Grupo Simec Announces Preliminary (Unaudited) Results of Operations for the Year Ended December 31, 2007

GUADALAJARA, Mexico, Feb. 27 /PRNewswire-FirstCall/ Grupo Simec, S.A.B. de C.V. (AMEX: SIM) (Simec) announced today its preliminary (unaudited) results of operations for the year ended December 31, 2007.

Acquisition of Corporacion Aceros DM, S.A. de C.V.

On February 21, 2008, Simec executed an agreement to acquire 100% of the shares of Corporacion Aceros DM, S.A. de C.V. and certain of its affiliates (Grupo San).

Grupo San is a long products steel mini-mill and the second-largest corrugated rebar producer in Mexico. Grupo San s operations are based in San Luis Potosi, Mexico. Its plants and its 1,457 employees rely on cutting edge technology to produce 700 thousand tons of finished products annually.

With this acquisition, Simec and Industrias CH, S.A. de C.V. (ICH) position themselves as the second largest producers of rebar and the largest steel producers in Mexico, with a production capacity of approximately 4.5 million tons of liquid steel and 3.8 million tons of finished products.

With this strategic acquisition, Simec and ICH will achieve a more diversified product mix and sales mix, with 50% of sales in Mexico and 50% outside Mexico, both of which will allow them to better address the natural cycles of the steel industry at the domestic and global levels. Additionally, Simec and ICH have already identified significant synergies and economies of scale that will increase Simec s operating margins. Grupo San s central location in Mexico, where Simec and ICH are not currently present, also represents a strong competitive advantage since it provides several strategic benefits mainly related to distribution given its proximity to Mexico s main cities, sea ports, and borders.

In addition, Grupo San has aggressive expansion plans in its corrugated rebar business, which ICH and Simec will support and promote to satisfy the growing demand for this product resulting from the Mexican Government s aggressive infrastructure plan.

Simec, the main subsidiary of ICH, will acquire 100% of the shares of Grupo San. The transaction is valued at 850 million U.S. dollars, 85% of which will be paid with cash generated by the company s operations and by the company s stock public offering, which took place in February 2007.

This acquisition confirms the growth strategy that has characterized ICH, reaffirming its position as a consolidator in the steel sector.

This acquisition is subject to the approval of Mexico s federal competition commission, Comision Federal de Competencia, as well as Simec s shareholders meeting.

Grupo San s shareholders were advised by Lehman Brothers, Inc. and by the law office of Galicia y Robles, S.C. Simec was represented by the law office of Mijares, Angoitia, Cortes y Fuentes, S.C.

Year Ended December 31, 2007 compared to Year Ended December 31, 2006

Net Sales

Net sales increased 3% to Ps. 24,106 million in 2007 compared to Ps. 23,515 million in 2006. Shipments of finished steel products increased 0.5% to 2,693 thousand tons in 2007 compared to 2,673 thousand tons in 2006. Total sales outside of Mexico in 2007 increased 7% to Ps. 17,031 million compared with Ps. 15,939 million in 2006, while total Mexican sales decreased 7% from 7,576 million in 2006 to Ps. 7,075 million in 2007. The increase in sales can be explained by higher shipments during 2007, compared with 2006 (14,000 tons increase). The increase in tons shipped originated mainly in the plant of Apizaco and compensated for the two unexpected stoppages in the rolling lines of the plants in Guadalajara and Apizaco due during the periods July 5-8, July 10-13, and September 10-15, as a result of the shortage of natural gas due to the explosions on the property of Petroleos Mexicanos.

Direct Cost of Sales

Direct cost of sales increased 7% from Ps. 19,132 million in 2006 to Ps. 20,398 million in 2007. Direct cost of sales as a percentage of net sales represented 85% in 2007 compared to 81% in 2006. The increase in the Direct Cost of Sales is attributable mainly to an increase of 6% in real terms in the average cost of raw materials used to produce steel products in 2007 versus 2006, primarily as a result of increases in the price of scrap and certain other raw materials and an increase in the labor costs per ton sold, due to the three unexpected stoppages in the rolling lines of the plants in Guadalajara and Apizaco due during the periods July 5-8, July 10-13, and September 10-15, as a result from the shortage in natural gas due to the explosions on the property of Petroleos Mexicanos.

