FOR IMMEDIATE PUBLICATION

## **METZ POWER PLANT SELECTS CGI TO UPGRADE ITS CUSTOMER INFORMATION SYSTEM**

### **Agreement reached between the two companies includes joint marketing of the future solution to other energy producers and distributors**

**Paris, France, February 11, 2003** CGI Group Inc. (CGI) (TSX: GIB.A; NYSE: GIB), and the Usine d'Electricité de Metz (UEM), France's leading independent electric authority, today announced they have signed a 30-month contract valued at US\$9 million (CDN\$ 14 million) for the upgrading of UEM's customer relations management (CRM) statement and billing system.

The contract also includes a partnership whereby CGI and UEM will jointly market the future solution. Designed for energy distributors and suppliers to the European market, the information system will provide multi-fluid (electricity, gas, district heating, etc.) and multi-activity (cable television, service contracts, Internet) management capabilities.

In collaboration with UEM, CGI will be responsible for the complete delivery of the system, from its design to implementation and for all of the solution's functional areas, from meter reading to collection.

The European directive of 1999 opened the energy market to competition, explained Francis Grosmanin, UEM's director of information and organization systems and project leader for the company. "As an electricity producer and distributor, we must adapt to this new situation in order to remain competitive. We are very pleased that CGI has joined us in this challenge, thus allowing us to benefit from its recognized expertise in the utilities sector."

The CGI teams and those of UEM will focus on developing a unique, innovative and state-of-the-art solution, stated Denis Marchesnay, director, utilities consulting services for CGI in France. "The tool, which will be fully adapted to a sector that is obliged to follow a new set of rules, will become a benchmark for the entire market."
