**Possible Purchase of Minority Shareholdings in Arcelor Brasil S.A. and Acesita S.A.,
Arcelor's two Brazilian Subsidiaries**

11th July 2006 in Rotterdam in its Information Document dated May 16, 2006 relating to its offer for Arcelor S.A. (Arcelor) securities (the Offer) in Belgium, France and Luxembourg and May 22, 2006 relating to the Offer in Spain, as supplemented on May 31 and July 4, Mittal Steel Company N.V. (Mittal Steel) indicated that if the Offer were successful, it would be required to make a tender offer for the purchase of outstanding minority shareholdings in Arcelor's two Brazilian subsidiaries, Acesita S.A. and Arcelor Brasil S.A. Based on further analysis, however, in light of the terms of the improved Offer announced on June 25, 2006 and the governance provisions of the Memorandum of Understanding entered into between Arcelor, Mittal Steel and Mittal Steel's controlling shareholder on the same day, Mittal Steel now believes that, while there can be no assurance, such a requirement would no longer apply. Arcelor and Mittal Steel issued a joint public statement to this effect in Brazil on July 5, 2006.

Arcelor Brasil S.A. and Acesita S.A. are listed on the Bolsa de Valores de São Paulo (BOVESPA). Arcelor holds approximately 66% of the outstanding voting stock of Arcelor Brasil S.A. and approximately 56% of the share capital (consisting of voting common shares and non-voting preferred shares) and approximately 91% of the voting stock in Acesita S.A.

Article 254-A of the Brazilian corporation law requires that, in the event of a direct or indirect acquisition of control of a company listed in Brazil, the acquiror must make an offer for all voting shares not already controlled.

While there can be no assurance that its position will ultimately prevail, Mittal Steel believes that consummation of the Offer (and of the other transactions contemplated by the Memorandum of Understanding) would not result in the direct or indirect acquisition of control of Arcelor Brasil or Acesita for purposes of Article 254-A. The definition of controlling shareholder for purposes of Brazilian corporate law and Article 254-A requires that a single shareholder (or a group of related shareholders) hold (1) more than 50% of the voting shares of an entity, and (2) the power to elect or designate a majority of the board of directors of an entity. While the matter is not free from doubt, Mittal Steel believes that both criteria must be satisfied in order to find that there would be a controlling shareholder and a resulting change of control following consummation of the revised Offer (and of the other transactions contemplated by the Memorandum of Understanding). Pursuant to the Memorandum of Understanding, neither the current Controlling Shareholder of Mittal Steel nor any other prospective shareholder of Mittal Steel or Arcelor will have the power to designate a majority of Mittal Steel's or Arcelor's respective boards of directors. In addition, if the level of tenders of Arcelor shares and Convertible Bonds in the Revised Offer is high, neither the Controlling Shareholder nor any other prospective shareholder of Mittal Steel will hold more than 50% of the shares of Mittal Steel.

The position taken by Mittal Steel and Arcelor in respect of the application of Article 254-A could, however, be contested by the Comissão de Valores Mobiliários, the regulator of the Brazilian securities markets, or by minority shareholders of Arcelor Brasil or Acesita.

No Offer

No offer to exchange or purchase any Arcelor shares or convertible bonds has been or will be made in Japan and The Netherlands or in any jurisdiction other than Belgium, France, Luxembourg, Spain and the United States.
