19. FAIR VALUE MEASUREMENTS

In September 2006, Statement of Financial Accounting Standards (SFAS) No. 157, "Fair Value Measurements," was issued. This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements. FASB Staff Position (FSP) 157-2 amended SFAS No. 157 to delay the effective date of SFAS No. 157 for all nonfinancial assets and nonfinancial liabilities to fiscal years beginning after November 15, 2008.

The adoption of SFAS No. 157 for financial assets and financial liabilities, effective January 1, 2008, did not have a material impact on Titan's consolidated financial position, results of operations or cash flows. The Company is evaluating the effect the adoption of SFAS No. 157 for nonfinancial assets and nonfinancial liabilities will have on its consolidated financial position, results of operations and cash flows.

SFAS No. 157 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1 – defined as quoted prices in active markets for identical instruments; Level 2 – defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3 – defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

20. RECENTLY ISSUED ACCOUNTING STANDARDS

Statement of Financial Accounting Standards Number 141 (revised 2007)

In December 2007, SFAS No. 141 (revised 2007), "Business Combinations," was issued. This statement requires an acquirer to recognize assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at their fair values on the acquisition date, with goodwill being the excess value over the net identifiable assets acquired. This statement is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The Company is evaluating the effect the adoption of this standard will have on its consolidated financial position, results of operations and cash flows.

Statement of Financial Accounting Standards Number 160

In December 2007, SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements," was issued. This statement establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. This statement is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The Company is evaluating the effect the adoption of this standard will have on its consolidated financial position, results of operations and cash flows.

Statement of Financial Accounting Standards Number 161

In March 2008, SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities," was issued. This statement requires enhanced disclosures about an entity's derivative and hedging activities. This statement is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The Company is evaluating the effect the adoption of this standard will have on its consolidated financial position, results of operations and cash flows.

OVERVIEW

Titan International, Inc. and its subsidiaries are leading manufacturers of wheels, tires and assemblies for off-highway vehicles used in the agricultural, earthmoving/construction and consumer markets. Titan manufactures both wheels and tires for the majority of these market applications, allowing the Company to provide the value-added service of delivering complete wheel and tire assemblies. The Company offers a broad range of products that are manufactured in relatively short production runs to meet the specifications of original equipment manufacturers (OEMs) and/or the requirements of aftermarket customers.

Agricultural Market: Titan's agricultural rims, wheels and tires are manufactured for use on various agricultural and forestry equipment, including tractors, combines, skidders, plows, planters and irrigation equipment, and are sold directly to OEMs and to the aftermarket through independent distributors, equipment dealers and Titan's own distribution centers.

Earthmoving/Construction Market: The Company manufactures rims, wheels and tires for various types of off-the-road (OTR) earthmoving, mining, military and construction equipment, including skid steers, aerial lifts, cranes, graders and levelers, scrapers, self-propelled shovel loaders, articulated dump trucks, load transporters, haul trucks and backhoe loaders. The earthmoving/construction market is often referred to as OTR, an acronym for off-the-road.

Consumer Market: Titan builds a variety of products for all-terrain vehicles (ATV), turf, golf and trailer applications. Titan's sales in the consumer market include sales to Goodyear, which are under an off-take/mixing agreement. This agreement includes mixed stock, which is a prepared rubber compound used in tire production. The Company provides wheels/tires and assembles brakes, actuators and components for the domestic boat, recreational and utility trailer markets.

The Company's major OEM customers include large manufacturers of off-highway equipment such as AGCO Corporation, Caterpillar Inc., CNH Global N.V., Deere & Company and Kubota Corporation, in addition to many other off-highway equipment manufacturers. The Company distributes products to OEMs, independent and OEM-affiliated dealers, and through a network of distribution facilities.

