FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the quarterly period ended March 31, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the transition period from to

Commission File Number 001-12515

OM GROUP, INC.
(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or organization) 52-1736882
(I.R.S. Employer Identification No.)

950 Main Avenue,
Suite 1300, 44113-7210
Cleveland, Ohio (Zip Code)

(Address of principal executive offices)
216-781-0083
Registrant's telephone number, including area code

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.:

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting
company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 29, 2015, the registrant had 30,347,329 shares of Common Stock, par value \$.01 per share, outstanding.

OM Group, Inc.

Notes to Unaudited Consolidated Financial Statements

OM Group, Inc. and Subsidiaries

(In millions, except as noted and share and per share amounts)

Note 1 — Basis of Presentation

Principles of Consolidation — OM Group, Inc. (the “Company”, “we”, “our”, “us”) is a technology-driven industrial company serving attractive global markets, including automotive systems, electronic devices, aerospace and defense, industrial and medical. We use innovative technologies to address customers' complex applications and demanding requirements. Our strategy is to grow organically through product and application innovation and new market and customer development, to grow strategically through complementary acquisitions to build-out our growth platforms, and to maximize total stockholder returns through a combination of business growth, financial discipline, optimal deployment of capital and continued operational excellence. Our objective is to deliver sustainable, profitable growth and create long-term stockholder value. The consolidated financial statements include the accounts of OM Group and its consolidated subsidiaries. We were formed in 1991 as a Delaware corporation. Intercompany accounts and transactions have been eliminated in consolidation.

Certain financial data may have been rounded. As a result of such rounding, the totals of data presented in this document may vary slightly from the actual arithmetical totals of such data.

On November 24, 2014, we completed the acquisition of Ener-Tek International, Inc., which operates under the brand name Yardney Technical Products (“Yardney”), and now operates as a part of our Battery Technologies business. Based in East Greenwich, Rhode Island, Yardney is a designer, developer and manufacturer of high-performance lithium-ion and silver-zinc cells and batteries for niche applications in the defense and aerospace markets. We funded the initial \$24.6 million acquisition price through existing cash balances. During the first quarter ending March 31, 2015, a post-closing working capital settlement resulted in a \$1.5 million purchase price reduction.

These financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and the instructions to Form 10-Q and do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of our financial position at March 31, 2015 and the results of our income (loss), comprehensive income (loss) and cash flows for the three months ended March 31, 2015 and 2014 have been included. The balance sheet at December 31, 2014 has been derived from the audited consolidated financial statements at that date but does not include all of the information or notes required by U.S. generally accepted accounting principles for complete financial statements. Past operating results are not necessarily indicative of the results which may occur in future periods, and the interim period results are not necessarily indicative of the results to be expected for the full year. These Unaudited Condensed Consolidated Financial Statements should be read in conjunction with the consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2014.

Note 2 — Recently Issued Accounting Guidance

Accounting Guidance adopted in 2014

In May 2014, the FASB issued ASU No. 2014-09, “Revenue from Contracts with Customers (Topic 606)” (“ASU 2014-09”). The update amends the guidance for revenue recognition to replace numerous, industry-specific requirements and converges areas under this topic with those of the International Financial Reporting Standards. The amendments are effective for reporting periods beginning after December 15, 2016, and early adoption is prohibited. Entities can transition to the standard either retrospectively or as a cumulative-effect adjustment as of the date of

adoption. We are currently assessing the impact the adoption of ASU 2014-09 may have on our results of operations or financial position.

In April 2015, the FASB issued ASU No. 2015-03, “Interest - Imputation of Interest” (“ASU 2015-03”). The update amends the guidance for presenting deferred debt costs on the balance sheet and requires that the costs are recorded as a deduction from the carrying amount of debt. The amendments are effective for reporting periods beginning after December 15, 2015, and early adoption is permitted. We are currently assessing the impact the adoption of ASU 2015-03 and believe the impact will not be material to our financial position.

Note 3 — Inventories

Inventories consist of the following:

	March 31, 2015	December 31, 2014
Raw materials and supplies	\$66.7	\$73.6
Work-in-process	112.5	118.1
Finished goods	35.0	36.7
	\$214.2	\$228.4

Note 4 — Acquisitions and Divestitures

(a) Acquisitions

Yardney

On November 24, 2014, we completed the acquisition Yardney. Based in East Greenwich, Rhode Island, Yardney is a designer, developer and manufacturer of high-performance lithium-ion and silver-zinc cells and batteries for niche applications in the defense and aerospace markets. We funded the initial \$24.6 million acquisition price through existing cash balances at the time of the acquisition. The balance sheet at the acquisition date was based on preliminary estimated purchase accounting. In the first quarter ending March 31, 2015, we agreed on the closing working capital with the seller which resulted in a post-closing purchase price reduction of \$1.5 million. The updated purchase price of \$23.1 million, after the working capital settlement and other minor purchase accounting adjustments, resulted in a preliminary allocation of \$12.7 million of net assets, including \$6.5 million of identifiable intangibles. The remaining \$10.4 million was recorded as goodwill, which is not expected to be deductible for tax purposes.

VAC

Our Magnetic Technologies segment consists of VAC Holding GmbH ("VAC"), which we acquired in 2011. The total purchase price of \$812.2 million included cash consideration of \$686.2 million, withheld consideration of \$86.3 million, and the issuance of Company shares valued at \$39.7 million. The withheld consideration relates to potential indemnification claims made by OM Group and accepted by the seller, if any, within two years of the closing date of the acquisition with certain exceptions related to tax matters. In August 2013, we remitted a payment of \$23.0 million to the seller of VAC and entered into arbitration with the seller to determine the outcome of the remaining withheld consideration. In December 2014, we withdrew one claim related to certain potential tax obligations and remitted a payment of \$16.2 million to the seller of VAC and charged certain tax assessments related to pre-acquisition tax years of \$1.6 million against the outstanding withholding liability. In March 2015, the arbitration decision was issued addressing the remaining declaratory actions we had undertaken in support of our indemnification claims and we remitted a payment of \$52.5 million to the seller of VAC. The payment consisted of the remaining non-tax related withholding liability of \$41.8 million and \$10.7 million in charges associated with the arbitration conclusion, which included interest charges and legal fee reimbursement. The remainder of the purchase price of VAC payable to the seller of \$4.1 million is tax related and will be resolved when all open tax examinations are completed by the tax authorities in the various jurisdictions, which we expect to occur in 2015. Due to the length of time over which these withholding liability payments are being made, these payments are classified as financing activities within the Unaudited Condensed Consolidated Statement of Cash Flows.

