

Air Transport Services Group, Inc.
Form 10-Q
November 07, 2011

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(D)
OF THE SECURITIES EXCHANGE ACT OF 1934
For Quarterly Period Ended September 30, 2011
Commission file number 000-50368

(Exact name of registrant as specified in its charter)

Delaware (State of Incorporation) 145 Hunter Drive Wilmington, OH 45177 (Address of principal executive offices) 937-382-5591 (Registrant's telephone number, including area code)	26-1631624 (I.R.S. Employer Identification No.)
--	--

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO
Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulations S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer <input type="checkbox"/>	Accelerated filer <input checked="" type="checkbox"/>
Non-accelerated filer <input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company <input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). YES NO
As of November 7, 2011, Air Transport Services Group, Inc. had outstanding 64,069,154 shares of common stock, par value \$0.01.

FORWARD LOOKING STATEMENTS

Statements contained in this quarterly report on Form 10-Q that are not historical facts are considered forward-looking statements (as that term is defined in the Private Securities Litigation Reform Act of 1995). Words such as “projects,” “believes,” “anticipates,” “will,” “estimates,” “plans,” “expects,” “intends” and similar words and expressions are intended to identify forward-looking statements. These forward-looking statements are based on expectations, estimates and projections as of the date of this filing, and involve risks and uncertainties that are inherently difficult to predict. Actual results may differ materially from those expressed in the forward-looking statements for any number of reasons, including those described in this report and in our 2010 Annual Report filed on Form 10-K with the Securities and Exchange Commission.

Filings with the Securities and Exchange Commission

The Securities and Exchange Commission maintains an Internet site that contains reports, proxy and information statements and other information regarding Air Transport Services Group, Inc. at www.sec.gov. Additionally, our filings with the Securities and Exchange Commission, including annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to these reports, are available free of charge from our website at www.atsginc.com as soon as reasonably practicable after filing with the SEC.

AIR TRANSPORT SERVICES GROUP, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2011

The condensed consolidated financial statements and related notes contained in this report should be read in conjunction with the audited financial statements and the related notes contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2010.

NOTE A—SUMMARY OF FINANCIAL STATEMENT PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations

Air Transport Services Group, Inc. is a holding company whose principal subsidiaries include an aircraft leasing company and three independently certificated airlines. The three airlines, ABX Air, Inc. ("ABX"), Capital Cargo International Airlines, Inc. ("CCIA") and Air Transport International, LLC ("ATI"), each have the authority, through their separate U.S. Department of Transportation ("DOT") and Federal Aviation Administration ("FAA") certificates, to transport cargo worldwide. The Company's leasing subsidiary, Cargo Aircraft Management, Inc. ("CAM"), leases aircraft to each of the Company's airlines as well as to non-affiliated airlines and other lessees.

Through its airline subsidiaries, the Company provides aircraft, flight crews and airline operations to its customers. Since August of 2003, the Company, through ABX, has had long term contracts with affiliates of DHL Worldwide Express, B.V., which are collectively referred to as "DHL." DHL, an international, integrated delivery company, is the Company's largest customer. In March 2010, the Company and DHL executed new follow-on agreements, effective March 31, 2010. Under the new agreements, DHL leases 13 Boeing 767 freighter aircraft from CAM and ABX operates those aircraft for DHL under a separate crew, maintenance and insurance agreement (the "CMI agreement"). Prior to the new follow-on agreements, ABX provided aircraft, flight crews and maintenance to DHL under a cost-plus aircraft, crew, maintenance and insurance agreement ("the DHL ACMI agreement").

CCIA and ATI each have contracts to provide airlift to BAX Global, Inc. ("BAX/Schenker"), the Company's second largest customer. BAX/Schenker provides freight transportation and supply chain management services, specializing in the heavy freight market for business-to-business shipping. CCIA and ATI each provide ACMI (aircraft, crew, maintenance and insurance) services to DHL. Additionally, ATI provides passenger transportation, primarily to the U.S. military, using its McDonnell Douglas DC-8 "combi" aircraft, which are certified to carry passengers as well as cargo on the main deck.

In addition to its airline operations and aircraft leasing services, the Company sells aircraft parts, provides aircraft and equipment maintenance services, operates mail sorting facilities for the U.S. Postal Service ("USPS"), and provides specialized services for aircraft fuel management.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect amounts reported in the consolidated financial statements. Estimates and assumptions are used to record allowances for uncollectible amounts, self-insurance reserves, spare parts inventory, depreciation and impairments of property, equipment, goodwill and intangibles, post-retirement obligations, income taxes, contingencies and litigation. Changes in estimates and assumptions may have a material impact on the consolidated financial statements.

Subsequent Events

The Company evaluated subsequent events through the date the financial statements were issued and filed with the Securities and Exchange Commission. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included.

Table of Contents

Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. Intercompany balances and transactions have been eliminated.

Cash and Cash Equivalents

The Company classifies short-term, highly liquid investments with maturities of three months or less at the time of purchase as cash and cash equivalents. These investments, consisting of money market funds, are recorded at cost, which approximates fair value. Substantially all deposits of the Company's cash are held in accounts that exceed federally insured limits. The Company deposits cash in common financial institutions which management believes are financially sound.

Accounts Receivable and Allowance for Uncollectible Accounts

The Company's accounts receivable is primarily due from its significant customers (see Note C), other airlines, the USPS and freight forwarders. The Company performs a quarterly evaluation of the accounts receivable and the allowance for uncollectible accounts by reviewing specific customers recent payment history, growth prospects, financial condition and other factors that may impact a customer's ability to pay. The Company establishes an allowance for uncollectible accounts for probable losses due to a customer's potential inability or unwillingness to make contractual payments. Account balances are written off against the allowance when the Company ceases collection efforts.

Inventory

The Company's inventory is comprised primarily of expendable aircraft parts and supplies used for aircraft maintenance. Inventory is generally charged to expense when issued for use on a Company aircraft. The Company values aircraft parts and supply inventory at weighted-average cost and maintains a related obsolescence reserve. The Company records an obsolescence reserve on a base stock of inventory for each fleet type. The amortization of base stock for the obsolescence reserve corresponds to the expected life of each fleet type. Additionally, the Company monitors the usage rates of inventory parts and segregates parts that are technologically outdated or no longer used in its fleet types. Slow moving and segregated items are actively marketed and written down to their estimated net realizable values based on market conditions.

Management analyzes the inventory reserve for reasonableness at the end of each quarter. That analysis includes consideration of the expected fleet life, amounts expected to be on hand at the end of a fleet life, and recent events and conditions that may impact the usability or value of inventory. Events or conditions that may impact the expected life, usability or net realizable value of inventory include additional aircraft maintenance directives from the FAA, changes in DOT regulations, new environmental laws and technological advances.

Goodwill and Intangible Assets

The Company assesses, during the fourth quarter of each year, the carrying value of goodwill and indefinite-lived intangible assets. Impairment assessments may be performed on an interim basis if the Company finds it necessary. Finite-lived intangible assets are amortized over their estimated useful economic lives and are periodically reviewed for impairment (see Note B).

Property and Equipment

Property and equipment are stated at cost, net of any impairment recorded. The cost and accumulated depreciation of disposed property and equipment are removed from the accounts with any related gain or loss reflected in earnings from operations.

Table of Contents

Depreciation of property and equipment is provided on a straight-line basis over the lesser of the asset's useful life or lease term. Depreciable lives are summarized as follows:

Boeing 727 and DC-8 aircraft and flight equipment	1 year
Boeing 767 and 757 aircraft and flight equipment	10 to 20 years
Support equipment	5 to 10 years
Vehicles and other equipment	3 to 8 years

The Company periodically evaluates the useful lives, salvage values and fair values of property and equipment. Acceleration of depreciation expense or the recording of significant impairment losses could result from changes in the estimated useful lives of assets due to a number of reasons, such as an assessment done quarterly to determine if excess aircraft capacity exists or changes in regulations governing the use of aircraft.

Aircraft and other long-lived assets are tested for impairment when circumstances indicate the carrying value of the assets may not be recoverable (see Note E). To conduct impairment testing, the Company groups assets and liabilities at the lowest level for which identifiable cash are largely independent of cash flows of other assets and liabilities. For assets that are to be held and used, impairment is recognized when the estimated undiscounted cash flows associated with the asset group is less than the carrying value. If impairment exists, an adjustment is made to write the assets down to fair value, and a loss is recorded as the difference between the carrying value and fair value. Fair values are determined considering quoted market values, discounted cash flows or internal and external appraisals, as applicable. Assets to be disposed of are carried at the lower of carrying value or fair value less the cost to sell.

The airlines' General Electric CF6 engines that power the Boeing 767-200 aircraft are maintained under "power by the hour" agreements with an engine maintenance provider. Under the power by the hour agreements, the engines are maintained by the service provider for a fixed fee per flight hour; accordingly, the cost of engine maintenance is generally expensed as flight hours occur. Maintenance for the airlines' other aircraft engines are typically contracted to service providers on a time and material basis. The Company's accounting policy for major airframe and engine maintenance varies by subsidiary and aircraft type. ATI, CCIA and CAM capitalize the cost of major maintenance and amortize the costs over the useful life of the overhaul. ABX expenses the cost of Boeing 767-200 airframe maintenance and CF-6 engine maintenance as incurred.

Capitalized Interest

Interest costs incurred while aircraft are being modified are capitalized as an additional cost of the aircraft until the date the asset is placed in service. Capitalized interest was \$0.6 million and \$0.1 million for the quarters ended September 30, 2011 and 2010, respectively, and \$1.5 million and \$1.3 million for the nine month periods ended September 30, 2011 and 2010, respectively.

Discontinued Operations

A business component whose operations are discontinued is reported as discontinued operations if the cash flows of the component have been eliminated from the ongoing operations of the Company, and the Company will no longer have any significant continuing involvement in the business component. The results of discontinued operations are aggregated and presented separately in the consolidated statements of operations. The Company reclassifies amounts presented in prior years that relate to discontinued business components to reflect the activities as discontinued operations.

The Company's results of discontinued operations consists primarily of pension expenses and other benefits for former employees previously associated with the Company's freight sorting and aircraft fueling services provided to DHL. ABX is self insured for medical coverage and workers' compensation, and may incur expenses and cash outlays in the future related to pension obligations, reserves for medical expenses and wage loss for former employees.

Table of Contents

Exit Activities

The Company accounts for the costs associated with exit activities in accordance with FASB ASC Topic 420-10 Exit or Disposal Cost Obligations. One-time, involuntary employee termination benefits are generally expensed when the Company communicates the benefit arrangement to the employee that it will no longer require the services of the employee beyond a minimum retention period. Liabilities for contract termination costs associated with exit activities are recognized in the period incurred and measured initially at fair value.

Self-Insurance

The Company is self-insured for certain workers' compensation, employee healthcare, automobile, aircraft, and general liability claims. The Company maintains excess claim coverage with common insurance carriers to mitigate its exposure to large claim losses. The Company records a liability for reported claims and an estimate for incurred claims that have not yet been reported. Accruals for these claims are estimated utilizing historical paid claims data, recent claims trends and, in the case of employee healthcare and workers' compensation, an independent actuarial evaluation. Other liabilities included \$37.2 million and \$39.2 million at September 30, 2011 and December 31, 2010, respectively, for self-insurance reserves. Changes in claim severity and frequency could result in actual claims being materially different than the costs reserved.

Income Taxes

Income taxes have been computed using the asset and liability method, under which deferred income taxes are provided for the temporary differences between the financial reporting basis and the tax basis of the Company's assets and liabilities. Deferred taxes are measured using provisions of currently enacted tax laws. A valuation allowance against net deferred tax assets is recorded when it is more likely than not that such assets will not be fully realized. Tax credits are accounted for as a reduction of income taxes in the year in which the credit originates.

The Company recognizes the benefit of a tax position taken on a tax return, if that position is more likely than not of being sustained on audit, based on the technical merits of the position. An uncertain income tax benefit is not recognized if it has a less than a 50% likelihood of being sustained. The Company recognizes interest and penalties accrued related to uncertain tax positions in operating expense.

Comprehensive Income

Comprehensive income includes net earnings and other comprehensive income or loss. Other comprehensive income or loss results from changes in the Company's pension liability and gains and losses associated with interest rate hedging instruments.

Fair Value Information

Assets or liabilities that are required to be measured at fair value are reported using the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. FASB ASC Topic 820-10 Fair Value Measurements and Disclosures establishes three levels of input that may be used to measure fair value:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include items where the determination of fair value requires significant management judgment or estimation.