The following table provides highlights for the quarter ended March, 2008, compared to 2007 (amounts in thousands):

	Three months ended March 31,			% Increase	
	2008		2007		
Net sales	\$	253,525	\$	226,278	12%
Gross profit		32,344		27,191	19%
Income from operations		16,120		14,343	12%
Net income (loss)		8,134		(2,483)	

The Company recorded sales of \$253.5 million for the first quarter of 2008, which were 12% higher than the first quarter 2007 sales of \$226.3 million. The record sales level was attributed to exceptionally strong demand in the Company's agricultural market, which reported higher sales of 28% for the first quarter of 2008 as compared to the previous year's first quarter.

Income from operations was \$16.1 million for the first quarter of 2008, a 12% increase when compared to \$14.3 million in 2007. Titan's net income was \$8.1 million for the quarter, compared to net loss of \$(2.5) million in 2007. Basic earnings per share were \$.30 in 2008, compared to loss per share of \$(.12) in 2007. RECENT DEVELOPMENTS

Preliminary Proxy Statement – On April 11, 2008, Titan filed a preliminary proxy statement regarding a special meeting of Titan stockholders. The special meeting would be to approve the issuance of up to 9,000,000 shares of the Company's common stock in connection with a proposed offer to purchase up to all the outstanding ordinary shares of Titan Europe Plc (Titan Europe).

Before the offer may be made, the Company's stockholders would need to approve the issuance of up to 9,000,000 shares of the Company's common stock to acquire Titan Europe. The making of the proposed offer would also be subject to various approvals and pre-conditions. There can be no assurance that all conditions would be met and that the proposed offer would be made, or that it would be successful if made. The proxy statement is preliminary and is subject to approval by the Securities and Exchange Commission before a definitive proxy statement would be issued and the special Titan stockholder meeting arrangements would be made.

Supply Agreement with Deere & Company– On April 18, 2008, the Company announced that Titan Tire Corporation signed a three-year agreement to supply farm tires to various John Deere affiliates.

GIANT OTR MINING TIRES

In May 2007, Titan's Board of Directors approved funding for the Company to increase giant OTR mining tire production capacity to include 57-inch and 63-inch giant radial tires. This funding should allow Titan to produce up to an estimated 6,000 giant radial tires a year. Titan estimates this may increase sales as much as \$240 million on an annual basis. The Company currently plans to be in start-up production of these giant mining tires by July 2008.

SENIOR UNSECURED CONVERTIBLE NOTES CONVERSION

In January 2007, the Company filed a registration statement relating to an offer to the holders of its 5.25% senior unsecured convertible notes due 2009 to convert their notes into Titan's common stock at an increased conversion rate (the "Offer"). Per the Offer, each \$1,000 principal amount of notes was convertible into 81.0000 shares of common stock, which is equivalent to a conversion price of approximately \$12.35 per share. Prior to the Offer, each \$1,000 principal amount of notes was convertible into 74.0741 shares of common stock, which was equivalent to a conversion price of approximately \$13.50 per share.

The registration statement relating to the shares of common stock to be offered was declared effective February 2007. In March 2007, the Company announced 100% acceptance of the conversion offer and the \$81,200,000 of accepted notes were converted into 6,577,200 shares of Titan common stock. Titan recognized a noncash charge of \$13.4 million in connection with this exchange in accordance with SFAS No. 84, "Induced Conversions of Convertible Debt."

CRITICAL ACCOUNTING ESTIMATES

Preparation of the financial statements and related disclosures in compliance with accounting principles generally accepted in the United States of America requires the application of appropriate technical accounting rules and guidance, as well as the use of estimates. The Company's application of these policies involves assumptions that require difficult subjective judgments regarding many factors, which, in and of themselves, could materially impact the financial statements and disclosures. A future change in the estimates, assumptions or judgments applied in determining the following matters, among others, could have a material impact on future financial statements and

disclosures.

Inventories

Inventories are valued at lower of cost or market. Cost is determined using the first-in, first-out (FIFO) method for approximately 68% of inventories and the last-in, first-out (LIFO) method for approximately 32% of inventories. The major rubber material inventory and related work-in-process and their finished goods are accounted for under the FIFO method. The major steel material inventory and related work-in-process and their finished goods are accounted for under the LIFO method. Market value is estimated based on current selling prices. Estimated provisions are established for slow-moving and obsolete inventory, as well as inventory carried above market price based on historical experience. Should experience change, adjustments to estimated provisions would be necessary.

