PART I

Item 1. Business

General

Cascade Corporation is a corporation organized in 1943 under the laws of the State of Oregon. The term "the Company" includes Cascade Corporation and its subsidiaries. The Company's headquarters are located in Fairview, Oregon, a suburb of Portland, Oregon. The Company is one of the world's leading manufacturers of materials handling load engagement devices, hose reels, sideshifters, and related replacement parts, primarily for the lift truck industry. Acquisitions in 1996 and 1997 expanded the Company's load engagement product line to include fork products and its hydraulic cylinder product. Both of these product lines are sold primarily to the lift truck industry. The Company sold its mast business unit in January 1999, its industrial tires division in April 1999 and its hydraulic cylinder division in January 2002. The Company's business is now focused on materials handling load engagement products.

Products

The Company manufactures an extensive range of materials handling load engagement products that are widely used on fork lift trucks and, to a lesser extent, on construction and agricultural vehicles.

The Company's products are manufactured with the Cascade and Cascade-Kenhar names and symbols, for which the Company has secured trademark protection. The primary function of these products is to provide the lift truck with the capability of engaging, lifting, carrying and depositing various types of loads and products. The Company offers a wide variety of functionally different products, each of which has several sizes, models, capacities and optional combinations. Products are designed to handle loads with pallets and for specialized applications without pallets. Examples of specialized applications include the ability to expand the basic lift truck's functionality to reposition, clamp, rotate, or push/pull a variety of loads such as appliances, paper rolls, baled materials, textiles, beverage containers, drums, canned goods, bricks, masonry blocks, lumber, plywood and boxed, packaged and containerized products.

The Company is one of the leading domestic and foreign independent suppliers of load engagement products for industrial fork lift trucks. Several lift truck manufacturers, who are customers of the Company, are also competitors in varying degrees to the extent that they manufacture a portion of their load engagement product requirements. Since the Company offers a broad line of products capable of supplying a significant part of the total requirements for the entire lift truck industry, its experience has shown that lower costs resulting from its relatively high unit volume would be difficult for any individual lift truck manufacturer to achieve.

The manufacturing of load engagement products includes the purchase of raw materials and components, principally rolled, bar, plate and extruded steel products, unfinished castings and forgings, hydraulic cylinders and motors and hardware items such as fasteners, rollers, hydraulic seals and hose assemblies. Certain rolled steel is purchased from a German steel mill. A portion of the Company's bar steel purchases are obtained under annual pricing arrangements, which do not require minimum quantity purchases. The Company uses several domestic and foreign suppliers for other materials. The Company is not currently experiencing any shortages in obtaining raw materials or purchased parts. Difficulties in obtaining alternative sources of rolled, bar, plate and extruded steel products and other materials from one of its primary suppliers could affect operating results. See "FISCAL 2003 OUTLOOK" (Item 7) for comments regarding the impact of steel tariffs recently imposed by the United States government.

The Company's products are subject to strict design, construction and safety requirements established by industry associations and the International Standards Association. The Company

1

presently offers a wide variety of both standardized and specialized products. Product specifications and characteristics are dictated by the expected capacity to be lifted, the characteristics of the load, the ambient environment in which employed, the terrain over which the load will be moved and the operational life cycle of the vehicle. Accordingly, while there are some standard products, the market demands a wide range of products in custom configurations and capacities.

The Company is one of the leading independent manufacturers of materials handling load engagement products for lift trucks in the world. Market share varies by geographic region. The Company believes it is the leading manufacturer in North America and the preferred supplier of many OEMs (original equipment manufacturers) as well as OEDs (original equipment dealers) and distributors. The Company also has significant market share in Europe and is continuing its sales and manufacturing expansion into the Asia/Pacific region. Since the Company offers a broad range of both standard and specialized products, it is capable of supplying a significant part of the total requirements for the lift truck industry. In addition to sales to the lift truck market, the Company sells products to OEMs who manufacture construction, mining, agricultural and industrial mobile equipment other than lift trucks.

Customers

Edgar Filing: CASCADE CORP - Form 10-K

The Company's products are marketed and sold to OEMs and OEDs (original equipment dealers) throughout North America, Latin America, Europe, Asia, Africa, Australia and the Middle East. A significant portion of fork sales are to a few major OEM customers. However, no single customer accounts for more than 10% of the Company's consolidated net sales. Approximately 30% of the Company's consolidated net sales for the year ended January 31, 2002 were to OEM customers. This percentage is comparable to prior years.

Backlog

The Company's products are manufactured with short lead times of generally less than one month. Accordingly, the Company does not believe the level of backlog orders is a significant factor in evaluating the Company's overall level of business activity.

Research and Development

Most of the Company's research and development activities are performed at the Company's corporate headquarters in Fairview, Oregon and at its manufacturing facility in Guelph, Canada. The Company's engineering staff develops and designs substantially all of the products sold by the Company and is continually involved in developing products for new applications. The Company does not consider patents to be important to its business.

Environmental Matters

The Company from time to time is the subject of investigations, conferences, discussions, and negotiations with various federal, state, local and foreign agencies with respect to cleanup of hazardous waste and compliance with environmental laws and regulations. Note 16 to the Consolidated Financial Statements (Item 8), "Legal Proceedings" (Item 3) and "Management's Discussion and Analysis of Financial Conditions and Results of Operations" (Item 7) contain additional information concerning the Company's environmental matters.

Employees

At January 31, 2002, the Company had approximately 1,400 full-time employees throughout the world. The majority of these employees are not subject to collective bargaining agreements. The Company believes relations with its employees are excellent.

2

Foreign Operations

The Company has substantial operations outside the United States. There are additional business risks attendant to the Company's foreign operations such as the risk that the relative value of the underlying local currencies may weaken when compared to the U.S. dollar. For further information about foreign operations, see "Management's Discussion and Analysis of Financial Condition and Results of Operations" (Item 7) and Notes to the Consolidated Financial Statements (Item 8).

Forward-looking Statements

Forward-looking statements throughout this report are based upon assumptions involving a number of risks and uncertainties. Factors which could cause actual results to differ materially from these forward-looking statements include, but are not limited to, competitive factors in, and the cyclical nature of, the materials handling industry; fluctuations in lift truck orders or deliveries, availability and cost of raw materials; general business and economic conditions in North America, Europe, Australia and Asia; foreign currency fluctuations; pending litigation; and the effectiveness of the Company's capital expenditures and cost reduction initiatives.

3

Item 2. Properties

The Company owns and leases various types of properties located throughout the world. The Company's executive offices are located in Fairview, Oregon. The Company generally considers the productive capacity of its manufacturing facilities to be adequate and suitable to meet its requirements.

Item 3. Legal Proceedings

Neither the Company nor any of its subsidiaries are involved in any material pending legal proceedings other than litigation related to environmental matters discussed below. The Company and its subsidiaries are insured against product liability, personal injury and property damage claims, which may occasionally arise.

The Company and The Boeing Company are defendants in litigation brought in December 1999 by the City of Portland, Oregon (City), alleging damages arising from the proximity of a City water well field to groundwater contamination in the area of their respective Portland plant sites. The Company and The Boeing Company are remedying the contamination in question, which has never affected the quality of water pumped by the City from the well field. The City's complaint originally alleged damages of approximately \$6.4 million. In November 2000, the City raised new theories it asserts would increase its claimed damages against both defendants by an amount currently estimated to be

\$16 million. In March 2002, the City asserted an additional claim of up to \$10.1 million. If the City were to prevail on all of its claims and be awarded all damage amounts it has asserted to date, the combined liability of the Company and The Boeing Company would approximate \$32.5 million.

In March 2001, the United States District Court for the District of Oregon granted a partial summary judgment to the City on certain liability issues raised in its original claim. The partial summary judgment will likely lead to a damage judgment in some amount on the December 1999 claim. The Company believes it has substantial defenses to damage amounts sought by the City. The Company believes most or all of the remaining November 2000 claim and the apparent March 2002 claim are without merit. There has been no allocation of possible damages between the Company and The Boeing Company. During the year ended January 31, 2002, the Company accrued \$1.5 million in

Edgar Filing: CASCADE CORP - Form 10-K

connection with the City of Portland litigation. This reflects a present estimate of its allocable share of any eventual liability, however, the ultimate outcome of this matter cannot presently be determined.

The Company brought an action in 1992 in the Circuit Court of the State of Oregon for Multnomah County against several insurers to recover various expenses incurred in connection with environmental litigation and related proceedings. The Company settled with a number of the insurers in fiscal 1998 and received a jury verdict in the Company's favor against the two remaining insurers. The verdict awarded the Company a portion of its environmental expenses and defense costs. The Company has received court opinions to date regarding the environmental expenses and defense costs, and awarding attorneys fees, under which the nonsettling insurers would be liable to the Company for a total of approximately \$1.6 million. The Company has not recorded any amounts which may be recovered from the two insurers in its consolidated financial statements.

Item 4. Submission of Matters to a Vote of Security Holders

None

5

PART II

Item 5. Market for Registrant's Common Equity and Related Stockholder Matters

As of January 31, 2002, there were 291 holders of the Company's common stock including blocks of shares held by various depositories. It is the Company's belief that when the shares held by the depositories are attributed to the beneficial owners, the total exceeds 2,500.