Table of Contents

Revenue Recognition

Revenues generated from airline service agreements are typically recognized based on hours flown or the amount of aircraft and crew resources provided during a reporting period. Certain agreements include provisions for incentive payments based upon on-time reliability. These incentives are typically measured on a monthly basis and recorded to revenue in the corresponding month earned. Revenues for operating expenses that are reimbursed through customer agreements, including consumption of aircraft fuel, are generally recognized as the costs are incurred. Revenues from charter service agreements are recognized on scheduled and non-scheduled flights when the specific flight has been completed. Revenues from the sale of aircraft parts are recognized when the parts are delivered. Revenues earned and expenses incurred in providing aircraft-related maintenance, repair or technical services are recognized in the period in which the services are completed and delivered to the customer. Revenues derived from transporting freight and sorting parcels are recognized upon delivery of shipments and completion of services. Aircraft lease revenues are recognized as operating lease revenues on a straight-line basis over the term of the applicable lease agreements. Revenues from the former DHL ACMI agreement with DHL were generally determined based on expenses incurred during a period plus mark-ups and were recognized when the related services were performed. ABX and DHL amended the DHL ACMI agreement to set mark-ups to specific quarterly amounts for the first quarter of 2010. In 2008, ABX and DHL executed a severance and retention agreement (“S&R agreement”) which specified employee severance, retention and other benefits that DHL reimbursed to ABX for payment to its employees that were affected in conjunction with DHL’s U.S. restructuring plan. DHL was obligated to reimburse ABX for the cost of employee severance, retention, productivity bonuses and vacation benefits paid in accordance with the agreement. The Company’s revenues for the first quarter of 2010 included reimbursement for expenses incurred under the DHL ACMI agreement, the incremental mark-up revenues set by the amendments thereto, and reimbursement for employee severance, retention and vacation benefits.

NOTE B—GOODWILL AND OTHER INTANGIBLES

The Company has two reporting units, ATI (a component of ACMI Services) and CAM, that have goodwill. In conjunction with the phase-out of BAX/Schenker’s dedicated airlift in North America (see Note C), which relied on operations provided by the Company, the Company tested the carrying values of goodwill and related intangible assets as of July 31, 2011. The Company recognized an impairment charge to reduce the value of the recorded goodwill and customer relationship intangible associated with ATI to \$52.6 million and \$2.5 million, respectively. The Company determined the fair values of ATI and CAM separately using industry market multiples and discounted cash flows utilizing a market-derived rate of return (level 3 fair value inputs). BAX/Schenker’s decision to discontinue a dedicated U.S. air network using ATI’s DC-8 aircraft was precipitated by prolonged recessionary conditions and trends toward higher fuel prices. ATI’s remaining balances of goodwill and intangibles were not impaired further because of expected future net cash flows from its growing fleet of Boeing 767 aircraft and combi aircraft services which it provides to the U.S. military.

Changes in the carrying amount of goodwill during the nine month period ended September 30, 2011, by reportable segment, are as follows (in thousands):

	ACMI Services	CAM	Total
Carrying value as of December 31, 2010	\$55,382	\$34,395	\$89,777
Impairment	(2,797) —	(2,797)
Carrying value as of September 30, 2011	\$52,585	\$34,395	\$86,980

Table of Contents

Changes in the carrying amount of intangible assets during the nine month period ended September 30, 2011 are as follows (in thousands):

	Customer Relationships	Airline Certificates
Carrying value as of December 31, 2010	\$5,259	\$4,000
Amortization	(519) —
Impairment	(2,282) —
Carrying value as of September 30, 2011	\$2,458	\$4,000

The customer relationship intangible amortizes over 10 more years while the airline certificates have indefinite lives and therefore are not amortized. The Company recorded amortization expense of \$0.1 million and \$0.5 million for the three and nine month periods ending September 30, 2011 for the customer relationships intangible asset. The Company recorded amortization expense of \$0.2 million and \$0.6 million for the three and nine month periods ending September 30, 2010 for the customer relationships intangible.

NOTE C—SIGNIFICANT CUSTOMERS

DHL

The Company, through ABX, has had contracts with DHL since August of 2003. The Company and DHL terminated the former DHL ACMI agreement and executed new follow-on agreements, effective March 31, 2010. Under the new agreements, DHL leases 13 Boeing 767 freighter aircraft from CAM, while ABX operates those aircraft for DHL under a separate CMI agreement. The CMI agreement is not based on a cost-plus pricing arrangement, but instead pricing is based on pre-defined fees, scaled for the number of aircraft operated and the number of crews provided to DHL for its U.S. network. In addition to the 13 CAM-owned Boeing 767 aircraft, ABX also operates four DHL-owned Boeing 767 aircraft under the CMI agreement. The initial term of the CMI agreement is five years, while the term of the aircraft leases are seven years. Under the CMI agreement, ABX contracted with Airborne Maintenance and Engineering Services, Inc. (“AMES”), a wholly-owned subsidiary of the Company, to provide scheduled maintenance for the 13 Boeing 767 aircraft for at least the first three years of the CMI agreement. AMES also provides scheduled maintenance for the four DHL-owned aircraft operated by ABX under the CMI agreement. Continuing revenues from leases and contracted services for DHL were approximately 35% of the Company's consolidated revenues from continuing operations for the three and nine month periods ended September 30, 2011, respectively, compared to 33% and 35% for the corresponding periods of 2010. The Company's balance sheets include accounts receivable and other long-term receivables with DHL of \$15.2 million and \$19.0 million as of September 30, 2011 and December 31, 2010, respectively.

BAX/Schenker

A substantial portion of the Company's revenues, and cash flows have historically been derived from providing airlift to BAX/Schenker's network in North America. Under their agreements with BAX/Schenker, ATI and CCIA had the right to be the exclusive providers of main deck freighter lift in the BAX/Schenker U.S. network through December 31, 2011. Revenues from the services performed for BAX/Schenker were approximately 27% and 30% of the Company's total revenues from continuing operations for the three and nine month periods ended September 30, 2011, respectively, compared to 29% for the corresponding periods of 2010. (Excluding directly reimbursable revenues, the revenues from the services performed for BAX/Schenker were approximately 16% and 17% of the Company's revenues for the three and nine month periods ended September 30, 2011.)

On July 22, 2011, BAX/Schenker announced its plans to adopt a new operating model that phases-out the dedicated air cargo network in North America supported by the Company. To execute that plan, on September 2, 2011, BAX/Schenker ceased air cargo operations at its air hub in Toledo, Ohio and began to conduct air operations from the Cincinnati/Northern Kentucky airport, utilizing DHL's U.S. air hub. In conjunction with the transfer to the Cincinnati/Northern Kentucky airport, BAX/Schenker reduced the dedicated aircraft to five DC-8 and four Boeing 727 freighters operated by ATI and CCIA; respectively. Previously, the Company had been providing eight Boeing 727 and eight DC-8 freighters to the BAX/Schenker network in North America. In October 2011, BAX/Schenker further reduced

Table of Contents

the number of DC-8 freighters to two aircraft in a back-up capacity. The Company expects to provide limited airlift directly to BAX/Schenker through the peak delivery season, until mid-December, 2011. After which time, the airlines' contracts with BAX/Schenker will expire and the Company expects DHL to supplement its U.S. air network to fully service BAX/Schenker freight volumes on DHL's expanded air network with only limited use of Boeing 727 and DC-8 aircraft during a transitional period. Management believes that DHL prefers more efficient Boeing 767 and 757 aircraft.

Beginning in August 2011, the Company began to incur wind-down costs related to the phase-out of the BAX/Schenker air network in North America. During the third quarter of 2011, the Company's wind-down costs included employee severance benefits, airport lease termination payments, aircraft and equipment repositioning and other expenses. These expenses were approximately \$0.4 million and were primarily recovered from BAX/Schenker under contractual terms. Additional wind-down costs may be incurred as BAX/Schenker completes the phase-out of its domestic air network.

As certain aircraft are phased-out, the Company is entitled to aircraft maintenance reimbursements under contractual obligations from BAX/Schenker. The Company's balance sheets include accounts receivable with BAX/Schenker of \$8.6 million and \$5.5 million as of September 30, 2011 and December 31, 2010, respectively.

U.S. Military

A substantial portion of the Company's revenues are also derived from the U.S. military. The U.S. military awards flights to U.S. certificated airlines through annual contracts and through temporary "expansion" routes. Revenues from services performed for the U.S. military were approximately 12% of the Company's total revenues from continuing operations for the three and nine month periods ended September 30, 2011, respectively, compared to 14% for the corresponding periods of 2010. The Company's balance sheets included accounts receivable with the U.S. military of \$5.3 million and \$8.4 million as of September 30, 2011 and December 31, 2010, respectively.

NOTE D—FAIR VALUE MEASUREMENTS

The Company's money market funds and derivative financial instruments are reported on the Company's consolidated balance sheet at fair values based on market values from identical or comparable transactions. The fair value of the Company's derivative financial instruments are based on observable inputs (Level 2) from comparable market transactions. The use of significant unobservable inputs (Level 3) was not necessary in determining the fair value of the Company's financial assets and liabilities.

The following table reflects assets and liabilities that are measured at fair value on a recurring basis (in thousands):

As of September 30, 2011	Fair Value Measurement Using			Total
	Level 1	Level 2	Level 3	
Assets				
Cash equivalents—money market	\$—	\$8,056	\$—	\$8,056
Total Assets	\$—	\$8,056	\$—	\$8,056
Liabilities				
Interest rate swap	\$—	\$(5,580)) \$—	\$(5,580)
Total Liabilities	\$—	\$(5,580)) \$—	\$(5,580)
As of December 31, 2010	Fair Value Measurement Using			Total
	Level 1	Level 2	Level 3	
Assets				
Cash equivalents—money market	\$—	\$20,411	\$—	\$20,411
Total Assets	\$—	\$20,411	\$—	\$20,411
Liabilities				
Interest rate swap	\$—	\$(4,563)) \$—	\$(4,563)
Total Liabilities	\$—	\$(4,563)) \$—	\$(4,563)

Table of Contents

As a result of lower market interest rates compared to the stated interest rates of the Company's fixed and variable rate debt obligations, the fair value of the Company's debt obligations was approximately \$3.0 million more than the carrying value, which was \$336.1 million at September 30, 2011. The non-financial assets, including goodwill and intangible assets, are measured at fair value on a non-recurring basis.

NOTE E—PROPERTY AND EQUIPMENT

At September 30, 2011, the Company's subsidiaries owned or leased under capital leases 59 aircraft in serviceable condition, consisting of 21 Boeing 767-200 freighter aircraft leased to external customers, 37 freighter aircraft operated by the Company's airlines and one Boeing 767 passenger aircraft. These 37 freighter aircraft consisted of 13 Boeing 767-200, two Boeing 767-300, two Boeing 757, seven Boeing 727, and 13 McDonnell Douglas DC-8. Additionally, as of September 30, 2011, the Company had two Boeing 767-200 aircraft, two Boeing 767-300 aircraft and two Boeing 757 aircraft undergoing modification to standard freighter configuration. The combined carrying value of aircraft in modification was \$87.1 million at September 30, 2011.

Property and equipment, to be held and used, consisted of the following (in thousands):

	September 30, 2011	December 31, 2010
Aircraft and flight equipment	\$992,656	\$928,784
Support equipment	50,980	50,424
Vehicles and other equipment	1,541	1,604
Leasehold improvements	714	714
	1,045,891	981,526
Accumulated depreciation	(303,658) (322,770
Property and equipment, net	\$742,233	\$658,756

Aircraft and flight equipment includes \$3.0 million of property held under capital leases as of September 30, 2011 and \$22.2 million as of December 31, 2010. Accumulated depreciation and amortization includes \$0.4 million as of September 30, 2011 and \$10.8 million as of December 31, 2010 for property held under capital leases. CAM owned aircraft with a carrying value of \$322.9 million and \$263.2 million that were under leases to external customers as of September 30, 2011 and December 31, 2010, respectively.

Stagnant economic growth and higher fuel prices precipitated BAX/Schenker's decision to phase-out its North American air network (see note C) and diminished the demand for the Company's Boeing 727 and DC-8 freighter aircraft. These aircraft are less fuel efficient and generally require higher maintenance costs to maintain acceptable levels of reliability compared to more modern aircraft. As a result of these conditions and BAX/Schenker's decision in July 2011 to phase-out its North American air network, the Company has decided to retire the Boeing 727 and DC-8 freighter fleets. The Company plans to disassemble the aircraft to sell their engines and parts separately and has begun to market the aircraft engines, parts and airframes to other operators and aircraft part dealers. During the third quarter of 2011, the Company recorded a pre-tax impairment charge totaling \$22.1 million to reduce the carrying values of its Boeing 727 and DC-8 freighters, engines and related parts to their estimated fair value. The Company determined the fair values of these aircraft with the assistance of an independent appraiser using comparable market sales (level 2 fair value inputs). The remaining carrying value of the Company's Boeing 727 and DC-8 freighter aircraft, spare engines and related parts was \$18.3 million as of September 30, 2011.

