- Uncertainties regarding the development of, and competition within, the market for broadband services in the U.S. and Europe, including risks relating to competing technologies and standards, regulation, capital costs and the timing and amount of customer demand for high bandwidth applications;

- General political conditions, including any extended period of war or conflict involving the U.S. or Europe.

Many of these factors will be important in determining Dynegy's actual future results. Consequently, no forward-looking statement can be guaranteed. Dynegy's actual future results may vary materially from those expressed or implied in any forward-looking statements.
