The registrant hereby amends its Quarterly Report on Form 10-QSB, filed on May 13, 2003, by adding the following Item.

Item 3. CONTROLS AND PROCEDURES

Within 90 days prior to the date of this report, Newtek Business Services, Inc. carried out an evaluation, under the supervision and with the participation of the Newtek's management, including the Newtek's Chief Executive Officer and the Newtek's Chief Financial Officer, of the effectiveness of the design and operation of Newtek's disclosure controls and procedures pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, Newtek's Chief Executive Officer and Newtek's Chief Financial Officer concluded that Newtek's disclosure controls and procedures are effective in alerting them in a timely manner to material information relating to Newtek (including its consolidated subsidiaries) required to be included in Newtek's periodic SEC filings. There have been no significant changes in Newtek's internal controls or in other factors that could significantly affect these controls subsequent to the date Newtek conducted its evaluation.

Disclosure controls and procedures are designed to ensure that information required to be disclosed in reports filed by Newtek under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls are also designed with the objective of ensuring that such information is accumulated and communicated to Newtek's management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Disclosure controls include internal controls that are designed to provide reasonable assurance that transactions are properly authorized, assets are safeguarded against unauthorized or improper use and transactions are properly recorded and reported.

Any control system, no matter how well conceived and operated, can provide only reasonable assurance that its objectives are achieved. The design of a control system inherently has limitations, including the controls' cost relative to their benefits. Additionally, controls can be circumvented. No cost-effective control system can provide absolute assurance that all control issues and instances of fraud, if any, will be detected.
