2 ANNUAL REPORT AUGUST 31, 2013	

Dear Shareholder

Though we ve seen spates of volatility over the past year, riskier asset classes generally outperformed lower-risk investments. Financial markets rallied last fall after the European Central Bank and the US Federal Reserve announced aggressive monetary stimulus programs, substantially increasing global liquidity. But markets weakened later in the year amid slowing global trade as many European countries fell into recession and growth continued to decelerate in China. In the United States, investors became increasingly concerned about the fiscal cliff of tax increases and spending cuts that had been scheduled to take effect at the beginning of 2013. High levels of global market volatility persisted through year-end due to fears that bipartisan gridlock would preclude a timely resolution, putting the US economy at risk for recession.

The worst of the fiscal cliff was averted with a last-minute tax deal, allowing markets to get off to a good start in 2013. Money that had been pulled to the sidelines amid year-end tax-rate uncertainty poured back into the markets in January. Key indicators signaling modest but broad-based improvements in the world s major economies coupled with the absence of negative headlines from Europe created an aura of comfort for investors. Global equities surged, while rising US Treasury yields pressured high quality fixed income assets. (Bond prices move in the opposite direction of yields.)

February brought a slowdown in global economic momentum and the pace of the rally moderated. In the months that followed, US equities outperformed international markets, as the US economic recovery showed greater stability compared to most other regions. Slow, but positive, growth in the United States was sufficient to support corporate earnings, while uncomfortably high unemployment reinforced investors—expectations that the US Federal Reserve would keep interest rates low. International markets experienced higher levels of volatility given a resurgence of political instability in Italy and a severe banking crisis in Cyprus, while a poor outlook for European economies also dampened sentiment for overseas investment. Emerging markets significantly lagged the rest of the world as growth in these economies (particularly China and Brazil) fell short of expectations.

After peaking in late May, equity markets broadly sold off due to concerns about the US Federal Reserve reducing monetary stimulus. Volatility picked up considerably as investors abruptly retreated from risk assets and a sharp and dramatic rise in US Treasury yields resulted in tumbling prices for higher-quality fixed income investments. The downswing bottomed out in late June as a more dovish tone from the US central bank served to quell the extreme level of volatility in interest rates. Improving economic data and a positive outlook for corporate earnings helped financial markets regain strength in July, with major US equity indices hitting new record highs. However, markets slumped again in August as investors became more wary amid a number of unknowns. Mixed economic data spurred heightened uncertainty about the future of global growth and investors grew anxious about the timing and extent to which the US Federal Reserve would scale back on its asset-purchase program. Meanwhile, escalating political turmoil in Egypt and Syria renewed concerns about the impact of the broader issue of growing unrest in many countries across the Middle East-North Africa region.

On the whole, developed market equities generated strong returns for the 6- and 12-month periods ended August 31, 2013. Emerging markets, in contrast, suffered the impact of slowing growth and concerns about a shrinking global money supply. Extraordinary levels of interest rate volatility in the latter part of the period resulted in poor performance for most fixed income assets, especially US Treasury bonds and other higher quality sectors such as tax-exempt municipals and investment grade corporate bonds. Conversely, high yield bonds posted gains as the sector continued to benefit from investors ongoing search for income in the low-rate environment. Short-term interest rates remained near zero, keeping yields on money market securities near historical lows.

Markets remain volatile, and investors continue to face a number of uncertainties in the current environment. At BlackRock, we believe investors need to think globally and extend their scope across a broader array of asset classes and be prepared to move freely as market conditions change over time. We encourage you to talk with your financial advisor and visit **www.blackrock.com** for further insight about investing in today s world.

Sincerely,

Rob Kapito

President, BlackRock Advisors, LLC

Trust Summary as of August 31, 2013 **Trust Overview**

BlackRock Core Bond Trust

BlackRock Core Bond Trust s (BHK) (the Trust) investment objective is to provide current income and capital appreciation. The Trust seeks to achieve its investment objective by investing at least 75% of its assets in bonds that are investment grade quality at the time of investment. The Trust s investments will include a broad range of bonds, including corporate bonds, US government and agency securities and mortgage-related securities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the 12-month period ended August 31, 2013, the Trust returned (13.43)% based on market price and (1.42)% based on net asset value (NAV). For the same period, the closed-end Lipper Corporate BBB-Rated Debt Funds (Leveraged) category posted an average return of (6.88)% based on market price and 3.69% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Fixed income markets experienced two trends over the 12-month period. In the first half of the period, riskier assets rallied as investors sought higher-yielding investments amid historically low yields. Prices moved higher and spreads tightened across most fixed income sectors. However, a new trend took hold in May when US Federal Reserve Chairman Bernanke alluded to a potential tapering of the central bank s bond-buying stimulus program toward the end of 2013, triggering a sharp decline in fixed income markets. Spreads widened rapidly across fixed income sectors as yields rose and volatility increased.

The Trust s long duration bias (greater sensitivity to interest rate movements) and yield curve positioning detracted from performance as interest rates began to rise in the latter part of the period. (Bond prices fall as rates rise.) The Trust s holdings of US Treasury securities particularly suffered in the rising rate environment. Exposure to 30-year agency pass-through mortgage-backed securities (MBS) and US agency debentures hurt results as both sectors were impacted by uncertainty around the US Federal Reserve s stance on monetary policy.

The Trust sholdings in the euro and British pound sterling positions had a positive impact on returns, as did exposure to commercial mortgage-backed securities (CMBS), non-agency residential MBS and agency collateralized mortgage obligations (CMOs). Also contributing positively were the Trust sholdings in asset-backed securities (ABS) and agency interest-only issues.

