Final Value: With respect to each Index, the closing level on the Observation Date

Pricing Date: December 21, 2018

Observation Date: December 26, 2023

Maturity Date: December 29, 2023

CUSIP: 48130WFM8

Preliminary Term Sheet:

http://sp.jpmorgan.com/document/cusip/48130WFM8/doctype/Product_Termsheet/document.pdf

For information about the estimated value of the notes, which likely will be lower than the price you paid for the notes, see the hyperlink above.

Payment at Maturity

If the Final Value of each Index is greater than or equal to its Initial Value, your payment at maturity per \$1,000 principal amount

note will be calculated as follows:

$\$1,000 + (\$1,000 \times \text{Lesser Performing Index Return} \times \text{Upside Leverage Factor})$

If the Final Value of either Index is less than its Initial Value but the Final Value of each Index is greater than or equal to its Initial

Value or less than its Initial Value by up to the Contingent Buffer Amount, you will receive the principal amount of the notes at maturity.

If the Final Value of either Index is less than its Initial Value by more than the Contingent Buffer Amount, your payment at

maturity per \$1,000 principal amount note will be calculated as follows:

$\$1,000 + (\$1,000 \times \text{Lesser Performing Index Return})$

If the Final Value of either Index is less than its Initial Value by more than the Contingent Buffer Amount, you will lose more than

50.00% of your principal amount at maturity and could lose all of your principal amount at maturity.

Hypothetical Returns on the Notes at Maturity**

• The final Upside Leverage Factor will be in the Pricing Supplement and will not be less than 1.22.

** The hypothetical returns and hypothetical payments on the Notes shown above apply only at maturity. These hypotheticals do not

reflect fees or expenses that would be associated with any sale in the secondary market. If these fees and expenses were included,

the hypothetical returns and hypothetical payments shown above would likely be lower.

5yr SPX/RTY Uncapped Accelerated Barrier Note

Selected Risks

- Your investment in the notes may result in a loss.
- Payment on the notes at maturity is subject to the credit risk of JPMorgan Chase Financial Company LLC and JPMorgan Chase & Co. Therefore the value of the notes prior to maturity will be subject to changes in the market’s view of the creditworthiness of JPMorgan Chase Financial Company LLC or JPMorgan Chase & Co.
- If the Final Value is less than the Initial Value by more than the Contingent Buffer Amount, you will lose 1% of the principal amount of your notes for every 1% that the Final Value is less than the Initial Value. Accordingly, under these circumstances, you will lose more than 50.00% of your principal amount at maturity and could lose all of your principal amount at maturity.
- No interest payments, dividend payments or voting rights.
- The tax consequences of the notes may be uncertain. You should consult your tax advisor regarding the U.S. federal income tax consequences of an investment in the notes.
- As a finance subsidiary, JPMorgan Chase Financial Company LLC has no independent operations and has limited assets.
- J.P. Morgan is currently one of the companies that makes up the S&P 500 Index.
- The notes are subject to the risks associated with small capitalization stocks.
- You are exposed to the risk of decline in the level of each Index.

Selected Risks (continued)

- The estimated value of the notes will be lower than the original issue price (price to public) of the notes.
- You are exposed to the risks associated with small capitalization companies.
- The estimated value of the notes is determined by reference to an internal funding rate.
- The estimated value of the notes does not represent future values and may differ from others’ estimates.
- The value of the notes, which may be reflected in customer account statements, may be higher than the then current estimated value of the notes for a limited time period.
- Lack of liquidity: J.P. Morgan Securities LLC, acting as agent for the Issuer (and who we refer to as JPMS), intends to offer to purchase the notes in the secondary market but is not required to do so. The price, if any, at which JPMS will

be willing to purchase notes from you in the secondary market, if at all, may result in a significant loss of your principal.

- Potential conflicts: We and our affiliates play a variety of roles in connection with the issuance of notes, including acting as calculation agent and hedging our obligations under the notes, and making the assumptions used to determine the pricing of the notes and the estimated value of the notes when the terms of the notes are set. It is possible that such hedging or other trading activities of J.P. Morgan or its affiliates could result in substantial returns for J.P. Morgan and its affiliates while the value of the notes decline.