(b) Divestitures

Advanced Materials

On March 29, 2013, we completed the divestiture of our cobalt-based business. The transaction comprised the sale of the downstream portion of the business (including our cobalt refinery assets in Kokkola, Finland), and the transfer of our equity interests in the DRC-based joint venture, known as GTL, to the joint venture partners, subject to a security interest in our favor with respect to the joint venture's performance related to certain supply arrangements.

The sale agreement for the downstream portion of the business also provides for potential future additional cash consideration of up to \$110.0 million based on the business achieving certain revenue targets over a period of three

7

years. Using our projected trends of cobalt prices and volumes, it is not probable that the business will meet the revenue targets, and no value was assigned to the potential future cash consideration while calculating the loss on the divestiture at December 31, 2014 or March 31, 2015.

Following the sale, to assist in the transition of the downstream business, we entered into two agreements with the buyer pursuant to which: (1) We acted as intermediary in a supply agreement between GTL and the buyer, in back-to-back arrangements for a period of two years. We met the cobalt feed supply target under that agreement in October 2014. The supply agreement terminated as of March 31, 2015 and we expect all related activity under the performance of the agreement to be completed in the second quarter of 2015. (2) We also served as the U.S. distributor for refined cobalt products in primarily back-to-back arrangements until December 31, 2013.

Note 5 — Debt

On September 4, 2013, we entered into a five-year Senior Secured Revolving Credit Facility (“the Facility”), and terminated our previous credit facility dated August 2, 2011 that was scheduled to expire in August 2016. The Facility provides for \$350 million of revolving borrowing capacity and includes an expansion option of up to an additional \$150 million, subject to certain conditions. The borrowers under the Facility are the Company, Harko C.V. (“Harko”), a limited partnership organized under the laws of the Netherlands, and VAC Germany GmbH (“VAC”), a limited liability company under the laws of Germany. Harko and VAC are wholly-owned subsidiaries of the Company. The Facility matures on September 4, 2018.

The obligations of the Company under the Facility are guaranteed by certain of the Company’s material U.S. subsidiaries. The obligations of Harko and VAC under the Facility are guaranteed by the Company and certain of the Company’s material subsidiaries, subject to certain exceptions including financial assistance limitations in certain foreign jurisdictions. In addition, the obligations of the Company under the Facility are secured by a first priority security interest in substantially all of the existing and future personal property of the Company and certain of the Company’s material U.S. subsidiaries, including 65% of the voting capital stock of certain of the Company’s direct foreign subsidiaries. The obligations of Harko and VAC under the Facility are secured by a first priority security interest in certain of the existing and future personal property of Harko, VAC and certain of the Company’s subsidiaries and a 100% pledge of the voting capital stock of certain of the Company’s subsidiaries, subject to certain exceptions, including financial assistance limitations in certain foreign jurisdictions.

The interest rates applicable to loans under the Facility will be at our option and equal to either a base rate or a LIBOR rate, in each case plus an applicable margin percentage. The base rate will be the highest of (i) the federal funds rate plus 0.50%, (ii) the prime rate or (iii) the LIBOR rate with a maturity of one month plus 1.00%. The applicable margin percentage is based on the leverage ratio of the Company. The range of the applicable margin percentage is 1.125% to 2.000% in the case of LIBOR advances and 0.125% to 1.000% in the case of base rate advances.

The Facility contains customary representations and warranties and certain covenants that limit the ability of the Company and its restricted subsidiaries to, among other things: (i) incur or guarantee additional indebtedness; (ii) redeem, repurchase or pay distributions on capital stock or redeem or repurchase subordinated debt; (iii) make investments; (iv) sell assets; (v) enter into agreements that restrict distributions or other payments from restricted subsidiaries to the Company; (vi) incur or suffer to exist liens securing indebtedness; (vii) consolidate, merge or transfer all or substantially all of their assets; and (viii) engage in transactions with affiliates. In addition, the Facility contains financial covenants that limit capital expenditures in any fiscal year and that measure (i) the ratio of the Company’s total funded indebtedness net of certain cash to the amount of the Company’s consolidated EBITDA and (ii) the ratio of the amount of the Company’s consolidated EBITDA to the Company’s cash interest expense, as defined in the agreement.

As of March 31, 2015, we had \$40.1 million outstanding under the Facility and were in compliance with all Facility covenants.

Note 6 — Derivative Instruments

Commodity Price Risk

In March 2015, we entered into nickel forward derivative contracts to establish a fixed margin and mitigate the risk of

8

price volatility related to certain sales expected in 2015 and 2016 of nickel-containing finished products that were priced on a formula that included a fixed nickel price component. These forward derivative contracts have been designated as cash flow hedges for accounting purposes and had a fair value of \$(0.3) million at March 31, 2015.

In May 2013, we entered into nickel forward derivative contracts to establish a fixed margin and mitigate the risk of price volatility related to certain sales expected in 2013 and 2014 of nickel-containing finished products that were priced on a formula that included a fixed nickel price component. These forward derivative contracts were designated as cash flow hedges for accounting purposes and had a fair value of less than \$0.1 million at March 31, 2014.

There was no hedge ineffectiveness in the three months ended March 31, 2015 or 2014 for these hedges.

Note 7 — Fair Value Disclosures

The following table shows our assets and liabilities accounted for at fair value on a recurring basis:

Description	March 31, 2015	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Liabilities:				
Contingent consideration payable	\$ 1.3	\$—	\$—	\$ 1.3
Commodity contract derivatives	0.3	—	0.3	—
	\$ 1.6	\$—	\$ 0.3	\$ 1.3

Our valuation techniques and Level 3 inputs used to estimate the fair value of the contingent consideration payable in connection with our acquisition of Rahu Catalytics Limited ("Rahu") are described below. There were no transfers into or out of Levels 1, 2 or 3 in 2014 or 2015.

The following table summarizes changes in Level 3 liabilities measured at fair value on a recurring basis:

	Contingent Consideration
Fair Value at December 31, 2014	\$ 1.4
Accretion expense	—
Foreign exchange	(0.1)
Fair Value at March 31, 2015	\$ 1.3

We acquired Rahu on December 22, 2011. The purchase price included contingent consideration of up to an additional €20.0 million (\$21.5 million at March 31, 2015) based on achieving certain volume targets over a fifteen-year period ending on December 31, 2026. We estimated the fair value of the contingent consideration using probability-weighted expected future cash flows and applied a discount rate that appropriately captures a market participant's view of the risk associated with the contingent consideration. Contingent consideration is included in Other non-current liabilities in the Unaudited Condensed Consolidated Balance Sheet. The valuation of the contingent consideration is classified utilizing Level 3 inputs consistent with assumptions which would be made by other market participants. There are many factors that could impact the likelihood that we will pay the contingent consideration and therefore its value, including overall economic conditions and our ability to drive sales volumes as planned. A change in a market participant view of risks could also impact the value of the contingent consideration.