The Trust uses interest rate derivatives including futures, options, swaps and swaptions, mainly for the purpose of managing duration, convexity and yield curve positioning. During the period, the Trust held short positions on US Treasuries in order to manage the duration profile of the portfolio. These positions were beneficial to the Trust s performance during certain periods of rising interest rates. For the period as a whole, the Trust s derivatives holdings had a negative impact on returns.

Describe recent portfolio activity.

During the 12-month period, the Trust only made slight changes to its overall asset allocation. The Trust slightly increased exposure to high yield credit, particularly in financials and industrials, and reduced exposure to agency MBS, mostly within 30-year pass-through issues.

Describe portfolio positioning at period end.

At period end, the Trust maintained diversified exposure to non-government sectors including investment grade

credit, high yield credit, CMBS, ABS and non-agency MBS. The Trust also held exposure to government-related sectors including US Treasury securities, agency debt and agency MBS.

Trust Summary as of August 31, 2013 **Trust Overview**

BlackRock Corporate High Yield Fund V, Inc.

BlackRock Corporate High Yield Fund V, Inc. s (HYV) (the Trust) investment objective is to provide shareholders with current income by investing primarily in a diversified portfolio of fixed income securities that are rated in the lower rating categories of the established rating services (BB or lower by S&P or Ba or lower by Moody s) or in unrated securities considered by the Trust s investment adviser to be of comparable quality. The Trust also seeks to provide shareholders with capital appreciation. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in domestic and foreign high yield debt instruments, including high yield bonds (commonly referred to as junk bonds) and high yield corporate loans which are below investment grade quality. The Trust may invest directly in such securities or synthetically through the use of derivatives.

On June 5, 2013, the Board of the Trust approved the reorganization of the Trust with BlackRock Corporate High Yield Fund VI, Inc., with BlackRock Corporate High Yield Fund VI, Inc. continuing as the surviving fund after the reorganization. On October 11, 2013, the shareholders of the Trust and BlackRock Corporate High Yield Fund VI, Inc. approved the reorganization, which is expected to be completed in late 2013.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the 12-month period ended August 31, 2013, the Trust returned (4.96)% based on market price and 12.51% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of (2.68)% based on market price and 10.20% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

The Trust benefited from a tactical allocation to equities, which rallied during the period. In fixed income, security selection within the automotive, gaming and non-captive diversified (consumer credit-related businesses) industries boosted results.

Detracting from performance was the Trust s exposure to names in the metals, media non cable and wireless industries. An allocation to senior secured floating rate loan interests (bank loans) generated positive results on an absolute basis, however, the allocation represented an opportunity cost to the Trust as the sector underperformed high yield during the period.

Describe recent portfolio activity.

The Trust actively managed risk throughout the period. The Trust began the period with a riskier stance, but gradually reduced risk in the middle of the period by taking advantage of market strength to sell its higher-beta holdings (securities with greater sensitivity to market movements). The Trust scaled back its risk exposure more aggressively when financial markets began to correct in mid-May.

The Trust s focus on income-oriented credits with strong asset bases and good earnings visibility remained paramount to the investment selection process. While continuing to find value within credit sectors, during the period, the Trust tactically added to select positions in equity and equity-like assets with compelling total return opportunities. Given upward pressure on interest rates in the latter part of the period, the Trust reduced duration (sensitivity to interest rate movements) in its credit allocation. The Trust added to positions in floating rate loan interests as a means of lowering the Trust s duration profile and hedging against the risk of further interest rate volatility. Over the 12-month period, the Trust increased exposure to the technology and building materials industries, while decreasing risk within independent energy.

Describe portfolio positioning at period end.

At period end, the Trust held 76% of its total portfolio in corporate bonds, 14% in floating rate loan interests and 7% in common stocks, with the remainder invested in preferred stocks and ABS. The Trust s highest-conviction holdings included HD Supply, Inc. (building materials), Caesars Entertainment Corp. (gaming) and Dana Holding Corp. (automotive). The Trust held limited exposure to segments with minimal cash flow visibility and/or challenged industry dynamics.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of August 31, 2013 **Trust Overview**

BlackRock Corporate High Yield Fund VI, Inc.

BlackRock Corporate High Yield Fund VI, Inc. s (HYT) (the Trust) primary investment objective is to provide shareholders with current income. The Trust secondary investment objective is to provide shareholders with capital appreciation. The Trust seeks to achieve its objectives by investing, under normal market conditions, at least 80% of its assets in domestic and foreign high yield securities, including high yield bonds (commonly referred to as junk bonds), corporate loans, convertible debt securities and preferred securities which are below investment grade quality. The Trust may invest directly in such securities or synthetically through the use of derivatives.

On June 5, 2013, the Board of the Trust approved the reorganization of the Trust with each of BlackRock High Yield Trust, BlackRock Corporate High Yield Fund, Inc., BlackRock Corporate High Yield Fund III, Inc., BlackRock High Income Shares and BlackRock Corporate High Yield Fund V, Inc. (each a Target Fund), with the Trust continuing as the surviving fund after the reorganizations. On October 11, 2013, the shareholders of the Trust and each Target Fund approved their respective reorganization, which is expected to be completed in late 2013.

No assurance can be given that the Trust s investment objectives will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the 12-month period ended August 31, 2013, the Trust returned (4.16)% based on market price and 11.90% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of (2.68)% based on market price and 10.20% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

The Trust benefited from a tactical allocation to equities, which rallied during the period. In fixed income, security selection within the automotive, gaming and non-captive diversified (consumer credit-related businesses) industries boosted results.

Detracting from performance was the Trust s exposure to names in the metals, media non cable and wireless industries. An allocation to senior secured floating rate loan interests (bank loans) generated positive results on an absolute basis, however, the allocation represented an opportunity cost to the Trust as the sector underperformed high yield during the period.

Describe recent portfolio activity.

