LESS MAIL,  
MORE FREEDOM  
WITH ONLINE FUND  
REPORTS

There is a new way to receive your  
Nuveen Fund updates faster than ever.  
Nuveen now can link you with  
electronic versions of the important  
financial information we send you by regular mail.

By registering for online access via the internet, you will be able to view and save the Fund information you currently receive in the mail. This information can be stored on your computer and retrieved any time. In addition, you can select only the specific pages you want to view or print.

With this new service, you'll receive an e-mail notice the moment Fund reports are ready. This notice will contain a link to the report - all you have to do is click your computer mouse on the internet address provided. You'll be saving time, as well as saving your fund paper, printing and distribution expenses.

Registering for electronic access is easy and only takes a few minutes. (see box at right)

The e-mail address you provide is strictly confidential and will not be used for anything other than notifications of shareholder information.

And if you decide you don't like receiving your reports electronically, it's a simple process to go back to regular mail delivery.

SIGN UP TODAY -- Here's what you need to do...

If your Nuveen Fund

Timothy R. Schwertfeger  
Chairman of the Board

Dear  
Shareholder

In the aftermath of September 11, the financial markets have reacted with volatility and uncertainty as investors attempt to better understand how the U.S. and world economies are likely to perform in the months ahead. It's too soon to tell what the long-term impact will be on the markets or your Fund, but one thing that is increasingly clear to us is that a diversified portfolio that includes high quality municipal bonds can leave you well positioned to reduce overall investment volatility.

For example, during the period covered by this report, all of these Nuveen Funds continued to meet their primary objectives of providing attractive monthly income from a portfolio of high quality municipal bonds. Detailed information on your Fund's performance can be found in the Portfolio Manager's Comments and Performance Overview sections of this report. I urge you to take the time to read them.

In addition to providing you with steady tax-free income, your Nuveen Fund also features several characteristics that can help make it an essential part of your overall investment strategy. These include careful research, constant surveillance and judicious trading by Nuveen's seasoned portfolio management team, with every action designed to supplement income, improve Fund structure, better adapt to current market conditions or increase diversification. In turbulent times like these, prudent

"A diversified  
portfolio  
can leave  
you well  
positioned  
to reduce  
overall  
investment  
risk."

"Today, perhaps  
more than  
ever, investors  
have the  
ability to  
make a lasting  
impact on  
their families  
and their  
world for  
generations  
to come."

investors understand the importance of diversification, balance, and risk management, all attributes your Nuveen Fund can bring to your portfolio.

For more than 100 years, Nuveen has specialized in offering quality investments such as these Nuveen Funds to those seeking to accumulate and preserve wealth and establish a lasting legacy. Our mission continues to be to assist you and your financial advisor by offering the investment services and products that can help you invest well and leave your mark for future generations. We thank you for continuing to choose Nuveen Investments as your partner as you work toward that goal.

Sincerely,

/s/ TIMOTHY R. SCHWERTFEGER

Timothy R. Schwertfeger  
Chairman of the Board

November 15, 2001

Nuveen Select Portfolios (NXP, NXQ, NXR, NXC, NXN)

Portfolio Manager's  
Comments

Portfolio manager Tom Spalding talks about key investment strategies, including the recent portfolio changes approved by shareholders, economic conditions, and the performance of the Nuveen Select Portfolios. With more than 25 years of investment experience at Nuveen, Tom has managed the Select Portfolios since 1999.

WOULD YOU RECAP THE SIGNIFICANT MODIFICATIONS MADE TO THE SELECT PORTFOLIOS MANAGEMENT PROCESS IN AUGUST 2001?

Earlier this year, the board of trustees for the Nuveen Select Portfolios recommended, and shareholders subsequently approved, changes to the Portfolios' organizational documents and investment policies. Effective August 1, 2001, the 2017 termination dates were eliminated for all five Select Portfolios, enabling them to operate indefinitely like all other Nuveen Municipal Closed-End Exchange-Traded Funds. In addition, the investment policy that required the California and New York Select Portfolios (NXC and NXN) to invest only in insured municipal bonds was eliminated. These two Portfolios can now purchase non-insured investment-grade municipal bonds as well as insured issues. Finally, the board modified the policy set forth in the Portfolio's original prospectuses regarding the circumstances under which portfolio securities could be sold and proceeds reinvested, in order to give the portfolio manager more discretion to determine when a particular bond should be sold or bought consistent with the investment objective of dividend stability over time.

