Portfolio Manager's  
COMMENTS

Portfolio manager Tom Spalding reviews economic and market conditions, key strategies, and recent Portfolio performance. Tom, who has 25 years of investment management experience with Nuveen, has managed the Select Portfolios since 1999.

WHAT WERE THE MAJOR DRIVERS OF THE U.S. ECONOMY AND THE MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

The two major forces at work during the twelve months ended March 31, 2002, were the general slowdown in economic growth and the Federal Reserve's aggressive easing of short-term interest rates. In addition, the events of September 11, 2001, and the uncertain geopolitical climate that followed also have impacted the economy and the markets.

In the fixed-income markets, the general environment of the past twelve months helped many municipal securities perform well. The trend toward increased issuance established in 2001 continued in the first three months of 2002, with \$67.4 billion in new supply, up 10% over January-March 2001. On the demand side, municipal bonds continued to be highly sought after by individual investors looking for diversification, tax-free income and an alternative to a volatile stock market. Institutional investors, especially traditional purchasers such as insurance companies and pension plans, also have been active buyers in the new issue market.

Looking at California and New York specifically, both states have experienced declining economic growth over the past twelve months, tied, in part, to specific events. New York was the state most impacted by the September 11 attacks, while California continued to deal with the aftermath of its 2001 power

## Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

crisis. Both states remained heavily dependent on economically sensitive revenue sources such as sales, income, and capital gains taxes and, with the economic downturn, now face budget shortfalls estimated at \$7 billion in California and \$9 billion in New York. Despite these factors, New York's credit ratings remained intact at A2/AA/AA. However, California's deficit, combined with uncertainties surrounding the resolution of its power problems, put pressure on the state's credit ratings. In November 2001, Moody's downgraded California's general obligation bonds for the second time in twelve months to A1, while Standard & Poor's and Fitch have maintained their ratings at A+/AA over the past six months. During the first three months of 2002, New York issued \$4.5 billion in new municipal bonds, a 12% decline from January-March 2001 levels. However, we expect this situation may reverse itself in coming months, with several large deals already listed on state and city issuance calendars. For the same period, California saw strong supply, issuing \$8.1 billion in municipal debt, up 13% over the first quarter of 2001. Faced with some of the highest state income taxes in the nation, both California and New York investors continued to demonstrate robust demand for in-state bonds.

### HOW DID THE NUVEEN SELECT PORTFOLIOS PERFORM OVER THE PAST TWELVE MONTHS?

During the twelve months ended March 31, 2002, the Fed's policy of interest rate easing, combined with favorable market technicals, created a generally positive total return environment for municipal bonds. Individual results for the Nuveen Select Portfolios are presented in the accompanying table.

	MARKET YIELD	TOTAL RETURN ON NAV	LEHMAN TOTAL RETURN1	LIPPER AVERAGE2	
		1 YEAR ENDED 3/31/02	1 YEAR ENDED 3/31/02	1 YEAR ENDED 3/31/02

Past performance is not predictive of future results.

For additional information, see the individual Performance Overview for your Fund in this report.

Overall, the market environment of the past twelve months favored funds with longer durations<sup>4</sup>. As of March 31, 2002, the durations of the three national Portfolios ranged from 2.82 to 4.02, compared with 7.57 for the Lehman Brothers Municipal Bond Index, while NXC and NXN had durations of 2.97 and 4.00, respectively, versus 8.09 and 7.23 for the Lehman California and New York Tax-Exempt Bond Indexes. The relative performance of these Portfolios also was influenced by overall market activity, portfolio structure and the call exposure of individual holdings.

<sup>1</sup> The performance of the national Portfolios is compared with that of the Lehman Brothers Municipal Bond Index, an unleveraged index comprising a broad range of investment-grade municipal bonds. The performances of NXC and NXN are compared with those of the Lehman Tax-Exempt Bond Indexes for California and

## Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

New York, respectively. These unleveraged indexes comprise a broad range of municipal bonds within each of those states. Results for the Lehman indexes do not reflect any expenses.

