Sidebar text: WE THINK YOUR NUVEEN FUND CAN BE AN IMPORTANT BUILDING BLOCK IN A PORTFOLIO DESIGNED TO PERFORM WELL THROUGH A VARIETY OF MARKET CONDITIONS.

Dear  
SHAREHOLDER

I am very pleased to report that for the six-month period ended September 30, 2003, your Nuveen Portfolio continued to provide you with attractive monthly tax-free income.

While a number of different Portfolios are covered in this report, each is managed with the same value investing strategy that puts an emphasis on finding securities that we think are undervalued or underrated. We believe that there are always some municipal bonds that the market is not properly valuing, and that by using a consistent, research-oriented management approach we have the opportunity to find them for your Portfolio.

We think this is true even with interest rates at the relatively low levels we've seen over much of the past year. In this low-rate environment, many have begun to wonder whether interest rates will soon start to rise, and whether that possibility should cause them to adjust their holdings of fixed-income investments. We believe that by constructing a carefully balanced portfolio with the help of a trusted investment professional you may be able to reduce your overall investment risk and give yourself a better chance to meet your financial goals. We think that municipal bond investments like your Nuveen Portfolio can be important building blocks in a portfolio designed to perform well through a variety of market conditions.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification, and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

/s/ Timothy R. Schwertfeger

Portfolio Managers'  
COMMENTS

## Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-CSRS

Portfolio managers Tom Spalding, Scott Romans, and Paul Brennan discuss economic and market conditions, key investment strategies, and the recent performance of the Portfolios. A 27-year veteran of Nuveen, Tom has managed the NXP, NXQ and NXR since 1999. Scott, who joined Nuveen in 2000, assumed management responsibility for the California Portfolio (NXC) in January 2003, the same time that Paul, who has more than 12 years of investment experience, took over management of the New York Portfolio (NXN).

### WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE 12-MONTH PERIOD ENDED SEPTEMBER 30, 2003?

Over the 12-month period, the two greatest influences on the general economy and the municipal market continued to be historically low interest rates and the slow pace of economic improvement. In June 2003, the Federal Reserve cut the fed funds rate to 1%, the lowest level since 1958. Much of the recent concern about economic recovery centered on the weak labor market--as of September 2003, U.S. unemployment was 6.1%, up from 5.7% 12 months earlier. At the same time, inflation remained dormant, with the 12-month advance in the core rate dropping to 1.2% in September.

The slow rate of economic recovery, low interest rates, and lack of inflationary pressures helped many municipal bonds perform well over the majority of this reporting period. During the summer of 2003, however, stronger-than-expected economic data temporarily precipitated a spike in bond yields and a corresponding drop in bond prices that impacted overall results across all fixed-income markets, for the 12-month period ended September 30, 2003.

During January-September 2003, municipal supply nationally remained robust, with \$287 billion in new bonds--up 13% over the same period in 2002.

### HOW WERE ECONOMIC AND MARKET CONDITIONS IN CALIFORNIA AND NEW YORK?

Over the past 12 months, both California and New York continued to struggle with budgetary stresses. California faced a \$38 billion budget deficit--the largest in state history--and the much publicized governor recall election. Although the state managed to close the fiscal 2004 budget gap with borrowing, spending cuts, and a number of one-time measures, California still has to contend with expenditures that are greater than recurring revenues.

In the California municipal market, new supply in the state totaled \$47 billion, up 60% over the same period in 2002, making California the largest state issuer in the nation. Delays in budget approval, the sizable deficit, and the uncertainty created by the recall effort also led to several downgrades of California's general obligation debt over the past 12 months. As of September 2003, the state was rated A3/BBB, by Moody's and Standard & Poor's, respectively.

