, to the extent effective, are recognized in accumulated other comprehensive income and reclassified into earnings in the same period during which the hedged transaction affects earnings.

On February 6, 2009, we entered into a \$10.0 million interest rate swap agreement with an effective date of February 19, 2009. The rate on the swap was fixed at 1.57% until February 19, 2011. The interest rate swap agreement was accounted for as a cash flow hedge.

Equity

At September 30, 2011, we had stockholders' equity of \$131.4 million and total debt including current maturities of \$128.1 million, resulting in a total debt, less cash, to total capitalization ratio of 49.0% compared to 40.8% at December 31, 2010.

Purchases and Commitments

As of September 30, 2011, our capital expenditures forecast, net of proceeds from the sale or trade of equipment, was \$(0.9) million for the remainder of 2011, approximately \$(2.4) million of which relates to revenue equipment. To the extent further capital expenditures are feasible based on our debt covenants and operating cash requirements, we would use the balance of \$1.5 million primarily for property acquisitions, facility construction and improvements and maintenance and office equipment. We routinely evaluate our equipment acquisition needs and adjust our purchase and disposition schedules from time to time based on our analysis of factors such as freight demand, driver availability and the condition of the used equipment market. During the nine months ended September 30, 2011, we made \$44.6 million of net capital expenditures, including \$42.5 million for revenue equipment purchases and \$2.1 million for facility expansions and other expenditures.

The following table represents our outstanding contractual obligations at September 30, 2011, excluding letters of credit:

	(in thousands)				
	Total	Payments Due By Period			More than 5 years
Less than 1 year		1-3 years	3-5 years		
Contractual Obligations:					
Long-term debt obligations (1)	\$ 70,000	\$ --	\$ --	\$ 70,000	\$ --
Capital lease obligations (2)	63,725	28,990	23,928	10,807	--
Purchase obligations (3)	7,495	7,495	--	--	--
Rental obligations	4,571	2,144	1,734	385	308
Total	\$ 145,791	\$ 38,629	\$ 25,662	\$ 81,192	\$ 308

(1) Long-term debt obligations, excluding letters of credit in the amount of \$1.8 million, consists of our Credit Agreement, which matures on April 19, 2014. The primary purpose of this agreement is to provide working capital for the Company; however, the agreement is also used, as appropriate, to minimize interest expense on other Company purchases that could be obtained through other more expensive capital purchase financing sources. Because the borrowing amounts fluctuate and the interest rates vary, they are subject to various factors that will cause actual interest payments to fluctuate over time. Based on these factors, we have not included in this line item an estimate of future interest payments.

(2) Includes interest payments not included in the balance sheet.

(3) Purchase obligations include commitments to purchase approximately \$7.0 million of revenue equipment, of which \$4.3 million is cancelable by us upon advance written notice.

Critical Accounting Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. We base our assumptions, estimates and judgments on historical experience, current trends and other factors that management believes to be relevant at the time our consolidated financial statements are prepared. Actual results could differ from those estimates, and such differences could be material.

The most significant accounting policies and estimates that affect our financial statements include the following:

- Revenue recognition and related direct expenses based on relative transit time in each period. Revenue generated by our Trucking operating segment is recognized in full upon completion of delivery of freight to the receiver's location. For freight in transit at the end of a reporting period, we recognize revenue pro rata based on relative transit time completed as a portion of the estimated total transit time. Expenses are recognized as incurred.

Revenue generated by our SCS and Intermodal operating segments is recognized upon completion of the services provided. Revenue is recorded on a gross basis, without deducting third party purchased transportation costs because we have responsibility for billing and collecting such revenue.

Management believes these policies most accurately reflect revenue as earned and direct expenses, including third party purchased transportation costs, as incurred.

- Selections of estimated useful lives and salvage values for purposes of depreciating tractors and trailers. We operate a significant number of tractors and trailers in connection with our business. We may purchase this equipment or acquire it under leases. We depreciate purchased equipment on the straight-line method over the estimated useful life down to an estimated salvage or trade-in value. We initially record equipment acquired under capital leases at the net present value of the minimum lease payments and amortize it on the straight-line method over the lease term. Depreciable lives of tractors and trailers range from three years to ten years. We estimate the salvage value at the expected date of trade-in or sale based on the expected market values of equipment at the time of disposal.