HOW WILL THESE CHANGES AFFECT SHAREHOLDERS?

With the elimination of the 2017 termination dates, the Select Portfolios are no longer constrained by a specific term. Because the Portfolios can now invest in bonds with maturities beyond 2017, shareholders stand to benefit from the Portfolios' greater flexibility to find and purchase bonds with higher yields. This, in turn, should enhance our ability to maintain competitive dividend rates. Elimination of the termination dates also avoided the potentially negative impact on share prices that may have occurred as the Portfolios approached termination.

For the California and New York Portfolios, the elimination of the policy requiring portfolio investments to be insured allows us to add non-insured

municipal bonds to these two Portfolios, which could improve their potential to achieve higher yields and better long-term share price performance while retaining strong overall credit quality. Although investing in non-insured bonds can increase the Portfolios' risk profiles, all bonds purchased by the Portfolios must be investment-grade quality and are subject to Nuveen's strict quality standards and surveillance. As a result of this amendment, NXC and NXN now have the same flexibility as NXP, NXQ, and NXR to purchase bonds that have the potential to add yield to their portfolios.

WHEN WILL THESE CHANGES BE IMPLEMENTED?

We have already begun to implement these changes, focusing on finding attractive bonds with the potential to support the Portfolios' long-term dividend-payment capabilities, enhance call protection, and add value and diversification. We expect the addition of longer-term bonds to the Portfolios, and non-insured bonds to NXC and NXN, to be a gradual process. As bonds mature or are called away, we will reinvest the proceeds in the best values we can find in the longer end of the market. Of course, if we see an exceptional opportunity in the marketplace, we will act to take advantage of it immediately. The Portfolios will emphasize municipal obligations offering good call protection and maturities of approximately 18 to 28 years, with an average maturity of 20 to 25 years. These bonds should provide yields similar to those in the long end of the market, combined with strong liquidity to help reduce volatility if interest rates rise.

TURNING TO THE EVENTS OF THE PAST TWELVE MONTHS, WHAT FACTORS HAD THE GREATEST INFLUENCE ON THE U.S. ECONOMY DURING THIS REPORTING PERIOD?

From an economic perspective, the major factors during the twelve months ended September 30, 2001, were the Federal Reserve's shift in interest rate policy from neutral to easing short-term rates and the general slowdown in economic growth. In January 2001, the Fed

embarked on a series of rate cuts designed to stimulate the sluggish U.S. economy. During the first nine months of the year, the Fed announced nine rate reductions totaling 400 basis points, lowering the federal funds rate to 2.50% as of September 30, 2001, its lowest level since 1962. The consensus among many market observers is that the Fed could continue to ease rates as long as signs of a significant economic slowdown remain.

In addition, the tragic events of September 11 and its aftermath may have an impact on the economy and the financial markets that is not yet fully known. We expect to see at least some pressure on high-profile issuers such as The City of New York. The Port Authority of New York and New Jersey, as well as on some airlines and airport facilities. However, we think the credit implications for the municipal market as a whole may be relatively modest, as many issuers built healthy balance sheets during recent years of economic expansion, enabling them to weather a downturn.

New York, of course, bore the brunt of the terrorist attacks. The economic fallout from the attack on the World Trade Center is expected to be substantial, as both New York City and State face the loss of billions of dollars in tax revenues. Although \$20 billion in federal funds should help, the slower national economy and the risk of a continued downturn on Wall Street remain causes for concern about the near-term outlook for New York's financial position.

California faced an economic emergency of a different type during the past twelve months, as energy costs soared and the state's major utilities encountered serious financial problems. Ultimately, the state spent \$6.3 billion from its general fund to purchase electricity and assure adequate supply. By September, power supplies had become relatively stable, and energy prices had

declined significantly, due in part to conservation efforts. However, the state's issuance of \$12.5 billion in power bonds to reimburse the general fund for electricity expenditures has been delayed, potentially until 2002, by the state utilities commission.

WHAT WAS THE MUNICIPAL MARKET ENVIRONMENT DURING THIS PERIOD?

In the municipal market, the conditions of the past twelve months, including tight municipal supply during 2000, helped many bonds perform well. As 2001 got underway, the Fed's interest rate cuts created a more favorable environment for both new municipal issuance and refundings, which together totaled \$193.9 billion nationwide during the first nine months of the year, an increase of 34% over January-September 2000. California remained the largest state issuer of municipal debt, with \$23.4 billion of new issuance during the first nine months of 2001, up 31% over the same period in 2000, while New York issued \$13.8 billion in new bonds, in line with issuance levels during 2000.