18

TITAN INTERNATIONAL, INC.
Management's Discussion and Analysis of
Financial Condition and Results of Operations

Impairment of Goodwill

The Company reviews goodwill to assess recoverability from future operations during the fourth quarter of each annual reporting period, and whenever events and circumstances indicate that the carrying values may not be recoverable. The Company had goodwill of \$11.7 million at March 31, 2008. Significant assumptions relating to future operations must be made when estimating future cash flows in analyzing goodwill for impairment. Should unforeseen events occur or operating trends change significantly, impairment losses could occur.

Valuation of Investment Accounted for as Available-for-Sale Security

The Company has an investment in Titan Europe Plc of \$32.8 million as of March 31, 2008, representing a 17.3% ownership position. Titan Europe Plc is publicly traded on the AIM market in London, England. This investment is recorded as "Investment in Titan Europe Plc" on the consolidated balance sheet. In accordance with SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities," the Company records the Titan Europe Plc investment as an available-for-sale security and reports this investment at fair value, with unrealized gains and losses excluded from earnings and reported in a separate component of stockholders' equity. Should the fair value decline below the cost basis, the Company would be required to determine if this decline is other than temporary. If the decline in fair value were judged to be other than temporary, an impairment charge would be recorded. Should unforeseen events occur or investment trends change significantly, impairment losses could occur.

The March 31, 2008, fair value of \$32.8 million was below the Company's cost basis of \$40.3 million. The unrealized loss on the Titan Europe Plc investment was \$7.5 million. No impairment charge has been recorded as this decline below cost basis was judged to be temporary at March 31, 2008. Should unforeseen events occur or investment trends change significantly, impairment losses could occur. Declared dividends on this investment are recorded in income as a component of other income.

Income taxes

Deferred income tax provisions are determined using the liability method whereby deferred tax assets and liabilities are recognized based upon temporary differences between the financial statement and income tax basis of assets and liabilities. The Company assesses the realizability of its deferred tax asset positions in accordance with SFAS No. 109, "Accounting for Income Taxes."

Asset and Business Acquisitions

The allocation of purchase price for asset and business acquisitions requires management estimates and judgment as to expectations for future cash flows of the acquired assets and business and the allocation of those cash flows to identifiable intangible assets in determining the estimated fair value for purchase price allocations. If the actual results differ from the estimates and judgments used in determining the purchase price allocations, impairment losses could occur relating to any intangibles recorded in the acquisition. To aid in establishing the value of any intangible assets at the time of acquisition, the Company typically engages a professional appraisal firm.

Retirement Benefit Obligations

Pension benefit obligations are based on various assumptions used by third-party actuaries in calculating these amounts. These assumptions include discount rates, expected return on plan assets, mortality rates and other factors. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and obligations. The Company has three frozen defined benefit pension plans and one defined benefit plan that purchased a final annuity settlement in 2002. Titan expects to contribute approximately \$1 million to these frozen defined pension plans during the remainder of 2008. For more information concerning these costs and obligations, see the discussion of the "Pensions" and Note 20 to the Company's financial statements on Form 10-K for the fiscal year ended December 31, 2007.

Financial Condition and Results of Operations

RESULTS OF OPERATIONS

The following tables and discussions provide highlights for the three months ended March 31, 2008, compared to 2007 (amounts in thousands):

	Three months ended March 31,	
	2008	2007
Net sales	\$ 253,525	\$ 226,278
Cost of sales	221,181	199,087
Gross profit	\$ 32,344	\$ 27,191
Gross profit margin	12.8%	12.0%

Net Sales

Net sales for the quarter ended March 31, 2008, were \$253.5 million, an increase of \$27.2 million or approximately 12% when compared to \$226.3 million in 2007. The record quarterly sales were attributed to strong demand in the Company's agricultural market, which reported higher sales of approximately 28% for the first quarter of 2008 as compared to the previous year's first quarter.