Acquisition of Corporacion Aceros DM, S.A. de C.V.

On February 21, 2008, Simec executed an agreement to acquire 100% of the shares of Corporacion Aceros DM, S.A. de C.V. and certain of its affiliates (Grupo San).

Grupo San is a long products steel mini-mill and the second-largest corrugated rebar producer in Mexico. Grupo San s operations are based in San Luis Potosi, Mexico. Its plants and its 1,457 employees rely on cutting edge technology to produce 700 thousand tons of finished products

annually.

With this acquisition, Simec and Industrias CH, S.A. de C.V. (ICH) position themselves as the second largest producers of rebar and the largest steel producers in Mexico, with a production capacity of approximately 4.5 million tons of liquid steel and 3.8 million tons of finished products.

With this strategic acquisition, Simec and ICH will achieve a more diversified product mix and sales mix, with 50% of sales in Mexico and 50% outside Mexico, both of which will allow them to better address the natural cycles of the steel industry at the domestic and global levels. Additionally, Simec and ICH have already identified significant synergies and economies of scale that will increase Simec's operating margins. Grupo San's central location in Mexico, where Simec and ICH are not currently present, also represents a strong competitive advantage since it provides several strategic benefits mainly related to distribution given its proximity to Mexico's main cities, sea ports, and borders.

In addition, Grupo San has aggressive expansion plans in its corrugated rebar business, which ICH and Simec will support and promote to satisfy the growing demand for this product resulting from the Mexican Government's aggressive infrastructure plan.

Simec, the main subsidiary of ICH, will acquire 100% of the shares of Grupo San. The transaction is valued at 850 million U.S. dollars, 85% of which will be paid with cash generated by the company's operations and by the company's stock public offering, which took place in February 2007.

This acquisition confirms the growth strategy that has characterized ICH, reaffirming its position as a consolidator in the steel sector.

This acquisition is subject to the approval of Mexico's federal competition commission, Comision Federal de Competencia, as well as Simec's shareholders' meeting.

Grupo San's shareholders were advised by Lehman Brothers, Inc. and by the law office of Galicia y Robles, S.C. Simec was represented by the law office of Mijares, Angoitia, Cortes y Fuentes, S.C.

Year Ended December 31, 2007 compared to Year Ended December 31, 2006

Net Sales

Net sales increased 3% to Ps. 24,106 million in 2007 compared to Ps. 23,515 million in 2006. Shipments of finished steel products increased 0.5% to 2,693 thousand tons in 2007 compared to 2,673 thousand tons in 2006. Total sales outside of Mexico in 2007 increased 7% to Ps. 17,031 million compared with Ps. 15,939 million in 2006, while total Mexican sales decreased 7% from 7,576 million in 2006 to Ps. 7,075 million in 2007. The increase in sales can be explained by higher shipments during 2007, compared with 2006 (14,000 tons increase). The

increase in tons shipped originated mainly in the plant of Apizaco and compensated for the two unexpected stoppages in the rolling lines of the plants in Guadalajara and Apizaco due during the periods July 5-8, July 10-13, and September 10-15, as a result of the shortage of natural gas due to the explosions on the property of Petroleos Mexicanos.

Direct Cost of Sales

Direct cost of sales increased 7% from Ps. 19,132 million in 2006 to Ps. 20,398 million in 2007. Direct cost of sales as a percentage of net sales represented 85% in 2007 compared to 81% in 2006. The increase in the Direct Cost of Sales is attributable mainly to an increase of 6% in real terms in the average cost of raw materials used to produce steel products in 2007 versus 2006, primarily as a result of increases in the price of scrap and certain other raw materials and an increase in the labor costs per ton sold, due to the three unexpected stoppages in the rolling lines of the plants in Guadalajara and Apizaco due during the periods July 5-8, July 10-13, and September 10-15, as a result from the shortage in natural gas due to the explosions on the property of Petroleos Mexicanos.