Table of Contents

NOTE F—DEBT OBLIGATIONS

Long-term obligations consisted of the following (in thousands):

	September 30, 2011	December 31, 2010
Unsubordinated term loan	\$ 150,000	\$ 178,000
Revolving credit facility	90,000	—
Aircraft loans	72,573	92,075
Capital lease obligations-Boeing 727	1,867	5,910
Promissory note due to DHL, unsecured	21,700	26,350
Other capital leases	—	193
Total long-term obligations	336,140	302,528
Less: current portion	(13,085) (36,591
Total long-term obligations, net	\$ 323,055	\$ 265,937

In May 2011, the Company executed a new, syndicated credit facility with a larger borrowing capacity and repayment terms through April 2016 ("Credit Facility"). The new Credit Facility, with a consortium of banks, includes a term loan of \$150 million and a \$175 million revolving credit loan, of which the Company has drawn \$90 million. The former term loan, having a balance of \$172.4 million, was completely paid-off on May 9, 2011, using the proceeds of the new term loan and revolving loan. Under the terms of the Credit Facility, interest rates are adjusted quarterly based on the Company's earnings before interest, taxes, depreciation and amortization expenses ("EBITDA"), its outstanding debt level and prevailing LIBOR or prime rates. At the Company's current debt-to-EBITDA ratio, the LIBOR based financing for the unsubordinated term loan and revolving credit loan bear a variable interest rate of 2.34% and 2.23%, respectively. During the next twelve months, the Company expects to make further draws on the revolving credit loan to fund its fleet expansion plans. The new Credit Facility also has an accordion feature of \$50 million which the Company may draw subject to the lenders' consent. Repayments of the term loan are scheduled to begin in June 2012. The Credit Facility provides for the issuance of letters of credit on the Company's behalf. As of September 30, 2011, the unused revolving credit facility totaled \$73.1 million, net of draws of \$90.0 million and outstanding letters of credit of \$11.9 million.

In conjunction with the execution of the new Credit Facility, the Company terminated its previous credit agreement, which resulted in the write-off of unamortized debt issuance costs associated with that credit agreement and losses for certain interest rate swaps which had previously been designated as cash flow hedges of interest payments required by the former debt. These charges, which totaled \$6.8 million before income taxes, were recorded in March 2011.

The aircraft loans are collateralized by six aircraft, and amortize monthly with a balloon payment of approximately 20% with maturities between 2016 and early 2018. Interest rates range from 6.74% to 7.36% per annum payable monthly. In May, the Company completely paid-off one of the aircraft loans at par value prior to maturity, remitting \$13.8 million for the outstanding principal. Capital lease obligations for four Boeing 727 aircraft carry a fixed implicit rate of 6.50% and expire in 2011.

The promissory note payable to DHL becomes due in August 2028 as a balloon payment, unless it is extinguished sooner under the terms of the DHL CMI agreement. Beginning April 1, 2010 and extending through the term of the DHL CMI agreement, the balance of the note is amortized ratably without cash payment, in exchange for services provided and thus is expected to be completely amortized by April 2015. The promissory note bears interest at a rate of 5% per annum, and DHL reimburses ABX the interest expense from the note through the term of the DHL CMI agreement.

The new Credit Facility is collateralized by certain of the Company's Boeing 767 and 757 aircraft that are not collateralized under aircraft loans. Under the terms of the Credit Facility, the Company is required to maintain collateral coverage equal to 150% of the outstanding balance of the term loan and revolving credit loan. The Credit Facility contains covenants including, among other requirements, limitations on certain additional indebtedness and guarantees of indebtedness. The Credit Facility stipulates events of default, including unspecified events that may have material

Table of Contents

adverse effects on the Company. If an event of default occurs, the Company may be forced to repay, renegotiate or replace the Credit Facility. The Company is currently in compliance with the financial covenants specified in the Credit Facility. The Credit Facility limits the amount of dividends the Company can pay and the amount of common stock it can repurchase to \$50.0 million during any calendar year. Under the provisions of its promissory note due to DHL, the Company is required to prepay the DHL note \$0.20 for each dollar of dividend distributed to its stockholders. The same prepayment stipulation applies to stock repurchases.

NOTE G—COMMITMENTS AND CONTINGENCIES

Leases

The Company leases airport facilities and certain operating equipment under operating lease agreements. ABX leases portions of the air park in Wilmington, Ohio under a lease agreement with a regional port authority, the term of which expires in May of 2019.

Commitments

In September 2008, CAM entered into an agreement with Israel Aerospace Industries Ltd. (“IAI”) for the conversion of up to fourteen Boeing 767-200 passenger door freighters to a standard freighter configuration. The conversion primarily consists of the installation of a standard cargo door and loading system. Through September 30, 2011, twelve such aircraft have completed the modification process. As of September 30, 2011, the last two of the fourteen Boeing 767-200 aircraft were undergoing modification to standard freighter configuration. As of September 30, 2011, to complete the aircraft currently undergoing modification, CAM expects to pay IAI approximately \$9.0 million. In August 2010, CAM entered into an agreement with M&B Conversions Limited and IAI for the conversion by IAI of up to ten Boeing 767-300 series passenger aircraft to a standard freighter configuration during the 10-year term of the agreement. As of September 30, 2011, two such aircraft have completed the modification process and two Boeing 767-300 aircraft were undergoing modification to a standard freighter configuration. If CAM were to cancel the conversion program as of September 30, 2011, it would owe IAI approximately \$1.5 million associated with additional conversion part kits which have been ordered. In October of 2011, CAM purchased another Boeing 767-300 passenger aircraft for freighter conversion.

In October 2010, CAM entered into an agreement with Precision Conversions, LLC (“Precision”) for the design, engineering and certification of a Boeing 757 "combi" aircraft variant. The Boeing 757 combi variant to be developed by Precision will incorporate 10 full cargo pallet positions along with seating for up to 58 passengers. In April 2011, CAM purchased a Boeing passenger 757 aircraft which is currently undergoing combi development. In July 2011, CAM purchased another Boeing 757 passenger aircraft and inducted it into the standard freighter modification process with Precision. CAM is committed to convert at least two Boeing 757 aircraft with Precision. If CAM were to cancel the conversion program as of September 30, 2011, it would owe Precision approximately \$8.0 million associated with engineering efforts and conversion part kits which have been ordered. In October of 2011, CAM purchased another Boeing 757-200 passenger aircraft for combi conversion.

Guarantees and Indemnifications

Certain operating leases and agreements of the Company contain indemnification obligations to the lessor, or one or more other parties that are considered reasonable and customary (e.g. use, tax and environmental indemnifications), the terms of which range in duration and are often limited. Such indemnification obligations may continue after expiration of the respective lease or agreement.

Civil Action Alleging Violations of Immigration Laws

On December 31, 2008, a former ABX employee filed a complaint against ABX, a total of four current and former executives and managers of ABX, Garcia Labor Company of Ohio, and three former executives of the Garcia Labor companies, in the U.S. District Court for the Southern District of Ohio. The case was filed as a putative class action against the defendants, and asserts violations of the Racketeer Influenced and Corrupt Practices Act (RICO). The complaint, which was later amended to include a second former employee plaintiff, seeks damages in an unspecified

Table of Contents

amount and alleges that the defendants engaged in a scheme to hire illegal immigrant workers to depress the wages paid to hourly wage employees during the period from December 1999 to January 2005. On March 18, 2010, the Court issued a decision in response to a motion filed by ABX and the other ABX defendants, dismissing three of the five claims constituting the basis of Plaintiffs' complaint. Thereafter, on October 7, 2010, the Court issued a decision permitting the plaintiffs to amend their complaint for the purpose of reinstating one of their dismissed claims. On October 26, 2010, ABX and the other ABX defendants filed an answer denying the allegations contained in plaintiffs' second amended complaint.

The complaint is similar to a prior complaint filed by another former employee in April 2007. The prior complaint was subsequently dismissed without prejudice at the plaintiff's request on November 3, 2008.

FAA Enforcement Actions

The Company's airline operations are subject to complex aviation and transportation laws and regulations that are continually enforced by the DOT and FAA. The Company's airlines receive letters of investigation ("LOIs") from the FAA from time to time in the ordinary course of business. The LOIs generally provide that some action of the airline may have been contrary to the FAA's regulations. The airline responds to the LOIs and if the response is not satisfactory to the FAA, it can seek to impose a civil penalty for the alleged violations. Airlines are entitled to a hearing before an Administrative Law Judge or a Federal District Court Judge, depending on the amount of the penalty being sought, before any penalty order is deemed final.

The FAA issued LOIs to CCIA arising from a focused inspection of that airline's operations during the fourth quarter of 2009, several of which resulted in the FAA seeking monetary penalties against CCIA. ABX received an LOI from the FAA alleging that ABX failed to comply with an FAA Airworthiness Directive involving its Boeing 767 aircraft and proposing a monetary settlement. The Company believes it has adequately reserved for those monetary penalties being proposed by the FAA, although it's possible that the FAA may propose additional penalties exceeding the amounts currently reserved.

Brussels Noise Ordinance

The Brussels Instituut voor Milieubeheer ("BIM"), a governmental authority in the Brussels-Capital Region of Belgium that oversees the enforcement of environmental matters, brought an administrative action against ABX alleging numerous violations of an ordinance limiting the noise caused by aircraft overflying the Brussels-Capital Region, which is located near the Brussels Airport. On May 13, 2011, the BIM levied an administrative penalty on ABX in the amount of €0.1 million (approximately \$0.2 million) for numerous alleged violations of the ordinance during the period from May 2009 through November 2009. ABX appealed this matter to the Environmental College in Brussels. However, on October 10, 2011, the Environmental College affirmed the decision of the BIM. ABX now intends to appeal the decision to the Council of State.

The ordinance in question is controversial for the reason that it was adopted by the Brussels-Capital Region and is more restrictive than the noise limitations in effect in the Flemish Region, which is where the Brussels Airport is located. The ordinance is the subject of several court cases currently pending in the Belgian courts and numerous airlines have been levied fines thereunder.

Similar administrative actions may be brought against ABX with respect to alleged violations of the ordinance during the period from December 2009 through December 2010, which could also result in the imposition of administrative penalties.

ABX ceased operating in Belgium at the end of 2010.

Other

In addition to the foregoing matters, the Company is also currently a party to legal proceedings in various federal and state jurisdictions arising out of the operation of their business. The amount of alleged liability, if any, from these proceedings cannot be determined with certainty; however, the Company believes that their ultimate liability, if any, arising from the pending legal proceedings, as well as from asserted legal claims and known potential legal claims which are probable of assertion, taking into account established accruals for estimated liabilities, should not be material to the Company's financial condition or results of operations.

Table of Contents

Employees Under Collective Bargaining Agreements

As of September 30, 2011, the flight crewmember employees of ABX, ATI and CCIA were represented by the labor unions listed below:

Airline	Labor Agreement Unit	Percentage of the Company's Employees
ABX	International Brotherhood of Teamsters	12.5%
ATI	Airline Pilots Association	11.4%
CCIA	Airline Pilots Association	5.4%

NOTE H—PENSION AND OTHER POST-RETIREMENT BENEFIT PLANS

ABX sponsors a qualified defined benefit pension plan for its flight crewmembers and a qualified defined benefit pension plan for a major portion of its other ABX employees that meet minimum eligibility requirements. ABX also sponsors non-qualified defined benefit pension plans for certain employees. These non-qualified plans are unfunded. ABX also sponsors a post-retirement healthcare plan for its ABX employees, which is unfunded. During 2009, the Company amended each of the defined benefit pension plans to freeze the accrual of additional benefits. During 2010, the Company modified the post-retirement health plans for ABX employees to terminate benefits when a covered individual reaches age 65.

The accounting and valuation for these post-retirement obligations are determined by prescribed accounting and actuarial methods that consider a number of assumptions and estimates. The selection of appropriate assumptions and estimates is significant due to the long time period over which benefits will be accrued and paid. The long-term nature of these benefit payouts increases the sensitivity of certain estimates of our post-retirement costs. The Company's net periodic benefit costs for its qualified defined benefit pension and post retirement healthcare plans for both continuing and discontinued operations are as follows (in thousands):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	Pension Plans		Post-Retirement Healthcare Plan		Pension Plans		Post-Retirement Healthcare Plan	
	2011	2010	2011	2010	2011	2010	2011	2010
Service cost	\$—	\$—	\$62	\$59	\$—	\$2,286	\$186	\$280
Interest cost	9,290	9,169	97	146	27,871	27,508	291	654
Expected return on plan assets	(9,757)	(8,900)	—	—	(29,271)	(26,700)	—	—
Amortization of prior service cost	—	—	(1,388)	(1,250)	—	—	(4,164)	(2,917)
Amortization of net loss	675	517	132	104	2,025	1,551	396	259
Net periodic benefit cost	\$208	\$786	\$(1,097)	\$(941)	\$625	\$4,645	\$(3,291)	\$(1,724)

During the three and nine month periods ended September 30, 2011, the Company contributed \$8.4 million and \$13.0 million to the pension plans. The Company plans to contribute approximately \$5.0 million more in 2011.

Table of Contents

NOTE I—INCOME TAXES

The provision for income taxes for interim periods is based on management's best estimate of the effective income tax rate expected to be applicable for the current year, plus any adjustments arising from changes in the estimated amount of taxable income related to prior periods. Income taxes recorded through September 30, 2011 have been estimated utilizing a 37.7% rate based on year-to-date income and projected results for the full year, excluding non deductible impairment charges. The final effective tax rate to be applied to 2011 will depend on the actual amount of pre-tax book income generated by the Company for the full year.