While the financial impact of September 11 may be widespread, we expect the credit implications for the municipal market as a whole to be more modest. The most prominent effects may be seen in high-profile issuers such as the The City of New York and The Port Authority of New York and New Jersey. Despite economic concerns, the credit rating agencies have not changed the ratings for New York State and City, which have remained at A2/AA/AA and A2/A/A+, respectively, as of September 30, 2001. In California, however, the significant costs incurred by the state during the power crisis as well as the delay in bringing the power issue to market caused both Moody's and Standard & Poor's to downgrade ratings on California debt to Aa3 and A+ from Aa2 and AA, respectively. Fitch, the third major rating agency, affirmed California's rating at AA, but revised its outlook to negative.

From a demand perspective, municipal bonds continued to be highly sought after by individual investors looking for diversification, tax-free income, quality, and an alternative to a volatile stock market. Investors in California and New York, faced with some of the highest marginal income tax rates in the nation, remained avid buyers of in-state paper over the past twelve months. In September 2001, California successfully brought to

market \$5.7 billion in state notes, the largest one-day debt issuance in municipal market history, while New York issued \$1 billion in disaster recovery notes on October 2, 2001 as this report was being prepared. The California issue sold rapidly to both retail and institutional investors, demonstrating the general belief that California continues to represent a strong credit despite its energy crisis. Individual and institutional investors also snapped up the New York offering, which had been closely watched as a barometer of the financial viability of the city going forward.

In general, moderate supply, strong demand and a rising U. S. Treasury market helped to push municipal bond prices higher than they were twelve months ago, while municipal yields were correspondingly lower. Nevertheless, we believe the municipal market continues to represent good value. As of September 30, 2001, long-term municipal yields were 99.8% of 30-year Treasury yields, compared with 98.5% as of September 30, 2000.

HOW DID THE NUVEEN SELECT PORTFOLIOS PERFORM OVER THE PAST TWELVE MONTHS?

For the year ended September 30, 2001, the Nuveen Select Portfolios produced total annual returns on net asset value (NAV) as shown in the accompanying table. The annual returns for the relevant Lehman Brothers Municipal Bond

Edgar Filing: NUVEEN INSURED CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

Indexes<sup>1</sup> and Lipper Peer Groups<sup>2</sup> are also presented.

	MARKET	YIELD	LEHMAN

NXN	5.24%	8.12%	6.58%	10.83%	12.51%

Past performance is not predictive of future results.

For additional information, see the individual Performance Overview for your Portfolio in this report.

Over the past twelve months, the combination of thin municipal supply during 2000, an end to the Fed's tightening agenda, and generally favorable market technicals created a positive total return environment for municipal bonds. Between September 30, 2000, and September 30, 2001, the yield on the Bond Buyer 25 Revenue Bond Index fell from 5.80% to 5.41%. In this environment of falling yields (and rising bond values), portfolios with shorter durations<sup>4</sup> would typically be expected to underperform their benchmarks.

As significant portions of the bonds in each Portfolio began approaching their call dates, the durations of these Funds showed a corresponding decline. As of September 30, 2001, the national Portfolios' durations ranged from 1.90 to 2.69, compared with 7.77 for the Lehman Brothers Municipal Bond Index, while NXC and NXN had durations of 2.93 and 3.25, respectively, compared with 8.97 and 8.16 for the Lehman Insured Tax-Exempt Bond Indexes for California and New York. Under the newly amended trust declarations, shareholders can expect to see the Portfolios' durations lengthen as we use bond call proceeds to add longer-term securities. While this will increase their sensitivity to interest rate changes, it should help to support the Portfolios' dividends and place the Portfolios in a better position to participate in market gains.

HOW DID THE MARKET ENVIRONMENT AFFECT THE PORTFOLIOS' DIVIDENDS AND SHARE PRICES?