Grupo Simec, S.A. de C.V. and its Subsidiaries (the Company) are subsidiaries of Industrias CH, S.A. de C.V. (ICH), and their main activities consist of the manufacturing and sale of steel products primarily destined for the construction sector of Mexico and other countries.

Edgar Filing: GROUP SIMEC SA DE CV - Form 6-K

Significant accounting policies and practices followed by the Companies which affect the principal captions of the financial statements are described below:

a. Financial statement presentation - The consolidated financial statements have been prepared in accordance with principles generally accepted in Mexico, which include the recognition of the effects of inflation on the financial information and the presentation in constant Mexican pesos.

b. Principles of Consolidation As part of the financial debt restructuring agreement into during 1997, Compañía Siderúrgica de Guadalajara, S.A. de C.V. (CSG) assumed all of the debt of the Company in return for an equity interest in its subsidiaries. As a result of the above, the Company is the principal shareholder of CSG, and CSG is the principal shareholder of the other subsidiaries that Grupo Simec, S.A. de C.V. (Simec) controlled before the restructuring.

The main subsidiaries of CSG are the following:

Compañía Siderúrgica de California, S.A. de C.V.

Industrias del Acero y del Alambre, S.A. de C.V.

Pacific Steel Inc.

SimRep Corporation and PAV Republic and Subsidiaries

All significant intercompany balances and transactions have been eliminated in consolidation.

c. Cash and cash equivalents - The Company considers short-term investments with original maturities not greater than three months to be cash equivalent. Cash equivalents include temporary investments and Mexican Government Treasury Bonds, and are stated at market value, which approximates cost plus earned interest. Any increase in market value is credited to operations for the period.

d. Inventories - The inventories are originally stated at average cost and subsequently adjusted to replacement value at the balance sheet date. The replacement values do not exceed market and are determined as follows:

Billet finished goods and work in process - At the latest production cost for the month.

Raw materials - According to purchase prices prevailing in the market at the balance sheet date.

Materials, supplies and rollers At historical cost, restated by applying the steel industry inflation index.

The Company presents as non-current inventories the rollers and spare parts, which according to historical data and production trends will not be used within a one-year period.

e. Derivative financial instruments - The Company is using derivative financial instruments for hedging risks associated with natural gas prices and conducted studies on historical consumption, future requirements and commitments; thus it avoided exposure to risks other than the normal operating risks. Management of the Company examines its financial risks by continually analyzing price, credit and liquidity risks.

The Company uses futures contracts for hedging risks from fluctuations in natural gas prices, which are based on demand and supply at the principal international markets.

As applicable, the Company recognized the fair value of instruments either as liabilities or assets. Such fair value and thus, the value of these assets or liabilities were restated at each month s-end. The Company opted for the early adoption of Bulletin C-10 Derivative Financial Instruments and Hedging ; therefore, at December 31, 2003 the fair value of natural gas in force during 2004, 2005 and 2006 and which effective portions will not be offset against the asset risks until consumed, were recognized within the comprehensive income account in stockholders equity.