During the year ended January 31, 1998, a Canadian subsidiary of the Company issued 1,100,000 preferred shares in connection with the acquisition of Kenhar Corporation. Each preferred share is exchangeable for one common share of the Company. The preferred shares were issued in an exempt private offering transaction and a Form S-3 Registration covering common shares issuable upon conversion of these shares became effective in October 1998. A subsidiary of the Company repurchased 300,000 of these shares in connection with the sale of the most business unit in January 1999. A total of 800,000 exchangeable preferred shares remain outstanding at January 31, 2002.

Market Information

The high and low sales prices of the common stock of Cascade Corporation were as follows.

	For the year ended January 31			
	2002		2001	
	High	Low	High	Low
Market price range:				
First quarter	\$ 15.75	\$ 8.40	\$ 11.44	\$ 7.50
Second quarter	10.75	8.90	12.75	9.94
Third quarter	13.00	8.50	16.00	12.75
Fourth quarter	12.25	9.01	16.75	15.08

Common Stock Dividends

The Company declared no common stock dividends in the year ended January 31, 2002. The common stock dividends declared by the Company in the year ended January 31, 2001 were as follows:

First quarter	\$.10
Second quarter	.10
Third quarter	

Edgar Filing: CASCADE CORP - Form 10-K

Fourth quarter

Total	\$.20

(1)

Edgar Filing: CASCADE CORP - Form 10-K

Except net income, excludes for all periods the data for the Company's hydraulic cylinder division, which was sold in January 2002.

(2)

Management believes that Earnings Before Interest Expense, Interest Income, Taxes, Depreciation and Amortization (EBITDA) is a key measure of cash flow. EBITDA should not be viewed as a measurement of financial performance under Generally Accepted Accounting Principles (GAAP) or as a substitute for GAAP measurements such as net income or cash flow from operating activities. EBITDA is not necessarily comparable to other companies due to the lack of uniform definition of EBITDA by all companies. EBITDA as presented excludes the results of discontinued operations.

(3)

Includes the effect of 800,000 shares of outstanding exchangeable preferred stock for years ending subsequent to January 31, 1997.

7

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

This discussion and analysis should be read in conjunction with the consolidated financial statements and related notes. All references to earnings per share included in this discussion are diluted earnings per share.

The Company has classified all depreciation expense amounts as a component of cost of goods sold or selling and administrative expenses. The Company had previously classified depreciation and amortization expense separately in its consolidated statement of income. This change has no impact on net income for the current year or any prior periods. The disclosures in this Form 10-K reflect this reclassification.

As discussed in Note 3 to the consolidated financial statements, the Company sold its hydraulic cylinder division in January 2002. The Company's consolidated statements of income and cash flows separately present the historical results of the hydraulic cylinder division as a discontinued operation.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Management's discussion and analysis of its financial position and results of operations are based on the Company's consolidated financial statements which have been prepared in accordance with generally accepted accounting principles in the United States. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities. Management evaluates its estimates and judgments on an on-going basis, including those related to uncollectible receivables, inventories, goodwill and long-lived assets, warranty obligations, environmental liabilities, and deferred taxes. The Company bases its estimates on historical experience and various other assumptions that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. The Company believes the following critical accounting policies affect its more significant judgments and estimates in the preparation of its consolidated financial statements.

Allowances for Doubtful Accounts

The Company maintains allowances for doubtful accounts for estimated losses on accounts and notes receivable resulting from the inability of its customers and note holders to make required payments. Such allowances are based on an ongoing review of customer and note holder payments against terms and a review of customer and note holder financial statements and financial information. If the financial condition of customers or the note holders were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

Inventory Reserves

The Company maintains reserves to write down its inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. If actual future demand or market conditions are less favorable than those projected by management, additional inventory write downs may be required.

Goodwill and Long-Lived Assets

The Company evaluates the carrying value of goodwill and long-lived assets whenever events or circumstances indicate the carrying value may not be recoverable. Certain factors that the Company considers important which could trigger an impairment review include, but are not

limited to, significant underperformance relative to historical or projected future operating results, significant

changes in the manner of use of the acquired assets or the strategy for the Company's overall business and significant negative industry or economic trends. In addition, assumptions are required to estimate future cash flows, including gross margins, sales growth rates and expense levels, the discount rate, and estimated terminal values to determine fair value of the operating entities should an impairment exist. Changes in these and other factors could result in impairments in the carrying value of goodwill and long-lived assets which would require a write down or further write downs to the asset's fair value.

Warranty Obligations

The Company offers certain warranties with the sales of its products. The warranty obligation is recorded as a liability on the balance sheet and is estimated through historical customer claims, product failure rates, material usage and service delivery costs incurred in correcting a product failure. Changes in these factors would require an adjustment to the recorded warranty obligations.

Environmental Liabilities

The Company accrues environmental remediation and litigation costs if it is probable a liability has been incurred at the financial statement date and the amount can be reasonably estimated. The reliability and precision of the loss estimates are affected by numerous factors, such as site evaluation and reevaluation of the degree of remediation required, claims by third parties and changes to environmental laws and regulations. The Company adjusts its liabilities as new remediation requirements are defined, as information becomes available permitting reasonable estimates to be made and to reflect new and changing facts.

Deferred Taxes

The Company records a valuation allowance to reduce its deferred tax assets to the amount that it believes is more likely than not to be realized. While the Company has considered future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance, in the event the Company were to determine that it would not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the deferred tax assets would be charged to income in the period such determination was made. Likewise, should the Company determine that it would be able to realize its deferred tax assets in the future in excess of its net recorded amount, an adjustment to the deferred tax assets would increase income in the period such determination was made.

COMPARISON OF FISCAL 2002 AND FISCAL 2001

Consolidated net sales for the year ended January 31, 2002 decreased 16.1% in comparison with consolidated net sales for the year ended January 31, 2001. This decline reflects the reduced order rates for lift trucks throughout the world. The lift truck industry in North America for 2002 experienced declines in orders and shipments of 40% and 25%, respectively, in comparison with the prior year. Approximately 30% of the Company's consolidated net sales were to OEM customers for the year ended January 31, 2002, which is consistent with prior years. Sales to unaffiliated customers in North America, which accounts for 64% of the Company's total sales, decreased 17.3% in fiscal 2002. Sales to unaffiliated customers in Europe and the Rest of World (primarily Australia and Asia) experienced decreases of 13.3% and 15.1%, respectively.

The Company initiated aggressive cost management initiatives in fiscal 2002 in order to mitigate the effect of decreased sales levels. These initiatives have included aggressive material cost reductions, reduced work schedules and staff reductions in both production and administrative staff. A worldwide pay freeze was initiated in October 2001, which has remained in effect through the end of fiscal 2002 and will continue through at least a portion of fiscal 2003. The Company's overall work force has been

reduced by 13% to 1,400 employees at January 31, 2002, excluding reductions due to the sale of the Company's hydraulic cylinder division in January 2002. The majority of the work force reduction occurred in North America.

The Company's overall gross margin of 33.5% in fiscal 2002 increased from 32.5% in fiscal 2001. During the industry downturn, the Company has focused its efforts to aggressively reduce operating inefficiencies and overall manufacturing costs. The Company has also

Edgar Filing: CASCADE CORP - Form 10-K

increased selling prices on select products in certain parts of the world to adjust to customer demand.

Selling and administrative costs as a percentage of net sales were 21.0% and 20.9% in fiscal 2002 and 2001, respectively. Due to lower sales levels in fiscal 2002, the Company initiated various cost control measures, including reduced spending and staffing levels, to reduce overall selling and administrative expenses. Fiscal 2001 expenses include costs related to restructuring activities in Europe and Australia and Special Board Committee activities of \$4.2 million. Selling and administrative costs in fiscal 2002 decreased 9.8% in comparison with fiscal 2001, excluding the restructuring and board costs. As a percentage of sales the adjusted fiscal 2001 selling and administrative costs were 19.5%.

Due to substantial and continuing operating losses at the Company's Australian subsidiary between 1998 and 2001 the Company initiated a significant restructuring effort to consolidate manufacturing facilities, reduce its overall sales and distribution network and eliminate unprofitable product lines. While these activities were substantially completed in fiscal 2001, the Company continued to experience declining sales levels throughout fiscal 2002. The Company made additional management changes and reduced its overall work force in Australia by 40% (38 employees) in the last half of fiscal 2002. The reduction in work force brought expense levels into line with projected sustainable sales levels going forward. Additional restructuring costs incurred in fiscal 2002 were not material. In light of the significant trends impacting our Australian operations and expected future growth rates, the Company performed an assessment of the carrying value of goodwill and long-lived assets in Australia as part of our review of financial results in the fourth quarter of fiscal 2002. The conclusion of the assessment was that the decline in the Australian operations was significant and other than temporary. As a result, the Company recorded a \$5.1 million write down of goodwill in the fourth quarter of fiscal 2002 related to its operations in Australia. After the write down, the Company has an additional \$3.6 million of goodwill on its consolidated balance sheet at January 31, 2002 related to Australia. The Company believes the cumulative effect of the changes in fiscal 2001 and 2002 will result in more profitable future operations in Australia.