We also hold financial instruments consisting of cash, accounts receivable, and accounts payable. The carrying amounts of cash, accounts receivable, and accounts payable approximate fair value due to the short-term maturities of these instruments. The Facility had a carrying value of \$40.1 million and \$12.5 million at March 31, 2015 and December 31, 2014, respectively, and is the approximate fair value due to the the short-term nature of the instrument. Derivative instruments are recorded at fair value and immaterial as of March 31, 2015 and 2014.

We utilize a “relief from royalty” methodology in estimating fair values for indefinite-lived tradenames. The methodology estimates the fair value of each trade name by determining the present value of the royalty payments that are avoided as a result of owning the tradename and includes judgmental assumptions about sales growth that are consistent with

the assumptions used to determine the fair value of reporting units in our goodwill testing. The fair value measurements were calculated using unobservable inputs, classified as Level 3, requiring significant management judgment due to the absence of quoted market prices or observable inputs for assets of a similar nature.

Note 8 — Income Taxes

We file income tax returns in the U.S. federal jurisdiction, and various state and foreign jurisdictions. Our major tax jurisdictions include the U.S. and Germany. With few exceptions, we are no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years before 2006. The Internal Revenue Service completed the examination of our 2010 U.S. federal income tax return, and Finnish tax authorities completed the examination of our Finnish tax returns for the years 2007-2011. VAC's German tax returns have been audited through 2005. We are indemnified, subject to certain limitations, for any pre-acquisition income tax liabilities of VAC. German tax authorities are currently examining VAC's income tax returns for the years 2006-2011.

As required under ASC 740, our interim income tax provision is based on the application of an estimated annual effective income tax rate applied to year-to-date ordinary income from continuing operations before income tax expense. In determining the estimated annual effective income tax rate, we analyze various factors, including forecasts of projected annual earnings (including specific subsidiaries projected to have pretax income and pretax losses), taxing jurisdictions in which the earnings will be generated, our ability to use tax credits and net operating loss carryforwards, and available tax planning alternatives. We evaluate the estimated annual effective income tax rate on a quarterly basis based on current and forecasted earnings by tax jurisdiction, including changes in the Company's structure. The estimated annual effective income tax rate may be significantly impacted by changes to the mix of forecasted earnings by tax jurisdiction. The tax effects of adjustments to the estimated annual effective income tax rate are recorded in the period such estimates are revised. The tax effects of discrete items, including the effect of changes in tax laws, tax rates, certain circumstances with respect to valuation allowances or other unusual or non-recurring items, are reflected in the period in which they occur as an addition to, or reduction from, the income tax provision, rather than included in the estimated annual effective income tax rate.

Income (loss) from continuing operations before income tax expense consists of the following:

	Three Months Ended March 31,	
	2015	2014
United States	\$(8.8)	\$(2.7)
Outside the United States	(6.2)	9.4
Income (loss) from continuing operations before income tax expense	\$(15.0)	\$6.7
Effective Income Tax Rate	25.9 %	20.7 %

The effective income tax rates for the three months ended March 31, 2015 and 2014 are lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S. (primarily Germany, Malaysia and Taiwan) and our financing structure, partially offset by losses in certain jurisdictions (including the U.S.) with no corresponding tax benefit.

Note 9 — Defined Benefit Plans

At March 31, 2015 and December 31, 2014, we had pension liabilities of \$230.9 million and \$253.1 million, respectively, the majority of which were assumed in the 2011 VAC acquisition and the 2010 EaglePicher Technologies acquisition.

Set forth below is a detail of the net periodic pension expense for the U.S. defined benefit plans:

	Three Months Ended March 31,	
	2015	2014
Service cost	\$0.3	\$0.3
Interest cost	1.9	2.4
Amortization of unrecognized net loss	0.4	0.4
Expected return on plan assets	(2.3) (2.8
Total expense	\$0.3	\$0.3

Set forth below is a detail of the net periodic pension expense for the VAC defined benefit plans:

	Three Months Ended March 31,	
	2015	2014
Service cost	\$1.5	\$1.7
Interest cost	0.8	1.5
Amortization of unrecognized net loss	0.6	0.3
Total expense	\$2.9	\$3.5

Note 10 — Accumulated Other Comprehensive Loss

(a) Changes in Accumulated Comprehensive Loss by Component

	Foreign Currency Translation	Unrealized Loss on Cash Flow Hedging Derivatives, net of tax	Pension and Post-Retirement Obligation, net of tax	Accumulated Other Comprehensive Loss
Beginning Balance at January 1, 2015	\$(87.2) —	(70.6) (157.8
Other comprehensive income (loss) before reclassifications	(44.5) (0.2) —	(44.7
Amounts reclassified from accumulated other comprehensive loss	(3.5) —	0.8	(2.7
Net current-period other comprehensive income (loss)	(48.0) (0.2) 0.8	(47.4
Ending balance at March 31, 2015	\$(135.2) \$(0.2) (69.8) \$(205.2

(b) Reclassifications out of Accumulated Other Comprehensive Loss

Details about Accumulated Other Comprehensive Loss Components	Amount Reclassified from Accumulated Other Comprehensive Loss	Affected Line Item in the Statement Where Net Income is Presented
Foreign currency translation	(3.5) Other income (expense), net
Pension and post-retirement obligation	0.8	Selling, general and administrative expenses

Note 11 — Earnings (Loss) Per Share

The following table sets forth the computation of basic and dilutive income (loss) per common share from continuing operations attributable to OM Group, Inc. common stockholders:

	Three Months Ended March 31,	
	2015	2014
Amounts attributable to OM Group, Inc. common stockholders:		
Income (loss) from continuing operations, net of tax	\$(11.1)) \$5.3
Earnings (loss) per common share - basic:		
Income (loss) from continuing operations	\$(0.37)) \$0.17
Earnings (loss) per common share - assuming dilution:		
Income (loss) from continuing operations	\$(0.37)) \$0.16
Weighted average shares outstanding — basic	30.3	31.5
Dilutive effect of stock options and restricted stock	—	0.4
Weighted average shares outstanding — assuming dilution	30.3	31.9

The following table sets forth the computation of basic and diluted net income (loss) per common share attributable to OM Group, Inc. common stockholders:

	Three Months Ended March 31,	
	2015	2014
Amounts attributable to OM Group, Inc. common stockholders:		
Net income (loss)	\$(11.0)) \$5.2
Earnings (loss) per common share - basic:		
Net income (loss)	\$(0.36)) \$0.17
Earnings per common share - assuming dilution:		
Net income (loss)	\$(0.36)) \$0.16
Weighted average shares outstanding — basic	30.3	31.5
Dilutive effect of stock options and restricted stock	—	0.4
Weighted average shares outstanding — assuming dilution	30.3	31.9

We use the treasury stock method to calculate the effect of outstanding share-based compensation awards, which requires us to compute total employee proceeds as the sum of (a) the amount the employee must pay upon exercise of the award, (b) the amount of unearned share-based compensation costs attributed to future services and (c) the amount of tax benefits, if any, that would be credited to additional paid-in capital assuming exercise of the award. Shares, under share-based compensation awards, for which the total employee proceeds exceed the average market price over the applicable period have an anti-dilutive effect on earnings per share, and accordingly, are excluded from the calculation of diluted earnings per share.

In the three months ended March 31, 2015 and 2014, stock options to purchase 0.2 million and 0.1 million shares, respectively, were excluded from the calculation of dilutive earnings per share because the options' exercise prices were greater than the average market price of the common shares and, therefore, the effect would have been anti-dilutive.

Note 12 — Share-Based Compensation

Set forth below is a summary of share-based compensation expense for option grants, restricted stock awards and restricted stock unit awards included as a component of Selling, general and administrative expenses in the Unaudited Condensed Consolidated Statements of Operations:

	Three Months Ended March 31,	
	2015	2014
Stock options and restricted stock awards	\$2.9	\$2.3
Restricted stock unit awards	0.2	0.2
Share-based compensation expense - employees	\$3.1	\$2.5
Share-based compensation expense - non-employee directors	\$0.1	\$0.1

No tax benefit for share-based compensation was realized during the first quarter of 2015 or 2014 as a result of a valuation allowance against the deferred tax assets.

At March 31, 2015, there was \$12.9 million of unrecognized compensation expense related to unvested share-based awards. That cost is expected to be recognized as follows: \$6.0 million in the last nine months of 2015, \$4.3 million in 2016, and \$2.6 million in 2017 as a component of Selling, general and administrative expenses. Unearned compensation expense is recognized over the vesting period for the particular grant. Total unrecognized compensation cost will be adjusted for future changes in actual and estimated forfeitures, updated vesting assumptions for performance awards, and fluctuations in the fair value of restricted stock unit awards.

Non-employee directors of the Company are paid a portion of their annual retainer in unrestricted shares of common stock. For purposes of determining the number of shares of common stock to be issued subsequent to May 13, 2014, the 2014 Plan provides that shares are to be valued at the closing sale price of the Company's common stock on the New York Stock Exchange ("NYSE") on the last trading date of the quarter. Pursuant to the 2014 Plan, we issued 4,403 shares in the three months ended March 31, 2015. For purposes of determining the number of shares of common stock to be issued prior to May 13, 2014, the 2007 Plan provides that shares are to be valued at the average of the high and low sale price of the Company's common stock on the NYSE on the last trading date of the quarter. Pursuant to the 2007 Plan, we issued 3,976 shares in the three months ended March 31, 2014 to non-employee directors.

Note 13 — Commitments and Contingencies

We have potential contingent liabilities with respect to environmental matters related to our former operations in Brazil which were sold in 2003. Environmental cost-sharing arrangements are in place between the original owner and operator of these operations and between the Company and the subsequent purchaser of these operations. We have reviewed the limited information made available to us on the environmental conditions and are awaiting more detailed information from the purchaser. We cannot currently evaluate whether or not, or to what extent, we will be responsible for any remediation costs until more detailed information is received and validated.

From time to time, we are subject to various legal and regulatory proceedings, claims and assessments that arise in the normal course of business. The ultimate resolution of such proceedings, claims and assessments is inherently unpredictable and, as a result, our estimates of liability, if any, are subject to change and actual results may materially differ from such estimates. Our estimate of any costs to be incurred as a result of these proceedings, claims and assessments are accrued when the liability is considered probable and the amount can be reasonably estimated. We believe the amount of any current potential liability with respect to legal and regulatory proceedings, claims and assessments will not have a material adverse effect upon our financial condition, results of operations, or cash flows.

Note 14 — Reportable Segments

We determine our segments based on how the chief operating decision maker makes decisions about allocating resources to segments and measuring their performance. We operate and report our results in four operating segments: Magnetic Technologies, Battery Technologies, Specialty Chemicals and Advanced Materials. Intersegment

13

transactions are immaterial and generally recognized based on current market prices and are eliminated in consolidation. Corporate is comprised of general and administrative expenses not allocated to the operating segments.

The following table reflects the results of our reportable segments:

	Three Months Ended March 31,	
	2015	2014
Net sales		
Magnetic Technologies	\$104.3	\$129.2
Battery Technologies	39.7	40.5
Specialty Chemicals	75.1	76.9
Advanced Materials	28.7	15.1
	\$247.8	\$261.7
Operating profit (loss)		
Magnetic Technologies (a)	\$(0.6) \$5.7
Battery Technologies (b) (c)	3.0	6.3
Specialty Chemicals (a)	6.3	7.4
Advanced Materials	(0.8) (1.0
Corporate (a)	(12.4) (9.9
	\$(4.5) \$8.5
Interest expense	\$(0.6) \$(0.7
Foreign exchange loss	(4.4) (0.3
Gain (loss) on divestiture of Advanced Materials business	2.0	(0.2
Charges associated with VAC arbitration conclusion	(10.4) —
Other income (expense), net	2.9	(0.6
Income (loss) from continuing operations before income taxes	\$(15.0) \$6.7
Expenditures for property, plant & equipment		
Magnetic Technologies	\$3.6	\$1.7
Battery Technologies	0.6	0.9
Specialty Chemicals	0.4	0.5
Corporate	—	0.1
	\$4.6	\$3.2
Depreciation and amortization		
Magnetic Technologies	\$8.6	\$11.8
Battery Technologies	3.0	2.6
Specialty Chemicals	3.2	3.6
Corporate	0.1	0.1
	\$14.9	\$18.1

The first quarter of 2015 included costs related to enterprise initiatives, including fees related to a potential proxy contest and competitive repositioning and cost optimization opportunities announced on February 18, 2015 of \$0.6 million in Magnetic Technologies, \$0.9 million in Specialty Chemicals, and \$2.0 million in Corporate. Certain of these opportunities are subject to ongoing negotiations with employee works councils and unions.