Edgar Filing: GROUP SIMEC SA DE CV - Form 6-K

f. Property, plant and equipment - Property, plant and equipment of domestic origin are restated by using factors derived from The National Consumer Price Index (NCPI) from the date of their acquisition, and imported machinery and equipment are restated by applying devaluation and inflation factors of the country of origin. Depreciation recorded in the consolidated statement of income (loss) is computed based upon the estimated useful life and the restated cost of each asset. In addition, Financial expense incurred during the construction period is capitalized as construction in progress. The capitalized amounts are restated using a factor derived from the NCPI cumulative from the date of capitalization through period-end and are amortized over the average depreciation period of the corresponding assets. The estimated useful lives of assets as of December 31, 2007 are as follows:

	Years
Buildings	15 to 50
Machinery and equipment	10 to 40
Buildings and improvements (Republic)	10 to 25
Land improvements (Republic)	5 to 25
Machinery and equipment (Republic)	5 to 20

g. Other assets - Organization and pre-operating expenses are capitalized and restated using a factor derived from the NCPI cumulative from the date of generation through period-end, and their amortization is calculated by the straight-line method over a period of 20 years.

h. Seniority premiums and severance payments According to Federal Labor Law, employees are entitled to seniority premiums after fifteen years or more of services. These premiums are recognized as expenses in the years in which the services are rendered, using actuarial calculations based on the projected unit credit method, and since 1996 by applying real interest and salary increases.

Any other payments to which employees may be entitled in case of separation, disability or death, are charged to operations in the period in which they become payable.

i. Pension plan - Until 1995, the Company provided pension benefits for all personnel with a minimum of 10 years of service and 35 years of age. The Company had established an irrevocable trust for its contributions, which were based on actuarial calculations. In December 1995, the board of directors of the Company, in agreement with the trade union, discontinued these benefits and related contributions to the trust fund. This decision was made because of the new Mexican pension fund system, Administradoras de Fondos para el Retiro, which establishes similar benefits for the employees. The balance of the trust fund will be applied to the retirement benefits of qualifying employees until the fund is exhausted due to the irrevocable status of the fund.

The Company does not have any contractual obligation regarding the payment of pensions of retirements.

j. Cost of sales - Cost of sales related to sales of inventory items is recorded at standard cost, which approximates the replacement cost at the date of sale.

k. Income tax and employee profit sharing - In 1999, the Mexican Institute of Public Accountants issued Bulletin D-4, Accounting for Income and Asset Taxes and Employee Profit Sharing , which is effective for all fiscal years beginning January 1, 2000. Bulletin D-4 establishes financial accounting and reporting standards for the effects of asset tax, income tax and employee profit sharing that result from enterprise activities during the current and preceding years.

The Company and its subsidiaries are included in the consolidated tax returns of the company s parent.

- The related effect of translation is recorded in stockholders' equity under the caption Equity adjustments for non monetary assets.
- The resulting amounts were restated applying adjustment factors derived from the NCPI, in conformity with Mexican accounting Bulletin B-10.

The resulting amounts were restated applying adjustment factors derived from the Mexican NCPI, in conformity with Mexican accounting Bulletin B-10.

m. Geographic concentration of credit risk - The Company sells its products primarily to distributors for the construction industry with no specific geographic concentration. Additionally, no single customer accounted for a significant amount of the Company's sales, and there were no significant accounts receivable from a single customer or affiliate at December 31, 2007 and at December 31, 2006, direct sales to two customers accounted for approximately 10% and 16.6% of the Republic's sales. The Company performs evaluations of its customers' credit histories and establishes allowance for doubtful accounts based upon the credit risk of specific customers and historical trends.

n. Other income (expenses) - Other income (expenses) shown in the consolidated statements of operations primarily includes other financial operations.

o. Gain on monetary position - The gain on monetary position in the consolidated statements of income (loss) is determined by applying to net monetary assets or liabilities at the beginning of each month the factor of inflation derived from the NCPI and is restated at period-end with the corresponding factor.

p. Restatement of capital stock and retained earnings (losses) This is determined by multiplying capital stock contributions and retained earnings (losses) by factors derived from the NCPI, which measure the cumulative inflation from the date when capital stock contributions were made and earnings (losses) were generated, through the latest period-end.

q. Effect of restatement of stockholders' equity The effect resulting from restating stockholders' equity includes the accumulated effect from holding non-monetary assets, which represents the change in the specific price level of those assets compared to the change in the NCPI.