- 2 The total returns of the national Portfolios are compared with the average annualized return of the twelve funds in the Lipper General and Insured Unleveraged Municipal Debt Funds category. NXC's total return is compared with the average total return of the nine funds in the Lipper California Municipal Debt Funds category, while the comparison for NXN is based on the average total return of the nine funds in the Lipper New York Municipal Debt Funds category. Portfolio and Lipper returns assume reinvestment of dividends.
- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Portfolio on an after-tax basis. For the national Portfolios, the taxable-equivalent yield is based on the portfoliomarket yield on the indicated date and a federal income tax rate of 30%, while the taxable-equivalent yields for NXC and NXN are based on their market yields on the indicated date and combined federal and state income tax rates of 36.5% and 35%, respectively.
- 4 Duration is a measure of a portfolio's NAV volatility in reaction to interest rate movements.

2

### HOW DID THE MARKET ENVIRONMENT AFFECT THE PORTFOLIOS' DIVIDENDS AND SHARE PRICES?

Over the twelve months ended March 31, 2002, relatively lower levels of bond call exposure helped us maintain the dividends of NXR and NXC. These two Portfolios have now provided shareholders with 13 consecutive months of stable dividends. For the remaining three Portfolios, however, increased pressure from call activity led to dividend cuts in September 2001.

Over the past year, several factors restricted demand for the Select Portfolios and weighed on their share prices, including the recent dividend adjustments and increased demand for leveraged tax-free fixed-income funds that might benefit more directly from the lower short-term interest rate environment. As a result, share prices for four of the five Portfolios declined, and all five Portfolios continued to trade at a discount (share price below NAV).

### WHAT KEY STRATEGIES WERE USED TO MANAGE THE NUVEEN SELECT PORTFOLIOS DURING THE YEAR ENDED MARCH 31, 2002?

While investing the proceeds from sales and bond calls over the past twelve months, we focused on identifying attractive bonds with the potential to support the Portfolios' long-term dividend-payment capabilities, enhance total return potential, and add value and diversification. In the national Portfolios, the healthcare sector, which has benefited from stabilizing finances, performed well. This sector remains an important strategic selection for us, providing the potential for attractive income as well as competitive total returns. We also emphasized economically sensitive sectors that we believed were poised for strong performance, such as transportation. In general, we looked for bonds that offered the best value in the 15-year to 18-year maturity range. In NXC and NXN, we found value in bonds with maturities of 25 years and at least 9 years of call protection that were trading at par or slight premiums in order to help sustain these Portfolios' cashflow.

In view of recent world events, maintaining strong credit quality also remained a primary area of emphasis. All three of the national Portfolios continued to

offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 59% to 66% as of March 31, 2002. As part of changes recently instituted in NXC and NXN, we have added a small number of noninsured AA and A bonds - 6% in NXC and 3% in NXN - to these two Portfolios. The balance of these Portfolios' assets remain invested in insured and/or U.S. guaranteed securities, giving them extremely high credit quality.

All five of the Select Portfolios mark their ten-year anniversaries in 2002 and have now entered the phase of their life cycles normally associated with increased call exposure. Potential calls for the remainder of 2002 range from 39% of NXN's portfolio to 65% in NXC. While NXR will continue to see a higher level of potential calls (13%) in 2003, the call exposure of the other four Portfolios drops off significantly next year (4%-8%). The number of actual calls experienced by the Portfolios will depend largely on market interest rates over the next 21 months. Our general approach has been to wait and see if the bonds will be called and then reinvest proceeds in bonds that can extend call protection and improve structure, ultimately trying to bring durations more in line with the benchmark averages.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THE NUVEEN SELECT PORTFOLIOS IN PARTICULAR?