NOTE J—DERIVATIVE INSTRUMENTS

In conjunction with the unsubordinated term loan under the former credit agreement, the Company entered into interest rate swaps in January 2008 to reduce the effects of fluctuating LIBOR-based interest rates on forecasted interest payments stemming from the scheduled repayment of the debt. Under the interest rate swap agreements, the Company pays a fixed rate of 3.105% and receives a floating rate that resets quarterly based on LIBOR. The notional value of the interest rate swaps step downward through December 31, 2012. In accordance with FASB ASC Topic 815-30 Derivatives and Hedging, the Company accounted for the interest rate swaps as hedges of the forecasted cash flows. Accordingly, losses caused by lower floating interest rates had been recorded to accumulated other comprehensive income. Effective March 31, 2011, in conjunction with its decision to refinance the unsubordinated term loan, the Company ceased hedge accounting after determining that the forecasted interest payments will not occur near the time originally expected. As a result, the Company recorded a pre-tax charge of \$3.9 million in the first quarter of 2011 based on the fair market value of the derivatives on March 31, 2011, to recognize the losses previously recorded in accumulated other comprehensive income.

In addition to the interest rate swaps noted above, the Company's new Credit Facility requires the Company to maintain derivative instruments for protection from fluctuating interest rates, for at least fifty percent of the outstanding balance of the new subordinated term loan. As a result, the Company entered into a new interest rate swap in July of 2011 having an initial notional value of \$75.0 million and a forward start date of December 31, 2011. Under this swap, the Company will pay a fixed rate of 2.02% and receive a floating rate that resets quarterly based on LIBOR. The Company did not designate the recent interest rate swap as a hedge for accounting purposes. The effects of future fluctuations in LIBOR interest rates on derivatives held by the Company will result in the recording of unrealized gains and losses into the statement of earnings.

For the quarter ended September 30, 2011, the Company recorded an unrealized loss on derivatives of \$1.9 million to reflect the interest rate swaps at market value. The liability for outstanding derivatives is recorded in other liabilities and in accrued expenses. The table below provides information about the Company's interest rate swaps (in thousands):

Expiration Date	Stated Interest Rate	September 30, 2011		December 31, 2010	
		Notional Amount	Market Value (Liability)	Notional Amount	Market Value (Liability)
December 31, 2012	3.105	% \$61,625	\$(1,871) \$68,000	\$(2,893)
December 31, 2012	3.105	% 36,250	(1,102) 40,000	(1,670)
May 9, 2016	2.020	% 75,000	(2,607) —	—

Table of Contents

NOTE K—COMPREHENSIVE INCOME

Comprehensive income includes the following transactions for the three and nine months ended September 30, 2011 and 2010 (in thousands):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	Before Tax	Income Tax (Expense) or Benefit	Net of Tax	Before Tax	Income Tax (Expense) or Benefit	Net of Tax
2011

NOTE L—STOCK-BASED COMPENSATION

The Company's Board of Directors has granted stock incentive awards to certain employees and board members pursuant to a long-term incentive plan which was approved by the Company's stockholders in May 2005. Employees have been awarded non-vested stock units with performance conditions, non-vested stock units with market conditions and non-vested restricted stock. The restrictions on the non-vested restricted stock awards lapse at the end of a specified service period, which is typically approximately three years from the date of grant. Restrictions could lapse sooner upon a business combination, death, disability or after an employee qualifies for retirement. The non-vested stock units will be converted into a number of shares of Company stock depending on performance and market conditions at the end of a specified service period, lasting approximately three years. The performance condition awards will be converted into a number of shares of Company stock based on the Company's average return on equity or invested capital, depending on the form of award, during the service period. Similarly, the market condition awards will be converted into a number of shares depending on the appreciation of the Company's stock compared to the NASDAQ Transportation

Table of Contents

Index. Board members were granted time-based awards with approximately a six-month vesting period, which will settle when the board member ceases to be a director of the Company. The Company expects to settle all of the stock unit awards by issuing new shares of stock. The table below summarizes award activity.

	Nine Months Ended September 30, 2011		Nine Months Ended September 30, 2010	
	Number of Awards	Weighted average grant-date fair value	Number of Awards	Weighted average grant-date fair value
Outstanding at beginning of period	1,514,300	\$3.55	1,505,550	\$3.07
Granted	555,237	8.72	804,400	4.37
Converted	(293,300)	3.14	(27,539)	9.20
Expired	—	—	(39,211)	9.20
Forfeited	(168,200)	4.22	(65,400)	3.00
Outstanding at end of period	1,608,037	\$5.32	2,177,800	\$3.37
Vested	390,037	\$4.45	326,400	\$3.71

The average grant-date fair value of each performance condition award, non-vested restricted stock award and time-based award granted by the Company in 2011 was \$8.25, the fair value of the Company's stock on the date of grant. The average grant-date fair value of each market condition award granted in 2011 was \$11.17. The market condition awards were valued using a Monte Carlo simulation technique, a risk-free interest rate of 1.27%, a term of 36 months, and a volatility of 125.0% based on historical volatility over three years using daily stock prices.

For the nine month periods ended September 30, 2011 and 2010, the Company recorded expense of \$2.2 million and \$1.2 million, respectively, for stock incentive awards. At September 30, 2011, there was \$3.9 million of unrecognized expense related to the stock incentive awards that is expected to be recognized over a weighted-average period of 1.7 years. None of the awards were convertible, and none of the outstanding shares of restricted stock had vested as of September 30, 2011. These awards could result in a maximum number of 1,849,687 additional outstanding shares of the Company's common stock depending on service, performance and market results through December 31, 2013.

NOTE M—EARNINGS PER SHARE

The calculation of basic and diluted earnings per common share follows (in thousands, except per share amounts):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Earnings (loss) from continuing operations	\$(4,826)	\$11,388	\$10,335	\$28,053
Weighted-average shares outstanding for basic earnings per share	63,334	62,811	63,267	62,805
Common equivalent shares:				
Effect of stock-based compensation awards	—	1,391	811	1,271
Weighted-average shares outstanding assuming dilution	63,334	64,202	64,078	64,076
Basic earnings (loss) per share from continuing operations	\$(0.08)	\$0.18	\$0.16	\$0.45
Diluted earnings (loss) per share from continuing operations	\$(0.08)	\$0.18	\$0.16	\$0.44

The number of equivalent shares that were not included in weighted average shares outstanding assuming dilution, because their effect would have been anti-dilutive, was 214,000 at September 30, 2011 and immaterial at September 30, 2010.

Table of Contents

NOTE N—SEGMENT INFORMATION

The Company operates in two reportable segments, as described below. The CAM segment consists of the Company's aircraft leasing operations and its segment earnings includes an allocation of interest expense. The ACMI Services segment consists of the Company's airline operations including the CMI agreement with DHL, as well as ACMI and charter service agreements that the Company provides to other customers. The Company's other activities, which include contracts with the USPS, the sale of aircraft parts and maintenance services, management services for workers' compensation, logistics services and fuel management, do not constitute reportable segments and are combined in "All other" with inter-segment profit eliminations. Inter-segment revenues are valued at arms-length, market rates. Cash, cash equivalents and deferred tax assets are reflected in Assets - All other below. The Company's segment information for continuing operations is presented below (in thousands):

	Three Months Ended September		Nine Months Ended September	
	30,	2010	30,	2010

Table of Contents

The Company's assets are presented below by segment (in thousands):

	September 30, 2011	December 31, 2010
Assets:		
CAM	\$732,369	\$600,245
ACMI Services	140,262	198,024
Discontinued operations	4,103	5,015
All other	81,307	97,370
Total	\$958,041	\$900,654

Interest expense of \$0.3 million and \$0.9 million for the three and nine month periods ending September 30, 2011, respectively, compared to \$0.4 million and \$1.6 million for the corresponding periods of 2010, was reimbursed through the commercial agreements with DHL and included in the ACMI Services segment earnings above. Interest expense allocated to CAM was \$2.8 million and \$7.9 million for the three and nine month periods ending September 30, 2011, respectively, compared to \$2.3 million and \$7.2 million for the corresponding periods of 2010. The ACMI Services segment includes impairment charges of \$2.8 million on the goodwill, \$2.3 million on its acquired intangibles and \$15.3 million on its aircraft in the third quarter of 2011. The CAM segment includes an impairment charge of \$6.8 million on its aircraft in the third quarter of 2011.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis has been prepared with reference to the historical financial condition and results of operations of Air Transport Services Group, Inc., and its subsidiaries. Air Transport Services Group, Inc. and its subsidiaries may hereinafter individually and collectively be referred to as "the Company," "we," "our" or "us" from time to time. The following discussion and analysis describes the principal factors affecting the results of operations, financial condition, cash flows, liquidity and capital resources. It should be read in conjunction with the accompanying unaudited financial statements and the related notes contained in this report and our Annual Report on Form 10-K for the year ended December 31, 2010.

INTRODUCTION

Air Transport Services Group, Inc. (the "Company") is a holding company whose principal subsidiaries include three independently certificated airlines, ABX Air, Inc. ("ABX"), Capital Cargo International Airlines, Inc. ("CCIA") and Air Transport International, LLC ("ATI"), and an aircraft leasing company, Cargo Aircraft Management, Inc. ("CAM"). At September 30, 2011 the Company's in-service aircraft fleet consisted of 58 cargo aircraft and one passenger aircraft. Additionally, the Company owned six other aircraft that we expect to place into service after they are modified to standard freighter configuration. The Company has two reportable segments: ACMI Services, which primarily includes the cargo transportation operations of its three airlines and CAM, which includes the Company's aircraft leasing business. The Company's other business operations, including aircraft maintenance services, aircraft part sales, ground equipment leasing and maintenance, mail handling and fuel management, do not constitute reportable segments due to their size.

The Company has a concentrated base of leading customers which service international cargo traffic. The Company's three largest customers, which include affiliates of DHL Worldwide Express, B.V. ("DHL"), BAX Global, Inc. ("BAX/Schenker") and the U.S. military, totaled 74% and 77% of the Company's consolidated revenue during the three and nine month periods ended September 30, 2011.

The Company, through ABX, has had long-term contracts with DHL since August of 2003. Commencing March 31, 2010, the Company and DHL executed new commercial agreements under which DHL committed to lease 13 Boeing 767 freighter aircraft from CAM and contracted with ABX to operate those aircraft under a separate crew, maintenance and insurance ("CMI") agreement. The CMI agreement pricing is based on pre-defined fees, scaled for the number of aircraft operated and the number of flight crews provided to DHL for its U.S. network. The initial term of the CMI agreement is five years and the term of the aircraft leases is seven years, with early termination provisions. Through September 30, 2011, CAM leased all 13 Boeing 767-200 aircraft to DHL. In addition to the 13 CAM-owned Boeing 767 aircraft, ABX also operates four DHL-owned Boeing 767 aircraft under the CMI agreement. Under the CMI agreement, ABX contracts with Airborne Maintenance and Engineering Services, Inc. ("AMES"), a wholly-owned subsidiary of the Company, to provide scheduled maintenance for the 13 Boeing 767 aircraft for at least the first three years of the CMI agreement. AMES also provides scheduled maintenance for the four DHL-owned aircraft operated by ABX under the CMI agreement.

Prior to the new agreements, ABX provided flight crews, maintenance and aircraft to DHL under an aircraft, crew, maintenance and insurance agreement ("DHL ACMI agreement") which compensated ABX on a cost-plus mark-up basis. The follow-on agreements separate CAM's lease of freighter aircraft to DHL from the maintenance and operation of those aircraft by ABX on behalf of DHL.

A substantial portion of the Company's revenues and cash flows have historically been derived from providing airlift to BAX/Schenker's network in North America. Under their agreements with BAX/Schenker, ATI and CCIA had the right to be the exclusive providers of main deck freighter lift for BAX/Schenker in the U.S. through December 31, 2011. The Company started 2011 with eight Boeing 727 and eight DC-8 aircraft dedicated to supporting the BAX/Schenker network in North America. However, on July 22, 2011, BAX/Schenker announced its plans to adopt a new operating model that phases out the dedicated air cargo network in North America supported by the Company. Instead of a dedicated aircraft, BAX/Schenker has begun to utilize DHL and other delivery services for its air transportation delivery requirements. Beginning on September 2, 2011, BAX/Schenker ceased air cargo operations at

its air hub in Toledo, Ohio and began to conduct air operations from the Cincinnati/Northern Kentucky airport, utilizing DHL's U.S. air hub. In conjunction with the transfer to the Cincinnati/Northern Kentucky airport on September 2, 2011, BAX/

Table of Contents

Schenker reduced the number of dedicated aircraft operated by ATI and CCIA to five DC-8 and four Boeing 727 freighters; respectively. In October 2011, BAX/Schenker further reduced the number of DC-8 freighters to two aircraft in a back-up capacity. We expect to provide limited airlift directly to BAX/Schenker through the peak delivery season until mid-December 2011. After which time, our airlines' contracts with BAX/Schenker will expire and we expect that DHL will supplement its U.S. air network to fully service BAX/Schenker freight volumes on its expanded air network with only limited use of Boeing 727 and DC-8 aircraft during a transitional period. We believe that DHL prefers more efficient Boeing 767 and 757 aircraft.

Triggered by BAX/Schenker's July decision, we tested the carrying value of the Company's aircraft, engines, aircraft and engine spare parts, goodwill and other intangibles during the third quarter of 2011. During the third quarter of 2011, we recorded pre-tax impairment charges totaling \$27.1 million to reduce the carrying values of the Company's Boeing 727 and DC-8 freighters, goodwill and customer relationship intangible assets to their individual fair values. The lower fair value of these aircraft and BAX/Schenker's July decision to terminate its dedicated air network are the result of prolonged recessionary conditions and trends toward higher fuel prices. Demand for Boeing 727 and DC-8 aircraft has diminished in recent years because these older aircraft are less fuel efficient and generally not as reliable as more modern aircraft.

