MACC PRIVATE EQUITIES INC.

Notes to Unaudited Condensed Consolidated Financial Statements

(1) Basis of Presentation

The accompanying unaudited condensed consolidated financial statements include the accounts of MACC Private Equities Inc. (Equities) and its wholly owned subsidiary MorAmerica Capital Corporation (MACC) which have been prepared in accordance with U.S. generally accepted accounting principles for investment companies. All material intercompany accounts and transactions have been eliminated in consolidation.

The financial statements included herein have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and instructions to Form 10-Q and Article 6 of Regulation S-X. The financial statements should be read in conjunction with the consolidated financial statements and notes thereto of MACC Private Equities Inc. and its Subsidiary as of and for the year ended September 30, 2006. The information reflects all adjustments consisting of normal recurring adjustments which are, in the opinion of management, necessary for a fair presentation of the results of operations for the interim periods. The results of the interim period reported are not necessarily indicative of results to be expected for the year. The balance sheet information as of September 30, 2006 has been derived from the audited balance sheet as of that date.

(2) Critical Accounting Policy

Investments in securities traded on a national securities exchange (or reported on the NASDAQ national market) are stated at the bid price on the final day of the period. Restricted and other securities for which quotations are not readily available are valued at fair value as determined by the Board of Directors. Among the factors considered in determining the fair value of investments are the cost of the investment; developments, including recent financing transactions, since the acquisition of the investment; financial condition and operating results of the investee; the long-term potential of the business of the investee; market interest rates for similar debt securities; and other factors generally pertinent to the valuation of investments. However, because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the securities existed, and the differences could be material.

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

In the valuation process, MACC uses financial information received monthly, quarterly, and annually from its portfolio companies which includes both audited and unaudited financial statements. This information is used to determine financial condition, performance, and valuation of the portfolio investments.

Realization of the carrying value of investments is subject to future developments. Investment transactions are recorded on the trade date and identified cost is used to determine realized gains and losses. Under the provisions of SOP 90-7, the fair value of loans and investments in portfolio securities on February 15, 1995, the fresh-start date, is considered the cost basis for financial statement purposes.

4

(3) Financial Highlights (Unaudited)

	For the three months ended December 31, 2006 -----	For the three months ended December 31, 2005 -----
Per Share Operating Performance (For a share of capital stock outstanding throughout the period):		
Net asset value, beginning of period	\$ 4.71	5.5
Income from investment operations:		
Investment expense, net	(0.06)	(0.09)
Net realized and unrealized gain (loss) on investment transactions	0.18	(0.33)
Conversion of note payable and accrued interest to shares of common stock	---	(0.00)
Total from investment operations	0.12	(0.42)
Net asset value, end of period	\$ 4.83	5.1
Closing market price	\$ 2.03	2.5
	For the three months ended December 31, 2006 -----	For the three months ended December 31, 2005 -----
Total return		
Net asset value basis	2.40 %	(7.70)
Market price basis	(20.70) %	(0.04)
Net asset value, end of period (in thousands)	\$ 11,897	12,61
Ratio to average net assets:		
Investment expense, net	1.26 %	1.6

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

Operating and income tax expense 3.46 %

4.0

The ratios of investment expense, net to average net assets, of operating expenses and income tax expenses to average net assets and total return are calculated for common stockholders as a class. Total return, which reflects the annual change in net assets, was calculated using the change in net assets between the beginning of the current fiscal year and end of the current year period divided by the beginning of the year average net assets. An individual common stockholders' return may vary from these returns.

(4) Recent Accounting Pronouncements

In July 2006, the FASB issued FASB Interpretation No. 48 ("FIN 48"), "Accounting for Uncertainty in Income Taxes—an Interpretation of FASB Statement No. 109." This interpretation prescribes a recognition threshold and measurement process for recording in the financial

5

statements uncertain tax positions taken or expected to be taken in a tax return. Additionally, this interpretation provides guidance on the derecognition, classification, accounting in interim periods, and disclosure requirements for uncertain tax positions. The provisions of FIN 48 will be effective at the beginning of the first fiscal year that begins after December 15, 2006. We are evaluating the effect, if any, the adoption of FIN 48 will have on our financial statements.