We make equipment purchasing and replacement decisions on the basis of various factors, including, but not limited to, new equipment prices, used equipment market conditions, demand for our freight services, prevailing interest rates, technological improvements, fuel efficiency, equipment durability, equipment specifications and driver availability. Therefore, depending on the circumstances, we may accelerate or delay the acquisition and disposition of our tractors and trailers from time to time, based on an operating principle whereby we pursue trade intervals that economically balance our maintenance costs and expected trade-in values in response to the circumstances existing at that time. Such adjustments in trade intervals may cause us to adjust the useful lives or salvage values of our tractors or trailers. By changing the relative amounts of older equipment and newer equipment in our fleet, adjustments in trade intervals also increase and decrease the average age of our tractors and trailers, whether or not we change the useful lives or salvage values of any tractors or trailers. We also adjust depreciable lives and salvage values based on factors such as changes in prevailing market prices for used equipment. We periodically monitor these factors in order to keep salvage values in line with expected market values at the time of disposal. Adjustments in useful lives and salvage values are made as conditions warrant and when we believe that the changes in conditions are other than temporary. These adjustments result in changes in the depreciation expense we record in the period in which the adjustments occur and in future periods. These adjustments also impact any resulting gain or loss on the ultimate disposition of the revenue equipment. Management believes our estimates of useful lives and salvage values have been materially accurate as demonstrated by the insignificant amounts of gains and losses on revenue equipment dispositions in recent periods. However, management will continually review salvage values to assure that book values do not exceed market values.

To the extent depreciable lives and salvage values are changed, such changes are recorded in accordance with the applicable generally accepted accounting principles existing at the time of change.

Effective May 1, 2011, the Company changed the time period over which it depreciates its 2005 model year and newer trailers and it changed the amount of the salvage value to which those trailers are being depreciated. The depreciation time period was changed to 14 years from 10 years and the salvage value was changed to \$500 from 25.0% of the original purchase price. For the three months ended September 30, 2011, this change in estimate resulted in a reduction of depreciation expense on a pre-tax basis of approximately \$0.6 million and on a net-of-tax basis of approximately \$0.4 million (\$0.04 per share). For the nine months ended September 30, 2011, this change in estimate resulted in a reduction of depreciation expense on a pre-tax basis of approximately \$1.0 million and on a net-of-tax basis of approximately \$0.6 million (\$0.06 per share).

- Estimates of accrued liabilities for claims involving bodily injury, physical damage losses, employee health benefits and workers' compensation. We record both current and long-term claims accruals at the estimated ultimate payment amounts based on information such as individual case estimates, historical claims experience and an estimate of claims incurred but not reported. The current portion of the accrual reflects the amounts of claims expected to be paid in the next twelve months. In making the estimates, we rely on past experience with similar claims, negative or positive developments in the case and similar factors. We do not discount our claims

liabilities. See our Claims Liabilities disclosure elsewhere in this report and in our Annual Report on Form 10-K for additional information.

- Stock option valuation. The assumptions used to value stock options are dividend yield, expected volatility, risk-free interest rate, expected life and anticipated forfeitures. As we have not paid any dividends on our Common Stock, the dividend yield is zero. Expected volatility represents the measure used to project the expected fluctuation in our share price. We use the historical method to calculate volatility with the historical period being equal to the expected life of each option. This calculation is then used to determine the potential for our share price to increase over the expected life of the option. The risk-free interest rate is based on an implied yield on United States zero-coupon treasury bonds with a remaining term equal to the expected life of the outstanding options. Expected life represents the length of time we anticipate the options to be outstanding before being exercised. Based on historical experience, that time period is best represented by the option's contractual life. Anticipated forfeitures represent the number of shares under options we expect to be forfeited over the expected life of the options.

- Accounting for income taxes. Our deferred tax assets and liabilities represent items that will result in taxable income or a tax deduction in future years for which we have already recorded the related tax expense or benefit in our consolidated statements of operations. Deferred tax accounts arise as a result of timing differences between when items are recognized in our consolidated financial statements compared to when they are recognized in our tax returns. Significant management judgment is required in determining our provision for income taxes and in determining whether deferred tax assets will be realized in full or in part. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. We periodically assess the likelihood that all or some portion of deferred tax assets will be recovered from future taxable income. To the extent we believe recovery is not probable, a valuation allowance is established for the amount determined not to be realizable. We have not recorded a valuation allowance at September 30, 2011, as all deferred tax assets are more likely than not to be realized.