During the year ended September 30, 2001, increased pressure from bond calls, compounded by the need to reinvest call proceeds in a lower interest rate environment, impacted the income streams of the Select Portfolios and resulted in dividend cuts in each Portfolio over the past twelve months. Despite these adjustments, the Portfolios continued to provide attractive market yields, as shown in the preceding table. In coming months, the addition of longer-term securities to these Portfolios should enhance their ability to earn higher yields, which should help to stabilize the dividends. However, these Portfolios were assembled in the higher

1 The performances of the national Select Portfolios - NXP, NXQ, AND NXR - are compared with that of the Lehman Brothers Municipal Bond Index, an unleveraged index comprising a broad range of investment-grade municipal bonds. the performance of NXC and NXN are compared with those of the Lehman Insured

Tax-Exempt Bond Indexes for California and New York, respectively. These unleveraged indexes comprise a broad range of insured municipal bonds within each of those states. Results for the Lehman Indexes do not reflect any expenses.

- 2 The total returns of the national Portfolios are compared with the average annualized return of the 12 funds in the Lipper General and Insured Unleveraged Municipal Debt Funds category. NXC's total return is compared with the average total return of the 10 funds in the Lipper California Insured Municipal Debt Funds category, while the comparison for NXN is based on the 9 funds in the Lipper New York Insured Municipal Debt Funds category. Portfolio and Lipper returns assume reinvestment of dividends.
- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen portfolio on an after-tax basis. For the national Portfolios, the taxable-equivalent yield is based on the Portfolio's market yield on the indicated date and a federal income tax rate of 30.5%, while the taxable-equivalent yields for NXC and NXN are based on their market yields on the indicated date and combined federal and state income tax rates of 37% and 35.5%, respectively.
- 4 Duration is a measure of a portfolio's NAV volatility in reaction to interest rate movements.

interest rate environment of 1992, and as they approach their ten-year anniversaries, they continue to face the increased exposure to bond calls normally associated with that point of the bond market cycle. Over the next twelve months, the dividends of the Nuveen Select Portfolios will be influenced both by the number of bond calls and by the interest rates at which we can reinvest the proceeds.

During the past year, as the stock market remained volatile and the bond market continued to perform well, many investors turned to tax-free fixed-income investments as a way to add balance to their portfolios and reduce overall risk. However, on the whole, the Portfolios' NAVs appreciated more rapidly than share prices, and all five Portfolios continued to trade at discounts (share price below NAV).

WHAT KEY STRATEGIES WERE USED TO MANAGE THE NUVEEN SELECT PORTFOLIOS DURING THE YEAR ENDED SEPTEMBER 30, 2001?

Over the past twelve months, the Select Portfolios continued to focus on their primary investment objective of providing dependable tax-exempt income, keeping their assets fully invested in diversified portfolios of quality municipal bonds that we judged to represent the best value opportunities in the market. We also took advantage of recent market conditions to work on improving the call protection of these Portfolios.

As of September 30, 2001, the three national Select Portfolios offered excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 58% in NXP to 63% in both NXQ and NXR. Each Portfolio also had a portion of its assets invested in BBB and non-rated bonds, which benefited from narrowing credit spreads during the first part of 2001. NXC and NXN were 100% invested in insured and/or U.S. guaranteed bonds as of September 30, 2001, meaning that credit quality was not an issue.

Looking at sector activity over the past year, each Portfolio increased or maintained its allocation to the healthcare sector, which saw prices appreciate overall when credit spreads narrowed earlier this year. For the first nine

months of 2001, healthcare bonds were the top performers in the national municipal market, and the sector is expected to remain largely unaffected by recent events. Four of the Portfolios - NXP, NXQ, NXR, and NXC - also increased their allocations to the transportation sector, where we selectively added strong airport issues that we believe are poised to do well. The issues that we hold represent value plays and focus largely on the major hubs served by the stronger airlines. In addition, many of these issues offer bondholders the extra reassurance of insurance. Because most airports operate as virtual monopolies within their service areas and have fairly diverse revenue streams, airport bonds are generally regarded as solid credits. Moody's current median rating for airports is A2, which is solidly investment grade. approval of a \$15 billion airline aid package of grants and loan guarantees demonstrates the commitment to the air transportation sector at the federal level.

As described earlier, the changes approved at the August 1, 2001, shareholder meeting have given the Portfolios greater flexibility to take advantage of strategies and market opportunities that can enhance portfolio structure, including call protection and long-term dividend-payment capabilities. We have already purchased some longer-term bonds offering better call protection in NXN. Overall, the Nuveen Select Portfolios, which were originally organized as passively managed funds, will continue to be managed with a less aggressive approach than other Nuveen Municipal Closed-End Exchange-Traded Funds. However, going forward, our new investment flexibility enables us to use somewhat more active investment strategies, which we believe will work to the benefit of shareholders.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THE NUVEEN SELECT PORTFOLIOS IN PARTICULAR?