In September 2006, the Securities and Exchange Commission published Staff Accounting Bulletin ("SAB") No. 108 (Topic 1N), "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements." SAB No. 108 requires registrants to quantify misstatements using both the balance-sheet and income-statement approaches, with adjustment required if either method results in a material error. The provisions of SAB No. 108 are effective as of the beginning of the first fiscal year that ends after November 15, 2006. We are evaluating the effect, if any, the adoption of SAB No. 108 will have on our financial statements.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This section contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (the "1995 Act"). Such statements are made in good faith by MACC pursuant to the safe-harbor provisions of the 1995 Act, and are identified as including terms such as "may," "will," "should," "expects," "anticipates," "estimates," "plans," or similar language. In connection with these safe-harbor provisions, MACC has identified in its Annual Report to Shareholders for the fiscal year ended September 30, 2006, important factors that could cause actual results to differ materially from those contained in any forward-looking statement made by or on behalf of MACC, including, without limitation, the high risk nature of MACC's portfolio investments, the effects of general economic conditions on MACC's portfolio companies, the effects of recent or future losses on the ability of MorAmerica Capital to comply with applicable regulations of the Small Business Administration and MorAmerica Capital's ability to obtain future funding, changes in prevailing market interest rates, and contractions in the markets for corporate acquisitions and initial public offerings. MACC further cautions that such factors are not exhaustive or exclusive. MACC does not undertake to update any forward-looking statement which may be made from time to time by or on behalf of MACC.

Results of Operations

MACC's investment income includes income from interest, dividends and fees. Investment expense, net represents total investment income minus net operating expenses. The main objective of portfolio company investments is to achieve capital appreciation and realized gains in the portfolio. These gains and losses are not included in investment expense, net.

First Quarter Ended December 31, 2006 Compared to First Quarter Ended December 31, 2005

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

	For the three months ended December 31,	
	2006	2005

Net asset value per share:		
Beginning of period	\$ 4.71	5.00
End of period	\$ 4.83	5.00

10

Total Investment Income

During the current fiscal year first quarter, total investment income was \$254,351, a decrease of \$77,333, or 23%, from total investment income of \$331,684 for the prior year first quarter. In the current year first quarter as compared to the prior year first quarter, interest income decreased \$87,123, or 28% and dividend income increased \$9,790, or 38%. The decrease in interest income is the net result of repayments of principal on debt portfolio securities issued by nine portfolio companies, a decrease in interest income on three debt portfolio securities which have been placed on non-accrual of interest status, and an increase in interest income on one debt portfolio security which had been on non-accrual of interest status during the prior year first quarter and is currently making interest payments. In the current year first quarter, although MACC received a dividend on one existing portfolio investment, as compared to dividend income received in the prior year first quarter from two existing portfolio companies, the current year dividend was larger.

Net Operating Expenses

Net operating expenses for the first quarter of the current year were \$399,381, a decrease of \$152,342, or 28%, as compared to net operating expenses for the prior year first quarter of \$551,723. Interest expense decreased \$123,449, or 39%, in the current year first quarter due to the repayment of borrowings from the Small Business Administration ("SBA") of \$6,000,000 in the prior fiscal year. Management fees decreased \$31,745, or 27%, in the current year first quarter due to the decrease in capital under management. Professional fees increased \$21,293, or 51%, in the current year first quarter due in part to

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

the timing of legal expenses associated with the 2006 Annual Shareholders Meeting in the prior year first quarter. Other expenses decreased \$18,441, or 25%, in the current year first quarter as compared to the prior year first quarter. The decrease in other expenses is due to the decrease in directors and officers insurance, director's fees and board travel expense resulting from a reduction in the size of MACC's Board of Directors, and the timing of administrative expenses.

Investment Expense, Net

For the current year first quarter, MACC recorded investment expense, net of \$145,030, as compared to investment expense, net of \$220,039 during the prior year first quarter. The decrease in investment expense, net is the result of the decrease in operating expenses described above, partially offset by the decrease in investment income described above.