We believe that we have adequately provided for our future tax consequences based upon current facts and circumstances and current tax law. During the three months ended September 30, 2011, we made no material changes in our assumptions regarding the determination of income tax liabilities. However, should our tax positions be challenged, different outcomes could result and have a significant impact on the amounts reported through our consolidated statements of operations.

- Prepaid tires. Commencing when the tires, including recaps, are placed into service, we account for them as prepaid expenses and amortize their cost over varying time periods, ranging from 18 to 30 months depending on the type of tire.

New Accounting Pronouncements

See “Note 6 – New Accounting Pronouncements” to the consolidated financial statements included in this Form 10-Q for a description of the most recent accounting pronouncements and their effect, if any.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We experience various market risks, including changes in interest rates, foreign currency exchange rates and commodity prices.

Interest Rate Risk. We are exposed to interest rate risk primarily from our Credit Agreement. The Credit Agreement bears variable interest based on the type of borrowing and on the Administrative Agent’s prime rate or the London Interbank Offered Rate plus a certain percentage which is determined based on our attainment of certain financial ratios. At September 30, 2011, we had \$71.8 million outstanding pursuant to our Credit Agreement including letters of credit of \$1.8 million. Assuming the outstanding balance at September 30, 2011 was to remain constant, a hypothetical one-percentage point increase in interest rates applicable to the Credit Agreement would increase our interest expense over a one-year period by approximately \$0.7 million.

On February 6, 2009, we entered into a \$10.0 million interest rate swap agreement with an effective date of February 19, 2009. The rate on the swap was fixed at 1.57% until its expiration date of February 19, 2011. The interest rate swap agreement was accounted for as a cash flow hedge.

Foreign Currency Exchange Rate Risk. We require customers to pay for our services in U.S. dollars. Although the Canadian government makes certain payments, such as tax refunds, to us in Canadian dollars, any foreign currency exchange risk associated with such payments is not material.

Commodity Price Risk. Fuel prices have fluctuated greatly and have generally increased in recent years. In some periods, our operating performance was adversely affected because we were not able to fully offset the impact of higher diesel fuel prices through increased freight rates and fuel surcharge revenue recoveries. We cannot predict the extent to which high fuel price levels will continue in the future or the extent to which fuel surcharge revenue recoveries could be collected to offset such increases. As of September 30, 2011, we did not have any derivative financial instruments to reduce our exposure to fuel price fluctuations, but may use such instruments in the future. Accordingly, volatile fuel prices will continue to impact us significantly. A significant increase in fuel costs, or a shortage of diesel fuel, could materially and adversely affect our results of operations. Further, these costs could also exacerbate the driver shortages our industry experiences by forcing independent contractors to cease operations. Based on our expected fuel consumption for the remainder of 2011, a one dollar change in the related price of diesel fuel per gallon would change our fuel expense by approximately \$10.1 million, assuming no further change to our fuel surcharge recovery.

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, an evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer (the “CEO”) and Chief Financial Officer (the “CFO”), of the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation, our management, including the CEO and CFO, concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective at the reasonable assurance level. There have been no changes in our internal control over financial reporting during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

We have confidence in our internal controls and procedures. Nevertheless, our management, including our CEO and CFO, does not expect that our disclosure procedures and controls or our internal controls will prevent all errors or intentional fraud. An internal control system, no matter how well-conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of such internal controls are met. Further, the design of an internal control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all internal control systems, no evaluation of controls can provide absolute assurance that all our control issues and instances of fraud, if any, have been detected.

PART II - OTHER INFORMATION

ITEM LEGAL PROCEEDINGS

1.

We are party to routine litigation incidental to our business, primarily involving claims for personal injury and property damage incurred in the transportation of freight. We maintain insurance to cover liabilities in excess of certain self-insured retention levels. Though management believes these claims to be routine and immaterial to our long-term financial position, adverse results of one or more of these claims could have a material adverse effect on our financial position or results of operations in any given reporting period.