While it is still too soon to determine the long-range effects of September 11 on the markets and on your Portfolios, it is our view that, from a strictly financial standpoint, the attacks were responsible for a short-term disruption in an economy that was already slowing. We anticipate that the U.S. economy will recover, but grow at a slower pace, while inflation and interest rates should remain low over the near term. In general, our outlook for the fixed-income markets over the next twelve months remains positive. We expect to see substantial municipal issuance during the fourth quarter, especially in New York. New municipal issuance nationwide in 2001 is now expected to exceed \$250 billion for the first time since 1998. At the same time, demand for tax-exempt municipal bonds is anticipated to stay strong, as investors look for ways to rebalance their portfolios and reduce risk.

Given recent events, we continue to watch the market very carefully, especially those sectors that were directly impacted by the events of September 11 or that would be affected by any further deceleration in the economy. We believe the Nuveen Funds are currently well positioned, and we will continue to closely monitor and respond to events as appropriate.

Looking specifically at the Nuveen Select Portfolios, our strategic approach to bond calls over the past year enabled us to work through a number of calls and improve the current call protection levels of these Portfolios. For the remainder of 2001, NXQ and NXN have no scheduled calls, NXC has 2% of its portfolio callable, and NXP and NXR could see 5% and 2%, respectively, called. Between March and July 2002, however, all five of the Select Portfolios will mark the 10-year anniversaries of their inceptions, reaching the point of the bond market cycle typically associated with an increase in call exposure. During 2002, the Portfolios could experience bond calls affecting 50-71% of their holdings, depending on market interest rates during that time. Given the current level of rates, our strategy will be to hold higher-yielding bonds as long as possible to help support the Portfolios' dividends, while we look for attractive

replacement opportunities. In line with newly amended policies, shareholders can expect to see increased portfolio turnover, but this should provide us with excellent opportunities to add the longer-term and, in NXC and NXN, non-insured bonds that can provide support for the Portfolios' dividends.

The recent changes approved for the Nuveen Select Portfolios should also help us further enhance their positioning for the market environment of the next twelve months. As value-oriented investors, we plan to remain focused on ways we can add value for our shareholders while using Nuveen's research expertise to watch new issuance for opportunities that can help us adapt our strategies to changing market conditions. Overall, we believe the Select Portfolios offer a very attractive opportunity in the current market. In our opinion, especially given their new investment flexibility, they should continue to play an important role in investors' long-range financial programs, providing balance and diversification, monthly tax-free income, quality investments, and a measure of security in uncertain times such as these.

 =====

1 Taxable-equivalent yield represents the yield on a taxable investment necessary to equal the yield of the Nuveen Fund on an after-tax basis. It is calculated using the current market yield and a federal income tax rate of 30.5%. The rate shown for federal and state highlights the added value of owning shares that are also exempt from state income taxes. It is based on a combined federal and state income tax rate of 37%.

2 The Fund also paid shareholders a capital gains distribution in December 2000 of \$0.0127 per share.

Notes to  
FINANCIAL STATEMENTS (Unaudited)

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The Trusts covered in this report and their corresponding New York Stock Exchange symbols are Nuveen Select Tax-Free Income Portfolio (NXP), Nuveen Select Tax-Free Income Portfolio 2 (NXQ), Nuveen Select Tax-Free Income Portfolio 3 (NXR), Nuveen California Select Tax-Free Income Portfolio (NXC) (formerly the Nuveen Insured California Select Tax-Free Income Portfolio) and Nuveen New York Select Tax-Free Income Portfolio (NXN) (formerly the Nuveen Insured New York Select Tax-Free Income Portfolio).

Each Trust seeks to provide stable dividends consistent with the preservation of capital, exempt from regular federal and designated state income taxes, where applicable, by investing primarily in a diversified portfolio of municipal obligations. The Trusts are registered under the Investment Company Act of 1940 as closed-end, diversified management investment companies.

The Trusts' investment adviser, Nuveen Institutional Advisory Corp. (the "Adviser"), a wholly owned subsidiary of The John Nuveen Company, administers the investments and maintains ongoing surveillance of such investments to insure that they continue to meet the Trusts' investment objectives and credit quality standards. The Adviser does not intend to adjust the portfolios except 1) to invest interest payments on municipal obligations that are not currently needed to pay dividends or expenses; 2) to reinvest principal payments on municipal obligations resulting from their maturity or early redemption; 3) to sell municipal obligations when the Adviser believes that continuing to hold them would be inconsistent with maintaining the Trusts' high credit quality, and to reinvest the proceeds of such sales; and 4) for certain other purposes.