Net Realized Gain on Investments

During the current year first quarter, MACC had no net realized gain or loss on investments, as compared with net realized gain on investments of \$213,333 during the prior year first quarter. Management does not attempt to maintain a comparable level of realized gains quarter to quarter but instead attempts to maximize total investment portfolio appreciation through realizing gains in the disposition of securities. MACC's investment advisor earns an incentive fee which is calculated as a percentage of the excess of MACC's realized gains in a particular period, over the sum of net realized losses and unrealized depreciation during the same

11

period. As a result, the timing of realized gains, realized losses and unrealized depreciation can have an effect on the amount of the incentive fee payable to the investment advisor.

Net Change in Unrealized Appreciation/Depreciation of Investments and Other Assets

Net change in unrealized appreciation/depreciation on investments represents the change for the period in the unrealized appreciation, net of unrealized depreciation, on MACC's total investment portfolio based on the valuation method described under "Critical Accounting Policy".

MACC recorded net change in unrealized appreciation/depreciation on investments of \$424,024 during the current year first quarter, as compared to (\$1,016,410) during the prior year first quarter. This net change resulted from:

- o Unrealized appreciation in the fair value of five portfolio companies totaling \$474,024 during the current year first quarter, as compared to unrealized appreciation in the fair value of three portfolio companies totaling \$627,442 during the prior year first quarter.
- o Unrealized depreciation in the fair value of one portfolio company of \$50,000 during the current year first quarter, as compared to unrealized depreciation in the fair value of eight portfolio companies of \$1,430,519 during the prior year first quarter.
- o Reversal of unrealized appreciation of \$213,333 in one portfolio company during the prior year first quarter.

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

There was no net change in unrealized gain on other assets during the current year first quarter, as compared to a net change in unrealized loss on other assets of \$29,521 during the prior year first quarter.

Net Change in Net Assets from Operations

MACC experienced an increase of \$278,994 in net assets at the end of the first quarter of fiscal year 2006, and the resulting net asset value per share was \$4.83 as of December 31, 2006, as compared to \$4.71 as of September 30, 2006 and \$5.12 as of December 31, 2005.

MACC has six portfolio investments valued at cost, has recorded unrealized appreciation on nine portfolio investments, and has recorded unrealized depreciation on nine portfolio investments. The increase in net assets recorded during the current year first quarter was primarily the result of increases in the fair value of five portfolio investments. Quarterly valuations can be affected by a portfolio company's short term performance that results in increases or decreases in unrealized depreciation and unrealized appreciation for the quarter. Changes in the fair value of a portfolio security may or may not be indicative of the long term performance of the portfolio company.

12

Due to its previously reported agreement with the SBA, MACC is not currently making investments in new portfolio companies, however, MACC may periodically make follow-on investments. MACC is prudently selling portfolio companies and is using the resulting proceeds to reduce debt by paying SBA-guaranteed debentures. MACC recorded significant reductions in its interest expense and management fees in the first quarter of the current fiscal year as a result of reducing debt by paying SBA debentures.

While the economy continues to be strong, it is not even in all sectors. Portfolio companies have had to deal with high energy costs, high raw material costs, and in some cases flat or decreased sales. The growth of China and India and continued competition from imported products from Asia, Central America, and South America have made it more difficult to increase prices as commodity prices rise. The current world tensions and the continuing conflict in Iraq increase the uncertainty of future performance; however, the economy continues to grow and management believes MACC's investment portfolio may benefit from improved operating performance at a number of portfolio companies and from an anticipated robust market for corporate acquisitions and investments. The overall activity in the market for corporate acquisitions is strong.

Financial Condition, Liquidity and Capital Resources

To date, MACC has relied upon several sources to fund its investment activities, including MACC's cash and money market accounts and the Small Business Investment Company ("SBIC") leverage program operated by the SBA.

