Dear

SHAREHOLDER

Once again, I am pleased to report that over the most recent reporting period your Nuveen Select Portfolio has continued to provide you with attractive tax-free monthly income. For specific information about the performance of your Portfolio, please read the Portfolio Managers' Comments and Performance Overview sections of this report.

With interest rates at historically low levels, many have begun to wonder how fixed-income investments will perform if interest rates begin to rise. No one knows what the future will bring, which is why we think a well-balanced portfolio that is structured and carefully monitored with the help of an investment professional is an important component in achieving your long-term financial goals. A well-diversified portfolio may actually help to reduce your overall investment risk, and we believe that municipal bond investments like your Nuveen Portfolio can be important building blocks in a portfolio crafted to perform well through a variety of market conditions.

I'd also like to direct your attention to the inside front cover of this report, which explains the quick and easy process to begin receiving Portfolio reports like this via email and the internet. Many Nuveen Portfolio shareholders already have signed-up, and they are getting their information faster and more conveniently than ever. I urge you to consider joining them.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification, and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

Portfolio Managers'
COMMENTS

Portfolio managers Tom Spalding, Paul Brennan, Bill Fitzgerald and assistant portfolio manager Scott Romans review economic conditions, key investment strategies, and the recent performance of the Portfolios. A 27-year veteran of Nuveen, Tom has managed the national Portfolios since 1999. With 12 years of investment experience, Paul took management responsibility for the New York Portfolio (NXN) in January 2003. Bill and Scott, who have been with Nuveen for 15 years and 3 years, respectively, assumed portfolio management responsibility for the California Portfolio (NXC) in January 2003.

WHAT WERE THE MAJOR FACTORS AFFECTING THE NATIONAL ECONOMY AND MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

In a number of ways, underlying economic and market conditions at the national level have not changed significantly since our last shareholder report dated September 30, 2002. We believe the most influential factors shaping the U.S. economy and the municipal market continued to be the slow pace of economic growth and interest rates that remained at 40-year lows. In addition, continued geopolitical concerns also had an impact during this reporting period.

In the municipal market, the sluggish economic recovery and a general lack of inflationary pressures created conditions that helped many bonds perform well during the reporting period. After a record new issuance of \$357 billion in calendar year 2002, municipal bond new issue supply nationwide remained at very strong levels during the first quarter of 2003. Over the first three months of the year \$83.5 billion in new municipal securities were brought to market, up 22% over the same period in 2002. Coupled with this robust supply, demand for municipal bonds also remained strong over most of this reporting period, as many individual investors continued to seek tax-free income and increased diversification for their portfolios. Institutional investors, including traditional municipal bond purchasers such as property/casualty insurance companies as well as non-traditional purchasers such as hedge funds, arbitrage accounts, and pension funds, also were active buyers in the municipal market.

WHAT ABOUT SPECIFIC MARKET AND ECONOMIC CONDITIONS IN CALIFORNIA AND NEW YORK?

Municipal supply also continued to be very strong in California and New York, with \$50 billion and \$49 billion, respectively, of new bonds in calendar year 2002 and \$15.5 billion and \$9 billion, respectively, in the first quarter of 2003. Supply has been driven largely by increased spending needs, the low level of interest rates, and shortfalls in the tax receipts of both states. In December 2002, California announced a budget gap of \$35 billion for fiscal 2003-2004, the highest state deficit in the nation, while New York faces the second largest state shortfall (\$11.5 billion) over the same period. Following the announcement of the projected California deficit, Moody's, Standard & Poor's and Fitch downgraded that state's credit rating to A2/A/A from A1/A+/AA, respectively. New York's ratings of A2/AA/AA, respectively, were reconfirmed in March 2003, although Moody's lowered its outlook for the state to stable from positive in December 2002.

In California, proposals for dealing with the budget deficit include \$21 billion in spending cuts, \$6 billion in internal and external borrowings, and \$8 billion in tax increases, all of which must be approved by the state legislature. New York's proposed \$90.8 billion fiscal 2004 budget originally recommended closing the state's shortfall through expenditure reductions, gaming and fee increases, and the issuance of bonds backed by tobacco company payments. Since the governor is opposed to broad-based tax increases, various forms of deficit financing are under discussion as well, and the

2

state has indicated that without some form of such financing, it may face a cash crisis as 2003 unfolds.