Over the 12-month period, both New York State and New York City continued to struggle with budget problems triggered by the national recession, weak financial markets, a drop in revenues from personal income and capital gains taxes, and a decline in tourism. The final state budget for fiscal 2004, which totaled \$92.8 billion, was balanced through a combination of borrowing, spending cuts, and increased taxes and fees. New York City managed to keep its

## Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-CSRS

budget balanced through expenditure reductions, aid from the state and federal governments, borrowing through the Transitional Finance Authority (TFA), and increased property taxes.

During the first nine months of 2003, municipal issuance in New York totaled \$30 billion, a 19% decrease from the same period in 2002. As of September 2003, New York State's credit rating was A2/AA by Moody's and S&P respectively, while New York City was rated A2 with a declining outlook by Moody's and A with a negative outlook by S&P.

### HOW DID THE PORTFOLIOS PERFORM OVER THIS REPORTING PERIOD?

Individual results for these Portfolios, as well as for relevant benchmarks, are presented in the accompanying table.

For additional information, see the individual Performance Overview for your Portfolio in this report.

For the 12 months ended September 30, 2003, all of the Select Portfolios outperformed their respective Lipper peer group averages. In addition, NXP, NXR, and NXC also outperformed their respective Lehman Brothers indexes, while NXQ and NXN generally performed in line with the national Lehman and Lehman New York indexes, respectively. As of September 30, 2003, the average durations<sup>4</sup> of the three national Portfolios ranged from 5.12 to 5.69, compared with 8.19 for the Lehman Brothers Municipal Bond Index. NXC and NXN had durations of 5.87 and 5.63, respectively, compared with 9.02 for the Lehman California index and 7.78 for the Lehman New York index. These durations provided some protection for the Portfolios as interest rates rose during the summer of 2003, since investments with shorter durations generally would be expected to outperform those with longer durations during periods of rising interest rates, all other factors being equal.

In addition to duration, factors such as call exposure, portfolio trading activity, and the price movement of specific sectors and holdings also had an impact on the Portfolios' relative performances during this period. For example, because investors on the whole tended to be somewhat risk-averse over the past 12 months, insured and higher quality issues were in greater demand, and these bonds generally performed better than their BBB and non-rated counterparts during this period. The Select Portfolios held relatively few of the lower-rated credits, with allocations of BBB bonds ranging from 1% in NXN to 11% in NXQ as of September 30, 2003, which helped the Portfolios' performances over this

period.

HOW DID THE MARKET ENVIRONMENT AFFECT THE PORTFOLIOS' DIVIDENDS AND SHARE PRICES?

Over the 12-month period ended September 30, 2003, the Select Portfolios continued to experience a significant number of bond calls. Consequently, they were faced with reinvesting call proceeds from higher-coupon bonds into a market where

- 1 The total annual returns on common share net asset value (NAV) for the national Portfolios are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged, unmanaged index comprising a broad range of investment-grade municipal bonds. The annual returns of NXC and NXN are compared with those of the Lehman Tax-Exempt Bond indexes for California and New York, respectively. These unleveraged, unmanaged indexes comprise a broad range of municipal bonds within each of those states. Results for the Lehman indexes do not reflect any expenses.
- 2 The total returns of the national Portfolios are compared with the average annualized return of the 9 funds in the Lipper General and Insured Unleveraged Municipal Debt Funds category. NXC's total return is compared with the average return of the 29 funds in the Lipper California Municipal Debt Funds category, while the comparison for NXN is based on the average total return of the 21 funds in the Lipper New York Municipal Debt Funds category. Portfolio and Lipper returns assume reinvestment of dividends.
- 3 Taxable-equivalent yield represents the yield that must be earned on a taxable investment, other than an investment that generates qualified dividend income that is taxable at the maximum rate of 15%, in order to equal the yield of the Nuveen Fund on an after-tax basis. It is calculated using the current market yield and a federal income tax rate of 28% for the national portfolios. The rate shown for federal and state highlights the added value of owning shares that are also exempt from state income taxes. It is based on a combined federal and state income tax rate of 34.5% and 33.5%, respectively, for NXC and NXN.
- 4 Duration is a measure of a Portfolio's NAV volatility in reaction to interest rate movements.