The Company's revenues from the services performed for BAX/Schenker, derived primarily by providing Boeing 727 and DC-8 airlift, were \$52.4 million and \$168.7 million for the three and nine month periods ended September 30, 2011, respectively, compared to \$49.1 million and \$141.4 million for the corresponding periods of 2010. The Company's revenues from BAX/Schenker comprised approximately 27% and 30% of the Company's total revenues during the three and nine month periods ended September 30, 2011, respectively (16% and 17% of total revenues excluding directly reimbursable revenues, respectively).

RESULTS OF OPERATIONS

Summary

The net loss from continuing operations was \$4.8 million for the third quarter of 2011, compared to net income of \$11.4 million for the third quarter of 2010. The pre-tax loss from continuing operations was \$6.7 million, inclusive of asset impairment charges and derivative losses during the third quarter of 2011 compared to pre-tax earnings of \$16.7 million in the third quarter of 2010 in which no impairment charges or derivative losses were recorded. The operating loss was \$1.5 million during the third quarter of 2011 compared to operating income of \$21.2 million in the third quarter of 2010. The decline in earnings from continuing operations as compared to the corresponding 2010 period resulted from the recognition of impairment charges in the third quarter of 2011. Operating income, excluding impairment charges improved \$4.4 million for the third quarter of 2011, driven by CAM, which had five additional aircraft under external leases as of September 30, 2011 compared to a year ago.

Net earnings and pre-tax earnings from continuing operations were \$10.3 million and \$17.6 million for the first nine months of 2011, respectively, and declined by \$17.7 million and \$25.8 million, respectively, for the first nine months of 2011 compared to the corresponding 2010 periods. The decline in earnings from continuing operations as compared to the first nine months of 2010 includes asset impairment charges of \$27.1 million, interest rate derivative losses of \$5.4 million and the write-off of \$2.9 million of unamortized debt issuance costs related to the refinancing of the Company's debt in 2011. None of these charges occurred during 2010. Pre-tax earnings for 2011 included lower interest expense which declined by \$3.5 million compared to the first nine months of 2010.

Operating income, which included the asset impairment charge, was \$36.7 million for the first nine months of 2011 and declined \$20.8 million compared to the corresponding 2010 period. Operating income for first nine months of 2011, after removing impairment charges was \$63.9 million compared to \$57.5 million for the corresponding period of 2010, up 11 percent. This improved earnings over 2010, was driven by CAM, which placed five additional aircraft under lease since September 30, 2010.

Table of Contents

The Company's impairment charges stemming from BAX/Schenker's transition to a new U.S. business model are described below:

- \$22.1 million (\$13.7 million after income tax benefit) to write-down Boeing 727 and DC-8 freighters, engines and related parts to their appraised fair values. In light of BAX/Schenker's decision to phase-out its dedicated air network in the U.S. and after evaluating business prospects for these aircraft, management has decided to discontinue the service of Boeing 727 and DC-8 freighters.
- \$2.3 million (\$1.4 million after income tax benefit) to write-down customer relationship intangible assets, reflecting the closure of BAX/Schenker's dedicated air network and the end of our exclusive contract to provide domestic airlift to BAX/Schenker.
- \$2.8 million (\$2.8 million after income tax benefit) to write-down goodwill acquired when the Company purchased ATI, operator of the DC-8 aircraft for BAX/Schenker. The write-down reflects lower forecasted cash flows in the near term as ATI re-fleets by replacing DC-8 aircraft operated for BAX/Schenker with more efficient Boeing 767 and 757 aircraft for other leading air delivery companies.

During 2011, the Company executed a new credit facility with a consortium of banks ("Credit Facility"). The new Credit Facility refinanced the Company's previous term loan and provides liquidity to expand the Company's aircraft fleet through April 2016. The new Credit Facility includes a term loan of \$150 million and a \$175 million revolving credit loan, of which the Company has drawn \$90 million. In conjunction with the execution of the new Credit Facility, the Company terminated its previous credit agreement, which resulted in the write-off of \$2.9 million of unamortized debt issuance costs associated with that credit agreement and the recognition of \$3.9 million of losses for certain interest rate swaps previously designated as cash flow hedges of interest payments stemming from the former term loan. These charges, which totaled \$6.8 million before income tax effects, were recorded in March 2011.

Customer revenues from continuing operations increased by \$27.8 million and \$74.9 million for the third quarter and first nine months of 2011, respectively, compared to the corresponding 2010 periods. Excluding directly reimbursed revenues, customer revenues increased by \$24.0 million and \$38.8 million for the third quarter and first nine months of 2011 compared to the corresponding 2010 periods. Revenue growth during the third quarter of 2011 compared to 2010 reflects additional external aircraft leases by CAM, up \$3.4 million, additional Boeing 767 aircraft operations being performed under the ACMI Services segment, up \$16.6 million, and increased aircraft maintenance services, up \$2.8 million, which is reflected under other business operations. Revenue growth compared to the first nine months of 2010 was also driven by CAM, up \$19.0 million, aircraft maintenance operations, up \$9.1 million, and ACMI Services. Revenue growth comparisons to 2010 are affected by the termination of the DHL ACMI agreement and the termination of the severance and retention agreement ("S&R agreement") with DHL in March 2010. Under the S&R agreement, DHL compensated and reimbursed ABX for its management and costs associated with DHL's network restructuring starting in May 2008 and continuing through March 2010. Revenues from the S&R agreement were \$4.0 million in the first quarter of 2010. Certain revenues recorded as airline services under the former DHL ACMI agreement, are contractually reimbursed by DHL under the new CMI agreement and reflected in reimbursed revenues beginning April 1, 2010.

Table of Contents

A summary of our revenues and pre-tax earnings from continuing operations is shown below (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,

Pre-Tax Earnings (Loss) from Continuing Operations	(6,666)	16,670	17,581	43,352
Add net interest expense and other non operating charges	5,156	4,558	19,139	14,183
Add asset impairment charges	27,144	—	27,144	—
Adjusted Operating Income	\$25,634	\$21,228	\$63,864	\$57,535

Other Reimbursable revenues include certain operating costs that are reimbursed to the airlines by their customers. Such costs include fuel used, landing fees and certain aircraft maintenance expenses. The types of costs that are reimbursed varies by customer operating agreement.

Adjusted operating income, a non GAAP measure, is operating income less asset impairment charges. Management uses Adjusted operating income, to compare the performance of its core operating results between periods. Adjusted operating income should not be considered in isolation or as a substitute for analysis of the Company's results as reported under GAAP.

Table of Contents**CAM**

As of September 30, 2011, CAM had 59 aircraft that were under lease, 38 of them internally to ABX, ATI and CCIA. CAM's pre-tax earnings, inclusive of an interest expense allocation and \$6.8 million for aircraft impairment charges, were \$9.4 million and \$36.5 million, respectively, during the third quarter and first nine months of 2011. CAM's pre-tax earnings, excluding the aircraft impairment charges, increased by \$4.2 million and \$15.0 million for the third quarter and first nine months of 2011 compared to the corresponding periods of 2010. Improved earnings reflected six more Boeing 767 freighter aircraft under lease since September 30, 2010. During the third quarter of 2011, CAM completed the freighter modification of two Boeing 767-200 aircraft and leased them to a Brazilian airline under long-term lease provisions, bringing the total number of aircraft leased to external customers to 21. During the second quarter of 2011, CAM leased two Boeing 767-200 aircraft to DHL, fulfilling its commitment from March of 2010 to lease 13 aircraft to DHL under long-term lease provisions. Additionally, during the first quarter of 2011, CAM leased one additional Boeing 767-200 freighter aircraft to an external customer. During 2011, CAM completed the modification of its first two Boeing 767-300 freighter aircraft and leased the aircraft internally to ATI.

CAM's revenues for the third quarter and first nine months of 2011 grew to \$37.0 million and \$101.9 million, respectively, compared to \$28.6 million and \$71.2 million during the corresponding periods of 2010. Revenues from external customers, particularly DHL, accounted for \$3.4 million and \$19.0 million, respectively, of the increase for the third quarter and first nine months of 2011. Since September 30, 2010, CAM has leased five more Boeing 767-200 aircraft externally, including two more aircraft to DHL. CAM's revenues from the Company's airlines totaled \$19.2 million and \$54.2 million for the third quarter and first nine months of 2011, respectively, compared to \$14.2 million and \$42.4 million for the corresponding periods of 2010.

CAM's fleet of Boeing 727 and DC-8 aircraft, which have been leased internally to CCIA and ATI, respectively, is being marketed to other airlines and part dealers.

ACMI Services Segment

As of September 30, 2011, ACMI Services included 55 in-service freighter aircraft, including 37 freighters leased internally from CAM, five leased from external providers and thirteen CAM-owned freighter aircraft which were under lease to DHL and operated by ABX under the CMI agreement. During 2011, ABX began to lease and operate two more DHL-owned aircraft, bringing to four the number of DHL-owned aircraft that ABX leases from DHL and operates under the CMI agreement. Also during 2011, ATI leased two Boeing 767-300 aircraft from CAM and began to operate the aircraft under ACMI agreements.

ACMI Services revenues were \$163.0 million and \$142.7 million during the third quarter of 2011 and 2010, respectively, and \$474.5 million and \$428.2 million for the first nine months of 2011 and 2010, respectively. Revenues from airline services increased \$16.6 million and \$14.2 million for the third quarter and first nine months of 2011 compared to the corresponding periods of 2010 driven by higher block hours flown for customers. Aircraft block hours flown for customers increased 6% and 8% during the third quarter and first nine months of 2011 compared to the corresponding periods of 2010. Reimbursable revenues increased \$3.7 million and \$36.0 million for the third quarter and first nine months of 2011, respectively, compared to the corresponding periods of 2010. The comparison of airline services revenues and reimbursable revenues to 2010 reflects the new commercial agreements between ABX and DHL which became effective in April 2010. Airline services revenues for the first quarter of 2010 include compensation based on aircraft depreciation and certain maintenance expense under the former cost-plus DHL ACMI agreement. Beginning in April 2010, lease revenues for the DHL network aircraft have been reflected in CAM's revenues, while compensation for certain aircraft related maintenance costs have been reflected as reimbursable revenues. Revenues from S&R activities declined by \$4.0 million during 2011 compared to 2010 due to the termination of the S&R agreement in March 2010.

ACMI Services incurred a pre-tax loss of \$17.6 million during the third quarter of 2011 due to asset impairment charges of \$20.4 million. The pre-tax earnings for ACMI Services, excluding asset impairment charges, were \$2.8 million and \$3.4 million from airline services for the third quarter of 2011 and 2010, respectively, compared to \$4.8 million and \$11.4 million from airline services for the first nine months of 2011 and 2010. Operating results during 2011 were negatively impacted by unscheduled aircraft downtime, start-up costs for new Boeing 767 operations and reductions in revenues from U.S. military charters. As a result of unscheduled aircraft maintenance events, revenue

flights were missed and higher operating expenses were incurred during the aircraft downtime. Some of the downtime

28

Table of Contents

affected DC-8 combi aircraft and Boeing 767 freighters operating in remote regions that were difficult to service. Revenues from the U.S. military declined \$4.1 million during the first nine months of 2011 compared to the corresponding period of 2010 due to maintenance related cancellations and contractual rate reductions. The results for 2011 included start-up costs by ATI to gain passenger authority and operate passenger routes under an ACMI agreement with a tourist operator beginning in April 2011. This agreement was for the purpose of allowing ATI to build 12 months of passenger operating experience on the Boeing 767 aircraft, which is required in order to transport passengers for the U.S. military on such aircraft. Additionally, ATI incurred higher crew preparation costs in 2011 to support the addition of its first two Boeing 767-300 aircraft during the year and transition DC-8 crews to the Boeing 767 aircraft.

DHL, BAX/Schenker and the U.S. military accounted for 35%, 32% and 15% of ACMI Services revenues for the quarter ended September 30, 2011, respectively. Revenues from DHL and BAX/Schenker include the reimbursement of certain expenses. Excluding these reimbursable revenues, DHL, BAX/Schenker and the U.S. military accounted for 35%, 20% and 20%, respectively, of ACMI Services revenues for the third quarter of 2011. Excluding reimbursable revenues, DHL, BAX/Schenker and the U.S. military accounted for 42%, 23% and 23% of ACMI Services revenues for the quarter ended September 30, 2010, respectively.

As noted above, during 2011, ACMI Services included the operation of Boeing 727 and DC-8 aircraft in BAX/Schenker's North American network which is being phased-out in 2011. The Company has begun to market these aircraft, engines and related parts to other airlines and parts dealers. Revenue operations using the Boeing 727 and DC-8 freighters will be limited while the aircraft are marketed.

Other Activities

The Company sells aircraft parts and provides aircraft maintenance and modification services to other airlines. The Company also operates three U.S. Postal Service ("USPS") sorting facilities. The Company provides ground equipment leasing and facility maintenance, as well as specialized services for aircraft fuel management. Other activities also include the management of workers' compensation claims under an agreement with DHL and gains from the reduction in employee post-retirement obligations. Prior to April 1, 2010, other activities included an allocation of ABX's overhead expenses that could not be charged to DHL under the former cost-plus agreements.