The Trust actively managed risk throughout the period. Trust Summary as of August 31, 2013 **Trust Overview**

BlackRock High Income Shares

BlackRock High Income Shares (HIS) (the Trust) primary investment objective is to provide the highest current income attainable consistent with reasonable risk as determined by the Trust s investment adviser, through investment in a professionally managed, diversified portfolio of high yield, high risk fixed income securities (commonly referred to as junk bonds). The Trust s secondary objective is to provide capital appreciation, but only when consistent with its primary objective. The Trust seeks to achieve its objectives by investing primarily in high yield, high risk debt instruments rated in the medium to lower categories by nationally recognized rating services (BBB or lower by S&P or Baa or lower by Moody s) or non-rated securities, which, in the investment adviser s opinion, are of comparable quality. Under normal market conditions, the average maturity of the Trust s portfolio is between eight and twelve years. The Trust may invest directly in such securities or synthetically through the use of derivatives.

On June 5, 2013, the Board of the Trust approved the reorganization of the Trust with BlackRock Corporate High Yield Fund VI, Inc., with BlackRock Corporate High Yield Fund VI, Inc. continuing as the surviving fund after the reorganization. On October 11, 2013, the shareholders of the Trust and BlackRock Corporate High Yield Fund VI, Inc. approved the reorganization, which is expected to be completed in late 2013.

No assurance can be given that the Trust s investment objectives will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the 12-month period ended August 31, 2013, the Trust returned (9.23)% based on market price and 8.45% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of (2.68)% based on market price and 10.20% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

The Trust benefited from a tactical allocation to equities, which rallied during the period. In fixed income, security selection within the automotive, building materials and technology industries boosted results.

Detracting from performance was the Trust s exposure to names in the metals, media non cable and wireless industries. An allocation to senior secured floating rate loan interests (bank loans) generated positive results on an absolute basis, however, the allocation represented an opportunity cost to the Trust as the sector underperformed high vield during the period.

Describe recent portfolio activity.

The Trust actively managed risk throughout the period. The Trust began the period with a riskier stance, but gradually reduced risk in the middle of the period by taking advantage of market strength to sell its higher-beta holdings (securities with greater sensitivity to market movements). The Trust scaled back its risk exposure more aggressively when financial markets began to correct in mid-May.

The Trust s focus on income-oriented credits with strong asset bases and good earnings visibility remained paramount to the investment selection process. While continuing to find value within credit sectors, during the period, the Trust tactically added to select positions in equity and equity-like assets with compelling total return opportunities. Given upward pressure on interest rates in the latter part of the period, the Trust reduced duration (sensitivity to interest rate movements) in its credit allocation. The Trust added to positions in floating rate loan interests as a means of lowering the Trust s duration profile and hedging against the risk of further interest rate volatility. Over the 12-month period, the Trust increased exposure to the technology and building materials industries, while decreasing risk within independent energy.

Describe portfolio positioning at period end.

At period end, the Trust held 81% of its total portfolio in corporate bonds and 16% in floating rate loan interests, with the remainder invested in preferred securities and common stocks. The Trust s highest-conviction holdings included HD Supply, Inc. (building materials), GMAC Capital Trust I (non-captive diversified) and Biomet, Inc. (healthcare). The Trust held limited exposure to segments with minimal cash flow visibility and/or challenged industry dynamics.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of August 31, 2013 **Trust Overview**

BlackRock High Yield Trust

BlackRock High Yield Trust s (**BHY**) (the **Trust**) primary investment objective is to provide high current income. The Trust s secondary investment objective is to provide capital appreciation. The Trust seeks to achieve its objectives by investing, under normal market conditions, at least 80% of its assets in high-risk, high yield bonds and other such securities, such as preferred stocks, which are rated below investment grade. The Trust may invest directly in such securities or synthetically through the use of derivatives.

On June 5, 2013, the Board of the Trust approved the reorganization of the Trust with BlackRock Corporate High Yield Fund VI, Inc., with BlackRock Corporate High Yield Fund VI, Inc. continuing as the surviving fund after the reorganization. On October 11, 2013, the shareholders of the Trust and BlackRock Corporate High Yield Fund VI, Inc. approved the reorganization, which is expected to be completed in late 2013.

No assurance can be given that the Trust s investment objectives will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the 12-month period ended August 31, 2013, the Trust returned (9.60)% based on market price and 9.72% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of (2.68)% based on market price and 10.20% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

The Trust benefited from a tactical allocation to equities, which rallied during the period. In fixed income, security selection within the automotive, building materials and non-captive diversified (consumer credit-related businesses) industries boosted results.

Detracting from performance was the Trust s exposure to names in the paper, media non cable and wireless industries. An allocation to senior secured floating rate loan interests (bank loans) generated positive results on an absolute basis, however, the allocation represented an opportunity cost to the Trust as the sector underperformed high yield during the period.

Describe recent portfolio activity.

The Trust actively managed risk throughout the period. The Trust began the period with a riskier stance, but gradually reduced risk in the middle of the period by taking advantage of market strength to sell its higher-beta holdings (securities with greater sensitivity to market movements). The Trust scaled back its risk exposure more aggressively when financial markets began to correct in mid-May.

The Trust s focus on income-oriented credits with strong asset bases and good earnings visibility remained paramount to the investment selection process. While continuing to find value within credit sectors, during the period, the Trust tactically added to select positions in equity and equity-like assets with compelling total return opportunities. Given upward pressure on interest rates in the latter part of the period, the Trust reduced duration (sensitivity to interest rate movements) in its credit allocation. The Trust added to positions in floating rate loan interests as a means of lowering the Trust s duration profile and hedging against the risk of further interest rate volatility. Over the 12-month period, the Trust increased exposure to the technology and building materials industries, while decreasing risk within independent energy.

Describe portfolio positioning at period end.