3

interest rates remained historically low. This led to a reduction of the Portfolios' earning power and necessitated three dividend cuts in NXP, NXQ, and NXC, two in NXR, and one in NXN over this period.

Increased volatility in the fixed-income markets during the summer of 2003 led to an overall weakening of bond prices. The Portfolios' share prices and NAVs finished this 12-month period lower than they had been at the beginning. As of September 30, 2003, the three national Portfolios and NXN continued to trade at discounts to their common share NAVs, while NXC had moved from trading at a premium to a discount (see charts on individual Performance Overview pages).

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE PORTFOLIOS DURING THE FISCAL YEAR ENDED SEPTEMBER 30, 2003?

Over this 12-month reporting period, we continued to place strong emphasis on

## Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-CSRS

diversifying the portfolios, improving call protection, and enhancing dividend-paying capabilities. One of our primary strategies focused on managing the Funds' durations in order to enhance our ability to mitigate interest rate risk and produce potentially more consistent returns over time. Interest rate risk is the risk that the value of a Fund's portfolio will decline when market interest rates rise. The longer the duration of a Fund's portfolio, the greater its interest rate risk.

In order to manage the Portfolios' durations, the majority of our purchase activity focused on value opportunities in the intermediate part of the yield curve (i.e., bonds that mature in 15 to 20 years). In many cases, bonds in this part of the curve offered yields similar to those of longer-term bonds but, in our opinion, has less interest rate risk.

Given the current geopolitical and economic climate, we continued to believe that maintaining strong credit quality remains a vital requirement. As of September 30, 2003, the Nuveen Select Portfolios offered excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 71% to 79% in the three national Portfolios. NXC and NXN, which continued to make the transition from insured to non-insured Portfolios, have selectively added uninsured bonds over the past 12 months, but continued to hold 71% and 83%, respectively, in the AAA/U.S. guaranteed category.

### WHAT IS YOUR OUTLOOK FOR BOND CALL IN THE PORTFOLIOS?

Looking ahead at potential bond calls, the Select Portfolios have exposure ranging from 12% in NXN to 26% in NXC through 2004. During this reporting period, we worked to mitigate the Portfolios' call risk. In 2005, the Portfolios' call exposure will drop off significantly, ranging from zero in NXR and NXC to 8% in NXN. The number of actual calls in all of the Portfolios will depend largely on market interest rates in coming months. In general, our approach was to hold callable bonds until they were in fact called and then reinvest the proceeds in credits that could help to extend durations and support the Portfolios' yields, especially as rates rose during the summer.

1 Taxable-equivalent yield represents the yield that must be earned on a taxable investment, other than an investment that generates qualified dividend income that is taxable at a maximum rate of 15%, in order to equal the yield of the Nuveen Fund on an after-tax basis. It is calculated using the current market yield and a federal income tax rate of 28%.

2 The Fund also paid shareholders capital gains and net ordinary income distributions in December 2002 of \$0.0659 per share.

\* Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates.

\*\* Ratings: Using the higher of Standard & Poor's or Moody's rating.

\*\*\* Securities are backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensures the timely payment of principal and interest. Such securities are normally considered to be equivalent to AAA rated securities.

# On December 9, 2002, UAL Corporation, the holding company of United Air Lines, Inc. filed for federal bankruptcy protection. The Adviser determined that it was likely United would not remain current on their interest payment obligations with respect to these bonds and thus has stopped accruing interest.

N/R Investment is not rated.

(WI) Security purchased on a when-issued basis.

+ Security has a maturity of more than one year, but has variable rate and demand features which qualify it as a short-term security. The rate disclosed is that currently in effect. This rate changes periodically based on market conditions or a specified market index.