(b) The first quarter of 2015 includes costs related to inventory purchase accounting step-up charges of \$1.0 million related to the Yardney acquisition in Battery Technologies.

In the fourth quarter of 2014, Battery Technologies entered into a research and development ("R&D") contract with the U.S. Government. The contract is a "best efforts" cost-sharing agreement and calls for Battery Technologies to develop a production line for lithium-ion batteries from October 2014 through June 2017. The total expected costs (c) to build the production line are approximately \$29.0 million, a significant majority of which is expected to be reimbursed by the U.S. Government under the terms of the contract. During the first quarter of 2015, Battery Technologies incurred \$1.4 million of expenses and requested reimbursement for \$1.3 million of these expenses, which are recorded net within Selling, general and administrative expenses.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

(In millions, except as noted and share and per share amounts)

Management's discussion and analysis of financial condition and results of operations should be read in conjunction with the consolidated financial statements and the notes thereto appearing elsewhere in this Form 10-Q.

Certain financial data may have been rounded. As a result of such rounding, the totals of data presented in this document may vary slightly from the actual arithmetical totals of such data.

General

OM Group, Inc. (the "Company", "we", "our", "us") is a technology-driven industrial company serving attractive global markets, including automotive systems, electronic devices, aerospace and defense, industrial and medical. We use innovation and technology to address customers' complex applications and demanding requirements. Our strategy is to grow organically through product and application innovation and new market and customer development, to grow strategically through complementary acquisitions to build-out our growth platforms, and to maximize total stockholder returns through a combination of business growth, financial discipline, optimal deployment of capital and continued operational excellence. Our objective is to deliver sustainable, profitable growth and create long-term stockholder value.

On February 18, 2015, we announced a wide-ranging set of competitive repositioning and cost optimization opportunities throughout the enterprise that are expected to improve our ability to serve customers, better compete in global markets and deliver stronger financial performance. The opportunities include headcount reductions; site consolidations; relocation of certain operations to improve our cost structure and better serve customers; better alignment of various research and development, marketing and technical activities with customers' next generation products and applications; and additional corporate cost reductions.

In connection with these opportunities, we anticipate annualized savings of \$30.0 - \$40.0 million by the end of 2017, which are expected to ramp up starting in late 2015. We also expect to incur total cash expenses related to these opportunities of approximately \$50.0 - \$65.0 million. Certain of these opportunities will take place in Europe and are subject to negotiations with employee works councils and unions, which could impact the timing and scope of the expected expenses and savings. We expect that the cost of these opportunities will not have a material impact on our financial position or liquidity and will be funded by operating cash flows and borrowing on our revolving line of credit when necessary.

On November 24, 2014, we completed the acquisition of Ener-Tek International, Inc., which operates under the brand name Yardney Technical Products ("Yardney") and has been included in our Battery Technologies business. Based in Rhode Island, Yardney is a designer, developer and manufacturer of high-performance lithium-ion and silver-zinc cells and batteries for niche applications in the defense and aerospace markets. We funded the initial \$24.6 million acquisition price through existing cash balances. During the first quarter ending March 31, 2015, a post-closing working capital settlement resulted in a \$1.5 million purchase price reduction, resulting in an updated preliminary purchase price of \$23.1 million.

On March 29, 2013, we completed the divestiture of our cobalt-based Advanced Materials business. The sale agreement for the downstream portion of the business also provides for potential future cash consideration of up to \$110.0 million based on the business achieving certain revenue targets over a period of three years. Using our projected trends of cobalt prices and volumes, it is not probable that the business will meet the revenue targets, and no value was assigned to the potential future cash consideration at December 31, 2014 or March 31, 2015.

We operate three strategic business platforms: Magnetic Technologies, Battery Technologies, and Specialty Chemicals. Through March 2015, we also have limited continuing involvement in the Advanced Materials business through transition agreements with the buyer as described below. Further discussion of and financial information for these segments, including third-party net sales and operating profit, are contained in Note 14 to the accompanying consolidated financial statements of this Quarterly Report on Form 10-Q.

Magnetic Technologies

The Magnetic Technologies segment develops, manufactures and distributes differentiated, high-performance industrial-use magnetic materials and related products and systems with exceptional magnetic and/or physical properties for a wide array of end markets, including automotive systems, electrical installation technology, energy conversion and distribution, industrial, retail and renewable energy.

Battery Technologies

The Battery Technologies segment develops, manufactures and distributes specialty batteries, battery management systems, battery-related research and energetic devices for the defense, space, medical, energy storage, commercial aerospace and oil and gas markets.

Specialty Chemicals

The Specialty Chemicals segment develops, produces and supplies chemicals for consumer electronics applications; industrial applications including coatings, composites and catalysts; and photomasks used by customers to produce semiconductors and related products.

Advanced Materials (divested)

As discussed above, we exited this business in 2013. Following the sale, to assist in the transition of the downstream business, we entered into two agreements with the buyer pursuant to which: (1) We act as intermediary in a supply agreement between GTL and the buyer, in back-to-back arrangements for a period of two years. We met the cobalt feed supply target under that agreement in October 2014. The supply agreement terminated as of March 31, 2015, and we expect all related activity under the performance of the agreement to be completed in the second quarter of 2015. (2) We served as the U.S. distributor for refined cobalt products in primarily back-to-back arrangements until December 31, 2013. These agreements are reported in the Advanced Materials segment.

Executive Overview - First Quarter 2015

Net sales in the first quarter were \$247.8 million, or \$219.1 million excluding the divested Advanced Materials business compared to \$246.7 million in the first quarter of 2014. Excluding the Advanced Materials sales, sales were \$27.6 million lower in 2015 due primarily to \$25.9 million as a result of unfavorable EUR/USD foreign currency translation impact. Excluding both the Advanced Materials sales and the unfavorable translation impact, net sales declined by 1%. Excluding the translation impact, Magnetic Technologies sales were 2% lower due primarily to lower selling prices and two customer projects in permanent magnets that wound down in 2014. Battery Technologies net sales were slightly lower than last year's first quarter due to the loss of a medical customer contract in the second half of 2014 and lower export sales for certain defense applications, partially offset by increased sales due to the acquisition of Yardney in the fourth quarter of 2014. Sales in Specialty Chemicals were slightly lower compared to the corresponding period last year due to the translation impact. Excluding the translation impact, sales in Specialty Chemicals were higher due to favorable mix and strength in memory disk applications in electronic chemicals.