Cost of Sales and Gross Profit

Cost of sales was \$221.2 million for the first quarter of 2008, compared to \$199.1 million in 2007. The higher cost of sales resulted from an increase in sales and raw material prices and hiring costs. Raw material prices increased by approximately \$5 million to \$6 million in the first quarter of 2008, as compared to the first quarter of 2007. Costs associated with hiring and training workers to be utilized in giant OTR production were estimated to be approximately \$1 million for the quarter.

Gross profit for the first quarter of 2008 was \$32.3 million or 12.8% of net sales, compared to \$27.2 million or 12.0% of net sales for the first quarter of 2007. The gross profit margin for the quarter showed an improvement of approximately 1% as compared to the first quarter of 2007, even though the margin was hampered by higher raw material prices and training costs, which had a negative impact of approximately 2% to 3% on the margin.

Administrative Expenses

Selling, general and administrative expenses were as follows (amounts in thousands):

	Three months ended March 31,	
	2008	2007
Selling, general and administrative	\$ 14,077	\$ 11,284
Percentage of net sales	5.6%	5.0%

Selling, general and administrative (SG&A) expenses for the first quarter of 2008 were \$14.1 million or 5.6% of net sales, compared to \$11.3 million or 5.0% of net sales for 2007. Administrative expense increased as the result of higher selling expenses of approximately \$1 million due to record sales and approximately \$1 million of higher professional fees.

Royalty Expense

Royalty expense was as follows (amounts in thousands):

	Three months ended March 31,	
	2008	2007
Royalty expense	\$ 2,147	\$ 1,564

The Goodyear North American farm tire asset acquisition included a license agreement with The Goodyear Tire & Rubber Company to manufacture and sell certain off-highway tires in North America under the Goodyear name. Royalty expenses were \$2.1 million and \$1.6 million for the first quarter of 2008 and 2007, respectively. The higher royalty expense was the result of the strong sales in the agricultural segment.

Financial Condition and Results of Operations

Income from Operations

Income from operations was as follows (amounts in thousands):

	Three months ended March 31,	
	2008	2007
Income from operations	\$ 16,120	\$ 14,343
Percentage of net sales	6.4%	6.3%

Income from operations for the first quarter of 2008 was \$16.1 million or 6.4% of net sales, compared to \$14.3 million or 6.3% in 2007. The improvement in income from operations was the net result of the items previously discussed in the sales, cost of sales, administrative and royalty line items.

Interest Expense

Interest expense was as follows (amounts in thousands):

	Three months ended March 31,	
	2008	2007
Interest expense	\$ 3,984	\$ 5,749

Interest expense was \$4.0 million for the first quarter of 2008, compared to \$5.7 million in 2007. The reduction in interest costs was primarily the result of: (i) lower debt levels that accounted for approximately \$1 million of the reduction and (ii) capitalization of interest of \$0.6 million related to the giant OTR project in 2008.

Noncash Convertible Debt Conversion Charge

Noncash convertible debt conversion charge was as follows (amounts in thousands):

	Three months ended March 31,	
	2008	2007
Noncash convertible debt conversion charge	\$ 0	\$ 13,376

In March 2007, the Company converted \$81.2 million of convertible notes into 6,577,200 shares of Titan common stock. Titan recognized a noncash charge of \$13.4 million in connection with this exchange in accordance with SFAS No. 84, "Induced Conversions of Convertible Debt."

Other Income (Expense)

Other income (expense) was as follows (amounts in thousands):

	Three months ended March 31,	
	2008	2007
Other income (expense)	\$ 1,420	\$ (185)

Other income for the first quarter of 2008 was \$1.4 million, compared to other expense of \$(0.2) million in 2007. Interest income included in other income was \$0.5 million for each of the first quarters of 2008 and 2007. The first quarter of 2008 included income from a legal settlement of approximately \$1 million, while the first quarter of 2007 included debt termination expense of \$0.7 million.