In April 1999, the Company sold its tire business to Maine Rubber Company (Maine Rubber) for \$26.9 million payable in cash and a \$7.3 million note receivable. The note receivable is not collateralized and bears interest at 8% with interest payable quarterly and principal installments of \$1 million, \$2.1 million and \$4.2 million due in April 2002, 2003 and 2004, respectively. Through January 31, 2002, the Company has received all interest payments on the Maine Rubber note receivable on a quarterly basis since April 1999. Maine Rubber's primary customers are lift truck OEMs. With the significant decline in industry order rates in fiscal 2002, Maine Rubber's operating results have been negatively impacted. Maine Rubber notified the Company in January 2002 that it was in violation of financial covenants related to its senior notes and revolving credit agreement. As a result of the covenant violations, Maine Rubber's senior lender has restricted all of Maine Rubber's scheduled future interest or principal payments, including the \$1 million payment due to the Company in April 2002, until Maine Rubber can prepare a restructuring plan suitable to their senior lender. The Company has obtained recent Maine Rubber financial information. Based on the Company's review of this information, the Company has recorded an allowance of \$7.3 million in the fourth quarter of fiscal 2002 against the balance of the Maine Rubber note receivable. The Company intends to continue to closely monitor Maine Rubber's financial status in order to maximize any potential for recovery of the note balance in the future.

10

Amortization expense for fiscal 2002 was \$4.4 million as compared to \$5.4 million in fiscal 2001. The Company recorded a write-off of certain goodwill balances due to the closure of a facility in Sweden and other minor operations. Excluding these write-offs the amortization expense in each year was consistent.

Environmental expenses decreased in fiscal 2002 to \$1.5 million in comparison with \$4.9 million in expenses in fiscal 2001. The fiscal 2002 expenses, recorded in the fourth quarter, relate to a present estimate of the Company's allocable share of any eventual liability related to the City of Portland litigation. Fiscal 2001 expenses include \$3.1 million related to legal fees from environmental legal proceedings and \$1.8 million to adjust cost estimates for ongoing remediation activities.

Interest expense in fiscal 2002 decreased 21.6% in comparison to fiscal 2001 due to the Company's efforts to reduce overall debt levels. See "Liquidity and Capital Resources" for further discussion of Company debt levels and payments.

Other income in fiscal 2002 includes a pension refund received from the closure of a manufacturing facility in Sweden, offset by foreign currency losses. The change from fiscal 2001 relates primarily to a reduction in foreign currency losses.

The Company's effective tax rate in fiscal 2002 is 35.4% as compared to 43.4% in fiscal 2001. The reduction in the overall effective tax rate is due to benefits of foreign taxes in low rate jurisdictions and international financing activities, which was offset by an increase in the valuation allowance related to foreign tax credits.

The Company recognized an after tax loss of \$1.7 million in the fourth quarter of fiscal 2002 related to the sale of its hydraulic cylinder division and \$485,000 of income from discontinued operations. See "Liquidity and Capital Resources" and "Recent Accounting

Pronouncements" for further discussion of the sale.

As presented in Note 18 to the consolidated financial statements, the Company's profitability for fiscal 2002 in North America was negatively impacted by the \$7.3 million reserve against the MITL note receivable and lower sales levels, which fell 17.3% below fiscal 2001 levels. North American gross margins were consistent between years and comparable to the Company's overall gross margin. European operations realized a higher level of net income in fiscal 2002 also with lower sales levels. Fiscal 2001 included a \$2.1 million restructuring charge and an overall net loss. The Company's remaining operations, primarily Australia and Asia, were negatively impacted by the \$5.1 million of goodwill impairment in Australia. Excluding the goodwill adjustment, the overall profitability of these operations increased in comparison with fiscal 2001.

COMPARISON OF FISCAL 2001 AND FISCAL 2000

Consolidated net sales for fiscal 2001 totaled \$301.4 million, which were comparable to sales of \$301.7 million for fiscal 2000. After adjusting fiscal 2000 net sales for the April 1999 disposition of its industrial tire division, the Company's fiscal 2001 net sales increased 3.7%. The increase in fiscal 2001 net sales is due to higher demand in both North America and Asia. Sales to unaffiliated customers for fiscal 2001 in North America increased 7.1% as compared to sales in fiscal 2000, excluding fiscal 2000 sales from the industrial tire division. Europe's sales to unaffiliated customers decrease of 8.0% in fiscal 2001 compared to fiscal 2000 is due to the effect of weakened foreign currencies in the United Kingdom and in European Union countries whose currencies are fixed against the "Euro." Excluding the effect of the weakened foreign currencies, Europe's sales to unaffiliated customers in fiscal 2001 were comparable to sales in fiscal 2000.

Due to reduced levels of profitability in recent years, the Company approved and initiated restructuring plans in the second quarter of fiscal 2001 in both Australia and Europe. The restructuring of Europe included the closure of a manufacturing facility in Vaggeryd, Sweden, the dissolution of

redundant distribution facilities in both Germany and France and employee terminations at the Company's European headquarters in The Netherlands. The Company incurred \$2.1 million in costs during fiscal 2001 related to its European restructuring efforts, which included \$1.9 million primarily related to employee termination costs and \$248,000 for inventory write downs. A total of 58 employees in Europe were terminated as a result of the restructuring activities.

The Company's restructuring activities in Australia included the consolidation of manufacturing plants into one remaining facility in Brisbane, reduction of distribution facilities, realignment of sales operations and the disposal of the tire and battery businesses. Total restructuring costs in Australia during fiscal 2001 were \$2 million. These costs consisted of \$1.3 million in inventory write downs, primarily for tires and batteries, \$108,000 for employee termination costs and \$534,000 in various asset write-offs and miscellaneous costs. The Company terminated 32 employees in Australia related to the restructuring activities.

Restructuring costs related to inventory write downs of \$1.6 million are presented in the Company's consolidated statement of income in cost of goods sold. All other restructuring costs are included as a part of selling and administrative expenses. At January 31, 2001, the Company's consolidated balance sheet contained \$1.0 million in accrued expenses related to the restructuring, primarily for final payments to employees terminated prior to January 31, 2001. The Company has substantially completed the planned restructuring activities in both Europe and Australia as of January 31, 2001.

The Company's gross margin was 32.5% in both fiscal 2001 and fiscal 2000. Cost of goods sold in fiscal 2001 included \$1.6 million related to inventory write downs for the restructuring activities in Europe and Australia. Excluding inventory write downs from restructuring activities, the Company's fiscal 2001 gross margin percentage was 33.1%.

Total amortization expense for fiscal 2001 and 2000 was \$5.4 million and \$4.5 million, respectively. The increase in amortization expense in fiscal 2001 relates to the writeoff of certain goodwill balances due to the closure of the Vaggeryd, Sweden facility and other minor operations.

Selling and administrative expenses were \$62.9 million and \$62.0 million in fiscal 2001 and 2000, respectively. As a percentage of net sales, selling and administrative expenses were 20.9% in fiscal 2001 and 20.6% in fiscal 2000. Fiscal 2001 expenses include \$1.8 million of Special Board Committee costs related to the proposed merger and \$2.4 million related to restructuring activities in Europe and Australia. Excluding the impact of these items in fiscal 2001, selling and administrative expenses were \$60.5 million, 20.1% as a percentage of net sales.

The Company's environmental expenses relate to periodic revisions to cost estimates for environmental remediation liabilities recorded on the consolidated balance sheet. In fiscal 2001, the Company recorded expenses of \$4.9 million, which included a \$3.1 million charge related to

Edgar Filing: CASCADE CORP - Form 10-K

legal fees from the resolution of outstanding issues related to certain environmental and insurance proceedings and \$1.8 million to adjust cost estimates for ongoing remediation efforts at the Company's Portland, Oregon and Springfield, Ohio manufacturing facilities. The \$12 million in environmental expenses for fiscal 2000 included \$7 million related to an adverse judgment against the Company in litigation brought by The Boeing Company. As of January 31, 2002, the Company has paid to the Boeing Company all amounts due as a result of the judgment. The remaining \$5 million in environmental expenses related to revisions to cost estimates related to the previously mentioned remediation efforts in Portland and Springfield.

Interest expense was \$8.1 million in fiscal 2001 and \$8.3 million in fiscal 2000. The reduction in interest expense reflects the Company's strategy to reduce overall debt levels through the application of cash from operations and any cash received from the sale of business units and divisions.

12

Other expense decreased to \$792,000 in fiscal 2001 in comparison to \$4 million in fiscal 2000. Fiscal 2001 other expense relates primarily to net losses on foreign currency translation. Other expense in fiscal 2000 includes special charges that stem from the integration of operations acquired, steps taken to assure consistency of global financial reporting and the loss on the sale of the Company's industrial tire division.

The Company's effective tax rate increased to 43.4% in fiscal 2001 from 32.9% in fiscal 2000. This increase is due to higher levels of pre-tax income in fiscal 2001 over 2000, which diluted the benefit of certain tax attributes. The Company also incurred losses in Australia and Germany as a result of ongoing operations and restructuring activities for which no deferred tax benefit has been recognized.

Net income from continuing operations in fiscal 2001 of \$9.8 million (\$.80 per share) increased \$4.4 million or 81.5% over fiscal 2000 net income of \$5.4 million (\$.44 per share). The increase in net income from continuing operations in fiscal 2001 is due primarily to improved gross margins from sales of higher margin products and a reduction in both interest and environmental costs compared to fiscal 2000. The increase in the effective tax rate in fiscal 2001 to 43.4% partially offset the impact of the above items on fiscal 2001 net income. Excluding the effect of charges for environmental costs in both fiscal 2001 and 2000 and using the applicable effective tax rate for each year, income from continuing operations would have been \$12.6 million (\$1.02 per share) in fiscal 2001 and \$13.5 million (\$1.09 per share) in fiscal 2000.