At period end, the Trust held 79% of its total portfolio in corporate bonds, 13% in floating rate loan interests and 6% in common stocks, with the remainder invested in preferred securities. The Trust s highest-conviction holdings

included HD Supply, Inc. (building materials), Caesars Entertainment Corp. (gaming) and Level 3 Financing, Inc. (wirelines). The Trust held limited exposure to segments with minimal cash flow visibility and/or challenged industry dynamics.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of August 31, 2013 **Trust Overview**

BlackRock Income Opportunity Trust, Inc.

BlackRock Income Opportunity Trust, Inc. s (BNA) (the Trust) investment objective is to provide current income and capital appreciation. The Trust seeks to achieve its investment objective by investing at least 75% of its assets in bonds that are investment grade quality at the time of investment. The Trust s investments will include a broad range of bonds, including corporate bonds, US government and agency securities and mortgage-related securities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the 12-month period ended August 31, 2013, the Trust returned (11.39)% based on market price and (1.47)% based on NAV. For the same period, the closed-end Lipper Corporate BBB-Rated Debt Funds (Leveraged) category posted an average return of (6.88)% based on market price and 3.69% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Fixed income markets experienced two trends over the 12-month period. In the first half of the period, riskier assets rallied as investors sought higher-yielding investments amid historically low yields. Prices moved higher and spreads tightened across most fixed income sectors. However, a new trend took hold in May when US Federal Reserve Chairman Bernanke alluded to a potential tapering of the central bank s bond-buying stimulus program toward the end of 2013, triggering a sharp decline in fixed income markets. Spreads widened rapidly across fixed income sectors as yields rose and volatility increased.

The Trust s long duration bias (greater sensitivity to interest rate movements) and yield curve positioning detracted from performance as interest rates began to rise in the latter part of the period. (Bond prices fall as rates rise.) The Trust s holdings of US Treasury securities particularly suffered in the rising rate environment. Exposure to 30-year agency pass-through MBS and US agency debentures hurt results as both sectors were impacted by uncertainty around the US Federal Reserve s stance on monetary policy. Additionally, positions in corporate and municipal bonds had a slight negative impact on returns.

The Trust sholdings denominated in the euro and British pound sterling had a positive impact on returns, as did exposure to CMBS, non-agency residential MBS and CMOs. Also contributing positively were the Trust sholdings in foreign sovereign debt and agency interest-only issues.

The Trust uses interest rate derivatives including futures, options, swaps and swaptions, mainly for the purpose of managing duration, convexity and yield curve positioning. During the period, the Trust held short positions on US Treasuries in order to manage the duration profile of the portfolio. These positions were beneficial to the Trust s performance during certain periods of rising interest rates. For the period as a whole, the Trust s derivatives holdings had a negative impact on returns.

Describe recent portfolio activity.

During the 12-month period, the Trust only made slight changes to its overall asset allocation. The Trust slightly increased exposure to high yield credit, particularly in financials and industrials, and reduced exposure to agency MBS, mostly within 30-year pass-through issues.

Describe portfolio positioning at period end.

At period end, the Trust maintained diversified exposure to non-government sectors including investment grade

credit, high yield credit, CMBS, ABS and non-agency MBS. The Trust also held exposure to government-related sectors including US Treasury securities, agency debt and agency MBS.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

BlackRock Income Trust, Inc.

Trust Overview

BlackRock Income Trust, Inc. s (BKT) (the Trust) investment objective is to manage a portfolio of high-quality securities to achieve both preservation of capital and high monthly income. The Trust seeks to achieve its investment objective by investing at least 65% of its assets in mortgage-backed securities. The Trust invests at least 80% of its assets in securities that are (i) issued or guaranteed by the US government or one of its agencies or instrumentalities or (ii) rated at the time of investment either AAA by S&P or Aaa by Moody s. Securities issued or guaranteed by the US government or its agencies or instrumentalities are generally considered to be of the same or higher credit or quality as privately issued securities rated AAA or Aaa. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the 12-month period ended August 31, 2013, the Trust returned (10.34)% based on market price and (1.45)% based on NAV. For the same period, the closed-end Lipper US Mortgage Funds category posted an average return of (4.73)% based on market price and 5.49% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Fixed income markets experienced two trends over the 12-month period. In the first half of the period, riskier assets rallied as investors sought higher-yielding investments amid historically low yields. Prices moved higher and spreads tightened across most fixed income sectors. However, a new trend took hold in May when US Federal Reserve Chairman Bernanke alluded to a potential tapering of the central bank s bond-buying stimulus program toward the end of 2013, triggering a sharp decline in fixed income markets. Spreads widened rapidly across fixed income sectors as yields rose and volatility increased.

The increase in interest rates in the latter part of the period had a negative impact on the Trust s performance. (Bond prices fall as rates rise.) In particular, the Trust s holdings of 15- and 30-year agency pass-through MBS and US Treasury securities detracted from performance.

Contributing positively to performance was the Trust sexposure to securitized assets. Specifically, agency CMOs and agency mortgage derivatives (including interest-only and principal-only securities) added to performance. Given improvements in the US housing market, the Trust also benefited from exposure to Alt-A (riskier than prime, but less risky than subprime) and prime non-agency residential MBS and CMBS. The Trust sallocation to the ABS sector also contributed positively to performance.

The Trust uses interest rate derivatives including futures, options, swaps and swaptions, mainly for the purpose of managing duration, convexity and yield curve positioning. During the period, the Trust held short positions on US Treasuries in order to manage the duration profile of the portfolio. These positions were beneficial to the Trust s performance during certain periods of rising interest rates. For the period as a whole, the Trust s derivatives holdings had a positive impact on returns.

Describe recent portfolio activity.