Income Taxes

Income taxes were as follows (amounts in thousands):

	Three months ended March 31,	
	2008	2007
Income tax expense (benefit)	\$ 5,422	\$ (2,484)

The Company recorded income tax expense of \$5.4 million and income tax benefit of \$(2.5) million for the quarters ended March 31, 2008 and 2007, respectively. The Company's effective income tax rate was 40% and 50% for the three months ended March 31, 2008 and 2007, respectively. The Company's 2007 income tax expense and rate differ from the amount of income tax determined by applying the U.S. Federal income tax rate to pre-tax income primarily as a result of the \$13.4 million noncash charge taken in connection with the Company's convertible debt. This noncash charge was not deductible for income tax purposes.

Net Income (Loss)

Net income (loss) was as follows (amounts in thousands):

	Three months ended March 31,	
	2008	2007
Net income (loss)	\$ 8,134	\$ (2,483)

Net income for the first quarter of 2008 was \$8.1 million, compared to net loss of \$(2.5) million in 2007. Basic earnings per share were \$.30 for the first quarter of 2008, compared to loss per share of \$(.12) in the first quarter of 2007. Diluted earnings per share were \$.29 for the first quarter of 2008, compared to loss per share of \$(.12) in 2007. The Company's net income and earnings per share increased due to the items detailed above.

Agricultural Segment Results

Agricultural segment results were as follows (amounts in thousands):

	Three months ended March 31,	
	2008	2007
Net sales	\$ 173,486	\$ 135,296
Gross profit	19,693	10,826
Income from operations	16,443	8,038

Net sales in the agricultural market were \$173.5 million for the first quarter of 2008, as compared to \$135.3 million in 2007. The increase of \$38.2 million, or approximately 28%, in agricultural segment sales was the result of higher demand from the Company's customers resulting from record farm income in 2007.

Gross profit in the agricultural market was \$19.7 million for the first quarter of 2008, an increase of \$8.9 million, or approximately 82%, when compared to the \$10.8 million in 2007. Income from operations in the agricultural market was \$16.4 million for the first quarter of 2008, an improvement of approximately 105% when compared to \$8.0 million for the first quarter of 2007. The increase in gross profit and income from operations in the agricultural market was attributed to robust farm equipment sales. These improved results were achieved despite higher raw material prices of \$3 million to \$4 million that negatively impacted the profit during the current quarter.

Earthmoving/Construction Segment Results

Earthmoving/Construction segment results were as follows (amounts in thousands):

	Three months ended March 31,	
	2008	2007
Net sales	\$ 73,833	\$ 75,118
Gross profit	11,911	15,892
Income from operations	9,802	13,875

The Company's earthmoving/construction market net sales were \$73.8 million for the first quarter of 2008, as compared to \$75.1 million in 2007.

Gross profit in the earthmoving/construction market was \$11.9 million for the first quarter of 2008, as compared to \$15.9 million in 2007. Income from operations in the earthmoving/construction market was \$9.8 million for the first quarter of 2008 versus \$13.9 million in 2007. With the lower sales level, the segments gross profit and income from operations had a corresponding reduction. In addition, the Company estimates gross profit was negatively impacted by: (i) higher raw material prices of approximately \$1 million to \$2 million and (ii) costs associated with hiring and training workers to be utilized in giant OTR production, estimated to be approximately \$1 million for the quarter.

Consumer Segment Results

Consumer segment results were as follows (amounts in thousands):

	Three months ended March 31,	
	2008	2007
Net sales	\$ 6,206	\$ 15,864
Gross profit	1,049	1,100
Income from operations	869	848

Consumer market net sales were \$6.2 million for the first quarter of 2008, as compared to \$15.9 million in 2007. The Goodyear farm tire acquisition agreement included an off-take/mixing agreement for certain product sales to Goodyear. The reduction in consumer market sales is related to lower sales to The Goodyear Tire & Rubber Company of approximately \$9 million quarter over quarter.

Gross profit from the consumer market was \$1.0 million for the first quarter of 2008, as compared to \$1.1 million in 2007. Consumer market income from operations was \$0.9 million for the first quarter of 2008, as compared to \$0.8 million for 2007. Despite, the lower sales level, consumer market gross profit and income from operations remained stable with the previous year due to a shift to higher margin consumer products.