The Company recorded income from discontinued operations of \$2.1 million for the year ended January 31, 2001. See "Liquidity and Capital Resources" and "Recent Accounting Pronouncements" for further discussion of the Company's discontinued operations.

North American operations were the Company's most profitable geographic segment, accounting for substantially all of the Company's consolidated net income for fiscal 2001 and 2000. The Company's European operations showed some improvement in fiscal 2001 over fiscal 2000, but still incurred a loss in both years. The Company's remaining operations continued to incur a net loss in fiscal 2001, related entirely to operations in Australia.

LIQUIDITY AND CAPITAL RESOURCES

The Company maintains a \$30 million revolving line of credit facility, which continues through December 2002 at a variable interest rate of LIBOR plus .50% (2.33% at January 31, 2002). No balance was outstanding under the facility at January 31, 2002. The Company had other short-term lines of credit available from commercial banks at January 31, 2002 of \$25.3 million. The Company had no amounts outstanding at January 31, 2002 under these other short-term lines of credit.

Total outstanding debt, long-term and short-term notes payable, at January 31, 2002 was \$79.7 million in comparison with \$94.7 million at January 31, 2001. The Company's debt to equity ratio improved to .70 to 1 at January 31, 2002 from .81 to 1 at January 31, 2001.

Working capital at January 31, 2002 of \$66.0 million was more than the \$64.7 million of working capital at January 31, 2001. The Company's current ratio at January 31, 2002 was 2.65 to 1 in comparison to 2.32 to 1 at January 31, 2001.

The Company declared no dividends in fiscal 2002. No dividends have been declared since the second quarter of fiscal 2001, when the Company was prohibited from declaring dividends under the merger agreement signed with the Lift Group. The Board of Directors notified the Lift Group on April 17, 2001 that it had terminated the merger agreement. The Board of Directors has not reached any decision as to future dividend payments. Dividends of \$.20 and \$.40 per share were declared in fiscal 2001 and 2000, respectively.

13

The Company's balance of cash and cash equivalents increased to \$25.6 million at January 31, 2002 from \$12.4 million at January 31, 2001. Net cash provided by operating activities from continuing operations was \$31.7 million in fiscal 2002, compared to \$22.2 million and \$47.9 million in fiscal 2001 and 2000, respectively. During fiscal 2002, the Company continued to reduce accounts receivable and inventory levels with decreased sales levels due to the downturn in the lift truck industry. In fiscal 2002 the Company also reduced accounts payable, accrued expenses and accrued environmental expenses, including the remaining payments due from the Company's lawsuit with Boeing, which was settled in fiscal 2000. The decrease in fiscal 2001 net cash flows from operating activities was also due to similar reductions in inventory, accounts payable, accrued expenses and accrued environmental expenses.

During the fourth quarter of fiscal 2002, the Company sold its hydraulic cylinder division to Precision Hydraulic Cylinders, Inc. (Precision) for approximately \$13 million, for which the Company received \$3.25 million in cash, \$9 million of notes receivable and a \$700,000 receivable subject to adjustment for working capital levels at the sale date. The Company expects to receive the \$700,000 in receivables in the first quarter of fiscal 2003. The notes receivable are collateralized by the accounts receivable, inventory and property, plant and equipment of Precision. Terms of the note include dividend restrictions, covenants relating to leverage and fixed charge ratios and limitations on Precision's overall level of indebtedness. The Company has the ability to accelerate payment of the notes upon an event of default as defined in the note agreements. Under the terms of this sale the Company has agreed to make interim operating capital advances to Precision of up to \$4 million. The Company has provided no advances as of January 31, 2002.

In fiscal 2001, the Company did not sell any significant assets, business units, or divisions, which accounts for the reduction in net cash from investing activities for fiscal 2001 in comparison with fiscal 2000.

Net cash used in financing activities decreased in fiscal 2002 to \$16.4 million as compared to \$31.3 million in fiscal 2001. The Company continued with its planned reduction of debt balances in fiscal 2002 with long-term debt payments of \$10.7 million and \$4.4 million of payments on short-term notes payable. The Company had no additional borrowings in fiscal 2002. As of January 31, 2002, the Company had made all scheduled debt payments. Any additional payments to prepay scheduled amounts are subject to penalties. The Company is evaluating its options to make additional debt payments and incur the penalties in light of its current cash position. Net cash used in financing activities in fiscal 2002 included \$1.4 million for the repurchase of common stock. In fiscal 2000, the Company repurchased \$6 million of common and preferred stock. Net payments to reduce long-term debt and short-term notes payable balances in fiscal 2000 were \$34.3 million.

During fiscal 2002, 2001 and 2000, the Company's capital expenditures were \$7.3 million, \$5.5 million and \$13.8 million, respectively. The decrease in capital expenditures in fiscal 2002 in relation to capital expenditure levels prior to fiscal 2001 was the result of reduced capital spending due to the slowdown in the worldwide lift truck industry. In fiscal 2001, the reduced level of capital expenditures was primarily the result of management's decision to minimize expenditures in light of the proposed merger and to reduce outstanding debt. The Company believes the level of capital expenditures in fiscal 2002 and 2001 was sufficient to maintain required operational requirements. Capital expenditure levels in fiscal 2003 are not expected to exceed \$12 million.

The Company has completed substantially all implementation activities related to its enterprise-wide resource planning (ERP) software system in the United States and Europe. The Company plans to complete the ERP implementation at its Canadian operations in fiscal 2003 and 2004 and does not expect the cost of this implementation to be material. The Company continues to evaluate the costs and benefits of further ERP implementation activities in Asia and Australia, but currently has no plans to complete the implementation in these areas.

The Company believes its cash and cash equivalents, existing credit facilities and cash flows from operations will be sufficient to satisfy its expected working capital and capital expenditure requirements for fiscal 2003.

The U.S. dollar strengthened in both fiscal 2002 and 2001 in comparison to most foreign currencies used by the Company's significant foreign operations. As a result, foreign currency translation adjustments decreased shareholders' equity by \$6.0 million and \$5.8 million in fiscal 2002 and 2001, respectively.

At January 31, 2002 and 2001, the Company did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or for other contractually narrow or limited purposes. As such, the Company is not materially exposed to any financing, liquidity market or credit risk that could arise if the Company had engaged in such relationships.

The following summarizes the Company's contractual obligations and commitments as of January 31, 2002:

Edgar Filing: CASCADE CORP - Form 10-K

	Total	Less than 1 year	1-3 years	4-5 years	Greater than 5 years
Notes payable to banks	\$ 743	\$ 743	\$	\$	\$
Long-term debt, including capital leases	78,925	13,246	26,679	25,887	13,113
Operating leases	6,536	1,960	2,112	1,029	1,435

FISCAL 2003 OUTLOOK

The Company's business is very closely aligned with and dependent on the general lift truck industry. Year-to-date industry data for 2002 shows marginal improvement from the end of 2001. However, industry order rates are still significantly below the comparable period in 2001. Subject to overall economic conditions, the Company expects lift truck orders and shipments in fiscal 2003 to be at levels comparable to or moderately improved over fiscal 2002. Overall net sales in fiscal 2003 are not expected to increase significantly over 2002 levels. Although overall sales were considerably lower than previous years, the Company was able to maintain comparable gross margins in fiscal 2002 through aggressive cost management initiatives. The Company feels it is well positioned to maintain its current gross margins through fiscal 2003 with a continued emphasis on cost controls. The Company anticipates overall profitability of continuing operations in fiscal 2003 to be consistent with fiscal 2002. In March 2002, the United States government imposed tariffs on certain steel imports into the United States over a three year period. The Company does not believe the tariffs will have a material impact on its results of operations.

RECENT ACCOUNTING PRONOUNCEMENTS

In June 2001, the Financial Accounting Standards Board (FASB or the "Board") issued Statement of Financial Accounting Standards No. 141 (SFAS 141), "Business Combinations," and No. 142 (SFAS 142), "Goodwill and Other Intangible Assets," collectively referred to as the "Standards." SFAS 141 supersedes Accounting Principles Board Opinion (APB) No. 16, "Business Combination." The provisions of SFAS 141 (1) require that the purchase method of accounting be used for all business combinations initiated after June 30, 2001, (2) provide specific criteria for the initial recognition and measurement of intangible assets apart from goodwill and (3) require that unamortized negative goodwill be written off immediately as an extraordinary gain instead of being deferred and amortized. SFAS 141 also requires that upon adoption of SFAS 142 the Company reclassify the carrying amounts of certain intangible assets into or out of goodwill, based on certain criteria. SFAS 142

15

supersedes APB 17, "Intangible Assets," and is effective for fiscal years beginning after December 15, 2001. SFAS 142 primarily addresses the accounting for goodwill and intangible assets subsequent to their initial recognition. The provisions of SFAS 142 (1) prohibit the amortization of goodwill and indefinite-lived intangible assets, (2) require that goodwill and indefinite-lived intangibles assets be tested annually for impairment (and in interim periods if certain events occur indicating that the carrying value of goodwill and/or indefinite-lived intangible assets may be impaired), (3) require that reporting units be identified for the purpose of assessing potential future impairments of goodwill and (4) remove the forty-year limitation on the amortization period of intangible assets that have finite lives.

The Company will adopt the provisions of SFAS 142 in its first quarter ended April 30, 2002. The Company is in the process of preparing for its adoption of SFAS 142 and is making the determinations as to what its reporting units are and what amounts of goodwill, intangible assets, other assets and liabilities should be allocated to those reporting units. The Company expects the adoption to eliminate the annual goodwill amortization expense recognized in the statement of income. Goodwill amortization expense for the year ended January 31, 2002 was \$4.4 million, which excludes the goodwill impairment in Australia.