During the quarter, the Company remained focused on enterprise initiatives, including previously-announced actions related to competitive repositioning and cost optimization initiatives, incurring charges of \$3.5 million related to these initiatives. In addition, the Company incurred charges of \$1.0 million related to the purchase accounting step-up of inventory in connection with the Yardney acquisition. The combined charges of \$4.5 million have been excluded from the Company's presentation of adjusted pro forma EBITDA, which is reconciled below.

Adjusted EBITDA in the 2015 first quarter was \$15.7 million, a decrease of \$11.9 million from a year ago. This decrease was due primarily to (1) lower profitability in Magnetic Technologies driven by the negative impact of inflation on operating expenses, the impact of lower sales volumes and lower selling prices; and (2) lower profitability in Battery Technologies due to lower sales volumes and unfavorable mix. A reconciliation of U.S. GAAP to adjusted numbers is contained on pages 17 and 18.

Consolidated Operating Results

(in millions & percent of net sales)	Three months ended			
	March 31,			
	2015		2014	
Net sales	\$247.8		\$261.7	
Cost of goods sold	197.5		199.8	
Gross profit	50.3	20.3 %	61.9	23.7 %
Selling, general and administrative expenses	54.8	22.1 %	53.4	20.4 %
Operating profit (loss)	(4.5)	(1.8)%	8.5	3.2 %
Gain (loss) on divestiture of Advanced Materials business	2.0		(0.2)	
Charges associated with VAC arbitration conclusion	(10.4)		—	
Other expense, net	(2.1)		(1.6)	
Income tax (benefit) expense	(3.9)		1.4	
Income (loss) from continuing operations, net of tax	(11.1)		5.3	
Income (loss) from discontinued operations, net of tax	0.1		(0.1)	
Consolidated net income (loss)	(11.0)		5.2	
Earnings (loss) per common share — assuming dilution:				
Income (loss) from continuing operations		\$(0.37)		\$0.16
Income (loss) from discontinued operations		0.01		—
Net income (loss)		\$(0.36)		\$0.16

We are providing adjusted operating profit (loss), adjusted EBITDA, and adjusted earnings from continuing operations per common share assuming dilution, which are non-GAAP financial measures. The tables below present reconciliations of these amounts to the comparable U.S. GAAP amounts. We believe that the non-GAAP financial measures presented in the tables facilitate a comparative assessment of our operating performance and enhance investors' understanding of the performance of our operations. The non-GAAP financial information set forth in the tables below are not alternatives to reported results determined in accordance with U.S. GAAP.

	For the three months ended						
	March 31, 2015						
	Magnetic Technologies	Battery Technologies	Specialty Chemicals	Corporate	Subtotal	Advanced Materials	Consolidated
Operating profit (loss) - as reported	\$(0.6)	\$ 3.0	\$ 6.3	\$(12.4)	\$(3.7)	\$(0.8)	\$(4.5)
Charges related to initiatives	0.6	—	0.9	2.0	3.5	—	3.5
Yardney inventory purchase accounting step up	—	1.0	—	—	1.0	—	1.0

Weighted average shares outstanding - diluted		30.3		31.9

First Quarter of 2015 Compared with First Quarter of 2014

The following table identifies, by segment, the components of change in net sales and operating profit for the three months ended March 31, 2015, compared with the three months ended March 31, 2014:

	Net sales	Operating profit - as reported	Adjusted operating profit
2014	\$261.7	\$8.5	\$8.5
Change in 2015 from:			
Magnetic Technologies	(24.9)	(6.3)	(5.7)
Battery Technologies	(0.8)	(3.3)	(2.3)
Specialty Chemicals	(1.8)	(1.1)	(0.2)
Advanced Materials	13.6	0.2	0.2
Corporate	—	(2.5)	(0.5)
2015	\$247.8	\$(4.5)	\$—

Net sales decreased \$13.9 million, or 5.3%, primarily due to lower sales in Magnetic Technologies, partially offset by higher sales in Advanced Materials. Excluding Advanced Materials, sales were lower than in the first quarter of 2015 compared to the 2014 period due primarily to an unfavorable EUR/USD impact of \$25.9 million. Excluding the translation impact, Magnetic Technologies sales were 2% lower due primarily to lower selling prices and two customer projects in permanent magnets that wound down in 2014. Battery Technologies net sales were slightly lower than last year's first quarter due primarily to the loss of a medical customer contract in the second half of 2014 and lower export sales for certain defense applications, partially offset by increased sales due to the acquisition of Yardney in the fourth quarter of 2014. Sales in Specialty Chemicals were slightly lower compared to the comparable period last year due to the foreign currency translation impact. Excluding the translation impact, sales in Specialty Chemicals were higher due to favorable mix and strength in memory disk applications in electronic chemicals.

Gross profit decreased \$11.6 million in the three months ended March 31, 2015 compared with the three months ended March 31, 2014. As a percent of sales, gross margin decreased to 20.3% in the first quarter of 2015 from 23.7% in the year ago quarter. Both of these decreases were driven primarily by an unfavorable foreign currency translation

impact and higher manufacturing expenses in Magnetic Technologies.

Selling, general and administrative expenses (“SG&A”) increased to \$54.8 million in the three months ended March 31, 2015 from \$53.4 million in the three months ended March 31, 2014. SG&A as a percentage of net sales was 22.1% in the first quarter of 2015 compared with 20.4% in the first quarter of 2014. The increases in 2015 are due primarily to expenses associated with our cost-reduction and other initiatives.

The following table summarizes the components of Other income (expense), net for the three months ended March 31:

	2015	2014	Change
Interest expense	\$(0.6)	\$(0.7)	\$0.1)
Foreign exchange loss	(4.4)	(0.3)	(4.1)
Gain (loss) on divestiture of Advanced Materials business	2.0	(0.2)	2.2)
Charges associated with VAC arbitration conclusion	(10.4)	—	(10.4)
Other income (expense), net	2.9	(0.6)	3.5)
	\$(10.5)	\$(1.8)	\$(8.7)

The foreign exchange loss in the three months ended March 31, 2015 is primarily related to the pronounced weakening of the Euro versus the U.S. dollar during the quarter and the resulting impact on the revaluation of non-functional currency balances. Other income, net in 2015 includes a gain on the sale of a Specialty Chemicals facility of \$3.4 million.

See Note 4(b) in our Unaudited Condensed Consolidated Financial Statements included in this Quarterly Report on Form 10-Q for discussion on the loss on divestiture of Advanced Materials business.