Corporate Expenses

Income from operations on a segment basis does not include corporate expenses or depreciation and amortization expense related to property, plant and equipment carried at the corporate level totaling \$11.0 million for the first quarter of 2008, as compared to \$8.4 million for the first quarter of 2007.

Corporate expenses for the first quarter of 2008 were composed of the following: (i) selling and marketing expenses of approximately \$5 million; (ii) CEO and executive incentives of approximately \$1 million; and (iii) administrative expenses of approximately \$5 million.

Corporate expenses for the first quarter of 2007 were composed of the following: (i) selling and marketing expenses of approximately \$4 million; (ii) CEO and executive incentives of approximately \$1 million; and (iii) administrative expenses of approximately \$3 million.

The increase of approximately \$1 million in selling and marketing expenses in the first quarter of 2008 as compared to first quarter 2007 resulted from the higher sales levels. Administration expenses increased as a result of higher professional fees, which increased approximately \$1 million quarter over quarter.

MARKET RISK SENSITIVE INSTRUMENTS

The Company's risks related to foreign currencies, commodity prices and interest rates are consistent with those for 2007. For more information, see the "Market Risk Sensitive Instruments" discussion in the Company's Form 10-K for the fiscal year ended December 31, 2007.

LIQUIDITY AND CAPITAL RESOURCES

Cash Flows

As of March 31, 2008, the Company had \$47.6 million of cash balances within various bank accounts. This cash balance decreased by \$10.7 million from December 31, 2007, due to the following cash flow items.

Operating cash flows

Summary of cash flows from operating activities (amounts in thousands):

	Three months ended March 31,		
	2008	2007	Change
Net income (loss)	\$ 8,134	\$ (2,483)	\$ 10,617
Depreciation and amortization	7,153	7,465	(312)
Deferred income tax provision	5,386	(2,845)	8,231
Noncash debt charge	0	13,376	(13,376)
Accounts receivable	(35,426)	(47,431)	12,005
Inventories	3,852	10,646	(6,794)
Accounts payable	18,664	24,274	(5,610)
Other current liabilities	(2,179)	11,891	(14,070)
Other operating activities	3,239	851	2,388
Cash provided by operating activities	\$ 8,823	\$ 15,744	\$ (6,921)

In the first quarter of 2008, operating activities provided cash of \$8.8 million. This cash was primarily provided by net income of \$8.1 million and increases of \$18.7 million in accounts payable. Included in net income were noncash charges of \$7.2 million of depreciation and amortization and a \$5.4 million deferred income tax provision. Positive

cash flows were offset by an increase in accounts receivable balance of \$35.4 million.

TITAN INTERNATIONAL, INC.
Management's Discussion and Analysis of
Financial Condition and Results of Operations

For the first quarter of 2007, positive cash flows from operating activities of \$15.7 million resulted primarily from increases of \$24.3 million in accounts payable and \$11.9 million in other current liabilities along with a decrease of \$10.6 million in inventories. Included in net loss were noncash charges of \$13.4 million for a debt conversion charge and \$7.5 million of depreciation and amortization. Positive cash flows were offset by an increase in accounts receivable balance of \$47.4 million and a net loss of \$2.5 million.

Operating cash flows decreased \$6.9 million when comparing the first quarter of 2008 to the first quarter of 2007. The net income in the first quarter of 2008 was a \$10.6 million increase from the loss in first quarter 2007. However, the first quarter 2007 loss included a \$13.4 million noncash charge, which offset the increase in income. Cash flows from current liabilities decreased \$14.1 million when comparing the first quarter of 2008 to the first quarter of 2007. The change in cash flows from current liabilities was the result of the timing of payments, primarily interest payable.

Investing cash flows

Net cash used for investing activities was \$20.9 million in the first quarter of 2008, as compared to \$4.0 million in the first quarter of 2007. The Company invested a total of \$20.9 million in capital expenditures in the first quarter of 2008, compared to \$4.1 million in 2007. Of the \$20.9 million of capital expenditures in the first quarter of 2008, approximately \$16 million relates to the Company's giant OTR mining tire project. The remaining expenditures represent various equipment purchases and improvements to enhance production capabilities.