As an SBIC, MorAmerica Capital is required to comply with the regulations of the SBA (the "SBA Regulations"). These regulations include the capital impairment rules, as defined by Regulation 107.1830 of the SBA Regulations. As of December 31, 2006, the capital of MorAmerica Capital was impaired less than the 55% maximum impairment percentage permitted under SBA Regulations. MorAmerica Capital's impairment percentage was 43% at December 31, 2006. If MorAmerica Capital experiences negative operating results, no assurances can be given that MorAmerica Capital's impairment percentage will

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

continue to be less than the maximum impairment percentage in future periods. If MorAmerica Capital would exceed the maximum impairment percentage in future periods, a number of events could occur which would have a material adverse affect on the financial condition, results of operations, cash flow and liquidity of MACC and MorAmerica Capital. MorAmerica Capital is also currently limited by the SBA Regulations in the amount of distributions it may make to MACC.

As of December 31, 2006, MACC's cash and cash equivalents totaled \$3,035,785. MACC has commitments for an additional \$6,500,000 in SBA-guaranteed debentures, which expire on September 30, 2007. MorAmerica Capital and three other SBICs have entered into an agreement with the SBA in connection with an arbitration settlement. As a result of the terms of this agreement, MACC does not believe that MorAmerica Capital will have access to the SBIC capital program in fiscal year 2007. Subject to the other risks and uncertainties described in this quarterly report, MACC believes that its existing cash and cash equivalents and other anticipated cash flows will provide adequate funds for MACC's anticipated cash requirements during fiscal year 2007, including follow-on portfolio investment activities, if any, interest payments on

13

outstanding debentures payable, payments of principal on outstanding debentures payable, and administrative expenses. In light of the agreement with SBA, at the present time MACC is not making new investments, is prudently selling portfolio companies and is using the resulting proceeds to reduce debt by paying SBA-guaranteed debentures. Once SBA debt is repaid, MACC will evaluate alternatives to maximize shareholder value which may include a resumption of new investment funding or seeking shareholder approval to make liquidating distributions.

Debentures payable are composed of \$10,790,000 in principal amount of SBA-guaranteed debentures issued by MACC's subsidiary, MorAmerica Capital, which mature as follows: \$5,835,000 in fiscal year 2011, and \$4,955,000 in fiscal year 2012. MACC anticipates that MorAmerica Capital will not be able to refinance these debentures through the SBIC capital program when they mature. The following table shows MACC's significant contractual obligations for the repayment of debt and other contractual obligations as of December 31, 2006:

Payments due by period

Contractual Obligations

			Less			
Total	than 1 Year	1-3 Years	3-5 Years			
SBA Debentures	\$ 10,790,000	---	---	5,835,000		4
Incentive Fees Payable(1)	\$ 108,399	---	---	---		

(1) Under the terms of the Subordination Agreement previously disclosed, accrued incentive fees payable to the investment advisor are subordinated to all amounts payable by MorAmerica Capital to the SBA, including outstanding SBA-guaranteed debentures, and any losses the SBA may incur in connection with the settlement of arbitration proceedings occurring in late 2004.

MACC currently anticipates that it will rely primarily on its current cash and cash equivalents and its cash flows from operations to fund its other

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

cash requirements during fiscal year 2007. Although management believes these sources will provide sufficient funds for MACC to meet its anticipated cash requirements, there can be no assurances that MACC's cash flows from operations will be as projected, or that MACC's cash requirements will be as projected.

Portfolio Activity

MACC's primary business is investing in and lending to businesses through investments in subordinated debt (generally with detachable equity warrants), preferred stock and common stock. MACC, however, is not currently making new investments. The total portfolio value of investments in publicly and non-publicly traded securities was \$18,874,830 at December 31, 2006 and \$18,939,501 at September 30, 2006. During the three months ended December 31, 2006, MACC invested \$65,000 in a follow-on investment in one existing portfolio company. As noted above, MACC does not expect to make any investments in new portfolio companies during fiscal year 2007, but may invest up to \$100,000 in follow-on investments in existing

14

portfolio companies, subject to further adjustment based on current economic and operating conditions.

MACC frequently co-invests with other funds managed by MACC's investment advisor. When it makes any co-investment with these related funds, MACC follows certain procedures consistent with orders of the Securities and Exchange Commission for related party co-investments to reduce or eliminate conflict of interest issues. All of the \$65,000 invested during the current year first quarter represented a co-investment with funds managed by MACC's investment advisor.