On the economic front, both California and New York continue to struggle through slow and difficult recoveries. Job growth in California during 2002 was negligible, and a solid recovery in that state remains largely dependent on increased business spending, particularly reinvestment in new technologies, as

Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

well as on a strong global recovery, since 12% of the state economy is based on exports. The New York economy continued to be significantly impacted by declines in the financial sector, the national recession in manufacturing, tourism's lingering struggles, and increased security costs.

HOW DID THESE PORTFOLIOS PERFORM OVER THE TWELVE MONTHS ENDED MARCH 31, 2003?

Individual results for the Portfolios, as well as for appropriate benchmarks, are presented in the accompanying table.

	MARKET YIELD	TOTAL RETURN ON NAV	LEHMAN TOTAL RETURN ¹	LIPPER AVERAGE ²

For additional information, see the individual Performance Overview for your Portfolio in this report.

For the twelve months ended March 31, 2003, each of these Portfolios underperformed their respective Lehman index, and all except NXP underperformed its Lipper fund peer group average. Much of this underperformance relative to the Lehman indexes is attributable to the Portfolios' relatively short durations,⁴ which generally would be expected to constrain performance during periods of declining interest rates, such as that we experienced over much of the twelve-month period. For example, as of March 31, 2003, the durations of the three national Portfolios ranged from 4.86 to 5.56, compared with 7.93 for the Lehman Brothers Municipal Bond Index. The durations of NXC and NXN were 5.79 and 5.72, respectively, compared with 8.51 for the Lehman California index and 7.55 for the Lehman New York index.

Additionally, the California and New York Portfolios were at a disadvantage when compared with their Lipper fund group peers over the reporting period because, unlike most of the other funds, these Nuveen Portfolios do not employ leverage to enhance yields and returns. Leverage is a strategy that carries some risks, but generally works very well during periods of low short-term interest rates, as was the case through this reporting period. The California and New York Portfolios do not expose their shareholders to the risks of leverage, but are also unable to take advantage of its benefits when conditions are favorable.

Beyond duration and leverage, the relative performances of these Portfolios also were influenced by factors such as call exposure, portfolio trading activity, and the price movement of specific sectors and holdings. For example, the total return performance of the national Portfolios was impacted by their holdings of airline-backed bonds. Over the twelve-month period, the market value of most airline-backed bonds fell, due in part to declining passenger volume and in part

Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

to the market impact of United Air Lines' bankruptcy filing in December 2002. As of March 31, 2003, the three national Portfolios each held about 1% (par value) of their portfolios in bonds issued for facilities at Chicago's O'Hare International Airport and backed by United. Over the period ended March 31, 2003, these bonds depreciated to 10 cents on the dollar from 61 cents, translating to approximately 50 basis point decrease in total return performance.

HOW DID THE MARKET ENVIRONMENT AFFECT THE PORTFOLIOS' DIVIDENDS AND SHARE PRICES?

The Select Portfolios all passed their ten-year anniversaries between March and July 2002, and continued to experience the increased number of bond calls that often are associated with this part of a Fund's life cycle. The reinvestment of proceeds from called bonds into issues paying lower current yields necessitated several dividend adjustments. During the twelve months ended March 31, 2003, NXP, NXR, NXQ, and NXC each saw three dividend reductions, while NXN had two dividend cuts.

- 1 The total annual returns on common share net asset value (NAV) for the national Portfolios are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged index comprising a broad range of investment-grade municipal bonds. The annual returns of NXC and NXN are compared with those of the Lehman Tax-Exempt Bond indexes for California and New York, respectively. These unleveraged indexes comprise a broad range of municipal bonds within each of those states. Results for the Lehman indexes do not reflect any expenses.
- 2 The total returns of the national Portfolios are compared with the average annualized return of the 9 funds in the Lipper General and Insured Unleveraged Municipal Debt Funds category. NXC's total return is compared with the average total return of the 25 funds in the Lipper California Municipal Debt Funds category, while the comparison for NXN is based on the average total return of the 17 funds in the Lipper New York Municipal Debt Funds category. Portfolio and Lipper returns assume reinvestment of dividends.
- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen portfolio on an after-tax basis. For the national Portfolios, the taxable-equivalent yield is based on the portfolio's market yield on the indicated date and a federal income tax rate of 30%, while the taxable-equivalent yields of NXC and NXN are based on their market yields on the indicated date and combined federal and state income tax rates of 36.5% and 35%, respectively.
- 4 Duration is a measure of a portfolio's NAV volatility in reaction to interest rate movements.

Over the course of this twelve-month period, the share prices of all five Portfolios were affected by a general weakening of bond prices in late 2002, as well as by their dividend adjustments. Overall, NXP was the only Portfolio to finish March 2003 with a share price higher than that of a year earlier. As of March 31, 2003, all five Portfolios continued to trade at discounts to their common share net asset values (see charts on individual Performance Overview pages).

Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

WHAT KEY STRATEGIES WERE USED TO MANAGE THE SELECT PORTFOLIOS DURING THE PERIOD ENDED MARCH 31, 2003?

Following last year's shareholder vote that eliminated the Portfolios' termination dates and allowed increased flexibility in portfolio management, the Portfolios have continued their transition to more a more dynamic, longer-term oriented investment approach. As a result, our fundamental management strategies over the twelve-month period have focused on diversifying holdings, enhancing call protection, and lengthening the Portfolios' durations. Given the recent steepness of the municipal yield curve, we sought value in bonds that mature in 15 to 20 years. In many cases, bonds in this part of the yield curve were offering yields similar to those of longer-term bonds but, in our opinion, with less inherent interest rate risk. The purchase of these long-intermediate bonds helped to lengthen the duration of each of the Portfolios, allowing them to offer more competitive yields and returns while still providing them with a level of price defensiveness in the event of a rise in interest rates.

Although lengthening duration can result in increased interest rate risk, we believe the overall risk profile of these Portfolios remained moderate when compared with many other longer-term bond investments. One of the ways we're trying to control risk is by placing an emphasis on credit quality. As of March 31, 2003, each of the Portfolios continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 72% to 100%. In general, our weightings in higher quality and insured bonds benefited the performance of the Portfolios during the twelve-month period.

Over the period, heavy issuance in the municipal market provided us with increased opportunities to purchase the types of bond structures we favor and helped us find individual issues that we believe can perform well regardless of the future direction of interest rates. In the national Portfolios, we found good opportunities in the healthcare sector and also added AA and A rated utilities bonds, such as those issued by the Sam Rayburn Municipal Power Agency in Texas. In general, the national Portfolios are well diversified geographically, and we took advantage of the strong issuance to add bonds from states such as Arizona, Florida, Texas and Illinois.

In NXC, we also remained heavily weighted in the healthcare sector, where we believe credit spreads have been wider than warranted. We also increased our weighting in education bonds, one of the top performing groups among the Lehman revenue sectors for the reporting period. Over the past two years, in anticipation of a worsening state budget deficit, we sold a number of California general obligation bonds (GOs). As previously mentioned, California's struggle with the largest deficit in the nation led to a recent credit rating downgrade by the major rating agencies. Although California GOs have significantly underperformed the market in the recent past, NXC was relatively protected from the impact. Currently, we have begun to rebuild a position in California GOs, as we believe spreads have widened to the point that these bonds represent an opportunity to add yield at attractive prices.

In addition to focusing on lengthening duration, a major goal of the New York Select Portfolio (NXN) over the period was to successfully work through bond calls affecting almost 40% of the Portfolio's holdings. When reinvesting these proceeds, we emphasized investments in highly-rated and insured bonds, particularly in the area of essential services such as education bonds and water and sewer issues.

As of March 31, 2003, each of the Select Portfolios held a portion of its assets in bonds backed by

the master tobacco settlement agreement of 1998. Recently, the increased issuance of tobacco bonds by states facing budget problems as well as pending court cases against the tobacco companies weakened the prices of such bonds and drove up issuing costs. Although both California and New York plan to issue additional tobacco bonds to help close their budget gaps, current market conditions have delayed these plans. Since the sector as a whole produced positive returns over the period, our present strategy is to maintain our current holdings of tobacco bonds while we continue to monitor developments.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THE PORTFOLIOS IN PARTICULAR?

In general, our outlook for the municipal market remains positive. Despite the uncertainty that preceded the Iraqi conflict, much of the impact of this war was priced into the fixed income markets prior to its onset. We continue to believe the U.S. economy is slowly heading for an eventual recovery, but a recovery that may be less robust than some originally anticipated. We also expect that inflation and interest rates will continue to be relatively low over the near term.

Nationally, new municipal issuance volume should remain strong, as issuers continue to take advantage of the low rate environment. Given the budget deficits in both California and New York and their continued need for spending on infrastructure and essential services, we expect to see significant issuance of new municipal debt in both of these states. Demand for tax-exempt municipal bonds also should remain solid, as investors continue to look for ways to rebalance their portfolios and reduce overall investment risk.

During the remainder of 2003, the Portfolios will continue to work their way through their still considerable call exposure. As of March 31, 2003, the percentage of bonds eligible for calls in 2003 ranged from 7% to 29%. Given the likely reinvestment at current low rates, this could continue to put pressure on the Portfolios' dividends during this period. However, beginning in 2004 and looking out to 2007, the call exposure of these Portfolios drops off significantly.