Income tax benefit in the first quarter of 2015 was \$3.9 million on pre-tax loss of \$15.0 million, resulting in an effective income tax rate of 25.9%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S. and our financing structure, partially offset by losses in certain jurisdictions (including the U.S.) with no corresponding tax benefit. For the three months ended March 31, 2014, income tax expense was \$1.4 million on pre-tax income of \$6.7 million, resulting in an effective income tax rate of 20.7%.

Segment Results and Corporate Expenses

Magnetic Technologies

This segment is focused on developing new products and applications, including leveraging its substantial patent portfolio, know-how and expertise to enter new markets and increase market share; and progressing its competitive repositioning and cost optimization activities, including continuing negotiations with the workers council regarding proposed changes to improve competitiveness and performance.

The primary raw materials used by Magnetic Technologies are nickel, cobalt and certain rare earth materials, primarily dysprosium and neodymium. Rare earth materials are currently available from a limited number of suppliers, primarily in China. We generally pass through rare earth prices to our customers in our selling prices, typically with a lag period. Rare earth prices have been fairly stable over the past several months, and therefore had a minor impact on sales and profit in the first quarter of 2015.

The following table identifies the components of changes in net sales and operating profit (loss):

	Three Months Ended March 31,		
	Net sales	Operating profit	Adjusted operating profit
2014	\$129.2	\$5.7	\$5.7
Increase (decrease) in 2015 from:			
Volume/sales mix	(2.4)	(2.0)	(2.0)

Edgar Filing: OM GROUP INC - Form 10-Q

Selling price	(1.5)	(1.5)	(1.5)
Charges related to initiatives	—		(0.6)	—	
Foreign currency translation	(22.8)	(0.4)	(0.4)
Other	1.8		(1.8)	(1.8)
2015	\$104.3		\$(0.6)	\$—	

Net sales decreased in the first quarter of 2015 compared to the first quarter of 2014 due primarily to the unfavorable currency translation impact of the weaker Euro compared to the U.S. dollar. Sales were also negatively impacted by

lower selling prices and two customer projects in permanent magnets that wound down in 2014, which more than offset increased volumes in the cores and components product lines driven by increased demand for industrial applications. Adjusted operating profit in the first quarter of 2015 was lower than the first quarter of 2014 due primarily to the negative impact of lower sales volumes, lower selling prices, and higher operating expenses including inflation and lower overhead absorption (included in Other in the table above).

Charges related to initiatives in the three months ended March 31, 2015 relate to the competitive repositioning and cost-optimization initiatives previously described.

Battery Technologies

The segment is focused on integrating the Yardney acquisition; developing new specialty battery chemistries, products and applications; expanding its served markets into new and emerging markets, including grid energy storage, commercial aerospace and oil and gas; and reducing medical battery production costs in response to the loss of a key customer contract.

The following table identifies the components of changes in net sales and operating profit:

	Three Months Ended March 31,		
	Net sales	Operating profit	Adjusted operating profit
2014	\$40.5	\$6.3	\$6.3
Increase (decrease) in 2015 from:			
Volume	(6.3) (1.6) (1.6
Sales mix	0.4	(1.9) (1.9
Yardney acquisition	5.1	0.8	0.8
Yardney inventory purchase accounting step up	—	(1.0) —
Other	—	0.4	0.4
2015	\$39.7	\$3.0	\$4.0

Net sales in the three months ended March 31, 2015 were slightly lower than the comparable 2014 period, driven primarily by the loss of a medical customer contract in the second half of 2014 and lower export sales for certain defense applications, partially offset by increased sales due to the acquisition of Yardney in the fourth quarter of 2014. Adjusted operating profit in the first quarter of 2015 was lower than the corresponding 2014 period due primarily to lower sales volumes and unfavorable mix, partially offset by profit contribution from the Yardney acquisition.

The Battery Technologies segment tracks backlog, which is equal to the value of unfulfilled orders for which funding is contractually obligated by the customer and for which revenue has not been recognized. At March 31, 2015, backlog was \$149.5 million, compared to \$156.5 million at December 31, 2014. Of the March 31, 2015 amount, \$117.6 million is expected to be converted to sales by December 31, 2015, with the remaining \$31.9 million expected to be converted to sales in years beyond 2015.

Specialty Chemicals

This segment is focused on utilizing its technology to provide solutions for electronic devices with increasing demanding performance specifications and miniaturization; progressing its competitive repositioning and cost optimization activities; and streamlining its product portfolio.

The following table identifies the components of changes in net sales and operating profit:

	Three Months Ended		
	March 31,		
	Net sales	Operating profit	Adjusted operating profit
2014	\$76.9	\$7.4	\$7.4
Increase (decrease) in 2015 from:			
Volume	1.4	0.9	0.9
Selling price/mix	0.1	(1.8)	(1.8)
Foreign currency translation	(3.1)	(0.4)	(0.4)
Charges related to initiatives	—	(0.9)	—
Other	(0.2)	1.1	1.1
2015	\$75.1	\$6.3	\$7.2

Net sales in the three months ended March 31, 2015 were lower when compared to the corresponding periods of 2014 due primarily to the lower EUR/USD exchange rate. Excluding the translation impact, sales in Specialty Chemicals were higher due to strength in demand for memory disk applications in electronic chemicals and higher sales volumes in photomasks. Adjusted operating profit was slightly lower in the three month period ended March 31, 2015 compared to 2014 due primarily to unfavorable mix in electronic chemicals that more than offset the benefit from higher sales volumes.

Charges related to initiatives in the three months ended March 31, 2015 relate primarily to headcount reductions across the segment as part of our competitive repositioning and cost-optimization initiatives.

Advanced Materials

Prior to its divestiture in 2013, this business manufactured inorganic products using unrefined cobalt and other metals, for a range of end markets. As discussed above, we divested this business as of March 29, 2013. Activity in this segment beginning in the second quarter of 2013 represents performance under the transition agreements described above.

For the three months ended March 31:

	Three Months Ended March 31,	
	2015	2014
Net sales	\$28.7	\$15.1
Operating loss	\$(0.8)	\$(1.0)

Corporate Expenses

Corporate expenses consist of corporate overhead supporting the operating segments but not specifically allocated to an operating segment, including certain legal, finance, human resources and strategic development activities, as well as all share-based compensation for the enterprise. Corporate expenses were \$12.4 million in the first quarter of 2015 compared with \$9.9 million in the first quarter of 2014. The amount in the 2015 period is higher due primarily to \$2.0 million related to enterprise initiatives, including fees related to a potential proxy contest. Excluding this amount, corporate expenses in the 2015 period are similar to the prior-year period.