FINANCIAL STATEMENTS (Unaudited)

## 1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The Trusts covered in this report and their corresponding Common share New York Stock Exchange symbols are Nuveen Select Tax-Free Income Portfolio (NXP), Nuveen Select Tax-Free Income Portfolio 2 (NXQ), Nuveen Select Tax-Free Income Portfolio 3 (NXR), Nuveen California Select Tax-Free Income Portfolio (NXC) and Nuveen New York Select Tax-Free Income Portfolio (NXN). The Trusts are registered under the Investment Company Act of 1940, as amended, as closed-end, diversified management investment companies.

Each Trust seeks to provide stable dividends consistent with the preservation of capital, exempt from regular federal and designated state income taxes, where applicable, by investing primarily in a diversified portfolio of municipal obligations.

The following is a summary of significant accounting policies followed by the Trusts in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

### Securities Valuation

The prices of municipal bonds in each Trust's investment portfolio are provided by a pricing service approved by the Trust's Board of Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Trusts, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

### Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Trusts have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At September 30, 2003, Select Tax-Free (NXP) and Select Tax-Free 3 (NXR) each had outstanding

when-issued purchase commitments of \$489,430. There were no such outstanding purchase commitments in any of the other Trusts.

#### Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

#### Income Taxes

Each Trust is a separate taxpayer for federal income tax purposes. Each Trust intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Trust intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, where applicable, to retain such tax-exempt status when distributed to shareholders of the Trusts.

#### Dividends and Distributions to Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

36

Distributions to shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States.

#### Derivative Financial Instruments

The Trusts are not authorized to invest in derivative financial instruments.

#### Custodian Fee Credit

Each Trust has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Trust's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

#### Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

## 2. TRUST SHARES

None of the Trusts engaged in transactions in their own shares during the six months ended September 30, 2003, nor during the fiscal year ended March 31,

4. INCOME TAX INFORMATION

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to timing differences in recognizing income on taxable market discount securities and timing differences in recognizing certain gains and losses on security transactions.

At September 30, 2003, the cost of investments were as follows:

	SELECT TAX-FREE (NXP)	SELECT TAX-FREE 2 (NXQ)	SELECT TAX-FREE 3 (NXR)	CALIFORNIA SELECT TAX-FREE (NXC)

=====				

\* Net ordinary income consists of taxable market discount income and net short-term capital gains, if any.

5. MANAGEMENT FEE AND OTHER TRANSACTIONS WITH AFFILIATES

Under the Trusts' investment management agreements with Nuveen Institutional Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc., each Trust pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets of each Trust

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Trusts pay no compensation directly to those of its Trustees who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Trusts from the Adviser or its affiliates.

6. INVESTMENT COMPOSITION

At September 30, 2003, the revenue sources by municipal purpose, expressed as a percent of total investments, were as follows:

Certain investments owned by the Trusts are covered by insurance issued by several private insurers or are backed by an escrow or trust containing U.S. Government or U.S. Government agency securities, both of which ensure the timely payment of principal and interest in the event of default (56% for Select Tax-Free (NXP), 56% for Select Tax-Free 2 (NXQ), 38% for Select Tax-Free 3 (NXR), 69% for California Select Tax-Free (NXC), and 62% for New York Select Tax-Free (NXN)). Such insurance or escrow, however, does not guarantee the

market value of the municipal securities or the value of any of the Trusts' shares.

For additional information regarding each investment security, refer to the Portfolio of Investments of each Trust.

#### Build Your Wealth AUTOMATICALLY

Sidebar text: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

#### NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

#### EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

#### HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

#### FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash

## Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-CSRS

payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

GLOSSARY OF TERMS USED IN THIS REPORT

**Average Annual Total Return:** This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

**Average Duration:** Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change.

**Average Effective Maturity:** The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

**Market Yield (also known as Dividend Yield or Current Yield):** An investment's current annualized dividend divided by its current market price.

**Net Asset Value (NAV):** A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

**Taxable-Equivalent Yield:** The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

-----

Each Fund intends to repurchase shares of its own common stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the period ended September 30, 2003. Any future repurchases will be reported to shareholders in the next annual or semiannual report.