In coming months, we also will continue to focus on transitioning the Portfolios and working through their call exposure. As part of this process, we expect durations to continue to lengthen modestly as we add bonds from the long-intermediate part of the yield curve. We also plan to focus closely on the general credit environment, monitor the progress toward resolution of the California and New York budget deficits, and keep a watch on the direction of interest rates and inflation. If state governments continue to experience budgetary pressures, this could present an opportunity to increase our weightings in general obligation bonds and other tax-backed issues in anticipation of stronger long-term performance as the economic growth becomes more apparent. We also expect to see a drop in the Portfolios' allocations of prerefunded bonds over the next twelve months, since we plan in a number of cases to capture the appreciation in these bonds by selling them at a premium and then redeploying the proceeds into securities that we believe present better long-term potential. In general, we will continue to concentrate on strategies that can add value for our shareholders and provide support for the Portfolios' long-term dividend-paying capabilities.

We believe that the Portfolios can serve as a source of attractive tax-free income and diversification as well as a way to invest in municipal entities - and the public purposes and taxing power they represent. Overall, therefore, we remain convinced that these Portfolios are good investments and that they will continue to benefit shareholders in the months ahead.

We have audited the accompanying statements of assets and liabilities, including the portfolios of investments, of Nuveen Select Tax-Free Income Portfolio, Nuveen Select Tax-Free Income Portfolio 2, Nuveen Select Tax-Free Income Portfolio 3, Nuveen California Select Tax-Free Income Portfolio, and Nuveen New York Select Tax-Free Income Portfolio as of March 31, 2003, and the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Trusts' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights. Our procedures included confirmation of investments owned as of March 31, 2003, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial positions of Nuveen Select Tax-Free Income Portfolio, Nuveen Select Tax-Free Income Portfolio 2, Nuveen Select Tax-Free Income Portfolio 3, Nuveen California Select Tax-Free Income Portfolio, and Nuveen New York Select Tax-Free Income Portfolio at March 31, 2003, and the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended in conformity with accounting principles generally accepted in the United States.

Notes to
FINANCIAL STATEMENTS

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The Trusts covered in this report and their corresponding Common share New York Stock Exchange symbols are Nuveen Select Tax-Free Income Portfolio (NXP), Nuveen Select Tax-Free Income Portfolio 2 (NXQ), Nuveen Select Tax-Free Income Portfolio 3 (NXR), Nuveen California Select Tax-Free Income Portfolio (NXC) and Nuveen New York Select Tax-Free Income Portfolio (NXN). The Trusts are registered under the Investment Company Act of 1940, as amended, as closed-end, diversified management investment companies.

Each Trust seeks to provide stable dividends consistent with the preservation of capital, exempt from regular federal and designated state income taxes, where applicable, by investing primarily in a diversified portfolio of municipal obligations.

The following is a summary of significant accounting policies followed by the Trusts in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Trust's investment portfolio are provided by a pricing service approved by the Trusts' Board of Trustees. When price quotes are not readily available (which is usually the case for municipal

securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Trusts, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. Any securities so purchased are subject to market fluctuation during this period. The Trusts have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At March 31, 2003, New York Select Tax-Free (NXN) had an outstanding when-issued purchase commitment of \$786,863. There were no such outstanding purchase commitments in any of the other Trusts.

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Income Taxes

Each Trust is a separate taxpayer for federal income tax purposes. Each Trust intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Trust intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, where applicable, to retain such tax-exempt status when distributed to shareholders of the Trusts.

Dividends and Distributions to Shareholders

Dividends from tax-exempt net investment income are declared and paid monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards. All monthly tax-exempt income dividends paid during the fiscal year ended March 31, 2003, have been designated Exempt Interest Dividends.

Distributions to shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with

Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

Derivative Financial Instruments

The Trusts are not authorized to invest in derivative financial instruments.

Custodian Fee Credit

Each Trust has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Trust's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

2. TRUST SHARES

None of the Trusts engaged in transactions in their own shares during the fiscal year ended March 31, 2003, nor during the fiscal year ended March 31, 2002.