Liquidity and Capital Resources

Cash Flow Summary

Our cash flows from operating, investing and financing activities, as reflected in the Unaudited Condensed Consolidated Statements of Cash Flows, are presented in the following table and discussed in the related narrative:

21

	Three months ended	
	March 31,	
	2015	2014
Net cash used for:		
Operating activities	\$(15.2)	\$(2.8)
Investing activities	(1.9)	(3.2)
Financing activities	(17.2)	(2.7)
Effect of exchange rate changes on cash	(4.2)	(0.1)
Cash used by discontinued operations	(0.1)	—
Net change in cash and cash equivalents	\$(38.6)	\$(8.8)

Operating Activities

In the first three months of 2015, cash outflow from operating activities was \$15.2 million compared with a cash outflow of \$2.9 million in the same period of the prior year. In March 2015, we made a payment to the seller of VAC that included \$10.7 million for interest charges and legal fee reimbursement associated with the VAC arbitration conclusion. The cash flows from operating activities can fluctuate significantly from period-to-period due to profitability, working capital changes and the timing of payments for items such as income taxes, pensions and other items which impact reported cash flows.

Investing Activities

We used \$4.6 million of cash for capital expenditures in the first three months of 2015 primarily to: expand capacity; to maintain and improve throughput; for compliance with environmental, health and safety regulations; and for other fixed asset additions at existing facilities. We expect to fund 2015 capital expenditures through cash generated from operations and cash on hand at March 31, 2015. Net cash used by investing activities in the first three months of 2014 was the result of capital expenditures of \$3.2 million.

Financing Activities

We used \$2.5 million and \$2.4 million of cash to pay dividends in the first three months of 2015 and 2014, respectively. We used \$41.8 million of cash to pay the non-tax related purchase price of VAC payable to seller during the first three months of 2015, which was funded by net proceeds of \$27.6 million from our revolving credit facility and cash on hand.

Financial Condition

Cash balances are held in numerous locations throughout the world. As of March 31, 2015, most of our cash and cash equivalents were held outside the United States, primarily in Germany and Taiwan. Most of the amounts held outside the U.S. could be repatriated to the U.S. but, under current law, would be subject to U.S. income taxes, less applicable foreign tax credits. Our intent is to meet U.S. liquidity needs through cash generated from operations in the U.S., repatriation of future foreign earnings for certain subsidiaries, and external borrowings. We expect our available cash, 2015 operating cash flows and availability under our revolving credit facility described below to be adequate to fund 2015 operating needs and capital expenditures.

Debt and Other Financing Activities

On September 4, 2013, we entered into a five-year Senior Secured Revolving Credit Facility (“the Facility”), and terminated our previous credit facility dated August 2, 2011 that was scheduled to expire in August 2016. The Facility provides for \$350 million of revolving borrowing capacity and includes an expansion option of up to an additional \$150 million, subject to certain conditions. The borrowers under the agreement are the Company, Harko C.V. (“Harko”), a limited partnership organized under the laws of the Netherlands, and VAC Germany Gmb (“VAC”), a limited liability company under the laws of Germany. Harko and VAC are wholly-owned subsidiaries of the Company. The Facility matures on September 4, 2018. As of March 31, 2015, we had \$40.1 million outstanding under the Facility

and were in compliance with all Facility covenants. See Note 5 in the Notes in our Unaudited Consolidated Financial Statements included in this Form 10-Q for further discussion of the Facility.

Contractual Obligations

Since December 31, 2014, there have been no significant changes in the total amount of contractual obligations, or the timing of cash flows in accordance with those obligations, as reported in our Annual Report on Form 10-K for the year ended December 31, 2014.

Critical Accounting Policies

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions in certain circumstances that affect amounts reported in the accompanying unaudited condensed consolidated financial statements. In preparing these financial statements, management has made its best estimates and judgments of certain amounts, giving due consideration to materiality. The application of accounting policies involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. In addition, other companies may utilize different estimates and assumptions, which may impact the comparability of our results of operations to similar businesses. There have been no changes to the critical accounting policies as stated in our Annual Report on Form 10-K for the year ended December 31, 2014.

Cautionary Statement for “Safe Harbor” Purposes under the Private Securities Litigation Reform Act of 1995
The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements made by or on behalf of the Company. This report contains statements that we believe may be “forward-looking statements” within the meaning of Section 21E of the Securities Exchange Act of 1934. These forward-looking statements are not historical facts and generally can be identified by use of statements that include words such as “believe,” “expect,” “anticipate,” “intend,” “plan,” “foresee” or other words or phrases of similar import. Similarly, statements that describe our objectives, plans or goals also are forward-looking statements. These forward-looking statements are subject to risks and uncertainties that are difficult to predict, may be beyond our control and could cause actual results to differ materially from those currently anticipated. We undertake no obligation to publicly revise these forward-looking statements to reflect events or circumstances that arise after the date hereof. Significant factors affecting these expectations are set forth under Item 1A — Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2014.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

A discussion of market risk exposures is included in Part II, Item 7a. Quantitative and Qualitative Disclosure About Market Risk in our Annual Report on Form 10-K for the year ended December 31, 2014. There have been no material changes from the quantitative and qualitative disclosure about market risk previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of the Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2015. As defined in Rule 13a-15(e) under the Exchange Act, disclosure controls and procedures are controls and procedures designed to provide reasonable assurance that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported on a timely basis, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Our disclosure controls and procedures include components of our internal control over financial reporting. Based upon this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of March 31, 2015.

Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting, identified in connection with management's evaluation of internal control over financial reporting, that occurred during the three months ended March 31, 2015 and materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1A. Risk Factors

There have been no material changes from the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014.

Item 6. Exhibits

23

Exhibits are as follows:

- 10.1 Settlement agreement dated as of March 23, 2015 by and among OM Group, Inc., with FrontFour Capital Group LLC, and affiliates, to settle potential election contest in connection with the Company's 2015 annual meeting of stockholders (incorporated by reference to Exhibit 10.1 to the Company's Current Report on Form 8-K filed March 25, 2015).
- 31.1 Certification of Principal Executive Officer Pursuant to Rule 13a-14(a)
- 31.2 Certification of Principal Financial Officer Pursuant to Rule 13a-14(a)
- 32 Certification of Principal Executive Officer and Principal Financial Officer Pursuant to 18 U.S.C. 1350
- 101.1 Instance Document
- 101.2 Schema Document
- 101.3 Calculation Linkbase Document
- 101.4 Labels Linkbase Document
- 101.5 Presentation Linkbase Document
- 101.6 Definition Linkbase Document