In general, our outlook for the fixed-income markets over the next twelve months remains positive. The U.S. economy appears headed for a recovery, but one that we think will be characterized by a moderate rate of growth, with inflation and interest rates remaining low over the near term. Nationally, we believe new municipal supply should continue to be strong, and we expect issuance in California and New York to increase over 2001's high levels, as these states deal with budget deficits and the continued need to provide essential services. Given the current environment, we anticipate that much of 2002's issuance will be insured. We expect demand for tax-exempt municipal bonds to remain robust, as investors keep an eye on continued stock market fluctuations and look for ways to rebalance their portfolios and reduce risk.

The Nuveen Select Portfolios are specialized municipal bond investments that have in the past offered relatively modest amounts of active management and specific termination dates. Shareholders will vote this summer on provisions that would eliminate the termination dates and allow more dynamic, on-going management options. We expect that these changes (if approved) will help maintain portfolio integrity as we work past the Portfolios' 10-year marks and allow greater flexibility in making the normal portfolio adjustments necessitated by the increased call exposure associated with this period. In the meantime, the Portfolios are performing as expected and in line with their current management style.

Over the next twelve months, we will be looking to extend the Portfolios' effective durations while remaining focused on strategies that add value for our shareholders, provide support for dividends and total returns, and fully utilize Nuveen's experience and research expertise to adjust to changes in market conditions. Increased issuance, especially in California and New York, could provide greater selection and opportunities to enhance the Portfolios' yields and call protection. Overall, we believe the Nuveen Select Portfolios represent an important element of investors' long-range financial programs, providing dependable tax-free income as well as balance, diversification, and quality.

Bond surveillance - a HIGH PRIORITY at NUVEEN

The Enron scandal has raised numerous questions about the real value of American securities. Investors want to know what safeguards are in place to inspire their trust and ensure their holdings are dependable. The Nuveen Investor recently spoke with David Blair, Assistant Vice President and Senior Analyst at Nuveen, about the research and surveillance processes used for Nuveen funds.

HOW DO NUVEEN'S RESEARCH ANALYSTS EVALUATE BONDS PRIOR TO PURCHASE?

We evaluate factors impacting market sectors, issuers and specific bonds and assign credit ratings to bonds we consider for purchase. We seek to purchase bonds with stable and improving credit characteristics, which have attractive prices and yields relative to other bonds in their sectors.

HOW DO YOU CONDUCT YOUR RESEARCH?

We conduct detailed analyses that often involve site visits and discussions with managers of the projects being financed. Since Nuveen is a major investor with large buying power, issuers and project managers are willing to listen to us and respond to our concerns.

IS THE RESEARCH AND ANALYSIS PROCESS ANY DIFFERENT WHEN CONSIDERING HIGH-YIELD BONDS?

Up to 20 percent of some funds can be invested in below investment grade bonds to help the fund attain a higher yield. This underscores the need for research. If one of our 16 analysts believes a high-yield bond should be purchased, a second analyst reviews the issue as well.

HOW DO YOU MONITOR THE VARIOUS BONDS ONCE THEY'VE BEEN PURCHASED?

We have a proprietary database with information and analysis on the bonds Nuveen holds in its funds. Among other things, we are able to evaluate risk exposure to sectors, issuers and specific bonds on an on-going basis.

HOW DOES THE RESEARCH DEPARTMENT COMMUNICATE THE INFORMATION GATHERED?

We conduct biweekly meetings within the research department and weekly meetings with portfolio managers. We also write-up our findings and distribute them with "buy," "hold" or "sell" recommendations to portfolio managers.

IS IT time to rethink  
YOUR BOND STRATEGY?

Significant stock market losses in recent history have sent many investors toward bonds as a way to potentially cut their losses and balance equity-dominated portfolios. While many consider bonds a set-and-forget investment, there are several circumstances that might prompt you to reassess -- and perhaps revamp -- your bond holdings.

TAX BRACKET CHANGES

The Economic Growth and Tax Relief Reconciliation Act of 2001 has dropped tax brackets a percentage point this year, but a higher salary, large bonus, sale of assets or retirement may push you into a higher tax bracket for 2002.