External customer revenues from all other activities were \$14.7 million and \$42.0 million for the third quarter and first nine months of 2011, respectively, compared to \$10.8 million and \$32.1 million for the corresponding periods in 2010. Increased revenues primarily reflect increased aircraft maintenance projects in 2011 compared to the previous year and additional services provided to the USPS beginning in April 2011.

The pre-tax earnings from other activities were \$3.7 million and \$7.0 million for the third quarter and first nine months of 2011, respectively, compared to \$3.1 million and \$5.6 million for the corresponding periods of 2010. The increase in pre-tax earnings for the third quarter of 2011 compared to the corresponding 2010 period of \$0.6 million reflects increased aircraft maintenance projects completed during the third quarter of 2011 offset by higher facility expenses for the other businesses segments, additional corporate expenses to support the subsidiaries and additional business development expenses to support the Company's growth. Pre-tax earnings from other activities increased \$1.4 million for the first nine months of 2011 compared to the corresponding 2010 period. The increase in pre-tax earnings for the first nine months of 2011 reflects increased service revenues for managing workers' compensation claims for DHL, reduced employee post-retirement obligations resulting from benefit plan changes beginning in March 2010, the absence of unallocated overhead charges during the first quarter of 2010 that ABX could not charge to DHL under the former DHL ACMI agreement, offset by the higher facility expenses and business developments costs experienced during 2011.

Table of Contents

Fleet Summary

The Company's aircraft fleet is summarized below as of September 30, 2011 (\$'s in thousands):

	ACMI Services	CAM	Total
In-service aircraft			
Aircraft owned or under capital lease			
Boeing 767-200	14	21	35
Boeing 767-300	2	—	2
Boeing 757	2	—	2
Boeing 727	7	—	7
DC-8	13	—	13
Total	38	21	59
Carrying value			\$610,538
Operating lease			
Boeing 767-200	4	—	4
Boeing 767-300	1	—	1
Total	5	—	5
Carrying value			\$159
Aircraft for freighter modification			
Boeing 767-200	—	2	2
Boeing 767-300	—	2	2
Boeing 757	—	2	2
Total	—	6	6
Carrying value			\$87,142
Idle aircraft (not scheduled for revenue)			
Aircraft owned or under capital lease			
DC-8	—	5	5
Boeing 727	—	4	4
Total	—	9	9
Carrying value			\$2,987
Aircraft under operating lease			
Boeing 727	1	—	1
Total	1	—	1
Carrying value			\$28

As of September 30, 2011, ACMI Services was leasing 38 of its 43 in-service aircraft internally from CAM. ACMI Services operated 13 of the 21 aircraft that CAM leases to external customers.

Aircraft fleet changes during 2011 are summarized below by fleet type:

CAM completed the freighter modification of four Boeing 767-200 aircraft and ABX returned a Boeing 767-200 aircraft to CAM. CAM leased the five Boeing 767-200 aircraft to external customers under long-term agreements, including two to DHL, bringing to 13 the total Boeing 767-200 aircraft leased to DHL. During 2011, ABX began to lease and operate two DHL-owned aircraft, bringing to four the number of DHL-owned aircraft that ABX leases from DHL and operates under the CMI agreement.

CAM completed the freighter modification of its first two Boeing 767-300 aircraft and leased them

Table of Contents

internally to ATI, who is operating them for a customer under ACMI agreements. CAM purchased its fourth Boeing 767-300 passenger aircraft with the intent of modifying it into a standard freighter.

CAM purchased two Boeing 757 passenger aircraft with the intent of modifying one into a combi aircraft and the other into a standard freighter.

We reduced the number of Boeing 727 and DC-8 aircraft in response to the phase-out of BAX/Schenker's North American network and diminished demand for these aircraft. The Boeing 727 and DC-8 freighter aircraft, engines and aircraft parts with a carrying value of \$18.3 million are being marketed to part dealers and other airlines. These aircraft are not collateral for the Company's Credit Facility.

Additionally, in October 2011, CAM purchased a Boeing 757 passenger aircraft for modification into a combi aircraft configuration and its fifth Boeing 767-300 aircraft for modification into a standard freighter aircraft. We expect to complete the modification of two Boeing 767-200 aircraft, two Boeing 767-300 aircraft and one Boeing 757 aircraft into standard cargo freighters by mid February 2012. Additionally, we expect to complete the conversion of the fifth Boeing 767-300 aircraft into a standard freighter during the second quarter of 2012 and two Boeing 757 passenger aircraft into a combi variant by the fourth quarter of 2012. Management is currently negotiating with current and potential customers to place the Boeing 767-300 aircraft into service as freighter conversions are completed. Lead times and start-up costs may impact future operating results.

Expenses from Continuing Operations

Salaries, wages and benefits expense increased by 19% and 8% during the three and nine month periods ended September 30, 2011, respectively, compared to the corresponding periods of 2010. The increase reflects a 6% increase in the number of crew members since September 30, 2010 to support additional aircraft block hours and revenue growth. Additionally, labor expenses for customer aircraft maintenance projects increased during the third quarter of 2011, coinciding with the completion of the projects and increased aircraft maintenance revenues.

Fuel expense increased by \$8.1 million and \$31.9 million during the three and nine month periods ended September 30, 2011, respectively, compared to the corresponding periods of 2010. The increase reflects the higher cost of aviation fuel. The average price of a gallon of aviation fuel increased 46% and 37% during the three and nine month periods ended September 30, 2011, respectively, compared to the corresponding periods of 2010. The cost of fuel is generally reimbursed to our airlines under our operating agreements and reflected as revenues.

Depreciation and amortization expense remained flat and increased \$3.6 million during the three and nine month periods ended September 30, 2011, respectively, compared to the corresponding periods of 2010. Depreciation expense increased during the year due to the deployment of six modified Boeing 767 aircraft since the beginning of 2011. Depreciation expense for the third quarter of 2011 included incremental depreciation expense for adding Boeing 767 aircraft but was offset by a decrease in depreciation expense of \$2.0 million for Boeing 727 and DC-8 aircraft because their carrying values declined since September 30, 2010.

Maintenance, materials and repairs expense increased by \$1.3 million and \$10.1 million during the three and nine month periods ended September 30, 2011, respectively, compared to the corresponding periods of 2010. The increase in maintenance expense was primarily a result of increased flight hours on the Company's Boeing 767-200 aircraft engines. The Company maintains the General Electric CF6 engines for its Boeing 767-200 aircraft through a "power by the hour" agreement ("PBH agreement") with a major service provider. The Company incurs a fee under the PBH agreement for each flight hour operated. The Company has also arranged for CAM's external leasing customers to participate under its PBH agreement. Engine maintenance expense increased due to the increase in hours flown by aircraft operated by the Company and an increase in hours flown by aircraft leased by CAM to external customers.

Landing and ramp expense, which includes the cost of deicing chemicals, increased by \$0.3 million for both the three and nine month periods ended September 30, 2011, respectively, compared to the corresponding periods of 2010. The increase during 2011 reflects additional expenses associated with ramp utilization during unscheduled aircraft down time.

Travel expense increased by \$1.9 million and \$4.4 million during the three and nine month periods ended September 30, 2011, respectively, compared to the corresponding periods of 2010. The increase is a result of additional flying operations, particularly in the European and Asia-Pacific regions.

Rent expense increased by \$1.0 million and \$4.7 million during the three and nine month periods ended September

Table of Contents

30, 2011, respectively, compared to the corresponding periods of 2010. The increase reflects five additional Boeing 767 freighter aircraft the Company began leasing since September 2010 and an increase in the rental rates for the Company's facilities in Wilmington, Ohio in conjunction with a new lease agreement executed with a regional port authority in May 2010. Four of the five aircraft leased by the Company are owned by DHL and operated by ABX under the CMI agreement.

Insurance expenses increased by \$0.6 million and \$0.3 million during the three and nine month periods ended September 30, 2011, respectively, compared to the corresponding periods of 2010 due to changes in certain employee insurance costs.

Other operating expenses include professional fees, navigational services, employee training, utilities, and the cost of parts sold to customers. Other operating expenses increased by \$2.6 million and \$2.5 million for the three and nine month periods ended September 30, 2011, compared to the corresponding periods of 2010 primarily due to additional aircraft operations during 2011.

Interest expense decreased by \$1.3 million and \$3.5 million during the three and nine month periods ended September 30, 2011, respectively, compared to the corresponding periods of 2010. The decline in interest expense reflects the reduction in the level of the Company's debt during the first four months of 2011, lower interest rates and an increase in capitalized interest for the aircraft undergoing freighter modification. Interest rates on the Company's variable interest, unsubordinated term loan decreased from 2.9% in the third quarter of 2010 to 2.3% for the third quarter of 2011.

For the three and nine month periods ended September 30, 2011, the Company recorded a pre-tax net loss on derivatives of \$1.9 million and \$5.4 million, respectively. The losses reflect the impact of lower market interest rates at September 30, 2011 on the interest rate derivatives held by the Company. In the first quarter of 2011, in conjunction with the new Credit Facility, the Company terminated its hedge accounting of interest rate swaps related to the former term loan, which resulted in the recognition of \$3.9 million of losses which had previously been reflected in other comprehensive income. Additionally, the new Credit Facility requires the Company to maintain derivative instruments for at least fifty percent of the outstanding balance of the new subordinated term loan. As a result, the Company entered into a new interest rate swap in July of 2011. The Company did not designate the recent interest rate swap as a hedge for accounting purposes. Accordingly, the effect of lower interest rates since the purchase of the interest rate swap resulted in a net unrealized loss for the third quarter of 2011. Future fluctuations in interest rates will result in the recording of gains and losses on interest rate derivatives that the Company holds.

For the nine month period ended September 30, 2011, the Company recorded charges of \$2.9 million to write-off unamortized debt issuance costs. During the first quarter of 2011, the Company wrote off \$2.9 million of unamortized costs associated with the former credit agreement. During the second quarter of 2011, the Company wrote off a small amount of unamortized costs associated with an aircraft loan which was completely paid off prior to maturity.

The effective tax rate for continuing operations for the three and nine month periods ended September 30, 2011 was 27.6%, and 41.2% compared to 31.7% and 35.3%, respectively, for the corresponding periods in 2010. The effective tax rate for continuing operations in 2011 was affected by impairment charges that are not deductible for federal income tax purposes. The Company's effective tax rate for continuing operations was approximately 37% for three and nine month periods ended September 30, 2011 after adjusting for \$2.8 million of non-deductible impairment charges. The effective tax rate for 2010 was smaller due to the recognition of a deferred tax benefit of \$0.4 million in the third quarter of 2010. The deferred tax benefit in 2010 related to a previously unrecognized tax position under the Financial Accounting Standards Board Accounting Standards Codification ("FASB ASC") Topic 740-10 Income Taxes. The statute of limitations for this item expired, resulting in the recording of the deferred tax benefit.

Income taxes recorded through September 30, 2011 have been estimated based on year-to-date income and projected results for the full year, excluding discrete items. The effective tax rate for the full year 2011 is projected to be approximately 41.2%.

Table of Contents

FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

Cash Flows

Net cash generated from operating activities totaled \$106.9 million for the first nine months of 2011 compared to \$81.7 million in the first nine months of 2010. Increased cash flows for 2011 reflect improved operating results excluding the non-cash impairment charges of \$27.1 million during 2011. The increased operating results for 2011 were driven by additional aircraft leases to external customers who prepay rent at the beginning of each month. Cash flows for 2011 also include a reduction of \$23.4 million in the Company's contribution to its defined benefit pension plans during 2011 compared to 2010. During 2010, cash flows included the receipt from DHL of amounts in reimbursement for severance payments made to employees and costs incurred arising from the termination of the former contracts with DHL.

Capital spending levels were primarily the result of aircraft modification costs for Boeing 767 aircraft. Cash payments for capital expenditures were \$162.6 million in the first nine months of 2011 compared to \$90.7 million in the first nine months of 2010. Capital expenditures in the first nine months of 2011 included cargo modification costs related to twelve aircraft compared to eight aircraft during the first nine months of 2010. Capital expenditures in 2011 included \$138.9 million for the acquisition and modification of aircraft, \$20.8 million for required heavy maintenance and \$2.9 million for other equipment costs.

During May of 2011, we executed a new credit facility to refinance the former term loan of \$172.4 million. The Company drew \$150 million under the new term loan in May and has drawn \$90 million from a revolving credit agreement since the inception of the new credit facility to finance its fleet expansion. We made debt principal payments of \$201.7 million, including the payoff of the former term loan of \$172.4 million during the first nine months of 2011. During the second quarter of 2011, we completely paid off an aircraft loan at par value prior to maturity, remitting \$13.8 million for the outstanding principal. Additionally, \$4.7 million of principal balance for the DHL promissory note was extinguished, pursuant to the CMI agreement with DHL during the first nine months of 2011.

Commitments

Through CAM, the Company continues to make investments in Boeing 767 and 757 aircraft. As these aircraft are modified, we will place them into service under dry leasing arrangements to external customers or ACMI operations using our airlines, depending on which alternative provides the best long term return and considering other factors, including geographical placement and customer diversification.