Critical Accounting Policy

Investments in securities traded on a national securities exchange (or reported on the NASDAQ national market) are stated at the average of the bid price on the three final trading days of the valuation period which is not materially different from the bid price on the final day of the period. Restricted and other securities for which quotations are not readily available are valued at fair value as determined by the Board of Directors. Among the factors considered in determining the fair value of investments are the cost of the investment; developments, including recent financing transactions, since the acquisition of the investment; the financial condition and operating results of the investee; the long-term potential of the business of the investee; market interest rates on similar debt securities; and other factors generally pertinent to the valuation of investments. However, because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the securities existed, and the differences could be material.

In the valuation process, MorAmerica Capital uses financial information received monthly, quarterly, and annually from its portfolio companies which includes both audited and unaudited financial statements. This information is used to determine financial condition, performance, and valuation of the portfolio investments.

Realization of the carrying value of investments is subject to future developments. Investment transactions are recorded on the trade date and identified cost is used to determine realized gains and losses. Under the provisions of SOP 90-7, the fair value of loans and investments in portfolio

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

securities on February 15, 1995, the fresh-start date, is considered the cost basis for financial statement purposes.

Determination of Net Asset Value

The net asset value per share of MACC's outstanding common stock is determined quarterly, as soon as practicable after and as of the end of each calendar quarter, by dividing the value of total assets minus total liabilities by the total number of shares outstanding at the date as of which the determination is made.

15

Item 3. Quantitative and Qualitative Disclosure About Market Risk

MACC is subject to market risk from changes in market interest rates that affect the fair value of MorAmerica Capital's debentures payable determined in accordance with Statement of Financial Accounting Standards No. 107, Disclosures About Fair Value of Financial Instruments. The estimated fair value of MorAmerica Capital's outstanding debentures payable at December 31, 2006, was \$10,981,000, with a cost of \$10,790,000. Fair value of MorAmerica Capital's outstanding debentures payable is calculated by discounting cash flows through estimated maturity using a SBA borrowing rate currently available (6.4% at December 31, 2006) for debt of similar original maturity. None of MorAmerica Capital's outstanding debentures payable are publicly traded. Market risk is estimated as the potential increase in fair value resulting from a hypothetical 0.5% decrease in interest rates. Actual results may differ.

December 31, 2006

Fair Value of Debentures Payable	\$	10,981,000
Amount Above Cost	\$	191,000
Additional Market Risk	\$	196,000

Item 4. Controls and Procedures

As of the end of the period covered by this report, in accordance with Item 307 of Regulation S-K promulgated under the Securities Act of 1933, as amended, the Chief Executive Officer and Chief Financial Officer of MACC (the "Certifying Officers") have conducted evaluations of MACC's disclosure controls and procedures. As defined under Sections 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the term "disclosure controls and procedures" means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive officer or officers and principal financial officer or officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. The Certifying Officers have reviewed MACC's disclosure controls and procedures and

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

have concluded that those disclosure controls and procedures are effective as of the date of this Quarterly Report on Form 10-Q. In compliance with Section 302 of the Sarbanes-Oxley Act of 2002 (18 U.S.C. 1350), each of the Certifying Officers executed an Officer's Certification included in this Quarterly Report on Form 10-Q.

As of the date of this Quarterly Report on Form 10-Q, there have not been any significant changes in MACC's internal controls or other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

16

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

There are no items to report.

Item 1A. Risk Factors.

There are no material changes to report from the risk factors disclosed in MACC's Annual Report on Form 10-K for the year ended September 30, 2006.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

There are no items to report.

Item 3. Defaults Upon Senior Securities.

There are no items to report.

Item 4. Submission of Matters to a Vote of Security Holders.

There are no items to report.

Item 5. Other Information.

There are no items to report.

Item 6. Exhibits.

The following exhibits are filed with this Quarterly Report on Form 10-Q:

- 31.1 Section 302 Certification of David R. Schroder (CEO)
- 31.2 Section 302 Certification of Robert A. Comey (CFO)
- 32.1 Section 1350 Certification of David R. Schroder (CEO)
- 32.2 Section 1350 Certification of Robert A. Comey (CFO)