If you are in a higher tax bracket and want to generate an income stream without raising your tax burden, tax-free municipal bonds may be a prudent option. Even if you are in a lower tax bracket, municipal bonds could make sense. The question is whether municipal or taxable bonds will deliver a better taxable yield.

RETIREMENT PLANS CHANGE

Whether you are near retirement or are currently enjoying it, you may want to consider rebalancing your retirement accounts with less stock and more bonds, to potentially reduce risk and try to preserve the assets that you have accumulated. If you are just entering retirement you may want to make tax-free municipal bonds a part of your portfolio to emphasize income generation and protection from taxation.

RISK TOLERANCE CHANGES

The recent market volatility and market downturn may have caused many investors to reevaluate their tolerance for risk. On the other hand, your portfolio might have performed well over the last few years and you may not need to take on extra risk to meet your long-term goals. In either situation you could take a look at your bond portfolio and determine whether you need to make changes to correspond with your tolerance for risk.

PORTFOLIO CHANGES

If you make significant changes to one or more of your investments, you'll want to look at your portfolio as a whole, particularly with regard to overall asset allocation. You may need to do some rebalancing to stay on track with your investment strategy.

Your financial advisor can help. Regardless of how your circumstances change, he

or she can provide up-to-date information on the bond market and various funds to help you decide how to maximize your returns consistent with your short- and long-term financial goals.

No investment is risk free and some investments carry more risk than others. It is important to know what the risks are, to evaluate them against any potential rewards, and to determine your tolerance for risk when selecting an investment.

to find solutions with

PROFESSIONAL ADVICE

For many investors, current financial markets are confusing and frustrating. According to research conducted for the Forum for Investor Advice\*, that's the number one reason many turn to a financial advisor. They want someone to suggest ideas and provide consultation, dialogue and professional advice.

Investors say their advisors are helpful in other key ways, including...

- o Saving time. After consultation, investors note that the second most important reason for using an advisor is to have someone else monitor their portfolio, reducing the amount of time they spend on investing.
- o Help in sorting through information. Investors in the 21st century have more products from which to choose than in the past. For example, there are approximately 8,000 mutual funds today, up from 3,000 in 1990.
- o Assistance in setting financial goals. According to investors who use a financial advisor, they are more likely to have a plan for a specific financial goal than do-it-yourself investors.
- o Staying focused. Advisor-assisted investors are more likely than do-it-yourself investors to have developed a comprehensive investment program.
- o Peace of mind. Investors say their comfort level in all types of markets is higher when using an advisor for a "second opinion" on an investment decision.

\*The survey of 324 investors was conducted in December of 2000 by Market Facts and analyzed by New York based Neuwirth Research. Of the 324, 166 said they had an ongoing relationship with a financial advisor, while 157 described themselves as do-it-yourselfers.

-----  
(continued from page 9)

HOW ARE PROBLEM BONDS IDENTIFIED AND HANDLED?

We conduct surveillance on our bonds on a regular basis to ensure, among other things, that deteriorating bonds are identified early. We then discuss any emerging problems and potential courses of action with the portfolio manager.

HOW MANY ISSUES DOES THE RESEARCH DEPARTMENT FOLLOW?

We follow 12 sectors and 1,500 uninsured bonds, worth about \$18 billion of Nuveen's \$45 billion in total municipal assets. The remaining \$27 billion in municipal assets are insured or escrowed (backed by Treasury bonds). For the insured bonds, we monitor closely on a regular basis the insurers guaranteeing the bonds.

WILL RESEARCH AND SURVEILLANCE CHANGE IN LIGHT OF PROBLEMS WITH ENRON SECURITIES?

Overall, our investment process and surveillance have worked well and been effective. However, we meet as a group on a regular basis and are constantly evaluating ways to improve the process to respond to issues and the market environment.