SFAS 142 requires that goodwill be tested annually for impairment using a two-step process. The first step is to identify a potential impairment and, in transition, this step must be measured as of the beginning of the fiscal year. However, a company has six months from the date of adoption to complete the first step. The Company expects to complete that first step of the goodwill impairment test during the first quarter of fiscal 2003. The second step of the goodwill impairment test measures the amount of the impairment loss (measured as of the beginning of the year of adoption), if any, and must be completed by the end of the Company's fiscal year. Intangible assets deemed to have an indefinite life will be tested for impairment using a one-step process, which compares the fair value to the carrying amount of the asset as of the beginning of the fiscal year, and pursuant to the requirements of SFAS 142 will be completed during the first quarter of fiscal 2003. Any impairment loss resulting from the transitional impairment tests will be reflected as the cumulative effect of a change in accounting principle in the first quarter of fiscal 2003. The Company does not expect the effect of the initial impairment tests under SFAS 142 to have a material impact on the Company's earnings and financial position.

In June 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 143 (SFAS 143), "Accounting for Asset Retirement Obligations." SFAS 143 addresses financial accounting and reporting for obligations associated with the

Edgar Filing: CASCADE CORP - Form 10-K

retirement of tangible, long-lived assets and the associated asset retirement costs. This Statement requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred by capitalizing it as part of the carrying amount of the long-lived assets. As required by SFAS 143, the Company will adopt this new accounting standard on February 1, 2003. The Company does not expect the adoption of SFAS 143 to have any material impact on the financial statements.

In August 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 144 (SFAS 144), "Accounting for the Impairment or Disposal of Long-Lived Assets." SFAS 144 addresses financial accounting and reporting for the impairment of long-lived assets and broadens the presentation of discontinued operations currently permitted by Accounting Principles Board Opinion No. 30. The Company has elected to adopt SFAS 144 in its current fiscal year ended January 31, 2002, which requires application as of February 1, 2001, the beginning of the current fiscal year. The Company's hydraulic cylinder division meets the criteria as a component of an entity in SFAS 144 and is presented in the Company's consolidated financial statements as discontinued operations. Accordingly, all prior periods presented are reclassified to reflect the division as a discontinued operation.

16

Item 7A Quantitative and Qualitative Disclosures About Market Risk

Market risk is the potential loss arising from adverse changes in market rates and prices, such as foreign currency exchange rate and interest rate fluctuations. A significant portion of the Company's revenues are denominated in currencies from international markets outside the United States. As a result, the Company's operating results could become subject to significant fluctuations based upon changes in the exchange rates of the foreign currencies in relation to the United States dollar. The Company does enter into foreign currency forward exchange contracts to offset the impact of currency fluctuations on certain nonfunctional currency assets and liabilities. The principal currencies hedged are denominated in Japanese, Canadian, Australian, New Zealand and several European currencies, primarily the Euro and British pound. The Company's foreign currency forward exchange contracts have terms lasting up to three months, but generally less than one month. The Company does not enter into derivatives or other financial instruments for trading or speculative purposes. See Note 13 to the consolidated financial statements (Item 8).

The Company generally manages its ratio of fixed to variable rate debt with the objective of achieving a mix that management believes is appropriate. Based on the scheduled debt payments during fiscal 2002 and certain payment restrictions on its remaining debt, substantially all of the Company's debt at January 31, 2002 has a fixed interest rate. Any additional payments to prepay scheduled amounts of debt are subject to penalties. At January 31, 2002 the penalties to retire all of the Company's long-term debt were \$5.2 million. A hypothetical immediate increase in interest rates by 1% would decrease the fair value of the Company's long-term debt outstanding at January 31, 2002 by \$2.5 million.

Cascade Corporation Notes to Consolidated Financial Statements

Note 1 Description of Business

Cascade Corporation (the Company or Cascade) is an international company engaged in the manufacture of materials handling products that are widely used on industrial fork lift trucks and, to a lesser extent, on construction, mining and agricultural vehicles. Accordingly, the Company's sales are largely dependent on the sales of lift trucks and on the sales of replacement parts. A significant portion of the Company's sales are made in North America and Europe. The Company is headquartered in Fairview, Oregon, employing approximately 1,400 people and maintaining operations in 15 countries outside the United States.

Note 2 Summary of Significant Accounting Policies

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its subsidiaries. All significant intercompany accounts and transactions have been eliminated.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash on deposit and highly liquid investments with maturities of three months or less at the date of purchase.

Inventories

Inventories are stated at the lower of average cost or market.

Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation. Depreciation is generally provided using the straight-line method over the estimated useful lives of the assets. Useful lives range from 15 to 40 years for buildings and 2 to 12 years for machinery and equipment, including certain equipment under long-term capital leases. Maintenance and repairs are expensed as incurred and costs of improvements and renewals are capitalized. Upon disposal, cost and accumulated depreciation are removed from the accounts and the resulting

gains or losses are reflected in operations.

Goodwill

Goodwill represents the excess of the cost of acquired businesses over the fair value of net identifiable assets acquired and is amortized on a straight-line basis, generally over 20 years. Accumulated amortization of goodwill was \$23.3 million and \$14.9 million at January 31, 2002 and 2001, respectively.

Impairment of Long-Lived Assets

Long-lived assets, primarily property, plant and equipment and goodwill, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Determination of recoverability is based on an estimate of undiscounted future cash flows resulting from the use of the assets and eventual disposition in comparison with the carrying value. Measurement of an impairment loss for long-lived assets that management expects to hold and use is based on the fair value of the asset.

22

Stock-Based Compensation

The Company accounts for its stock-based compensation under Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees." The exercise price of stock options granted equals the market price on the date of grant. There is no recorded expense related to grants of stock options.

Foreign Currency Translation

The Company translates the balance sheets of its foreign subsidiaries using fiscal year-end exchange rates. The statements of income are translated using the average exchange rates for the period. The cumulative effect of such translations is included in shareholders' equity.

Environmental Remediation

The Company accrues environmental costs if it is probable a liability has been incurred at the financial statement date and the amount can be reasonably estimated. Recorded liabilities have not been discounted. Environmental compliance costs are expensed as incurred. Assets related to the recovery of amounts expended for environmental expenses are recognized only when realization is probable.

Foreign Currency Forward Exchange Contracts

Gains and losses on foreign currency forward exchange contracts, which generally mature in one month or less, are recognized in operations and measured over the period of the contract by reference to the forward rate for a contract to be consummated on the same future date as the original contract.

Revenue Recognition

The Company recognizes revenue when title passes, the earnings process is substantially complete, and the Company is reasonably assured of the collection of the proceeds from the exchange, all of which generally occur upon shipment of the Company's products.

Concentrations of Credit Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents, accounts receivable and foreign currency forward exchange contracts. The Company places its cash in major financial institutions. Deposits held with the financial institutions may exceed the Federal Deposit Insurance Corporation limit.

Accounts receivable are with a large number of customers, primarily equipment manufacturers and dealers, dispersed across a wide geographic base. No single customer accounts for more than 10% of the Company's consolidated net sales. The Company's consolidated net sales for the year ended January 31, 2002 to all original equipment manufacturers (OEM) customers were 30% of total net sales. This percentage is consistent with recent years. The Company performs on-going credit evaluations and does not require collateral. Allowances are maintained

for potential credit losses when deemed necessary.

See Note 13 for discussion of foreign currency forward exchange contracts.

Reclassifications

Certain reclassifications have been made to the prior year consolidated financial statements to conform to the current year presentation. Such reclassifications had no impact on results of operations or shareholders' equity.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates and judgments made by management of the Company include matters such as the collectibility of accounts and notes receivable, realizability of deferred income tax assets, realizability of goodwill and long-lived assets warranty liabilities and future costs of environmental matters.

Income Taxes

Deferred income tax assets and liabilities are recognized for the expected tax consequences of temporary differences between the tax bases of assets and liabilities and the amounts reported in the consolidated financial statements. The provision for income taxes is the tax payable for the period and the change during the period in net deferred income tax assets and liabilities. Valuation allowances are established when necessary to reduce deferred income tax assets to the amount expected to be realized.

Shipping and Handling Costs

The Company incurs shipping, handling and other related costs for the shipment of goods to customers. These costs are recognized in the period in which the expenses occur and are classified as cost of goods sold. Amounts billed to customers for shipping, handling and related costs are reported as a component of net sales.

Research and Development Costs

Research and development costs are expensed as incurred and are related to developing new products and to improving existing products or processes. The Company incurred research and development costs of \$1.6 million, \$4.2 million, and \$4.4 million for the years ended January 31, 2002, 2001 and 2000, respectively.

Earnings Per Share

Basic earnings per share is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects potential dilution that could occur if convertible securities or stock options were exercised or converted into common stock.