The following is a summary of significant accounting policies followed by the Trusts in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Trusts' investment portfolio are provided by a pricing service approved by the Trust's Board of Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Trusts may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade-date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. Any securities so purchased are subject to market fluctuation during this period. The Trusts have instructed the custodian to segregate assets in a separate account with a current value at least equal to

the amount of the when-issued and delayed delivery purchase commitments. At September 30, 2001, New York Select Tax-Free (NXN) had outstanding when-issued purchase commitments of \$3,016,573. There were no such outstanding purchase commitments in any of the other Trusts.

#### Investment Income

Interest income is determined on the basis of interest accrued, adjusted for amortization of premiums and accretion of discounts on long-term debt securities for financial reporting purposes.

#### Income Taxes

Each Trust is a separate taxpayer for federal income tax purposes. Each Trust intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Trust intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, where applicable, to retain such tax-exempt status when distributed to shareholders of the Trusts.

#### Dividends and Distributions to Shareholders

Tax-exempt net investment income is declared monthly as a dividend and payment is made or reinvestment is credited to shareholder accounts on the first business day after month end. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to shareholders of tax-exempt net investment income, net realized capital gains and/or market discount are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

#### Notes to

#### FINANCIAL STATEMENTS (Unaudited) (Continued)

#### Derivative Financial Instruments

The Trusts are not authorized to invest in derivative financial instruments.

#### Custodian Fee Credit

Each Trust has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Trust's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

#### Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

#### Change in Accounting Policy

As required, effective April 1, 2001, the Trusts have adopted the provisions of

Edgar Filing: NUVEEN INSURED CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

the AICPA Audit and Accounting Guide for Investment Companies and began accreting taxable market discount on debt securities. Prior to April 1, 2001, the Trusts did not accrete taxable market discounts on debt securities until they were sold. The cumulative effect of this accounting change had no impact on the total net assets of the Trusts, but resulted in an increase in the cost of securities and a corresponding decrease in unrealized appreciation for Select Tax-Free (NXP), Select Tax-Free 2 (NXQ), Select Tax-Free 3 (NXR) and California Select Tax-Free (NXC) of \$801,770, \$233,334, \$100,064 and \$37,057, respectively, based on securities held by the Trusts on April 1, 2001.

The effect of this change for the six months ended September 30, 2001, was to increase net investment income with a corresponding decrease in net unrealized appreciation for Select Tax-Free (NXP), Select Tax-Free 2 (NXQ), Select Tax-Free 3 (NXR) and California Select Tax-Free (NXC) of \$64,290, \$19,127, \$7,249 and \$2,954, respectively. The Statement of Changes in Net Assets and Financial Highlights for the prior periods have not been restated to reflect this change in presentation.

2. TRUST SHARES

There were no share transactions during the six months ended September 30, 2001, nor during the fiscal year ended March 31, 2001, in any of the Trusts.

3. DISTRIBUTIONS TO SHAREHOLDERS

The Trusts declared dividend distributions from their tax-exempt net investment income which were paid November 1, 2001, to shareholders of record on October 15, 2001, as follows:

	SELECT TAX-FREE (NXP)	SELECT TAX-FREE 2 (NXQ)	SELECT TAX-FREE 3 (NXR)	CALIFORNIA SELECT TAX-FREE (NXC)
Dividend per share	\$ .0710	\$ .0695	\$ .0665	\$ .0640

4. SECURITIES TRANSACTIONS

Purchases and sales (including maturities) of investments in long-term municipal securities and short-term municipal securities during the six months ended September 30, 2001, were as follows:

	SELECT TAX-FREE (NXP)	SELECT TAX-FREE 2 (NXQ)	SELECT TAX-FREE 3 (NXR)	CALIFORNIA SELECT TAX-FREE (NXC)
Purchases:				
Long-term municipal securities	\$34,237,754	\$12,801,348	\$9,117,568	\$5,147,700
Short-term municipal securities	10,000,000	5,000,000	3,000,000	5,000,000
Sales and maturities:				

Edgar Filing: NUVEEN INSURED CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