3. SECURITIES TRANSACTIONS

FINANCIAL STATEMENTS (continued)

5. SURVEILLANCE AND ADMINISTRATION FEES AND OTHER TRANSACTIONS WITH AFFILIATES

Under the Trusts' investment management agreements with Nuveen Institutional Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc. (formerly, The John Nuveen Company), each Trust pays an annual surveillance and administration fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets of each Trust as follows:

AVERAGE DAILY NET ASSETS	SELECT TAX-FREE (NXP)	SELECT TAX-FREE CALIFORNIA SELECT TAX-FREE NEW YORK SELECT TAX-FREE
For the first \$125 million	.2500%	
For the next \$125 million	.2375	

Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

For the next \$250 million	.2250
For the next \$500 million	.2125
For the next \$1 billion	.2000
For net assets over \$2 billion	.1875

The fee compensates the Adviser for performing ongoing administration, surveillance and portfolio adjustment services. The Trusts pay no compensation directly to those of its Trustees who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Trusts from the Adviser or its affiliates.

6. INVESTMENT COMPOSITION

At March 31, 2003, the revenue sources by municipal purpose, expressed as a percent of total investments, were as follows:

	SELECT TAX-FREE (NXP)	SELECT TAX-FREE 2 (NXQ)	SELECT TAX-FREE 3 (NXR)	CALIFORNIA SELECT TAX-FREE (NXC)

Certain investments owned by the Trusts are covered by insurance issued by several private insurers or are backed by an escrow or trust containing U.S. Government or U.S. Government agency securities, both of which ensure the timely payment of principal and interest in the event of default (51% for Select Tax-Free (NXP), 55% for Select Tax-Free 2 (NXQ), 36% for Select Tax-Free 3 (NXR), 71% for California Select Tax-Free (NXC), and 62% for New York Select Tax-Free (NXN)). Such insurance or escrow, however, does not guarantee the market value of the municipal securities or the value of any of the Trusts' shares.

For additional information regarding each investment security, refer to the Portfolio of Investments of each Trust.

Trustees
AND OFFICERS

The management of the Fund, including general supervision of the duties performed for the Fund under the management agreement between Nuveen Advisory and the Fund, is the responsibility of the Board of Trustees of the Fund. The number of trustees of the Fund is currently set at seven. None of the trustees who are not "interested" persons of the Fund has ever been a director or employee of, or consultant to, Nuveen or its affiliates. The names and business addresses of the trustees and officers of the Fund, their principal occupations and other affiliations during the past five years, the number of portfolios each oversees and other directorships they hold are set forth below.

Build Your Wealth
AUTOMATICALLY

SIDEBAR TEXT: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These

commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

POLICY CHANGE

On November 14, 2002, the Board adopted a policy that allows these Funds, in addition to investments in municipal bonds, to invest up to 5% of its net assets (including assets attributable to preferred shares, if any) in tax-exempt or taxable fixed-income securities or equity securities for the purpose of acquiring control of an issuer whose municipal bonds (a) the Fund already owns and (b) have deteriorated or are expected shortly to deteriorate significantly in credit quality, provided Nuveen Advisory determines that such investment should enable the Fund to better maximize the value of its existing investment in such issuer. This policy is a non-fundamental policy of each Fund which means that it can be changed at any time by the Board of Trustees without vote of the shareholders.

GLOSSARY OF TERMS USED IN THIS REPORT

Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

Average Duration: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change.

Average Effective Maturity: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

Market Yield (also known as Dividend Yield or Current Yield): An investment's current annualized dividend divided by its current market price.

Net Asset Value (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

Taxable-Equivalent Yield: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

Each Fund intends to repurchase shares of its own common stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the twelve-month period ended March 31, 2003. Any future repurchases will be reported to shareholders in the next annual or semiannual report.

Since 1898, financial advisors and their clients have relied on Nuveen Investments to provide dependable investment solutions. For the past century, Nuveen Investments has adhered to the belief that the best approach to investing is to apply conservative risk-management principles to help minimize volatility.

Building on this tradition, we today offer a range of high quality equity and fixed income solutions that are integral to a well-diversified core portfolio. Our clients have come to appreciate this diversity, as well as our continued adherence to proven, long-term investing principles.

A premier asset management firm managing \$80 billion in assets, Nuveen Investments offers access to a number of different asset classes and investing solutions through a variety of products. Nuveen Investments markets its capabilities under four distinct brands: Nuveen, a leader in tax-free investments; NWQ, a leader in value-style equities; Rittenhouse, a leader in growth-style equities; and Symphony, a leading institutional manager of market-neutral alternative investment portfolios.

To learn more about the products and services Nuveen Investments offers and for a prospectus, where applicable, talk to your financial advisor, or call us at (800) 257-8787. Please read the information carefully before you invest.