During the 12-month period, the Trust increased exposure to agency MBS, especially within agency CMO as these securities offered strong income. The Trust maintained a reduced exposure to 30- and 15-year agency pass-through MBS securities and mortgage derivatives. The Trust also retained its small allocations to ABS, CMBS and non-agency MBS as they continued to benefit from improving underlying fundamentals.

Describe portfolio positioning at period end.

As of period end, the Trust maintained exposure to high quality agency MBS with varying maturities and coupon rates. The Trust continued to hold small allocations to non-agency MBS and CMBS.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of August 31, 2013 **Trust Overview**

BlackRock Strategic Bond Trust

BlackRock Strategic Bond Trust s (BHD) (the Trust) investment objective is to provide total return through high current income and capital appreciation. The Trust seeks to achieve its investment objective by investing primarily in a diversified portfolio of fixed income securities including corporate bonds, US government and agency securities, mortgage-related and asset-backed securities and other types of fixed income securities. The Trust invests, under normal market conditions, a significant portion of its assets in corporate fixed income securities that are below investment grade quality, including high-risk, high yield bonds (commonly referred to as junk bonds) and other such securities, such as preferred stocks. The Trust may invest directly in such securities or synthetically through the use of derivatives.

On July 19, 2013, the Board of the Trust approved the reorganization of the Trust with BlackRock Debt Strategies Fund, Inc., with BlackRock Debt Strategies Fund, Inc. continuing as the surviving fund after the reorganization. On October 25, 2013, the shareholders of the Trust and BlackRock Debt Strategies Fund, Inc. approved the reorganization, which is expected to be completed in late 2013.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the 12-month period ended August 31, 2013, the Trust returned (6.29)% based on market price and 5.45% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of (2.68)% based on market price and 10.20% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

Detracting from performance was the Trust s exposure to names in the paper, media cable and wireless industries. An allocation to senior secured floating rate loan interests (bank loans) generated positive results on an absolute basis, however, the allocation represented an opportunity cost to the Trust as the sector underperformed high yield during the period.

The Trust benefited from a tactical allocation to equities, which rallied during the period. In fixed income, exposure to select sovereign issuers and investment grade credits had a positive impact on performance. From an industry perspective, security selection within gaming, wirelines and non-captive diversified (consumer credit-related businesses) boosted results.

Describe recent portfolio activity.

The Trust actively managed risk throughout the period. The Trust began the period with a riskier stance, but gradually reduced risk in the middle of the period by taking advantage of market strength to sell its higher-beta holdings (securities with greater sensitivity to market movements). The Trust scaled back its risk exposure more aggressively when financial markets began to correct in mid-May.

The Trust s focus on income-oriented credits with strong asset bases and good earnings visibility remained paramount to the investment selection process. While continuing to find value within credit sectors, during the period, the Trust tactically added to select positions in equity and equity-like assets with compelling total return opportunities. Given upward pressure on interest rates in the latter part of the period, the Trust reduced duration (sensitivity to interest rate movements) in its credit allocation. The Trust added to positions in floating rate loan interests as a means of lowering the Trust s duration profile and hedging against the risk of further interest rate volatility. Over the 12-month period, the Trust increased exposure to the healthcare and building materials industries, while decreasing risk within chemicals and independent energy.

Describe portfolio positioning at period end.

At period end, the Trust held 83% of its total portfolio in corporate bonds and 14% in floating rate loan interests, with the remainder invested in US Treasury obligations and preferred securities. The Trust s highest-conviction holdings included HD Supply, Inc. (building materials), Caesars Entertainment Corp. (gaming) and Biomet, Inc. (healthcare). The Trust held limited exposure to segments with minimal cash flow visibility and/or challenged industry dynamics.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

⁴ Using the higher of S&P s or Moody s ratings. ANNUAL REPORT AUGUST 31, 2013 19

The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV of their common shares (Common Shares). However, these objectives cannot be achieved in all interest rate environments.

The Trusts may utilize leverage through a credit facility, by entering into reverse repurchase agreements and/or treasury roll transactions. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of each Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Trust s shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Trusts had not used leverage.

To illustrate these concepts, assume a Trust s capitalization is \$100 million and it borrows for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust pays borrowing costs and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with assets received from the borrowings earn income based on long-term interest rates. In this case, the borrowing costs and interest expense of the borrowings is significantly lower than the income earned on the Trust s long-term investments, and therefore the Trust s shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates, the yield curve has a negative slope. In this case, the Trust pays higher short-term interest rates whereas the Trust s total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Trusts portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Trusts debt securities does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trusts NAVs positively or negatively in addition to the impact on Trust performance from leverage from borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Trusts, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Trusts NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Trusts net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Trust s net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. Each Trust may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Trust to incur losses. The use of leverage may limit each Trust s ability to invest in certain types of securities or use certain types of hedging strategies. Each Trust will incur expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income.

Under the Investment Company Act of 1940, as amended (the 1940 Act), the Trusts are permitted to issue senior securities representing indebtedness up to 33½% of their total managed assets (each Trust s net assets plus the proceeds of any outstanding borrowings). If the Trusts segregate liquid assets having a value not less than the repurchase price (including accrued interest), a reverse repurchase agreement will not be considered a senior security and therefore will not be subject to this limitation. In addition, each Trust voluntarily limits its aggregate economic leverage to 50% of its managed assets. As of August 31, 2013, the Trusts had aggregate economic leverage from reverse repurchase agreements, treasury roll transactions and/or borrowings through a credit facility as a percentage of their total managed assets as follows:

Percent of Economic Leverage

BHK 31 %

HYV	30	%
HYT	30	%
HIS	23	%
BHY	28	%
BNA	31	%
BKT	24	%
BHD	22	%

Derivative Financial Instruments

The Trusts may invest in various derivative financial instruments, including financial futures contracts, foreign currency exchange contracts, options and swaps, as specified in Note 4 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a security, index and/or market without owning or taking physical custody of securities or to hedge market, equity, credit, interest rate, foreign currency exchange rate and/or other risks. Derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Trusts ability to use a derivative financial instrument successfully depends on the investment advisor s ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Trust to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Trust can realize on an investment, may result in lower dividends paid to shareholders or may cause a Trust to hold an investment that it might otherwise sell. The Trusts investments in these instruments are discussed in detail in the Notes to Financial Statements.