The Company estimates that current commitments related to the OTR project at this time are approximately \$60 million, including disbursements as of March 31, 2008, of approximately \$38 million. The large increase in cash used for investing activities in the first quarter of 2008, as compared to the first quarter of 2007, was a result of the capital expenditures on the giant OTR project. In addition to the OTR Project, the Company estimates that its capital expenditures for other projects for the remainder of 2008 could be approximately \$13 million.

Financing cash flows

In the first quarter of 2008, \$1.3 million of cash was provided by financing activities. This cash was primarily provided by \$1.4 million in proceeds from the exercise of stock options.

In the first quarter of 2007, cash of \$6.2 million was used for financing activities. This cash use was primarily the result of net debt payment of \$10.2 million offset by \$3.6 million in proceeds from stock option exercises.

Financing cash flows increased \$7.5 million when comparing the first quarter of 2008 to the first quarter of 2007. This increase resulted primarily from a decrease in the cash used for debt payment.

Debt Covenants

The Company's revolving credit facility contains various covenants and restrictions. The financial covenants in this agreement require that:

- Collateral coverage be equal to or greater than 1.2 times the outstanding revolver balance.
- If the 30-day average of the outstanding revolver balance exceeds \$225 million, the fixed charge coverage ratio be equal to or greater than a 1.0 to 1.0 ratio.

Restrictions include:

- Limits on payments of dividends and repurchases of the Company's stock.
- Restrictions on the ability of the Company to make additional borrowings, or to consolidate, merge or otherwise fundamentally change the ownership of the Company.
 - Limitations on investments, dispositions of assets and guarantees of indebtedness.
 - Other customary affirmative and negative covenants.

TITAN INTERNATIONAL, INC.
Management's Discussion and Analysis of
Financial Condition and Results of Operations

These covenants and restrictions could limit the Company's ability to respond to market conditions, to provide for unanticipated capital investments, to raise additional debt or equity capital, to pay dividends or to take advantage of business opportunities, including future acquisitions. The failure by Titan to meet these covenants could result in the Company ultimately being in default on these loan agreements.

The Company is in compliance with these covenants and restrictions as of March 31, 2008. The collateral coverage was calculated to be approximately 69 times the outstanding revolver balance at March 31, 2008.

The fixed charge coverage ratio did not apply for the quarter ended March 31, 2008. The credit facility usage was \$6.1 million at March 31, 2008, consisting exclusively of letters of credit of \$6.1 million with no cash borrowings.

Other Issues

The Company's business is subject to seasonal variations in sales that affect inventory levels and accounts receivable balances. Historically, Titan tends to experience higher sales demand in the first and second quarters.

Liquidity Outlook

At March 31, 2008, the Company had \$47.6 million of cash and cash equivalents and \$243.9 million of unused availability under the terms of its revolving credit facility (credit facility). The availability under the Company's \$250 million credit facility was reduced by \$6.1 million for outstanding letters of credit. The Company expects to contribute approximately \$1 million to its frozen defined benefit pension plans during the remainder of 2008. At December 31, 2007, the Company had a net operating loss carryforward of approximately \$13 million, which is expected to reduce the Company's income tax payments in 2008.

In May 2007, Titan's Board of Directors approved funding for the Company to increase giant OTR mining tire production capacity to include 57-inch and 63-inch giant radial tires (the "OTR Project"). The Company estimates that current commitments related to the OTR Project at this time are approximately \$60 million, of which approximately \$38 million was disbursed from inception through March 31, 2008. Additional capital expenditure commitments will be incurred through 2008 as the OTR Project moves to completion. The final cost of these additional OTR capital items have not been finalized at this time.

The Company currently anticipates that cash on hand and anticipated internal cash flows from operations will allow the Company sufficient funds for completion of the OTR Project. In addition to the OTR Project, the Company estimates that its capital expenditures for other projects for remainder of 2008 could be approximately \$13 million.