Recent Accounting Pronouncements

In June 2001, the Financial Accounting Standards Board (FASB or the "Board") issued Statement of Financial Accounting Standards No. 141 (SFAS 141), "Business Combinations," and No. 142 (SFAS 142), "Goodwill and Other Intangible Assets," collectively referred to as the "Standards." SFAS 141 supersedes Accounting Principles Board Opinion (APB) No. 16, "Business Combination." The provisions of SFAS 141 (1) require that the purchase method of accounting be used for all business combinations initiated after June 30, 2001, (2) provide

specific criteria for the initial recognition and measurement of intangible assets apart from goodwill, and (3) require that unamortized negative goodwill be written off immediately as an extraordinary gain instead of being deferred and amortized. SFAS 141 also requires that upon adoption of SFAS 142 the Company reclassify the carrying amounts of certain intangible assets into or out of goodwill, based on certain criteria. SFAS 142 supersedes APB 17, "Intangible Assets," and is effective for fiscal years beginning after December 15, 2001. SFAS 142 primarily addresses the accounting for goodwill and intangible assets subsequent to their initial recognition. The provisions of SFAS 142 (1) prohibit the amortization of goodwill and indefinite-lived intangible assets, (2) require that goodwill and indefinite-lived intangibles assets be tested annually for impairment (and in interim periods if certain events occur indicating that the carrying value of goodwill and/or indefinite-lived intangible assets may be impaired), (3) require that reporting units be identified for the purpose of assessing potential future impairments of goodwill and (4) remove the forty-year limitation on the amortization period of intangible assets that have finite lives.

The Company will adopt the provisions of SFAS 142 in its first quarter ended April 30, 2002. The Company is in the process of preparing for its adoption of SFAS 142 and is making the determinations as to what its reporting units are and what amounts of goodwill, intangible assets, other assets, and liabilities should be allocated to those reporting units. The Company expects the adoption to eliminate the annual goodwill amortization expense recognized in the statement of income. Goodwill amortization expense for the year ended January 31, 2002 was \$4.4 million, which excludes the goodwill impairment in Australia.

SFAS 142 requires that goodwill be tested annually for impairment using a two-step process. The first step is to identify a potential impairment and, in transition, this step must be measured as of the beginning of the fiscal year. However, a company has six months from the date of adoption to complete the first step. The Company expects to complete that first step of the goodwill impairment test during the first quarter of fiscal 2003. The second step of the goodwill impairment test measures the amount of the impairment loss (measured as of the beginning of the year of adoption), if any, and must be completed by the end of the Company's fiscal year. Intangible assets deemed to have an indefinite life will be tested for impairment using a one-step process, which compares the fair value to the carrying amount of the asset as of the beginning of the fiscal year, and pursuant to the requirements of SFAS 142 will be completed during the first quarter of fiscal 2003. Any impairment loss resulting from the transitional impairment tests will be reflected as the cumulative effect of a change in accounting principle in the first quarter of fiscal 2003. The Company does not expect the effect of the initial impairment tests under SFAS 142 to have a material impact on the Company's earnings and financial position.

In June 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 143 (SFAS 143), "Accounting for Asset Retirement Obligations." SFAS 143 addresses

financial accounting and reporting for obligations associated with the retirement of tangible, long-lived assets and the associated asset retirement costs. This Statement requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred by capitalizing it as part of the carrying amount of the long-lived assets. As required by SFAS 143, the Company will adopt this new accounting standard on February 1, 2003. The Company does not expect the adoption of SFAS 143 to have any material impact on the financial statements.

In August 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 144 (SFAS 144), "Accounting for the Impairment or Disposal of Long-Lived Assets." SFAS 144 addresses financial accounting and reporting for the impairment of long-lived assets and broadens the presentation of discontinued operations currently permitted by Accounting Principles Board Opinion No. 30. The Company has elected to adopt SFAS 144 in its current fiscal year ended January 31, 2002, which requires application as of February 1, 2001, the beginning of the current fiscal year. The Company's hydraulic cylinder division meets the criteria as a component of an entity in SFAS 144 and is presented in the Company's consolidated financial statements as discontinued operations. Accordingly, all prior periods presented are reclassified to reflect the division as a discontinued operation.

Note 3 Discontinued Operations

On January 15, 2002, the Company sold substantially all of the assets of its hydraulic cylinder division, including manufacturing and sales operations in Beulaville, North Carolina and Cramlington, Northumberland, United Kingdom to a new company, Precision Hydraulic Cylinders, Inc. (Precision), formed by BB&T Capital Partners, LLC and the former general manager of the hydraulic cylinder division. The sale of the hydraulic cylinder division was completed to allow the Company to pursue opportunities associated with its core attachment and fork products. In accordance with SFAS 144, the Company has presented the hydraulic cylinder division as discontinued operations since it represents a component of the Company, which can be distinguished both operationally and for financial reporting purposes.

The Company completed the sale of the hydraulic cylinder division to Precision for approximately \$13 million, net of assumed liabilities, and received cash of \$3.25 million, notes receivable of \$9 million and a \$700,000 receivable subject to adjustment based upon working capital levels at the sale date. Terms of the notes receivable, which are collateralized by the assets of Precision, are described in Note 6. As a result of

Edgar Filing: CASCADE CORP - Form 10-K

the sale, the Company incurred a \$1.9 million pre-tax loss (\$1.7 million after-tax) in the fourth quarter of fiscal 2002. The sale of the hydraulic cylinder division included \$5.1 million of current assets, \$9.8 million of property, plant and equipment and goodwill, \$1.5 million of cumulative foreign currency translation adjustment and \$2.1 million of assumed liabilities. Consolidated net sales of the hydraulic cylinder division for the fiscal years ended January 31, 2002, 2001 and 2000 were \$31.7 million, \$37.7 million and \$31.9 million, respectively.

Under the terms of the sale, the Company agreed to make available interim operating capital advances to Precision of up to \$4 million, subject to various restrictions. These advances are available pending Precision's completion of arrangements for operating lines of credit with financial institutions. The Company will retain a first security interest in Precision accounts receivable and inventories until Precision's operating lines of credit are in place and all Cascade advances, if any, are repaid. Interest on the advances is at the prime rate plus 1% until June 30, 2002, at which time interest is at the prime

26

rate plus 3%. Repayment of the advances may be made by Precision at any time, with mandatory repayments beginning in January 31, 2003 through 2005. The Company has provided no advances as of January 31, 2002.

Note 4 Inventories

	\$ 61,412	\$ 77,235

Depreciation expense from continuing operations for the years ended January 31, 2002, 2001 and 2000, was \$10.3 million, \$10.5 million and \$11.5 million, respectively.

Note 6 Notes Receivable

The Company has received notes receivable as partial consideration from the sale of certain businesses, its industrial tire division in fiscal 1999 and its hydraulic cylinder division in fiscal 2002.

Edgar Filing: CASCADE CORP - Form 10-K

On April 29, 1999, the Company completed the sale of its industrial tire division to Maine Rubber Company (Maine Rubber) for \$38.1 million, including the assumption of liabilities. The Company received \$26.9 million in cash and a \$7.3 million note receivable in connection with the sale. The note receivable bears interest at 8% with interest payable quarterly and with principal installments of \$1 million, \$2.1 million and \$4.2 million due in April 2002, 2003 and 2004, respectively. The Company has received all interest payments on the Maine Rubber note receivable on a quarterly basis since April 1999. Maine Rubber's primary customers are lift truck OEMs. With the significant decline in industry order rates in fiscal 2002, Maine Rubber's operating results have been negatively impacted. Maine Rubber notified the Company in January 2002 that it was in violation of the financial covenants related to its senior notes and revolving credit agreement. Maine Rubber's senior lender has restricted all of Maine Rubber's scheduled future interest or principal payments, including the \$1 million payment

27

due to the Company in April 2002, until Maine Rubber can prepare a restructuring plan suitable to their senior lender. The Company has obtained recent Maine Rubber financial information. Based on the Company's review of this information, the Company has recorded an allowance of \$7.3 million in the fourth quarter of fiscal 2002 against the balance of the Maine Rubber note receivable. The Company intends to continue to monitor Maine Rubber's financial status in order to maximize any potential recovery of the note balance.

	January 31	
	2002	2001
	(In thousands)	
Note receivable from sale of industrial tire division, uncollateralized, interest paid quarterly at 8%	\$ 7,308	\$ 7,308
Note receivable from sale of hydraulic cylinder division (Note 3), interest payable at 7%, principal payable beginning in April 2003 through April 2007	4,623	
Note receivable from sale of hydraulic cylinder division (Note 3), interest payable at the prime rate plus 1% (5.75% at January 31, 2002), principal payable beginning in April 2003 through April 2007	4,250	
	16,181	
Allowance for uncollectible notes	(7,308)	
	\$ 8,873	\$ 7,308

The notes receivable from the sale of the hydraulic cylinder division are collateralized by the accounts receivable, inventory and property, plant and equipment of Precision (Note 3). Terms of the note include dividend restrictions, covenants relating to leverage and fixed charge ratios and limitations on the Precision's overall level of indebtedness. The Company does have the ability to accelerate payment of the notes upon an event of default as defined in the note agreements.

Scheduled maturities of notes receivable are as follows, excluding the note receivable from sale of the industrial tire division, which is fully reserved at January 31, 2002 (in thousands):

Year ended January 31	
2004	\$ 983
2005	1,180
2006	1,477
2007	1,477

Mortgage note, interest at 6.7% due quarterly through 2008, collateralized by plant facility	2,329	2,949
Capital lease obligations for equipment, weighted average interest (11.29% at January 31, 2002 and 10.17% at January 31, 2001), monthly payments through 2005	1,443	2,932
Other	153	239
	<u>78,925</u>	<u>89,620</u>
Less current portion	13,246	2,107
	<u>\$ 65,679</u>	<u>\$ 87,513</u>

The Company's debt agreements contain dividend restrictions and covenants relating to net worth, fixed charges and leverage ratios. Borrowing arrangements with commercial banks provide lines of credit at January 31, 2002 totaling \$55.3 million, including the revolving line of credit, none of which were being used. Average interest rates on short-term borrowings were 1.38% and 5.1% at January 31, 2002 and 2001, respectively.