³ Fund pays the fixed rate and receives the floating rate.

- Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:
 - Level 1 unadjusted price quotations in active markets/exchanges for identical assets or liabilities that the Trust has the ability to access
 - Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)
 - Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the fair value hierarchy classification is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Trust's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instruments and is not necessarily an indication of the risks associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and derivative financial instruments, please refer to the Note 2 of the Notes to Financial Statements.

See Notes to Financial Statements.

⁴ Fund pays the floating rate and receives the fixed rate.

⁵ Forward interest rate swap.

Schedule of Investments (continued)

Schedule of Investments (concluded)

BlackRock Core Bond Trust (BHK)

Non-Agency

A reconciliation of Level 3 investments is presented when the Trust had a significant amount of Level 3 investments at the beginning and/or end of the year in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset-Backed Securities	Common Stocks	Corporate Bonds	Mortgage-Backed Securities	l Total
ets:					
ning Balance, as of August 31, 2012	\$ 1,505,315	\$ 1	\$ 5,224,808	\$ 511,457	\$ 7,241,5

s	<u> </u>	(1)	(3,298,477)	(544,103)	(3,842,5
sing Balance, as of August 31, 2013	\$10,951,144	\$137,600 [°]	\$ 6,284,125		\$17,372,8

- ¹ As of August 31, 2012, the Trust used observable inputs in determining the value of certain investments. As of August 31, 2013, the Trust used significant unobservable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$4,712,948 transferred from Level 2 to Level 3 in the disclosure hierarchy.
- ² Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of August 31, 2013 was \$23,822.

Certain of the Trust's investments that are categorized as Level 3 were valued utilizing third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in third party information inputs could result in a significantly lower or higher value of such Level 3 investments.

See Notes to Financial Statements.

- ¹ Using S&P's rating of the issuer or the underlying securities of the index, as applicable.
- ² The maximum potential amount the Trust may pay should a negative credit event take place as defined under the terms of agreement.
 - Fair Value Measurements—Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:
 - Level 1 unadjusted price quotations in active markets/exchanges for identical assets or liabilities that the Trust has the ability to access
 - Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)
 - Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3

measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the fair value hierarchy classification is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Trust's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instruments and is not necessarily an indication of the risks associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and derivative financial instruments, please refer to Note 2 of the Notes to Financial Statements.

See Notes to Financial Statements.

Consolidated Schedule of Investments (continued)

BlackRock Corporate High Yield Fund V, Inc. (HYV)

The following tables summarize the Trust's investments and derivative financial instruments categorized in the disclosure hierarchy as of August 31, 2013:

Closing Balance, as of August 31, 2013	\$	602,618	

² Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on derivative financial instruments still held as of August 31, 2013 was \$397,267.

See Notes to Financial Statements.

³ Issues represent upfront cash received on certain derivative financial instruments.

⁴ Settlements represent periodic contractual cash flows and/or cash flows to terminate certain derivative financial instruments.

Consolidated Schedule of Investments (concluded)

BlackRock Corporate High Yield Fund V, Inc. (HYV)

The following table summarizes the valuation techniques used and unobservable inputs developed by the BlackRock Global Valuation Methodologies Committee ("Global Valuation Committee") to determine the value of certain of the Trust's Level 3 investments and derivative financial instruments as of August 31, 2013. The table does not include Level 3 investments and derivative financial instruments with values derived based upon unadjusted third party pricing information. A significant change in third party pricing information could result in a significantly lower or higher value of such Level 3 investments and derivative financial instruments. The value of Level 3 investments and derivative financial instruments derived using third party pricing information is \$16,606,206.

- ² For the year ended August 31, 2013, the valuation technique for certain investments classified as common stocks changed to a market approach. The investment was previously valued utilizing the company's financial restructuring plan. Market information became available for this investment which is considered to be a more relevant measure of fair value for this investment.
- ³ Canadian Dollar.
- ⁴ Present value of estimated future oil and gas revenues, net of estimated direct expenses, discounted at an annual discount rate of 10%.
- ⁵ For the year ended August 31, 2013, the valuation technique for certain investments classified as corporate bonds changed to a market approach. The investment was previously valued using acquisition cost. Market information became available for this investment which is considered to be a more relevant measure of fair value for this investment.
- The Trust fair values certain of its Level 3 investments using acquisition cost, although the transaction may not have occurred during the current reporting period. These investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public companies are not identical to the investments being fair valued by the Trust.
- ⁷ For the year ended August 31, 2013, the valuation technique for certain investments classified as warrants changed to a estimated recovery value approach. The investment was previously valued using a discounted vendor price. The estimated recovery value is considered to be a more relevant measure of fair value for this investment.

See Notes to Financial Statements.

- Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:
 - Level 1 unadjusted price quotations in active markets/exchanges for identical assets or liabilities that the Trust has the ability to access
 - Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)
 - Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in

¹ Using S&P's rating of the issuer or the underlying securities of the Index, as applicable.

² The maximum potential amount the Trust may pay should a negative credit event take place as defined under the terms of agreement.

determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the fair value hierarchy classification is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Trust's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instruments and is not necessarily an indication of the risks associated with investing in those securities For information about the Trust's policy regarding valuation of investments and derivative financial instruments, please refer to Note 2 of the Notes to Financial Statements.

See Notes to Financial Statements.