We have audited the accompanying statements of assets and liabilities, including the portfolios of investments, of Nuveen Select Tax-Free Income Portfolio, Nuveen Select Tax-Free Income Portfolio 2, Nuveen Select Tax-Free Income Portfolio 3, Nuveen California Select Tax-Free Income Portfolio, and Nuveen New York Select Tax-Free Income Portfolio as of March 31, 2002, and the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Trusts' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights. Our procedures included confirmation of investments owned as of March 31, 2002, by correspondence with the custodian and brokers or other auditing procedures when replies from brokers were not received. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial positions of Nuveen Select Tax-Free Income Portfolio, Nuveen Select Tax-Free Income Portfolio 2, Nuveen Select Tax-Free Income Portfolio 3, Nuveen California Select Tax-Free Income Portfolio, and Nuveen New York Select Tax-Free Income Portfolio at March 31, 2002, and the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended in conformity with accounting principles generally accepted in the United States.

Notes to  
FINANCIAL STATEMENTS

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The Trusts covered in this report and their corresponding New York Stock Exchange symbols are Nuveen Select Tax-Free Income Portfolio (NXP), Nuveen Select Tax-Free Income Portfolio 2 (NXQ), Nuveen Select Tax-Free Income Portfolio 3 (NXR), Nuveen California Select Tax-Free Income Portfolio (NXC) (formerly the Nuveen Insured California Select Tax-Free Income Portfolio) and Nuveen New York Select Tax-Free Income Portfolio (NXN) (formerly the Nuveen Insured New York Select Tax-Free Income Portfolio).

Each Trust seeks to provide stable dividends consistent with the preservation of capital, exempt from regular federal and designated state income taxes, where applicable, by investing primarily in a diversified portfolio of municipal obligations. The Trusts are registered under the Investment Company Act of 1940 as closed-end, diversified management investment companies.

The Trusts' investment adviser, Nuveen Institutional Advisory Corp. (the "Adviser"), a wholly owned subsidiary of The John Nuveen Company, administers the investments and maintains ongoing surveillance of such investments to ensure

that they continue to meet the Trusts' investment objectives and credit quality standards. The Adviser does not intend to adjust the portfolios except 1) to invest interest payments on municipal obligations that are not currently needed to pay dividends or expenses; 2) to reinvest principal payments on municipal obligations resulting from their maturity or early redemption; 3) to sell municipal obligations when the Adviser believes that continuing to hold them would be inconsistent with maintaining the Trusts' high credit quality, and to reinvest the proceeds of such sales; and 4) for certain other purposes.

The following is a summary of significant accounting policies followed by the Trusts in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

#### Securities Valuation

The prices of municipal bonds in each Trusts' investment portfolio are provided by a pricing service approved by the Trust's Board of Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Trusts may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

#### Securities Transactions

Securities transactions are recorded on a trade-date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. Any securities so purchased are subject to market fluctuation during this period. The Trusts have instructed the custodian to segregate assets in a separate account with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At March 31, 2002, Select Tax-Free (NXP), Select Tax-Free 2 (NXQ) and California Select Tax-Free (NXC) had outstanding delayed delivery and/or when-issued purchase commitments of \$16,495,682, \$4,145,724 and \$753,975, respectively. There were no such outstanding purchase commitments in either of the other Trusts.

#### Investment Income

Interest income is determined on the basis of interest accrued, adjusted for amortization of premiums and accretion of discounts on long-term debt securities for financial reporting purposes.

#### Income Taxes

Each Trust is a separate taxpayer for federal income tax purposes. Each Trust intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Trust intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, where applicable, to retain such tax-exempt status when distributed to shareholders of the Trusts. All monthly tax-exempt income dividends paid during the fiscal year ended March 31, 2002, have been designated Exempt Interest Dividends.

Notes to

FINANCIAL STATEMENTS (continued)

Dividends and Distributions to Shareholders

Tax-exempt net investment income is declared monthly as a dividend. Generally, payment is made or reinvestment is credited to shareholder accounts on the first business day after month-end. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to shareholders of tax-exempt net investment income, net realized capital gains and/or market discount are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

Derivative Financial Instruments

The Trusts are not authorized to invest in derivative financial instruments.