In September 2008, CAM entered into an agreement with Israel Aerospace Industries Ltd. ("IAI") for the conversion of up to fourteen Boeing 767-200 passenger door freighters to a standard freighter configuration. The conversion primarily consists of the installation of a standard cargo door and loading system. Through September 30, 2011, twelve such aircraft have completed the modification process. As of September 30, 2011, the last two of the fourteen Boeing 767-200 aircraft were undergoing modification to standard freighter configuration. As of September 30, 2011, CAM expects to pay IAI approximately \$9.0 million to complete the aircraft currently undergoing modification.

In August 2010, CAM entered into an agreement with M&B Conversions Limited and IAI for the conversion by IAI of up to ten Boeing 767-300 series passenger aircraft to a standard freighter configuration during the 10-year term of the agreement. As of September 30, 2011, two such aircraft have completed the modification process and two Boeing 767-300 aircraft were undergoing modification to a standard freighter configuration. If CAM were to cancel the conversion program as of September 30, 2011, it would owe IAI approximately \$1.5 million associated with additional conversion part kits which have been ordered.

In October 2010, CAM entered an agreement with Precision Conversions, LLC ("Precision") for the design, engineering and certification of a Boeing 757 "combi" aircraft variant. The Boeing 757 combi variant to be developed by Precision will incorporate 10 full cargo pallet positions along with passenger seating for up to 58 occupants. In April 2011, CAM purchased a Boeing passenger 757 aircraft which is currently undergoing combi development. In July 2011, CAM purchased another Boeing 757 passenger aircraft and inducted it into the standard freighter modification process with Precision. CAM is committed to convert at least two Boeing 757 aircraft with Precision. If CAM were to cancel the conversion programs as of September 30, 2011, it would owe Precision approximately \$8.0 million associated with engineering efforts and conversion part kits which have been ordered.

In October of 2011, CAM purchased another Boeing 757-200 passenger aircraft for combi conversion and its fifth

33

Table of Contents

Boeing 767-300 for modification into a standard freighter. We estimate that capital expenditures for 2011 will be \$195 million primarily for aircraft acquisitions and related modification costs involving six Boeing 767-200 aircraft, five Boeing 767-300 aircraft and three Boeing 757 aircraft. Further, we estimate that total capital expenditures for 2012, including the costs to modify Boeing 767 and 757 aircraft could range from \$180 million to \$200 million. Actual capital spending for 2012 will be impacted by the availability and price of passenger Boeing 767-300 aircraft for conversion into freighter aircraft, as well as the number of such aircraft progressing through the freighter modification process. We expect to finance the aircraft purchases and modifications from current cash balances, future operating cash flows and our Credit Facility.

Liquidity

On May 9, 2011, the Company executed a new credit facility with a consortium of banks ("Credit Facility") to refinance a term loan of \$172.4 million. The new Credit Facility includes a term loan of \$150 million and a \$175 million revolving credit loan, of which the Company has drawn \$90 million. The new Credit Facility has an additional accordion feature of \$50 million which the Company may draw subject to the lenders' consent. Under the Credit Facility, interest rates are adjusted quarterly based on the Company's earnings before interest, taxes, depreciation and amortization expenses ("EBITDA"), outstanding debt level plus the prevailing LIBOR or prime rates. At the Company's current debt-to-EBITDA ratio, the unsubordinated term loan and revolving loan bear a variable interest rate of 2.34% and 2.23%, respectively. Repayments of the term loan are scheduled to begin in June 2012 and the Company expects to make further draws on the revolving loan to fund its fleet expansion plans. In conjunction with the execution of the new Credit Facility, the Company terminated its previous credit agreement.

The new Credit Facility is collateralized by certain of the Company's Boeing 767 and 757 aircraft that are not collateralized under aircraft loans. Under the terms of the Credit Facility, the Company is required to maintain collateral coverage equal to 150% of the outstanding balance of the term loan and revolving credit loan. Under the Credit Facility, the Company is subject to expenses, covenants and warranties that are usual and customary. The Credit Facility contains covenants including, among other things, limitations on certain additional indebtedness, guarantees of indebtedness, and the level of annual capital expenditures. The Credit Facility stipulates events of default including unspecified events that may have a material adverse effect on the Company. If an event of default occurs, the Company may be forced to repay, renegotiate or replace the Credit Facility.

At September 30, 2011, the Company had approximately \$28.8 million of cash balances. The Company had \$73.1 million of unused credit facility, net of draws of \$90.0 million and outstanding letters of credit of \$11.9 million, through its Credit Facility. As specified under terms of ABX's CMI agreement with DHL, the \$21.7 million balance at September 30, 2011 of the unsecured note payable to DHL will be extinguished ratably without payment through March 31, 2015. We believe that the Company's current cash balances and forecasted cash flows provided from its operating agreements, combined with its Credit Facility, will be sufficient to fund operations, scheduled debt payments, required pension funding and planned capital expenditures for at least the next 12 months.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

"Management's Discussion and Analysis of Financial Condition and Results of Operations," as well as certain disclosures included elsewhere in this report, are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to select appropriate accounting policies and make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingencies. In certain cases, there are alternative policies or estimation techniques which could be selected. On an ongoing basis, we evaluate our selection of policies and the estimation techniques we use, including those related to revenue recognition, post-retirement liabilities, bad debts, self-insurance reserves, valuation of spare parts inventory, useful lives, salvage values and impairment of property and equipment, income taxes, contingencies and litigation. We base our estimates on historical experience, current conditions and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources, as well as for identifying and assessing our accounting treatment with respect to commitments and contingencies. Actual results may differ from these

estimates under different assumptions or conditions. We believe the following significant and critical accounting policies involve the more significant judgments and estimates used in preparing the consolidated financial statements.

34

Table of Contents

Revenue Recognition

Revenues generated from airline service agreements are typically recognized based on hours flown or the amount of aircraft and crew resources provided during a reporting period. Certain agreements include provisions for incentive payments based upon on-time reliability. These incentives are typically measured on a monthly basis and recorded to revenue in the corresponding month earned. Revenues for operating expenses that are reimbursed through customer agreements, including consumption of aircraft fuel, are generally recognized as the costs are incurred. Revenues from charter service agreements are recognized on scheduled and non-scheduled flights when the specific flight has been completed. Revenues from the sale of aircraft parts are recognized when the parts are delivered. Revenues earned and expenses incurred in providing aircraft-related maintenance, repair or technical services are recognized in the period in which the services are completed and delivered to the customer. Revenues derived from transporting freight and sorting parcels are recognized upon delivery of shipments and completion of services. Aircraft lease revenues are recognized as operating lease revenue on a straight-line basis over the term of the applicable lease agreements. The Company's revenues for the first quarter of 2010 included reimbursement for expenses incurred under the former DHL ACMI agreement, the incremental mark-up revenues set by amendments to the DHL ACMI agreement, and reimbursement for employee severance, retention, vacation and other benefit costs incurred during the period. Revenues from the former DHL ACMI agreement were generally determined based on expenses incurred during a period plus mark-ups and were recognized when the related services were performed. ABX and DHL amended the DHL ACMI agreement to set mark-ups to specific quarterly amounts for the first quarter of 2010. In 2008, ABX and DHL executed a severance and retention agreement ("S&R agreement") which specified employee severance, retention and other benefits that DHL reimbursed to ABX for payment to its employees that were affected in conjunction with DHL's U.S. restructuring plan. DHL was obligated to reimburse ABX for the cost of employee severance, retention, productivity bonuses and vacation benefits paid in accordance with the agreement.

Goodwill and Intangible Assets

In accordance with the Financial Accounting Standards Board Accounting Standards Codification ("FASB ASC") Topic 350-20 Intangibles—Goodwill and Other, we assess in the fourth quarter of each year whether the Company's goodwill acquired in acquisitions is impaired. Additional assessments may be performed on an interim basis whenever events or changes in circumstances indicate an impairment may have occurred. Indefinite-lived intangible assets are not amortized but are assessed for impairment annually, or more frequently if impairment indicators occur. Finite-lived intangible assets are amortized over their estimated useful economic lives and are periodically reviewed for impairment.

Application of the goodwill impairment test requires significant judgment, including the determination of the fair value of each reporting unit that has goodwill. The Company has two reporting units, ATI and CAM, that have goodwill. We estimate the fair value of ATI and CAM separately using a market approach and an income approach utilizing discounted cash flows applied to a market-derived rate of return. The market approach utilizes market multiples from comparable publicly traded companies. The market multiples include revenues, EBIT (earnings before interest and taxes), EBITDA (earnings before interest, taxes, depreciation and amortization) and EBITDAR (earnings before interest, taxes, depreciation, amortization and rent). We derive cash flow assumptions from many factors including recent market trends, expected revenues, cost structure, aircraft maintenance schedules and long-term strategic plans for the deployment of aircraft. Key assumptions under the discounted cash flow models include projections for the number of aircraft in service, capital expenditures, long-term growth rates, operating cash flows and market-derived discount rates.

The first step of the goodwill impairment test requires a comparison of the fair value of the reporting unit to its respective carrying value. If the carrying value of a reporting unit is less than its fair value, no indication of impairment exists and a second step is not performed. If the carrying amount of a reporting unit is higher than its fair value, there is an indication that an impairment may exist and a second step is performed. In the second step, fair values are assigned to all of the assets and liabilities of a reporting unit, including any unrecognized intangible assets, and the implied fair value of goodwill is calculated. If the implied fair value of goodwill is less than the recorded goodwill, an impairment loss is recorded for the difference and charged to operations.

We have used the assistance of an independent business valuation firm in estimating an expected market rate of return, and in the development of a market approach for ATI and CAM using multiples of EBITDAR, EBITDA, EBIT and revenues from comparable publicly traded companies. Based on our analysis, as of July 31, 2011, CAM's fair

Table of Contents

value exceeded its carrying value by more than 25%. However, we estimated that ATI's fair value was less than its carrying value. Accordingly, we calculated the implied fair value of ATI's goodwill and recorded an impairment charge of \$2.8 million to reduce the recorded goodwill to the implied fair value.

The Company's key assumptions used for goodwill testing include uncertainties. Those uncertainties include the level of demand for cargo aircraft by shippers, the U.S. military and freight forwarders and CAM's ability to lease aircraft near expected modification completion dates. We anticipate that CAM will successfully modify five Boeing 767 aircraft and one Boeing 757 aircraft into a standard freighter configuration over the next year and place them under long-term lease agreements. We anticipate that CAM will successfully modify two Boeing 757 aircraft into combi configuration over the next two years and that ATI will deploy them. We expect that ATI will add two more Boeing 767 aircraft into service during 2012. We expect that ATI will continue to operate combi aircraft for the U.S. military. The demand for customer airlift is projected based on input from customers, the volume of bids requested by the U.S. military, management's interface with customer planning personnel and aircraft utilization trends. Certain events or changes in circumstances could negatively impact our key assumptions. Customer preferences for cargo aircraft may be impacted by changes in aviation fuel prices. Key customers, including the U.S. military, may decide that they do not need as many aircraft as projected, or they may find alternative airlift.

The Company's finite lived intangible asset is for customer relationships acquired with ATI. This asset is amortized over the estimated useful economic life and reviewed for impairment whenever events or changes in circumstances indicate that carrying amounts may not be recoverable. The fair value of the asset was derived using projected revenues from existing customers and related attrition rates using the guidance under FASB ASC Topic 360-10 Property, Plant and Equipment, and separately from a discounted cash flow model used for goodwill impairment. The projected net cash flows attributed to existing customers were discounted using an estimated cost of capital, based on market participant assumptions.

Long-lived assets

Aircraft and other long-lived assets are tested for impairment whenever events or changes in circumstances indicate the carrying value of the assets may not be recoverable. Factors which may cause an impairment include termination of aircraft from a customer's network, extended operating cash flow losses from the assets and management's decisions regarding the future use of assets. To conduct impairment testing, the Company groups assets and liabilities at the lowest level for which identifiable cash are largely independent of cash flows of other assets and liabilities. For assets that are to be held and used, impairment is recognized when the estimated undiscounted cash flows associated with an asset group is less than the carrying value. If impairment exists, an adjustment is made to write the assets down to fair value, and a loss is recorded as the difference between the carrying value and fair value. Fair values are determined considering quoted market values, discounted cash flows or internal and external appraisals, as applicable.

Depreciation

Depreciation of property and equipment is provided on a straight-line basis over the lesser of an asset's useful life or lease term. We periodically evaluate the estimated service lives and residual values used to depreciate our property and equipment. The acceleration of depreciation expense or the recording of significant impairment losses could result from changes in the estimated useful lives of our assets. We may change the estimated useful lives due to a number of reasons, such as the existence of excess capacity in our air system or ground networks, or changes in regulations grounding or limiting the use of aircraft.

Self-Insurance

We self-insure certain claims related to workers' compensation, aircraft, automobile, general liability and employee healthcare. We record a liability for reported claims and an estimate for incurred claims that have not yet been reported. Accruals for these claims are estimated utilizing historical paid claims data, recent claims trends and, in the case of employee healthcare and workers' compensation, an independent actuarial evaluation. Changes in claim severity and frequency could result in actual claims being materially different than the costs provided for in our results of operations. We maintain excess claim coverage with common insurance carriers to mitigate our exposure to large claim losses.