ANNUAL REPORT AUGUST 31, 2013 63

BlackRock Corporate High Yield Fund VI, Inc. (HYT)

Consolidated Schedule of Investments (continued)

The following tables summarize the Trust's investments and derivative financial instruments categorized in the disclosure hierarchy as of August 31, 2013:

	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term Investments:				
Asset-Backed Securities	_	_	\$2,824,497	\$2,824,497

Unfunded Loan Commitments		12,443		12,443
Total	\$ 45,451,904	\$ 567,167,325	\$ 27,245,219	\$ 639,864,448

There were no transfers between Level 1 and Level 2 during the year ended August 31, 2013. A reconciliation of Level 3 investments and derivative financial instruments is presented when the Trust had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the year in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset-Backed Securities	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Other Interes	t š Warrants
e, as of August 31, 2012	_	\$7,005,140	\$4,924,921	\$19,461,069	\$71	\$1
vel 3	_	351	2,269,625	1,729,618	-	-
Level 3	_	_		(3,067,208)	_	
ts/premiums			5,469	95,293	(1)

realized appreciation/ depreciation ²	_	(219,911)	(1,958,951)	940,806	1	64,305
	\$2,824,497	831,800	2,273,154	9,973,485		1,728
	_	(4)	(3,851,819)	(16,297,892)		_
e, as of August 31, 2013	\$2,824,497	\$7,608,130 [°]	\$3,673,915	\$13,072,578	\$71	\$66,028

² Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of August 31, 2013 was \$(2,118,337). See Notes to Financial Statements.

64 ANNUAL REPORT AUGUST 31, 2013

BlackRock Corporate High Yield Fund VI, Inc. (HYT)

Consolidated Schedule of Investments (concluded)

The following table is a reconciliation of Level 3 derivative financial instruments for which significant unobservable inputs were used in determining fair value:

	Credit Contracts
Assets:	
Opening Balance, as of August 31, 2012	\$ 869,356
Transfers into Level 3	_
Transfers out of Level 3	_
Accrued discounts/premiums	
Net realized gain (loss)	_
Net change in unrealized appreciation/depreciation ¹	(261,857)
Purchases	· —
Issues ²	_
Sales	_
Settlements ³	_
Closing Balance, as of August 31, 2013	\$ 607,499

¹ Included in the related net change in unrealized appreciation/depreciation in the Consolidated Statements of Operations. The change in unrealized appreciation/depreciation on derivative financial instruments still held as of August 31, 2013 was \$401,720.

The following table summarizes the valuation techniques used and unobservable inputs developed by the Global Valuation Committee to determine the value of certain of the Trust's Level 3 investments and derivative financial instruments as of August 31, 2013. The table does not include Level 3 investments and derivative financial instruments with values derived based upon unadjusted third party pricing information. A significant change in third party pricing information could result in a significantly lower or higher value of such Level 3 investments and derivative financial instruments. The value of Level 3 investments and derivative financial instruments derived using third party pricing information is \$17,401,330.

	Value	Valuation Techniques	Unobservable Inputs ⁴	Range of Unobservable Inputs Utilized
Assets:				
Common Stocks ⁵	\$ 3,862,607	Market Comparable Companies	2P (Proved and Probable) Reserves + 2C (Contingent) Resources Multiple	CAD ⁶ \$0.35x — \$0.53x
			PV-10 Multiple ⁷	0.13x - 0.21x
	343,980	Market Comparable Companies	Forecasted EBITDA Multiple	3.50x
	2,329,542	Market Comparable Companies	Offshore EBITDA Multiple	8.25x

² Issues represent upfront cash received on certain derivative financial instruments.

³ Settlements represent periodic contractual cash flows and/or cash flows to terminate certain derivative financial instruments.

			Onshore EBITDA Multiple Implied Last 12 Months EBITDA Multiple	4.75x 6.95x
Corporate Bonds ⁸	1,006,734	Discounted Cash Flow	Yield	12.00%
	1,335,000	Market Comparable Companies	Last 12 Months EBITDA Multiple	10.00x
	900,000	Cost ⁹	N/A	_
Warrant ¹⁰	41,276	Estimated Recovery Value	Distribution Rate	\$1.36 — \$1.63
	24,750	Black-Scholes	Implied Volatility	67.605%
Total	\$ 9,843,889			

⁴ A change to the unobservable input may result in a significant change to the value of the investment as follows:

Unobservable Input	Impact to Value if Input Increases	Impact to Value if Input Decreases
2P (Proved and Probable) Reserves + 2C (Contingent)	Increase	Decrease
Resources Multiple		
PV-10 Multiple	Increase	Decrease
Forecasted EBITDA Multiple	Increase	Decrease
Offshore EBITDA Multiple	Increase	Decrease
Onshore EBITDA Multiple	Increase	Decrease
Implied Last 12 Months EBITDA Multiple	Increase	Decrease
Yield	Decrease	Increase
Last 12 Months EBITDA Multiple	Increase	Decrease
Distribution Rate	Decrease	Increase
Implied Volatility	Increase	Decrease

⁵ For the year ended August 31, 2013, the valuation technique for certain investments classified as common stocks changed to a market approach. The investment was previously valued utilizing the company's financial restructuring plan. Market information became available for this investment which is considered to be a more relevant measure of fair value for this investment.

⁶ Canadian Dollar.

⁷ Present value of estimated future oil and gas revenues, net of estimated direct expenses, discounted at an annual discount rate of 100%.

⁸ For the year ended August 31, 2013, the valuation technique for certain investments classified as corporate bonds changed to a market approach. The investment was previously valued using acquisition cost. Market information became available for this investment which is considered to be a more relevant measure of fair value for this investment.

The Trust fair values certain of its Level 3 investments using acquisition cost, although the transaction may not have occurred during the current reporting period. These investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public companies are not identical to the investments being fair valued by the Trust.