Custodian Fee Credit

Each Trust has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Trust's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

Change in Accounting Policy

As required, effective April 1, 2001, the Trusts have adopted the provisions of the new AICPA Audit and Accounting Guide for Investment Companies and began accreting taxable market discount on debt securities. Prior to April 1, 2001, the Trusts did not accrete taxable market discount on debt securities until they were sold. The cumulative effect of this accounting change had no impact on the total net assets or the net asset values of the Trusts, but resulted in an increase in the cost of securities and a corresponding decrease in net unrealized appreciation, based on securities held by the Trusts on April 1, 2001, as follows:

SELECT TAX-FREE (NXP)	SELECT TAX-FREE 2 (NXQ)	SELECT TAX-FREE 3 (NXR)	CALIFORNIA SELECT TAX-FREE (NXC)	NEW YORK SELECT TAX-FREE (NXN)
\$801,770	\$233,334	\$100,064	\$37,057	\$--

Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

The Statement of Changes in Net Assets and Financial Highlights for the prior periods have not been restated to reflect this change in presentation.

The effect of this change for the fiscal year ended March 31, 2002, was to increase investment income with a corresponding decrease in net unrealized appreciation as follows:

SELECT TAX-FREE (NXP)	SELECT TAX-FREE 2 (NXQ)	SELECT TAX-FREE 3 (NXR)	CALIFORNIA SELECT TAX-FREE (NXC)	NEW YORK SELECT TAX-FREE (NXN)

2. TRUST SHARES

There were no share transactions during the fiscal year ended March 31, 2002, nor during the fiscal year ended March 31, 2001, in any of the Trusts.

38

3. DISTRIBUTIONS TO SHAREHOLDERS

The Trusts declared dividend distributions from their tax-exempt net investment income which were paid May 1, 2002, to shareholders of record on April 15, 2002, as follows:

2008	--	538
Total	\$791,622	\$81,767

6. SURVEILLANCE AND ADMINISTRATION FEES AND OTHER TRANSACTIONS WITH AFFILIATES  
Under the Trusts' investment management agreements with the Adviser, each Trust pays an annual surveillance and administration fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets of each Trust as follows:

AVERAGE DAILY NET ASSETS	SELECT TAX-FREE (NXP)	NEW YORK SELECT TAX-FREE

Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

For the first \$125 million	.2500 of 1%	.3
For the next \$125 million	.2375 of 1	.2
For the next \$250 million	.2250 of 1	.2
For the next \$500 million	.2125 of 1	.2
For the next \$1 billion	.2000 of 1	.2
For net assets over \$2 billion	.1875 of 1	.2

=====

The fee compensates the Adviser for performing ongoing administration, surveillance and portfolio adjustment services. The Trusts pay no compensation directly to those of its Trustees who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Trusts from the Adviser or its affiliates.

(a) As required, effective April 1, 2001, the Trusts have adopted the provisions of the new AICPA Audit and Accounting Guide for Investment Companies and began accreting taxable market discount on debt securities. The effect of this change for the fiscal year ended March 31, 2002, was to increase net investment income per share with a corresponding decrease in net realized/unrealized investment gain (loss) per share and increase the ratio of net investment income to average net assets as follows:

	SELECT TAX-FREE (NXP)	SELECT TAX-FREE 2 (NXQ)	SELECT TAX-FREE 3 (NXR)	CALIFORNIA S TAX-FREE

Build Your Wealth

AUTOMATICALLY

NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

AN AMENDMENT TO THE PLAN

Under the current terms of the Plan, shares you acquire by reinvestment are purchased on the open market, whether the Fund's shares are then trading at a premium or discount to its net asset value. To ensure that shares will be acquired at the most favorable price, the Plan will be amended as of September 1, 2002. As of that date, the shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

## Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.