Cash on hand, anticipated internal cash flows from operations and utilization of remaining available borrowings are expected to provide sufficient liquidity for working capital needs and capital expenditures. If the Company were to exhaust all currently available working capital sources or not meet the financial covenants and conditions of its loan agreements, the Company's ability to secure additional funding may be negatively impacted.

PENSIONS

The Company has three frozen defined benefit pension plans and one defined benefit plan that purchased a final annuity settlement in 2002. These plans are described in Note 20 of the Company's Notes to Consolidated Financial Statements in the 2007 Annual Report on Form 10-K.

The Company's recorded liability for pensions is based on a number of assumptions, including discount rates, rates of return on investments, mortality rates and other factors. Certain of these assumptions are determined with the

assistance of outside actuaries. Assumptions are based on past experience and anticipated future trends. These assumptions are reviewed on a regular basis and revised when appropriate. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and the carrying value of the related obligations. Titan expects to contribute approximately \$1 million to these frozen defined pension plans during the remainder of 2008.

TITAN INTERNATIONAL, INC.
Management's Discussion and Analysis of
Financial Condition and Results of Operations

MARKET CONDITIONS AND OUTLOOK

Titan is experiencing strong demand for the Company's agricultural and earthmoving/construction products. This strong demand is expected to continue through 2008. The strength in the agricultural market is the result of higher commodity prices which have resulted from the continuing use of biofuels. High prices for metals, oil and gas have created a large demand for the Company's earthmoving and mining products.

In May 2007, Titan's Board of Directors approved funding for the Company to increase giant OTR mining tire production capacity to include 57-inch and 63-inch giant radial tires. This funding should allow Titan to produce up to an estimated 6,000 giant radial tires a year. Titan estimates this may increase sales as much as \$240 million on an annual basis. The Company currently plans to be in start-up production of these giant mining tires by July 2008.

Higher energy, raw material and petroleum-based product costs may continue to negatively impact the Company's margins. Many of Titan's overhead expenses are fixed; therefore, lower seasonal trends may cause negative fluctuations in quarterly profit margins and affect the financial condition of the Company.

AGRICULTURAL MARKET OUTLOOK

Agricultural market sales are forecasted to remain strong through 2008. The farm economy is being helped by strong commodity prices. However, the farm economy is also affected by high input costs for fuel and fertilizer. The increasing demand for grain-based ethanol and soybean-based biodiesel fuel has increased commodity prices and should support farm income levels in the long-term. Ethanol production is projected to continue to expand sharply through 2009/2010. The increasing demand for biofuels has supported all agricultural commodity prices as acreage has been shifted from other crops to those used in biofuels. In April 2008, Titan signed a three-year agreement to supply farm tires to various John Deere affiliates. Many variables, including weather, grain prices, export markets and future government policies and payments can greatly influence the overall health of the agricultural economy.

EARTHMOVING/CONSTRUCTION MARKET OUTLOOK

Sales for the earthmoving/construction market are expected to remain strong in 2008. Metals, oil and gas prices have remained high and at levels that are attractive for continued investment, which will maintain support for earthmoving and mining sales. However, the decline in the United States housing market has caused a decline in equipment used for housing construction. The giant OTR project should begin to add significant capacity for giant mining tires in the second half of 2008. The earthmoving/construction segment is affected by many variables, including commodity prices, road construction, infrastructure, government appropriations and housing starts.

CONSUMER MARKET OUTLOOK

The current overall uncertainty in consumer spending resulting from the housing market decline makes consumer market projections especially difficult. Titan's sales in the consumer market include sales to Goodyear, which fluctuate significantly based upon their future product requirements, which includes an off-take/mixing agreement. This agreement includes mixed stock, which is a prepared rubber compound used in tire production. The Company's consumer market sales may fluctuate significantly related to sales volumes under the off-take/mixing agreement with Goodyear. The Company expects challenging conditions for the consumer market for the remainder of 2008. Many factors affect the consumer market including weather, competitive pricing, energy prices and consumer attitude.