On July 2, 2010 a former driver team member, filed a lawsuit against us titled *Hermes Cerdania vs. USA Truck, Inc.* in the Superior Court of the State of California for the County of San Bernardino, alleging various violations of the California Labor Code and seeking certification of the suit as a class action to include “all individuals currently and formerly employed in California as drivers, or other similarly titled positions.” We successfully removed the case to the United States District Court, Central District of California and filed an answer denying the plaintiff’s allegations. The lawsuit sought monetary damages for the alleged violations. In February 2011, we negotiated settlement of the lawsuit through mediation subject to the District Court’s review and approval. Such approval of the \$250,000 settlement was received in October 2011. We had fully accrued the agreed upon settlement amount during the second quarter of 2011.

On July 28, 2008, a former commission sales agent, Mr. William Blankenship (“Blankenship”), filed an action in the United States District Court, Western District of Arkansas entitled *William Blankenship, Jr. v. USA Truck, Inc.*, asking the court to set aside a previously consummated settlement agreement between the parties. The matter was dismissed by the District Court based upon our Motion to Dismiss, but was later reinstated by the 8th Circuit Court of Appeals and set for trial in the United States District Court in Fort Smith, Arkansas. In October 2011, the trial was held in the United States District Court and the jury returned a favorable verdict for the Company on all counts and determined that the Company had no additional liability in this matter.

ITEM 1A. RISK FACTORS

While we attempt to identify, manage, and mitigate risks and uncertainties associated with our business, some level of risk and uncertainty will always be present. Our Form 10-K for the year ended December 31, 2010, in the section entitled Item 1A. Risk Factors, describes some of the risks and uncertainties associated with our business. These risks and uncertainties have the potential to materially affect our business, financial condition, results of operations, cash flows, projected results, and future prospects. In addition to the risk factors set forth in our Form 10-K, we believe that the following additional issues, uncertainties, and risks should be considered in evaluating our business, financial condition, results of operations, cash flows, projected results, and future prospects:

We may not be successful in implementing new management and operating procedures and cost savings initiatives.

We have made changes to our management team and structure, as well as our operating procedures recently. These changes may not be successful or may not achieve the desired results. We may require additional training or different personnel to implement successfully these procedures, all of which may result in additional expense, delays in obtaining results, or disruptions to our operations. Part of these changes include customer service and driver management changes and cost savings initiatives. These changes and initiatives may not improve our results of operations, including miles per tractor, system velocity, seated truck count, and base revenue per mile. In addition, we may not be successful in achieving the expected savings in our cost structure. In such event, our revenue, financial results, and ability to operate profitably could be negatively impacted.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) Recent unregistered sales of securities.

None.

(b) Use of proceeds from registered sales of securities.

None.

(c) Purchases of equity securities by the issuer and affiliated purchasers.

On October 21, 2009, the Board of Directors of the Company approved the repurchase of up to 2,000,000 shares of the Company's Common Stock expiring on October 21, 2012. Subject to applicable timing and other legal requirements, these repurchases may be made on the open market or in privately negotiated transactions on terms approved by the Company's Chairman of the Board or President. Repurchased shares may be retired or held in treasury for future use for appropriate corporate purposes including issuance in connection with awards under the Company's employee benefit plans. During the nine months ended September 30, 2011, we did not repurchase any shares of our Common Stock. Our current repurchase authorization has 2,000,000 shares remaining.

The following table sets forth information regarding shares of Common Stock purchased or that may yet be purchased by us under the current authorization during the third quarter of 2011.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
July 1 – July 31	--	\$ --	--	2,000,000
August 1 – August 31	--	--	--	2,000,000
September 1 – September 30	--	--	--	2,000,000
Total	--	\$ --	--	2,000,000

We may reissue repurchased shares under our equity compensation plans or as otherwise directed by the Board of Directors.

We are required to include in the table above purchases made by us or by an affiliated purchaser. For this purpose, “affiliated purchaser” does not include our Employee Stock Purchase Plan, which provides that shares purchased for team members under that Plan may be shares provided by us or shares purchased on the open market. Open market purchases under that Plan are made by the administrator of the Plan, which is an agent independent of us. Any shares purchased by the administrator are not counted against the number of shares available for purchase by us pursuant to the repurchase authorization described above.

ITEM DEFAULTS UPON SENIOR SECURITIES

3.

None.

ITEM (REMOVED AND RESERVED)

4.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

(a) Exhibits

3.1		Restated and Amended Certificate of Incorporation of the Company (incorporated by reference to Exhibit 3.1 to the Company’s Registration Statement on Form S-1, Registration No. 33-45682, filed with the Securities and Exchange Commission on February 13, 1992 [the “Form S-1”]).