Contingencies

We are involved in legal matters that have a degree of uncertainty associated with them. We continually assess the

Table of Contents

likely outcomes of these matters and the adequacy of amounts, if any, provided for these matters. There can be no assurance that the ultimate outcome of these matters will not differ materially from our assessment of them. There also can be no assurance that we know all matters that may be brought against us at any point in time.

Income Taxes

We account for income taxes under the provisions of FASB ASC Topic 740-10 Income Taxes. The objectives of accounting for income taxes are to recognize the amount of taxes payable or refundable for the current year and deferred tax liabilities and assets for the future tax consequences of events that have been recognized in the Company's financial statements or tax returns. Judgment is required in assessing the future tax consequences of events that have been recognized in the Company's financial statements or tax returns. Fluctuations in the actual outcome of expected future tax consequences could materially impact the Company's financial position or its results of operations.

The Company has significant deferred tax assets including net operating loss carryforwards ("NOL CFs") for federal income tax purposes which begin to expire in 2025. Based upon projections of taxable income, we determined that it was more likely than not that the NOL CF's will be realized prior to their expiration. Accordingly, we do not have an allowance against these deferred tax assets at this time.

We recognize the impact of a tax position, if that position is more likely than not of being sustained on audit, based on the technical merits of the position.

Post-retirement Obligations

The Company sponsors qualified defined benefit pension plans for ABX's flight crewmembers and other eligible employees. The Company also sponsors non-qualified, unfunded excess plans that provide benefits to executive management and crewmembers that are in addition to amounts permitted to be paid through our qualified plans under provisions of the tax laws. In 2009, we amended each defined benefit plan to freeze the accrual of additional benefits and we provided notification to the affected employees. The Company also sponsors unfunded post-retirement healthcare plans for ABX's flight crewmember and non-flight crewmember employees.

The accounting and valuation for these post-retirement obligations are determined by prescribed accounting and actuarial methods that consider a number of assumptions and estimates. The selection of appropriate assumptions and estimates is significant due to the long time period over which benefits will be accrued and paid. The long-term nature of these benefit payouts increases the sensitivity of certain estimates on our post-retirement costs. In actuarially valuing our pension obligations and determining related expense amounts, assumptions we consider most sensitive are discount rates and expected long-term investment returns on plan assets. Other assumptions concerning retirement ages, mortality and employee turnover also affect the valuations. For our post-retirement healthcare plans, consideration of future medical cost trend rates is an important assumption in valuing these obligations. Actual results and future changes in these assumptions could result in future costs that are materially different than those recorded in our annual results of operations.

Discontinued Operations

In accordance with the guidance of FASB ASC Topic 205-20 Presentation of Financial Statements, a business component whose operations are discontinued is reported as discontinued operations if the cash flows of the component have been eliminated from the ongoing operations of the Company and the Company will no longer have any significant continuing involvement in the business component. The results of discontinued operations are aggregated and presented separately in the consolidated statement of operations. FASB ASC Topic 205-20 requires the reclassification of amounts presented for prior years to reflect their classification as discontinued operations.

Exit Activities

We account for the costs associated with exit activities in accordance with FASB ASC Topic 420-10 Exit or Disposal Cost Obligations. One-time, involuntary employee termination benefits are generally expensed when the Company communicates the benefit arrangement to the employee that it will no longer require the services of the employee beyond a minimum retention period. Liabilities for contract termination costs associated with exit activities are recognized in the period incurred and measured initially at fair value.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is exposed to market risk for changes in interest rates and changes in the price of jet fuel. The risk associated with jet fuel, however, is largely mitigated by reimbursement through the agreements with our customers. On May 9, 2011, the Company executed a new credit facility with a consortium of banks ("Credit Facility"). The new Credit Facility includes a term loan of \$150 million. Under the Credit Facility, interest rates will be adjusted quarterly based on the Company's earnings before interest, taxes, depreciation and amortization expenses ("EBITDA"), its outstanding debt level and prevailing LIBOR or prime rates (see note F to the Notes to the Unaudited Condensed Consolidated Financial Statements). The Company's new Credit Facility requires the Company to maintain derivative instruments for fluctuating interest rates, for at least fifty percent of the outstanding balance of the new unsubordinated term loan. Accordingly, in July 2011, the Company entered into a new interest rate swap instrument. Additionally, the Company continues to hold certain interest rate swaps that were required for the former term loan (see note J to the Notes to the Unaudited Condensed Consolidated Financial Statements). As a result, future fluctuations in LIBOR interest rates will result in the recording of unrealized gains and losses on interest rate derivatives held by the Company.

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

As of September 30, 2011, the Company carried out an evaluation, under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based upon the evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in the reports filed or submitted by it under the Exchange Act is recorded, processed, summarized and reported within time periods specified in the Securities and Exchange Commission rules and forms.

(b) Changes in Internal Controls

There were no changes in internal control over financial reporting during the most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Civil Action Alleging Violations of Immigration Laws

On December 31, 2008, a former ABX employee filed a complaint against ABX, a total of four current and former executives and managers of ABX, Garcia Labor Company of Ohio, and three former executives of the Garcia Labor companies, in the U.S. District Court for the Southern District of Ohio. The case was filed as a putative class action against the defendants, and asserts violations of the Racketeer Influenced and Corrupt Practices Act (RICO). The complaint, which was later amended to include a second former employee plaintiff, seeks damages in an unspecified amount and alleges that the defendants engaged in a scheme to hire illegal immigrant workers to depress the wages paid to hourly wage employees during the period from December 1999 to January 2005. On March 18, 2010, the Court issued a decision in response to a motion filed by ABX and the other ABX defendants, dismissing three of the five claims constituting the basis of Plaintiffs' complaint. Thereafter, on October 7, 2010, the Court issued a decision permitting the plaintiffs to amend their complaint for the purpose of reinstating one of their dismissed claims. On October 26, 2010, ABX and the other ABX defendants filed an answer denying the allegations contained in plaintiffs' second amended complaint.

The complaint is similar to a prior complaint filed by another former employee in April 2007. The prior complaint was subsequently dismissed without prejudice at the plaintiff's request on November 3, 2008.

FAA Enforcement Actions

The Company's airline operations are subject to complex aviation and transportation laws and regulations that are continually enforced by the U.S. Department of Transportation and the Federal Aviation Administration ("FAA"). The Company's airlines receive letters of investigation ("LOIs") from the FAA from time to time in the ordinary course of business. The LOIs generally provide that some action of the airline may have been contrary to the FAA's regulations. The airline responds to the LOIs and if the response is not satisfactory to the FAA, it can seek to impose a civil penalty for the alleged violations. Airlines are entitled to a hearing before an Administrative Law Judge or a Federal District Court Judge, depending on the amount of the penalty being sought, before any penalty order is deemed final. The FAA issued LOIs to CCIA arising from a focused inspection of that airline's operations during the fourth quarter of 2009, several of which resulted in the FAA seeking monetary penalties against CCIA. ABX received an LOI from the FAA alleging that ABX failed to comply with an FAA Airworthiness Directive involving its Boeing 767 aircraft and proposing a monetary settlement. The Company believes it has adequately reserved for those monetary penalties being proposed by the FAA, although it's possible that the FAA may propose additional penalties exceeding the amounts currently reserved.

Brussels Noise Ordinance

The Brussels Instituut voor Milieubeheer ("BIM"), a governmental authority in the Brussels-Capital Region of Belgium that oversees the enforcement of environmental matters, brought an administrative action against ABX alleging numerous violations of an ordinance limiting the noise caused by aircraft overflying the Brussels-Capital Region, which is located near the Brussels Airport. On May 13, 2011, the BIM levied an administrative penalty on ABX in the amount of €0.1 million (approximately \$0.2 million) for numerous alleged violations of the ordinance during the period from May 2009 through November 2009. ABX appealed this matter to the Environmental College in Brussels. However, on October 10, 2011, the Environmental College affirmed the decision of the BIM. ABX now intends to appeal the decision to the Council of State.

The ordinance in question is controversial for the reason that it was adopted by the Brussels-Capital Region and is more restrictive than the noise limitations in effect in the Flemish Region, which is where the Brussels Airport is located. The ordinance is the subject of several court cases currently pending in the Belgian courts and numerous airlines have been levied fines thereunder.

Table of Contents

Similar administrative actions may be brought against ABX with respect to alleged violations of the ordinance during the period from December 2009 through December 2010, which could also result in the imposition of administrative penalties.

ABX ceased operating in Belgium at the end of 2010.

Other

In addition to the foregoing matters, we are also currently a party to legal proceedings in various federal and state jurisdictions arising out of the operation of our business. The amount of alleged liability, if any, from these proceedings cannot be determined with certainty; however, we believe that our ultimate liability, if any, arising from the pending legal proceedings, as well as from asserted legal claims and known potential legal claims which are probable of assertion, taking into account established accruals for estimated liabilities, should not be material to our financial condition or results of operations.

ITEM 1A. RISK FACTORS

The Company faces risks that could adversely affect its financial condition or results of operations. Many of these risks are disclosed in Item 1A of the Company's 2010 Annual Report on Form 10-K, filed with the Securities and Exchange Commission on March 8, 2011. Additional significant risks have been identified below. Other risks that are currently unknown to management or are currently considered immaterial or unlikely, could also adversely affect the Company.

Operating results may be affected by fluctuations in interest rates.

Effective March 31, 2011, in conjunction with its decision to refinance the unsubordinated term loan, the Company ceased hedge accounting for certain interest rates swaps. The interest rate swaps were related to the former, unsubordinated term loan which was refinanced in May 2011. In addition to these interest rate swaps, the Company's new Credit Facility requires the Company to maintain derivative instruments for fluctuating interest rates, for at least fifty percent of the outstanding balance of the new unsubordinated term loan. Accordingly, in July 2011, the Company entered into new derivative instruments. The Company did not designate the derivative instruments as hedges. Future fluctuations in LIBOR interest rates will result in the recording of gains and losses on interest rate derivatives that the Company holds.

The Company sponsors defined benefit pension plans and post-retirement healthcare plans for certain eligible employees. The Company's related pension expense and funding requirements are sensitive to changes in interest rates used to discount the estimated future benefits payments that have been earned by participants in the plans. The annual pension expense is recalculated at the beginning of each calendar year. Discount rates applicable to the Company's defined pension obligations were approximately 100 basis points lower at September 30, 2011 than at the end of 2010. If interest rates remain near the historic lows recently experienced, the Company's pension expense for 2012 is expected to increase significantly as compared to the 2011 expense when recalculated at the beginning of the year. For each 50 basis point decrease in the discount rate, the Company's annualized pension expense could increase approximately \$4.0 million over the 2011 expense level.

Operating results and cash flows will be impacted by BAX/Schenker's decision to phase-out its air network in North America.

Revenues from BAX/Schenker, derived primarily by providing Boeing 727 and DC-8 airlift comprised approximately 30% of the Company's revenues during the first nine months of 2011 (17% of total revenues, excluding directly reimbursable revenues consisting primarily of jet fuel). Future operating results and cash flows will be impacted by management's ability to replace this revenue stream though the placement of additional Boeing 767 and 757 aircraft as those aircraft become ready for cargo service. The Company may incur additional wind-down costs, including employee severance and benefits, airport lease termination payments, aircraft and equipment repositioning and other expenses as BAX/Schenker phases-out its North American network. Additionally, the airlines' future operating results may be adversely impacted by the cost of retraining senior Boeing 727 and DC-8 flight crewmember employees for Boeing 767 and 757 aircraft operations, if the training cost is not accompanied by corresponding incremental customer revenues.

Table of Contents

Operating results and cash flows will be impacted by the sales value of Boeing 727 and DC-8 aircraft, engines and related parts.

As of September 30, 2011, the Company has approximately \$18.3 million of Boeing 727 and DC-8 aircraft, engines and related parts. This value is based on recent independent appraisal of the aircraft using comparable market sales. While the Company has begun to market the Boeing 727 and DC-8 aircraft, engines and related parts to other airlines and parts dealers, management cannot reasonably predict when the assets will be sold. Further, the market value of the assets could decline before the Company is able to sell them, resulting in additional impairment charges. Further, assets may be sold for an amount that is less than their carrying value at the time of sale, resulting in losses.

ITEM 6. EXHIBITS

The following exhibits are filed as part of, or are incorporated in, the Quarterly Report on Form 10-Q:

- | | |
|---------|---|
| 10.1 | Agreement to purchase one Boeing 757-200ER passenger aircraft between Cargo Aircraft Management, Inc. and Aircraft Lease Finance Corporation. (1) |
| 10.2 | Credit Agreement, dated as of May 9, 2011, among Cargo Aircraft Management, Inc., as Borrower, Air Transport Services Group, Inc., the Lenders from time to time party thereto, SunTrust Bank, as Administrative Agent, Regions Bank and JPMorgan Chase Bank, N.A., as Syndication Agents, and Bank of America, N.A., as Documentation Agent. (2) |
| 10.3 | Guarantee and Collateral Agreement, dated as of May 9, 2011, made by Cargo Aircraft Management, Inc. and certain of its Affiliates in favor of SunTrust Bank, as Administrative Agent. (2) |
| 31.1 | Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, filed herewith. |
| 31.2 | Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, filed herewith. |