Long-term municipal securities	31,498,650	16,296,650	5,335,000	8,433,600	8
Short-term municipal securities	10,000,000	5,000,000	3,000,000	5,000,000	6

At September 30, 2001, the cost of investments owned for federal income tax purposes were as follows:

	SELECT TAX-FREE (NXP)	SELECT TAX-FREE 2 (NXQ)	SELECT TAX-FREE 3 (NXR)	CALIFORNIA SELECT TAX-FREE (NXC)	
	\$224,729,108	\$239,832,321	\$175,877,580	\$83,247,684	\$55

Notes to  
FINANCIAL STATEMENTS (Unaudited) (Continued)

At March 31, 2001, the Trusts' last fiscal year end, the following Trusts had unused capital loss carryforwards available for federal income tax purposes to be applied against future capital gains, if any. If not applied, the carryforwards will expire as follows:

Expiration year:	SELECT TAX-FREE (NXP)	SELECT TAX-FREE 2 (NXQ)	SELECT TAX-FREE 3 (NXR)
2002	\$ --	\$ --	\$ --
2003	--	--	--
2004	--	--	136,144
2005	27,152	32,251	674,505
2006	24,357	44,578	3,603
2007	--	--	--
2008	--	--	--
Total	\$51,509	\$76,829	\$814,252

5. UNREALIZED APPRECIATION (DEPRECIATION)

Gross unrealized appreciation and gross unrealized depreciation of investments for federal income tax purposes at September 30, 2001, were as follows:

	SELECT	SELECT	SELECT	CALIFORNIA SELECT
--	--------	--------	--------	----------------------

Edgar Filing: NUVEEN INSURED CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

	TAX-FREE (NXP)	TAX-FREE 2 (NXQ)	TAX-FREE 3 (NXR)	TAX-FREE (NXC)	
-----					
Gross unrealized:					
appreciation	\$17,848,601	\$15,310,082	\$10,422,900	\$5,157,915	\$3
depreciation	(422,592)	(390,052)	(150,182)	--	
-----					
Net unrealized appreciation	\$17,426,009	\$14,920,030	\$10,272,718	\$5,157,915	\$3
=====					

6. SURVEILLANCE AND ADMINISTRATION FEES AND OTHER TRANSACTIONS WITH AFFILIATES  
Under the Trusts' investment management agreements with the Adviser, each Trust pays an annual surveillance and administration fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets of each Trust as follows:

AVERAGE DAILY NET ASSETS	SELECT TAX-FREE (NXP)	SELECT TAX-FREE CALIFORNIA SELECT TAX-FR NEW YORK SELECT TAX-FR
For the first \$125 million	.2500 of 1%	.300
For the next \$125 million	.2375 of 1	.287
For the next \$250 million	.2250 of 1	.275
For the next \$500 million	.2125 of 1	.262
For the next \$1 billion	.2000 of 1	.250
For net assets over \$2 billion	.1875 of 1	.237

The fee compensates the Adviser for performing ongoing administration, surveillance and portfolio adjustment services. The Trusts pay no compensation directly to those of its Trustees who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Trusts from the Adviser or its affiliates.

7. COMPOSITION OF NET ASSETS

At September 30, 2001, each Trust had an unlimited number of \$.01 par value shares of beneficial interest authorized. Net assets consisted of:

	SELECT TAX-FREE (NXP)	SELECT TAX-FREE 2 (NXQ)	SELECT TAX-FREE 3 (NXR)	CALIFORNIA SELECT TAX-FREE (NXC)	
-----					
Capital paid-in	\$ 163,781	\$ 176,071	\$ 129,641	\$ 62,571	\$

Water and Sewer	2	3	6	--
Other	--	1	--	--
	100%	100%	100%	100%

Certain long-term investments owned by the Trusts are covered by insurance issued by several private insurers or are backed by an escrow or trust containing U.S. Government or U.S. Government agency securities, both of which ensure the timely payment of principal and interest in the event of default (58% for Select Tax-Free (NXP), 62% for Select Tax-Free 2 (NXQ), 46% for Select Tax-Free 3 (NXR), 100% for California Select Tax-Free (NXC), and 100% for New York Select Tax-Free (NXN)). Such insurance or escrow, however, does not guarantee the market value of the municipal securities or the value of any of the Trusts' shares.

For additional information regarding each investment security, refer to the Portfolio of Investments of each Trust.

SET UP YOUR  
REINVESTMENT  
ACCOUNT.

NUVEEN EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.