Future maturities of long-term debt are as follows (in thousands):

Year ended January 31	
2003	\$ 13,246
2004	13,345
2005	13,334
2006	13,029
2007	12,858

Environmental	4,748	6,177
Employee benefits	1,639	1,239
Foreign tax credits	10,776	11,570

Edgar Filing: CASCADE CORP - Form 10-K

	<u>January 31</u>	
Net operating losses	3,260	3,011
Goodwill	1,768	
Other	502	730
	<u>27,794</u>	<u>24,516</u>
Less: Valuation allowance	(5,183)	(3,040)
	<u>22,611</u>	<u>21,476</u>
Deferred tax liabilities:		
Depreciation	(6,908)	(8,135)
Other	(719)	(908)
	<u>(7,627)</u>	<u>(9,043)</u>
Total net deferred tax assets	<u>\$ 14,984</u>	<u>\$ 12,433</u>

The Company has recorded a valuation allowance as of January 31, 2002 and January 31, 2001 primarily related to the deferred tax benefits related to foreign tax credits and foreign subsidiary net operating loss carryforwards. The net change in the valuation allowance for fiscal 2002 and 2001 was an increase of \$2.1 million and \$2.2 million, respectively. Foreign loss carryforwards have no expiration date and total \$7.9 million at January 31, 2002.

The Company has recognized the benefit of U.S. foreign tax credit carryforwards of \$815,000, which expire through January 31, 2007. A net deferred tax asset of \$7.9 million has been recorded for U.S. foreign tax credits attributed to unrepatriated foreign earnings. Realization of this deferred tax asset is dependent on generating sufficient foreign-sourced U.S. taxable income. The five-year expiration period does not begin until the foreign earnings are repatriated.

Note 9 Capital Stock

The Company has outstanding exchangeable preferred stock of Cascade Canada Ltd., an otherwise wholly-owned subsidiary of the Company. Holders of the exchangeable shares are entitled to voting rights of an equivalent number of the Company's common shares and are entitled to dividends equivalent to those declared and paid for like numbers of Cascade common stock. At January 31, 2002 and 2001, the Company had 800,000 exchangeable preferred shares issued and outstanding, which are presented as exchangeable preferred stock and minority interest on the Company's consolidated balance sheet.

31

Note 10 Benefit Plans

The Company sponsors a number of defined contribution plans. The Company matches employee contributions in varying degrees and also makes contributions to certain plans based on a percentage of employee wages. Company expense under these plans was \$2.9 million, \$2.8 million, and \$2.7 million for the years ended January 31, 2002, 2001 and 2000, respectively.

The Company has defined benefit plans covering certain non-U.S. employees. The Company's funding policy for defined benefit plans is to make annual contributions based on actuarially determined funding requirements. The pension benefits are based on years of service and average earnings over a specified five-year period of time.

The Company provides health care benefits for retired employees. The Company is accruing the estimated future costs of providing postretirement benefits to eligible active employees during the employee's active service period. The Company's postretirement plan is not

funded.

The assumed health care cost trend used in measuring the accumulated postretirement benefit obligation was 11% in the first year decreasing to 5% over the next six years, and then remaining at 4.5% thereafter. A one percentage point increase in the cost trend rates would increase the accumulated postretirement benefit obligation as of January 31, 2002 by \$513,000 and net periodic postretirement benefit cost by \$71,000.

32

The status of defined benefit and postretirement benefit plans is summarized below:

	Year Ended January 31					
	Defined Benefit			Postretirement Benefit		
	2002	2001	2000	2002	2001	2000

33

Note 11 Stock Option Plan

The Company has reserved 800,000 shares of common stock for the Cascade Corporation 1995 Senior Managers' Incentive Stock Option Plan (the Plan). The Plan permits the award of incentive stock options (ISO) to officers and key employees. Under the terms of the Plan, the purchase price of shares subject to each ISO granted must not be less than the fair market value on the date of grant. Accordingly, no compensation cost has been recognized under the Plan. Outstanding options vest after three or four years and are exercisable for ten years from the date of grant.

The Company is required under SFAS No. 123, "Accounting for Stock-Based Compensation," to disclose pro forma information regarding option grants made to its employees based on specified valuation techniques that produce compensation charges. These amounts have not been reflected in the Company's Consolidated Statement of Income because no compensation charge arises when the price of the employees' stock options equals the market value of the underlying stock at the grant date, as in the case of options granted to the Company employees. Pro forma information under SFAS No. 123 is as follows:

	Year Ended January 31		
	2002	2001	2000
(In thousands, except per share amounts)			
Net income as reported	\$ 4,127	\$ 11,863	\$ 4,934
Net income pro forma	\$ 3,511	\$ 11,184	\$ 4,294
Basic earnings per share as reported	\$ 0.36	\$ 1.02	\$ 0.40
Basic earnings per share pro forma	\$ 0.31	\$ 0.96	\$ 0.34
Diluted earnings per share as reported	\$ 0.34	\$ 0.97	\$ 0.40
Diluted earnings per share pro forma	\$ 0.29	\$ 0.91	\$ 0.35

The pro forma effect on net income for the years ended January 31, 2002, 2001, and 2000 is not representative of the pro forma effect in future years because compensation expense related to grants made in prior years is not considered. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions:

	Year Ended January 31		
	2002	2001	2000
Risk-free interest rate	4.7%	6.7%	5.4%

Edgar Filing: CASCADE CORP - Form 10-K

	<u>Year Ended January 31</u>		
Expected volatility	41%	36%	33%
Expected dividend yield		4.0%	3.1%
Expected life (in years)	5	5	5

34

A summary of the Plan's status at January 31, 2002, 2001, and 2000 together with changes during the periods then ended are presented in the following table:

	<u>Shares</u>	<u>Weighted Average Price Per Share</u>
Balance at January 31, 1999	419,076	\$ 16.20
Granted	49,375	14.71
Exercised

Note 13 Derivative Instruments and Hedging Activities

The Company has operations and sells products to dealers and original equipment manufacturers throughout the world. The Company's activities expose it to a variety of market risks, including the effects of changes in foreign currency exchange rates. These financial exposures are

Edgar Filing: CASCADE CORP - Form 10-K

monitored and managed by the Company within the Company's foreign exchange management policy as approved by the Board of Directors. The Company's risk-management program focuses on the unpredictability of financial markets and seeks to reduce the effects that the volatility of these markets may have on its operating results.

The Company maintains a foreign currency risk-management strategy that uses derivative instruments to protect its interests from unanticipated fluctuations in earnings caused by volatility in foreign currency exchange rates. Various amounts of the Company's payables, receivables and subsidiary royalties are denominated in foreign currencies, thereby creating exposures to changes in exchange rates.

The Company purchases foreign currency forward exchange contracts, with contract terms lasting up to three months, but generally less than one month, to protect against the adverse effects that exchange rate fluctuations may have on foreign currency denominated trade receivables and trade payables. These derivatives do not qualify for hedge accounting, in accordance with SFAS No. 133 "Accounting for Derivative Instruments and Hedging Activities." The gains and losses on both the derivatives and the foreign currency denominated trade receivables and payables are recorded as transaction adjustments in current earnings thereby minimizing the effect on current earnings of exchange-rate fluctuations.

By using derivative financial instruments to hedge exposures to changes in exchange rates, the Company exposes itself to credit risk and market risk. Credit risk is the failure of the counterparty to perform under the terms of the derivatives contract. When the fair value of a derivative contract is positive, the counterparty owes the Company, which creates repayment risk for the Company. When the fair value of a derivative contract is negative, the Company owes the counterparty and, therefore, it does not possess repayment risk. The Company minimizes the credit or repayment risk in derivative instruments by entering into transactions with counterparties whose credit ratings are AA or higher, monitoring the amount of exposure to each counterparty and monitoring the financial condition of its counterparties.

Market risk is the adverse effect on the value of a foreign exchange contract that results from a change in the underlying exchange rates. The market risk associated with foreign-exchange contracts is managed by the establishment and monitoring of parameters that limit the types and degree of market risk that may be undertaken.

At January 31, 2002, the Company had approximately \$25.2 million of contracts in place to buy or sell foreign currency. The fair value of these contracts at January 31, 2002 is not material and is recorded in the Company's consolidated financial statements.

Note 14 Europe Restructuring

The Company approved and initiated restructuring a plan for its European operations in the second quarter of 2001, which included the closure of a manufacturing facility in Vaggeryd, Sweden, the elimination of redundant distribution facilities in both Germany and France and the termination of employees at the Company's European headquarters in The Netherlands. The Company incurred

37

\$2.1 million in costs during fiscal 2001 related to its European restructuring efforts, which included \$1.9 million primarily related to employee termination costs and \$248,000 for inventory write downs. A total of 58 employees in sales, production and administrative positions in Europe were terminated as a result of the restructuring activities. As of January 31, 2001 the Company had completed its restructuring plan in Europe.

All restructuring costs are included as a part of selling and administrative expenses, except for inventory write downs which are presented in cost of goods sold. At January 31, 2001 the Company's consolidated balance sheet contained \$854,000 in accrued expenses related to the restructuring in Europe, primarily for final payments to employees terminated prior to January 31, 2001.