For the year ended August 31, 2013, the valuation technique for certain investments classified as warrants changed to a estimated recovery value approach. The investment was previously valued using a discounted vendor price.

The estimated recovery value is considered to be a more relevant measure of fair value for this investment. See Notes to Financial Statements.

¹ Using S&P's rating of the issuers or the underlying securities of the index, as applicable.

Fair Value Measurements—Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

- Level 1 unadjusted price quotations in active markets/exchanges for identical assets or liabilities that the Trust has the ability to access
- Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)
- Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure

The maximum potential amount the Trust may pay should a negative credit event take place as defined under the terms of the agreement.

purposes, the fair value hierarchy classification is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Trust's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instruments and is not necessarily an indication of the risks associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and derivative financial instruments, please refer to Note 2 of the Notes to Financial Statements.

The following tables summarize the Trust's investments and derivative financial instruments categorized in the disclosure hierarchy as of August 31, 2013:

	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term Investments:				
Common Stocks	_	\$676,981	\$1,063,775	\$1,740,756
Corporate Bonds	_	126,855,535	694,818	127,550,353
Floating Rate Loan Interests	_	20,982,501	3,688,972	24,671,473
Preferred Securities	\$2,924,731	1,089,263	_	4,013,994
Short-Term Securities	1,687,499	_	_	1,687,499
Unfunded Loan Commitment	_	3,437	_	3,437
Total	\$ 4,612,230	\$149,607,717	\$ 5,447,565	\$159,667,512

Derivative financial instruments are swaps, financial futures contracts and foreign currency exchange contracts.

See Notes to Financial Statements.

ANNUAL REPORT AUGUST 31, 2013 75

³ Swaps, financial futures contracts, and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument.

BlackRock High Income Shares (HIS)

Schedule of Investments (concluded)

Certain of the Trust's assets and liabilities are held at carrying amount, which approximates fair value for financial statement purposes. As of August 31, 2013, such assets and liabilities are categorized within the disclosure hierarchy as follows:

			Level		
	Level 1	Level 2	3	Total	
Assets:					
Cash	\$198,460			\$198,460	
Foreign currency at value	21,318	_	_	21,318	
Cash pledged for financial futures contracts	195,000	_	_	195,000	
Liabilities:					
Loan payable	_	\$(37,000,000)	_	(37,000,000)	
Total	\$ 414,778	\$(37,000,000)	_	\$(36,585,222)	

As of August 31, 2012, the Fund used other observable inputs in determining the value of certain equity securities. As of August 31, 2013, the Fund valued the same securities using unadjusted price quotations from an exchange. As a result, investments with a beginning of period value of \$1,778,390 transferred from Level 2 to Level 1 in the disclosure hierarchy.

A reconciliation of Level 3 investments and derivative financial instruments is presented when the Trust had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the year in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Total
sets:				
ening Balance, as of August 31, 2012	\$663,716	\$1,655,876	\$4,877,951	\$7,197,543
insfers into Level 3	_	674,112	504,060	1,178,172
insfers out of Level 3	_	_	(767,398)	(767,398
t realized gain (loss)	(2,944)	3,778	71,037	71,871
t change in unrealized appreciation/depreciation ¹	181,598	(611,755)	154,815	(275,342
rchases	221,407	375,000	2,775,423	3,371,830
les	(2)	(1,402,193)	(3,926,916)	(5,329,111
sing Balance, as of August 31, 2013	\$ 1,063,775	\$694,818	\$3,688,972	\$5,447,565

¹ Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of August 31, 2013 was \$(418,773).

The following table summarizes the valuation techniques used and unobservable inputs utilized by the Global Valuation Committee to determine the value of certain of the Trust's Level 3 investments and derivative financial instruments as of August 31, 2013. The table does not include Level 3 investments and derivative financial instruments with values based upon unadjusted third party pricing information. Level 3 investments valued using third party pricing information was \$4,007,372. A significant change in such third party pricing information could result in a significantly lower or higher value of such Level 3 investments.

_	Value	Valuation	Unobservable Inputs ²	Range of
		Techniques		Unobservable

				Inputs Utilized
Assets:				
Common Stocks ³	\$ 647,095	Market Comparable Companies	Offshore EBITDA Multiple	8.25x
		·	Onshore EBITDA Multiple	4.75x
			Implied Last 12 Months EBITDA Multiple	6.95x
	98,280	Market Comparable Companies	Forecasted EBITDA Multiple	3.50x
Corporate Bonds ⁴	375,000	Market Comparable Companies	Last 12 Months EBITDA Multiple	10.00x

	714	Estimated Recovery Value	Recovery Rate	0.05%
Total	\$ 1,440,193			

² A change to the unobservable input may result in a significant change to the value of the investment as follows:.

Unobservable Input	Impact to Value if Input Increases	Impact to Value if Input Decreases
Offshore EBITDA Multiple	Increase	Decrease
Onshore EBITDA Multiple	Increase	Decrease
Implied Last 12 Months EBITDA Multiple	Increase	Decrease
Forecasted EBITDA Multiple	Increase	Decrease
Last 12 Months EBITDA Multiple	Increase	Decrease
Yield	Decrease	Increase
Recovery Rate	Increase	Decrease

For the year ended August 31, 2013, the valuation technique for certain investments classified as common stocks changed to a market approach. The investment was previously valued using the company's financial restructuring plan. Market information became available for this investment which is considered to be a more relevant measure of fair value for this investment.

See Notes to Financial Statements.

76ANNUAL REPORT AUGUST 31, 2013

⁴ For the year ended August 31, 2013, the valuation technique for certain investments classified as corporate bonds changed to a market approach. The investment was previously valued using acquisition cost. Market information became available for this investment which is considered to be a more relevant measure of fair value for this investment.