Note 15 Australia Restructuring and Goodwill Impairment

The Company has continued to incur operating losses in Australia since 1998. In fiscal 2001 a restructuring plan was approved and initiated. The Company's restructuring activities in Australia included the consolidation of manufacturing plants into one remaining facility in Brisbane, reduction of distribution facilities, realignment of sales operations and the disposal of the tire and battery businesses. Total restructuring costs in Australia during fiscal 2001 were \$2 million. These costs consisted of \$1.3 million in inventory write downs, primarily for tires and batteries, \$108,000 for employee termination costs and \$534,000 in various asset write-offs and miscellaneous costs. The Company terminated 32 employees in sales, production and administrative positions in Australia related to the restructuring activities. The Company substantially completed the planned restructuring activities in Australia as of January 31, 2001.

Restructuring costs related to inventory write downs in Australia of \$1.3 million are presented in the Company's consolidated statement of income in cost of goods sold. All other restructuring costs are included as a part of selling and administrative expenses. At January 31, 2001 the

Company's consolidated balance sheet contained \$105,000 in accrued expenses related to the restructuring in Australia, primarily for final payments to employees terminated prior to January 31, 2001.

During fiscal 2002 the Company continued to experience declining sales levels throughout the year. These declines have occurred despite the fact that the Australian lift truck market was not experiencing the downturn in order rates that existed in North America and Europe. The Company made additional management changes and reduced its overall work force in Australia by 40% in the last half of fiscal 2002. The reduction in work force was needed to adjust the expense levels to accommodate much lower sales levels. In light of the significant trends impacting our Australian operations and expected future growth rates, the Company performed an assessment of the carrying value of goodwill and long-lived assets in Australia as part of our review of financial results in the fourth quarter of fiscal 2002. The conclusion of the assessment was that the decline in the Australian operations was significant and other than temporary. As a result, the Company recorded a \$5.1 million write down of goodwill to fair value in the fourth quarter of fiscal 2002 related to its operations in Australia. Fair value was determined based on discounted future cash flows. The assumptions supporting the estimated future cash flows reflect management's best estimates. After the write down, the Company has an additional \$3.6 million of goodwill on its consolidated balance sheet at January 31, 2002 related to Australian operations.

Note 16 Commitments and Contingencies

Environmental Matters

The Company is subject to environmental laws and regulations, which include obligations to remove or mitigate environmental effects of past disposal and release of certain wastes and substances at various sites. The Company records liabilities for affected sites when environmental assessments indicate probable cleanup and the costs can be reasonably estimated. Other than for costs of assessments themselves, the timing and amount of these liabilities is generally based on the Company's commitment to a formal plan of action, such as an approved remediation plan. The reliability and precision of the loss estimates are affected by numerous factors, such as different stages of site evaluation and reevaluation of the degree of remediation required. The Company adjusts its liabilities as new remediation requirements are defined, as information becomes available permitting reasonable estimates to be made and to reflect new and changing facts. It is reasonably possible that changes in estimates will incur in the near term. Unasserted claims are not reflected in the Company's environmental remediation liabilities.

The Company is currently engaged in ongoing environmental remediation efforts at both its Portland, Oregon and Springfield, Ohio manufacturing facilities. Current estimates provide for some level of remediation activities in Portland through 2027 and Springfield through 2010. Costs of certain remediation activities at the Portland facility are shared with The Boeing Company, with Cascade paying 70% of actual remediation costs. The Company has recorded a liability for the ongoing remediation efforts at its Fairview and Springfield facilities and certain environmental litigation of \$12.5 million at January 31, 2002 which includes a fiscal 2002 charge of \$1.5 million related to City of Portland litigation. The environmental liability at January 31, 2001 was \$16.4 million

In fiscal 2000 the Company recorded costs of \$7 million related to an adverse judgment in environmental litigation brought by The Boeing Company. As of January 31, 2002 the Company had paid the entire \$7 million judgment to The Boeing Company.

The Company and The Boeing Company are defendants in litigation brought in December 1999 by the City of Portland, Oregon (City), alleging damages arising from the proximity of a City water well field to groundwater contamination in the area of their respective Portland plant sites. The Company and The Boeing Company are remedying the contamination in question, which has not affected water pumped by the City from the well field. The City's complaint alleges damages of approximately \$6.4 million. In November 2000 the City raised new theories it asserts would increase its claimed damages against both defendants by an amount currently estimated to be \$16 million. In March 2002, the City asserted a further damage claim of up to approximately \$10.1 million. If the City were to prevail on all of its claims and be awarded all damage amounts it has asserted to date, the combined liability of the Company and The Boeing Company would approximate \$32.5 million.

In March 2001, the United States District Court for the District of Oregon granted a partial summary judgment to the City on certain liability issues raised in its original claim. The partial summary judgment will likely lead to a damage judgment in some amount on the December 1999 claim. The Company believes it has substantial defenses to damage amounts sought by the City. The Company believes most or all of the remaining November 2000 claim and the apparent March 2002 claim are without merit. There has been no allocation of possible damages between the Company and The Boeing Company. During the fourth quarter of fiscal 2002, the Company accrued \$1.5 million in connection with the City of Portland litigation. This reflects a present estimate of its allocable share of any eventual liability, however, the ultimate outcome of this matter cannot presently be determined.

The Company brought an action in 1992 in the Circuit Court of the State of Oregon for Multnomah County against several insurers to recover various expenses incurred in connection with environmental litigation and related proceedings. The Company settled with a number of the insurers in fiscal 1998 and received a jury verdict in the Company's favor against the two remaining insurers. The verdict awarded the Company a portion of its environmental expenses and defense costs. The Company has received court opinions to date regarding the environmental expenses and defense costs, and awarding attorneys fees, under which the nonsettling insurers would be liable to the Company for a total of approximately \$1.6 million. The Company has not recorded any amounts which may be recovered from the two insurers in its consolidated financial statements.

Lease Commitments

The Company leases certain of its facilities and equipment under noncancelable operating leases. Rent expense for the years ended January 31, 2002, 2002 and 2000 totaled \$3.4 million, \$4.7 million and \$4.5 million, respectively. Future minimum rental commitments under these leases as of January 31, 2002 are as follows (in thousands):

2003	\$ 1,960
2004	1,436
2005	676
2006	573
2007	456
Thereafter	1,435

Legal Proceedings

The Company is subject to legal proceedings, claims and litigation, in addition to the environmental matters previously discussed, arising in the ordinary course of business. While the outcome of these matters is currently not determinable, management does not expect the ultimate costs to resolve these matters will have a material adverse effect on the Company's consolidated financial position, result of operations, or cash flows.

Note 17 Fair Value of Financial Assets and Liabilities

The fair value of the Company's financial instruments represents the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation.

The carrying amount of the Company's cash and cash equivalents, trade receivables and payables and notes payable to banks approximates fair value due to the short maturity of these instruments. Fair value of long-term debt is estimated based either on quoted market prices for similar issues or on current rates offered to the Company for debt of the same remaining maturities. The fair value of the Company's exchangeable preferred stock cannot be estimated.

The estimated fair values of the Company's financial assets and liabilities is as follows:

	January 31			
	2002		2001	
	Fair Value	Carrying Amount	Fair Value	Carrying Amount
(in thousands)				
Financial assets:				
Cash and cash equivalents	\$ 25,611	\$ 25,611	\$ 12,418	\$ 12,418

Edgar Filing: CASCADE CORP - Form 10-K

January 31

Accounts receivable, net	40,085	40,085	53,846	53,846
Notes receivable, net	8,873	8,873	7,308	7,308
Financial liabilities:				
Notes payable to banks	743	743	5,099	5,099
Accounts payable	10,836	10,836	19,438	19,438
Long-term debt, including current portion	82,570	78,925	91,435	89,620

Note 18 Segment Information

The Company has adopted SFAS No. 131, "Disclosures about Segments of an Enterprise and Related Information" (SFAS 131), which establishes standards for reporting information related to operating segments, as well as standards for related disclosures about products and services and geographic areas. Operating segments are defined as components of an enterprise about which separate, discrete financial information is available for evaluation by the chief operating decision maker, or decision-making group in deciding how to allocate resources and assess performance. The Company's chief decision-making group, as defined under SFAS 131, is composed of its chief executive officer, chief financial officer and chief operating officer. The Company's operating units have several economic characteristics and attributes, including similar products, distribution patterns and classes of customers. As a result, the Company aggregates its operating units into a single operating segment related to the manufacturing, distribution and servicing of material handling load engagement products primarily for the lift truck industry.

41

Revenues and operating results are classified according to the country of origin. Identifiable assets are attributed to the geographic location in which they are located. Net sales, operating results and identifiable assets by geographic region were as follows:

Year Ended January 31

	North America	Europe	Other	Eliminations	Consolidation
(In thousands)					
2002

Report of Independent Accountants

To the Board of Directors and Shareholders of Cascade Corporation

In our opinion, the consolidated financial statements listed in the index appearing under Item 14(a)1 on page 46 present fairly, in all material respects, the financial position of Cascade Corporation and its subsidiaries (the Company) at January 31, 2002 and 2001, and the results of their operations and their cash flows for each of the three years in the period ended January 31, 2002 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index, appearing under Item 14(a)2 on page 46, presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and the financial statement schedule are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements and the financial statement schedule based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.
